The conferees have denied any additional resources for the Library to expand its experimentation with a computerized, on-line nationwide network to share bibliographic material. Instead, as a predecessor to costly new experimentation, the Library is encouraged to conduct a feasibility study of the alternatives available to accomplish an efficient exchange of bibliographic material with other libraries and to determine for each alternative the costs, benefits, service impact, and the impact on the other components of the Library's automated systems workload, particularly those that service Congressional users. These alternatives should include offline computer tape operations, a stand-alone communications terminal dedicated to online storage of bibliographic data, manual processes, and other feasible possibilities. The General Accounting Office should be consulted in regard to the methodology to be used in conducting such a study and should be asked to validate the results.

COPYRIGHT OFFICE

Amendment No. 48: Provides that $4,600,000 of the funds credited to the salaries and expenses appropriation during fiscal year 1979 under 17 USC 708(c) shall be available for obligation during such fiscal year instead of $4,100,000 as provided by the House.

ADMINISTRATIVE PROVISIONS

Amendments Nos. 49 and 50: Provide $126,500 to the Library of Congress for attendance at meetings instead of $116,500 as proposed by the House and $136,500 as proposed by the Senate; of which $47,000 is for the Congressional Research Service instead of $37,000 as proposed by the House and $57,000 as proposed by the Senate.

TITLE III—GENERAL PROVISIONS

Amendment No. 51: Deletes language proposed by the House that would require withholding from obligation and expenditure five percentum of the budget authority provided in the Act for payments not required by law, provided that of the amount provided in the Act for each appropriation account, activity, and project, for payments not required by law, the amount withheld shall not exceed ten percentum.

Amendment No. 52: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate extending the reform of the longevity pay system for Senate employees contained in Section 110 of the Act to telephone operators on the United States Capitol telephone exchange and members of the Capitol Police whose compensation is disbursed by the Clerk of the House.

Amendment No. 53: Provides that, of the total budget authority provided in the Act, for payments not required by law, five percentum shall be withheld from obligation and expenditure, as proposed by the Senate.

The conferees are agreed that the effect of this provision should be applied by the various agencies, offices, and other bodies encompassed by the Legislative Branch Appropriation Act, 1979, by withholding from obligation and expenditure five per centum of the budget authority, for payments not required by law, contained in the Act. The five percent withholding shall be applied to each of the following: the combined appropriations to the House of Representatives and Joint Items that are disbursed by the Clerk of the House; the combined appropriations to the Senate and Joint Items that are disbursed by the Secretary of the Senate; the Office of Technology Assessment; the Congressional Budget Office; the combined appropriations to the Architect of the Capitol and Botanic Garden; the combined appropriations to the Library of Congress (including the Congressional Research Service); the combined appropriations to the Government Printing Office; the Copyright Royalty Tribunal; and the combined appropriations to the General Accounting Office and the Cost-Accounting Standards Board. The actual withholding of obligations and expenditures shall be applied to the above categories with due compliance to the orderly conduct of legislative missions and management prudence. Accordingly, the funds to be withheld from obligation and expenditure in each of the above categories shall be determined and administered by the Clerk of the House; the Secretary of the Senate; the Director of the Office of Technology Assessment; the Director of the Congressional Budget Office; the Architect of the Capitol; the Librarian of Congress; the Public Printer; the senior Commissioner of the Copyright Royalty Tribunal; and the Comptroller General, respectively.

The Conferees are agreed that the Librarian of Congress, in the implementation of the 5 percent cutback provision, shall make no cuts in the MARC program or other bibliographic services to libraries around the country, nor shall he reduce the hours of operation of the Library, nor the books for the blind and handicapped program, nor the copyright program, nor other services to the public, until maximum reductions are made in non-essential Library services such as excessive overhead in the Librarian's immediate office and the office of the Director of the Congressional Research Service and maximum efforts are made to reduce duplication, overlap and waste in Library programs.

Amendment No. 54: Deletes language proposed by the Senate that stipulated: "Notwithstanding the preceding provisions of this Act, of the total budget authority provided in this Act, five percentum shall be withheld from obligation and expenditure."

Amendment No. 55: Inserts short title of the Act as proposed by the Senate.

Conference total—with comparisons

The total new budget (obligational) authority for the fiscal years 1978 and 1979 recommended by the Committee of Conference, with comparisons to the fiscal year 1978 amount, the 1979 budget estimates, and the House and Senate bills for 1979 follows:

New budget (obligational) authority, fiscal year 1978	$990,247,800
Budget estimates of new (obligational) authority, fiscal year 1979	1,143,824,100
1978 supplemental	13,056,600
House bill, fiscal year 1979	922,491,800
1978 supplemental	0
Senate bill, fiscal year 1979	[1] 1,118,244,400
1978 supplemental	[1] 12,801,700
Conference agreement	[1] 1,118,244,400
1978 supplemental	[1] 12,801,700
Conference agreement compared with:	
New Budget (obligational) authority, fiscal year 1978	+127,996,600
Budget estimates of new (obligational) authority, fiscal year 1979	−25,579,700
1978 supplemental	−254,900
House bill, fiscal year 1979	+195,752,600
1978 supplemental	+12,801,700
Senate bill, fiscal year 1979	0
1978 supplemental	0

[1] Includes $195,566,000 for fiscal year 1979 and $12,801,700 for fiscal year 1978 for Senate items not considered by the House. Conforming to long practice, funds exclusively for operations and activities of the Senate—including two items jurisdictionally under the Architect of the Capitol—are left for decision and insertion by that body.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. RODINO (at the request of Mr. WRIGHT), for August 9, on account of medical reasons.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Member (at the request of Mr. JEFFORDS) to revise and extend his remarks and include extraneous material:)

Mr. GOLDWATER, for 5 minutes today.

(The following Members (at the request of Mr. KILDEE) and to revise and extend their remarks and include extraneous matter:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. PEPPER, for 5 minutes, today.
Mr. CORMAN, for 5 minutes, today.
Mr. FLOOD, for 5 minutes, today.
Mr. EILBERG, for 5 minutes, today.
Mr. OTTINGER, for 5 minutes, today.
Mr. DRINAN, for 5 minutes, today.
Mr. ROSTENKOWSKI, for 10 minutes, today.
Mr. LAFALCE, for 15 minutes, today.
Mr. BAUCUS, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. FLYNT, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $1,149.75.

(The following Members (at the request of Mr. JEFFORDS) and to include extraneous matter:)

Mr. ANDERSON of Illinois in five instances.
Mr. SARASIN.
Mr. FRENZEL in three instances.
Mr. ARCHER.
Mr. QUAYLE.
Mr. DORNAN.
Mr. FINDLEY.
Mr. BROOMFIELD.
Mr. MICHEL.
Mr. HILLIS.
Mr. KINDNESS.
Mr. MCCLORY.
Mr. COLLINS of Texas in three instances.
Mr. RAILSBACK.
Mr. BROWN of Ohio in two instances.
Mr. SYMMS in three instances.
Mr. STEIGER.
Mr. LAGOMARSINO.

(The following Members (at the request of Mr. KILDEE) and to include extraneous material:)

Mr. RONCALIO in five instances.
Mr. RYAN in two instances.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. SIMON.
Mr. HANNAFORD in two instances.
Mr. SANTINI.
Mr. ROSE.
Mr. MOAKLEY.
Mr. HAMILTON.
Mr. DOWNEY in two instances.
Mr. OTTINGER.
Mr. FRASER in five instances.
Mrs. BURKE of California.

Mr. WOLFF.
Mr. MAZZOLI in two instances.
Mr. DODD.
Mr. PATTISON of New York.
Mr. BENNETT.
Mr. STARK.
Mr. HUCKABY.
Mr. FASCELL.
Mr. BAUCUS.
Mr. ROGERS.

ENROLLED BILLS SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 2777. An act to provide for consumers a further means of minimizing the impact of inflation and economic depression by narrowing the price spread between costs to the producer and the consumer of needed goods, services, facilities, and commodities through the development and funding of specialized credit sources for and technical assistance to, self-help, not-for-profit cooperatives, and for other purposes; and

H.R. 10787. An act to authorize appropriations for activities and programs carried out by the Secretary of the Interior through the Bureau of Land Management.

ADJOURNMENT

Mr. KILDEE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 9 minutes p.m.) the House adjourned until tomorrow, Thursday, August 10, 1978, at 10 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4732. A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a cumulative report on rescissions and deferrals of budget authority as of August 1, 1978, pursuant to section 1014(e) of Public Law 93-344 (H. Doc. No. 95-374); to the Committee on Appropriations and ordered to be printed.

4733. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting notice of the location, nature, and estimated cost of various construction projects proposed to be undertaken by the Army Reserve, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

4734. A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to approve the sale of a certain naval vessel, and for other purposes; to the Committee on Armed Services.

4735. A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to approve the sale of certain naval vessels, and for other purposes; to the Committee on Armed Services.

4736. A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to approve the sale of a certain naval vessel, and for other purposes; to the Committee on Armed Services.

4737. A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to approve the sale of a certain naval vessel, and for other purposes; to the Committee on Armed Services.

4738. A letter from the Secretary of Health, Education, and Welfare, transmitting the family contribution schedules for the basic educational opportunity grant program for academic year 1979-80, pursuant to section 411(a)(3)(A)(ii) of the Higher Education Act of 1965, as amended (90 Stat. 2091); to the Committee on Education and Labor.

4739. A letter from the Assistant Secretary of the Treasury for Administration, transmitting notice of proposed changes in three existing records systems, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

4740. A letter from the Assistant Secretary of Housing and Urban Development for Administration, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

4741. A letter from the Deputy Assistant Secretary of the Interior, transmitting a copy of a proposed contract with Morrison-Knudsen Co., Inc., Boise, Idaho, for a research project entitled "Evaluation, Modification, and Application of Roadheaders in Underground Uranium Mining," pursuant to section 1(d) of Public Law 89-672; to the Committee on Interior and Insular Affairs.

4742. A letter from the Deputy Assistant Secretary of the Interior, transmitting a copy of a proposed contract with Science Applications, Inc., La Jolla, Calif., for a research project entitled "A Borehole Probe for In Situ X-Ray Diffraction Analysis," pursuant to section 1(d) of Public Law 89-672; to the Committee on Interior and Insular Affairs.

4743. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on political contributions made by Harold E. Horan, Ambassador-designate to Malawi, and by members of his family, pursuant to section 6 of Public Law 93-126; to the Committee on International Relations.

4744. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of a proposed license for the export of certain defense equipment sold commercially to Iran (MC-29-78), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on International Relations.

4745. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense equipment to Israel (transmittal No. 78-69), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4746. A letter from the Comptroller General of the United States, transmitting a report on problems in planning host nation support for U.S. forces in Europe (LCD-78-402, August 9, 1978); jointly, to the Committees on Government Operations, Armed Services, and International Relations.

4747. A letter from the Comptroller General of the United States, transmitting a report on the criteria and methods used by the Bureau of Reclamation, Corps of Engineers, and Soil Conservation Service in making benefit-cost analyses for Federal water resources projects; jointly, to the Committee on Government Operations, Agriculture, Interior and Insular Affairs, and Public Works and Transportation.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. SHIPLEY: Committee of conference. Conference report on H.R. 12935 (Report No. 95-1457). Ordered to be printed.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 13702. A bill to provide that the Territory of American Samoa be represented by a nonvoting Delegate to the U.S. House of Representatives, and for other purposes; with amendment (Rept. No. 95-1458). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 11894. A bill to amend certain laws relating to the Osage Tribe of Oklahoma and for other purposes; with amendment (Rept. No. 95-1459). Referred to

the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 12026. A bill to create the Indian Peaks Wilderness Area and the Arapaho National Recreation Area and to authorize the Secretary of the Interior to study the feasibility of revising the boundaries of the Rocky Mountain National Park; with amendment (Rept. No. 95–1460). Referred to the Committee of the Whole House on the State of the Union.

Mr. MURPHY of Illinois: Committee on Rules. House Resolution 1306. Resolution providing for the consideration of H.R. 13511. A bill to amend the Internal Revenue Code of 1954 to reduce income taxes, and for other purposes (Rept. No. 95–1461). Referred to the House Calendar.

Mr. JOHNSON of California: Committee on Public Works and Transportation. H.R. 13059. A bill authorizing the construction, repair, and preservation of certain public works on rivers and harbors for navigation, flood control, and for other purposes; with amendment (Rept. No. 95–1462). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. PHILLIP BURTON (for himself, Mr. FOWLER, Mr. EDWARDS of Oklahoma, Mr. STOKES, Mr. GINN, Mr. ST GERMAIN, Mr. FLOOD, Mr. SLACK, Mr. ZEFERETTI, Mr. TRAXLER, Mr. WHALEN, Mr. MAGUIRE, Mr. MURPHY of Illinois, Mr. THOMPSON, Mr. ANNUNZIO, Mr. SIMON, Mr. RICHMOND, Mr. CLAY, Mr. GONZALEZ, Mr. STRATTON, Mr. OBERSTAR, Mr. MICHAEL O. MYERS, Mr. LEHMAN, and Mrs. FENWICK):

H.R. 13801. A bill to provide that the Territory of American Samoa be represented by a nonvoting Delegate to the U.S. House of Representatives, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. BRINKLEY (for himself, Mr. HYDE, Mr. CORRADA, Mr. FISHER, Mr. NOLAN Mr. DRINAN, Mr. SARASIN, Mr. DODD, Mr. EARLY, Mr. MOFFETT, Mr. BURKE of Massachusetts, Mrs. HECKLER, and Mr. D'AMOURS):

H.R. 13802. A bill to incorporate the Gold Star Wives of America; to the Committee on the Judiciary.

By Mr. DUNCAN of Oregon:

H.R. 13803. A bill to terminate the authorization of the navigation project on the Columbia Slough, Oregon; to the Committee on Public Works and Transportation.

By Mr. FINDLEY:

H.R. 13804. A bill to amend the Social Security Act to make needed improvements in the programs of supplemental security income benefits, aid to families with dependent children, child welfare services and social services, and for other purposes; to the Committee on Ways and Means.

By Mr. FLORIO (for himself, Mr. AUCOIN, Mr. BADHAM, Mr. BRECKINRIDGE, Mr. BURGENER, and Mr. GIAIMO):

H.R. 13805. A bill to repeal section 3402(q) of the Internal Revenue Code of 1954 which requires, for income tax purposes, amounts to be withheld from certain gambling winnings; to the Committee on Ways and Means.

By Mr. HUCKABY:

H.R. 13806. A bill to authorize and direct the Secretary of Agriculture to make loans providing for annual payments to owners of nonindustrial private forest lands; to the Committee on Agriculture.

By Mr. LEGGETT:

H.R. 13807. A bill to authorize appropriations to carry out the Endangered Species Act of 1973 through fiscal year 1981 and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. ROBERTS (for himself, Mr. BROOKS, Mr. HIGHTOWER, Mr. CHARLES WILSON of Texas, Mr. POAGE, Mr. WRIGHT, and Mr. PICKLE):

H.R. 13808. A bill to designate the "Omar Burleson Federal Building"; to the Committee on Public Works and Transportation.

By Mr. ROBERTS (for himself, Mr. HIGHTOWER, Mr. CHARLES WILSON of Texas, Mr. POAGE, Mr. WRIGHT, and Mr. PICKLE):

H.R. 13809. A bill to designate the "George H. Mahon Building"; to the Committee on Public Works and Transportation.

By Mr. YOUNG of Florida (for himself and Mr. GOLDWATER):

H.R. 13810. A bill to authorize the Secretary of the Treasury to reimburse State and local law enforcement agencies for assistance provided at the request of the U.S. Secret Service; to the Committee on the Judiciary.

By Mr. BOWEN (for himself and Mr. BEVILL, Mr. BREAUX, Mr. BUCHANAN, Mr. COCHRAN of Mississippi, Mr. DICKINSON, Mr. DUNCAN of Tennessee, Mr. EDWARDS of Alabama, Mr. FLIPPO, Mr. FLOWERS, Mr. GUDGER, Mr. JONES of Tennessee, Mrs. LLOYD of Tennessee, Mr. MARRIOTT, Mr. MARTIN, Mr. MATHIS, Mr. MONTGOMERY, Mr. NICHOLS, Mr. SIKES, Mr. WATKINS, and Mr. WHITTEN):

H.R. 13811. A bill to amend the Endangered Species Act of 1973 to clarify congressional findings, intent, policy and purpose; to provide for economic and inflationary assessment of proposed listings; to review certain actions to determine whether exemptions from certain requirements of that act should be granted for such actions; to establish an Endangered Species Committee to review those actions; and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. COHEN:

H.R. 13812. A bill to amend title 28 of the United States Code to eliminate the divisions of Maine's judicial district; to the Committee on the Judiciary.

By Mr. COLEMAN:

H.R. 13813. A bill to modify the Smithville Lake project, Little Platte River, Mo., to establish a memorial to former Congressman Jerry L. Litton and redesignate the Smithville Lake project visitor center as the "Jerry L. Litton Memorial Visitor Center"; to the Committee on Public Works and Transportation.

By Mr. CORMAN:

H.R. 13814. A bill to amend section 8 of Public Law 93–233 to permit California to continue cash payments to SSI recipients in lieu of food stamps; to the Committee on Ways and Means.

By Mr. KINDNESS:

H.R. 13815. A bill to provide for the safeguarding of taxpayer rights, and for other purposes; to the Committee on Ways and Means.

By Mr. McDADE:

H.R. 13816. A bill to amend the Internal Revenue Code of 1954 to provide tax incentives for investment in labor surplus areas; to the Committee on Ways and Means.

By Mr. ROSTENKOWSKI (for himself and Ms. KEYS):

H.R. 13817. A bill to amend the Social Security Act with respect to the health programs authorized under it and for other purposes; to the Committee on Ways and Means.

By Mr. SMITH of Iowa:

H.R. 13818. A bill to assist in the handling of reserves of agricultural commodities and for other purposes; to the Committee on Agriculture.

By Mr. CLEVELAND:

H.J. Res. 1108. Joint resolution to authorize the President to proclaim the last Friday of April each year as "National Arbor Day"; to the Committee on Post Office and Civil Service.

By Mr. KAZEN:

H.J. Res. 1109. Joint resolution proposing an amendment to the Constitution of the United States to provide that appropriations made by the United States shall not exceed its revenues, except in time of war or national emergency; and to provide for the systematic paying of the national debt; to the Committee on the Judiciary.

By Mr LAFALCE:

H.J. Res. 1110. Joint resolution making the congressional determination that a simple majority of each body of a State legislature is sufficient for the purposes of proposed constitutional amendments for which the mode of ratification is by State legislatures; to the Committee on the Judiciary.

By Mr. CLEVELAND (for himself, Mr. D'AMOURS, Mr. ASHBROOK, Mr. BEARD of Tennessee, Mr. BENNETT, Mr. BROWN of Ohio, Mr. DON H. CLAUSEN, Mr. COHEN, Mr. ERLENBORN, Mr. FRENZEL, Mr. GINN, Mr. HARSHA, Mrs. HOLT, Mr. HYDE, Mr. ICHORD, Mr. JOHNSON of California, Mr. JOHN T. MYERS, Mr. MARTIN, Mr. MICHEL, Mr. ROBERTS, Mr. ROBINSON, Mr. SARASIN, Mr. STEED, Mr. WHITEHURST, and Mr. YOUNG of Florida):

H. Con. Res. 685. Concurrent resolution expressing the sense of Congress that all remaining proceedings with respect to the Seabrook Nuclear Station project should be expedited and that all licensing and permitting procedures for the construction and operation of nuclear generating stations should be reviewed and modified to improve the efficiency of such procedures; to the Committee on Interior and Insular Affairs.

By Mr. CLEVELAND (for himself, Mr. D'AMOURS, Mr. ANDERSON of Illinois, Mr. BAFALIS, Mr. BREAUX, Mr. BROYHILL, Mr. BURLISON of Missouri, Mr. COLLINS of Texas, Mr. CONABLE, Mr. CUNNINGHAM, Mr. DAVIS, Mr. EDWARDS of Oklahoma, Mrs. FENWICK, Mr. FLOOD, Mr. GILMAN, Mr. LAGOMARSINO, Mr. MCCLORY, Mr. ROUSSELOT, Mr. RUPPE, Mr. SATTERFIELD, Mr. SAWYER, Mr. STOCKMAN, Mr. STRATTON, Mr. WALSH, and Mr. WAMPLER):

H. Con. Res. 686. Concurrent resolution expressing the sense of Congress that all remaining proceedings with respect to the Seabrook Nuclear Station project should be expedited and that all licensing and permitting procedures for the construction and operation of nuclear generating stations should be reviewed and modified to improve the efficiency of such procedures; to the Committee on Interior and Insular Affairs.

By Mr. QUIE:

H. Res. 1305. Resolution urging the United States and Canada to cooperate in their efforts to improve the quality of air in the boundary regions; to the Committee on International Relations.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. HOLLENBECK introduced a bill (H.R. 13819) for the relief of Jack George Makari, which was referred to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 12452

By Mr. BUTLER:

—On page 111, after line 10, add the following:

"(c) In awarding contracts for services administered under this section, in States where State level prime sponsors are obligated to provide such services, the Secretary shall accord priority treatment to such State-level prime sponsors in those cases in which they are applicants for such contracts."

—Page 116, insert immediately following line 15, the following new section:

"SERVICES FOR OLDER WORKERS

"SEC. 308 (a) Services for older workers under this part shall be designed to assist eligible participants in overcoming the particular barriers to employment experienced by older workers, including skills that are obsolete or no longer needed in the community, changing physical characteristics associated with aging, employer reluctance to hire older workers, financial barriers to labor force participation, and lack of appropriate job opportunities.

"(b) The Secretary shall insure that each prime sponsor's plan for serving eligible older workers under this part includes provisions for—

"(1) assisting older workers to develop skills necessary for taking advantage of opportunities to continue in or reenter the labor force;

"(2) facilitating the transition of older workers from one occupation to another within the labor force and from nonparticipation to participation in the labor force, including, but not limited to—

"(A) outreach, assessment, and orientation to the local labor market and to occupational and training opportunities available in the community;

"(B) community-based central intake and information services;

"(C) counseling, placement assistance, and job placement;

"(D) technical assistance to employers for establishing flexitime, job-sharing, and other innovative arrangements suited to the older worker;

"(E) programs to overcome sex and age stereotyping job placement and development; and

"(F) outreach mechanisms and other efforts to increase labor force participation rates among eligible participants who are able and willing to work but have been unable to secure employment or have been discouraged workers; and

"(3) coordinating services for older workers under this part with programs and services provided by senior centers, area agencies on aging, and State agencies on aging (as designated under the Older Americans Act of 1965).

"(c) Prime sponsors may make agreements with State and area agencies on aging and other public agencies and private nonprofit organizations for service for older workers to meet the purposes of this section.

H.R. 12452

By Mr. WAXMAN:

—Page 116, after line 15, insert the following new section:

"PROJECTS FOR MIDDLE-AGED AND OLDER WORKERS

"SEC. 309. (a) The Secretary shall—

"(1) develop and establish employment and training policies and programs for middle-aged and older workers which will reflect appropriate consideration of these workers' importance in the labor force and lead to a more equitable share of employment and training resources for middle-aged and older workers;

"(2) develop and establish programs to assist workers over forty years of age in pursuing second careers, including, but not necessarily limited to, work experience, vocational education, public service employment, on-the-job training; occupational upgrading, and job search and placement; and

"(3) conduct research on the relationships between age and employment and insure that the findings of such research are widely disseminated in order to assist employers in both the public and the private sectors better understand and utilize the capabilities of middle-aged and older workers.

"(b) in carrying out the provisions of subsection (a) the Secretary shall provide for appropriate arrangements to be made with prime sponsors, members of the business community (including small business), labor organizations, local educational agencies, and community-based organizations as defined in section 125(4) of this Act. Such arrangements may include, but need not be limited to—

"(1) an analysis of the local labor force on the basis of such factors as age, educational background, income, race, and sex, focusing particularly on comparative rates of labor force participation and of unemployment and underemployment among the various demographic groups studied;

"(2) an assessment of each participant's skills and work experience for purposes of formulating realistic second career objectives, including formal vocational testing instruments supplemented by such functional assessment methods and techniques to detect those skills and abilities of a participant as may be related to desired second career and occupational upgrading objectives;

"(3) second career and occupational upgrading counseling by individuals knowledgeable about the employment and training needs of middle-aged and older workers;

"(4) the establishment of second career objectives which will—

"(A) provide reasonable assurances to the participant that public and private sector demand exists for the skills developed in the second careers program; and

"(B) enable the participant to compete successfully in the job market; and

"(5) establishment of formal second careers training agreements, between participants and program sponsors, which—

"(A) set forth the career objectives of the participants and the steps required of each participant and prime sponsor to achieve these objectives;

"(B) will remain in force until its terms are fulfilled, or renegotiated or terminated according to such procedures as shall be prescribed by the Secretary; and

"(C) may be renegotiated or terminated, at any time, by the participant, or by the program sponsor for good cause.

"(c) The Secretary is hereby authorized to pay program sponsors reasonable training costs to participants in second careers programs to the extent necessary to achieve the objectives of such programs in accordance with regulations prescribed by the Secretary, but in no case shall such payment exceed the permissible maximum under section 121(c)(1)(B). Such costs may include reasonable tuition for participants engaged in technical or other institutional training and payments to program sponsors providing on-the-job training, provided that such payments are based on the actual number of hours of such training given to the second careers program participant. The Secretary is authorized to pay for equipment, materials, and such other costs necessary for a participant to achieve the objectives of his second careers program.

"(d) Programs assisted under this section may provide for participation in employment and training programs on a part-time or flexible-time basis.

"(e) Participants in programs authorized under this section shall be individuals over the age of forty who are unemployed, underemployed, or economically disadvantaged, who have a family income (exclusive of any income received under a Federal or State welfare or unemployment program) which is not in excess of 125 percent of the Bureau of Labor Statistics lower living income level.

"(f) For the purposes of carrying out this section, the Secretary shall reserve from funds available for this title not more than 10 percent of the amount allocated pursuant to section 202(a).

"(g) No provision of this section shall be construed as intending any diminution of the employment and training opportunities available to workers over 40 years of age under titles II, VI, and VII of this Act.

Conform the table of contents accordingly.

H.R. 13511

By Mr. JEFFORDS:

—At the end thereof, add the following:

TITLE V—TAX INCENTIVES FOR THE PRODUCTION AND CONSERVATION OF ENERGY AND FOR CONVERSION TO ALTERNATIVE ENERGY SOURCES

SEC. 501. RESIDENTIAL ENERGY CREDIT.

(a) GENERAL RULE.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowable) is amended by inserting after section 44B the following new section:

"SEC. 44C. RESIDENTIAL ENERGY CREDIT.

"(a) GENERAL RULE.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the sum of—

"(1) the qualified energy conservation expenditures, plus

"(2) the qualified renewable energy source expenditures, plus

"(3) the qualified hydrogen energy expenditures.

"(b) QUALIFIED EXPENDITURES.—For purposes of subsection (a)—

"(1) ENERGY CONSERVATION.—In the case of any dwelling unit, the qualified energy conservation expenditures are 20 percent of so much of the energy conservation expenditures made by the taxpayer during the taxable year with respect to such unit as does not exceed $2,000.

"(2) RENEWABLE ENERGY SOURCES.—In the case of any dwelling unit, the qualified renewable energy source expenditures are the following percentages of the renewable energy source expenditures made by the taxpayer during the taxable year with respect to such unit:

"(A) 30 percent of so much of such expenditures as does not exceed $2,000, plus

"(B) 20 percent of so much of such expenditures as exceeds $2,000 but does not exceed $10,000.

"(3) HYDROGEN ENERGY.—In the case of any dwelling unit, the qualified hydrogen energy expenditures are 20 percent of so much of the hydrogen energy expenditures made by the taxpayer during the taxable year with respect to such unit as does not exceed $2,000.

"(4) PRIOR EXPENDITURES BY TAXPAYER ON SAME RESIDENCE TAKEN INTO ACCOUNT.—If for any prior taxable year a credit was allowed to the taxpayer under this section with respect to any dwelling unit by reason of energy conservation expenditures or renewable energy source expenditures, paragraph (1),

(2), or (3), (whichever is appropriate) shall be applied for the taxable year with respect to such dwelling unit by reducing each dollar amount contained in such paragraph by the prior year expenditures taken into account under such paragraph.

"(5) MINIMUM DOLLAR AMOUNT.—No credit shall be allowed under this section with respect to any return for any taxable year if the amount which would (but for this paragraph) be allowable with respect to such return is less than $10.

"(c) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) ENERGY CONSERVATION EXPENDITURE.—The term 'energy conservation expenditure' means an expenditure made on or after April 20, 1977, by the taxpayer for insulation or any other energy-conserving component (or for the original installation of such insulation or other component) installed in or on a dwelling unit—

"(A) which is located in the United States, the Virgin Islands, or Guam,

"(B) which is used by the taxpayer as his principal residence, and

"(C) the construction of which was substantially completed before April 20, 1977.

"(2) RENEWABLE ENERGY SOURCE EXPENDITURE.—

"(A) IN GENERAL.—The term 'renewable energy source expenditure' means an expenditure made on or after April 20, 1977, by the taxpayer for renewable energy source property installed in connection with a dwelling unit—

"(i) which is located in the United States, the Virgin Islands, or Guam, and

"(ii) which is used by the taxpayer as his principal residence.

"(B) ITEMS INCLUDED.—The term 'renewable energy source expenditure' includes only expenditures for—

"(i) renewable energy source property,

"(ii) labor costs properly allocable to the onsite preparation, assembly, or installation of renewable energy source property, or

"(C) SWIMMING POOL, ETC., USED AS STORAGE MEDIUM.—The term 'renewable' energy source expenditure' does not include any expenditure properly allocable to a swimming pool used as an energy storage medium or to any other energy storage medium which has a function other than the function of such storage.

"(3) HYDROGEN ENERGY EXPENDITURES.—

"(A) IN GENERAL.—The term 'hydrogen energy expenditures' means an expenditure made on or after April 20, 1977, by the taxpayer for hydrogen energy property and installation installed in connection with a dwelling unit—

"(i) which is located in the United States, the Virgin Islands, or Guam, and

"(ii) which is used by the taxpayer as his principal residence.

"(B) ITEMS INCLUDED.—The term 'hydrogen energy expenditures' includes only expenditures for—

"(i) hydrogen energy property, and

"(ii) labor costs properly allocable to the onsite preparation, assembly, or installation of hydrogen energy property, or to the modification of conventional property for the use of hydrogen as a fuel.

"(4) INSULATION.—The term 'insulation' means any item—

"(A) which is specifically and primarily designed to reduce when installed in or on a dwelling (or water heater) the heat loss or gain of such dwelling (or water heater),

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remain in operation for at least 3 years, and

"(D) which meets the performance and quality standards, if any, which—

"(i) have been prescribed by the Secretary by regulations, and

"(ii) are in effect at the time of the acquisiton of the item.

"(5) OTHER ENERGY-CONSERVING COMPONENT.—The term 'other energy-conserving component' means any item (other than insulation)—

"(A) which is—

"(i) a furnace replacement burner designed to achieve a reduction in the amount of fuel consumed as a result of increased combustion efficiency,

"(ii) a device for modifying flue openings designed to increase the efficiency of operation of the heating system,

"(iii) an electrical or mechanical furnace ignition system which replaces a gas pilot light,

"(iv) a storm or thermal window or door for the exterior of the dwelling,

"(v) an automatic energy-saving setback thermostat,

"(vi) caulking or weather stripping of an exterior door or window,

"(vii) a heat pump which replaces an electric resistance heating system,

"(viii) meters which display the cost of energy usage,

"(ix) a replacement fluorescent lighting system,

"(x) an evaporative cooling device,

"(xi) is an item (other than a fireplace) which is designed to use wood and peat as a fuel for space heating, the heating of water or cooking of food, or any combination thereof, including any controls, ducts, stovepipes, footing or other item (other than a chimney) necessary for the safe and efficient operation of any such item, or

"(xii) an item of the kind which the Secretary specifies by regulations as increasing (by conversion or otherwise) the energy efficiency of the dwelling,

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remain in operation for at least 3 years, and

"(D) which meets the performance and quality standards, if any, which—

"(i) have been prescribed by the Secretary by regulations, and

"(ii) are in effect at the time of the acquisition of the item.

In establishing regulations under this paragraph, the Secretary shall prescribe (i) guidelines setting forth the criteria which are used in the determination of whether an item is an energy-conserving component, and (ii) a procedure under which a manufacturer of an item may request the Secretary to specify or certify that item as an energy-conserving component.

"(6) RENEWABLE ENERGY SOURCE PROPERTY.—The term 'renewable energy source property' means property—

"(A) which, when installed in connection with a dwelling—

"(i) uses solar energy in either an active or passive method the primary purpose of which is heating or cooling such dwelling or providing hot water for use within such dwelling, or in the production of electricity,

"(ii) uses wind energy for nonbusiness residential purpcses,

"(iii) is necessary to distribute or use geothermal deposits (as defined in section 613 (e)) which provide geothermal energy to heat or cool such building or provide hot water for use within such building, or

"(iv) uses any other form of renewable energy which the Secretary specifies by regulations,

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remain in operation for at least 5 years, and

"(D) which meets the performance and quality standards, if any, which—

"(i) have been prescribed by the Secretary by regulations, and

"(ii) are in effect at the time of the acquisition of the property.

"(7) HYDROGEN ENERGY PROPERTY.—The term 'hydrogen energy property' means property—

"(A) which, when installed in connection with a dwelling—

"(i) uses hydrogen as a fuel for the purpose of heating or cooling such dwelling or providing hot water for use within such dwelling, or

"(ii) is used in the electrolysis of water for the production of hydrogen,

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remain in operation for at least 5 years, and

"(D) which meets the performance and quality standards, if any, which—

"(i) have been prescribed by the Secretary by regulations, and

"(ii) are in effect at the time of the acquisition of the property.

"(8) CONSULTATION IN PRESCRIBING STANDARDS.—Performance and quality standards shall be prescribed by the Secretary under paragraphs (4), (5), (6), and (7) only after consultation with the Secretary of Energy, the Secretary of Housing and Urban Development, and other appropriate Federal agencies.

"(9) WHEN EXPENDITURES MADE; AMOUNT OF EXPENDITURES.—

"(A) Except as provided in subparagraph (B), an expenditure with respect to an item shall be treated as made when original installation of the item is completed.

"(B) In the case of renewable energy source expenditures in connection with the construction or reconstruction of a dwelling, such expenditures shall be treated as made when the original use of the constructed or reconstructed dwelling by the taxpayer begins.

"(C) The amount of any expenditure shall be the cost thereof.

"(D) If less than 80 percent of the use of an item is for nonbusiness residential purposes, only that portion of the expenditures for such item which is properly allocable to use for nonbusiness residential purposes shall be taken into account. For purposes of the preceding sentence, use for a swimming pool shall be treated as use which is not for residential purposes.

"(10) PRINCIPAL RESIDENCE.—The determination of whether or not a dwelling unit is a taxpayer's principal residence shall be made under principles similar to those applicable to section 1034, except that—

"(A) no ownership requirement shall be imposed, and

"(B) the period for which a dwelling is treated as the principal residence of the taxpayer shall include the 30-day period ending on the first day on which it would (but for this subparagraph) be treated as his principal residence.

"(11) ENVIRONMENTAL RESTRICTIONS ON CERTAIN WOOD AND PEAT BURNING ITEMS.—No credit shall be allowed under subsection (a) for expenditures with respect to any item described in paragraph (5)(A)(xii) which are to be installed in any metropolitan or other area after the date on which—

"(A) the Administrator of the Environmental Protection Agency certifies to the Secretary that the emissions from such items would cause air quality in such area to be in violation of any Federal law, or

"(B) the Secretary of Agriculture certifies to the Secretary that additional consumption of wood in connection with such items would endanger forests in that area.

"(d) SPECIAL RULES.—For purposes of this section—

"(1) DOLLAR AMOUNTS IN CASE OF JOINT OCCUPANCY.—In the case of any dwelling unit

which is jointly occupied and used during any calendar year as a principal residence by 2 or more individuals—

"(A) the amount of the credit allowable under subsection (a) by reason of energy conservation expenditures or by reason of renewable energy source expenditures (as the case may be) made during such calendar year by any of such individuals with respect to such dwelling unit shall be determined by treating all of such individuals as one taxpayer whose taxable year is such calendar year; and

"(B) each of such individuals shall be allowed a credit under subsection (a) for the taxable year in which such calendar year ends (subject to the limitation of paragraph (5) of subsection (b)) in an amount which bears the same ratio to the amount determined under subparagraph (A) as the amount of such expenditures made by such individual during such calendar year bears to the aggregate of such expenditures made by all of such individuals during such calendar year.

"(2) TENANT-STOCKHOLDER IN COOPERATIVE HOUSING CORPORATION.—In the case of an individual who holds stock as a tenant-stockholder (as defined in section 216) in a cooperative housing corporation (as defined in such section), such individual shall be treated as having made his tenant-stockholder's proportionate share (as defined in section 216(b)(3)) of any expenditures of such corporation.

"(3) CONDOMINIUMS.—

"(A) IN GENERAL.—In the case of an individual who is a member of a condominium management association with respect to a condominium which he owns, such individual shall be treated as having made his proportionate share of any expenditures of such association.

"(B) CONDOMINIUM MANAGEMENT ASSOCIATION.—For purposes of this paragraph, the term 'condominium management association' means an organization which meets the requirements of paragraph (1) of section 528(c) (other than subparagraph (E) thereof) with respect to a condominium project substantially all of the units of which are used as residences.

"(e) BASIS ADJUSTMENTS.—For purposes of this subtitle, if a credit is allowed under this section for any expenditure with respect to any property, the increase in the basis of such property which would (but for this subsection) result from such expenditure shall be reduced by the amount of the credit so allowed.

"(f) TERMINATION.—This section shall not apply to expenditures made after December 31, 1985.".

(b) CARRYOVER OF UNUSED CREDIT.—If the amount of the credit determined under this section for the taxable year exceeds the liability for the taxpayer for the tax under this chapter for the taxable year, the excess shall be carried over to each of the two taxable years succeeding that taxable year. The entire amount of the unused credit for an unused credit year shall be carried to the earliest of the two taxable years to which it may be carried, and then to the succeeding taxable year to the extent that it may not be added for a prior taxable year to which it might be carried.

(c) INSPECTION.—To the extent not presently authorized and utilized by any agency of the United States in the assessment and collection of income taxes, no procedure or practice which utilizes onsite inspection of the residence of an individual shall be employed to determine if that individual is entitled to a credit under section 44C of the Internal Revenue Code of 1954, as added by subsection (a), unless such procedure or practice provides that such inspection shall take place only with the written consent of such individual.

(d) TECHNICAL AND CLERICAL AMENDMENTS.—

(1) The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting after the item relating to section 44B the following new item: "Sec. 44C. Residential energy credit.".

(2) Subsection (c) of section 56 (defining regular tax deduction) is amended by striking out "credits allowable under—" and all that follows and inserting in lieu thereof "credits allowable under subpart A of part IV other than under sections 31, 39, 43, 44C, 44E, 44F, 44G, 44H, 44I, and 44J.".

(3) Subsection (a) of section 1016 (relating to adjustments to basis) is amended by inserting after paragraph (20) the following new paragraph:

"(21) to the extent provided in section 44C(e), in the case of property with respect to which a credit has been allowed under section 44C;".

(4) Subsection (b) of section 6096 (relating to designation of income tax payment to Presidential Election Campaign Fund) is amended by striking out "and 44B" and inserting in lieu thereof "44B, and 44C".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending on or after April 20, 1977.

H.J. RES. 638

By Mr. RAILSBACK:

—On the first page, line 10, strike the period and insert the following: ", *Provided, however*, That any legislature which shall have ratified the article of amendment within the first seven years of this period may, by the same vote and procedure required for ratification, rescind that action at any time after this resolution becomes effective and prior to adoption of the amendment. The Administrator of the General Services Administration shall certify to Congress all resolutions of ratification or rescission of this amendment as received from the several States for final determination by the Congress as to whether the amendment shall have been adopted."

EXTENSIONS OF REMARKS

THE SUPREME COURT'S 1977–1978 TERM

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. HAMILTON. Mr. Speaker, I insert my Washington Report for August 9, 1978 into the CONGRESSIONAL RECORD:

THE SUPREME COURT'S 1977–1978 TERM

As government institutions go, the United States Supreme Court ranks high in the eyes of Americans, certainly far above Congress and the President. To be sure, the nine Justices have several things going for them. They never give press conferences or get into nasty arguments in public. They wield great power without having to run for election. Most citizens stand in almost reverntial awe of the black robes of the Justices and the marble halls and draped chambers of the Supreme Court building.

The Burger Court has just completed its 1977–1978 session with no striking changes from previous years. It continues to be centrist and fragmented. No dominant personality or philosophical majority guides it. The ideological labels of "conservative" or "liberal" do not seem to apply to most of its decisions. Supporters of the Burger Court salute it for its moderation and restraint, but critics contend that it is a troubled state, confused in its values and unconvincing in its opinions.

The Burger Court often shapes its rulings amid sharp divisions and constantly shifting alliances among the Justices. In this term alone 19 cases were decided by a five-to-four vote. On the "conservative" side there are two men (Justices Burger and Rehnquist) and on the "liberal" side also two (Justices Brennan and Marshall), but the five other Justices regularly swing between the two extremes. The diversity of the Burger Court is aptly illustrated by the most famous case of the session, the Bakke case. There were six separate opinions spread over 150 pages of commentary. The Justices split into two groups of five—with Justice Powell casting the deciding votes—making possible two majorities. One majority upheld affirmative action programs as remedies for past discrimination while the other rejected the use of racial quotas and admitted Mr. Bakke to medical school.

In the important area of criminal law, the Burger Court has generally strengthened the hand of the law enforcement officer at the expense of the rights of the accused. In the past it has favored the police about two-thirds of the time, but in this term it sided with the suspect in slightly more than half of all cases. The Justices made it more difficult to impose the death sentence, an action which willl cause many states to rewrite their capital punishment laws. In wiretapping cases, the Burger Court continued to support the prosecutor. A related but highly controversial law enforcement decision raised questions about freedom of the press. The Burger Court authorized the police to make a court-approved, surprise search for evidence in a newsroom, arguing that press freedom did not require the additional protections of prior notice and a chance to dissent in court. Expert observers are saying that the ruling will inhibit the news media and limit free expression.

Unlike some of its predecessors, the Burger Court has shied away from "judicial legislation" and has taken the position that Congress and the state legislatures should decide matters of public policy. In halting the completion of a $120-million water project to preserve a tiny fish known as the snail darter, the Justices put aside their own appraisal of the wisdom of the law, deferred to the judgment of Congress and said that where a statute was clear, the judicial process would come to an end and the intent of Congress would stand.

Although the Burger Court has tended to favor business over government, the balance has been close. This term the Justices sent down no thunderbolts, but they did consolidate and refine the law with respect to particular business problems. The Justices held that the Occupational Safety and Health Administration could no longer make warrantless searches of business premises, but then suggested that warrants might be easily obtainable. They supported the nuclear power industry in two cases and strengthened the ability of corporations to defend themselves

---

Statements or insertions which are not spoken by the Member on the floor will be identified by the use of a "bullet" symbol, i.e., ●

in class action suits. They also recognized for the first time the right of corporations to participate in political discussion. The Justices, however, did not side with business in some instances. They ruled against television manufacturers by refusing to require the government to impose import duties on Japanese electronic equipment. They enlarged the power of states to tax interstate business and backed the right of states to work together in the taxing of interstate corporations. They also expanded consumer rights to include utility service by holding that a customer cannot be deprived of utility service without due process of law.

It is hard to find strong trends in the decisions of the Burger Court during the past term. The Justices avoided extremes, often deferred to the judgment of Congress and sometimes ducked tough issues (such as the constitutionality of the legislative veto). By and large, the Burger Court neither pleased nor offended the various special interest groups affected by its decisions. The Justices were roundly criticized on some occasions, but much of the criticism was muted.●

SALLE CASTLE AND MUSEUM IN SALLE, ITALY

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. BIAGGI. Mr. Speaker, I have been asked by friends and constituents, who have great pride in and special affection for their glorious and noble Italian heritage and its legacy, and which I share with them, to highlight for you and our colleagues here today the particular efforts of Italian-Americans, whose forebearers came from Salle, Italy, to keep alive their ancestry and history through the reconstruction and establishment of the Salle Castle and Museum in Salle, Province of Pescara, in the Abruzzo region of Italy.

The Salle Castle and Museum Restoration project site includes three main areas of interest, namely, the castle and museum, the courtyard and fountain, and the Church, which houses the shrine of the patron Saint Roberto di Salle. There are specific plans for each division which I would like to mention for your benefit and that of our constituencies throughout the Nation, so that all may be aware of and appreciate the dedication of these individuals, and the excellence of their pursuits.

The castle will house the museum proper. Among the antique articles to be exhibited within this section are the following: An embroidered medieval coat of arms to be displayed as a wall hanging in the entrance foyer; many framed oil portraits of the ancestors of the di Genova family; books on the history of Italy and the Salle district to be contained in a library; charts dating back to 1650 for featuring in a map room; period costumes depicting the dress of a 17th century herald. Additionally, the edifice, which is constructed of stone indigenous to the area (comancini), is ornamented with assorted stone carvings dating back to the mid-16th century.

We can also picture a remarkable 15th-century carved stone fountain standing in the courtyard, along with three mounted vintage cannons with pedestals and munitions. This section of the site is proposed for future open-air entertainments, such as music and song festivals held during the summer months.

Within the church is the chapel of St. Roberto di Salle. This local patron saint was revered recently at a large reception held in New York. Eventually, a permanent shrine for the relic of St. Roberto will be contained in the chapel. Antique altar pieces, including candlesticks, altar cloths, vestments, and assorted artifacts are placed in the chapel as well. The chapel will soon be made available for regular religious services, conducted by the local priest, and attended by the inhabitants of Salle.

And it is the Salle Castle and Museum trust, of 565 Park Avenue, New York, N.Y. 10021, that is being created, through and with the inspiration of Baron Mario di Genova as trustee and sole benefactor, to promote and further the activities of the Salle Castle and Museum, to be beneficial to the city of Salle in religious, cultural, scientific, and historical advancements.

I want to congratulate Baron Mario di Genova for his expertise and leadership in the development of the trust organization, which began in 1976. The Salle Social Club in my home district of Queens, N.Y., with Mr. Remo Salerni as the president, is associated with the trust. Mr. Salerni and the membership, my dear friends, should also be commended for their fine efforts. The Salle Social Club is part of the Federal of the Italian-American Societies of Queens, which is spearheaded by Mr. Vincent Iannece as president, and also guided by Mr. Salerni as federation trustee.

The magnificance of the culture of Salle, enjoyed as far back to the year 891 as noted in a reference to the town, and the spendor of the medieval Salle Castle, can now be viewed. I know all will agree that it is both noteworthy and commendable that all the efforts mentioned will enable future generations to reap and enjoy the benefits of the knowledge of antiquity. I am certain that all who have an interest in this significant and worthwhile project would want to contribute their talents and support.●

POPE PAUL VI

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, August 7, 1978

● Mr. OTTINGER. Mr. Speaker, I want to join the 600 million members of the Roman Catholic Church in mourning the death of Pope Paul VI.

One of the most significant facets of Pope Paul's 15-year reign was his extensive travels throughout the world. He visited 16 countries on six continents, where he consistently called for social and economic justice and greater cooperation in an increasingly turbulent world. He is the only Pope ever to visit the United States. He was always anxious about the future of global peace and worked hard toward the dissolution of violence and war.

All who knew Pope Paul make special note of the gentleness and compassion of the man. It was these qualities which made Pope Paul an exceptional human being and distinguished world leader.●

USE OF OUR NATIONAL FORESTS

HON. TENO RONCALIO

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. RONCALIO. Mr. Speaker, last week my colleague from Montana, MAX BAUCUS, addressed the National Symposium on RARE II held on the campus of the University of Montana. The RARE II program is being conducted by the Forest Service on roadless areas on our national forests. The success or failure of this review will have a profound impact in many areas, particularly the West.

Representative BAUCUS' remarks summarize the progress of the RARE II program to date and the need for consensus among the various users of our national forests. His address is insightful and informative. For these reasons, I would like to include in the RECORD MAX'S remarks for the benefit of my colleagues.

The address follows:

REMARKS BEFORE THE NATIONAL SYMPOSIUM ON RARE II

(By Congressman Max Baucus)

Secretary Cutler, Chief McGuire and participants of the Conference on the Draft EIS for the RARE II process. I welcome each of you to Western Montana. May this symposium be stimulating and informative. Speaking of RARE experiences, what could be better than two days in Montana.

I have been assigned the task of presenting a Congressional perspective concerning the RARE II process. When I was asked, on rather short notice, to address you this evening, the old tale of the man who was attempting to cross the river only to find himself waist-deep in alligators immediately came to mind. Since the RARE II process was initiated last year, I am certain that Chief McGuire can identify with my analogy.

This evening I want to reinforce two basic points I have stressed since the beginning of the RARE II process. As I see it, the whole objective of the RARE II program is to arrive at some final decisions about the future use of the remaining roadless areas in the National Forest System. To the degree that the process can resolve the allocation decisions of some of these areas, two equally important objectives are achieved. First, we remove some of the uncertainty concerning the land base for non-wilderness forest uses, such as timber harvest, and secondly, we assure that wilderness values of key areas are, in fact, recognized, and these areas are included in the National Wilderness Preservation System.

From my perspective, RARE II will be an exercise in futility if the basic issues we con-

front in resource management are narrowly perceived and defined.

We must all recognize that decisions to allocate land and resources to specific use are meaningless if that use is not viewed in terms of its impact on people. We must understand that resource use is a dynamic rather than a static process.

For instance, how do we meet the ever increasing demands which are being placed upon the National Forest system for timber, grazing, wilderness and mineral exploration. In short, the demand for scarce resources by a variety of users is escalating at an alarming rate. How do we allocate the remaining roadless areas in an equitable fashion? In my opinion, this is the crust of the RARE II process.

We cannot isolate wilderness from the related issues. They are as closely linked as the roots, trunk and limbs of a ponderosa pine. The whole resource management process is linked and it would be folly to narrowly define or limit any of these issues.

There are some who want assurances now on exactly how this review process will effect them before it is complete. For them, there is little hope. No one knows what the eventual outcome of this process can be.

The inventory phase of this program, completed last November, identified some 66 million acres of roadless land. I am hopeful that the current phase of public evaluation of the program will generate enough information to foster consensus among forest user groups sufficient to settle, once and for all, a large portion of this total.

However, expectations that RARE II will solve the entire roadless area issue in one fell swoop, are unrealistic.

It is my hope that a majority of the inventoried roadless areas will be allocated either to non-wilderness or wilderness categories and that very few areas will be placed in the further study category.

We need to make management decisions based on a thorough and objective assessment of the factual information which this process should generate.

Once those decisions are made, each of us must be willing to endeavor to make them a reality with a minimum of red tape, appeals, litigation, and legislative procrastination.

Many of you attending this symposium will play a significant role in the eventual success or failure of the RARE II process. Whether or not accurate information is used to arrive at final decisions, whether or not we can arrive at a consensus on specific roadless areas are critical questions which can only be answered by each of us.

Many of you hold positions of responsibility in the executive branch, as Congressional assistants, as representatives of recreational and environmental groups, as foresters, as representatives of timber, agricultural and mineral industries. To a great extent, the decisions or non-decisions resulting from the RARE II process will be shaped by you and others like you.

Hopefully, we can avoid the tendency of resorting to extravagant rhetoric in the face of this heated controversy. Misinformation, rumor, and innuendo only serve to obscure the critical issues and result in increased polarization which permeates many of the relationships between forest user groups.

I counsel coolness, consensus, and resolution with reasonable and not excessive expectations. If we are to arrive at timely decisions in this process, all sides must take off the blinders and give some attention to the other side's view point.

The final RARE II recommendations of the Forest Service are scheduled to be presented to the Congress in January. We have been assured that this timetable will be met. It is my hope that Congress will consider these recommendations in a timely and expeditious fashion.

This brings me back to my initial point—that we must look at the total picture concerning resource management—all the factors are inter-related. RARE II is only one facet of the entire picture.

When the RARE recommendations are presented by the Forest Service next January, I hope the Administration will be prepared to make the budget investments necessary to carry out the goals of the Resource Planning Act and the management decisions which will result from the RARE II process.

It is in this area that the actions of Congress have been several steps ahead of the budget requests presented by any president over the past decade. However, despite the continuing efforts by the Congress over the past several years to upgrade both the quality and the quantity of management on the National Forests, considerable shortcomings persist. This situation is largely the result of inadequate budget proposals from the Department of Agriculture.

The Administration, working in harmony with Congress, should call for increased funding for the Resources Planning Act programs. The RPA should be funded at no less than 85% of the ideal level in the years ahead.

Regardless of the eventual outcome of RARE II, the vast majority of the acreage on the National Forest System will remain in the multiple use category. There is consensus among virtually all forest user groups that more effective forest management in these areas is essential if we are to meet the RPA goals.

Inadequate budget requests and manpower ceilings have consigned far more public acres to an economic and social wilderness than all of the statutorily created wilderness in the system. What we need is investments in productive resources not continued debate over one area of National Forest management.

I view this meeting as a tremendous opportunity for those who manage the National Forest to describe how they intend to facilitate the decisionmaking process affecting our National Forests. I commend those responsible for making this symposium on RARE II possible. May your discussions today and tomorrow be informative and stimulating. May this symposium lay the groundwork for consensus and the eventual resolution of the roadless area issue. This is a tall order: The eventual size of the National Wilderness System, the economic vitality of many local communities and the equitable management of our forest resources hang in the balance.●

WORLD HUNGER

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. DOWNEY. Mr. Speaker, I would like to share with my colleagues a very cogent article which appeared in this week's Christian Science Monitor concerning world hunger. The article follows:

AID THE RIGHT TO FOOD AS WELL AS FREEDOM

(By Patricia Weiss Fagen)

President Carter's concern with human rights has gone beyond the traditional foreign policy dialogue in the United States. The administration has affirmed that the right "to the fulfillment of such vital needs as food, shelter, health care, and education" has equal weight with the right "to be free from government violation of the integrity of the person," and the right "to enjoy civil and political liberties."

But the links between vital needs and other rights have yet to be clarified in practice. The Carter administration has begun to evaluate the performance of aid recipients not only on the degree to which their governments engage in mass arrests and mistreatment or limit free speech and the right to oppose but also on the policies and programs that affect the poor. It is logical to assume that governments whose policies bring additional suffering to their poorer citizens should not receive aid.

This logic, however, is not reflected in U.S. policy.

In the first place, the relevant human rights legislation (the Harkin Amendment, 1975, and the Harkin-Badillo Amendment, 1977) does not address the problem of repressive economic practices. It requires that economic aid be terminated to a country which "engages in a consistent pattern of gross violations of internationally recognized human rights, including torture or cruel, inhuman or degrading treatment or punishment, prolonged detention without charges or other flagrant denial of the right to life, liberty and the security of person, unless such assistance will directly benefit the needy people in such country." Thus, while the legislation suggests concern for the whole range of human rights, Congress has said that it is specifically interested in violations of the rights of the person. Nor is the termination of aid on human rights grounds intended to affect aid that reaches the poor, even if the government itself is responsible for worsening their plight and increasing their numbers.

In the second place, the decisionmaking procedures with regard to aid do not require that basic needs loans be evaluated according to government performance in promoting economic and social human rights. A proposed loan or project is judged in the Treasury Department on whether or not it will meet basic human needs. At the same time, in the State Department, a country for which an aid project is proposed is evaluated as to whether it meets minimum standards in the three human rights categories. The two sets of assessments are then weighed against each other. The aid givers often argue in favor of loans with basic need components even to countries where all three human rights categories are massively violated.

Basic needs loans are not justified as philanthropy but as development aid which will help the poor acquire their own income generating capacity and make the national economy more dynamic. If bilateral and multilateral aid programs to poor countries are to make even a minimum impact on poverty, local government cooperation is essential. Therefore aid and lending agencies place a great deal of emphasis on the necessity for national programs in line with basic needs priorities: agricultural production by small farmers, and programs in nutrition, health care, family planning and basic education for the poor majority.

Socialist governments are criticized when they justify the subordination of political liberties in terms of the need to implement economic plans that raise the standard of living of the majority. But today in Latin America there is a "trade-off" which is far more costly in human rights terms: right-wing military rulers such as those in Argentina, Chile, Uruguay, Brazil, subordinate the economic rights of the majority and maintain their regimes by denying political liberties while massively violating the personal rights of real and potential opponents.

Certain of their economic policies consistently worsen the social and economic conditions of the poor, and usually deprive them of benefits they previously enjoyed. These governments attempt to control inflation, improve the balance of payments, and remove restrictions on capital and trade. They

do so by drastically reducing the buying power of wage earners and eliminating many previously free public services. Their policies also make it difficult, if not impossible, for many unprotected local businesses and industries to survive when faced with competition from giant multinational corporations. But the international banking and financial communities, as well as the economic spokesmen for the U.S. Government, justify and encourage precisely these anti-human rights measures.

A U.S. basic needs policy which pretends to attack poverty, but which does not take into account the negative impact on the lives of the poor of the economic measures favored by the U.S. Government, the major U.S. investors, and the international financial institutions is a mockery. Consider the deterioration in living standards suffered by millions in Latin America since the military coups in Argentina, Uruguay, and Chile. Add to this the terror in which hundreds of thousands live because of the generally repressive practices of the governments in question. Can a basic needs aid program in any way compensate these people for the losses they have suffered and will continue to suffer owing to the acts of their governments?

The U.S. cannot promote economic and social human rights in other countries through a basic needs program unless it also encourages the governments of these countries to implement policies based on a greater concern for social justice and less immediate concern with producing a more "healthy business climate." The Carter administration should not claim that its aid to repressive governments is help for the needy when it is clear that such governments deprive their own citizens of food, shelter and health care, just as they deprive them of political and personal rights.

THE GOP IS BORN AGAIN

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. MICHEL. Mr. Speaker, the American people for the past 20 years have become addicted to government. Now they seem ready to take the cure. They have seen what an overdose of bureaucracy can do to their pocketbooks, to their freedom, and to their way of life. They were once lured by those in Congress who took from them everything they had and returned only the horrors of high taxes, inflation, waste, and regulation—but no more.

The national mood is changing. Republicans, who have always been on the defensive, fighting against the excesses of government, are now on the offensive, armed with the principles of limited government that the American people are responding to. The GOP has arrived.

Columnist Patrick Buchanan recently wrote about this new phenomenon and the resulting reversal of roles in the two political parties. It is an incisive look at one of the most significant political trends in decades, and I place the article in the RECORD:

THE GOP IS BORN AGAIN

(By Patrick J. Buchanan)

WASHINGTON.—For the first time since the New Deal, the locus of intellectual ferment, the "action" in national politics, is within the Republican Party.

For decades, the GOP has suffered the perception that it was the party of unthinking negativism, the stodgy domicile of me-too liberals and country club conservatives. Republican energies on Capitol Hill seemed ever bent toward balancing federal budgets unbalanced by compassionate, caring Democrats —the party of the people.

In the last dozen months, the roles have been reversed. It is Republicans launching the assaults upon the conventional wisdom, Democrats holding the fort.

While the left wing of the Democratic Party is fretting publicly about a balanced budget, Republicans like Roth and Packwood in the Senate, Kemp and Steiger in the House, are prodding Congress to take a roll of the dice.

The three ideas causing consternation in the Carter camp are the Kemp-Roth across-the-board tax cuts, the Steiger amendment to cut capital gains taxes back to Kennedy-Johnson era levels, and the Moynihan-Packwood-Roth tuition tax credit.

The apocalyptic arguments being hurled against these proposals are reflective of the intellectual exhaustion of liberalism. Take the Steiger amendment.

Many economists believe it would channel billions into capital investment, trigger a mini-boom in the stock market, and more than compensate in federal revenues for what is lost in tax cuts.

But Treasury Secretary Blumenthal, who believes that a $60 billion budget deficit is just what the doctor ordered for the economy, apparently thinks that a $2 billion tax cut—worst case scenario of the Steiger amendment—is too great a risk.

Consider the tuition tax credit.

Even if the proposal is funded at maximum levels, the revenue loss by the early '80s would not amount to 1 percent of federal income. Yet, the Democratic Party is denouncing the plan as an intolerable raid on the public treasury, a fiscally irresponsible act that breaks the federal budget—the balancing of which must be our highest concern.

Others argue that even a credit of a few hundred dollars for parents of a child in private or religious schools would be the beginning of the end of public education in America.

But if a modest tax credit would mean wholesale abandonment of the public schools, what a mess must have been made of them in the two decades during which they have served as social laboratories for educational reformers and federal bureaucrats.

But the argument of Sen. Ernest Hollings is perhaps the most instructive. Tuition tax credits, he declared, are nothing more than "segregation subsidies."

Here we have a pristine example of liberal paternalism. What Sen. Hollings is suggesting is that black parents are either too indifferent to their children's education, or too dumb, to avail themselves of a tax credit extended to every American family.

And Fritz Hollings' concern about segregation seems to be a worry of fairly recent vintage. If my research is correct, he attended a segregated college and a segregated law school. He was at the apex of political power in South Carolina during the good old days of massive resistance. He was named to the Senate in 1966, voted against the nomination of Justice Thurgood Marshall in 1967, opposed the Civil Rights Act of 1968 and extension of the Voting Rights Act in 1969.

What all these Democratic arguments against tax relief for Middle America reflect is not some sudden concern over fiscal responsibility. Tax reduction, of whatever kind, goes against the grain of the Fabian Socialism that has become the dominant ideology of the Democratic Party.

The Carterites and their allies in Congress want to see government consume more and more of the private sector. The New Republicans believe the private sector pulls the train, the government sector is the baggage car.

The latter want the individual's share of the national income increased, the government percentage reduced. That is the difference. If Republicans can get it across, they may be on the way back.●

"A TRIBUTE TO SCOTT PROBERT"

HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. SANTINI. Mr. Speaker, fellow colleagues, many of us were deeply saddened to learn of the untimely death of an exemplary young Nevadan, William Scott Probert.

Year after year Scott struggled hard with his physical infirmities and did his very best to overcome them. It was not easy for him, but he always seemed to find a way to persevere.

Scott made many contributions during his 26 years, and achieved goals where a lesser person would have failed. An excellent scholar, Scott was also active and devoted to his family, his church, and his community. He possessed a keen sense of personal commitment that enabled him to succeed with many of his ambitions and endeavors.

While in high school, Scott served as a member of the Governor's Advisory Council on Children and Youth in Nevada. During this time, he also was appointed as a delegate to Nevada Boys State and was the only person from his area ever to attend Boy's Nation here in Washington.

Scott was also a member of President Nixon's Youth Advisory Committee, and, at the time of his death, was serving on the Nevada State Rural Housing Authority. His community and his beloved State of Nevada will greatly miss him.

I shall greatly miss him, too, for Scott was a personal friend. He was among the first in the Elko, Nev., area to come to my campaign aid back in 1974. True friends and supporters like Scott can never be forgotten.

WILLIAM PROBERT

ELKO.—William Scott Probert, a resident of Elko for most of his life, was found dead at the home of his parents Thursday night. He was 26.

Probert died of an apparent self-inflicted gunshot wound, said E. S. Lunsford, Elko County coroner.

Probert was born Aug. 9, 1951, in Tooele, Utah, and, at the time of his death, had been a student in Salt Lake City, and had worked for Elko Enterprises Co. He was visiting in Elko with his parents.

He was active in the Church of Jesus Christ of Latter-day Saints and served in various positions in the church.

As a student at Elko High School, he was a member of the Governor's Advisory Council on Children and Youth, a delegate to Nevada Boys State, and the only person from Elko County ever to have attended Boys Nation in Washington, D.C.

He had been on President Nixon's Youth Advisory Committee and at the time of his death was a member of the Nevada State Rural Housing Authority.

He also had been a political writer for the Westminster Parson, a college newspaper in Salt Lake City.

Survivors include his parents, Mr. and Mrs. Oren Probert of Elko; sister, Pat, attending school in Salt Lake City; grandmother, Sophronia LaBelle, Elko, and an uncle.

A graveside funeral is scheduled for 2 p.m. Monday in Tooele. Burns Funeral Home of Elko is in charge of arrangements.●

SARASIN URGES FUNDING FOR POUGHKEEPSIE RAILROAD BRIDGE

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. SARASIN. Mr. Speaker, on Tuesday, August 1, the Senate passed by a vote of 48 to 45 an amendment offered by the senior Senator from Connecticut, the Honorable ABRAHAM RIBICOFF, which would authorize the expenditure of up to $9 million for the repair and reactivation of the Poughkeepsie railroad bridge.

I applaud that action by the Senate and would like to urge my colleagues to enact similar language when the ConRail authorization comes before us for consideration. I will be cosponsoring an amendment offered by my colleague, the Honorable BENJAMIN GILMAN of New York, which will provide for similar authorization language as that contained in the Senate bill.

The Poughkeepsie railroad bridge was closed to rail traffic by a fire in May 1974. The bridge was the only rail link across the Hudson River south of Albany. A mere look at the map shows that the closing of this bridge effectively cut off all of Connecticut and Rhode Island from rail traffic with the rest of the Nation and wreaked havoc upon the rail shippers in southeastern New York. Simple commonsense would have dictated that this vital rail link should be repaired in the shortest reasonable time.

Unfortunately, that has not been the case. The leaders of the Penn Central Corp. which led the company into bankruptcy now comprise a major component of the leadership of the Consolidated Rail Corporation (ConRail). Since ConRail came into operation on April 1, 1976, this quasi-private, quasi-public agency has defied commonsense; indeed, defied the will of the people by refusing to repair this vital rail link despite entreaties from Members of Congress, rail shippers, chambers of commerce, and the State governments of New York and Connecticut.

In all likelihood, a good deal of the former and potential rail traffic of southern Connecticut and New England has already been lost to the trucking industy. We cannot afford to continue this trend which just exacerbates our dwindling fuel supply problem and unnecessarily jams our already overcrowded roadways.

The rehabilitation and reactivation of the Poughkeepsie railroad bridge has long been a concern of mine. In the 94th Congress, I introduced legislation, H.R. 10152, which would have provided funding for the repair of the bridge alone. Since that time ConRail has stated that additional moneys would be necessary to make the bridge a truly operational entity and this is the reason for the authorization of the $9 million amount.

I plan to work with the New England congressional caucus as cochairman of the transportation task force in attempting to secure passage of this amendment. I am hopeful that Members from other regions of the United States do not view this matter as a "porkbarrel" issue since reconstruction of this bridge will provide the producers of commodities with an accessway to a most important marketplace. For example, at the present time a shipment of freight from Washington, D.C., to New Haven takes 59 hours. If the Poughkeepsie railroad bridge was opened it would take 17 hours.

Mr. Speaker, we simply cannot afford to wait any longer on this matter. If we are to insure that ConRail is a worthwhile investment for the Nation's taxpayers we must approve this most critical amendment.●

DEAN ALEXANDER WHITE PRAISED FOR 10 YEARS OF DEDICATION TO THE UCLA GOVERNMENT INTERNSHIP PROGRAM

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. MOAKLEY. Mr. Speaker, each year the colleges and universities of our country send a substantial number of their students to participate in the legislative process and serve in our offices as interns. Thanks to the maintenance of Washington internship programs at academic institutions, these students are given an opportunity to enrich their learning careers in a laboratory of experience which complements the tools of knowledge they have acquired in the classroom. I applaud today the dedication of one man in particular who has given especially generously of himself so that students may continue to benefit from this unique and rewarding activity. His name is Alexander White, a dean at the University of California at Los Angeles and head of that university's strong government internship program.

Dean White is celebrating his 10th anniversary in charge of one of the largest and most respected internship programs in the Nation. This year, almost 80 Bruins are interning in Washington. During his tenure at UCLA, Dean White has sent more than 1,400 students off to work with numerous State legislative and congressional offices, committee staffs, governmental agencies, and public and private interest research groups. I know that I may speak for at least 90 of my current and former colleagues when I say that UCLA students, bearing Dean White's dedication and drive with them, have distinguished themselves on Capitol Hill. Those of us who have had the pleasure of accepting UCLA interns through the years have been impressed with both the soundness of the program's management and with the quality of intern it produces.

However, Mr. Speaker, Dean White's skill in guiding the UCLA internship program is but a supplementary element in my recognition of him today. Even more important than this attribute is his emphasis on the personal relationships he strives to cultivate with and among his students. The dean is above all remarkable for the weight he places upon seeing that his students grow and mature as interns. In blending the goals of education and personal development, he acts as a counselor who shares in their challenges, their setbacks, and, in the end, their successes. Few persons can match Dean White's patience, compassion, and dexterity at looking out for every participant in the UCLA government internship program.

I point to a recent statement Dean White made on the subject of the intern experience and his role in it. He said:

As I have watched group after group of students return from the field each year, it is in their personal growth that I have always found my deepest satisfaction as an educator.

Surely, if this is the spirit that men like Dean White lend to the guidance of the Nation's internship programs, then we may rest assured that the aims of higher education—both theoretical and practical—will be well served among students for a long time to come.●

TESTIMONY BEFORE THE HOUSE ARMED SERVICES COMMITTEE CONCERNING THE GENERAL DYNAMICS/NAVY SETTLEMENT

HON. CHRISTOPHER J. DODD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. DODD. Mr. Speaker, on August 3, 1978, I testified before the House Armed Services Committee in support of the settlement reached between the Navy and the General Dynamics Corp. reforming two contracts for the construction of 18 688-class nuclear attack submarines. I would like to take this opportunity to submit my testimony for the RECORD in order to allow my colleagues who are not members of the Armed Services Committee a chance to examine the reasons I believe congressional approval of the settlement is so necessary.

The testimony follows:

TESTIMONY OF CONGRESSMAN DODD

Thank you very much, Mr. Chairman. I appreciate the opportunity, this morning, to appear before the committee on this matter. I have a prepared statement, and I will read some of it, and I may deviate and speak extemporaneously, if I may. I want to thank you and the committee, for giving me the opportunity to testify before the committee, during consideration of the claims settlement reached between the Navy and the General Dynamics Corporation on June 9, 1978.

I am here today for two fundamental reasons:

The settlement concerns my district where the Electric Boat Company has it primary facility and because I believe that the settlement is in the best interests of the national defense. I suppose I could say that if this facility were not located in my district, I probably would not be testifying before you today, in all candor, but having looked over the settlement agreement, I can say, with assurance to you, that I would be supportive of the settlement reached between the parties.

The settlement would "facilitate the national defense" as Public Law 85-804 requires because the submarines which Electric Boat builds, are absolutely necessary to our national security. We must not lose sight of the fact that Electric Boat builds the finest submarines in the world. EB has been the principal designer and builder of almost all the nuclear submarine classes in the U.S. Navy, and although the U.S.-Soviet submarine numerical balance heavily favors the Soviet Union, there is no question that our submarines enjoy a technological edge. This qualitative advantage is due in large part to the experience and expertise at Electric Boat, and the skilled and dedicated workers employed there. EB is indeed a valuable national asset to our national security.

Since I came to Congress four years ago, Electric Boat has been one of my major concerns. It is by far the largest employer in my district, with a total workforce of about 23,000 people. I would not deny that there have been many problems at the shipyard over the past few years. Not too long ago, the company went through a five month strike—the longest in the history of the state of Connecticut. Just last October, 3,000 workers were laid off with practically no notice, and of course, the claims which the company had filed against the navy were always in the background, threatening to disrupt the entire company. So obviously the future of the Electric Boat Company and the future economic health of the region in which I live, are of the utmost importance to me.

The settlement which you are considering today, calls for the expenditure of $484 million of the taxpayers' money to one of the nation's largest defense contractors. The real issue today, and one that is raised quite often by a variety of different groups, is whether or not this settlement is a bail-out, to put it very frankly. I do not think that it is. But in order to address that issue, it is necessary to fully understand how the problems at the shipyard and the the resulting claim arose.

First, cost growth in the shipbuilding industry is not a problem unique to Electric Boat. It is a nation-wide problem. As the members of this committee well know, there are two other pending claims—major claims by the two other major private shipbuilders. One of them, Litton's, has also been settled by the Navy, and is before you today as well. The three claims by the Navy's three primary private shipbuilders, which produce over 75 percent of the industry's output, total $2.7 billion. There are a number of reasons why the shipbuilding industry has been so troubled.

For purposes of my testimony, Mr. Chairman, I would like to limit my remarks to the problems that have occurred at Electric Boat.

First is the type of contacts let on these ships. They were fixed-price incentive contracts with a very narrow range between the target and ceiling price. The Navy now recognizes that these contracts should only be let when the costs and schedule of a construction program have been well defined and proved out through long-term experience. That was obviously not the case with the 688-class submarine program.

Second, Naval vessels are among the most complex and lengthy products to complete. The period of time between contract and delivery normally runs several years. In fact, I think the only project which would exceed that construction time, is an aircraft carrier.

Because there will be technological improvements to incorporate, many changes and revisions will be made during ship construction, and because EB was not the design agent for the 688 program as it had been for every other nuclear submarine, it had to rely on the design plans drawn up by another company.

Third, the effects of inflation have been particularly devastating to the shipbuilding industry. EB's two 688-class submarine contracts were signed in 1971 and 1973 and simply could not predict the extent of double-digit inflation which followed. But every company and every American has been seriously affected by inflation. Why should a shipbuilder get special treatment because of inflationary cost growth? It is the combination of factors—contracts with insufficient escalation clauses and the length of time needed to build a submarine—which when coupled with double-digit inflation, led to the kind of unanticipated cost growth we see today, in this particular situation.

Fourth, there have been unprecedented problems stemming from the lack of cooperation between the Navy and its shipbuilders. Government furnished information and equipment was often late in getting to the shipbuilder, which held up production schedules, and of course also contributed to the inflationary effects.

Fifth, there have been problems with the management and productivity at Electric Boat. I would, in this particular situation, Mr. Chairman, be speaking more from personal information rather than specific information, which is in the public domain.

It has often seemed to me that shipyard decisions which should be made at the yard itself had to be made at corporate headquarters in St. Louis. We had, in effect there, for too many years, an absentee landlord.

Until October, when a new management team came on board, there had not been a complete inventory of the shipyard in decades. I should add that I think that most of the most severe management problems are now behind EB, but the corporation does have to share its responsibility in the cost growth of the 688 program.

I would like to emphasize that regardless of the multiple reasons EB, and the shipbuilding industry as a whole, have been unable to meet the ceiling prices of the original contracts, EB is only one of two shipyards able to build nuclear submarines. If either EB or Newport News, the other 688 Contractor, were unable to complete the contracts, we would find ourselves sorely pressed to build the submarines this country needs for its defense. This is a particularly important concern because of the fact that only EB is equipped to build the Trident submarines, which are vital if we are to maintain a credible deterrent in our nuclear triad.

Mr. Chairman, I have outlined very briefly some of the problems the shipbuilding industry, and Electric Boat in particular, have faced over the past several years. But I must now address the more important question of why I believe the proposed settlement is an appropriate way of settling those problems.

First, as I hope the foregoing discussion has illustrated, the blame for the cost overruns cannot simply be laid at the door of either the Navy or Electric Boat. Part of it is the Navy's fault and part the fault of the company. Some of the blame can also be attributed to events over which neither party had control—like inflation. It is impossible to assign, at least for this member anyway, an accurate percentage of the blame on either party. General Dynamics stands to lose, if this settlement is not agreed to, some $843 million, a figure that I understand is agreed to by the Navy, and a figure which was supplied originally, by the corporation, over the life of these contracts if the settlement is not approved. Even under the terms of the settlement, Mr. Chairman, Electric Boat stands to lose more money than the company's gross profit, since 1937, some $340 million. Navy has agreed to pay, under the terms of this settlement, $125 million of the $544 million claim on the basis of strict entitlement, and the remaining $718 million will be split 50/50 by the Navy and General Dynamics. I will not go into a more detailed explanation of the terms of the settlement, because I feel that the Navy is better equipped to do that, but I will just say that the proposed 50/50 split on the corporation's losses appears reasonable to me considering the difficulty in determining exactly who or what is responsible for which cost increases.

If the committee and the Congress decides to turn this settlement down, the claims will not simply go away. In fact, under the terms of the settlement, General Dynamics releases all further claims on the 688 program and on any potential claims on the Trident Program which are caused by the 688 contracts. If the settlement were not approved, then we could without a doubt, expect substantial future claims to be filed, down the road.

Thirdly, the committee must also consider the probable alternatives to approving the settlement. First, there is the option of renegotiation. But considering the fact that General Dynamics has already agreed to accept an unprecedented $359 million loss, it is likely that they would choose the path of litigation to renegotiation.

That second option, litigation, would be an extremely high risk, complex, and long-term process. And there is a very real possibility that a court decision could prove more costly to the American taxpayer than the settlement, which you have before you today.

A government takeover of the shipyard would be a third alternative. However, the long delay in production such a takeover would cause, its complexity and cost would make it the worst possible option. Any of the three alternatives: Renegotiation, litigation or takeover would almost certainly involve a break in submarine production that would delay the schedule and result in higher costs to complete the program. I might also point out that in the potential takeover problem of that particular contract, that you do not have a division of labor at Electric Boat. You have people working on both of these contracts, and to someone envision the takeover of just 688 and not have an impact on Trident, is really impossible.

Furthermore, Mr. Chairman, I believe that this settlement is the best alternative we have to resolving the problem. We cannot let the claims issue drag on forever. It is time for the Navy and General Dynamics to put their disagreements behind them and get on with the vital business of building nuclear submarines for the defense of the United States in an atmosphere free of bitterness and suspicion. It is time for the workers at Electric Boat to be able to do their jobs without the threat of an imminent layoff looming in the background. It has been my experience in talking to many of the labor leaders and workers, and management personnel at Electric Boat, that low productivity in the shipyard was often the result of the great apprehension among the workers over whether they would still have a job in a month. I do not think this is unique to this particular company, and when you have an unsettled situation, and you have workers discussing whether they will have a job the next day or next month, productivity suffers, and suffers terribly. For that reason as well, I think the resolution of this particular problem will enhance the future construction program for this vitally needed piece of our arsenal.

I think the settlement will go a long way

toward increasing morale in that yard. I urge, Mr. Chairman, that the committee, in light of these considerations, would support the settlement reached between these two parties. They were very difficult and long negotiations. They were trying negotiations, and, to be parochial for a moment—certainly we all are from time to time—as I stated at the outset, I would not be before you had I not thought it was of vital interest to our national security. This is just not my district involved. We are talking about southern New England. Rhode Island is severely impacted as well by a decision of this magnitude, as well as the rest of the state of Connecticut.

I would also add—and I think this committee is also cognizant of it—that the contribution of Electric Boat Company over the past 25 years and more beginning with the Nautilus submarine up to date, has made a tremendous contribution to this country, in its efforts to remain at a level equal, if not ahead, of our potential adversaries. I think that should be taken into consideration, when discussing this particular issue.

I would be glad to try to respond to questions that you or any of the other committee members may have.●

TAXPAYERS' BILL OF RIGHTS ACT

HON. THOMAS N. KINDNESS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. KINDNESS. Mr. Speaker, the American citizen is becoming increasingly disenchanted with the tax situation. Taxes have been consistently going up; the 20 to 40 percent or more of his income that the American taxpayer is required to turn over to the Government today is quite a change from the 2 or 3 percent he contributed when our tax system was first established. We, as Members of Congress, have been working hard to relieve the present tax burden, but in our attempts to come up with a workable solution to the tax problem, we have overlooked an important concern: That of the taxpayers' rights.

I believe that the amount of taxes the American worker is contributing to our Government today entitles him to a guarantee that his rights, in matters dealing with taxation, will be fully observed. That is why I am introducing today a measure, first introduced in the other body by Senator JESSE HELMS of North Carolina, entitled "The Taxpayers' Bill of Rights Act."

This "taxpayers' bill of rights" requires IRS officials, at the beginning of any conference held with a taxpayer, to advise him of his full rights to counsel and to remain silent, and that any statement made may be used against him. However, the IRS is not required to provide counsel for the taxpayer or to exclude any statement made by the taxpayer because a warning was not completely given. The bill specifies that the taxpayer be able to set a reasonable time and place for any required interview with an IRS agent. At present, the IRS has full authority to set the time and place of the meeting.

An Office of Taxpayer Services, to be overseen by the Assistant Commissioner of the Internal Revenue Service for Taxpayer Services, is created by the Taxpayers' Bill of Rights Act. The office would serve as an ombudsman to the taxpayer, answering questions and resolving taxpayers' complaints. The bill also provides for taxpayer assistance orders, which would postpone seizures or other actions by the IRS that would impose unjust hardships on the taxpayer involved.

The "taxpayers' bill of rights" requires the IRS to publish clearly written pamphlets which outline the taxpayers' rights in cases of audits, assessments, and appeals. It limits IRS investigations to those dealing directly with enforcement of the tax code, except in specified cases, and it provides that a taxpayer who believed himself a victim of a "harassment investigation" could seek civil penalties against IRS officials who were responsible for conducting that investigation. The bill also stipulates that if a taxpayer wins any case before the tax court, he will be awarded attorney's fees for that case.

Finally, the authority of the General Accounting Office to conduct regular audits of the IRS, as well as investigations of IRS practices, is confirmed by the "taxpayers' bill of rights." The bill requires an annual report on the efficiency, uniformity, and equity of IRS operations.

The services provided for in this bill would entail additional cost to the IRS, but they would also assist the taxpayer in his struggle to comply with our complex tax system. Taxes represent the most direct link our Government has with its people; that is why we should make a concerted effort to insure that the taxpayer is being treated fairly in his dealings with the IRS. The Taxpayers' Bill of Rights Act insures just and equitable treatment of the taxpayer under present tax laws. I urge you to consider it carefully as a set of guarantees that the American taxpayer rightly deserves.

The full text of the bill can be found in the CONGRESSIONAL RECORD of April 17, 1978, pages 10317–10319.●

BILL TO END WELFARE ABUSES BY ALIENS

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. FINDLEY. Mr. Speaker, today I am introducting legislation to curb an ever-increasing abuse of the welfare system by newly arrived aliens who take advantage of public assistance funds. I not speaking of the problem of illegal aliens; rather I address my remarks to those aliens legally admitted into the United States who, according to figures supplied by GAO, receive over $72 million under the supplemental security income program each year.

Supplemental security income, or SSI for short, is a joint Federal-State welfare program for poor people who are aged, blind, or disabled. Over $6 billion is distributed annually to individuals who do not have enough quarters to be eligible for social security disability benefits or old-age and survivor insurance. Funds for SSI come from the general revenue fund, and in order to qualify for assistance, it is not necessary for an individual to have made any contributions to social security.

Although SSI has been used by some aliens with legitimate need, there are many exceptions. Frequently, the following type of situation occurs: An alien who wishes to immigrate to the United States must find an American sponsor who will be legally responsible for that person's initial stay in the country. This sponsor is required to sign an affidavit of support agreeing to provide for the alien's needs should that individual become indigent within 30 days after arrival in the United States. Unfortunately, such affidavits are not legally enforceable under current law, therefore, some aliens have applied for SSI payments prior to the termination of the 30-day requirement. A recent GAO report indicates that of those aliens receiving SSI payments, 15,000 began collecting within 6 months of their arrival in the United States, 23,000 collected within a year, and more than 35,000 collected within 3 years.

To help correct this problem, Mr. Speaker, the bill I am introducting provides a 5-year residency requirement before most aliens can qualify for SSI benefits. It would also change the legal status of the affidavit of support signed by the alien's sponsor. The affidavit would be treated as a legally binding contract.

At a time when taxpayers are revolting against the fraudulent and wasteful use of tax dollars, this bill will help to correct a major deficiency in the current law.●

FRASER-VENTO RESOLUTION CALLING FOR IMPROVED PROCEDURES FOR RESOLVING UNITED STATES-CANADIAN AIR POLLUTION DISPUTES

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. FRASER. Mr. Speaker, we recently introduced legislation aimed at improving procedures for resolving United States-Canadian disputes about air pollution (H. Res. 1275). The Fraser-Vento resolution calls on the United States and Canadian Governments to push for the establishment of a joint task force to examine and report to the President and the Congress and the Canadian Government on options for dealing with air pollution issues along and across the boundary.

Air quality issues are becoming more important as both the United States and Canada become increasingly reliant on coal as a major energy source. Since the

United States-Canadian International Joint Commission (IJC) has no authority over air issues, disagreements over air pollution must be handled on a case-by-case basis. We cannot effectively solve transboundary air quality issues if we continue to proceed on an ad-hoc fashion.

At this point, I would like to insert into the RECORD an adaptation of a recent article by Alice Brandeis Popkin, associate administrator for EPA International Activities, on United States-Canadian clean air problems and related matters. One of the main points made by Ms. Popkin is that we at the present do not have effective diplomatic institutions and instruments for dealing with United States-Canadian clean air problems.

[Adapted from the June 1978 issue of EPA Journal]

INTERNATIONAL COOPERATION BEGINS AT HOME

(By Alice Brandeis Popkin)

We need to remind ourselves constantly that environmental protection begins at home. In this case, "home" means working with our close neighbor, Canada, to solve pollution problems.

On the national level, the U.S.-Canadian International Joint Commission works continuously to monitor or develop solutions to pollution problems. The Commission, or "IJC" as it is called, is a mixed Canadian-American body empowered by the two governments to look into specific environmental or other boundary waters problems (the Garrison diversion project in North Dakota is a recent example). The IJC's recommendations to governments, while not legally binding, are seldom thwarted or ignored.

When we successfully resolve an air or water quality problem with Ottawa, we also help achieve U.S. environmental objectives of direct, practical benefit to Americans.

But it is not always an easy process. Even though the issues involve many of the same difficulties we experience domestically, they are frequently complicated by questions of national sovereignty.

PHILOSOPHICAL POLITICAL DIFFERENCES

Pollution control problems between the U.S. and Canada are directly traceable to differences in governmental philosophy and the legal/political systems found in the two countries. U.S. laws require the use of best available control or treatment technologies, as well as control of source location, to achieve air and water quality objectives. The philosophy of minimum treatment and emission control at the source is becoming well-established in our regulatory practice.

Canadian Federal authorities, while sharing many U.S. environmental objectives, have little control over pollution, which Canada's constitutional system entrusts largely to its Provinces. This means that the U.S. must cope with two separate political jurisdictions when seeking redress on specific problems. For example, in recent negotiations over pollution controls on the Atikokan generating station just north of Minnesota's Boundary Waters Canoe Area, the U.S. confronts not Canadian Federal but Ontario Provincial regulations and practices. A similar situation exists with the Poplar River generating plant north of Montana which comes under Saskatchewan's jurisdiction. It takes little imagination to picture the complexity and unpredictability of bargaining in these circumstances.

IJC PROCEDURES

As mentioned earlier, the International Joint Commission (IJC) is the major institutional mechanism for bridging bilateral environmental disputes with Canada. To date the IJC has focused mainly on water quality problems, notably in the Great Lakes, but also in other lakes (e.g. Champlain) and in the Red, Rainy, Souris, Richelieu, St. John, and Niagara rivers, to name a few. The procedure for referring a problem to the IJC is relatively simple in concept if not in practice. When the governments cannot solve a problem, they negotiate a formal "Reference" to the Commission. The six Commission members (three from each country) then appoint a Board composed equally of members from each country to study the problem and recommend a solution to the Commission, which in turn reviews the findings, modifies them if it sees fit, and reports its recommendations to the governments.

Of particular interest is the requirement that the board members, whose duties are in addition to their regular work, serve as individuals and are asked not to be bound by agency positions on the issue under study. This procedure helps to make IJC findings more objective, authoritative, and in the end, more acceptable to governments.

WATER RESOURCES A WELL-ESTABLISHED CONCERN

In the past, most U.S. trans-boundary pollution problems were concerned with shared water resources—at first with use and quantity, and more recently with quality. Our first major water agreement with Canada, the Boundary Waters Treaty, was signed in 1909. Its emphasis is on joint use, but Article IV, probably the first environmental clause in any international treaty, also commits each party not to pollute the other.

By and large then, we have institutions and procedures for dealing with Canada on problems of water pollution, however imperfectly. Unfortunately, we do not yet have such "handles" for solving air pollution problems. Over the years, as industrial development has spread into transfrontier areas, both countries have increasingly experienced transboundary air pollution problems.

NEED TO IMPROVE RESOLUTION OF AIR QUALITY ISSUES

Although cumbersome at times, the slow but sure IJC procedures for resolving water pollution problems have not yet proved effective for air issues. While we and Canada have informally agreed to extend the "thou shalt not pollute thy neighbor" provision of Article IV in the 1909 Treaty to include transboundary air pollution, the Canadian government has not yet been able to agree to requests for specific air pollution. References to the IJC. The two existing air pollution References, covering Michigan-Ontario air issues and a general transboundary air pollution monitoring mandate cannot be used to resolve particular point-source problems. These still are being handled directly by the two governments with as yet few positive results. The two current air issues on the Canadian side, Atikokan and Poplar River, are at an impasse over Canadian unwillingness to install sulfur dioxide scrubbers on either of these coal-fired installations. The Poplar River issues also includes water quantity and quality problems. These the Canadians have consented to refer to the IJC. The people of Minnesota and Montana fear that unscrubbed emissions from the two plants will produce long-term, cumulative harmful effects on the U.S. side of the border. We are continuing to press vigorously for better sulfur controls, but as yet without success.

While there are few specific air pollution complaints from Canada regarding U.S. sources, the Canadian government has recently begun to make inquiries into a problem believed to emanate from the fluoride emissions of the Reynolds Metals aluminum smelter along the St. Lawrence River in Massena, New York.

DIFFERENCES NEED TO BE BRIDGED

Because we live in such intimate contact along our borders, we are obliged to seek ways to bridge air quality differences with Canada. We hope over time that cooperative practices will multiply, erasing our disparities of system or practice, to the mutual benefit of the people in both countries.

LEGISLATION TO IMPROVE THE RESOLUTION OF U.S.-CANADIAN AIR QUALITY DISPUTES

To better deal with a growing array of air quality problems, we need to expand our dialogue at all levels between the governmental entities and the people of the U.S. and Canada. Beyond that, institutional innovations are likely to be needed as well.

As a first step toward improving procedures for resolving United States-Canadian air pollution disputes, the Fraser-Vento resolution calls for the establishment of a new air quality task force under IJC auspices. The new study group, composed of public and private representatives from both the State and Federal level, would investigate existing and proposed activities causing air pollution along the international border, evaluate the need for a United States-Canadian clean air agreement and recommend other ways for resolving disputes.

If you are interested in cosponsoring the resolution, printed below, please call Mark Carlson of my staff at 225–4755:

HOUSE RESOLUTION 1275

Whereas the United States and Canada share a common frontier along a 5,500 mile border;

Whereas the United States and Canada are becoming increasingly concerned about the effects of air pollution on agricultural and marine resources and the environment in the region along and across the boundary;

Whereas the United States and Canada have subscribed to international conventions and joined in the environmental work of the United Nations, the Organization for Economic Cooperation and Development. and other international forums; and

Whereas the International Joint Commissions of the Boundary Waters Treaty entered into by both Governments in 1909, has a strong tradition of helping resolve environmental issues of mutual concern: Now, therefore, be it

Resolved, That the House of Representatives urges that—

(1) the Governments of the United States and Canada prepare a reference to the International Joint Commission instructing it to set up a bilateral task force to conduct a prompt evaluation of (A) the desirability of formulating a United States-Canadian clean air agreement, and (B) the international principles and instruments that could appropriately be used for such an agreement;

(2) the International Joint Committee appoint members to such task force who represent governmental and nongovernmental organizations, including: the Environmental Protection Agency, the Departments of Energy, State, Interior, Commerce, and Agriculture, the National Governors' Association, the Canada-United States Interparliamentary Group, and private nonprofit organizations involved in environmental quality work of the United States and of Canada;

(3) such task force prepare recommendations and a report to be submitted to the two governments including the executive and the legislative branches no later than 9 months after the date of the adoption of this resolution. The task force report should include:

(a) An identification of existing and planned activities causing air pollution from both point and non-point sources and measures contemplated within each government to deal with them.

(b) The desirability of an international agreement to deal with U.S.-Canadian air quality.

(c) The drafting of general and specific air quality objectives for border areas.

(d) Suggestions for means and mechanisms to resolve disputes involving transfrontier air quality both on an *ad hoc* and systematic basis including the establishment of a permanent Board under the IJC.

(e) Consideration of the appropriateness of submitting disputes to binding arbitration, or the establishment of agreements or reciprocal legislation allowing citizens of each nation equal access to the domestic agencies and remedies of the other country.

(4) the President, working in concert with interested Federal agencies and affected States, take any diplomatic action necessary to reduce or eliminate any undesirable impact on both countries resulting from air pollution from any source.●

THERE IS NO PANAMA CANAL TREATY

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. SYMMS. Mr. Speaker, although the Panama Canal treaties have been passed by the Senate the actual interpretation of the language is still in question. In a recent article by M. Stanton Evans in Human Events he states that "Panama has repudiated virtually all of these reservations, and in particular has repudiated our official interpretation of the Nunn and DeConcini reservations bearing on the right of military intervention. The article reads as follows:

[From the Human Events, July 15, 1978]

THERE IS NO PANAMA CANAL TREATY

(By M. Stanton Evans)

After all the fuss and feathers and acrimonious debate, there is no treaty on the Panama Canal.

Oh, there is a document all right—two documents, in fact—debated at length in the U.S. Senate and celebrated by President Carter and Panama dictator Torrijos in an exchange of pleasantries a couple of weeks ago. In that sense, there is a treaty. But in the sense that really matters, meaning an understanding that is mutually agreed to and mutually binding on the contracting parties, there is no treaty.

The point was made in a speech last month by Sen. Jesse Helms (R.-N.C.). He noted that the problem which had plagued the treaty negotiations from the beginning had persisted through the period of ratification: The documents were taken to mean one thing in Washington and quite another in Panama City. And since the point of a treaty is to define and govern the rights of the contracting parties, such chronic ambiguity undercuts the very purpose of the exercise.

The most recent, and most serious, manifestation of this problem concerns the reservations added to the treaties by the Senate. These provisos, revolving around such matters as the procedure for keeping American troops in Panama and the right of the United States to intervene to protect the canal, were essential to the passage of the treaties. If they had not been adopted, the Administration could not have mustered the votes required for ratification.

"Ironically," Helms observes, "the treaties could not have passed without the very Senate amendments which Panama now repudiates. Most of the Senate sponsors of these changes announced publicly that their support of the treaties was conditional upon acceptance of the changes in question. Without the votes of the sponsors, there would have been five or six fewer votes for the treaties themselves. And, of course, it is a matter of record that each treaty passed with only one vote to spare."

Moreover, it was stressed in floor debate by such treaty supporters as Sam Nunn of Georgia, Edward Kennedy of Massachusetts and Paul Sarbanes of Maryland that only if Panama accepted the reservations tacked on by the Senate could the treaties go into force. Sarbanes, for instance, quoted one authority on international law who stated, "that any changes or amendments inserted by one party as a condition of ratification must be accepted by the other party if the treaty is to come into legal effect."

On this explicit basis, the Senate adopted a series of treaty reservations, the most famous being the language proposed by Sen. Dennis DeConcini (D.-Ariz.) reserving to the United States the right of acting "independently" to keep the canal open to international traffic.

Other reservations included Sen. Nunn's proviso for keeping troops in Panama after 1999, reservations by Sen. Howard Cannon (D.-Nev.), Ernest Hollings (D.-S.C.), John Heinz (R.-Pa.) and Henry Bellmon (R.-Okla.) concerning finances, and the reservation by Sen. Edward Brooke (R.-Mass.) asserting that the articles of ratification could not be exchanged until implementing legislation passed the House of Representatives (already violated).

Now it develops, with no fanfare to speak of, that Panama has repudiated virtually all of these reservations, and in particular has repudiated our official interpretation of the Nunn and DeConcini reservations bearing on the right of military intervention. In an official state document published April 26, the Panamanian Foreign Ministry revealed its own interpretation of the treaty reservations, in every instance denying or strongly modifying the reading of these documents by our Senate.

The most ominous of these repudiations concerns the DeConcini reservations, which the Panamanians find to be without real meaning because of other language adopted by the Senate. Panama says the Church amendment affirming the principle of nonintervention negates the impact of DeConcini's motion: "With it, the DeConcini reservation has been rid of its imperialistic and interventionist claws, and the enforcement of the principle of nonintervention has been re-established. The specter of new interventions at the end of the 20th Century, which rightly caused concern to all Panamanians, has been eliminated."

In other words, we think we have a right of intervention to protect the canal, against any and all threats (including threats from Panama), and the Panamanians think we don't. Similar ambiguity afflicts the Nunn reservation, the amendments concerning finances, and so on. What we have here is not a treaty, but a standing invitation to further conflict.●

SOVIET HARASSMENT OF FRANCIS JAY CRAWFORD

HON. DAN QUAYLE

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. QUAYLE. Mr. Speaker, the bizarre case of Francis Jay Crawford, an American citizen who is International Harvester's service representative in Moscow, deserves accelerated action by the President and the State Department. Mr. Crawford, a resident of Mobile, Ala., continues to be harassed through an on-and-off again process by Soviet police.

Even though he has been released to the surety of U.S. Ambassador Malcolm Toon, he was summoned three times last week to KGB Headquarters in Moscow for prolonged questioning. Consular officers and other legal representatives for Mr. Crawford have been denied access to the room where the inquisition is being conducted.

Mr. Crawford was arrested suddenly on June 12 on apparent charges of currency violations. However, we are told by State Department officials that the case is still in the pretrial investigation stage and no formal charges have yet been lodged against Crawford.

It is obvious he is being hostage for the May 20 arrest in New Jersey of two Russian employees of the United Nations on espionage charges. However, they were formally arraigned with bail set prior to their release to the custody of the U.S.S.R. Ambassador in the United States.

Mr. Speaker, in recent weeks freedom-loving people everywhere have protested and agonized over the trials of Soviet dissidents and the increased flaunting of human rights by the Russian Government. We should continue to raise our voices for those in the Soviet Union who fight for human rights—but it is also time to demand an end to the harrassment of Francis Jay Crawford, an American citizen, and seek his freedom.

On August 1, 1978, I sent telegrams to President Carter and Secretary of State Cyrus Vance urging that any negotiations to secure freedom for Soviet freedom-fighters should surely include Mr. Crawford on the priority list for any exchange. He certainly is entitled to first consideration and the full and complete support of our Government as an American citizen.

Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Fort Wayne Journal Gazette which is pertinent and makes the point well that we must not forget Jay Crawford.

BUT WHAT ABOUT CRAWFORD?

The good news that the United States is negotiating for, and may very well obtain, the release of convicted Soviet dissident Anatoly Scharansky is clouded by the fact that virtually nothing has been done in behalf of Francis J. Crawford, the International Harvester executive arrested by the Soviets last June for alleged currency violations.

Originally, Mr. Crawford was accused of buying 1,500 rubles from a seamstress for $700, about a third of what they're worth at regular exchange rates. No official charges were brought, since Soviet law allows the government nine months from the time of arrest to do so.

Meanwhile, Mr. Crawford was detained for 15 days in a cramped cell in Moscow's Lefortovo prison following his June 12 arrest, then released into the surety of U.S. Ambassador Malcolm Toon—but only after the United States agreed to let Soviet Ambassador Anatoly Dobrynin take custody of two Soviet employees of the United Nations being held in New Jersey on espionage charges. More recently, Mr. Crawford has been the subject

of questioning—or rather, harassment—by Soviet investigators assigned to the case.

There's no doubt that the premier Soviet dissident—in fact, any Soviet dissident—deserves as much help and support as he can get from the U.S. government. But why has the latter stalled where the welfare of a U.S. citizen is involved?

If the Carter administration has been waiting to see whether Harvester could bring enough economic pressure to bear on the Soviets, the time is up. The Soviets aren't fazed by the company's suspending any deals that were in the works—even if breaking commercial ties complicates Soviet plans for building a Siberian railroad, a project that Harvester was heavily involved in. In any case, the State Department should not be leaving foreign policy up to American businesses.

And if the delay reflected doubts as to Mr. Crawford's innocence, those doubts should never have been entertained. It's obvious the Soviets arrested Mr. Crawford in retaliation to the May 20 detention of the two Russians, Viktor Enger and Rudolf Chernyayev, accused of trying to buy anti-submarine warfare secrets for $20,000. The Soviets also were furious with the State Department for having made so much of their attempt to bug the U.S. embassy in Moscow in June—and just three days before the Crawford arrest, they were threatening to get even by exposing American espionage in the Soviet Union.

No one knows if the Soviets tried to pin spying charges on Mr. Crawford. In any case, the best they could come up with was currency violation. Even then, it was five days before officials could clear up the confusion over whether Mr. Crawford had violated Article 78, prohibiting smuggling, or Article 88, which applies to illegal currency exchanges. Since then, investigators have been trying to substantiate the accusation, and according to a Moscow friend of Mr. Crawford, KGB agents tore up his room in the Intourist Hotel in search of black market purchases, but found no incriminating evidence.

Moreover, even the sworn testimony of the Soviets' star witness is suspect. At first, seamstress Lusya Valodia indicated that Mr. Crawford had bought 1,500 rubles for $700. But when the Harvester executive said he wouldn't have bought the Russian currency for that much since far better rates were known to be available on the black market, Mrs. Valodia's statement changed—to 20,000 rubles for $8,500.

Clearly, there was no valid reason for the arrest. And there's no valid reason for the State Department not to make Mr. Crawford's freedom a matter of the highest priority. It should be remembered that, if he is left to stand trial and is, like Mr. Scharansky, convicted of trumped-up charges, he faces an eight-year prison term. Rather than hope the Soviets will stop harassing Mr. Crawford just because the government has canceled high-level official visits to the Soviet Union, the State Department should be negotiating a swap. It's the only solution.●

ALICE M. RIVLIN SUMMARIZES THE DIALOGUES ON AMERICA'S FUTURE SERIES—PART I

HON. CHARLES ROSE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. ROSE. Mr. Speaker, recently Alice Rivlin, Director of the Congressional Budget Office, gave a summary of the Dialogues on America's Future series sponsored by the Congressional Clearinghouse on the Future.

Over the past 2 years 15 well-known thinkers have spoken with us about the future. Dr. Rivlin's summary of their remarks was enlightening and provocative, and it is my pleasure to include her remarks in the RECORD today.

CLEARINGHOUSE ON THE FUTURE

(By Alice M. Rivlin)

It is with considerable trepidation that I approach the task of summarizing the contributions of 15 "futurists" and figuring out what they said that has relevance for the Congress. As you remember, our speakers were a stimulating group of social philosophers. They were all generalists—"big picture" people. None was engaged in detailed analysis or projections of specific sectors of the economy or the world.

They came from diverse backgrounds, including religion, physics, and anthropology. There was a heavy representation of physical scientists in the group; indeed, it is my impression that people concerned with technology rather than social interaction are more fearless about speculating on the future. All of the speakers made sweeping generalizations about national and international economic trends, but I believe only John Kenneth Galbraith had formal training in economics. (It occurs to me that economists might draw larger audiences if they confined their pronouncements to subjects they knew very little about—like nuclear physics.)

The pessimists far outnumbered the optimists, although even some of the pessimists believe that the human race may have a chance if the right steps are taken. A Cassandra complex is not a prerequisite for admission to the Futures Club, but it certainly helps to get attention. The average age of these speakers was quite high, which may explain their need to pass on dire warnings to the younger generation.

Rather than to attempt to summarize the views of individuals, I would like to dwell on several recurrent themes. Some of these themes have to do with what is likely to happen in the future, others with what ought to happen. I will review six of these themes and then turn to what the Congress—or the Clearinghouse on the Future—might conclude from all this.

Theme 1: The Crossroads of History or Why This Moment Has Special Significance.

Almost all of the speakers alleged that we are living at a moment of transition—from fast to slow growth, from material to human values, from industrial to post-industrial society, and so on. This theme should not be taken too seriously. First, all of us like to hear that our little moment in the sweep of time is special or that our group bears a heavier responsibility than others, so we say this to each other. Second, if anyone did say "nothing important is happening this year" or "the big decisions were made in the last decade" or "they can't be made until the next," he would never be invited to speak again at the Clearinghouse.

Theme 2a: Society as We Know It Is Coming Apart at the Seams.

This is the Chicken Little view of the world. The sky is falling or—at the very least—things will get a lot worse before they get better. Carter Henderson gave the most extreme version. "Let me begin by saying that I believe the industrial age is dying. At present, we are the product of a linear, materialistic, production-line mentality. Although the GNP hit the $2 billion mark last month, it is now more a measure of decline than of growth. Two-thirds of that figure represents inflation; and it is my impression that the remaining one-third is due to the work required to deal with the 'bads' of our society—such as crime, pollution, ill-health, stress, etc." I do not know what that last sentence can possibly mean, but taken literally it implies that the U.S. economy does not produce anything useful at all!

Alvin Toffler began with: "It is my belief that our industrial society is in the early stages of breakdown and regeneration."

David Dodson Gray said: "As growth slows we are seeing a loss of jobs and, as a result, a loss of an important center of meaning in our lives. We are seeing a loss of purchasing power. There is also a loss of confidence as growth slows. There is a sense that the society, the system, is not working as it used to work."

Hazel Henderson put it this way: "I believe that industrial societies have reached an evolutionary cul-de-sac."

Jay Forrester started off: "I would like to begin by saying that the industrial countries are in a period of growing economic instability." This was a fairly mild statement, but his "limits-of-growth" thesis, not stressed in his talk to the Clearinghouse, predicts dire consequences as population increase and economic growth run up against scarce resources and as society smothers in its own pollution.

Some of this gloom and doom talk is too vague to deal with, but the limits-of-growth model is specific enough so we can say specifically what is wrong with it. Basically, the limits-of-growth model and other similar efforts assume that we will go on using fixed resources at current or increasing rates per person, that we will go on polluting, and that population will go on increasing. One hardly needs a computer to realize that, under this set of assumptions, we will run out of land and resources and places to dump the waste, and that the standard of living will drop drastically.

Fortunately, the world does not work that way. As resources become scarce, their prices rise. As prices rise, people begin to economize and shift to other resources and new technologies. If pollution is made expensive, less of it will occur. Population need not go on increasing; indeed, affluence appears to slow it up.

The substance of these gloom and doom predictions is perhaps less important than the fact that they strike a responsive chord in many Americans. Determining the reasons for this may well be more important than analyzing what the doomsayers actually believe.

I recently spent three weeks in the People's Republic of China, where the atmosphere is extremely different. I do not believe that a gloom and doom speaker could hold an audience even if he were allowed a platform. Excitement about the future of the country and optimistism about its potential are pervasive and contagious.

Theme 2b: Future Economic Growth in Industrial Countries Is Likely to Be Slower than in the Past.

This less apocalyptic view was widely held by our various speakers, although for different reasons. A slowing of growth could come from a slowing of demand. People in the future might not want so many material goods or services or might want them produced in far more costly ways. For example, they might want production of goods by hand and in small quantities so that the process of production itself was more enjoyable. In other words, they might agree with E. F. Schumacher that "small is beautiful" and be willing to sacrifice some economic growth to get production in smaller, more self-sufficient units. It is certainly possible that advanced countries will opt for slower growth, although this seems unlikely in the Third World for a long time.

Alternatively, the constraints on growth could come on the supply side. Absent major breakthroughs in technology and discovery

of new energy sources, it will be necessary to use resources that are more and more costly. Almost everyone now realizes that this will be true with respect to fossil fuels. It follows—and several of the speakers emphasized this point—that fossil fuels should be priced at their replacement cost and conserved for their most valuable uses and that work should proceed on developing new energy sources. Arthur Clarke and Isaac Asimov were both optimistic about future energy sources, since both see the development of space as possibly leading to new and limitless sources of energy.

Although many of our "futurists" anticipate slower economic growth in the future, two points should be noted. First, no one can say for sure that economic growth will slow down or, if it does, that it will not accelerate again. We have shifted energy sources in the past, discovered new materials such as plastics and synthetic fibers, and made technological breakthroughs at unexpected times. Some or all of these things are likely to happen again, but it is impossible to tell when. (Arthur Clarke pointed out that it is much more difficult to predict the timing of technological change than to predict its nature.)

Forrester subscribes to the idea that there is a 50-year cycle in capital formation. He believes that the current long cycle moved into a rapid upswing after World War II because capital stock had been severely depleted by the Depression and the war. This growth phase continued through the 1960s but has now slowed down.

Although some statistical evidence suggests 50-year cycles, I for one would want to reserve judgment. The diverse nature of events, such as war and scientific development, that affect capital formation makes it inherently implausible to expect regular 50-year cycles. In any case, I presume that one would want to have seen at least three or four such cycles occur with reasonable regularity before accepting the notion that they were inevitable. That would mean at least 150 or 200 years of pretty good data on capital formation and economic growth, and we simply do not have that at the moment.

Second, slowed growth does not mean that the standard of living will fall, unless the population grows more rapidly than economic output. That is certainly not necessary, even in developing countries.

The argument that economic growth is likely to slow down in the future is quite different from the argument that growth should slow down. The latter, of course, is a moral statement which has ancient origins in Christianity and other religions and more modern counterparts. It is based on the notion that materialism is antithetical to Godliness, human values, and human contact. Elise Boulding told the story about an American anthropologist talking with women who gathered each morning to get water in a primitive village. One of them asked the anthropologist how she got water in her own country and she replied that she simply turned a spigot in her kitchen. Far from being impressed, the primitive women said how lonely it must be for you. This story illustrated a point made by a number of the speakers that Americans are isolated from human contact by their high standard of living. On the other hand, as Herman Kahn points out, it is well-educated, affluent Americans (his "new class") that sneer at growth and improving standards of living. It is not middle America, nor the Third World.

Let me turn now to several themes about what ought to be in the future.

Theme 3: We Should Break our Society into Smaller Units so that Individuals Are Not so Lost, Isolated, and Alone.

Margaret Mead was especially eloquent about this. Pointing out that we tend to cope with the impersonality of our institutions by starting new ones, not by making the existing ones less impersonal. Junior high schools, she alleges, were started because our high schools were too big and impersonal. It would have been better to break the high schools into smaller and more humane units. She favors breaking cities into smaller units where people can care for each other. The neighborhood or the community, she believes, should be a substitute for the extended family. People should be free to choose whether or not they want to live with their relatives, but they should not be without support if they choose to live alone.

E. F. Schumacher sounded a similar theme in advocating "intermediate technology." To him, intermediate technology implies both less technical sophistication and smaller units of production. He believed intermediate technology to be more appropriate to the education level and capital of developing countries, with applications in advanced countries as well. He pointed out that locally baked bread is of higher quality than bread baked in large bakeries and shipped long distances, and that the small bakery is less impersonal and allows a more creative production process. He put great emphasis on self-sufficiency of small areas and suggested treating sections of cities as islands and creating jobs where the people are. Most economic evidence would suggest that local self-sufficiency and small unit production would mean a lower standard of living by denying everyone the benefits of specialization and trade. Schumacher believed that small could be not only beautiful but efficient, if we would just apply ourselves to developing the right intermediate technology. This seems unlikely to me, but it would be perfectly understandable for society to opt for smaller units even if this meant a lower standard of living.

Willis Harmon also sees "modernization" as implying centralization and minorities overrun by the mainstream economy. The gathering counterforces, of which he clearly approves, include decentralization and self-determination of minorities.

The Dodson Grays also emphasized support of communities and neighborhoods where people help each other, and both Hendersons advocated going back to the family as the center of production as well as consumption and emphasized decentralization. Hazel Henderson views labor-intensive production as desirable since, in her view, too much capital is costly both to jobs and to the environment. Substituting labor for capital, she believes, will lower energy consumption. This may be true in general, but one can certainly think of counter-examples. Railroads are less labor-intensive ways of moving people and goods than highways on which everyone drives his own car or truck, but I do not think even Hazel Henderson would allege that railroads use more energy or cause more pollution. If everyone made steel in his own backyard—and the Chinese tried this in the Great Leap Forward—I, for one, would expect more pollution, more energy use, and poorer quality steel.

Among our group of futurists, the chief dissenter on decentralization was Isaac Asimov. He pointed out that reducing the Federal Government is likely to increase local government and that he had "always felt safer with somebody at a distance."

Theme 4: The Congress and the Nation Should Engage in More Participatory Planning.

There are two separate ideas here. First, it would be desirable to have more organized discussion of alternative futures and to make present decisions in the light of a general, albeit flexible, plan for where the nation should be heading. Second, this planning process should involve more interaction between individuals and small groups, on the one hand, and decision-makers, such as the Congress, on the other.

Toffler made participatory planning his main message. He mentioned the Swedish experience with the televised energy course and citizen input into energy policy, as well as efforts in the State of Washington, Hawaii, and other states, to involve citizens in statewide planning for the future. He advocated widespread and frequent discussions about alternative futures in town meetings, schools, and other institutions.

Kahn felt that the "new class" is out of touch with what most people want. The new class is anti-growth and most people are not; the new class makes a religion of environmentalism—desiring zero pollution and protection of all endangered species. The public, and of course Herman Kahn, are more practical. You may remember his rule on endangered animals: "Protect species that are small and cuddly or large and ugly with big wings," and let the rest go. He was also willing to forget the tundra—even the Caribou do not like it. I remember Congressman Wirth wincing as Kahn advocated turning a large part of Colorado into a national industrial resource park and mining the shale in it.

Elise Boulding described planning sessions in which the participants started with a discussion of what they wanted their world to be like in some distant year N and then asked themselves what had to be done in year N-1, N-2, and so on, in order to bring about their vision. She also pointed out that women and children rarely get to voice their views about the future and that children's views are particularly important since they will be around for more of the future than their elders.

Theme 5: We Should Emphasize the Human Values of Caring, Cooperation, and Self-realization Rather than Material Values.

Mead, Harmon, both Hendersons, Barbara Hubbard, both Dodson Grays, and Boulding all delivered eloquent sermons on this general theme. But who could be against it?

To some, the emphasis on human values implies smallness and decentralization. To others, it implies bigger units—for example, international cooperation on projects in space.

Incidentally, those who stressed human values frequently took potshots at economics and economists. The idea that economists are anti-human because they work with costs and things that can be counted seems to be widespread among futurists.●

PUTTING AN END TO THE TAXATION OF INFLATION

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. ARCHER. Mr. Speaker, for the first time in the history of Congress, a bill to provide for the indexation of the tax system will reach the House floor. I urge all Members to support this important legislation. The intent of the tax system is to tax real income—actual increases in buying power. The intent should not be to levy charges on nominal gains—paper increases resulting from capricious inflation. Unfortunately, present law makes no distinction between real increases in income and the illusory gains of inflation. Through indexation we now have a chance to eliminate this serious flaw in the Tax Code. The Archer amendment, which indexes capital gains taxes on the sale of an asset such as stocks or a personal residence, is the first step toward the elimination of "taxflation."

As Henry Sweeney said:

The truthfulness of accounting depends largely on the truthfulness of the dollar—and the dollar is a liar.

Our tax system cannot be honest as long as inflation continues to overstate the value of each dollar. And the degree of overstatement is tremendous. The cumulative rate of inflation since 1969 has been 76 percent. It is no wonder the vast majority of Americans consider inflation their prime economic concern. With the recent double-digit inflation, literally billions of dollars have been lost to inflation by American investors and hundreds of millions more paid out in taxes on "gains" due to inflation. Donald T. Regan, chairman and chief executive officer of Merrill Lynch, Inc., pointed out the facts of the problem in the May 21, 1978 issue of the New York Times:

A recent study by two Harvard University researchers for the National Bureau of Economic Research concludes that our theoretical taxpayer is far from alone in losing money in real terms—partly because of inflation and partly because of the capital gains tax on the phantom profits he records when selling his investment. The study concludes that the $4.5 billion of nominal capital gains by individuals on corporate stock sold in 1973 becomes a real capital loss of nearly $1 billion when inflation is taken into account. And to add insult to injury, the study says the individuals paid nearly $500 million of capital gains taxes because of the distorting effect of inflation."

Mr. Regan further noted the capriciousness of a capital gains tax that makes no allowance for inflation: individuals with similar real capital gains were often subject to totally different tax liabilities. Such an arbitrary tax on capital gains can hardly be conducive to investment. Arthur Burns has often lamented the unhealthy environment for investment. Even Treasury Secretary Michael Blumenthal said:

The facts are indisputable. Our financial system is providing insufficient equity capital. We aren't investing nearly enough in productive plant, equipment, and technological innovation.

The administration is fond of attacking capital gains relief as a windfall to the wealthy. In fact, the inflationary distortion of capital gains taxes falls most heavily on those with incomes below $100,000. Martin Feldstein, president of the National Bureau of Economic Research and professor of economics at Harvard has given the following testimony to the Joint Economic Committee of Congress:

Although adjusting for the price change reduces the gain at every income level, the effect of the price level correction is far from uniform. In particular the mismeasurement of capital gains is most severe for taxpayers with incomes under $100,000. In the highest income class, there is little difference between nominal and real capital gains; in contrast, taxpayers with incomes below $100,000 suffered real capital losses even though they were taxed on positive nominal gains. In each income class up to $50,000, recognizing real capital gains makes the tax liability negative. At higher income levels, tax liabilities are reduced but remain positive on average; the extent of the current excess tax decreases with income.

It is not only the millions of stockholders who are ravaged by taxes on phantom gains. The average American homeowner knows all too well the extent of inflation in the housing market. It has been calculated that a couple buying a home in 1975 for $45,000 would need to sell it for $208,743 after 20 years of 8 percent inflation to recoup their real investment. They would owe $40,000 in capital gains tax on their $164,743 "profit."

My amendment would stop the taxation of such capital gains profit which is merely a manifestation of inflation. To illustrate; if the Archer amendment were in effect, the tax liability on a home sold today would be significantly less than under present law. The median single-family home in 1970 cost $23,000, and in 1978, the cost has risen to $47,800. Under present law, the capital gain realized would be $24,800 and the tax for a family of median income ($18,043) would be $1,950. From 1970 to 1978, the Consumer Price Index rose from 116 to 193.

When this inflation is taken into account in the determination of tax liability, as provided in the Archer amendment, the results are quite different. The purchase price in 1978 of the home adjusted for inflation would be $38,267, and would result in a capital gain of $15,267 and a tax of $641. The Archer amendment would afford the homeowner a $1,309 reduction in his tax liability. In the West, where housing inflation is the most pronounced, the difference in capital gains tax liability between the present law and the Archer amendment would be $4,315.

The homeowner knows the price of his home is grossly inflated, the stockholder realizes his gains are only nominal, and every American is well aware that his buying power is greatly reduced by inflation. It is time that the Congress faces up to these facts. The problem is clear and the solution is obvious. Adjustment for inflation is not a new concept. For instance, union wage escalators are commonplace; nearly 5.1 million workers have cost of living escalator clauses in their contracts. Twenty-nine million social security beneficiaries and 13 million food stamp recipients have their benefits indexed for inflation. It is time to extend that protection against inflationary distortions to our tax system. Noted economists such as Milton Friedman and Martin Feldstein have endorsed indexation of the tax system, and the concept has already been put into practice in several countries such as Canada and Brazil, where it has not only insulated taxpayers from inflation but also seems to have improved the economy.

The Congress should give serious consideration to this evidence. My amendment is a realization of the ravages of inflation and a long awaited means to protect the taxpayer from them.●

THE BIKINI ISLANDS

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. FRASER. Mr. Speaker, in 1946 when the United States removed the natives from their homes on Bikini Island, we assumed a special responsibility for their welfare which we have yet to adequately fulfill. Our actions have not reflected a concern for the native's welfare or their human rights. We have not lived up to the 1947 United States-United Nations Trusteeship Agreement which made us responsible for the Bikinians health and well-being.

Article 77 of the UN Charter declares that one of the basic objectives of the trusteeship system is "To encourage respect for human rights and for fundamental freedoms for all." We ratified the charter in 1945 and today reaffirm our commitment. I hope that in the future we show more wisdom and sensitivity in our actions and that the wrongs done to the Bikinians can be righted, and I ask that the following article tracing the Bikinian's history be inserted into the RECORD.

[From the Los Angeles Times, July 23, 1978]

BIKINI ISLAND: LOST AGAIN TO RADIATION

(By Jerry Belcher)

BIKINI, MARSHALL ISLANDS.—When the Americans made him leave Bikini for the first time, in 1946, Andrew Jakeo was 34 years old.

When, after using the fragile Pacific atoll for 23 nuclear test blasts, the Americans in the person of President Lyndon B. Johnson assured him, his fellow islanders and the rest of the world that Bikini once again was safe for human life, Andrew Jakeo was 56.

Now Andrew Jakeo is 66 and, above all else, he wants to live out the days that remain to him on this tiny curve of coral, sand and coconut palms with his family and friends.

Then, when his time comes, he wants to be buried here among his ancestors.

But the old man will not be permitted to end his days where he wishes.

For one day next month—federal officials say about Aug. 22, although official plans dealing with this place and these people seem to go awry more often than not—the Americans will remove Andrew Jakeo and the 140 others living on 449-acre Bikini Island, largest of the 26 islets that make up Bikini Atoll.

They will be transported to "temporary" quarters in Kili, a single island with a land area one-sixth that of their 2.2-square-mile home atoll. Kili, without a lagoon, lies nearly 500 miles southeast. It is an island some Bikinians habitually refer to as "the prison."

The Bikinians must leave their ancestral home and its beautiful, fish-teeming lagoon because the Americans, as they themselves now admit, made a regrettable error 10 years ago.

Despite what the scientists and the President said—despite an investment of $3.25 million for cleanup and rebuilding—Bikini is not safe after all.

Andrew Jakeo and the others living on Bikini Island are being subjected to unacceptably high doses of radiation left behind by atomic and hydrogen bomb blasts that seared the atoll during 12 years of testing.

Some younger Bikinians may live to see their homeland again, but Andrew Jakeo will not. It may be 50 years before Bikini is fit for human habitation.

Andrew Jakeo is bitter and angry, although like most Marshallese he veils his emotions from outsiders.

"The Americans told us in 1946 that they had come to test a bomb," he said not long ago. "They told us they did not know how much the bomb would hurt Bikini. They told us that after they tested the bomb, and Bikini is good again, they will bring

us back. They did not say how long it would be."

But Andrew—Marshallese address one another by first names and expect outsiders to do the same—believed, along with the 165 others the U.S. Navy removed in 1946, that they would be back within a year or so.

Meantime, he was convinced, the Americans would provide for him and the other people of Bikini.

The first American promise to the Bikini people was made by the Navy after President Harry S Truman had, on Jan. 10, 1946, at the recommendation of the Joint Chiefs of Staff, given the go-ahead for Operation Crossroads, the first post-World War II test of nuclear weapons.

In simplest terms, the promise went something like this: We have decided to use your atoll to test a powerful new weapon. For your own safety,you will be moved to another place. We will take care of you there. When we're through using your atoll, we will bring you back.

Few now question that the Navy had the legal right to appropriate Bikini Atoll for military purposes.

Bikini is part of the Marshall Islands, which is part of Micronesia, which in turn was established as a U.N. Trust Territory under U.S. administration by terms of the U.N. Charter of 1945.

Specifically, it was designated a "strategic trust," which permitted the United States to set aside certain areas of the former Japanese mandate territory for military security purposes.

Bikini seemed a logical choice geographically, too. The idea of Operation Crossroads was to see what the atomic bomb would do to a naval fleet. The three A-bombs of World War II had been exploded in the New Mexico desert and over the Japanese cities of Hiroshima and Nagasaki.

Other sites were considered. But according to Crossroads historian Neal Hines, "Bikini fulfilled all the conditions of climate and isolation. It was . . . 2,500 miles west southwest of Honolulu . . . but it also was accessible. . . . Its inhabitants who then numbered 162, could be moved to another atoll."

(Most other sources say the population then was 166. Since then there has been a population explosion. Today 860 persons claim land rights in Bikini Atoll—140 now living on Bikini Island, 450 on Kili, and the others scattered throughout the Marshalls.)

"In retrospect . . . you'd have to say the removal was the 'right of the conqueror,'" said Jim Winn, a transplanted Kansan who is district attorney of the Pacific Trust Territory's Marshall Islands District.

"Our attitude must have been that we, at the cost of several thousand American lives, took the Marshalls . . . took this whole area of the Pacific from the Japanese. And . . . part of it was the attitude. 'Well, they (the Bikinians) are just little brown people anyway. They don't need their atoll. We'll just move 'em off someplace else'."

Certainly the Bikinians were in no position to seriously oppose the Navy when, on Feb. 10, 1946, Commodore Ben Wyatt, then the military governor, arrived by seaplane and announced that they must go elsewhere.

In effect, the islanders then and there adopted the United States as their iroij-alap—their paramount chief, the power over and beyond their local island chief, Juda. And, in Marshallese tradition, this meant that henceforward the United States was responsible for the protection and well-being of the Bikini people.

Althought to American eyes the atolls of the Marshalls look much the same, the removal was deeply painful and culturally destructive to the Bikinians.

For, as many anthropologists have observed, there is among Micronesian peoples a profound, mystical attachment to the particular, tiny plots of land owned by their families or clans.

"In those islands, a man without land is no man."

By a split vote of the atoll's leaders, the Bikinians chose to go to Rongerik Atoll, 128 miles east of their home atoll. The Navy, which put out press releases at the time indicating that "the natives were delighted" by the move, was only slightly more restrained a year later in its official history of Crossroads, "Bombs at Bikini."

"The Bikinians convinced that the (A-bo) tests would be a contribution to world peace, indicated their willingness to evacuate," the Navy historian wrote.

It wasn't quite that way, according to Tobin, emeritus professor of anthropology at University of Hawaii.

"They did not go willingly," Tobin said. "They were forced to go . . . They agreed because they had to, just as they had agreed to do things when the Japanese had bayonets in the background.

"Put yourself in their shoes: You've been told what to do by the Japanese for a quarter-century . . . and told by the Japanese military the Americans were weak. So when the Americans wiped out the Japanese . . . all those American ships appearing, the natural reaction . . . would be to go along with what they are told."

On the afternoon of March 7, 1946, the 166 men, women and children of Bikini were loaded aboard Navy LST 1108. As the awkward landing craft backed off the beach at Bikini Island and churned out of the blue-green lagoon, the people gathered on the main deck to sing traditional songs of farewell. The next morning they were unloaded at Rongerik.

On the morning of July 1, a B-29 bomber called Dave's Dream dropped a "nominal yield" 20-kiloton (the equivalent of 20,000 tons of TNT) atomic bomb over the fleet of 70 obsolete U.S. and captured Japanese and German warships moored just off Bikini Island. It exploded 500 feet above the fleet, sinking five ships, twisting and crushing others like cheap toys—and initiating the radiation poisoning of Bikini.

Rongerik was a disaster. It was too small. There was too little food. And, according to legend, it was haunted by an evil witch named Liborka, who poisoned the fish of the lagoon. In fact, certain fish of the lagoon were poisonous which was why Rongerik had been uninhabited for years.

But it was close to Bikini and the people had chosen it for that reason. They thought they could bear up under the hardships until they went back to their home atoll. That, they were convinced, would be in a couple of years at most.

Severe food shortages developed during the winter of 1946–47. In spring of 1947, fire destroyed a third of Rongerik's coconut trees. The people pressed for a return to Bikini, but a radiological survey indicated that it was too "hot" for permanent occupancy and would be for many years.

In October, the Navy announced that the Bikinians would be relocated on Ujelang. But two months later, the Pentagon announced a new series of nuclear tests would be held, this time at Eniwetok, another atoll in the Marshalls. The Eniwetok people would go to Ujelang instead of the Bikinians. The Bikinians had to wait.

Andrew Jakeo remembered the Rongerik period well. "I was a big man then," he said, "but I got skinny." He held up the little finger of his left hand. "Skinny like this. One old woman died from hunger . . . For a year and a half, we did not have enough food, (sometimes) got our food by cutting open the coconut tree and eating the heart of the tree. This killed the tree."

Jeladrik Jakeo, Andrew's 48-year-old brother, was a teen-ager on Rongerik. "It was terrible," he remembered. "We ate things that were not good, gathered coconuts that floated in from the sea. Bad food; we got sick. Arms and legs swelled up, and we got blisters on the arms and we had diarrhea."

Late in January, 1948, the Navy dispatched anthropologist Leonard Mason, now of the University of Hawaii, to investigate. He found the exiles at the point of starvation, living on raw flour diluted with water.

In strong terms, Mason recommended that the people be removed from Rongerik as soon as possible. He also recommended Kili Island, although he admitted it had many disadvantages, as the best available place to relocate the Bikinians.

In March, 1948, they were moved to a tent camp at Kwajalein. In September, the Bikinians voted to resettle on Kili, and in November, they were finally settled on Kili and began building a new and bigger village than they had had on Bikini.

Kili was without question better than Rongerik. But it also was small and worse yet it had no lagoon. The island was constantly pounded by the Pacific. Fishing was far more difficult than at Bikini. Supply ships could neither land food nor take away copra—dried coconut, the only cash crop—for months at a time because of the heavy surf. Sometimes six months passed before a ship could unload.

In an attempt to relieve the isolation, the Navy turned over a 40-foot power whaleboat to the Bikinians. It sank in high seas in 1951.

On March 1, 1954, test shot Bravo, an H-bomb 750 times more powerful than the first atomic bomb, had been exploded at Bikini with tragic results.

An unpredicted wind shift after the blast had sent the 20-mile-high cloud of radioactive particles drifting in the wrong direction, across Bikini Island and beyond. The plume stretched 240 miles long and 40 miles wide, over an area far outside the restricted danger zone.

Rongelap, Rongerik and Utirik atolls, all inhabited by Marshallese and U.S. military personnel, were in the path of the fallout, which in some places fluttered down like snowflakes.

Twenty-eight Americans, 244 Marshallese and—although it was not known until sometime later—23 crewmen of the Japanese fishing boat Fukuryu Maru (Lucky Dragon) were seriously irradiated. One crewman died of complications. The rest spent a year in hospitals.

On Aug. 12, 1965, President Johnson announced that Bikini was safe, that it would be rehabilitated and resettled "with all possible dispatch."

Glenn T. Seaborg, AEC chairman, explained that the President's final decision had been based on the recommendation of "eight of the most highly qualified experts available" after studying the 1967 survey results and unanimously concluding that Bikini Island and Eneu Island, 10 miles away, were radiologically safe enough to allow reestablishment of the Bikinians there.

The experts—all either AEC employes or employes of AEC contractors—warned that the coconut crabs should not be eaten because of their high content of strontium 90. There were no warnings about any other local foods. They recommended that radiological checks be made periodically to determine how much radiation the people were being exposed to from external environmental sources and from their diet.

Chief Juda did not live to hear the news. He had died—shortly before the Johnson announcement—of cancer, which he believed had been caused by his exposure to the first A-bomb test in 1946, a claim scientists are inclined to discount.

Ironically, especially in view of what was to be learned 10 years later, several Bikinians expressed suspicion about the food growing on the contaminated atoll during a tour of

the islands a few weeks after the Johnson announcement.

One of the Bikinians, named Jibaj, even refused to touch food from the atoll, insisting it was poisonous.

Another, Laijo, made a forecast that, from the perspective of 1978, seems far more acute and accurate than the predictions of any of the U.S. bureaucrats or scientists. "It will take 100 years before the islands are back in shape again." Tobin reported him as saying ". . . The islands are completely ruined now."

Still, despite their suspicions and the obvious enormity of the job, the Bikinians on the tour apparently were convinced by the officials and scientists that at least the islands of Bikini and Eneu, 10 miles away, could be made livable.

The Bikinians reported the conditions they had seen and the plans that were being made for rehabilitation to their fellow islanders on Kili. Only two or three of the 300 then living there voted against the idea of an eventual return to Bikini.

The cleanup began in February, 1969, using some Bikinians on the work crew. The rest of the rehabilitation project—plowing up Bikini and Eneu Islands, replanting them with food crops, began later the same year. A few families began moving back to Bikini.

By 1974, the $325,000 cleanup and the $3 million rehabilitation program was through its first phase. Forty of the planned 80 homes had been erected.

Then, as planning for the second phase was beginning, the Bikinians said they wanted to locate some of the new structures in the interior of the island.

The following year, another AEC radiological survey was made, this time in more detail. It was found that radiation levels in the interior of the island were too high to permit people to build and live in homes there.

"We didn't really find any surprises in that external radiation field," said Tommy McCraw, who had been involved in both the 1967 and the 1975 surveys.

However, at the same time, it was determined for the first time that locally grown breadfruit and pandanus—two popular items of diet—were too radioactive to be safely consumed over the long term. Coconuts, even more of a staple in the local diet, were reported to be safe.

Then last summer, a Lawrence Livermore Laboratory study done for the Energy Research and Development Agency, an AEC successor agency, found that well water on Bikini exceeded federal standards for radioactive strontium 90.

Other levels of radiation on the island were so high, according to the report, that there was little margin for safe absorption of any additional doses from the food chain.

But, at the same time, ERDA environmental safety official Roger Ray said it would be premature to say that the Bikinians should be moved off their atoll.

By fall, though, there no longer was any question: Ray told a meeting of the Bikini-Kili Council in Majuro that Bikini Island "should no longer be considered a permanent settlement" and advised that consideration be given to moving the settlement to Eneu.

It seemed the scientists had now determined that the Bikinians were absorbing radiation at a rate substantially above the federal safety standard of .5 rem per year, a measurement of radiation dosage of any kind producing biological effects in man.

According to the Department of Energy (successor to ERDA) the external dose on Bikini Island in 1977 was .2, the same as in 1974. But the internal dose, measured by an instrument called the whole body counter, had risen dramatically in three years—from a top reading of .067 in 1974 to a top of .538 in 1977.

And the coconut was named as the radioactive "villain," since it was the only locally grown food then being consumed in any quantity. As one scientist put it, the coconut palms were "sopping up" radioactive cesium 137 and strontium 90 at a much greater rate than anyone predicted.

High doses of radiation from these isotopes are known to cause various types of cancer in man, but scientists debate the cancer risk from relatively low doses such as those to which the Bikinians have been exposed. In general, scientists have found that the lower the dose, the lower the risk that cancer will develop over a period of years.

The people living on Bikini were ordered either to eat no coconuts or to ration themselves to one a day. But they were told the coconuts from Eneu were still safe.

The Trust Territory government initiated a feeding program. Except for fish and fowl, the people were to eat nothing but U.S. Department of Agriculture surplus food.

By February of this year, it was official policy: Bikini was unfit for people to live on.

In contrast to 1968, the news was *not* announced to the world by the President of the United States.

It was rather quietly passed along to Congress in the form of a money request. Undersecretary of the Interior James A. Joseph, in asking Congress for a $15 million appropriation to relocate the people of Bikini, explained the tragedy in low-key, bureaucratic style:

"It became evident that radionuclide intake in the plant food chain had been significantly miscalculated in terms of human consumption. . . . The restriction on the use of coconut products produced on Bikini Island for food and export make (it) . . . unrealistic as a permanent place of settlement.

When the naval officer had told the people they must leave the island a generation ago, he had compared them "to the children of Israel whom the Lord saved from their enemy and led into the promised land."

It had not worked out that way.

"We are more akin to the children of Israel when they left Egypt and wandered through the desert for 40 years," the dark-skinned, dignified Bikinian said. "We left Bikini and have wandered through the ocean for 32 years, and we will never return to our promised land."

In fact Tomaki was back on Bikini on June 1, along with High Commissioner Winkel, but only to break the news to the people and to discuss with them where they wanted to go.

Winkel's recommendations were read into the record at the June 19 meeting of the Yates subcommittee. He noted that those living on Bikini island told him that if they could not remain there, or at least on Eneu, they preferred to move to "public domain" land in Hawaii or to the mainland of the United States.

He said the majority of those living on Kili apparently preferred to remain there. But, he added, some wanted to join the Bikini residents wherever they might be relocated.

Further tests on Eneu foodstuffs would be required before the island could be finally ruled out, Winkel said. But he was not optimistic. And, without quite spelling it out, he seemed to dismiss the thought of relocating the Bikinians in Hawaii or on the mainland.

"On the basis of all the factors," Winkel summed up, "it is my decision that the people of Bikini Island should be relocated to Kili Island at this time."

Winkel's statement to the subcommittee on the Bikinians' preferences was accurate as far as it went.

But, from Times interviews with more than a dozen Bikinians on their condemned island last month, it was apparent the high commissioner failed to convey the depth of their feelings, especially their reluctance to be resettled in the Marshalls, particularly on Kili. "Kili," they said again and again, "is bad, Kili is no good."

With only one exception, they said they wished to be resettled in Hawaii or Florida.

Milton Anien, born on another island but married into a Bikini family, put it this way:

"We would like to be with you in America always. We like you. We would like you to keep your promise to the Bikini people, to take care of us.

"You made a promise to the Bikini people, so we would like to come live with you—and you can support the people of Bikini as much as you can—live with you so the American doctors can watch me and my family because I worry about the radiation, worry about the radiation night after night. . . . Everybody here says this."

Magistrate Tomaki Juda, appearing before the subcommittee once again, said that although there was deep sorrow and bitterness among his people and although "life on Kili is difficult," he concurred in the high commissioner's decision to relocate them at least temporarily on that island.

Then he suggested practical measures which he said were necessary to make Kili livable—construction of a 2,000-foot airstrip and an all-weather, all-season pier, establishment of a medical dispensary, a new school, renovation of homes and community facilities. Consideration also should be given, he said, to relocating some of the people on Jabwor Island at Jaluit Atoll.

The Bikini leader also made it clear that in addition to relocating the people, and making their new homeland livable, the United States had further financial obligations.

It was too soon to discuss details, he said, but, "we feel that our people, especially the elderly ones, are entitled to compensation from the United States, for their removal from Bikini and for the virtual destruction of Bikini and other islands."

Congress has now approved the $15 million for relocating the Bikinians, and building materials are being purchased for the temporary housing for them on Kili.

Plans are under way for the Kili pier, although some persons familiar with the surf conditions do not believe it is feasible.

Planning also goes ahead for the final removal of the people from Bikini next month.

One last matter: Ruth Van Cleve said in Washington that, although old Andrew Jakeo cannot continue to live on Bikini, it is possible that after his death he could be buried there with his ancestors.

But she added, "I think we would want to get firm word on that from the scientists."●

AMENDMENT TO HOUSE JOINT RESOLUTION 638

HON. TOM RAILSBACK

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. RAILSBACK. Mr. Speaker, when the the House of Representatives considers House Joint Resolution 638, a bill to extend the deadline for ratification of the equal rights amendment, Congressman ERTEL and I will offer a bipartisan amendment as an attempt at compromise and fundamental fairness. For the information of our colleagues, we would like to insert the text of the amendment we intend to offer:

AMENDMENT TO HOUSE JOINT RESOLUTION 638 OFFERED BY MESSRS. RAILSBACK AND ERTEL

On the first page, line 10, strike the period and insert the following: ", provided, however, that any legislature which shall have ratified the article of amendment within the first seven years of this period may, by the same vote and procedure required for ratification, rescind that action at any time after this resolution becomes effective and prior to adoption of the amendment. The Administrator of the General Services Administration shall certify to Congress all resolutions of ratification or rescission of this amendment as received from the several States for final determination by the Congress as to whether the amendment shall have been adopted."●

HUMAN RIGHTS AND FOREIGN BUSINESS OPERATIONS

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. SIMON. Mr. Speaker, Forest Frank of the House International Relations Committee staff, recently spoke to a meeting of the Council of Americas, at which he had some advice for American corporations and their overseas operations.

His advice is both practical and sound, and I am reprinting it here in the CONGRESSIONAL RECORD so that my colleagues may see it and pass it along to friends in the business community who have some very legitimate concerns in regard to human rights and their business operation.

SPEECH BEFORE HOUSE INTERNATIONAL RELATIONS COMMITTEE

(By Forest Frank)

One of the most important steps companies can take is to do all they can to support the growth and extension of a legal system. This may mean that all employees of American subsidiaries are covered under some sort of legal services benefit plan and that plan is registered with local authorities. The objective in developing this kind of fringe benefit protection is threefold: First, it is a concrete step to promote human rights. Second, it supports the development of legal systems. Third, it protects employees from some of the worst abuses of repressive judicial systems based on police brutality, torture, physical abuse, and reprisals against family members to the degree that a company sponsored bail fund, company-sponsored lawyers, etc. are able to win rapid release of company employees arrested for participation in demonstrations or nonviolent civil disobedience.

Another type of activity the companies could engage in are efforts to protect the fundamental human right of association by seeking to protect efforts to organize trade associations, labor organizations, and political organizations by promoting foreign adoption of laws analogous to our Wagner Act. Similarly laws which establish fair wage, hour and labor practices, health and safety conditions, and environmental protection controls can all promote human rights. Rather than resist such activities, one might argue that American companies' experience with such matters would place them at a competitive advantage over other companies without similar experience.

In general terms, then, I believe companies should pursue a broad strategy premised on the belief that there are many human rights which can be and should be supported by American firms operating overseas. First, those human rights which are wholly compatible with good business practices must be identified. Documents such as the Universal Declaration on Human Rights, the International Labor Organization human rights convernants, the Western European Economic Union's Declaration on Human Rights, and the Organization of American States Declaration on Human Rights, are all valuable reference documents which should be obtained.

Second, companies, individually and collectively, need to identify a range of business practices that could be undertaken in support of specific human rights promotion. For example, efforts by individual companies to expand career opportunities to ethnic minorities, improve overall working conditions, improve provision of legal services to all company employees for both business and nonbusiness legal problems, etc.

Third, companies should identify which specific strategies to improve human rights will work in specific countries in light of local practices, legal systems, and other restrictions.

There are, I believe, compelling reasons for companies to adopt this rather aggressive counter-offensive on behalf of human rights.

First, as I indicated above, the near term prospects of significant change in current U.S. policy and law away from support of human rights is most unlikely.

Second, the administration and many Members of Congress are looking for a variety of new ways to promote human rights. There is, I believe, a great deal of receptiveness to new ways of thinking about the problem of promoting human rights.

Third, the law allows the administration a great deal of flexibility in implementing human rights actions. The Export-Import Bank Act requires the Board of the Directors to consider the effect of exports on human rights. I believe that efforts on the part of companies to promote human rights could be a major, positive factor which would cause the Department of State to favorably recommend to the Export-Import Bank Board of Directors that applications for loans or credits be approved.

Fourth, I believe efforts to promote human rights by American companies will substantially improve the overall climate in which business operates, both at home and abroad. While the Department of State would undoubtedly be a bit more sympathetic to business interests if those same interests were not actively attempting to undercut policy overseas, I believe that State, Commerce, Treasury, the Ex-Im Bank, and especially the Congress would respond favorably to a concerted effort by business to promote those human rights which are especially important to the conduct of international trade and commerce.●

CAESAR CREEK DEDICATION

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. BROWN of Ohio. Mr. Speaker, recently I attended the dedication of an undertaking which began more than 50 years ago. This project, the Caesar Creek Multi-Purpose Reservoir, will be used for flood control, provide the water supply needed in surrounding communities, and provide for recreational facilities of fishing, boating, swimming, and general land enjoyment.

But, it was not until 1964, with the help of my father who then represented the area, that Congress appropriated funds to permit Caesar Creek's building. As the years have passed, I have had the opportunity to watch this deserving project unfold and take shape.

Though the pursuit of this aim has been long and hard, it has been met with a determined hand by all who played a part in its evolution. One man specifically should be recognized, as he is to be commended on his patience and dedication. J. E. Carnahan, the honorary president of the Little Miami Valley Development Association, has worked hard on this project, guiding and offering assistance with each step. I am sure his unyielding efforts will be much appreciated by all those who will now be able to benefit from his endeavors.

Thus, I would like to enter Mr. Carnahan's remarks from the Caesar Creek dedication so we may be reminded of the perseverance that enabled its completion. The text of the speech follows:

CAESAR CREEK LAKE DEDICATION

"Only God can grow a tree. Why should the spirit of mortal be proud . . . Only God is Great . . . Only God can grow a tree."

Without the authority vested in Congressmen—Gordon Scherer—Clarence J. Brown Sr. and Junior—Michael Kirwan—William H. Harsha—the venerable statesman, Frank J. Lausche and others dedicated to the cause . . . The Caesar Creek and East Fork Lakes could not have become realities. Equally true—without my contributions, the two projects would not have been realized. The moral of the saga is—simple . . . we are dependent on each other.

In retrospect, I recognize Destiny as the principal in our episode. On more than one occasion, destiny has intervened to save my life. Automatically, destiny has placed me in the right place at the right time with the right people and the challenge to carry through.

This space whereon we are assembled was—not too long ago, as time is measured—inhabited by real Americans—the American Indians . . . true conservationists.

With the advent of the white man came development, which—per se—is good. Simultaneously, with development came exploitation . . . centered on the dollar, which is not good.

Fortunately, for future generations—the many who strongly believe in conserving our natural resources are organized to and do oppose exploitation. Unfortunately, for this segment of good people—the pendulum at its highest arc toward conservation begets extremists, which if allowed to dominate—would destroy the balance between what has to be and that which we would like it to be. The extremists seem unable to reach a balance or harmony between the essentials and the aesthetic—by putting first things first.

My fellow-Americans . . . or the United States of America—the time is now to stop "putting off" . . . putting first things first."

Genesis—1:28 reads in part:—And God blessed them, and God said unto them, Be fruitful, and multiply, and replenish the earth and subdue it: and have dominion over the fish of the sea, and over the fowl of the air, and over every living thing that moveth upon the earth.

A wild rose—at a distance, is rather pretty; brought close, it is not so pretty. However, the wild rose was developed by man to be amongst the most beautiful of all flowers. Therefore, we can rationally and with certainty conclude: The desired environment is BEST attained by MAN . . . working with nature.

At the outset, to get construction of the two lakes, the Little Miami Valley was most fortunate to have the Milford Area Chamber Of Commerce as the instrument through which to initiate action. That the municipalities in the valley, effected, might be involved in the action—The Chamber on March 17, 1962, organized "The Little Miami Valley Development Association."

The over-all purpose of the association was to have the Little Miami Valley as secure against major floods as is the Great Miami Valley.

The immediate objective was to get a nucleus or core of a flood control system in the valley through construction of an impoundment on Caesar Creek and one on East Fork knowing—that total security required an impoundment on Todd's Fork and another further upstream.

When completion of The Caesar Creek and East Fork Projects seemed assured—an Ad Hoc Committee directed by Earl J. Maag and Gerald Mengle circulated petitions throughout the Todd's Fork area for measurement of the sentiment in respect to an impoundment on Todd's Fork. 1122 signatures were readily obtained. You know . . . one thousand one hundred twenty two signatures is a lot of names.

At this point, opposition had arisen, as it so often does, and through court action was delaying construction of the projects. In the interim preceding the decision of the court to order continuation and completion of construction—the delays had cost thousands of dollars, unnecessarily.

With the completion of The Caesar Creek and East Fork Lakes—the *nucleus* of a flood control system for The Little Miami Valley is secure. The life of nearly a generation has been involved. It therefore, seems fitting that the future of conservation should become the responsibility of the youth of today and tomorrow * * * and that The Little Miami Valley Development Association be disbanded with the dedication of The Caesar Creek and East Fork Lakes.

It might be of interest to the general public to know—that during its nearly twenty years of existence—The Association has paid out no salaries—no wages. It has been, strictly, a matter of "service above self." Service above self * * * Ladies and gentlemen: Is not the remedy for inflation and its related ills, "more service and less self?"

One of the most unselfish and dedicated to worthy causes is the Honorable Earl J. Maag * * * Mr. Maag loves the people of his home town and The Little Miami Valley. For 40 years, he has served his community—most of the time as Mayor of Morrow. He has worked hard and long for the flood control system now established in The Little Miami Valley. For him, this is a great day. Ofttimes, he and I have wondered, "Would we make it?" Fellow Citizens, meet Mr. Maag.

Throughout the effort to achieve—we have lost 6 of our stalwarts:—Clarence J. Brown, Sr.—William H. Shawhan—Carl Bernges—Frank Minges—Eugene J. Cramer—Hudson Biery of The-ovia.

For nearly 20 years we have been closely associated with the U.S. Army Corps of Engineers. We would be remiss were we not to pay tribute to this gallant troop of professionals—able—competent and dedicated to the conservation of our water and land resources.

Ofttimes—too often * * * the Corps is unjustly criticized—even abused—by the uninformed. To get a Federal Water Project, it takes initiative action on the part of the citizens of the area involved. The uninformed criticize the Corps for this initiative. The informed—know better. The Corps is a Department of the U.S. Army—under the Executive Branch of the Federal Government and takes its orders from the "boss."

Today, Saturday, July 29, 1978—the older of my colleagues and myself stand in shadows—ever lengthening. We hope for a home in that "celestial" city from which to look down on lofty mountain grandeur—on verdant woodlands—on the babbling brooks—on crystal clear lakes and on fertile fields—cultivated by tender loving hands * * * providing for mankind the essence of the good life.

And on most days the sun will rise * * * and shine and set on The Caesar Creek and East Fork Lakes; on other days, the clouds will at time let fall a few drops of rain causing ripples on the placid waters; at other times, the rain will come down in great torrents—to replace the millions of gallons used by man in his daily endeavors; sometimes, strong winds will pile high great waves to dash against the rip-rap protecting the dams; and, after the storm * * * the calm, the sunshine and renewed life—with workers seeking rest after the day of toil—youngsters, playing and having fun * * * and others continuing our efforts to conserve our water and land resources.●

NORTHWEST AIRLINES AND THE MUTUAL AID PACT

HON. WILLIAM S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. BROOMFIELD. Mr. Speaker, I was shocked to learn today that Northwest Airlines reported second quarter earnings of more than $20 million despite a 3-month work stoppage which has caused great personal and economic hardship to the people of Michigan and other communities along Northwest routes.

While I am always reluctant to interfere in the collective-bargaining process, this situation merits special consideration by the Congress and the agencies charged with administering Federal air transportation policy.

Although its pilots walked off their jobs on April 29, Northwest has been able to continue making money because of the Airlines Mutual Aid Pact. Under this agreement, a grounded airline is guaranteed 35 percent of its usual weekly operating costs without having to share any of these funds with striking employees. The funds are paid by other airlines enjoying windfall profits because of the work stoppage.

Under these conditions, there is little incentive for an early settlement of the issues involved in the strike. This is supported by the fact that Northwest has been involved in five work stoppages since 1970 resulting in almost 1 full year of lost service to its customers.

While the Airlines Mutual Aid Pact technically expired on February 27, 1978, it remains in effect while the Civil Aeronautics Board debates renewing it for another 5 years.

Such a renewal would be a mistake serving only to encourage future service interruptions. I have joined today as a cosponsor of H.R. 13735, introduced by the gentleman from Ohio (Mr. MOTTL), directing the Civil Aeronautics Board to disapprove any extension of the pact and preventing the Board from approving similar pacts in the future.

In addition, the Civil Aeronautics Board, the National Mediation Board, and the Department of Transportation should step up efforts to help bring about an early resolution of this serious situation.

Further, I would urge a careful review of the routes now served by Northwest Airlines with consideration toward allowing other carriers to serve some of the areas now almost exclusively handled by Northwest.

The toll in lost revenues to business and governments already has mounted into the millions of dollars, and the costs in personal hardship are incalculable. Clearly, the public interest is the only interest that has been neglected. I urge my colleagues to join with me and other Members from the northern tier of States in these efforts to bring about an early end to the Northwest strike and a prompt resumption of service to the public.●

ERA EXTENSION TWO-THIRDS OR MAJORITY

HON. HAROLD L. VOLKMER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. VOLKMER. Mr. Speaker, the proponents of a majority vote on House Joint Resolution 638, to extend the time for ratification of the equal rights amendment, have created a legislative vehicle which is unique in the constitutional history of our Government: A joint resolution passed by a majority vote which may or may not be submitted for Presidential signature.

Proponents of a majority vote state that a joint resolution was chosen as the legislative vehicle as to parallel the procedure of the original equal rights amendment, House Joint Resolution 208—92d Congress. In doing so it would seem that procedures as to passage of the measure would also be parallel, two-thirds majority for final passage—yet, the proponents say that only a simple majority is needed. In addition they argue that the resolution need not be sent to the President for signature and any Presidential signature would be purely symbolic.

The supporters of House Joint Resolution 638 are caught on the horns of a dilemma. There is no precedent for such a legislative vehicle, if it is to be binding. The Constitution—article 1, section 7—the statutes—title I, sections 106 and 106(a)—and our precedents—Jeffersons Manual, section 397—all require a joint resolution to be passed by a majority vote to be submitted to the President.

The framers of our Constitution, the Supreme Court (*Hollingsworth* v. *Virginia*, 3 Dall 378 (1798)) and a careful reading of article V clearly demonstrates the President plays no role in proposing or adopting a constitutional amendment. Justice Chase, in Hollingsworth stated:

He (the President) has nothing to do with the proposition or adoption of amendments to the Constitution.

The proponents of a majority vote recognize this fact, so they say Presidential signature is unnecessary. However, this position ignores title I, section 106 of our statutes and article I, section 7 of the Constitution which say that a joint resolution is a bill to be signed by the President. The only exception to this rule is the constitutional amendment process which under article V requires passage by a two-thirds majority.

If the resolution was submitted to the President for signature, are we violating constitutional procedure? Yes. What would happen if the President vetoed the resolution? A two-thirds vote of both Houses is required to override a veto. If two-thirds could not be obtained, then the President would be determining the amendment process. He has no power to do this under our Constitution.

What are we accomplishing by proceeding in this manner? The answer is that we will accomplish nothing binding. A "joint resolution" passed by a majority vote without signature of the President will have only the effect of a concurrent resolution, not binding beyond the life of this Congress. I cannot bring myself to vote for legislation which purports to perform one function, but clearly does not.

A two-thirds vote on House Joint Resolution 638 would be constitutional and binding.●

PAN AM EMPLOYEES SUPPORT H.R. 8729, AIRPORT AND AIRCRAFT NOISE REDUCTION ACT

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. DOWNEY. Mr. Speaker, I wish to bring to the attention of my colleagues a letter from representatives of the 27,000 employees of Pan American World Airways supporting the Airport and Aircraft Noise Reduction Act. The letter follows:

JULY 28, 1978.

DEAR CONGRESSMAN: The 27,000 employees of Pan Am want your support for HR 8729 and HR 11986 for the following reasons.

This legislation provides all airlines with a portion of the necessary funds to replace equipment that has been effectively condemned by already enacted anti-noise legislation and FAA rules.

While aiding airlines in the acquisition of new fuel efficient aircraft, this legislation does not place the burden on the ordinary taxpayer. The funds are to be collected only from airline passengers.

There will be no increase in the tax on domestic passengers. A portion of the monies now collected will be earmarked for the fund that will aid the carriers. There will be a $10.00 departure tax collected from international passengers instead of the current $3.00 departure tax now in effect.

We need your support of this legislation as it now stands, complete with the financing provisions. The funds provided will help the airline buy new, less polluting aircraft which in turn will bolster the U.S. aircraft manufacturing industry.

The employees of Pan Am greatly appreciate the legislative help that has aided our company over the last four years but we need your help perhaps even more now. While the airlines are today in a stronger position than they've been in the last four years the future is uncertain at best.

The cost of new equipment is extremely high. Even this year's rate of return is not enough to secure the amount and type of financing required to buy the new planes in the future.

Respectfully,

FELICIA FAIRCHILD,
Chairman.

MIKE LYON,
Political Action Coordinator.●

THE TOTAL FORCES ACT

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. BENNETT. Mr. Speaker, I recently introduced a bill to strengthen our military Reserve Forces. Our distinguished colleague MEL PRICE, chairman of the Armed Service Committee, joined with me in introducing this important legislation. The bill (H.R. 13164) is entitled "The Total Forces Act." It is designed to prevent dangerous neglect of our Reserve Forces and to insure that the Reserves can play the vital role in our national defense which is essential to complement our Active Duty Forces, each an essential part of the total force plan.

I would like to explain the background and the purpose of this needed legislation, and then provide a concise analysis of the bill.

The role of the citizen-soldier, or the militia, has been of paramount importance throughout the history of the United States and predates the American Revolution. As I pointed out in remarks to the 1978 Mid-Winter Conference of the Reserve Officers Association.

The Minute Man principle exists today; our armed forces are a very small minority of our population. But without adequate reserves our defenses would be inadequate for national security. . . .

For financial reasons we absolutely have to rely upon the willingness of Minute Men throughout the United States to serve our country in time of need. The cost of a Reservist is now one-fifth that of a man on active duty.

The Minute Men of the 20th century cannot simply pick up their turkey guns and sally forth to effective combat. Weapons today are much more complex and require a much higher degree of education and training; so the Minute Man of today has to prepare for his obligation to his country by spending time and effort outside of his regular occupation in order to be ready when called on for military duty. This requires long-term sacrifice, which the government must encourage.

Regrettably there has not always been a clear policy for the Reserve coming from the administration through the years. There has not always been commitment to full and competent use of the Reserves.

I believe that now is the time to take action in Congress which will enhance the policymaking structure affecting Reserve Forces and lead to their better management and enhanced readiness.

With the wisdom of hindsight based upon our unhappy experience in Southeast Asia when we failed to mobilize and deploy Reserve Forces in significant numbers. then Secretary of Defense Melvin Laird promised full reliance on "Total Force" in 1972. While this term had been used as early as 1969, Mr. Laird brought it into sharp focus as the Nation prepared to end the draft and scrap the highly effective selective service mechanisms which brought young men into the Armed Forces.

Under the Laird policy, "Total Force" meant a reduced active establishment and heavy reliance on properly equipped, well trained, and adequately manned Reserve Forces. Future emergencies would be handled by this Active/Reserve combined Force; and "draftees" would not be available except under conditions something like a world war III and then not for months after M-day.

While the Laird concept was commendable, implementation has failed in critical areas primarily because of benign or deliberate neglect in the Office of the Secretary of Defense, probably motivated from fiscal constraints. For this reason the Army Reserve components are now woefully short of their mobilization requirements in personnel, despite planned utilization within days or weeks in an emergency. For example: In 1972, the Army Individual Ready Reserve had a strength of approximately 1,000,000 and it is now about 140,000 while requirements are three or four times that number; the Army National Guard has a shortage of nearly 80,000; and the units of the Army Reserve are short 90,000. The Navy's Selected Reserve has dropped from 129,000 to a present strength of 87,000, while the CNO has shown that over 100,000 would be required.

The Marine Reserve has dropped from the 45,000 level to around 32,000.

Aside from the very small but effective Coast Guard Reserve, which is not under the administration of the Department of Defense, the Air Force Reserve elements are the most successful in the "Total Force" program. It is apparent that their relative success is due to an appropriate command structure in that service; appropriate full-time support; and a much lower personnel requirement than the Army.

With the increase of tensions vis a vis the U.S.S.R. and turbulence in the Middle East and Africa, it is time for positive steps to be taken aimed at transforming the theory of "Total Force" to hard reality. Higher level attention to Reserve problems is obviously needed throughout the Secretariat of the Defense Department, and the command structure of the Air Force should be emulated in other services. The probable need for an Assistant Secretary of Defense in the mobilization and Reserve function was recognized by the House in 1967, and Senator STENNIS then stated that such a position should be established if the prevailing organization fails to be viable.

In commenting on serious deficiencies contained in the 1979 Defense authorization bill as proposed by Secretary Harold Brown, the House Armed Services Committee pointed out in its report the possible need for legislation to correct these problem areas.

H.R. 13164, Total Forces Act, has been drafted upon a comprehensive approach, which included the review of United States Code, titles 10 (Armed Forces), 14 (Coast Guard), and 32 (National Guard).

The Total Forces Act spells out the purpose of the Reserve component (RC), and mandates that RC is an element of partnership with the Active component (AC) in the Nation's defense; and as such, except for competent military reasons, calls for placing a major segment of the country's total military force in the Reserve component and for the proper funding and sustaining of readiness in the Reserve Forces.

It significantly increases Congress role in Defense, giving Congress positive overview by mandating timely reporting by RC chiefs as well as SECDEF on status of RC manpower, equipment, funding, readiness, and requirements.

In order for the RC to have a voice at the highest level in Department of Defense, the act calls for the establishment of an Assistant Secretary of Defense for Mobilization and Reserve Readiness. It mandates such a position and places the Assistant Secretary third in precedence in the office of Secretary of Defense but eliminates the existing Deputy Assistant Secretary of Defense for Reserve Affairs.

The bill further calls for the establishment of Assistant Secretary positions in each service except Coast Guard for Reserve affairs as follows: Army—Assistant Secretary of the Army for Mobilization and Reserve Readiness; Navy and Marine Corps—Assistant Secretary of the Navy for Mobilization and Reserve Readiness; Air Force—Assistant Secretary of the Air Force for Mobilization and Reserve Readiness.

It also establishes a wartime chain of command for all forces, AC and RC, during peacetime and sets out the minimum elements for such an affiliation of AC and RC forces.

The Total Forces Act will fix the selected Reserve unit strength structure at the following levels: Army Reserve, 276,000; Army National Guard, 430,000; Air Force Reserve, 80,000; Air National Guard, 100,000; Navy Reserve, 102,000; Marine Corps Reserve, 34,000; and Coast Guard Reserve, 15,000.

The National Guard Bureau receives new impetus under the bill. The Bureau is clearly defined as the principal supervisory and administrative agency for Guard offices and is entitled more direct access to Congress and the services' Secretaries. Senior positions in the Bureau will be filled by National Guard officers of general rank.

The bill further establishes similar Reserve offices for all services which shall be directly responsible for coordinating their respective Reserve affairs. The Chiefs of these offices shall be general or flag-rank officers. RC forces and costs shall be clearly portrayed and appropriated funds timely dispatched to the Chiefs by the Department of Defense and individual services.

A formal career development program with an appropriate mix of formal schooling and unit assignments is established in order to improve the individual effectiveness of Reserve officers and enlisted personnel.

The importance of the Reserve component to our country's national defense is indisputable. H.R. 13164 finally establishes this fact in statute. The legislation to improve and strengthen our Reserve Forces is vitally needed and long overdue. I am very hopeful that this bill can move quickly to enactment.●

TAXPAYER'S RIGHTS

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. WOLFF. Mr. Speaker, I rise today to speak on behalf of H.R. 13326, which I introduced and which has received the support of 99 of my colleagues, representing both parties and all shades of the political spectrum. This legislation strikes out against both inefficient government and excessive taxation. It seeks to bring the bureaucracy under control and make it respond to the people. It can be one of the blades of the cutting edge of the taxpayer's revolt.

H.R. 13326 is designed to make sure that a taxpayer who seeks assistance from the Internal Revenue Service is not charged interest or assessed a penalty if he or she underpays their income taxes as the result of being given erroneous written advice by the IRS. This is not a question of a new-fangled tax gimmick which will cost the Treasury money. Rather, it is a question of old-fashioned justice. Simply stated, the taxpayer should not have to pay for the errors of the IRS. Taxes are high enough as it is.

This may seem to many to be a simple idea. Others may assume that it is already law. However, any person who has been the victim of incorrect IRS advice in this manner has bitterly discovered the contrary. It is uncertain how frequently this "entrapment into underpayment" occurs. However, any occurrence is intolerable and must be halted.

Moreover, many other individuals who have dealt with the IRS have learned that the information which they were "assured" was correct was in fact erroneous. True, these taxpayers may have learned that the information was incorrect before any damage was done. But a government which assesses substantial taxes by means of complicated forms and which sets up a taxpayer's service has a duty to make sure that a service and not a disservice is rendered. By increasing the accountability of the IRS in the area of underpayments, this legislation, thus, also has the goal of improving the quality of any and all the taxpayer aid offered by the IRS.

In conclusion, Mr. Speaker, I hope that the House of Representatives will soon direct its attention to this legislation. Justice compells it. The taxpayer commands it.

LIST OF COSPONSORS FOR H.R. 13326

Addabbo, N.Y.; Anderson, Calif.; Annunzio, Ill.; Bafalis, Fla.; Baucus, Mont.; Bauman, Md.; Beilenson, Calif.; Bevill, Ala.; Blanchard, Mich.; Brodhead, Mich.; Brown, Mich.; Burke, Fla.; Butler, Va.; Carr, Mich.; Cederberg, Mich.; Chappell, Fla.; Chisholm, N.Y.; Clay, Mo.; Cleveland, N.H.; and D'Amours, N.H.

Daniel, Robert, Va.; Daniel, Dan, Va.; Derwinski, Ill.; Dornan, Calif.; Drinan, Mass.; Duncan, Tenn.; Edwards, Calif.; Edwards, Okla.; Eilberg, Pa.; Fary, Ill.; Fish, N.Y.; Forsythe, N.J.; Fraser, Minn.; Frenzel, Minn.; Fuqua, Fla.; Gilman, N.Y.; Glickman, Kans.; Gudger, N.C.; Guyer, Ohio; and Hagedorn, Minn.

Hall, Tex.; Harkin, Iowa; Harrington, Mass.; Heftel, Hawaii; Horton, N.Y.; Hughes, N.J.; Johnson, Colo.; Keys, Kans.; Kildee, Mich.; Kindness, Ohio; LaFalce, N.Y.; Lagomarsino, Calif.; Lloyd, Calif.; Lott, Miss.; McDade, Pa.; McDonald, Ga.; McHugh, N.Y.; Neal, N.C.; Nichols, Ala.; and Nolan, Minn.

Ottinger, N.Y.; Pattison, N.Y.; Pursell, Mich.; Robinson, Va.; Rousselot, Calif.; Ryan, Calif.; Santini, Nev.; Sharp, Ind.; Simon, Ill.; Steers, Md.; Stump, Ariz.; Symms, Idaho; Thompson, N.J.; Watkins, Okla.; Winn, Kans.; Bedell, Iowa; Benjamin, Ind.; Burgener, Calif.; Dicks, Wash.; and Ford, Mich.

Goldwater, Calif.; Grassley, Iowa; Hansen, Idaho; Kemp, N.Y.; Lloyd, Tenn.; Meyner, N.J.; Moorhead, Calif.; Richmond, N.Y.; Roberts, Tex.; Skubitz, Kans.; Stanton, Ohio; Traxler, Mich.; Rogers, Fla.; Cornwell, Ind.; Rose, N.C.; Fountain, N.C.; Price, Ill.; Panetta, Calif.; and Young, Alaska.●

OLIN E. TEAGUE

HON. W. G. (BILL) HEFNER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. HEFNER. Mr. Speaker, before I came to Congress the name of OLIN E. "TIGER" TEAGUE was lengendary in the State of North Carolina. Among veterans, TIGER TEAGUE was referred to as Mr. Veteran in the Congress. As the most decorated Member of Congress following World War II, TIGER TEAGUE served on the Committee on Veterans' Affairs and was its chairman for about 18 years.

I was, therefore, extremely pleased and highly honored to be elected to serve as a member of the House Veterans' Affairs Committee at the beginning of the 94th Congress and to be a member of the Subcommittee on Education and Training which is chaired by TIGER TEAGUE. During this short period that I have served under the leadership and guidance of Chairman TEAGUE, I have come to know and admire his experience and leadership in the consideration of legislation and programs for veterans and their dependents. It is most appropriate, therefore, that we have a bill before us today to honor the service to the Nation of OLIN E. TEAGUE by naming the Veteran's Administration Center in Temple, Tex., in his honor. I say most appropriate because it was from this hospital that TIGER TEAGUE ran for Congress and left in 1946 to become a Member of

this body. The naming of this center in his honor will be a lasting tribute to a most distinguished Member, who is known throughout the Nation as Mr. Veteran.●

JACK ANDERSON'S CHARGES CHALLENGED BY ROUDEBUSH

HON. ELWOOD HILLIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. HILLIS. Mr. Speaker, approximately 1 week ago, nationally known columnist Jack Anderson wrote an article entitled "Roudebush's VA Benefits Case." In that article, Mr. Anderson states that Richard Roudebush, a rotund politico, used the Veterans' Administration to wrangle a $56-a-month increase in his own benefits.

I have known Dick Roudebush for a number of years and am certain that the allegations made by Mr. Anderson are unfounded. In order that both sides of this issue can be equally aired, I include the following article which appeared in the Noblesville Daily Ledger in response to Jack Anderson's column at this point:

JACK ANDERSON'S CHARGES CHALLENGED BY ROUDEBUSH

(By Ellen Bugher)

Syndicated columnist Jack Anderson has charged that an increase in former Veterans' Administration head Richard Roudebush's own veterans benefits was due to political pressure.

Anderson's column appeared locally in the July 31 Indianapolis Star and he claims Roudebush, who left the post Feb. 28, 1977, "wangled a $56-a-month increase in his own benefits." Anderson says two V.A. officials, whom he says were Roudebush appointees, threatened reluctant rating board members with dismissal if they failed to approve the increase.

The columnist wrote that Roudebush's claim was turned down by four review boards, and Percharsky and Hornbarger used pressure until the increase was finally approved by a new board.

Roudebush denies this, and said of Percharsky, who was national director of compensation, and Hornbarger, adjudication officer at the Indianapolis regional headquarters: "Neither are political appointees."

Anderson said the $216 was a result of arthritic knees "acquired ingloriously during World War II." Roudebush called it a "typical Jack Anderson cut-up."

"I'm proud of my service to the Nation. M; service was 'inglorious' if you can call combat against the German African Corps inglorious. If they (Anderson and his reporters) would have dug further, they would have found that I was reprimanded for not revealing my condition sooner. I did everything I could to remain on duty," he said.

"It is a serious condition. It's not like old-age arthritis. I was only about 23 years old when I got it—I was as strong as a bull."

Roudebush was rated 50 percent disabled at that time.

"I had been 50 percent disabled for over 30 years. My condition gets progressively worse, and it only raised 10 percent. I've been told that my rating of 60 percent is very conservative," he said.

His case was opened automatically, he said, based on outpatient records from orthopedic treatments and hospital stays at Washington D.C. Veterans' Hospital during his term as head of the VA.

"The records were sent back to Indianapolis and the first action was to change the disability rating," Roudebush said.

"I'm aware of the charges and I deny that I've ever committed any unethical, immoral or illegal acts," he said.

Roudebush denies knowledge of an "adverse file" that Anderson says "mysteriously disappeared."

Anderson's allegations involve the $56-a-month increase Roudebush receives since his percentage of disability was raised from 50 to 60 percent. He had previously collected $216 a month.

Roudebush said that since leaving the V.A., he hasn't worked at all.

"Arthritis is a very painful condition. I have difficulty in walking just a short distance. I only do menial tasks—maintenance around the house," he said.

In addition to denying Anderson's charges, Roudebush added that he believes he has been legally wronged. Release of his medical records to Anderson's reporter was a violation of his privacy, he said.

"It was a violation of the Privacy Act to release my medical records. It was given to a reporter by a paranoid personality in the V.A. who tried to make an issue of something. If an investigation is made, I hope Anderson will name his sources," he said.

He said he was sure the V.A. would look into the matter and he was also sure they would "find nothing wrong with the case."

"If I weren't a former member of Congress and in public life, this would be a routine case," Roudebush said.●

WELCOME TO ORANGE COUNTY, LOS ANGELES RAMS

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. PATTERSON of California. Mr. Speaker, last month, Mr. Carroll Rosenbloom announced that he will move the Los Angeles Rams football team to Orange County, Calif., commencing with the 1980 season.

Carroll Rosenbloom's dramatic announcement was the culmination of a dream which many of us in Orange County have shared for years. Since the construction of Anaheim Stadium, we have all looked forward to the day when major league football would be played in Orange County. Having a team of the Ram's caliber is a fulfillment of that dream beyond our wildest expectations.

There is no doubt that both the Rams and their fans will benefit from the move. An expanded Anaheim Stadium, with seating for over 70,000 fans will provide an intimate environment for fans to watch professional football. The intimacy of the stadium, with the resulting increase in fan involvement in the games, should provide the necessary edge to propel the Rams into the Super Bowl in 1980.

I am certain, too, that with the tremendous support for professional football that exists in Orange County, every Ram game will be sold out. Sellout crowds, of course, will mean local television coverage of Rams games which will directly benefit all football fans in the Los Angeles metropolitan area.

Finally, the Rams move to Orange County in 1980 will provide a boom to commerce and a catalyst directly benefiting the entire Orange County economy.

Mr. Speaker, it is with a great deal of pride that I join the entire Orange County community in extending a hearty welcome to Carroll Rosenbloom and the entire Rams organization and wish them every success in their new home.●

CAMBODIA

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. ANDERSON of Illinois. Mr. Speaker, I would like to place in the RECORD accounts of life in the new Democratic Kampuchea given by two Cambodians who escaped to Thailand:

INTERVIEW WITH CAMBODIAN REFUGEE IN BURIRAM, THAILAND, CONDUCTED BY AMERICAN EMBASSY OFFICER IN JUNE 1978

ACCOUNT OF SOURCE E*

Source E, 38, ran a clothing store, was a fortune teller, and was a general security soldier in Phnom Penh until April 1975. He was forced to go on April 17 to Kompong Speu, where he stayed for six months, then Takeo Province, for three months and finally to Battambang. He was turned into a farmer in Battambang. He arrived in Thailand November 30, 1977. His account follows:

Conditions of Life in Democratic Kampuchea. "For the last year and a half I was in Cambodia, we had one tin of porridge (250 grams) for ten to fifteen persons. Some times a wild potato would be thrown in the vat of porridge. My first thought in coming to Thailand was to relieve my hunger."

Executions. "The Khmer Rouge killed all the soldiers and former government officials they could identify. Many students and officials also died from starvation. Former military people were frequently killed with AK-47's. My brother was killed. He was a soldier but he told the Khmer Rouge he was a businessman. I think that 90 percent of the former government officials are dead. The rest are farmers now."

Human, Civil and Political Rights. "There are no such things as human, civil and political rights in Democratic Kampuchea. There are no rights at all except for the privileged Khmer Rouge cadres. There is no liberty at all. The government is fascist, and very proud of such innovations as no market and no money. The first human right needed in Cambodia is to avoid starvation."

INTERVIEW WITH CAMBODIAN REFUGEE IN BURIRAM, THAILAND, CONDUCTED BY AMERICAN EMBASSY OFFICER IN JUNE 1978

ACCOUNT OF SAM DAMAWONG**

Sam Damawong, 26, is a student from Siem Reap. He completed 11 years of study prior to the victory of the Khmer Rouge. He fled to Thailand because, as a former student, he was vulnerable. He arrived in Thailand January 14, 1978. His account follows:

Conditions of Life in Democratic Kampuchea. "All the 345 people in my village ate together. Many of the villagers were women and children who had been brought to the

* The name of the individual refugee who provided this account has been excised to protect the identity of family members or friends still in Cambodia.

**Refugee agreed to use of his name in public document.

village in 1977 from Oddar Meanchey. The men had escaped to Thailand because of its nearness to the border. The Khmer Rouge wanted to clear the border to prevent further escape.

"Food rations were about the same from 1975 to 1978. We each received about one or two tins of rice per person, per day (250–500 grams). I estimate that we raised about 3 tons of paddy per hectare in 1976–78 despite the fact that the Khmer Rouge claimed that by 1978 we were raising six tons per hectare. We worked like animals. If you didn't work, you got no food."

System of Administration and Discipline. "For a minor error, you were reprimanded and received no food ration. The third time you committed a minor error, you were killed. For a serious mistake such as making propaganda against the new regime, you were killed immediately. For example, if you compared the communist and the free system, the punishment was death. Only minor mistakes were committed in my village.

"In the political meetings held every ten days, you could only listen. You could not criticize or make suggestions.

Executions. "Former GKR soldiers were killed from 1975 to 1978. In 1977, they started killing capitalists, students, monks and even Chinese and Vietnamese, even if they could speak Cambodian. These classes were killed by being beaten to death with poles.

"The husband of my sister was killed because he was a former GKR soldier.

"I often saw cadavers of former soldiers and others thrown into the market place as a warning to the other villagers. Usually, there would be five or six bodies in the market. I saw such over ten times. Afterward, the villagers were told to carry the decomposing bodies to the fields for fertilizer.

"I overheard a meeting where the Khmer Rouge cadres told the 'Old Cambodians' (those who were under Khmer Rouge cadres' rule before April 1975), that 'New Cambodians' (those who were under the Lon Nol Government) were 'the enemy who would eventually all be killed.' I guess that maybe 90 percent had already been killed in my village.

"A friend of mine, an 'Old Cambodian', who worked for the Khmer Rouge since 1970, was very dissatisfied with the Khmer Rouge. He warned me that I was about to be killed because I had been a student.

Human, Civil and Political Rights. "There is no such thing as human rights or civil rights in Cambodia. There are no rights. I don't know how to imagine what political rights could be in such a system. I know nothing of the central government or its policies. We were not allowed to know."●

H.R. 12326, DEVELOPMENTAL DISABILITIES ACT OF 1978

HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. ROGERS. Mr. Speaker, I want to inform my colleagues that the Committee on Interstate and Foreign Commerce has requested a suspension of the rules to consider H.R. 12326, the Developmental Disabilities Act of 1978 at the earliest possible date. It is my intention to seek consideration of this legislation with the following amendment, which is technical in nature and required to bring the legislation into conformity with the requirements of the Budget Act:

Page 34, insert after line 15 the following new paragraph:

"(3) The authority of the Secretary to enter into contracts under this subsection shall be effective for any fiscal year only to such extent or in such amounts as are provided in advance in appropriation Acts.●

THE ROAD TO PROSPERITY—PART XVII—MORE COMMENTS FROM THE NATION'S PRESS

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. STEIGER. Mr. Speaker, yesterday, I inserted in the RECORD editorials and commentaries by various newspapers from around the country. Today, I would like to include additional comments by other newspapers. They are writing in support of the Investment Incentive Act. The articles follow:

TAXING CAPITAL ACCUMULATION

The major source of capital accumulation in any country is the personal savings of individuals, and the fact that personal savings have been declining in the United States over the last decade or so poses a real threat to business expansion.

Americans, who enjoy the highest standard of living on earth, currently are saving only 5 percent of their income whereas the French save 15 percent and the Japanese over 20 percent.

A number of Congressmen, led by Wisconsin's Bill Steiger, believe that the severe capital gains tax now imposed on savings is a major deterrent. Sen. Clifford Hansen of Wyoming has now sponsored a bill identical to Steiger's in the U.S. Senate. The legislation would lower the maximum rate on capital gains from today's high level of 50 percent for individuals and 30 percent for corporations to the 25 percent level which existed prior to 1970.

Tax collections have steadily declined since Congress acted in 1969 to raise the rates. The number of individual investors has declined from 31 million to 21 million. Hansen estimates the net loss of risk capital to our economy has been running at about $6 billion a year.

On the other hand, Hansen declares that lowering the capital gains tax would encourage investment activity enough between now and 1985 to create 440,000 new jobs and increase the federal government's revenue by as much as $45 billion.

The normal assumption is that the capital gains tax affects only upper-income taxpayers, but Hansen has uncovered statistics which reveal that more than 50 percent of the taxpayers reporting capital gains have adjusted gross incomes below $15,000.

Actually the capital gains tax is particularly onerous to senior citizens who may be forced to cash in on investments to supplement their income in later years. The individual who has made a lifetime habit of saving for a rainy day finds the government taking up to half his savings when he wishes to make use of them.

President Carter talked much about tax reform during his election campaign. Here is a reform that he could support right now to everyone's benefit.

TAXING CAPITAL GAINS

Talk about flipflop. Not too long ago the economic talk in Washington was all about a tax cut and tax reform. Now the proposed tax cut has been slimmed down, tax reform has fallen overboard and, in one of the craziest switches yet, Congress is warming up to a bill that would reduce the maximum tax on capital gains even while President Carter wanted to raise it. In light of current economic trends, however, the reversal is understandable—and justifiable.

We are not prepared to say that the Steiger bill, which would slash the current capital gains rates for individuals from 50 percent to 25 percent and for corporations from 30 percent to 25 percent (the pre-1969 rates), ought to go through in its present form. The figures can be argued about. But we do think that because of the negative impact of inflation on individuals and businesses the time has come to give them some relief. Today the capital gains tax bites not only into profits from the sale of such assets as stocks or real estate but into the capital wealth itself.

Let's take an example, one cited by the Citibank of New York. A family buys a home in 1966 for $24,000 and sells it ten years later for $46,000. The capital gain is $22,000 and, if this is taxed at half a 30 percent marginal tax rate, the family would pay $3,300 in taxes. But inflation accounted for $17,600 of the gain and the house purchased in 1966 would cost $41,600 in 1976 prices. So, as Citibank points out, the real capital gain was only $4,400 and the capital gains tax, eliminating the inflation effect, should be $660—only one-fifth the liability under present law.

Nevertheless, inflation has skewed the basic rationale of the capital gains tax. As a result, the tax acts as a disincentive to investment, contributes to lower productivity, reduces the mobility of capital, and discourages potential investors.

President Carter seems to stand unalterably opposed to a capital gains tax cut because it would help primarily the small percentage of American taxpayers who earn more than $100,000 a year. This does not take account of the millions of Americans with smaller incomes who would benefit from the potential rise in the value of stocks held by pension funds and mutual funds. Nor does it consider the possibility of corporations using tax savings to boost the productivity of their plants, which would permit larger real incomes for workers.

Capital investment has registered some healthy gains in recent years but a relatively high proportion has gone into environmental and safety measures rather than into expanding industrial capacity. Now the economy is nearing a point of full production capacity and investment capital will be needed for further economic growth. A lowering of the capital gains tax would free up capital, spur stock investors and, in the long run, provide more jobs—a benefit to everyone.

Americans might be surprised to learn that other advanced industrial countries, some of which are politically to the left of the U.S., do better than the United States in their treatment of gains. West Germany, Japan, Australia, Belgium, Italy, and the Netherlands do not tax capital gains at all. Canada, Britain, and Sweden tax capital gains at lower rates.

With high inflation rates expected to stay around for at least a few years, we feel the time has come to follow the west European lead.

[From the Wall Street Journal, May 8, 1978]

MAKING US POORER

The classic debate of economic growth versus income redistribution now turns on the fulcrum of the Steiger amendment before the House Ways and Means Committee. Mr. Steiger wants to reduce the capital gains tax to provide incentives and spur economic growth, and seems to be gaining rather than losing support during the delay designed to head off his proposals. The administration wants to increase the effective rate on capital gains to further "tax reform" and in-

come redistribution, and threatens to veto any tax bill with the Steiger amendment.

There is one simple reason why the capital gains proposal has become the fulcrum of this epic debate, and why Mr. Steiger has gained such impressive support. This is the growing concensus among nearly everyone who has looked at the matter seriously that a reduction in capital gains rates, because of its powerful effect in spurring economic growth, will actually result in an increase in government tax revenues.

Chase Econometric Associates, for example, has explicitly studied the Steiger proposals. Their Michael K. Evans writes, "The reduction in the maximum rate on capital gains taxes from the current level of 49.125 percent to 25 percent on January 1, 1980 would have a positive effect on economic growth while reducing the federal budget deficit. . . . An additional 440,000 jobs would be created by 1985. . . . The federal budget deficit would be $16 billion less by 1985 than would be the case without this reduction in the capital gains tax."

Data Resources Inc., agrees. It studied various tax proposals for the Securities Industry Association. One of the alternatives was the total elimination of all taxes on capital gains. It found that under this proposal, "Tax receipts are lower by $5.1 billion in 1978. In subsequent years, receipts are higher than in the baseline. The net gain in revenues for the five-year period is about $38 billion."

Nor do you need powerful econometrics to come to this conclusion. After simply looking at the actual results of the higher capital gains treatment since 1970, Oscal S. Pollock of Ingalls & Snyder concludes, "The record of receipts from the capital gains tax, related to changes in the tax, certainly suggests that going back to the provisions that were in effect before 1970 would be more likely to add to government receipts than to lower them."

The studies above concentrate on the effect of the capital gains rate on stock prices, and the powerful secondary effects of the stock market on the economy. The capital gains tax is also especially important to one particular economic engine, the high-risk enterprises so important in technological advance. It gives prospective entrepreneurs a big incentive to form their own companies, and investors a big incentive to back them with equity capital.

The American Electronics Association concentrated on these effects in surveying its own members on capital availability, job creation and tax generation by small but growing enterprises. Its task force chairman, Edwin V. W. Zschau, testified to Ways and Means, "Because of the unique ability of long-term investment to generate jobs and economic growth, reducing capital gains taxes may not decrease federal tax revenues at all." In fact, data from the AEA survey indicate that a significant reduction in the capital gains tax rates could actually *increase* rather than decrease federal tax revenues.

Theodore Levitt of Harvard Business School writes in The New York Times, "Tax 'reform' has so drastically cut capital gains and income-offsetting incentives that the flow of venture capital for nascent purposes has virtually dried up. In 1968 over 300 high-technology companies were founded in the United States; in 1976, none."

Rep. Steiger has this mounting array of evidence. Against it, the tax "reformers" offer their ideological bagatelle: All income, however derived, must be taxed equally. Yet the tax "reformers" typically refuse to take their own shining principle seriously. They want capital gains counted as ordinary income, but they do not want capital losses fully and simply offset against ordinary income. While the administration watered down this pristine proposal into jiggering to boost some capital gains rates, the principle remains its guiding light and explains its fervent opposition to Mr. Steiger. But the principle is naive in conception and hypocritical in application.

So the debate is clearly focused. Shall we cut the capital gains tax, spurring growth, creating jobs, boosting government revenues and otherwise building a bigger pie for all to divide? Or shall we boost the capital gains tax, closing a "loophole" and redistributing income, even if it makes us all poorer?

FOOTNOTES TO THE ABOVE

Our original capital gains editorial, "Stupendous Steiger," April 26, has left a couple of points to be cleared up.

The first concerns the position of the National Association of Manufacturers and the Business Roundtable; the NAM objects in a letter today. We have often watched powerful corporations scuttle proposals they nominally favor by subtle shadings of their support—the auto catalyst and oil deregulation issues come especially to mind—and have later seen that the scuttling corresponds to their interests vis-a-vis competitiors. So sad experience has taught us to watch not what business lobbyists say but what they do. Our description of the NAM and the Roundtable as standing silent was based on reports from the trenches, and we do not believe any injustice was done. We are of course delighted to welcome them aboard.

Our original editorial did, however, repeat an error in some of the literature in saying that higher effective tax rates on capital gains took effect in 1969, and were responsible for the drop in capital gains tax receipts that year. The Tax Reform Act of 1969 actually applied to income during the year 1970.

We have also since discovered some better figures on capital gains receipts; Oscar S. Pollock, author of the Ingalls & Snyder study cited above, obtained internal Treasury figures not formerly available. Federal tax receipts from capital gains taxes on individuals for calendar years were:

[In billions]

Year:	receipts
1965	$4.1
1966	4.0
1967	5.5
1968	7.2
1969	5.9
1970	3.6
1971	5.3
1972	6.9
1973	6.8
1974	5.6-p
1975	5.5-p

Mr. Pollock also has an illuminating table on tax treatment of capital gains by various countries, with maximum rates on long-term gains, and holding periods to qualify for long-term treatment:

Country, top rate, and holding period:
U.S. just over 49%*, one year.

Australia, exempt, one year.
Belgium, exempt, none.
Canada, 22%*, none.
Germany, exempt, six months.
Italy, exempt, none.
Japan, exempt, none.
Netherlands, exempt, none.
Sweden, 23%*, two years.
U.K., 30%, none.

[From the Dallas Morning News, June 11, 1978]

A CAPITAL IDEA

You would suppose that the federal government had something against making money. (As maybe it does, only let's not get into that now.)

Anyway, the capital gains tax now stands nearly twice as high, at nearly 50 percent, as it stood in 1969—much to the discouragement of enterprise and capital formation.

A capital gain is the money earned on the sale of assets like securities and real estate. Such income was once regarded as socially useful enough that it was not taxed too severely. But congressional tax reformers raised the hue and cry against encrusted wealth and got the rate boosted to the present level.

The result has been wholly predictable: Fewer purchases of assets subject to capital gains, fewer sales of assets already held. And to speak in broader terms, weakened growth rates in investment, employment and productivity. It is money that creates jobs. High taxes, like the capital gains taxes, make people hold onto their money.

Enter Rep. William Steiger grimacing. Steiger, a Wisconsin Republican, would have his colleagues undo the damage of the past nine years. He would put the capital gains rate back where it was in 1969, at a maximum of 25 percent—a reactionary move in the purest and most admirable sense. Not to react against the present state of affairs is unthinkable.

This is not a matter of mere opinion. Data Resources and Chase Econometrics, the country's leading econometric firms, both predict that the Steiger amendment (as it's called) would boost productivity and investment much higher than they have been in years.

Here is Chase's prediction: A 3.6 percent annual growth rate in Gross National Product (vs. 3.4 percent now) and the creation of 440,000 new jobs; an increase in federal revenue of $45 billion; a $16 billion drop in the budget deficit.

Is there anything to object to in the Steiger amendment? Well, as a matter of fact, the White House professedly is disturbed at the idea of losing $2 billion in revenue. The idea that lower capital gains rates would bring much more money into the Treasury over the long haul seems not to have penetrated the thick skulls of the Treasury's economic analysts, who reason, incredibly enough, that people will buy and sell assets at the same clip regardless of the tax rate. What likewise bothers the watchdogs of the public purse is that upper-income families would pay 3 percent less in taxes.

It would be pleasant if the Treasury people were to poke their heads outside and see what is happening in the real world. The politicians, whole business it is to look around, think their colleague Steiger may well have something. The amendment enjoys wide support in the House. A companion proposal in the Senate has 60 co-sponsors.

Do our eyes deceive us, or is Congress about to do something that makes economic sense? Let's hope so, for the matter is urgent and the hour very late. Our representatives need our encouragement, and the White House, for its hardheadedness, needs our plain-spoken remonstrances.

[From the New York Daily News, July 5, 1978]

THEY'RE TAKING CARTER'S TAX JOKES SERIOUSLY

(By Louis Rukeyser)

An open letter to Jimmy Carter; Dear Mr. President,

Hey, it must really be tough for a topflight humorist like you to operate in Washington, where everybody insists on taking you so seriously all the time.

Take that truly clever put-on the other day, when you were pretending that a cut in the capital-gains taxes would only help the rich folks. I was laughing my head off, as you surely must have intended, but the Washington press corps didn't seem to realize that you were just running through your terrific George McGovern parody for our amusement. Even old Mike Blumenthal appeared to have been misled into thinking you wanted him to follow up on the issue, as if you had been on the level—though a lot of folks over at the Treasury Department think that Mike must

*Excluding state and local taxes.

have been having a hard time keeping a straight face himself.

You'd think, though, that at least somebody in the capital would have recognized that a fellow as smart as Jimmy Carter had to know the real facts about capital-gains taxes, as confirmed by every single independent study: that pushing them up over the last decade has been a disaster for investment and economic growth, and that the true beneficiaries of a rollback would include the poor (for whom jobs would be created) and the middle class (whose opportunities to raise their own living standards would be significantly enhanced). But why am I telling you this? I know you've been acquainted with these realities for months—by, among others, your hand-picked chairman of the Securities and Exchange Commission, Harold Williams. How dumb do those humorless Washingtonians think we are, anyway?

Incidentally, I thought your funniest one-liner of all was the one they reported so straight: you know, the one about how reducing the top rate on capital gains from 49% to 25% would provide "huge tax windfalls for millionaires and two bits for the average American." What a sensational rib-tickler that was! Tell the truth, now, Mr. President: who's writing those screamers for you—the staff of "Saturday Night Live"?

Golly, you'd think those reporters and congressmen who listened without guffawing either knew no economics themselves or figured you didn't. After all, who knows better than you that the big rich of this country are roughly as concerned with capital-gains tax relief as they are whether or not it's going to rain tomorrow? They'll do fine, as always. They've got the capital, and they'll put it where the tax laws make it most desirable. Leave the capital-gains laws untouched, and they'll leave their capital untouched: in things like municipal bonds, which you don't tax at all, and which encourage the growth of tax-consuming government at the expense of tax-producing private enterprise.

Even the economists in your own Administration had trouble suppressing their smirks at the mock "arithmetic" you pretended to use in opposing capital-gains tax reductions. You know, howlers like the assumption that cutting the tax in half wouldn't encourage a single person to take more capital gains—and that marvelously sly one about including in the "$100,000 incomes and up" category somebody who actually earns $15,000 a year but makes a one-time sale of his house for an $85,000 paper profit. What a side-splitter—especially for the guy who gets socked!

By now, of course, many of our legislators are beginning to catch on that all that ludicrous talk about helping the little guy by increasing (!) the capital-gains tax was just an election-year comedy bit. After all, more than 60 Senators are already committed to reducing the tax and thereby spurring investment, hiring and personal income. They know you must see, as they finally do, that the misguided "populism" of the last decade really slowed things down for those at the bottom of the ladder. But I guess your marvelous subtlety is too elusive; so why not just 'fess up, straight out, that you've been gently kidding us all this time. Admiringly yours.

[From the Richmond Times-Dispatch, July 4, 1978]

OVER ECONOMIC POLICY RISES THE GHOST OF HERBERT HOOVER

(By Patrick J. Buchanan)

WASHINGTON.—President Carter's denunciation of the Steiger Capital Gains Amendment is one more manifestation of the intellectual poverty of his administration.

Ignoring the powerful economic arguments for cutting the capital gains tax back to 25 percent—from the present 50 percent level—the president resorted to rank demagoguery. I will veto this measure, he declared, because it would benefit the rich.

"Eighty percent of its tax benefits would go to one-half of 1 percent of the American taxpayers who make more than $100,000 a year. Three thousand millionaires would get reductions averaging $214,000. The other 99.5 percent of our taxpayers would not do quite so well. . . .

"The American people want some tax relief from the heavy burdens of taxation on their shoulders. But neither they nor I would tolerate a plan that provides huge windfall profits for millionaires and two bits for the average American. That underestimates the intelligence of the American people."

Meaning no disrespect, it is Carter who is constantly insulting the intelligence of the American people, with his phony populism.

Is he seriously suggesting that the black mayor of Los Angeles, countless black bankers and 60 members of the U.S. Senate have endorsed the Steiger Amendment in order to provide "windfall profits" for the Rockefeller family?

Is the president ignorant of the study done by Michael Evans of Chase Econometric Association, Inc. which forecasts between 1980 and 1985 some 440,000 new jobs and a $16 billion reduction in the federal deficit if the Steiger Amendment is enacted?

If so, why did he ignore the job side of the picture? Why did he simply repeat Treasury's in-house protection of a loss of $2 billion in federal revenue?

Like the Kemp-Roth bill, the Steiger Amendment is one of the more hopeful and innovative ideas to avert the recession so many economists are projecting for 1979.

The purpose is to encourage individuals and institutions with money to shift their capital into enterprises that will guarantee expansion, growth and jobs.

For Jimmy Carter to dismiss the Steiger Amendment as a rip-off for the country club crowd comes dangerously close to being an act of calculated intellectual dishonesty.

Few other nations tax capital gains at the rate levied in the United States. In many Western countries, there is no tax on capital gains, because governments have come to recognize the correlation between capital investment and economic growth.

There are other facts of which Carter must have been aware, yet which he chose consciously to ignore in his press conference outburst.

In 1968, the last year in which the capital gains tax stood at 25 percent, the federal government collected more than $7 billion. The following year, when the rate rose by 40 percent (up to a 35 percent maximum), government revenues plunged below $5 billion.

What happened was that those rich whom Carter appears to despise—despite the presence of so many in his Cabinet—simply took their money out of the investment markets. As a consequence, the nation suffered.

A decent but stubborn man, Carter in many ways resembles the late Herbert Hoover.

Faced with an economic depression, which called for tax reductions across the board, Hoover fell back upon *his* ideology—the balanced budget and the high tariff. The consequences: An economic crunch became an economic catastrophe.

The only beneficial side effect to Carter's apparent animosity toward the wealthy and the large corporations is that the principal political victim of his antiquated economic police policies is almost certain to be Jimmy Carter himself.

[From the Plain Dealer, June 27, 1978]

WAY TO SPUR INVESTMENT

During his 1976 campaign for the presidency Jimmy Carter proposed a "complete overhaul" of the Federal tax system. One change he advocated was treating capital gains just like wages, interest or other regular income: Tax every dollar of it.

But he has retreated from that reform plan. Congress and an impressive army of economic experts are eager instead to expand the tax advantages for capital gains.

If you sell a piece of property or the 50 shares of stock your uncle left you, you figure your profit, you divide that by two and that is how much you add into your total income.

The tax on capital gains therefore ranges from 7 percent to 35 percent instead of the 14 percent to 70 percent you pay on regular earned income. It is an important advantage. Tax expert Joseph A. Pechman of the Brookings Institution says it stimulates investment and taking risks.

America urgently needs to stimulate investment. Treasury Secretary W. Michael Blumenthal acknowledged that in a speech May 8. Investment in this country has slowed to where it might not keep step with the growth of the American work force.

In the five-year period ended in 1968, when the maximum capital gains tax rate was 25 percent, real business investment increased at an average rate of 8 percent. But in the five-year period ended in 1977, when the maximum capital gains tax rate was up to 49 percent, investment rose only an average of 1.7 percent.

Rep. Charles A. Vanik, D–22, calls the capital gains advantage "fat cat delight." And indeed only 370,000 out of the 88.5 million taxpaying households would get any advantage from still further preferential rates for capital gains.

But the United States is far behind other advancing industrial countries in risking capital on new ventures. As a percentage of gross national product, business investment is 17.5 percent in this country, less than in Japan, France, the Netherlands, Belgium or West Germany. In Japan it is 32 percent.

Without letting "fat cats" get away with paying zero tax on big returns, Congress should cut back the tax rate on capital gains. It is at a maximum of 49.1 percent now. The Carter tax reform would now increase it to 52.5 percent. It would be better to return the rate to the 25 percent in force until 1969.

That return to 25 percent is packed into a tax bill shaped by Chairman Al Ullman of the House Ways and Means Committee with the help of Reps. William A. Steiger, R-Wis., and James R. Jones, D-Okla.

President Carter attacked the Steiger tax bill yesterday, saying it would benefit mainly "30,000 millionaires." But that bill has strong economic arguments on its side.

One economist says it would lift stock prices, create 440,000 new jobs and decrease the Federal deficit by $16 billion.

Whether the result would be that rosy or not, the need for capital formation and new zest in American investment makes the Ways and Means Committee tax legislation look very sensible.

[From the Charlotte Observer, June 28, 1978]

FOR MORE JOBS PASS THE STEIGER TAX CUT

President Carter's outburst against the Steiger Amendment was petty. The president said, of the proposal to cut the capital-gains tax, that it "provides huge tax windfalls for millionaires and two bits for the average American." That is classic politicking, cussing the rich, and it slides around the critical U.S. problem of finding the dollars to establish business and create jobs.

The Steiger Amendment, proposed by Wisconsin Congressman William Steiger, would cut the capital-gains tax back to 25 percent, its 1969 level. A capital-gains tax is what the government collects when you sell a share of stock for more than you paid for it, or when you sell your house for more than you paid for it (and don't buy another). It was doubled, in the name of tax reform, in 1970, and it was then that U.S. investment dollars be-

gan disappearing. Investors began putting their dollars elsewhere.

The scarcity of such dollars means the United States isn't spending enough on new machinery, factories, research. That hurts productivity, so when you go out to find a job there are fewer available.

"The facts are inescapable," the administration's own Treasury Secretary, Michael Blumenthal, said recently. "We aren't saving enough. Our financial system is providing insufficient equity capital. We aren't investing near enough in productive plant, equipment and technological innovation."

Now there may be better ways of stimulating investment than cutting the capital-gains tax rate. But the Steiger Amendment has the virtue of simplicity, and has attracted a lot of support, including that of a majority in the House Ways and Means Committee. That simplicity, in an election year, has much to recommend it.

The administration, aside from President Carter's cheap-shotting about rich so-and-sos, says the Steiger tax cut would cost the Treasury about $2.2 billion a year. The studies we have seen conclude the opposite, that investment would be so strongly stimulated that the federal revenues would increase. Indeed, the Treasury's own figures are revealing:

Federal tax receipts from capital gains taxes on individuals in 1969 were $5.9 billion. In 1970, when the higher tax rate took effect, the federal take dropped to $3.6 billion. A lot of dollars had fled, obviously, and they are still gone. Would the Steiger Amendment bring them back? Chase Econometric Associates, a leading economic forecasting organization, concluded that it would create 440,000 jobs within four years and reduce the federal deficit by $16 billion.

In West Germany, capital gains are untaxed. They are untaxed in Australia, Belgium, Japan and the Netherlands. The Canadians tax them at 22 percent, compared with the U.S. 49 percent. The evidence, overwhelmingly, is that the U.S. tax rate has gone far beyond the point of diminishing returns.

Yet President Carter threatens a veto. He still has room to extricate himself from the tangle of his own words, however, and we believe he is a large enough man to do so. The country needs investment, the country needs jobs, and the Steiger Amendment is a simple and workable approach to both.●

A TRIBUTE TO MR. AND MRS. WILLIAM H. NEWELL

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. STARK. Mr. Speaker, it is with great honor that I ask my colleagues to join me in honoring Mr. and Mrs. William H. Newell, a couple who has done more for the community of Oakland than can be documented by words alone. They are being honored this night at a testimonial dinner, an acknowledgement of their selfless actions performed throughout their lives, public recognition which is long overdue.

I could merely list what the Newells have done for the community of Oakland, which ranges from Head Start programs and PTA to juvenile counseling and planned parenthood. But I would not be presenting a true picture of the love the Newells have for the people of Oakland by listing the numerous organizations and programs they have been part of. Rather, I would like to focus on that aspect of love which the Newells have which goes above and beyond the normal call of civic duty.

Specifically, I am concerned with how the Newells have opened their family ranks as well as donated their time to the people of Oakland. Not only did the Newells raise 5 fine children of their own, they also reared over 30 foster children in the last 28 years. Their love and concern for these children was like that of parents to their own progeny. When some of their foster children were behind in school, the Newells fought for them as well as all foster children, assuring that they would have a public education equal to that of other schoolchildren. The ties these children have with the Newell family have remained strong even after they had succeeded in life and were no longer dependent on the Newell's support. The ties between these children and their foster parents went beyond mere fiscal dependence—it extended into the bounds of love, ties which can never be broken.

The Newells are worthy of any honor they receive and I was pleased to discover that their humanitarian actions were being acknowledged tonight. I am certain that my colleagues agree with me and will join me in wishing the Newells the best of luck in their future life.●

LET'S NOT TORPEDO OUR NAVY

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. SYMMS. Mr. Speaker, J. William Middendorf, II, former Secretary of the Navy, has written and spoken extensively since retiring from the Navy on the strategic balance, and the future role of the U.S. Navy. I wish to commend former Secretary of Navy Middendorf for his continued efforts to inform the American people of the need to maintain a strong military posture.

Mr. Middendorf reminds Americans that "our freedom is not preordained, and that without a strong defense we would not be able to keep it."

The article reads as follows:

LET'S NOT TORPEDO OUR NAVY

(By J. William Middendorf II)

Since retiring as Secretary of the Navy last year, I have been haunted by the feeling that my obligation to the American people won't be fully discharged until I deliver a final word, my own view of our ability to continue to safeguard our freedom. As a private citizen, I have no ax to grind, save the ax all Americans ought to be grinding—that we maintain the military posture it takes to deter war, to ensure our vital interests, to protect freedom and to prevail if war comes.

That is the posture we began keeping in the early 1950s and which for several years now has been in serious decline. Indeed, so severe is the decline that I fear we are fast approaching a time of testing such as the United States has never had to endure. Unless we move fast on a Naval rebuilding program, I'm convinced that the next ten years will see the end of U.S. ability to deter and prevail, with all the grave consequences that implies for free people everywhere.

We've had warnings:

During the 1973 Middle East War, the Soviet navy was quickly able to double its Mediterranean fleet to 96 ships on station. And this wasn't even an all-out effort by the Soviets. Against it, we went all out to reinforce our Sixth Fleet to a peak strength of 66 units. The Soviets were armed with deadly anti-ship cruise missiles, a weapon not then in our own inventory. Knowledgeable professionals differ as to who would have prevailed in a Soviet-American shoot-out. Fortunately, we didn't have to find out, but Moscow's boldness during that crisis brought us to the brink of World War III.

Huge Soviet navy war games were held in 1970 and 1975. Called Okean (Ocean) 70 and Okean 75, they are full of ominous meaning for the future. In Okean 75, hundreds of Soviet air, surface and undersea combatants were deployed over the world's seas with intelligence collectors, oilers, repair ships and merchant convoys and put through intensive, coordinated maneuvers. It was the greatest show of naval strength in history.

Five major shipyards in the U.S.S.R. produce submarines—with six more building large surface ships. All these huge yards have been expanded and modernized in the last five years, to produce a steady stream of new ships.

STRATEGIC THREAT

In short, there has been an alarming shift in the balance of naval power and the abilities of the Soviet and American navies to perform their different missions. Though many of our ships are superior in quality and our sailors are more experienced, the Soviet navy now is more than triple the size of our fleet and its overall effectiveness is increasing.

Our way of life depends on the unimpeded flow to us of essential raw materials and energy—we now import *all* our rubber, chromite, cobalt and manganese ore and *half* our oil. Ninety-nine percent of our overseas trade is carried by ship. Our survival depends upon a Navy competent to keep open the sea lanes, pose a believable deterrent and enable us to support our allies in the event of war.

By contrast, the U.S.S.R. is relatively self-sufficient in raw materials and energy. The Soviet Union can support itself and provide most of its allies with economic and military aid without crossing a major body of water. A truly peaceful Soviet government would be content with adequate coastal-defense forces—the kind of naval force the Kremlin kept until 15 years ago. Since then, it has sought to create a navy of such speed and devastating fire power (at the expense of cruising range) that it can overwhelm any U.S. Naval force. It has created a "first strike" navy.

This explains the enormous Soviet naval buildup of the past decade and a half. The Kremlin became aware in the late 1950s that without a blue-water navy it could not influence world events. The Soviets were embarrassed at their impotence in 1956 when a British and French naval expedition invaded Suez; and in 1958, when the U.S. Navy moved strong forces into the eastern Mediterranean to discourage communist interference in Lebanon's disorders. The last straw was the 1962 Cuban missile crisis, when a U.S. Naval blockade and threat of overwhelming American nuclear retaliation forced the U.S.S.R. to remove nuclear missiles it had been installing in Cuba.

But now the U.S.S.R. boasts the world's largest strategic (long-range, nuclear-ballistic-missile-carrying) submarine fleet. The Soviets have launched 60 such boats in the past ten years. Their Delta Class submarine—27 operational and more abuilding—is the

world's largest. Each is poised to fire 4200-mile-range missiles.

That distance exceeds by some 1700 miles the range of our most advanced submarine-based missile, the Poseidon. It also approximates the range of our new Trident I missile, which won't reach the water until close to 1980. The Delta Class missile now makes it possible for the Soviet strategic submarine force to attack virtually every city in the United States from the U.S.S.R.'s home waters.

The Soviet force also includes 33 Yankee Class boats, each fitted with 16 1300-mile missiles, and 30-odd older nuclear- and diesel-powered boats, each carrying a number of 350- and 650-mile nuclear missiles. Against this, the United States has a ballistic-missile-firing submarine fleet of 41 relatively old Polaris and Poseidon boats.

SHRINKING MARGINS

The Soviet navy's commander in chief, Adm. Sergei Gorshkov, has vowed publicly to achieve a navy that is second to none. Is he achieving this goal?

Recently retired Chief of Naval Operations Adm. James L. Holloway III has delivered a sobering assessment to Congress: we retain "a slim margin of superiority." The Chief of Naval Operations four or five years from now may not be so optimistic, since that "slim margin" is represented by our 13 aircraft carriers. In 1976, the Soviets deployed their first, the 45,000-ton *Kiev*. A second *Kiev*-class carrier is nearing completion and a third is under construction. We probably can expect to see more and perhaps larger carriers joining Soviet fleets through the 1980s.

Although Gorshkov's carriers do not yet give him the long-range striking power ours provide, he has 1250 land-based naval aircraft, of which 30 are the new supersonic Backfires. These have at least a 5000-mile range, and pose a terrible threat to our Mediterranean and Pacific fleets. They could also menace any Naval force that we might bring into the Indian Ocean to shore up a Red-threatened oil-rich state.

The Russians also have tried to offset our superiority in aircraft carriers by arming scores of surface ships and submarines with deadly anti-surface-ship cruise missiles. There is frightening evidence that they are developing a new guidance technology, which will enable a missile-firing ship or submarine to stand off at a distance, find a target ship with over-the-horizon radar, and fire a weapon that will streak at 2000 m.p.h. 50 to 60 feet above the sea, underneath our search radar.

Our scientists have been developing a weapons system to counter this threat. It's called Aegis, and we know it will find incoming Soviet missiles 30 to 40 miles out and blow them up. But at the earliest, it will be 1981 before the system can be deployed on the first ship.

SOVIET SQUEEZE

In addition to a strategic submarine force twice the size of ours, the Russians now have by far the world's largest attack submarine fleet, well over 200 boats, for anti-shipping and anti-submarine purposes. Imagine what the Soviet attack force could do in the event of war! Nazi Germany, which began World War II with 57 submarines, primitive by today's standards, very nearly succeeded in severing our Atlantic supply lines, sinking some 14 million tons of Allied shipping. Clearly, the lesson has not been lost on the Soviets.

Against the U.S.S.R.'s huge surface and undersea forces we can deploy a total of 82 attack submarines.

The Russians also have more of all kinds of surface combatants than we have: more cruisers, more destroyers and other escort types; they vastly outnumber us in small (less than 1000-ton) attack boats. Yet these are fast, maneuverable and hard to hit. Equipped with new nuclear-tipped missiles, they pack a lethal wallop. The Soviets now are also moving to gain an advantage with amphibious ships that carry marines and their arsenals, including tanks, into beaches. They have some 100 such ships. We have 63, and we would need 48 of these to embark a single Marine amphibious force.

The Soviet navy has the world's largest naval-mine-warfare force, the world's largest inventory of naval mines and a capable anti-mine-warfare force. It also has the world's largest fleet of intelligence collectors—so-called "spy ships." Approximately 50 are deployed all over the globe—many posing as merchant or fishing vessels.

With their modern, powerful navy, the Soviets are showing the flag in more and more places, doing their best to influence events. During the Angolan war, Soviet naval units were deployed offshore in a show of support for their Cuban proxies. They now cruise regularly in many of the world's major seas. (A Soviet task force has come within 25 miles of Hawaii and another has entered the Gulf of Mexico.) They have obtained the use of port facilities in the Indian Ocean, the Mediterranean, on the west coast of Africa and in the Caribbean. It is obvious that the Kremlin employs its naval forces in support of an ambitious foreign policy targeted at controlling the world's raw-material sources.

I don't think most Americans, including many in Congress, really grasp what a tough fix we are in, or will be in soon. If present trends continue, for example, it wouldn't surprise me to awaken some morning to the news that the Soviets have annexed the warmwater ports of northern Norway, which they have long coveted. Or to be told by Moscow that "the situation must be stabilized" by the Soviets in some politically troubled oil-rich state which is important to our survival.

U.S. RESPONSE

We are in this fix for a lot of reasons, including old, discredited theories that the Russians are as interested as we are in arms control and disarmament. Powerful voices in this country continue to urge that we disarm unilaterally, insisting that the Russians will then disarm, too. In fact, we have long been unilaterally disarming. Among other things, we have halved the size of our Navy—we now have 458 ships, against nearly 1000 ten years ago.

But the main reason we are in this fix is that during the 1960s, while the Soviets were working hard to develop the mightiest military posture in world history, we were pouring our resources into the Vietnam war. We neglected our defenses, none more than our Naval component. By the end of the 1960s we were confronted with block obsolescence, large numbers of ships built in the 1940s and 1950s that were not worth expensive restoration.

Currently, our Navy is smaller than at any time since two years before Pearl Harbor. Yet the Carter Administration has just cut in half the Navy's five-year shipbuilding plan! Congress will be gravely risking our survival if it allows this to happen.

We simply must rebuild the Navy. That doesn't mean refurbishing obsolete ships. We need a modern, self-sufficient Navy that can operate in distant areas without having to rely on overseas bases.

Admiral Holloway has estimated that the balance Naval force we needs comes to about 600 ships. In preparing this force, we must understand that, from the time initial plans are prepared for Congressional approval, it takes eight years to get a Trident submarine to sea, ten years to float an aircraft carrier. And weapons technologies improve so rapidly that when we build certain new systems, we have to hope that they won't be obsolescent in ten years.

But we have no choice. We must understand that our freedom is not preordained, and that without a strong defense we won't be able to keep it. So much time has been lost already that, even if we start now, we are in for some rough and scary sailing in the years directly ahead.●

FEDERAL REGISTRATION OF HANDGUNS FAVORED BY FOUR OUT OF FIVE AMERICANS

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. McCLORY. Mr. Speaker, the American public appears to be more objective and understanding of the problem of handguns as related to crime than some of the more fervent opponents of improved Federal gun legislation.

According to the latest Harris Survey, a total of 80 percent of the adults nationwide favor Federal registration of handguns. It should be clearly understood that this has no relation to gun confiscation and it does not affect the subject of ownership of rifles or shotguns.

Mr. Speaker, the August 7 Chicago Tribune article reporting on the recent Harris Survey follows:

80 PERCENT FAVOR GUN CONTROL

(By Louis Harris)

Support for gun control legislation in the United States is now higher than at any time in recent years. However, the anti-gun-control forces are able to mobilize their supporters more effectively than those who oppose them.

According to a recent Harris Survey of 1,500 adults nationwide, an 80 to 18 percent majority favors a federal law "requiring that all handguns people own be registered by federal authorities." This is slightly higher than the 77 to 19 percent who favored such legislation back in 1975. Among the 43 percent of the public who own guns, federal mandatory registration of handguns is favored by 71 to 27 percent.

By 73 to 24 percent, a majority would also favor "requiring that a permit be obtained by anyone who purchases a rifle." Back in 1975, a smaller 66 to 30 percent majority felt this way. Among gun owners, a 59 to 39 percent majority now favors requiring permits in order to purchase a rifle. Such permits are not now required under the law.

There has been no change in the 73 to 25 per cent majority that continues to favor "federal laws which would control the sale of guns, such as making all persons register all gun purchases no matter where the purchases are made." Among gun owners, a 61 to 37 per cent majority also favors gun control.

Gun owners turn out to be a substantial segment of the population these days, with 43 per cent of the public reporting that someone in their household owns a gun.

Significantly, 45 per cent of all whites own a gun, compared with a much lower 28 per cent of blacks.

What kind of guns belong to gun-owning families?

At the top of list are rifles, owned by 72 per cent of all gun owners, up from 71 per cent in 1976. Nearly one third of all the families in the country now own a rifle.

A sustantial 65 per cent of all gun owners possess a shotgun. This means that 28 per cent of the nation's households own a shotgun.

Forty-seven per cent of all gun owners have a pistol or handgun. This means

that one in every five families has a handgun in the house.

Finally, 8 per cent of all gun owners possess a muzzle-loader.

Members of Congress know that sizable majorities of the public favor various forms of gun control, but when the legislative chips are down, the heavy pressure comes from the anti-gun-control group and it seems to be decisive.

In the latest Harris Survey, the 80 per cent of Americans who favor federal registration of all handguns were asked if they would reject a candidate for Congress mainly on the grounds that he took a stand against gun control. By 57 to 33 per cent, members of the group said, no, they would not reject a candidate for this reason.

As for the 18 per cent minority who oppose the federal registration of all handguns, 45 per cent of them indicate that they would vote against any candidate who favors this form of gun control. The bottom line here is that 8 per cent of the public not only oppose gun control but also would reject any congressional candidate who is for it.

Despite these numbers, the antigun-control group has simply been more effective politicially than those who support control. ●

A TRIBUTE TO POPE PAUL VI, A CHAMPION OF HUMAN RIGHTS

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, August 7, 1978

● Mr. MAZZOLI. Mr. Speaker, I rise to express my sadness over the death of His Holiness Pope Paul VI.

Pope Paul's historic trip to the United States in 1965, his meetings with three American Presidents and nearly all major world leaders, and his constant advocacy of world peace have won him a special place in the hearts of all people, Catholic and non-Catholic.

Also, at a time when concern for human rights has been rediscovered, it is well to note that nearly 13 years ago Pope Paul issued the "Pastor Constitution on the Church in the Modern World" which said in part:

Since all men possess a rational soul and are created in God's likeness, since they have the same nature and origin, have been redeemed by Christ, and enjoy the same divine calling and destiny, the basic equality of all must receive increasingly greater recognition.

True, all men are not alike from the point of view of varying physical power and the diversity of intellectual and moral resources. Nevertheless, with respect to the fundamental rights of the person, every type of discrimination, whether social or cultural, whether based on sex, race, color, social condition language, or religion, is to be overcome and eradicated as contrary to God's intent. For in truth it must still be regretted that fundamental personal rights are not yet being universally honored. Such is the case of a woman who is denied the right and freedom to choose a husband, to embrace a state of life, or to acquire an education or cultural benefits equal to those recognized for men.

Moreover, although rightful differences exist between men, the equal dignity of persons demands that a more humane and just condition of life be brought about.

Human institutions, both private and public, must labor to minister to the dignity and purpose of man. At the same time let them put up a stubborn fight against any kind of slavery, whether social or political, and safeguard the basic rights of man under every political system. Indeed human institutions themselves must be accommodated by degrees to the highest of all realities, spiritual ones, even though meanwhile, a long enough time will be required before they arrive at the desired goal.

A more profound and precise statement of human rights has never been written.

Pope Paul's distinguished memory could not be better memorialized as a more fitting tribute to his great achievements devised than for all human beings "to minister to the dignity and purpose of man."

May the soul of this gentle and good man rest in peace.●

NEW YORK CITY SETTLEMENTS SUPPORT H.R. 12146

HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. MURPHY of New York. Mr. Speaker, it is my pleasure to include at this point testimony prepared by the Association of Lower East Side Settlements in support of H.R. 12146, the Adolescent Health Services and Pregnancy Prevention and Care Act of 1978.

This organization, known as ALESS, is composed of the Chinatown Planning Council, the Educational Alliance, the Grand Street Settlement, Hamilton-Madison House, Henry Street Settlement, and the University Settlement. It was formed in 1974 to coordinate efforts among its members in the areas of programs and administration as well as policy decisions affecting the settlement's services. For the last few years ALESS has been involved in a program providing educational and vocational guidance to young girls in the community between the ages of 10 and 17. This program has given the organization a unique perspective from which to speak on this legislation, H.R. 12146. I commend it to the reading of my colleagues.

TESTIMONY OF ASSOCIATION OF LOWER EAST SIDE SETTLEMENTS

The Association of Lower East Side Settlements, which has operated a program for low-income teen-age girls for over three years, is grateful for the opportunity to present its views on S. 2910/H.R. 12146, the Adolescent Health, Services, and Pregnancy Prevention and Care Act of 1978.

The Association is composed of six community and neighborhood centers, listed at the end of this testimony, all providing services in New York City's Lower East Side, a multi-ethnic area of 200,000 people, the majority of whom are low-income.

We would like to express our strong support for this legislation. This support is based on our experience in working with the teenage population at-risk of unwanted pregnancy. Our commitment to the legislation's goals of developing networks of community-based services via better linkages among programs and an increase in the availability of community services stems from our experience in the operation of the DAWN Program (Discovery and Awareness for Women Now) as a joint effort in the six member agencies of the Association. We would like to describe this program, and from that description, it will be clear why we are supportive of S. 2910/H.R. 12146.

The DAWN Program, which has thus far been supported entirely by private foundation funds, has, in its provision of services to girls, emphasized several components that the new legislation also emphasizes:

1. We have developed a coordinated approach among community-based agencies. Six community centers, each serving a different sub-area of the Lower East Side, and thus a slightly different population, have collaborated in developing a comprehensive, but varied, approach to work with minority teen-age girls. The agencies have shared services among themselves, for example, vocational counseling and supplementary educational activities, and have served as an access point to additional services that girls need, for example, more intensive help in working out family relationships and health care, including contraceptive information and services where needed. This community network has provided a variety of services that different girls can use in different ways.

2. We have developed a conceptual approach to providing services to teen-age girls. Our neighborhood, the Lower East Side, ranks third in New York City in teen-age pregnancy, coming after only Central Harlem and East Harlem. It is a neighborhood characterized by poverty, physical blight, high welfare rates, and high rates of health problems. We find a major social characteristic of such a neighborhood to be a pervasive and deep passivity, in particular among the females: life situations "happen" to the girls and young women, rather than their choosing them, and behavior adapts accordingly. Thus, becoming pregnant in one's teen-age years is not something one has necessarily chosen, but is rather the workings of "fate." Likewise, dropping out of school is less an active choice than a series of unplanned circumstances that, cumulatively, result in finding oneself out of school. The girls with whom our agencies work see around them passivity, an inability to affect one's life, a sense that one is marginal in every way, and this means that they tend to lack sufficient incentive to anticipate events in life.

It is to this complex of issues that our program has addressed itself: we believe the girls need to acquire skills in anticipating the future, making decisions, exercising control over their lives. Without some vision of this kind and the skills to move towards it, they have little incentive to accept the kind of responsibility for their activities that is necessary for preventing pregnancy. While we support giving out both contraceptive information and devices, we do not think that such an approach is sufficient if one has not involved the girls in a more total approach to their lives.

Thus, our conceptual approach is that to work with these girls, individually and in groups, staff must create programs that emphasize future orientation and development of decision-making skills.

Based on our conceptual approach to girls' needs and our coordinated structure, the DAWN Program has, over its three-year history, emphasized educational and vocational concerns, health and sex education, and leadership development.

Activities in each settlement house/community center have varied, but all have emphasized these foundations. At this point, we believe we have identified some important issues and are moving in the right direction. A research study just being completed, which compares the DAWN girls with a variety of national norms regarding sex

knowledge, coital experience, pregnancy rates, drug use, school drop-out rates, etc., indicates that the girls who have been in our program have fared significantly better in all these areas.

This brief description of the Association's DAWN Program is intended to provide Committee members with the basis for our comments and recommendations on the S. 2910/H.R. 12146. Evidently we are committed to a community-wide coordinated comprehensive approach to services for teen-age girls as a means of preventing unwanted pregnancies. We recommend that the starting point for services under this legislation be agencies with a holistic approach to the needs of this population, rather than providers of discrete parts, such as just birth control. In other words, the needs of the total girl must be addressed if she is to be helped either to avoid pregnancy, or, if pregnant, to become as self-sufficient as possible. We think that the community centers with a commitment to girls are logical places of access into other services. A network of agencies that covers a neighborhood is an effective way of tailoring programs to reach different subpopulations on the one hand, while being large enough to develop needed linkages with medical facilities, educational institutions, citywide resources such as employment and vocational opportunities, and statewide resources/efforts to impact on the problem.

In conclusion, we support fully both the intent and the content of the Adolescent Health, Services, and Pregnancy Prevention and Care Act of 1978. We hope that the legislation will provide for a spectrum of community-based services of varied content, linked together so that teen-age girls can take full advantage of every possible resource.●

CAMBODIAN LESSONS

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. LAGOMARSINO. Mr. Speaker, there are a number of important lessons that the West needs to draw as it surveys the grim havoc and slaughter occurring in Cambodia. The first lesson is that such butchery is not an aberration in Communist regimes, but is rather a manifestation of their essential nature.

This is because politics understood as deliberations over: "What is best or right for my district, my party, or my country?" does not exist in Communist regimes. Marx and Lenin did not believe that men could deliberate about what is right or wrong. They were materialists, and believed that an individual's thought was completely determined by his economic situation. Since the opinions of men were fixed by fate, and could not be changed through persuasion; there was no role for reason or deliberation to play in deciding the outcome of unsettled issues. Instead of reason, force is the arbiter of unresolved questions. As a result, we see the woeful cycle of bloodletting and extermination repeated time and time again, in every country where a communist party comes to power. The enemies of the revolution are regarded as mere vermin—fit only for extinction.

Furthermore, ruling Communist parties have the same regard of, and plans for their international enemies as they do for their domestic, and would gladly apply the same remedies—if they were in a position to do so.

Yet, somehow all this is lost on the West. Unfortunately, Mr. Carter is not alone in believing that Brezhnev shares with us the desire for peace. But Brezhnev's peace is the peace of the conqueror: "Mark, where his carnage and his conquests cease, he makes a solitude, and calls it peace."

It is positively stupefying that so many in the West—particularly intellectuals, would fail to recognize the brutal and barbaric nature of Communist regimes. They also fail to draw the necessary implications which that fact has for the conduct of interntional relations.

Even more appalling, however, is the mesmerizing appeal exerted by leftwing tyrannies over large numbers of Western intellectuals. How else can we explain the deafening silence in the West regarding the holocaust in Cambodia? How else are we to explain the pious fraudulence with which rightwing authoritarian regimes are condemned for violations of human rights, while nothing is said concerning the far greater abuses of the leftwing totalitarian regimes?

Those intellectuals of whom we speak are but the descendants of a long line of thinkers who have shamefully "played the fool" for leftwing tyrannies. In Western intellectual circles in the 1930's there was a large and flourishing cult of Stalinists, and the late 1960's and early 1970's has witnessed the rise of the cult of Maoists. Both groups have proved equally adept at either ignoring or explaining away the unspeakable horrors perpetuated in those satanic slaughterhouses.

Perhaps those intellectuals are fascinated by and enamored with the unencumbered exercise of power. And doubtless the ends for which power is used in those nations—the creation of the new Soviet or Chinese man, free of human defects, serves to distract the intellectual from noticing the hideous price which is exacted in the pursuit of paradise here on Earth.

It is said that throughout the Carter-staffed executive branch, a certain Pogo cartoon can be found, dutifully taped to many a cubicle wall. The cartoon, which supposedly summarizes the wisdom of the post-Vietnam era regarding the exercise of American power, bears the caption: "We have met the enemy, and he is us." Regrettably, this cartoon applies far more aptly to the susceptibility of many Western intellectuals to the siren call of leftwing tyranny.

I place in the RECORD an article by Jack Anderson:

SURVIVING THE HARD WAY IN AMERICA

(By Jack Anderson)

From eyewitness accounts and intelligence reports, we have written about the horrifying mass slaughter of men, women and children who belonged to the old order in Cambodia.

But there is another story, just as grim, about the people who have managed to survive in the radical and primitive culture that the communist conquerors have created in Cambodia.

It's a story that cries out to be told. Already, in response to our past columns, Americans by the thousands have called upon Congress and the United Nations to brand Cambodia as an outlaw nation.

The Khmer Rouge have completely cowed the Cambodian populace by demonstrating that they will bludgeon to death anyone who steps out of line. Mistakes that wouldn't even be considered misdemeanors in the United States are punishable by death in Cambodia.

There are two levels of crimes. Those who arrive for work late, work too slowly, feign illness or mistreat their children are guilty of first-level violations. The offenders are "sent to Kosang," explained a man who worked for the Khmer Rouge in Sisophan. "Kosang" means "reconstruction."

"If you are caught twice, you are sent to Kosang again," he said. "If you are caught a third time, you are dead."

Just about all other crimes are capital offenses. "If you are caught for these, you will be killed the first time. They kill you by bludgeoning you," said a man who escaped from Odar Mean Chey province.

What are some typical capital offenses? "Gathering with more than three people of different families, complaining about working conditions or food allocations," replied the refugee. "Even visiting a friend in his home is prohibited."

Romance is also strictly controlled. Contrary to the communist claim that classes have been abolished, villagers are permitted to marry only other villagers, and relocated city people must marry within their class.

The rules apply even to party cadre. "If one of the party cadre in a village is caught in an affair with one of the villagers, he will be stripped of his authority and sent to work in the fields. But he will not be killed, because he has been working for the people," explained a former teacher from Kach Roteh who walked 21 days to escape.

"When a young man or woman wants to marry," he continued, "they must contact the village chief who writes down their request. When the list is long enough, the party organizes a mass wedding ceremony" that won't interfere with the work schedule. "Fornication and adultery are dealt with by death," he added emphatically.

The populace is divided into villages ranging from 100 to 600 people. They walk from their villages each morning to centralized farming collectives. The journey may take as long as two hours.

For the masses, life under communism means working seven days a week, 365 days a year. They build dikes, cut timber, toil in the rice fields. But because the work is poorly planned, much of the labor is wasted.

The workday begins at sunrise and lasts 12 hours, with a short break around 11 a.m. During harvest time, the work continues into the night. In some villages, people must attend to indoor chores after a long, grueling day in the fields.

In return for their hard labor, the people draw meager rations. The harvest is hauled off in Angkar trucks, then the food is allocated back to the villagers. The daily ration seldom exceeds one cup of rice, with a cup of salt that is supposed to last a few weeks. Only the elite—members of the party or army—get meat on their menu.

Disease is a major problem. The Khmer Rouge, in a fanatic effort to wipe out the past, have rejected bourgeois medicines and remedies. They rely instead on primitive tribal medicines, such as tree roots boiled by village medicine men.

The villages, meanwhile, have taken a step backward in time. Money has been abolished. There is no motor traffic, except for an occasional military vehicle. In a typical village, the chief and his staff are allowed to ride the

single bicycle. Light at night comes from unusually slow-burning tree resin.

Yet it would be a mistake to think Cambodia, now called Democratic Kampuchea, is run by incompetents. On the contrary, the leaders know exactly what they're doing. They are reshaping Cambodian society according to their radical, doctrinaire concepts of Marxism. To achieve this, the radical leaders have imposed the most harsh, deadly discipline on earth upon their fellow Cambodians.●

HOME HEALTH CARE FOR THE ELDERLY

HON. LEO J. RYAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. RYAN. Mr. Speaker, American society often dehumanizes its elderly after they pass the age of 65 and denies them the dignity they so well deserve.

Elderly people who have spent their lives working and rearing children are often condemned to poverty in their old age by our social system which makes no adequate provisions for the aged. In health care alone, older Americans are among the underprivileged of the Nation. We are the only industrialized nation in the world without a national program to provide adequate health services for the elderly. Many of our institutions and agencies designed to assist the aged have failed miserably to meet their needs.

For example, more than $15 million a day is misspent on nursing care in America alone. Nursing home fraud and abuse have been the subject of extensive studies and investigations by congressional committees, Federal agencies, and State commissions. Fraud and abuse in nursing homes generally fall within two areas: administrative fraud and patient abuse. The former areas includes deceptive real estate practices which artificially inflate property cost; false or misleading cost reports which hide nonallowable cost; inadequate accounting procedures which prohibit effective auditing; and failure to disclose ownership interests. Treatment abuses include infrequent and inadequate physician and nursing care; poor controls on the administration of drugs and medications; and actual physical mistreatment and neglect. It is clear that our existing Government programs for the elderly squander our money while failing to give the help to the elderly which the programs were created to provide.

With only 1 percent of medicare and medicaid allotted for home health services, many of our elderly are forced into these nursing homes and into substandard care. Unfortunately, many of our older Americans would be far better served in their homes by people who care for them and love them. At the same time, the elderly would maintain their own sense of vitality and self-worth. In addition, studies have shown that by expanding the coverage of home health care services under medicare and medicaid, older Americans would not only retain all the benefits of living independently in their own communities, but the tremendous financial outlay we spend on nursing homes would be reduced.

It is a tragedy of our times that we as a nation should find ourselves in the position of thinking of home health care for the elderly as an alternative to institutionalization. Institutionalization should be the alternative to home health care. Solving the problems of the aging now is an exercise in self-protection.●

MONTANA CRUDE OIL SUPPLIES—A REAL PROBLEM FOR THE NORTHERN TIER

HON. MAX BAUCUS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. BAUCUS. Mr. Speaker, I am pleased to report that Montana petroleum refiners have secured adequate supplies of crude oil for this year and will avoid the shortages predicted earlier. The situation is far from settled, however, and without decisive action by the Federal Government my State still faces serious shortfalls within the next few years.

CANADIAN IMPORTS

Montana refineries rely on indigenous, Wyoming and Canadian crude oil. Nearly 50 percent of the oil now refined in my State is sweet crude from Canada. This dependence on Canadian oil developed during the years preceding the Arab oil embargo when Canada was eager to export oil.

The events of 1973 convinced Canadians that such a policy was unwise; that they should conserve precious resources for their own use. The Canadian National Energy Board adopted export controls intended to end oil exports to the United States by the early eighties. Canada can hardly be faulted for this decision, but it spelled trouble for the northern tier States, particularly Montana.

During the period of November 1, 1974, to October 31, 1975, the 26 refineries in these States received each day 478,000 barrels of crude from Canada. Montana alone required 57,781 barrels per day of sweet crude during this period.

Canada now allows only 54,000 barrels per day of sweet crude exports to the United States. Montana priority I refiners—the three refiners in Billings—have been allocated 24,470 barrels per day of this oil by the Department of Energy (DOE).

Montana refineries are running an additional 40,283 barrels per day of Canadian oil. This is being obtained through complicated and expensive exchanges of foreign and domestic oil for Canadian oil. Montana refiners accomplish these exchanges primarily by shipping their oil through the midcontinent pipeline system to Sarnia, Ontario, and receiving Canadian crude through the Glacier pipeline, which runs into Billings from Canada. This labyrinthine process results in prices of up to $16.70 per barrel for Canadian crude delivered to Montana refineries versus the $14.30 per barrel price of OPEC crude.

Although costly, at least this system works—at the moment. As of January 1, 1979, Canada is scheduled to reduce sweet crude and condensate exports to the United States by 34,000 barrels per day. Even with planned expansions of the midcontinent pipeline system, there is no guarantee that space will be available for the exchanges needed to compensate for this reduction.

ECONOMIC IMPACT

In a report issued last summer DOE predicted that crude oil shortfalls could result in real income losses for Montana in excess of $500 million in 1980. In Billings alone, where 90 percent of the State's refining capacity is located, nearly 3,000 jobs could be lost. The transportation and agricultural sectors of Montana's economy are almost entirely dependent on petroleum products and development of alternative energy sources will not change this situation in the near future. In addition, Montana refineries supply eastern Washington, northern Idaho and North Dakota.

Because of the disastrous consequences that a crude oil shortage would have on Montana and neighboring States, I have spent considerable time trying to convince Canada that exports to Montana should be continued until a permanent solution to the State's oil supply problems can be found. Early this year, I asked Vice President MONDALE to raise the matter with the Canadian Government. Soon afterward, I discussed the problem myself with Canadian lawmakers at a United States-Canada interparliamentary meeting in New Orleans. I traveled to Ottawa in April and met with top Canadian energy officials, including Energy Minister Alistair Gillespie. I also sent a statement outlining Montana's oil problems to the Canadian National Energy Board, which is conducting an inquiry into that nation's petroleum supplies. This study is scheduled for completion in September.

Evidence presented to the National Energy Board shows that the Canadian crude oil supply outlook is much improved over recent years. I hope the board will recommend that exports to Montana be continued at present levels. Should the recommendation be unfavorable, however, I am prepared to continue pressing Montana's case with the Canadian Government, which must make the final decision.

Unit trains bringing oil from the west coast may also offer temporary relief. GATX Terminals Corp. has developed a plan to ship Alaskan crude oil by train from an existing dock facility on the Columbia River near Port Westward, Oreg., to Cut Bank, Mont., where it would be pumped into the Glacier pipeline.

GATX has obtained all necessary permits for the operation of the Port West-

ward facility except one from the Corps of Engineers for dock modifications. The corps has decided to require an environmental impact statement for the project. I believe the corps should grant this permit as quickly as possible. Such action will give Montana refiners another vital option for securing adequade crude oil.

NO FINAL SOLUTION

The most difficult problem Montana faces is securing reliable supplies of crude beyond 1980. There are a number of proposals around, some of them conflicting, but I am sad to report that a clear solution to Montana's long-term petroleum needs is not in the offing. In fact, there is a real danger that if the situation continues to drift, actions taken in other areas of the country may rob Montana of all economical alternatives.

Although considerable crude oil is produced in the Williston Basin of eastern Montana—about 14.6 million barrels in 1977—there is no way of transporting this to Billings refineries. Williston Basin pipelines run north and south, and most of the oil produced there is required by refineries outside of Montana. Even if Williston Basin crude could be diverted to Billings, it would just cause problems elsewhere.

Conoco, one of the Billings refiners, is working on a plan to reverse a pipeline running south from Byron, Wyo., to Wood River, Ill. If this pipeline can be reversed as far as Guernsey, Wyo., significant supplies of sweet crude may become available to Billings refiners. This reversal, however, is still subject of complicated negotiations between oil companies and even if accomplished there is no assurance that it will offer a complete answer to Montana's petroleum needs.

Ironically, while we in Montana search for future supplies, the west coast is awash in Alaskan crude oil. California refiners cannot handle the inflow and the Carter administration has announced plans to permit export of residual fuel oil to free up storage capacity so that California refiners can increase crude oil runs.

A Standard Oil of Ohio proposal to convert a pipeline between California and Texas from natural gas to oil appears to be progressing and should eventually provide a means of moving some Alaskan crude East. However, this oil will flow into the midcontinent pipeline system where it will be of little use to Montana, which is isolated from that system.

We need a delivery system capable of bringing Alaskan crude to Montana and other northern tier States.

One promising proposal was reversal of the Trans-mountain pipeline between Edmonton, Alberta, and Cherry Point, Wash. from Edmonton crude oil could be shipped down existing pipelines to Montana. This idea was killed by an amendment offered last year by Senator WARREN MAGNUSON of Washington which prohibited construction of the port facilities necessary to serve the pipeline. Given strong sentiments in that State against allowing large oil tankers in Puget Sound, I suspect the transmountain idea will not be resurrected.

Another proposal, which had widespread support in the oil industry, was construction of an 800-mile pipeline from the port of Kitimat, British Columbia, to Edmonton. The Canadian Government has opposed the proposal, and the National Energy Board oil supply inquiry now underway is likely to bury it for good.

NORTHERN TIER PIPELINE

The only proposal to move Alaskan, Middle East, and Persian Gulf crude oil to all northern tier States that remains viable is the northern tier pipeline. This delivery system would run 1,550 miles from Port Angeles, Wash., to Clearbrook, Minn. Construction is tentatively scheduled to begin in late 1979. It will take 2 years to complete.

This pipeline has a number of advantages. It would be built entirely in the United States, providing jobs for Americans during construction and a secure transportation system once completed. Pipeline construction in Montana would provide at least 1,350 jobs paying $50 million in wages. The completed system would permanently employ about 48 Montanans and generate substantial tax revenues.

With a capacity of 900,000 barrels per day, the northern tier pipeline would be adequate to eliminate the west coast surplus of Alaskan oil and assure adequate supplies to Montana and other northern tier States.

Construction costs are projected at just over $1 billion by the northern tier Pipeline Co. There is little possibility of the cost overruns that plagued the Trans-Alaska pipeline. Northern tier pipeline will be constructed using conventional techniques in areas where transportation corridors have previously been established. There is an existing infrastructure of highways, railroads and other support facilities, which was not the case for the Trans-Alaska project. In addition, northern tier will not face the artic conditions encountered in Alaska.

If this project can be constructed according to schedule, I believe it is the safest and most economical way of supplying adequate crude oil to Montana.

Of course, the environmental effects of a project of this magnitude must be carefully assessed. The Bureau of Land Management has begun work on the Federal environmental impact statement, which is not expected in final form until next May, partly because of route changes proposed by the pipeline company to make it more compatible with the environment.

The States through which the pipeline will pass—Washington, Idaho, Montana, North Dakota, and Minnesota—must also review the project under their own energy facility siting and environmental laws.

The possibility exists that the northern tier pipeline could be delayed or ultimately denied a permit through these processes. The problem now is to insure that northern tier pipeline is reviewed expeditiously by State and Federal agencies. Montana cannot afford to have this project tied up for years by bureaucratic indecision. While the fate of the northern tier pipeline is being considered, refiners in Minnesota and the Chicago area may find other ways of meeting their crude oil needs—says that are more costly and less beneficial to development of a sound national energy transportation system than the northern tier pipeline. These other plans, such as northern pipeline serving Wisconsin and Minnesota, will not help Montana.

If DOE, which is studying the crude oil transportation problems of northern tier States, fails to support the northern tier pipeline, it must seek alternatives that will keep Montana refineries, as well as other northern tier States, supplied with crude oil.

At the moment, I am not convinced that Montana has an alternative to the northern tier pipeline. I hope that the oil industry and the Federal Government can work together in the next few months to find the best solution to my State's crude oil needs.●

SOMETHING OUT OF LIFE BESIDES THIS

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. ANDERSON of Illinois. Mr. Speaker, there is a bit of presumably old folkwisdom that says that "Work is love made visible." If it be so, then the obverse also holds true: "Unemployment is scorn and indifference made manifest." This observation is regrettably poignant but true, especially as applied to the young people of America in general and black youth in particular. The August 7, 1978, issue of Newsweek magazine contains an article "Black Youth: A Lost Generation" that should be required reading for all of us who worry about the tens of thousands of our young people whose talents and hopes are being squandered away.

As I have often stated, no one to my knowledge has the single, all-embracing solution of the problem of youth unemployment. But there is one notion that a bipartisan group of concerned Members has advanced that has come before the House at least two times in the past 5 years that deserves to be implemented, yet it has failed to find its way into the law in spite of the awesome numbers of youngsters who cannot find their niche somewhere in the most productive economy the world has ever known. The idea to which I am referring is, of course, the "youth opportunity wage," otherwise known as the youth differential to the Federal minimum wage.

The misgivings of the concept's opponents notwithstanding, surely the youth differential is worth a try, even if only as an experimental, temporary response to young people who are priced out of today's labor market by the minimum wage, youngsters like 18-year-old Ronnie Dozie of Detroit, who is quoted

in Newsweek as saying of his fellow unemployed neighbors and friends:

These people will work. They'll work. I know they want something out of life besides this.

The Newsweek article documents in stark terms the crushing dilemma that confronts our black youngsters. They are our children—and they need our help. At this time I would like to share excerpts from the Newsweek article with my colleagues:

BLACK YOUTH: A LOST GENERATION?

You are cutting off an underclass which is not needed, not employable . . . You must create out of this underclass, or their children at least, human beings who fit into modern America, who are needed, who are productive, who have a value. This is what the question is about.—Gunnar Myrdal, updating "An American Dilemma," 1968

Ten years later—ten years after the riots and the Great Society and a time of unprecedented black advancement—America is in danger of losing that generation of children Myrdal warned us about. Some competent observers believe that it may be lost already. The slums of the nation's aging and blackening cities have bred a population of young people for whom the norms of existence are unemployment, crumbling neighborhoods, fatherless homes, failing schools and dependency on the dole—or crime—as a means of survival. Many escape by sheer bootstrap effort, but more are caught in the demoralizing, dead-end life around them. "A lot of black kids simply feel they don't count, and they don't," says the black psychiatrist Alvin Poussaint. "In terms of what makes this society run, they're expendable."

The statistics of the workplace bear witness to that bleak conclusion. The unemployment rate among black teen-agers has exploded from one and a half to nearly three times the white rate since the middle 1950s, and has hovered near 40 per cent for the past three years. Some analysts believe that the numbers overstate by the gravity of the problem, and that most young blacks seeking jobs find them in their 20s anyway. But others argue that the reality in the big-city slums is a fact worse than the figures—that joblessness among the black young there is on a runaway curve untouched by economic recovery, poverty programs, affirmative action or the emergence of a large and growing black middle class. If the real numbers were fed into a computer, says Diana Durham of the National Urban League, "the projection would read 'riot'.".

The will to succeed has nevertheless survived. Perhaps a fourth of black America has scrambled above what the government considers the intermediate income line—$16,236 a year for a family of four—and has established a secure and stable toehold in the middle class. The black young stay in school longer—two-thirds finish high school where three-fourths dropped out a generation ago—and more often stick at their books against the lure of the streets and the derision of their peers. They seek out work, often against the most discouraging odds; a crowd of 120,000, heavy with minorities, lined up overnight for 55,000 government-funded summer jobs in New York City. "These people will work," says Detroit dropout Ronnie Dozie, sweeping one hand across his neighborhood panorama of ramshackle tenements and litter-clogged alleys. "They'll *work*. I know they want something out of life besides this."

The problem remains that the work is not there, in spite of the revival of the economy since the 1975 recession and the renewed interest of the Federal government under Jimmy Carter. The Administration has, in the new vogue phrase, *targeted in* on youth unemployment with a series of imaginative new programs—among them a multicity experiment at guaranteeing government-paid work for young poor if they agree to stay in school. But these programs have not perceptibly improved the lot of black teenagers; their unemployment rate still hung above 37 percent in June, despite a dramatic dip in the over-all national rate. Their plight, moreover, has resisted national solutions in the past, in part simply because they are relatively few in number—perhaps 400,000 are out of work by current official estimates—and are scattered in ghettos across the country.

Other public and private institutions, combat-fatigued and underfunded, have had little better luck finding or creating work for unskilled, semiliterate young black men and women who may not even know how to dress for a job interview or fill out a rudimentary application form. It is indeed arguable that the single most hopeful force working in their favor is a demographic accident—the end of the postwar baby boom that doubled the number of black teenagers, from 1.2 million to 2.4 million, between 1960 and 1975. The sheer size of their generation inflated rates of unemployment, street crime, drug addiction and family disintegration in that period; now, the big-city crime rate has begun turning down, and some analysts believe the other numbers will follow.

But there is otherwise small ground for cheer either in the anomie of the slums or the flow of history outside—the flight of industry to the suburbs and the Sun Belt, the rising competition of white women and the elderly for what work remains, the enduring irrationality of a welfare system that penalizes work and family stability. The rates of unwed motherhood and broken homes have, like teen-age joblessness itself, taken on a breakaway life of their own; the new generation of black children who will reach adolescence in the 1990s will be smaller, but a majority will have been born out of wedlock, raised for at least part of their lives by only a single parent, and propelled into a high-skill 21st-century economy. "Many black kids at 13 or 14 are already obsolete," says Douglas Glasgow of Howard University's School of Social Work, and at least some of the trends that make them obsolete are accelerating.

SITUATIONS WANTED

Larry Callahan, 19, left his sister's apartment in Atlanta's Grady Homes housing project early one morning to see about a job. The woman he spoke to at a Federal job office directed him to the Atlanta Urban League office. A woman there told him to talk to a man at the Indian Springs condominium complex in suburban Atlanta. Larry borrowed the bus fare but then got on the wrong bus. Determined, he walked 45 minutes in the rain to make the appointment—but the man he was to see wasn't there yet. "He showed up at 5:45," Larry recalls. In the end, Larry was told that government funding for the maintenance job he sought hadn't come through yet. Call back, the man said, and Larry has been doing just that for six months.

If he can get a job to pay his way, Larry would like to take up plumbing at a trade school. He thinks he is being turned down for jobs mainly because he is unskilled, not because he is black. "Everywhere I go I see signs saying 'equal opportunity employer,' but they look at some blacks and say they just ain't got the skill. I just want to have me a good job with decent pay. Everybody keeps saying hang loose, hang loose. But it's hard to hang loose living like this."

Hanging loose, for the Larry Callahans, is too often all there is to do. They are part of what James W. Compton of the Chicago Urban League calls a glut of young, big-city blacks "who have no skills, are not getting any job experience, and probably are not developing life-styles that include any work at all." That a majority, like Callahan, keep trying is testimony to the hardihood of the American dream even in those urban barrens where it has most vividly failed. A minority, unsurprisingly, give up. One day recently, a young black man grabbed Sue Ann Berry Freeman, a Berkeley youth worker, in the street and begged her for money. Another panhandling derelict, she thought—until she recognized him as an ex-client with a wasted 150 IQ.

Even the numbing unemployment figures are an inadequate measure of conditions in the slums. The view of some revisionist students is that they are not quite so catastrophic as they look—that they are statistically shaky to begin with; that they are swollen by the children of the baby boom; that they count some young people who are actually working "off the books"; that the jobless rate in any case is halved among blacks in their early 20s, and halved again after they turn 25. But there remains little doubt that the numbers, however inexact, are bad and have got worse at a rate far exceeding that among the white young. Some analysts believe that they are in fact worse than they look: the Urban League's Vernon Jordan argues that, when you add in the underemployed and people who are too discouraged even to look for work, the real unemployment rate for black teen-agers may approach 60 percent.

The causes are numerous, and intractably interwoven. Age and color both count against the black young in the job market, and so do the feral stereotypes they conjure up among whites and middle-class blacks. Technology, even in such everyday forms as automatic elevators and ditch-digging machines, makes old-fashioned sweat labor obsolescent. Blacks have been moving to the suburbs in quickening numbers, but jobs have moved farther and faster; there are now more in Chicago's suburbs than in the city. The black young pay further for the most benignly intended customs and public policies—for minimum-wage rises that price them out of jobs; for the surge of women into the labor market, and relief of the elderly from mandatory retirement at 65; for the demand for credentials like high-school diplomas, without regard to whether a particular job really requires one.

TRAPS OF POVERTY

The world of Patricia Davis was crowded and chaotic. She lived with her mother, five younger brothers and sisters and her mother's sometime boyfriend in a two-bedrom apartment in the vast, palm-treed ghetto of south-central Los Angeles. Her life revolved around school and friends, an always-on TV set and a blaring stereo. But when she was down, she would sit by herself in the garage to think about things—about other kids she knew getting into trouble with the law, about what she really wanted for her life. Sometimes she would talk to adult friends, including her grandmother who lived around the corner. But Patricia felt she needed something else, something of her own. So she had a baby.

The decision was easy—and almost traditional. Patricia's mother, Beverly, was only 17 when she had Patricia by a husband from whom she was divorced after half a dozen years. Patricia's grandmother was 16 and unmarried when she had Beverly. In fact, when Patricia looked after tots in a child-care center last summer, her mother warned her about the temptations of maternity. "If you work there, you're going to have a baby." Patricia ignored the warning. She was seeing a boy named Theodore Johnson, who had just graduated from her school. She called him "The die," they made love, and Patricia took a chance. "I didn't take no birth control," she told Newsweek's Martin Kasindorf.

"Secretly, I wanted to have a baby. It was something to keep me happy, I guess. I wanted to start a life of my own."

The Patricia Davises, multiplied by the tens of thousands, are the prisoners of what Harvard's Dr. Poussaint calls a "doll syndrome"—babies having babies and coming prematurely into an adulthood mired in poverty, dependency and broken homes. The folk notion that welfare is what tempts them is mostly myth; in a community where nearly half the children are born out of wedlock and none are counted "illegitimate," Poussaint observes, "it makes you feel like somebody to have a baby call you 'mama'." But welfare remains the most common outcome. Nearly a fourth of all black families and a third of all black children depend in some measure on it—and some still unmeasured fraction of them may be turning into a permanent and hereditary welfare class.

The social tragedy hidden in those figures is the continued rise in the percentage of black families headed by women, from 25 percent when Daniel Patrick Moynihan wrote his famous 1965 report on the problem to 35 per cent now. As a consequence, fewer than half of all black children live with both parents—compared to 85 per cent of white youngsters—and two in five grow up fatherless and poor. One outcome of the doll syndrome is the dole syndrome—a life drifting on and off welfare and a long and frequently losing struggle to keep the cycle from repeating itself. "There's nothing my mother can tell me," says Dee, a Chicago welfare daughter who became a welfare mother six years ago, at 15. "If she were so smart, why was she stuck with seven children and no man?"

The consequences can be devastating. Fathers disappear, encouraged by welfare laws in 24 states that still deny checks to poor two-parent families. Children start shopping, fixing meals, even hustling extra money at 5 or 6—an education in life at the expense of being a child. Boys grow up with no role models except those they find on the street corner—and sometimes no concept of work as a way of life. "I don't have no heroes," says Marcus, a bravado slum kid of 15 in Detroit. "See, I live in a houseful of women—my grandmother, my mom, two aunts, and they all have daughters—and I won't look up to them." So he has become his own hero, prowling the streets with his hair done up in a net, a derby atilt on his head, and a .22-caliber "bop gun" stuck in his waistband. When a grownup asked him what he expects to be doing at 20, he answered impishly: "Three years in jail."

The schools have been powerless to help manchildren like Marcus; he bumped along for years on that conveyor-belt system known euphemistically as social promotion—"See, I can just sit there and pass"—and when he was expelled last winter for fighting, it seemed to him pointless to go back. The statistics of black education are in some respects profoundly hopeful: blacks now are nearly as likely as whites to finish high school, are more likely than whites to perform above grade level and are going on to college in growing numbers. Thirty-four states have tried, moreover, to brake the conveyor belt by requiring students to pass competency tests in the three R's for promotion or graduation.

THE MEAN STREETS

Times were hard—but not all that hard—for Gary Weaver growing up on Wharton Street in the shabby heart of black South Philadelphia. His mother drew welfare to supplement her job as a waitress and always managed to hold things together for Gary and his two brothers and sister. "We were poor, but not poor poor," Gary says, shrugging. "I've got no beefs." Yet he and some friends walked into a store two years ago and killed the owner for little more than pocket money, police say. Gary Weaver is now in jail, awaiting his second trial for murder, and those who know him best can only shake their heads and blame "the street."

In the big-city black slums, the street tugs constantly at the Gary Weavers, and trouble is never far distant. Their world is one in which two-thirds of the men work in blue-collar or menial jobs—when they work at all—and in which the wealth most conspicuously displayed has been earned outside the law. The temptations are obvious, contagious and often irresistible. "You ask a little white boy what he wants to be," says James Taylor, a June High-school graduate in Detroit, "and he may say some kind of big-time executive. You ask a little black child the same question, and he may say, 'I want to be a pimp'." Or a fence, or a numbers banker, or, most profitably of all, a drug dealer: one apprentice currently circulating in Oakland, Calif., is said to be pocketing $200 a week running narcotics—at age 10.

The specter of black crime has made the ghetto young, guilty or innocent, the objects of fear in middle-class America—an anxiety unrelieved by the facts that most of it happens in the ghetto and that the appalling statistics have at last started down. Black youth, in fact, do account for a vastly disaproportionate share of arrests for teen-age crimes of violence—52 per cent nationwide—and, as a result, police records are ten times as commonplace among the ghetto young as in the middle-class world around them. But if the jails are full of the failures, the streets are thick with the ones who got away. New York City's Vocational Foundation Inc. calculated that the odds against a juvenile's doing time in city jails for a major felony were 100 to 1, and concluded: "There is simply no clear pattern of rewards for good behavior and penalties for bad."

Crime flows from the emptiness of slum life as well as from its poverty. The ghetto is full of young people who never leave their neighborhoods and never see the world outside except on TV. It is a place, as well, where careers in crime are born on whims simply because nothing else is happening. "I was with one of my partners," says James S., a child of Watts, "and he said, 'Are you down for snatchin' a purse?' I wasn't thinkin', so I just snatched it." He got caught that time but progressed anyway from purse-snatching to gang-fighting to burglary—and now a stretch in a California youth prison at 15.

But the most powerful temptation is the obvious one for young people raised on the dole and commonly unemployed: crime pays. "We're in the position," says Barbara Burk-Tatum, a Boston youth-service administrator, "of talking about diplomas and minimum-wage jobs to kids who've been making a hell of a lot more hustling—and tax-free, too." It is low-risk, high-yield work, accessible even to grade-school-age entrepreneurs dealing "loose joints"—single marijuana cigarettes—for a dollar apiece on a stairwell landing. The Watts study conducted by research economist Paul Bullock reached the conclusion that victimless crimes alone—the street traffic in drugs, bets, numbers and women—constituted "probably the greatest single source of market income for young men in the central city."

The temptation seems unlikely to fade for the young blacks caught, unemployed and sometimes unemployable, in the backwash of the mainstream economy. "I hate to wake up some mornings," says Eugene Franklin, a 21-year-old dropout in the St. Louis slums. "I ain't got no gig, and even if I had one, it wouldn't be payin' nothin'—by the time I got a check it'd be gone. So you'd rather take your chances hustlin' on the streets. You got to do *somethin'* to stay alive." The siren song is a powerful one in the asphalt wastes of the nation's inner cities; it is the dismal suspicion of some social scientists that it is too often the best and brightest of the ghetto young who answer it—and the misfits who have the will and the courage to resist.●

FORESTRY LOAN ACT OF 1978

HON. JERRY HUCKABY

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. HUCKABY. Mr. Speaker, today I am introducing a bill entitled the "Forestry Loan Act of 1978." This legislation would authorize and direct the Secretary of Agriculture to make loans providing for annual payments to owners of nonindustrial private forest lands. The primary purpose of my bill is to encourage private landowners to manage and harvest timber on their land. Using this approach, I am attempting to create an environment more favorable to the practice of forestry.

As a Representative from the great State of Louisiana, I am well aware of how important our forest lands are to the Nation's economic well-being. The Southern States now contribute greatly to the Nation's supply of forest products. Recent projections show that the South will produce 50 percent of the Nation's softwood supply by the year 2000.

I would like to point out, however, that demand for forest products is increasing and this upward trend is expected to continue well into the next century. To meet these increased demands, we must emphasize effective timber management, along with protection of the forest environment. Recent surveys indicate that timber production on private, nonindustrial lands must rise from 7.5 billion cubic feet in 1975 to 16 billion cubic feet in 2020.

Where is this wood going to come from? Supply-demand projections throughout the world indicate little opportunity for significantly greater imports beyond those already being secured. Publicly owned forestlands in the country—Federal, State, and municipal—with one-third of the available forestland acreage have the potential to supply much of the projected demand and an even higher share of inventory, but are being increasingly pressed into service for nontimber uses. Industrial forests cannot provide all the additional wood either, because they comprise only 13 percent of the total forest.

Much of the additional wood must come from some 4 million private, nonindustrial forests, which account for 59 percent of all commercial forestland. It is these 296 million acres of nonindustrial private ownerships that present the challenge of adequate future timber supplies for this country.

Unfortunately, many private nonindustrial landowners do not perceive an advantage in reforesting or managing their timber stands. This is due to many reasons, a chief one being that investments in forestry, while generally having an acceptable rate of return over

the long run, do not generate a yearly cash flow. In fact, an investment in tree planting will likely yield cash income only two or three times in 40 or more years.

This is a major disincentive to woodland owners who might otherwise be willing to manage their land for timber production and is a contributing factor to inadequate levels of forest management on private nonindustrial land.

The bill which I am introducing today will help resolve the problem of lack of cash flow in forestry investments by establishing a loan program which provides annual payments to the woodland owner. The amount of these payments will be based on the productive capacity of the land involved for timber production and measures are taken to assure that the financial interest of the Untied States will be protected. Limits to maximum interest rates and overall indebtedness are also established in the statute.

The concept of annual payments is attractive and advantageous to both the Federal Government and the private landowner. The Federal agency involved will have a better opportunity to closely monitor and coordinate the use of these funds as opposed to paying the total amount in one lump sum. Consequently, this annual payment loan proposal will help in significantly improving cash management practices by the Department of Agriculture, which would adequately respond to the President's request for cutting Government interest costs. With regard to the landowner, the payments would allow him to pay taxes, management and protection costs. The remaining annual loan proceeds may be used in any manner he wishes.

The program established by the bill would work as follows. An interested landowner would contact the appropriate Federal agency, probably the Farmer's Home Administration with request for a loan. Upon initial approval, the agency would refer the request to the State forester, who would approve a management plan which could be prepared by either an agency, industrial or consulting forester. The State forester and Federal agency would also determine an appropriate level of annual payments based upon land productivity and future expected values of the timber. The annual payment would likely range from $10 to $30 per acre.

Following approval by the Federal agency involved, and upon agreement by the landowner to keep his management plan current, the Federal agency would either guarantee or insure loan payments to the landowner. In the case of a federally guaranteed loan, loan sources may be private banks, other commercial lending institutions or the Federal Land Bank. Federally insured loans would have the characteristics of direct loans and would be financed out of the rural development insurance fund. Terms would include an interest rate near to the Government cost of borrowing, plus up to 1 percent as determined by the Secretary. The loan repayment period may be up to 40 years with a deferment period of up to 15 years.

The concept of annual payments in anticipation of future timber receipts is a relatively new idea in private forestry. As such, I recognize that there is much work to be done to further develop this legislation. Therefore, I am introducing the bill for discussion purposes, and am asking private landowners, the Forest Service, forest industry, consulting foresters, State foresters, American Forestry Association, Society of American Foresters, Forest Farmers, and other groups in the forestry community to review the legislation and comment on it.

I am also asking members of the financial community for their comments. I am confident that this procedure will result in a meaningful evaluation of the bill and its potential for helping private, nonindustrial landowners manage their land for timber production.

I realize that this bill will not alone solve the problem of inordinately low timber production on private, nonindustrial woodlands. The owners of these lands are so varied in their characteristics, and their individual needs and goals so unique that there is no one program which will appeal to all landowners. Therefore, I do not consider this bill as a solution to the problem, but merely as one option which will be available to those landowners who want to take advantage of it. Let me also emphasize the fact that the President has called for concerted efforts to encourage forest regeneration in his statement on environmental policy. I sincerely believe that my program would be worthwhile and achievable, and would add to the array of incentives for reforestation.

Finally, Mr. Speaker, I would like to point out that the budgetary impacts of this program will be minimal. These payments constitute a loan, with the Federal Government ultimately recapturing its investment, plus some interest income. The administrative framework to handle such a program already exists and USDA has vast experience in the administration of similar loan programs. Perhaps most important, the program will generate forestry jobs in rural areas, thereby adding to the tax base; and sales of timber will also generate significant tax revenue. In short, I believe additional tax revenues and investment recapture will offset any interest subsidies and administrative costs involved.

In conclusion, Mr. Speaker, I request that hearings be held to discuss the merits and possible shortcomings of such a program. Once all the input is received, the data compiled and revisions made, I urge your favorable consideration and support for the passage of my bill.

The text of the Forestry Loan Act of 1978 follows:

H.R. —

A bill to authorize and direct the Secretary of Agriculture to make loans providing for annual payments to owners of non-industrial private forest lands

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Forestry Loan Act of 1978".

FINDINGS

SEC. 2. The Congress hereby finds and declares that—

(1) the Nation's capacity to produce renewable forest resources is significantly dependent on private non-industrial forest lands;

(2) adequate supplies of timber and other forest resources are essential to the Nation's well-being;

(3) substantial capital investment is often needed to increase the productivity of forest lands;

(4) typical timber crop rotation periods last long periods of time, thus effectively preventing the owner of non-industrial private forest land from recouping his capital investment for extended periods of time;

(5) the availability and cost of capital can be a significant determining factor in a forest landowner's decision as to whether or not to undertake a forest management program;

(6) owners of non-industrial private forest land frequently are unable to obtain credit at rates and terms sufficiently reasonable to enable them to undertake a forest management program; and

(7) therefore, it is in the national interest for the Federal Government to provide financial assistance in the form of guaranteed and insured loans to owners of non-industrial private forest land in order to encourage more intensive management and thereby increase the productivity of such land.

ESTABLISHMENT OF PROGRAM

SEC. 3. (a) In order to encourage owners of forest land to implement and maintain forest management programs, and increase the production of crops of industrial wood, the Secretary of Agriculture (hereinafter in this Act referred to as the "Secretary" is authorized and directed to establish a program of insured or guaranteed loans that will provide annual payments to eligible landowners. The annual payments shall be in such amounts and on a per acre or such other basis as the Secretary may determine necessary to assure compliance with the borrower's individual forest management plan. The plan shall involve such forest activities that include, but are not limited to, such practice as site preparation, tree planting and thinning of young stands, cultural practices designed to produce a commercially usable forest and other management, protection, development and cultural activities that will aid in promoting the purposes of this Act.

(b) This program shall be funded, as the Secretary so determines, either by the Commodity Credit Corporation, or using funds drawn from the Rural Development Insurance Fund established under Section 309A of the Consolidated Farm and Rural Development Act and subject to the provisions governing such funds. The Secretary is authorized to subsidize the interest rate of loans guaranteed under this Act charged the borrower by the lender at a rate to be determined by the Secretary.

(c) The Secretary shall make or insure no loan to any one borrower whose total indebtedness against real property, including real property with respect to which loans are provided under this Act, exceeds $400,000, or in the case of a guaranteed loan, $500,000.

(d) The Secretary may guarantee under this Act not more than 90 percent of the principal and interest on any loan to any eligible borrower by any Federal or State chartered bank, savings and loan association, cooperative lending agency, Federal land bank, or other legally organized lending agency.

(e) Loans guaranteed under this Act shall bear interest at rates to be agreed upon by the lender and borrower but not in excess of such rate as may be determined by the Secretary. Loans made or insured under this Act shall bear interest at such rate or rates as are determined by the Secretary, but not in excess of the current average market yield

on outstanding marketable obligations of the United States with remaining periods of maturity comparable to the average maturities of such loans, adjusted to the nearest one-eighth of 1 per centum, plus not to exceed 1 per centum, as determined by the Secretary. For loans made or insured under this Act, the borrower shall pay such fees and other charges, and shall prepay to the Secretary such taxes and insurance, as the Secretary may require.

ELIGIBLE BORROWERS

SEC. 4. Any private individual, group, Indian tribe or other native group, association, partnership, corporation, or other legal entity who owns 5,000 acres or less of private forest land capable of producing crops of industrial wood shall be eligible to receive loans insured or guaranteed under this Act, *Provided:* That the Applicant must certify in writing, and the Secretary must determine, that he is unable to obtain sufficient credit elsewhere to finance his actual needs at reasonable rates and terms, taking into consideration prevailing private and cooperative rates and terms in the community in or near which the applicant resides for loans for similar purposes and periods of time.

TERMS AND CONDITIONS

SEC. 5. (a) The period of repayment of loans insured or guaranteed under this Act shall not exceed 40 years. Payments of principal and interest in the case of loans made or insured under this Act may, at the discretion of the Secretary, be deferred for a period of not to exceed fifteen years. However, loans insured or guaranteed under this Act shall be amortized and repaid over the balance of the period of the loan commencing with the first harvest of timber from the land with respect to which the loan is made. Loans insured or guaranteed under this Act shall be made upon the personal liability of the borrower and shall be secured by the land and the timber grown thereon, and such other security as the Secretary may require.

(b) The borrower shall prepare, keep current and adhere to an individual forest management plan which shall be developed in cooperation with and be approved by the State Forester or equivalent State official and which shall describe the activities needed to establish or maintain the landowner's forest land in a productive condition. The borrower may use the annual loan payment received in any manner he deems appropriate, as long as the provisions of the management plan and loan agreement are observed. The Secretary shall encourage borrowers and State Foresters or equivalent State officials to use private consulting foresters, agencies, organizations and firms to the extent feasible for the preparation of individual forest management plans.

(c) Loans guaranteed under this Act may in the discretion of the Secretary be transferred to, and assumed by, a new owner who agrees to the terms and conditions of the loan, assumes any outstanding liability and obligations thereunder and who otherwise qualifies under the provisions of this Act.

(d) Except for guaranteed loans, the borrower shall agree that if at any time it shall appear to the Secretary that the borrower may be able to obtain a loan from a production credit association, a Federal land bank, or other responsible cooperative or private credit source at reasonable rates and terms for loans for similar purposes and periods of time, the borrower will, upon request by the Secretary, apply for and accept such loan in sufficient amount to repay the Secretary or the insured lender, or both, and to pay for any stock necessary to be purchased in a cooperative lending agency in connection with such loan.

RULES AND REGULATIONS

SEC. 6. The Secretary may prescribe such rules and regulations, as the Secretary deems appropriate, to implement the provisions of this Act.

REPORT

SEC. 7. The Secretary shall report annually to the Congress on the progress of the program authorized by this Act. The first such report shall be submitted upon completion of the first full calendar year of operation of the program authorized by this Act.

EFFECTIVE DATE

SEC. 8. This Act shall become effective on October 1, 1979.●

ARCHBISHOP O'FIAICH LENDS HIS INFLUENTIAL VOICE TO THE CAUSE OF ENDING HUMAN RIGHTS VIOLATIONS IN NORTHERN IRELAND

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. BIAGGI. Mr. Speaker, since its establishment in September of 1977 the Ad Hoc Congressional Committee for Irish Affairs which I chair has been denouncing the past and ongoing human rights violations which afflict Northern Ireland. In the past 18 months the European Commission and Court of Human Rights, Amnesty International and the Association for Legal Justice all have presented documented cases of human rights violations mostly in the various prisons under the control of Great Britain.

Last week a most significant and influential figure, Archbishop Dr. Tomas O'Fiaich, Roman Catholic Primate of all Ireland released his findings after one day he spent at the Long Kesh Prison facility. Specifically he visited the notorious H block where some 300 prisoners have been staging a protest as they seek to be classified as political prisoners instead of criminals. Many of them were sent to jail under judicial proceedings which could only be called travesties including arrest without charge, trial by judge and no jury and other judicial mockeries.

Dr. O'Fiaich's findings about conditions in H block were shocking to me. The two newsclips which follow my remarks graphically discuss his findings. It is appalling that these conditions exist but that they have been tolerated by the British Government for so long.

The archbishop's comments have received worldwide attention. The London Times made his charges a front page story. Accounts of his remarks were found in most American papers and of course in Northern Ireland where it received tremendous attention.

Despite the advocacy of the United States in support of respect for human rights, Great Britain and the Dublin Government feel no obligation to adhere to this policy with respect to political prisoners. The tragedy is compounded by the fact that the administration has yet to address the human rights problems in Ireland despite the constant prodding of the ad hoc committee and its 111 House Members.

I urge all Members to read the articles which follow. They are most significant. They come from a man of tremendous influence and respect in Ireland. It is important to note that the late Pope Paul VI had expressed a concern about the prisoners in Long Kesh and Archbishop O'Fiaich was prepared to give the Pontiff a full account. I trust that the successor to Paul will be as concerned and will join in the active pursuit of peace and justice in Ireland.

An interesting and potentially significant development in Ireland is that both Catholics and Protestants have been subjected to mistreatment in prisons. As a result those affected have in a sense a common enemy, the British Government or the Dublin government. The climate in Ireland today is characterized by a diminution of violence and an increasing sense of discontent about past and ongoing human rights violations. It is an especially important and opportune time for the United States to work for a cessation of human rights violations in Ireland, something which is generally considered to be a primary prerequisite for peace.

I recently had the pleasure to speak by telephone with Archbishop O'Fiaich. I was deeply impressed with his commitment to peace and human rights in Ireland, a commitment I assured him was shared by the ad hoc committee. His statements about Long Kesh reflect this commitment. Rather than ignoring them they should serve as a catalyst for action and recitification.

As chairman I renew the call of the Ad Hoc Congressional Committee for Irish Affairs for an end to human rights violations in Ireland and an acceleration of positive steps toward bringing peace. In addition I call upon the administration to break their silence on the human rights problems in Ireland. It has been almost 1 year since the President's last statement on Ireland. It is time for his voice to again be heard.

I now wish to insert into the RECORD two news stories, one from the London Times, the other from the Boston Pilot:

[From the Boston Pilot, Aug. 4, 1978]

ULSTER ARCHBISHOP HITS LONG KESH CONDITIONS

DUBLIN, IRELAND.—Archbishop Tomas O'Fiaich of Armagh, Northern Ireland, issued a public blast against "inhuman conditions" in the prison for terrorists at Long Kesh, following a visit July 27 to three sections of the prison's famous H. Block.

"One would hardly allow an animal to remain in such conditions, let alone a human being," said the archbishop in a statement distributed Aug. 1 by the Irish bishops' Catholic Press and Information Office in Dublin.

Archbishop O'Fiaich, who last year was made head of Armagh, primatial See of all Ireland, called for an immediate improvement of prison conditions and said he would provide an account of what he had seen to the Vatican "without delay."

"The nearest approach to (conditions in Long Kesh) that I have seen," he said, "was the spectacle of hundreds of homeless people living in sewer-pipes in the slums of Calcutta. The stench and filth in some of the cells, with the remains of rotten food and human excreta scattered around the walls, was almost unbearable. In two of them I was unable to speak for fear of vomiting."

Charging that prisoners are deprived of

"basic human needs" and citing numerous complaints he heard from prisoners about beatings and degradations, Archbishop O'Fiaich rejected government claims that the prisoners in Long Kesh are treated as ordinary prisoners.

The prison is a special institution to house those convicted of terrorism in Northern Ireland's civil war. Its inmates consider themselves political prisoners rather than criminals, and they have conducted a long protest over prison conditions and alleged maltreatment by guards.

The archbishop said he spent the whole of Sunday, July 27, in the prison, in which nearly 200 of the 1,800 inmates are from the Armagh Archdiocese.

"This is the equivalent of all the young men of similar age groups in a typical parish of this diocese," he said.

It was Archbishop O'Fiaich's second visit to the Long Kesh prison. He said he visited it out of concern as a bishop for those in prison and "also aware of the grave concern of the Holy See at the situation which has arisen in the prison."

He said he visited "H Blocks 3, 4 and 5, where over 300 prisoners are incarcerated."

"The prisoners' cells are without beds, chairs or tables," he reported. "They sleep on mattresses on the floor. . . . They have no covering except a towel or blanket, no books, newspapers or reading material except the Bible . . . no pens or writing material, no TV or radio, no hobbies or handicrafts, no exercise or recreation."

Citing punishments such as solitary confinement and withdrawal of exercise rights for prisoners' refusal to do prison work or wear prison uniforms, the archbishop said, "These are basic human needs for physical and mental health, not privileges to be granted or withheld as rewards or punishments.

"To deprive anyone of them over a long period—irrespective of what led to the deprivation in the first place—is surely a grave injustice and can not be justified in any circumstances."

He called for respect for the human dignity of all prisoners, whatever their crimes or political views. "I would make the same plea on behalf of Loyalist prisoners," he said, "but since I was not permitted to speak to any of them, despite a request to do so, I cannot say for certain what their present condition is."

Addressing the issue of maltreatment, Archbishop O'Fiaich said that several prisoners "complained to me of beatings, of verbal abuse, of additional punishments (in cold cells without even a mattress) for making complaints, and of degrading searches carried out on the most intimate parts of their naked bodies. Of course, I have no way of verifying these allegations, but they were numerous."

He said he was surprised to find high morale among the prisoners.

"From talking to them it is evident that they intend to continue their protest indefinitely and it seems they prefer to face death rather than submit to being classed as criminals," he said.

He called it "a triumph of the human spirit" that many of the prisoners combat the dehumanizing conditions by learning Gaelic, shouting Irish words from cell to cell, singing Irish songs and writing Irish on cell walls "with the remnants of toothpaste tubes".

While "authorities refuse to admit that these prisoners are in a different category from the ordinary," he said, "everything about their trials and family background indicates that they are different.

"They were sentenced by special courts without juries. The vast majority were convicted on allegedly voluntary confessions obtained in circumstances which are now placed under grave suspicion. . . . Many are very youthful and come from families which had never been in trouble with the law. . . . How can one explain the jump in the prison population of Northern Ireland from 500 to 3,000 unless a new type of prisoner has emerged?"

The conditions in Long Kesh's prison are "only sowing the seeds of future conflict" in an already divided Northern Ireland, said Archbishop O'Fiaich.

[From the London Times]

CALL FOR MORE FLEXIBLE ATTITUDE

BELFAST.—Republican prisoners in the Maze prison, Long Kesh, are being kept in inhuman conditions, the Roman Catholic Primate of All Ireland, Dr. Tomas O Fiaich, said yesterday. His remarks followed an all-day visit he paid to the jail on Sunday. Three hundred prisoners there are attempting to regain political status.

The prisoners are refusing to wash, use the lavatories, or "slop out" their chamber pots.

Dr. O Fiaich said he was shocked by the conditions, which were not suitable even for animals. "The stench and filth in some of the cells, with the remains of rotten food and human excreta scattered around the walls, was almost unbearable. In two of them I was unable to speak for fear of vomiting."

He said the Northern Ireland Office should recognize the difference between prisoners convicted in special non-jury courts and ordinary criminals.

"The authorities refuse to admit that these prisoners are in a different category from the ordinary, yet everything about their trials, and family background indicates that they are different", he went on.

"They were sentenced by special courts without juries. The vast majority were convicted on allegedly voluntary confessions obtained in circumstances which are now placed under grave suspicion by the recent report of Amnesty International.

"Many are very youthful and come from families which have never been in trouble with the law, though they lived in areas which suffered discrimination in housing and jobs. How can one explain the jump in the prisoners are in a different category from 500 to 3,000 unless a new type of prisoner has emerged?"

The Archbishop said he was not calling for the reintroduction of special category status, but he asked the Northern Ireland Office to take a more flexible attitude to the prisoners and suggested that that would be rewarded by some flexibility in return.

Special category status, which is practically the same as political status, was granted to republican and "loyalist" prisoners by the Conservative Government in 1972, but removed on March 1, 1976, when Mr. Merlyn Rees was Secretary of State for Northern Ireland.

About four hundred republicans and three hundred loyalists convicted before that date, however, still retain special status. They are allowed to wear their own clothes, mix freely, and take orders only from their "officers" and not the prison staff. Their status is similar to that of prisoners of war.

Dr. O. Fiaich, the most influential Roman Catholic to have visited the prison, said he would give a factual account of his visit to the Pope, who was concerned about the prisoners at Long Kesh.

Enlarging on the conditions there, he said that the nearest approach to it he had seen "was the spectacle of hundreds of homeless people living in the sewer pipes in the slums of Calcutta".

He continued:

The prisoners' cells are without beds, chairs or tables. They sleep on mattresses on the floor and in some cases I noticed that these were quite wet. They have no covering except a towel or blanket; no books, newspapers or reading material except the Bible (even religious magazines have been banned since my last visit); no pens or writing material; no television or radio; no hobbies or handicrafts; no exercise or recreation. They are locked in their cells for almost the whole of every day, and some of them have been in this condition for more than a year and a half.

The fact that a man refuses to wear prison uniform or to do prison work should not entail the loss of physical exercise, association with his fellow prisoners, or contact with the outside world. These are basic human needs for physical and mental health, not privileges to be granted or withheld as rewards or punishments. To deprive anyone of them over a long period, irrespective of what led to the deprivation in the first place, is surely a grave injustice and cannot be justified in any circumstances.

The human dignity of every prisoner must be respected regardless of his creed, colour or political viewpoint, and regardless of what crimes he has been charged with. I would make the same plea on behalf of loyalist prisoners, but since I was not permitted to speak to any of them despite a request to do so, I cannot say for certain what their present condition is.

Several prisoners complained to me of beatings, of verbal abuse, of additional punishments (in cold cells without even a mattress) for making complaints, and of degrading searches carried out on the most intimate parts of their naked bodies. Of course, I have no way of verifying these allegations, but they were numerous.

The problem of these prisoners is one of the great obstacles to peace in our community. As long as it continues it will be a potent cause of resentment in the prisoners themselves, breeding frustration among the relatives and friends and leading to bitterness between the prisoners and the prison staff. It is only sowing the seeds of future conflict.

Pending the full resolution of the deadlock, I feel it essential to urge that everything required by the normal man to maintain his physical and mental health and to live a life which is tolerably human should be restored to these prisoners without delay.●

THE PRESIDENT'S HUMAN RIGHTS STAND

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. FASCELL. Mr. Speaker, amid the debate over the efficacy of President Carter's emphasis on human rights in our international relations, one thing stands clear—the policy must have some impact, or there would not be so much controversy about it.

This point is made in an article by Amitai Etzioni in the publication "Human Behavior" for September, 1978. Professor Etzioni notes the complaint of some critics of the President's human rights policy that it is not backed up by firm economic or military sanctions.

Even without such sanctions, he writes, the human rights policy is effective: "If the rulers of the world really don't care what is said about human rights in their countries, why all the heated debate—and reforms?"

I am sure our colleagues will be interested in Professor Etzioni's comments:

CHAMPIONING HUMAN RIGHTS AND NATIONAL INTEREST

Few, if any, other aspects of the foreign or domestic policy of the Carter administra-

tion have sparked as much controversy as its persistent public comment on the violation of human rights—by other nations. The human rights policy has been criticized as naively moralistic and has been unfavorably contrasted with the European tradition of realpolitik—of admitting that a nation's foreign policy is largely determined by its self-interest. It is both hypocritical and impractical, critics says, to justify the United States' close relations to some nations, and greater distance from others, on the basis of our judgment of how attentive they are to human rights. For example, dare we offend Iran—a major supplier of oil, a staunch ally in the Middle East, on the border of the USSR—"just" because its secret police is said to torture hundreds of political prisoners?

The answer is that the human rights policy was never intended to be the only basis for U.S. relations with other nations but was introduced as one factor in shaping these relations. Criticism of the ally's domestic policies may well be muted when vital U.S. interests are at stake—but we can still be clear about which human rights policy we prefer.

Similarly, active concern with human rights does not mean that all nations will be expected to demonstrate equal progress. We can support increases in liberties, no matter how oppressive the country previously was, and express concern with regression, no matter how advanced the nation had been, without detracting from the moral validity of our critical stance. Thus, the United States welcomed the return of democratic rule to India and expressed dismay over growing tyranny in Amin's Uganda, without in any way comparing the human rights "ratings" of the two countries.

The fact that much remains to be achieved in the United States itself does not invalidate putting moral claims on others, either. On the contrary, it further legitimates the right of other nations to be concerned with the fate of oppressed groups in this country—and thus enhances the pressure to do more at home as well.

There is also a vociferous debate over which are more important: political rights—such as the liberty to vote, freedom of speech, right of assembbly and organization—or economic and social rights. Philosophers, ethicists and international lawyers can argue forever about which rights are more "essential," "basic" or "natural." Not surprisingly, those closer to the West will focus on political rights; those to the East and the Third World, on economic-social rights. The result of this debate, far from a standoff, is a growing recognition that progress is called for on both fronts—despite disagreement as to which weighs more heavily in the worldwide ethical scales. It is revealing that the USSR, while seeking to base its case on economic-social rights, far from dismisses political liberties as irrelevant. Indeed, the Soviet constitution promises most of the political liberties dear to the West. Similarly, the United States, while championing political rights, does not disregard the plight of the poor or the social rights of minorities and women. Thus, despite all the verbal brickbats, a kind of shared standard is evolving that recognizes the legitimacy of both concerns.

Critics of the human rights policy warn that if backed by economic or military sanctions, it is likely to lead to local wars, if not superpower confrontations; and that if not so backed up, it amounts to little more than lip service. Behind this "Shut up or fight" notion is a primitive theory of conflict that implies that if conflict is not totally avoided, sooner or later it will become violent.

On the contrary, however, conflict may be limited and worked out on various levels—from ideological, to economic and social, to political—without resort to violence. In some situations, nonviolent conflicts do escalate into violent ones; but very often the fear of confrontation—and the resulting avoidance of conflict—leads to pent-up aggression and, ultimately, to a more explosive situation. The best way to avoid violent conflicts is to work out the differences, which lie at the root of the conflict, by nonviolent means. Labor unions and management, for example, legitimate strikes—an economic mode of conflict—as an alternative to the violence (such as breaking machines or arson) that once followed forced tranquility and management's refusal to acknowledge the existence of labor problems.

As to the efficacy of moral expressions that are deliberately not backed up by economic sanctions—let alone military ones—in order to keep conflict limited, there is no surer sign that they have an effect than that they elicit so much fuss. If the rulers of the world really don't care what is said about human rights in their countries, why all the heated debate—and reforms? ●

A SERIOUS DISCUSSION OF DRUG-USE OR ABUSE

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. MAZZOLI. Mr. Speaker, since the resignation of Dr. Peter Bourne as Special Assistant to the President for Health Issues, there has been an upsurge of press coverage of so-called recreational drug use among Washington's young professionals.

The press accounts have sparked some serious discussion, but for the most part, what we have heard have been jokes in poor taste or discussions bordering on the nonsensical.

I commend to the attention of my colleagues a serious interview with Robert L. DuPont, Jr., former Director, National Institute on Drug Abuse, which appeared in the August 7, 1978, U.S. News & World Report.

Dr. DuFont, who is no reactionary respecting drugs, concludes that using marihuana should not be considered a "trendy" or an "in-crowd" activity. It is dangerous, unhealthy, shortsighted, and illegal.

IS U.S. BECOMING A DOPE-RIDDEN SOCIETY?

Q. Dr. DuPont, are Americans beginning to accept so-called soft drugs, such as marijuana, as a way of life?

A. The answer to that is "Yes." Particularly in the under-30 group, there has been a tremendous increase in the use of drugs of many kinds during the last decade. Within the younger population, there is an increasing tolerance and acceptance of marijuana as a part of life. It is often said about marijuana that we see in this country is a sort of laissez-faire attitude: You do your thing and I'll do mine.

Q. How widespread is the use of marijuana?

A. About 43 million Americans have tried marijuana. Sixteen million are current users—including about 9 percent of high-school seniors who are daily users. That has to be put in the context of the roughly 92 million consumers of alcohol—including 6 percent of high-school seniors who are daily users—and 65 million people who are using tobacco.

Other frequently abused drugs include sedatives—such as the Quaaludes recently in the news—stimulants, tranquilizers and hallucinogens.

Ten years ago, only 1 in 20 American college students had tried marijuana. Today, 11 out of 20 have tried the drug, and 2 out of 20 are using it every day. Probably 15 percent of the auto accidents in this country today are associated with marijuana intoxication.

Q. Do you expect other consequences from such widespread use?

A. Yes, so far we have only seen the tip of the iceberg. We're going to see more evidence of the harmful consequences of marijuana use on health, social activities, family living and work performance as time goes by. Those people going around today emphasizing the benignness of marijuana are going to have a tough time with their consciences.

Q. How widely used is cocaine?

A. After marijuana, cocaine is by far the most widely used illegal drug. About 10 million Americans have taken it at least once, and just under 2 million have taken it within the last month. We have about 400,000 heroin addicts in the country, many of whom became addicted in the 1967 and 1972 epidemics. Heroin use is decreasing now, but it remains our most costly and serious illicit drug problem.

Q. What is the big appeal of drugs of all kinds to so many people?

A Abused drugs make many people feel good. They are powerful reinforcing substances.

Q. How about the use of illegal drugs by young people who are successful?

A. Many of these people aren't yet sure of where they stand and what they can do. It is especially true of young people who suddenly become successful—such as athletes, singers and actors—who have often risen from fairly modest backgrounds.

A sudden rise in status is extremely unsettling. It usually triggers the feeling that one is magic—that whatever one touches works, and that all the rules that are holding others back don't apply to oneself. So the suddenly successful person often gets involved in a hip, risk-taking lifestyle. That's one reason these people get heavily into drugs.

Cocaine is especially appealing to the newly rich, because they don't care how much money they're putting up their noses. Money stops having value. It's exciting, and they feel terrific.

On a personal level, many of these people are actually quite shy. They appear before great crowds and are adulated, and yet they have never done much to sort out their own interpersonal relations. The use of drugs helps them overcome this shyness.

Another thing happens to many of these people. Their sudden success creates a success-anxiety syndrome, and they are preoccupied with guilt. They think: "Why did this happen to me, and not you?" They worry about it at an unconscious level, even if not consciously. Much of what we see is really self-destructive behavior; the individual is unconsciously undoing the success he can't account for and doesn't feel secure with. People who are successful often do things which make you say: "How dumb! I can't believe he did that."

Q. How much does this drug-using behavior influence others, particularly young people?

A. A great deal. These highly visible, successful people are cultural beacons attracting large numbers of others. They're the people young people emulate. This kind of recklessness and drug use has a had effect on the rest of the population, particularly young people.

Q. Why are we being told that there is drug taking in the White House, where people are both successful and presumably secure in their jobs?

A. Many of them are not secure. I have been around the White House for nearly 10 years, and I'm impressed by the fact that the names on the doors are in little containers so that they can be pulled out quickly. Nobody's name is painted on anything, and you rarely go back to the same office from year to year and see the same person in it. They come and go. The average duration in service of a presidential appointee used to be 14 months. It may be a little longer now, but it's still a short period of time.

Q. Why is cocaine in particular so popular?

A. It's glamorous. It's exciting because it involves taking a risk. Furthermore, it's an "up"—producing good feelings, at least for the moment—instead of putting you down as alcohol does, making you sleepy and sort of stupid.

Cocaine is supposed to be the drug of the Inca gods. It's expensive. People who take it emphasize that, like marijuana, it's relatively harmless. You're not likely to die from it, as you might from an overdose of heroin.

The biggest problem with cocaine is wanting more of it, and centering your life around it. Of all the drugs, it is the most powerful in conveying a feeling of well-being. A cocaine user wants more of it all the time, and when he stops taking it, he feels depressed and exhausted. So he tries to go on redoubling what he takes.

Laboratory animals die of exhaustion and seizures following unlimited use of cocaine. It's as if their nervous systems just give out. There have been deaths associated with human cocaine use. And even though we don't understand exactly what is happening, it is clear that frequent use can be damaging.

Despite its glamorous image, cocaine is a dangerous drug, and it can kill.

Q. What does cocaine cost?

A. It can cost as little as $2 or $3 for a single dose or up to several thousand dollars a day, depending on the level of use.

Q. Do you think that many Americans underestimate the dangers of marijuana?

A. Absolutely. One of the most distressing facts to me has been the difficulty communicating the risks of marijuana use. Probably no issue was more frustrating to me in five years as director of the National Institute on Drug Abuse.

I have supported throughout that time the decriminalization of the personal possession of marijuana—the substitution of a noncriminal fine for the user of small quantities of the drug. By that means, we establish that marijuana use is prohibited behavior, but we do not use the criminal law and arrest records and tie up the courts to discourage it.

That substitution of a fine for the current criminal penalty is perceived by 90 percent of the public as being soft on pot. But, actually, I am very deeply concerned about the rising levels of marijuana in this society.

Too many people conclude that, because we have increasing levels of marijuana use, we will inevitably move toward legalization. I do not believe this is the way of the future. I can foresee the time when young and old will hold attitudes toward recreational drug use which are similar to those now held toward herbicides, pesticides and food additives—that they are unhealthy and should not be used.

Q. What happens physically to somebody when he starts taking marijuana often?

A. Probably the most serious consequence has to do with his interpersonal relationships and his involvement in what's going on around him. The frequent marijuana user becomes increasingly preoccupied with himself. He doesn't feel the stress anymore of situations that are normal stimuli to problem solving, so that instead of solving his problems with friends, with heterosexual relationships, with work and with family, he simply doesn't care about them anymore. These anxieties that one feels are healthy. They are the stimuli to growth, and without them, people just don't grow.

There's a great myth about the use of many drugs as sex stimulants. The truth is that all drugs do is reduce a person's anxieties about sex, so that one doesn't really care what happens. Actually, sexual performance is often not good after drug use of any kind. Drugs are an unreliable crutch.

Q. Are there also health hazards to marijuana?

A. Yes. The problem is in knowing exactly what the health consequences are. We now have a 4-million-dollar-a-year federal research program on marijuana, and we're learning more about it every year. But the nature of science is that scientists often contradict each other, and the most frequent finding in science is always uncertainty.

In the area of effects of marijuana on the male sex hormone testosterone, for example, there is disagreement among scientists. So the promarijuana people say: "You see, there's no problem." In fact, marijuana does influence the hormone levels of the body, the body's immune response, the way we think and the tissues of the lung. Bronchitis, for example, is common in people who smoke marijuana cigarettes. Furthermore, there is laboratory evidence to show that marijuana is more likely to cause cancerlike lesions than is cigarette smoke.

Its going to take years to sort all that out. My point is this: We already know enough to say that marijuana poses a substantial risk. Anybody who takes that drug and thinks that nothing is happening to his body has lost his mind. Marijuana is a powerful drug that is influencing his entire body.

The other thing people don't understand: Marijuana stays in your body for over a week from a single dose. If a person is only smoking marijuana once a week, his body is continuously exposed to THC—tetrahydrocannabinol, the major ingredient—all the time. That's not true for tobacco or alcohol. We don't know yet what the consequences of that are. But it isn't too bright to expose yourself to this risk.

Q. Do you find age or class patterns in drug taking?

A. Yes. There's a regular pattern, based more on age than economic class. The first drug that is used when one is young is alcohol—mainly beer and wine. If a young person does not use alcohol, he is unlikely to go on further to other drugs. But if he does take beer, the next step usually is cigarettes and/or hard liquor.

The first illegal drug that young people adopt is marijuana. And then there is a hierarchy leading to heroin, which is the end of the line. Only a portion of those who reach any step go on to the next, so that we have 16 million marijuana users but only 500,000 heroin users.

The interesting thing is that when people stop using drugs, they usually go back down these same steps in reverse sequence.

Q. What sort of drug problems are prevalent among Americans over 30?

A. The drug problems of older people are the prescription drugs: Valium and the sedatives and simulants, as well as tranquilizers other than Valium. These problems are increasingly serious for business and for middle America.

Betty Ford's recent courageous admission of drug-abuse problems is a major milestone for drug-abuse prevention. It has opened the door for hundreds of thousands of Americans to, for the first time, admit their problems and seek the help they need. Drug problems affect all ages in our society, from the newborn infant born addicted because of his mother's drug use to the senior citizen who is drugged with tranquilizers.●

BROAD COALITION SUPPORTS AIRLINE REGULATORY REFORM

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. ANDERSON of California. Mr. Speaker, the House will soon be considering H.R. 12611, a regulatory reform bill for aviation. The bill will provide substantial benefits for consumers, and for the airline industry and its employees.

Recently the airlines, prodded by the CAB, have become increasingly competitive and have offered many deep discount fares. The low fares have been highly successful. Airline passenger traffic is at record levels and many persons who could not afford to fly now are able to do so. Airline fares are one area in which the fight against inflation is succeeding.

H.R. 12611 amends the law governing the CAB's regulation of the airlines to insure that the CAB will continue to encourage low fares and competition. The bill is supported by many diverse organizations representing a wide membership. The supporting organizations range across the political spectrum, from the American Conservative Union to Americans for Democratic Action.

Today I am placing in the RECORD three letters supporting airline regulatory reform. The first is from the Ad Hoc Committee on Airline Regulatory Reform, a coalition of organizations supporting reform. The letter includes a list of the impressive array of organizations in the ad hoc committee.

A second letter is from the American Association of Retired Persons, representing over 12 million members. The letter indicates that retired persons have a great interest in air travel, and that the recent low fares have permitted the elderly to travel despite reduced incomes.

A final letter is from the National Association of Manufacturers which strongly supports the more competitive environment which H.R. 12611 would promote.

THE AD HOC COMMITTEE FOR
AIRLINE REGULATORY REFORM,
Washington, D.C., August 8, 1978.

Hon. GLENN ANDERSON,
Chairman, Subcommittee on Aviation, Committee on Public Works and Transportation, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: We are writing to underscore our support for H.R. 12611, the "Air Service Improvement Act of 1978," and to convey to you our appreciation for your

continuing leadership in the field of airline regulatory reform.

In the U.S. airline industry during the last year we have all witnessed the benefits of the increased competitiveness due to sustained Congressional scrutiny. Fares for basic air transportation have fallen by some 30 to 50 percent on many routes, bringing air travel within the reach of many more Americans. And the airlines themselves are making unusually good profits. H.R. 12611 will make these benefits permanent and extend them even more broadly across the land.

As the 95th Congress enters its last few legislative weeks, we hope that you and your colleagues will redouble your efforts to bring this needed legislation to an early vote in the House and final passage after conference. The improvements embodied in this bill are the result of many years of arduous, non-partisan work by Democrats and Republicans, Congressmen and Presidents, and countless public and private groups and individuals. A similar bill, S. 2493, has already passed the Senate overwhelmingly, and President Carter has made enactment this year a major goal.

Expiration of this Congress, without enactment of this legislation which has been so long considered, so patiently striven for, and so manifestly proven by events, would indeed be unfortunate.

Again, thank you for your own leadership in the fine progress that has been accomplished to date.

Sincerely,

JAMES I. CAMPBELL, Jr.,
Executive Director.

SUMMARY LIST OF SUPPORTERS OF CAB REFORM

Private

Airline Passenger Association.
*American Association of Retired Persons.
*American Conservative Union.
American Farm Bureau.
*Americans for Democratic Action.
*Aviation Consumer Action Project.
*Common Cause.
*Congress Watch.
*Cooperative League of USA.
Consumer Federation of America.
*DHL Corporation of Honolulu.
*Food Marketing Institute.
*Libertarian Advocate.
National Association of Manufacturers.
*National Industrial Traffic League.
*National Retail Merchants Association.
*National Retired Teachers Association.
*National Student Lobby.

Air Florida, Braniff, Frontier, Hughes Air West, Pacific Southwest Airlines (California), Pan American, Southwest (Texas) United, Western.

*Member of Ad Hoc Committee for Regulatory Reform.

NATIONAL RETIRED TEACHERS ASSOCIATION, AMERICAN ASSOCIATION OF RETIRED PERSONS,
August 4, 1978.

Hon. GLENN M. ANDERSON,
Russell House Office Building,
Washington, D.C.

DEAR CONGRESSMAN ANDERSON: On behalf of our 12 million members, we want to take this opportunity to offer our sincere thanks and appreciation for your leadership role in the airline regulatory reform effort.

As you know, our organizations have offered testimony and support for airline reform on numerous occasions in the past and continue to be among its staunchest supporters. We do so because so many of our members have pointed out to us their vital interest in lower priced air travel and the extent to which the older population will be the recipients of the benefits of increased competition in this industry. In fact, they have already been major beneficiaries of the reform-induced surge of competitive pricing in recent times. Information supplied by United Airline's for example, reveals that over half of United Super-Saver passengers are 50 years of age or older. American Airlines has had a similar response. In their Phoenix and Tucson markets, 28 percent of Super Saver were over age 60.

This sort of information makes clear the stake older persons have in more competitive, lower priced air travel.

In summary Congressman Anderson, the elderly population consists of millions of actual and potential air travelers, persons for whom traveling, visiting children, or seeing the country is a major retirement activity. Your efforts and those of your colleagues to introduce more competition and lower prices to the airline industry are greatly appreciated by older Americans and you may be assured of our thanks and continued support.

Sincerely,

PETER W. HUGHES,
Legislative Counsel.

NATIONAL ASSOCIATION OF MANUFACTURERS,
August 4, 1978.

Hon. GLENN ANDERSON,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. ANDERSON: The National Association of Manufacturers wishes to reiterate our support for H.R. 12611, the "Air Service Improvement Act of 1978." The NAM believes that while the bill can be strengthened to relieve the airlines from the stranglehold of economic regulation, H.R. 12611 does represent a step forward.

Recent events have demonstrated the need for legislation to reform economic regulation of the airline industry. The Civil Aeronautics Board has attempted valiantly to initiate administrative reforms to promote competition, but it has been challenged in every instance. And, just as the present Board has interpreted the present statute to permit greater competition, future Boards could easily interpret it to restrict competition. Legislation is essential to give the Board guidance and to promote a free market environment.

It is NAM's hope that the House of Representatives will consider this matter expeditiously so that this vital reform measure will be enacted this year.

Sincerely,

JAMES CARTY.●

SENATE COMMITTEE MEETINGS

Title IV of the Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committees scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, August 10, 1978, may be found in Daily Digest of today's RECORD.

MEETINGS SCHEDULED
AUGUST 11

9:00 a.m.
Energy and Natural Resources
To continue mark up of proposed legislation designating certain Alaska lands as national parkland.
3110 Dirksen Building

9:30 a.m.
Environment and Public Works
To hold hearings on the nomination of Karl S. Bowers, of South Carolina, to be Administrator, Federal Highway Administration, DOT.
4200 Dirksen Building

Judiciary
To hold hearings to examine the FBI's program to prevent and investigate bank robberies.
2228 Dirksen Building

Conferees
On H.R. 12927, making appropriations for military construction for FY 79.
H-140, Capitol

10:00 a.m.
Budget
To continue markup of second concurrent resolution on the Congressional Budget for FY 1979. (Afternoon session expected.)
S-207, Capitol

Foreign Relations
East Asian and Pacific Affairs Subcommittee
To hold hearing on S.J. Res. 111, authorizing participation by the United States in parliamentary conferences with Japan.
4221 Dirksen Building

Rules and Administration
To continue to consider the nominations of John Warren McGarry, of Massachusetts, and Samuel D. Zagoria, of Maryland, to be members of the FEC, and other legislative and administrative business.
301 Russell Building

Select Indian Affairs
To markup S. 3043 and H.R. 11092, authorizing additional funds for expenses of the Navajo and Hopi Indian Relocation Commission; S. 2502, to authorize the States and Indian tribes to enter into mutual agreements respecting jurisdiction and governmental operations in Indian country; S. 857, to provide Federal financing assistance to Hawaiian natives; and S. 3002, clarifying the southern boundary of the Salt River Pima-Maricopa Indian Reservation, Arizona.
6226 Dirksen Building

10:30 a.m.
Appropriations
To resume consideration of H.R. 12929, making appropriations for FY 79 for the Departments of Labor and HEW.
S-128, Capitol

AUGUST 14

8:30 a.m.
Finance
Health Subcommittee
To hold hearings on H.R. 9434, to increase Federal Medicaid funding for Puerto Rico, the Virgin Islands, and Guam, and on S. 1392, proposed Child Health Assessment Act.
2221 Dirksen Building

9:30 a.m.
Judiciary
Immigration Subcommittee
To hold hearings on S. 3093, to provide for the seizure and forfeiture of vehicles used to illegally transport persons into the U.S.
2228 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To hold hearings on S. 3304, proposed Federal Reserve Requirements Act.
5302 Dirksen Building
Energy and Natural Resources
Energy Research and Development Subcommittee
To hold hearings on S. 2860, proposed Solar Power Satellite Research, Development, and Demonstration Program Act.
3110 Dirksen Building
Environment and Public Works
To hold hearings on several public building prospectuses.
4200 Dirksen Building
Foreign Relations
To receive testimony, in closed session, from Secretary of State Vance on the situation in the Middle East.
S-116, Capitol

2:00 p.m.
Conferees
On H.R. 12222, authorizing funds for International Development Assistance programs for FY 79.
S-116, Capitol

AUGUST 15

9:00 a.m.
Energy and Natural Resources
Business meeting on pending calendar business.
3110 Dirksen Building

9:30 a.m.
Environment and Public Works
Resource Protection Subcommittee
To hold hearings on H.R. 2329, proposed Fish and Wildlife Improvement Act, H.R. 8394, proposed Refuge Revenue Sharing Act, and S. 691, to provide for the conservation of waterfowl in the San Joaquin Valley, California.
4200 Dirksen Building
Human Resources
Labor Subcommittee
To hold joint hearings with Finance Subcommittee on Private Pension Plans and Employee Fringe Benefits on bills relating to the Employee Retirement Income Security Act (S. 3017, 901, 2992, 3193, 1745, 1383, and 250).
4232 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To continue hearings on S. 3304, proposed Federal Reserve Requirements Act.
5302 Dirksen Building
Finance
International Trade Subcommittee
To hold hearings on S. 2920, to exclude certain imported textile products from future tariff reductions.
2221 Dirksen Building
Foreign Relations
To hold hearings on Additional Protocol I to the Treaty for the Prohibition of Nuclear Weapons in Latin America (Exec. I, 95th Cong., 2nd sess.).
4221 Dirksen Building
Judiciary
Administrative Practice and Procedure Subcommittee
To resume hearings on the FBI Charter as it concerns domestic security.
2228 Dirksen Building
Select Intelligence
To hold a closed business meeting.
S-407, Capitol

AUGUST 16

9:00 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To resume hearings to receive testimony from officials of the Department of Energy on nuclear waste disposal.
225 Russell Building
Energy and Natural Resources
Business meeting on pending calendar business
3110 Dirksen Building

9:30 a.m.
Environment and Public Works
To mark up S. 2900, to provide compensation for damages and cleanup costs caused by discharges of oil and hazardous substances, to be followed by consideration of the nominations of Jane Hurtyarn, of Georgia, to be a member of the Council on Environmental Quality, and Karl S. Bowers, of South Carolina, to Administrator, Federal Highway Administration, DOT.
4200 Dirksen Building
Human Resources
Labor Subcommittee
To continue joint hearings with Finance Subcommittee on Private Pension Plans and Employee Fringe Benefits on bills relating to the Employee Retirement Income Security Act (S. 3017, 901, 2992, 3193, 1745, 1383, and 250).
4232 Dirksen Office Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To continue hearings on S. 3304, proposed Federal Reserve Requirements Act.
5302 Dirksen Building
Judiciary
Criminal Laws and Procedures Subcommittee
To hold hearings on S. 3270, proposed Justice System Improvement Act and related bills.
2228 Dirksen Building
Select Indian Affairs
To hold hearings on the recommendations of the Bureau of Indian Affairs reorganization task force.
5110 Dirksen Building

2:30 p.m.
Human Resources
Health and Scientific Research Subcommittee
To resume markup of S. 3115, to establish a comprehensive disease prevention and health promotion program in the U.S.
Room to be announced

AUGUST 17

9:00 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on S. 1845, to prevent unwarranted invasions of privacy by prohibiting the use of polygraph type equipment for certain purposes.
5110 Dirksen Building

9:30 a.m.
Human Resources
Labor Subcommittee
To continue joint hearings with Finance Subcommittee on Private Pension Plans and Employee Fringe Benefits on bills relating to the Employee Retirement Income Security Act (S. 3017, 901, 2992, 3193, 1745, 1383, and 250).
4232 Dirksen Office Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To continue hearings on S. 3304, proposed Federal Reserve Requirements Act.
5302 Dirksen Building
Environment and Public Works
Water Resources Subcommittee
To hold oversight hearings on the physical and financial condition of the Erie canal.
4200 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Parks and Recreation Subcommittee
To resume hearings on H.R. 12536, the Omnibus National Parks Amendments.
3110 Dirksen Building

SENATE—*Thursday, August 10, 1978*

(Legislative day of Wednesday, May 17, 1978)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by Hon. ROBERT MORGAN, a Senator from the State of North Carolina.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Let us hear the words of the gospel of Saint Matthew, the 18th chapter.

Verily, I say unto you, Except ye be converted, and become as little children, ye shall not enter into the kingdom of heaven.

Whosoever therefore shall humble himself as this little child, the same is greatest in the kingdom of heaven.— Matthew 18: 3, 4.

Let us pray.

Our Father-God who hears and answers the prayers of those who seek Thee in spirit and in truth, may this pause be for each of us a time of self-assessment, heart cleansing, and a fresh dedication to all that is noble, just, and true. Emancipate us from every fear except the fear of failing to do Thy will. Show us more clearly that we cannot improve the social order unless we improve ourselves. Give us a part in the spiritual renewal of our time. Convert us not to the child which once we were, but to the child we never yet have been—humble, trustful, confident of Thy nearness, certain that simple child-like faith is the gateway to the kingdom over which Thou dost rule.

In the Master's name we pray. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The second assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., August 10, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable ROBERT MOR-

GAN, a Senator from the State of North Carolina, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

(Mr. MORGAN thereupon assumed the chair as Acting President pro tempore.)

THE JOURNAL

Mr. EAGLETON. Mr. President, I ask unanimous consent that the Journal of proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. EAGLETON. Mr. President, is the pending order of business the Agriculture appropriation bill?

The ACTING PRESIDENT pro tempore. The leaders have their time under the previous order.

TIME-LIMITATION AGREEMENT—H.R. 13468

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at such time as H.R. 13468, the D.C. appropriation bill, is called up and made the pending business before the Senate, there be a time agreement thereon of 1 hour on the bill, 30 minutes on any amendment, 15 minutes on any debatable motion, appeal, or point of order, if such is made to the Senate, and that the agreement be in the usual form with respect to the division and control of time.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Who is to control the time?

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. LEAHY and Mr. MATHIAS.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The agreement is as follows:

Ordered, That when the Senate proceeds to the consideration of H.R. 13468 (Order No. 998), an act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending Sept. 30, 1979, and for other purposes, debate on any amendment shall be limited to 30 minutes, to be equally divided and controlled by the mover of such and the manager of the bill, and debate on any debatable motion, appeal, or point of order which is submitted or on which the Chair entertains debate shall be limited to 15 minutes, to be equally divided and controlled by the mover of such and the manager of the bill: *Provided,* That in the event the manager of the bill is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or his designee.

Ordered further, That on the question of final passage of the said bill, debate shall be limited to 1 hour, to be equally divided and controlled, respectively, by the Senator from Vermont (Mr. LEAHY) and the Senator from Maryland (Mr. MATHIAS): *Provided,* That the said Senators, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, debatable motion, appeal, or point of order.

TIME-LIMITATION AGREEMENT—H.R. 12928

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when Calendar Order No. 992, the public works appropriations bill is called up and made the pending business before the Senate there be a 2-hour time limitation on debate on the bill to be equally divided between Mr. JOHNSTON and Mr. HATFIELD, 30 minutes on any amendment, 15 minutes on any debatable motion, appeal, or point of order, if such is submitted to the Senate, with the exception that there be no time limitation on any amendment dealing with nuclear waste disposal; that the agreement be in the usual form as to the control and division of time; and this has been cleared with the minority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank the Chair.

The agreement is as follows:

Ordered, That when the Senate proceeds to the consideration of H.R. 12928 (Order No. 992), an act making appropriations for public works for water and power development and energy research for the fiscal year ending Sept. 30, 1979, and for other purposes, debate on any amendment (except any amendment dealing with nuclear waste disposal, on which there shall be no time limitation) shall be limited to 30 minutes, to be equally divided and controlled by the mover of such and the manager of the bill, and debate on any debatable motion, appeal or point of order which is submitted or on which the Chair entertains debate shall be limited to 15 minutes, to be equally divided and controlled by the mover of such and the manager of the bill: *Provided,* That in the event the manager of the bill is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or his designee.

Ordered further, That on the question of final passage of the said bill, debate shall be limited to 2 hours, to be equally divided and controlled, respectively, by the Senator from Louisiana (Mr. JOHNSTON) and the Senator from Oregon (Mr. HATFIELD): *Provided,* That the said Senators, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, debatable motion, appeal, or point of order.

Mr. ROBERT C. BYRD. Mr. President, I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. The Senator from Tennessee (Mr. BAKER).

Mr. BAKER. Mr. President, I thank the Chair.

I have no need for my time under the standing order and no requests for time. I yield it back.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for transaction of routine morning business, that Senators may speak therein for up to 5 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(Routine morning business transacted and additional statements submitted are printed later in today's RECORD.)

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Is there morning business? If not, morning business is closed.

COMMITTEE MEETINGS

Mr. EAGLETON. Mr. President, I ask unanimous consent that the Water Resources Subcommittee of the Committee on Environment and Public Works be authorized to meet during the session of the Senate today to hold a hearing on the administration's proposed water policy.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate today to mark up the following legislation:

S. 2981—Railroad Amendments Act of 1978.

S. 2995—Union Station Improvement Act of 1978.

S. 3229—Postal Service Amendments Act of 1978.

S. 2053—Deep Seabed Mining.

Nomination of Thomas F. Moakley to be a member of the Federal Maritime Commission (reappointment).

Nomination of Francis H. McAdams to be a member of the National Transportation Safety Board (reappointment).

Routine Coast Guard nominations.

H.R. 185—Transportation authority for Coast Guard employees.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, I ask unanimous consent that the Subcommittee on Science, Technology and Space of the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate today to hold oversight hearings on nuclear waste disposal.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. LONG. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate today beginning at 3 p.m. to consider countercyclical revenue sharing legislation. I believe this has been cleared on all sides.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

AGRICULTURAL, RURAL DEVELOPMENT, AND RELATED AGENCIES APPROPRIATIONS, 1979

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of H.R. 13125, which the clerk will state by title.

The assistant legislative clerk read as follows:

Calendar No. 982, H.R. 13125, a bill making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1979, and for other purposes.

The ACTING PRESIDENT pro tempore. Time for debate on this bill is limited to 1 hour, to be equally divided and controlled between the Senator from Missouri (Mr. EAGLETON) and the Senator from Oklahoma (Mr. BELLMON), with 30 minutes on any amendment, and 15 minutes on any debatable motion, appeal, or point of order.

The pending question is on an amendment by the Senator from Maine (Mr. HATHAWAY).

The Senator from Maine is recognized.

AMENDMENT NO. 3442

(Purpose: To increase the amount of funds appropriated for various agricultural conservation programs)

Mr. HATHAWAY. Mr. President, I call up amendment No. 3442.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Maine (Mr. HATHAWAY), for himself and Mr. MCGOVERN, proposes amendment No. 3442.

Mr. HATHAWAY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 38, line 22, strike out "$85,000,000" and insert "$190,000,000".

Mr. HATHAWAY. Mr. President, I yield to my distinguished colleague from South Dakota (Mr. MCGOVERN).

Mr. MCGOVERN. Mr. President, I thank the Senator from Maine for yielding to me. I do have to preside at a hearing this morning held by the Senate Subcommittee on Nutrition.

But I rise to support the amendment that Senator HATHAWAY and I offer to restore funds for the agricultural conservation program.

I think all across the farm States of the Nation this is one of the most recognized and respected conservation programs Congress has devised.

Mr. President, since its adoption in 1936, the agriculturual conservation program has become a well-recognized and respected conservation program by the Nation's farm community. In the Congress, it has become accepted on both sides of the aisle as productive and worthwhile. I doubt seriously that there would be a single vote in the Chamber recorded in favor of scrapping the program. The question then becomes not one of abandoning a program proved to be desirable, but one of funding it at acceptable levels. The need to preserve and enhance our soil and water resources is perhaps the single greatest task facing American agriculture. Current indicators suggest that our combined national conservation efforts are no longer keeping pace with the problems of soil erosion.

With a worldwide demand for food, feed, and fiber increasing almost geometrically, American agriculture is responding with increasingly greater zeal and effort to meet this demand. The demand for food we all know will continue at increasingly higher levels into the future.

We must remember, however, that full production of the kind one can foresee places a very heavy burden on the Nation's finite base of cropland. Economic incentive has brought marginal cropland into production, oftentimes without the necessary long-range outlook for the prevention of erosion, and ultimately a loss of soil productivity. Soil losses of 50 tons and more per acre are now being recorded in Iowa and other major producing areas. Are we in fact jeopardizing the means of future productivity?

Lest we forget the nature of the ACP program—which Senator HATHAWAY and others of us are trying to strengthen here this morning—let me be quick to point out that this is not a Federal giveaway program. Accepted conservation practices are matched by Federal-farmer cooperation. For every dollar of Federal participation, there is a dollar of farmer participation.

We also ought to remember that this is not a program for rich farmers. The maximum a farmer can receive under this formula is $2,500. The average in my State is actually closer to about $800 or $900.

We also ought to remember that the House figure of nearly $200 million in funding actually generates almost $400 million in accepted conservation practices because of the matching formula involved.

Mr. President, let me just say that I regard it as a mistake in the name of economy to jeopardize the long-range economy of our farmers. I urge the Senate to look down the road to the day when food production in this country is crucial, not only to our own well-being, but to the very survival of humanity.

We ought to prepare for that time by maintaining at least at its present level a strong conservation program.

I very much hope that the amendment that the Senator from Maine and I are offering will be approved by the Senate. I think we are performing a great service, not only to the farm producers of this country, but to all who believe in conserving the land and understand the vital relationship that plays to the future, not only to the people of the United States, but also people all around the world.

If we brought a program like this into the cities, it would be heralded with resounding cheers. I find it difficult to understand why it is attacked by both the administration and the Senate Appropriations Committee in the farmland areas.

I frankly am at a loss to explain why each year the Congress on this issue must face a confrontation with the executive department—and in this particular year, do battle with our own Appropriations Committee, which has slashed the funding of this program even below the levels contained in the administration's budget, that budget admittedly being hostile to the ACP program.

Mr. President, the 1978 money for funding this program stood at $226 million including $36 million in the first supplemental appropriation. The House under the continued able leadership of the gentleman from Mississippi (Mr. WHITTEN) recommended a 1979 appropriation of $190 million and wisely again separated ACP from efforts to combine it with other conservation programs. The Senate Appropriations Committee reduced the House-passed figure to $85 million—substantially less than one-half of the House appropriation.

How do some of the States fare under the House and Senate figures? My State of South Dakota would receive $3.7 million under the House version—$1.6 million under the Senate measure. The South Dakota ASCS office advises me that there are approximately 9,500 contracts in my State in the ACP program. South Dakota has about 43,000 farms, leading to the conclusion that almost 1 in 4 farms takes advantage of this program in one way or another. Under the Senate appropriation, this whole picture would be cut by almost 60 percent. I find this unacceptable.

Texas would receive $16.4 million under the House bill—$7.3 million under the Senate. Kansas, $5.7 million from the House—$2.6 million from the Senate. Mr. President, every Senator in this Chamber faces losses to his State of from 50 to 60 percent of last year's funding.

Mr. President, it is a mistake in efforts at economy to jeopardize the ecomonic well-being of our farmers. I urge the Senate to look down the road to the day when food production in the United States is crucial not only to our own well-being but to the survival of humanity. Let us prepare for that time by maintaining a strong conservation program.

Mr. President, lest the Senate be of the opinion that the ACP amendment does not have widespread support or that it is being advanced by a handful of Senators from farm-oriented States, let me say that I have personally checked with the National Farmers Organization, the National Farmers Union, the National Association of Wheatgrowers, and the National Association of Farmer Elected Committeemen, the latter organization being that body actually called upon to administer the program. A call to the National Association of Conservation Districts also indicates the support of that organization.

Each of these organizations fully endorse the House funding of this program at $190 million and take strong issue with the Appropriations Committee cuts. These are the people who actually use the program. These are the organizations that have participated since 1936. These are the organizations who want it.

Mr. President, I thank the Senator from Maine for yielding to me to make it possible for me to participate.

Mr. HATHAWAY. I thank the Senator from South Dakota for his contribution and his complimentary remarks.

Mr. President, I yield 2 minutes to the Senator from Mississippi.

Mr. STENNIS. Mr. President, first, I thank as well as compliment the Senator from Missouri for doing an excellent job as chairman of this subcommittee. I trust his work to the extent that I gave him a general proxy at the markup.

However, on this matter, I think that without any indepth study and hearings by some of our knowledgeable peo-

ple in the subcommittees, this reduction should not be made.

Moreover, this is one program about which I know something. I live in a rural county of small farmers, where I have always lived, and I know these people by name and the background of their work. I have seen with admiration over the years the application of this program. It is really a grassroots program. It gets down to soil conservation, reforestation, and other constructive forward movements that are greatly needed.

This is a small amount, and it is for people who still live on their land. It is a great help in enabling them to continue to make a living on these small farms.

I am very confident that, so far as it applies to areas such as mine, this is a highly valuable program, and I strongly support its continuation.

I believe that no substantial reductions should be made until a determination has been made, as I have said, by indepth development of the facts and applying yardsticks in a reassignment of priorities. That is what an Appropriations Committee is, anyway—an assignment of priorities.

So, until those facts are developed and the yardstick established and applied, I hope the Senate will not delete substantially these sums of money.

Mr. President, I ask unanimous consent to have my name added as a cosponsor of the amendment.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. STENNIS. I thank the Senator very much for yielding to me.

Mr. HATHAWAY. I thank the Senator from Mississippi for his contribution.

Mr. EAGLETON. Mr. President, will the Senator from Maine yield for 1 minute?

Mr. HATHAWAY. I yield.

Mr. EAGLETON. I would like to respond to some of the remarks of Senator STENNIS. I know he has a committee commitment.

Senator STENNIS, in supporting the Hathaway amendment, said that he thought this action should not be taken without indepth study and hearings.

I point out to my distinguished colleagues that we held 20 days of hearings on this bill, and we heard from several witnesses specifically on this program. It is not just the word of the Appropriations Subcommittee and full committee, but it is the policy, quite frankly, that was adopted in the 1977 Food and Agriculture Act. I will read one portion of the act—that in section 1501 of the authorization bill:

> The Secretary is authorized to carry out the policy and purposes specified in section 7(a) of this Act by providing financial assistance to agricultural producers for carrying out enduring conservation and environmental enhancement measures.

Those are the key words—"for carrying out enduring conservation and environmental enhancement measures." The money we have in the bill is for the enduring practices. The $105 million budget buster of Senator HATHAWAY is the one that adds funds that do not relate to enduring practices, according to independent audits of the program.

I point out to my colleague that this is a matter to which we have given very careful and thorough attention.

Mr. STENNIS. Mr. President, the Senator from Missouri always gives attention. I am not accusing him of lying down on the job. I do think that extensive hearings would disclose a great deal with respect to this matter.

Mr. HATHAWAY. I thank the Senator from Mississippi.

Mr. President, I ask unanimous consent that the names of the following Senators be added as cosponsors of the amendment: Senator CLARK, Senator ALLEN, Senator HART, Senator NELSON, Senator DURKIN, Senator DOLE, Senator LEAHY, Senator RANDOLPH, and Senator BROOKE.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HATHAWAY. Mr. President, several Senators would like to speak on this amendment, and I know the time is limited, so I will be brief.

This amendment does not represent a budget problem so far as the congressional budget is concerned. This is a program that has been of major benefit to farmers throughout the country, particularly in areas where they do not have any subsidy for the crops they grow—for in those areas it is the only major USDA program that benefits farmers.

The Senate bill cuts the appropriation that was made last year by more than 50 percent. That does not seem to me and my cosponsor to be warranted. The Senator from Missouri says there is no permanent enhancement as a result of the agriculture conservation programs. However, I ask unanimous consent to have printed in the RECORD a list of the programs that were carried out in 1977, all of which seemed to me to be of permanent value to the farmers.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

SUMMARY OF 1977 ACP PRACTICES (REGULAR AND LTA)

[Those practices considered to assist in water quality NPS pollution control]

		Farms	Extent	Amount
RE 1	Establishing permanent vegetative cover.	61,867	1,216,034	$23,412,883
RE 2	Improving permanent vegetative cover.	85,877	3,022,789	23,355,087
RE 3	Planting trees	4,883	33,134	1,313,936
RE 4	Improving stand of forest trees	2,625	44,288	942,855
RE 5	Water impoundment reservoirs	1,967	1,618,271	12,933,096
RE 6	Stripcropping	1,960	124,020	763,555
RE 7	Terrace construction	9,904	357,158	8,235,538
RE 8	Diversions	4,361	138,093	2,164,419
RE 9	Streambank stabilization	564	36,451	604,398
RE 11	Sediment retention, erosion, water control structures.	4,855	458,234	4,508,838
RE 12	Sediment chemical or water runoff control measures.	15,230	895,003	9,019,594
RE 13	Windbreaks or shelterbelts	8,540	177,536	1,765,938
RE 14	Reorganizing irrigation systems	16,404	1,403,003	22,972,159
SA 3	Increased acreage of vegetative cover (rotation).	2,324	79,438	729,560
SC 3	Contour plantings	2	148	1,269
SD 1	Interim cover	34,692	1,298,926	5,886,484
SE 1	Stubble mulching	787	65,f22	185,395
SE 2	Contour farming	165	10,116	42,196
SE 4	Mulching	75	2,837	25,170
SI	Animal waste storage and diversion facilities.	1,502	1,557	2,492,199

Agricultural Stabilization and Conservation Service (ASCS) 1977 agricultural conservation program (ACP)

1977 ACP cost-share payments and other payments and other important statistics (as of June 21, 1978):

Number of counties	3,056
Number of farms	328,422
Total cost-share this interim report	$164,385,376

Mr. HATHAWAY. Mr. President, this is a program that is carried out at the local level. It is carried out through county committees who set priorities and rule on applications. The farmers themselves make a contribution, known as "cost-share," of at least 50 percent. Each farmer is limited to $2,500 which he can receive. This amount, although not very much today, has been on the books at that level for about 20 years. Last year, it meant $1.9 million to nearly 2,500 Maine farmers. The Senate bill would cut this to $800,000.

We think that the program, since it does go down to the grassroots—if you will excuse the expression—is one of major benefit to the farmers throughout the country.

Mr. President, I yield to the Senator from Colorado.

Mr. HART. I thank the Senator from Maine for his initiative in raising this issue here today.

Mr. President, I have cosponsored the amendment to restore the agricultural conservation program to the fiscal year 1978 appropriation level to demonstrate my strong support for this long-standing and worthwhile program. The agricultural conservation program is well accepted by farmers across the Nation and is possibly the most popular of all the various Department of Agriculture conservation programs.

To cut this program back as far as has been proposed by the administration and

by the Appropriations Committee would cause irreparable harm to the conservation efforts of many farmers in the State of Colorado. Farmers do their planning as to how they are going to manage their land on a multiyear basis. If they cannot be assured that they will have some continuing assistance in their conservation program to help defray expenses, then many of them will undoubtedy decide to refrain from making a commitment and worthwhile conservation practices will not be initiated.

Mr. President, for a number of years, questions have been raised about the types of conservation practices that have been funded under the agricultural conservation program. A GAO report issued in 1977 indicated that a major portion of the funds expended through this program had been used for short-term, production-enhancement practices.

The distinguished floor manager, the Senator from Missouri, has indicated that studies have raised questions about the degree to which the funds being used in this program have been used for short-term production enhancement practices or whether for long-term so-called enduring practices.

I recently raised these questions with Agricultural Stabilization and Conservation Service personnel and with leaders in the agricultural community in Colorado, concerning the types of practices that the State and local agricultural stabilization and conservation service committees are involved in and how these funds are being used on a cost-sharing basis. Their assurances and a listing of the expenditures under this program for the first half of 1978 have reaffirmed what had been related to me by many farmers in Colorado: That agricultural conservation program funds are being spent to help farmers across the State initiate and perform enduring conservation practices. In fact, approximately 90 percent of the funds are being used on practices which have been determined to be of high priority.

Mr. President, for some reason, practices aimed at promoting the conservation of irrigation water seem to be questioned as to their appropriateness for funding this program.

Mr. President, the original conservationists were farmers. They were talking about practicing conservation a long time before any other organizations in this country were formed for that purpose.

In Colorado, a large portion of the funds expended under this program do go for cost sharing of practices that have proven to be effective in conserving irrigation water. These practices are worthy of public support and encouragement as recognized in the Food and Agriculture Act of 1977. Section 1501 of that act directed the Secretary of Agriculture, while formulating the agricultural conservation program as modified, to take into consideration seven factors, two of which identify water conservation efforts as being high priority. The criteria the Secretary is to take into consideration that relate to water conservation are the need to control erosion and sedimentation from agricultural land and to conserve the water resources on such land, and the need to facilitate sound resources management systems through soil and water conservation. The practices identified for cost sharing in Colorado clearly meet these criteria. Since water conservation practices do not in themselves enhance the productivity of land, farmers will continue to need encouragement and assistance in implementing them or needed water conservation practices will not be initiated and precious ground water resources will be depleted.

Mr. President, I encourage my colleagues to support this amendment. The agricultural conservation program is meeting the needs of farmers and the public, and should be adequately funded.

I think it is of highest priority not only in the State of Colorado but also across the agricultural community of this country.

Mr. President, I ask unanimous consent that a letter of July 31 directed to me from Mr. Charles Bishopp. State executive director of the Agricultural Stabilization and Conservation Service, with the attached documents to that letter, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COLORADO STATE ASCS OFFICE,
Denver, Colo., July 31, 1978.

Hon. GARY HART,
U.S. Senator, Dirksen Office Building, First Street and Constitution Avenue, Washington, D.C.

Attention: Mr. David Sprague

DEAR SENATOR HART: A breakdown of ACP practice funds for the first six months of the program year is enclosed.

You will note that approximately 90 percent of the funds are being spent on practices which are of high priority and improve water quality.

Sincerely,

CHARLES L. BISHOPP,
State Executive Director.

Enclosure.

Prevention of soil loss from water and wind erosion:	
SL1 Permanent Vegetative Cover Establishment	$123,338
SL2 Permanent Vegetative Cover Improvement	74,003
SL3 Stripcropping Systems	4,933
SL4 Terrace Systems	45,000
SL5 Diversions	12,334
SL6 Grazing Land Protection	296,010
SL7 Windbreak Restoration or Establishment	12,400
SL9 Conservation Tillage Systems	50,000
	618,018
Solutions to water conservation problems:	
WC1 Water Impoundment Reservoirs	124,500
WC2 Spreader Ditches or Dikes	13,000
WC3 Rangeland Moisture Conservation	12,500
WC4 Irrigation Water Conservation	1,356,800
	1,506,800
Solutions to water quality problems:	
WP1 Sediment Restoration Erosion, or Water Control Structures	50,000
WP2 Stream Protection	9,900
WP3 Sod Waterways	4,950
WP4 Animal Waste Control Facilities	12,400
WP5 Water Management Systems for Pollution Control	12,300
	89,550
Conservation of soil and water through forestry:	
FR1 Forest Tree Plantations and FR2 Forest Tree Stand Improvement	2,500
Conservation of wildlife habitat:	
WL1 Permanent Wildlife Habitat and WL2 Shallow Water Areas for Wildlife	9,900
Total high priority	2,226,768
Medium priority practices	239,989
Total approved	2,466,757

Mr. HART. I thank the Senator from Maine.

Mr. HATHAWAY. Mr. President, I ask unanimous consent to add Senator BAKER to the list of cosponsors.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HATHAWAY. I yield to the Senator from Iowa.

Mr. CLARK. Mr. President, how much time remains for the proponents of the amendment?

The ACTING PRESIDENT pro tempore. Thirty seconds remain for the proponents.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. HATHAWAY. I am happy to yield. If we can get some additional time I shall appreciate it.

Mr. EAGLETON. I yield 2 minutes to the Senator from Iowa off our side.

The ACTING PRESIDENT pro tempore. The Senator from Iowa.

Mr. CLARK. I thank the distinguished Senator from Missouri very much for yielding me time off the amendment to argue against his case.

Mr. President, I support this amendment to restore the agricultural conservation program—ACP—to last year's level of $190 million.

Basically, I believe the cuts proposed for the ACP program reflect the administration's failure to come to grips with soil conservation needs and develop a soil conservation strategy. I was shocked last winter when I saw the President's budget proposal for a cut in spending on soil conservation in fiscal year 1979 of more than $178 million. In fact, the proposed cuts went even deeper because they included drastic reductions in the number of soil conservation personnel that were greater, even, than the reductions proposed for the rest of the entire USDA.

Last February, I chaired a hearing in the Environment, Soil Conservation, and Forestry Subcommittee of the Senate Agriculture Committee on the administration's proposals for soil conservation. My purpose at that time was to try to gain some insight into their strategy for conservation and to find the reason for the proposed cuts. I was concerned that they were abandoning soil conservation as an objective—that in their preoccupation with budgets and budget cuts, they were cutting the lifeblood out of these essential programs.

These hearings brought out a real contrast between the needs for conservation programs and the administration's proposals for conservation efforts. Witnesses cited needs for soil conservation that are growing, and growing rapidly. We heard that our modern high-technology, single-crop agriculture with its intensive soil

use makes the soil more vulnerable than ever to topsoil loss. Very little farmland is idle, or in meadow or pasture if it is capable of being farmed intensely. We have more acres that are vulnerable to erosion damage than we have had at most periods in the past.

The administration, on the other hand, dealt at length on their commitment to sound soil conservation programs, and their intent to put soil conservation programs on sound footing. But, they stuck by their intent to cut dollars from the programs, and to cut people too. Frankly, I found their words inconsistent with their recommendation.

Basically, I think the committee has done a good job in restoring these programs. The committee has recommended approximately $115 million more than the President did for the three principal cost-sharing programs: ACP, the Great Plains conservation program, and the new rural clean water program.

My own disappointment comes only with the one proposal for an even greater cut in the ACP.

The committee has singled out the ACP program and has proposed to hold it down even more than the President proposed while restoring cuts in the other programs. The President proposed to cut from $190 to $100 million. The committee's proposal would take it to $85 million.

We held extensive hearings in the State of Iowa with regard to this program and our testimony, I think, was unanimous in the effectiveness of these particular programs.

The committee makes the standard argument—an argument made for years against ACP. It has two parts.

First, the argument goes, many of the practices funded under ACP are not sufficiently long term. We might get more for our money if these funds were spent a different way. The second part of that argument is the assertion that many of these practices would be undertaken by farmers anyway—even without a program.

The fact is that the decisions regarding which practices to fund under ACP are made by farmers—by elected farmer committeemen in each county. I know of no group in this country that cares more about soil conservation. They know a very great deal about soil conservation; they care about it, and I trust their judgment about it. When Iowa farmers select soil conservation practices on the basis that they help save the topsoil, then I believe them in their conviction that these practices are effective.

We look at such practices as establishing permanent vegetative cover; water impoundment reservoirs, and terrace construction. All of these things, it seems to me, fall in the area of long term kinds of soil conservation practices.

The second argument—that farmers would do many of these things anyway—strikes me as particularly ill timed. Farmers are in severe economic difficulty. Prices are down once again, and farm income still has not recovered much from the disastrous drops of 1976 and 1977. Soil conservation practices cost money—money farmers do not, in most cases, have to spend.

Farmers simply do not have the money to invest on their own in soil conservation practices even though they know these practices are valuable and important. The argument that the farmers would do so anyhow, is partly right—many farmers would do these things if they could. For the Government to bet that they can, just now, is a high-risk bet indeed.

In summary, Mr. President, I support this amendment to bring ACP funding back to the fiscal year 1978 level of $190 million—an increase of $105 million from the level proposed by the committee. That is the level proposed by the House. It is a level that barely covers the established need across the Nation. I can think of no purpose more worthy than soil conservation, and no expenditure more beneficial than support for soil conservation programs. I hope my colleagues in the Senate will join me in support of this amendment.

The ACTING PRESIDENT pro tempore. The time of the Senator has expired.

Mr. CLARK. I particularly thank the Senator from Missouri for his kindness in yielding me from his time.

Mr. EAGLETON. Mr. President, let me take this opportunity to reiterate the explanation of the action of the Appropriations Committee on the ACP program which was provided to my colleagues in a letter that Senator BELLMON and I addressed to them.

President Carter's budget proposed the consolidation of the Great Plains conservation program, the agricultural conservation program (ACP) and the newly authorized rural clean water program and provided a $100 million funding level for the combined program. In doing so, the President also proposed reforming ACP to bring it in line with language contained in the Food and Agriculture Act of 1977, which stated that ACP was to be utilized " * * * for carrying out enduring conservation and environmental enhancement measures."

In considering the fiscal year 1979 appropriation for ACP, the committee reviewed in detail the recent report by the Comptroller General on the program. That report clearly stated that the majority of the money authorized for ACP in recent years has not been used for measures oriented toward conserving our Nation's topsoil, but has instead been used for production-oriented practices. Such practices result in minimal soil conservation, and would probably be undertaken by farmers even without Federal assistance.

In fact, strike the word "probably"—would be undertaken by farmers even without Federal assistance.

Let me just quote a bit from that GAO report, because I think it is very revealing:

> The direction of the Agricultural Conservation Program has shifted in recent years to providing proportionately more funding for practices which, although eligible for program funding, have only temporary erosion control benefits or which are oriented more toward stimulating agricultural production and financially benefiting farmers than toward conserving the Nation's topsoil resources.

Another quote from that same report:

> ACP has not been as effective as it could have been in assisting farmers to carry out needed enduring soil and water conservation practices. In recent years, the program has been used more and more to finance production-oriented practices and other measures not essential for soil and water conservation. If greater progress is to be made in treating critical soil erosion areas under ACP, some redirection of program emphasis seems needed.

In light of this, as well as the language of the 1977 farm bill that I quoted earlier in a response to Senator STENNIS, the committee felt that it would be prudent to fund ACP at approximately the budget level and limit its use to enduring—that is the key word—enduring conservation practices as the administration had proposed.

It is important to note that the committee's recommendation differs from the budget substantially in the total amount of money provided for the three programs President Carter proposed to combine. The committee has recommended approximately a $115 million increase in cost-sharing payments to be made under ACP, the Great Plains conservation program, and the rural clean water program over the President's budget.

It is our firm belief that attempts to increase these cost-sharing payments any further will severely hamper our efforts to reform the ACP program and at the same time could place the Agriculture appropriations bill in jeopardy of being vetoed.

I urge your support of the committee's action on this matter, and the defeat of this amendment.

I could quote, Mr. President, from other reports as well, but I will stop talking about the substantive merits of the amendment. Just a few words, if I may, before yielding to my colleague, on what happens if the Hathaway amendment is agreed to.

I do not want to kid anybody in the Chamber or my colleagues when they come in to vote on this amendment. When this amendment passes, as I suspect it will, it means that this bill will be vetoed, Mr. President. The President and OMB are not threatening us on this. They have just as much stated they will.

I ask unanimous consent to have printed in the RECORD a letter dated July 31, 1978, from OMB Director James T. McIntyre, Jr.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., July 31, 1978.

Hon. WARREN G. MAGNUSON,
Chairman, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The House version of the Agriculture Appropriations bill contains excess funding for discretionary programs ($410 million above the budget) and legislative language provisions which are unacceptable to the Administration. The Senate subcommittee version of this bill had initially mitigated some of these most troublesome features, but the bill is now threatened with full committee amendments to drive its funding totals (for discretionary programs) above those provided by the House bill.

We urge the full committee to reject any amendments to add more funds to the bill and are especially opposed to an amendment to be offered to add $105 million to the subcommittee bill for the Agricultural Conservation Program (ACP). The ACP should be directed toward helping farmers solve critical national problems (such as non-point source pollution) and should not provide Government assistance in less critical areas of individual cropland improvement.

I ask the committee's support to reject the ACP amendment and any others to further increase the size of the Agriculture bill. These amendments are not justified in this period of inflationary spiral.

Sincerely,

JAMES T. MCINTYRE, Jr.,
Director.

Mr. EAGLETON. Here is what Mr. McIntyre says:

We urge the full committee to reject any amendments to add more funds to the bill

And then listen to this:

and are especially opposed to an amendment to be offered to add $105 million to the subcommittee bill for the Agricultural Conservation Program (ACP). The ACP should be directed toward helping farmers solve critical national problems (such as non-point source pollution) and should not provide Government assistance in less critical areas of individual cropland improvement.

This is the one amendment, the $105 million, that OMB specifically wrote to us and said that they specifically opposed. This, of course, is the one that will put the bill over the House figure. The House bill, when properly adjusted, is about $400 million over the President's budget.

When we brought the bill to the subcommittee we were only $175 million over the President's budget. Then the add-on process started. The subcommittee added about $50 million. The full committee added another $50 million. We had $20 million added last night in the Melcher amendment, and now $105 million more in the Hathaway amendment. So this makes the bill a likely candidate for a veto. That is the risk you have to take in this business. I am sorry that we will have to come back and do it again, but that is what is at risk in this matter.

I must say I am constantly bemused by the fiscal conservatives of this body who talk about spending constraints and the ravages of inflation engendered by a deficit-ridden budget, who vote rather easily for a little $20 million here, a little $100 million there, and a little $50 million here.

I really cannot quite understand that. I cannot understand the difference between talking fiscal conservatism and voting for a bloated budget. But I do not have to reconcile that in my mind. I guess they will have to reconcile it in theirs.

Mr. HATHAWAY. Mr. President, will the Senator from Missouri yield?

Mr. EAGLETON. I yield.

Mr. HATHAWAY. Is this not within the congressional budget? The Senator keeps talking about the President's budget, but this increase would still be within the congressional budget.

Mr. EAGLETON. I just gave the figure that when this amendment is adopted we will be about $400 million in this bill over the President's budget.

Mr. HATHAWAY. The President's budget.

Mr. EAGLETON. The President then will veto the bill.

Mr. HATHAWAY. Yes; but it is still within the congressional budget.

Mr. EAGLETON. But the President has a thing called a veto.

Mr. HATHAWAY. I understand that, but it is still within the congressional budget.

Mr. BELLMON. This bill, if I may say to the Senator from Maine, will not be within the congressional budget if this amendment is adopted and all the other amendments survive.

Mr. President, I ask unanimous consent that Jim Range, of Senator BAKER's staff, have floor privileges during the debate and votes on this bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BELLMON. Mr. President, I am opposed to the amendment to increase the appropriation for the agricultural conservation program by $105 million above the $85 million recommended by the Appropriations Committee. The committee action was based on the best estimate of what is currently spent on enduring conservation practices, and therefore, does not represent a decrease in the Federal commitment to assist agricultural producers installing needed measures to preserve our Nation's soil and water resources.

The agricultural conservation program, as it is currently administered, provides cost-sharing payments for a wide variety of practices. Unfortunately, while this program is of great benefit to ranchers and farmers who participate, it has never been really targeted toward those practices which are of maximum conservation value. As a consequence, many of the approved practices are primarily production oriented, and would be likely installed by the producer himself, even if no Federal assistance was available. ACP was established to provide an incentive for producers to undertake good conservation practices and it is vital to maintain this aspect if limited Federal resources are to have a significant impact on soil conservation in our Nation.

The committee has also recommended a total of $100 million for the new rural clean water cost sharing program to address nonpoint water pollution problems. This program will complement the efforts and resource funded through ACP.

The committee believes that the combination of these two programs, plus the Great Plains conservation program for which funding is also recommended, will not only maintain, but expand the Federal commitment to assisting agricultural producers in preserving the productive capacity of the land and to address water quality and other environmental concerns.

The committee's recommendations in the conservation area represent a significant increase over the President's budget estimate and the administration has specified this portion of the bill as of particular concern to the President insofar as whether he will sign or veto the measure.

I urge my colleagues to defeat this amendment.

I join the floor manager on the bill in opposition to the Hathaway amendment. This amendment is plainly popular with farmers. It is popular for the reason that it helps pay production costs they would otherwise have to pay out of their own pockets, and it is understandable why they like it.

I am a farmer and I have neighbors who use this program, and use it in ways that increase their production, and which they certainly would like to see continued.

But I think anyone who talks to farmers will soon find out they go right on doing those things even if this Government subsidy would be ended.

I would like to quote a little more liberally from the GAO report on this program than the floor manager did because I think this helps to put in focus exactly what this money is used for.

On page 41 of the GAO report they discuss the portion of the funds used for the application of lime and fertilizers to cropland, and they start off making the point that the application of lime and minerals to cropland primarily goes to improve production and, of course, that is where the farmers get their income and their profits, if any, from it. So, obviously, they like it.

They point out that in many cases State committees are refusing to approve the use of funds for this purpose because they also recognize that these are production practices which farmers should pay on their own.

The State committee determined that liming was primarily a production-oriented practice with only temporary benefits.

That is the reason why the subcommittee and the full committee approved the deletion of this money from the appropriations bill. We feel it is a production practice, one that farmers can and should pay, and that it has nothing to do with the conservation of the land, which is the primary reason for this item being in the budget.

Now, then, on the points raised by the Senator from Colorado relating to irrigation, a great deal of this money in some States is used for the improvement of irrigation systems. For instance, in the report on page 35 the GAO found that much of the financial assistance under ACP and the Great Plains conservation program has been directed toward helping farmers reorganize their cropland irrigation systems.

They go on to say that these expenditures help to pay for such things as installing underground pipe for sprinkler systems, for leveling land to provide more efficient use of irrigation water, for developing systems for irrigation water runoff, lining irrigation ditches to prevent the loss of water through seepage.

While these practices have some water conservation benefits, they say "Our review indicated that their greatest benefit was to increase farmers' monetary returns through time and labor saving and through increased productivity." Those are the things that farmers will do with their own money.

They went on to say that:

In one of our samples all nine farmers receiving ACP assistance said that they would have done this same work on their own if the

Federal assistance had not been available. In 1974 county officials discontinued cost-sharing projects involving installation of underground pipe from wells to fields because they believed farmers would and should install such pipe with their own resources.

The ACTING PRESIDENT pro tempore. The time of the opponents has expired.

Mr. EAGLETON. Mr. President, I yield 3 minutes to my colleague on the bill.

Mr. BELLMON. Mr. President, I do not require any more time.

The ACTING PRESIDENT pro tempore. Thirty seconds remain for the proponents.

Mr. EAGLETON. I have said all I have to say.

Mr. HATHAWAY. Mr. President, will the Senator yield for 5 seconds?

Mr. EAGLETON. I yield 2 minutes to my colleague on the bill.

Mr. HATHAWAY. I just want to point out that I have been informed, and I think reliably, that this is included in function 300 of the congressional budget. Perhaps if you add up all of the additions that have been made in other functional categories, it goes over the congressional budget. But so far as that functional category is concerned, this amendment would raise the ACP funding to a level that is still within the budget as set by Congress.

Mr. BELLMON. Mr. President, if I could respond, function 300 is all right, but in the allocation to the subcommittee it is $100 million over the congressional budget resolution.

Mr. EAGLETON. Mr. President, I yield myself 1 minute on the bill.

The ACTING PRESIDENT pro tempore. All time has expired.

Mr. EAGLETON. The Senator from Oklahoma is absolutely correct. We are over our subcommittee allocation, which is the relevant issue, not the functional target. This will put us well over $100 million over that allocation.

I conclude by saying one word: "Veto. V-e-t-o." That is what occurs when we adopt this amendment.

Mr. LEAHY. Mr. President, the Senate agriculture appropriations bill which is before us today is a sound, fiscally responsible piece of legislation for the most part. However, it is not without certain flaws. These flaws have developed due to a misalloction of funds within the bill. The priorities of funding in this legislation are skewed, that is, some of the most valuable, innovative and oldest programs ever to come out of USDA are not provided sufficient funding. These underfunded programs include title V of the Rural Development Act of 1972, the earmarked rural development activities of the Extension Service, the agricultural conservation program, and the Federal-State alternative agricultural marketing program.

Mr. President, title V activities are divided between the Cooperative State Research Service and the Extension Service. CSRS does the research and the Extension Service brings the benefits of this research to the people of rural and smaller urban America. Title V was developed to foster rural development. The need for a program of this nature is great. Communities of this Nation with populations under 50,000 people always lump near the bottom of social and economic indicators.

Title V was Government's response to their plight. Albeit, this response was minimal but at least it was something.

Something in which America's nonurban citizens could place hope. Now this hope has been removed. Mr. President, the bill before us provides absolutely no funding for title V. Title V's major benefits evolved from "capacity" building at the local level; offering smaller urban and rural Americans the chance to help themselves. Capacity building is not a benefit easily gaged. It cannot be quantified, graphed, or measured with precision. Consequently, it is very difficult for us in the Congress to be aware of the value of title V. Although I have seen no great graphs, regression analysis, or other bureaucratic playthings, I am convinced that this bill's nonfunding of title V is a grievous error.

I am convinced because I have seen the benefits of this program in action. I have seen it work within my State of Vermont; offering Vermonters the capability to develop indigenous economies. Title V funds have enabled Vermonters to form a stable, productive craft cooperative in the tradition of cottage industries.

I have also heard of the success of this program time and time again. I have heard this not only from those who administer title V, but also from the people in small town America whose lives have been bettered by it.

In May, I held hearings on rural development research within the USDA. Title V was continually lauded as the most flexible, effective and efficient means of fostering rural development. Now this is lost. And the saddest part is that there is nothing in the bill to replace it. Rural America loses again.

Rural America has also lost program funding which, much like title V, fostered development in smaller towns. I am speaking here of an earmarking of Smith-Lever funds to the Extension Service for rural development. These funds had many of the benefits offered by title V. But they had an added significance. By earmarking $1 million for rural development, Congress was telling the Nation that rural development is a priority item. The bill before us does not earmark funds for rural development. In this legislation Congress is saying to the Nation, in effect, that rural development is no longer considered a priority by this Congress. I am appalled at this lowering of rural development's status.

Mr. President, the agriculture appropriations bill has also severely cut funding for the agricultural conservation program and the Federal-State alternative marketing service. This is a mistake.

The agricultural conservation program is the oldest of all Federal agricultural programs. It was established in 1936 and since that time has aided farmers in the preservation of their livelihood. It is a flexible program stimulating financial commitment at the local level. However, this bill has slashed ACP's budget by nearly 60 percent. If it has been shown that ACP needs to be phased out, then so be it. But let us not do so drastically. A gradual phaseout, if one must occur at all, is much preferable over severe budgetary cuts.

Mr. President, the alternative agriculture marketing service is severely underfunded in this appropriations bill. This program provides farmers with viable alternative markets for their produce. Markets which are anti-inflationary while at the same time providing the farmer with greater economic parity for his yield. This program has lost out in the money shuffle.

Mr. President, alternatives have always been the strength of this Nation and its market forces. Now, we in Congress are saying that alternatives are no longer of much interest to us. Can we really justify what this budget cut tacitly implies—that we know most all of the answers? That our market mechanisms cannot be significantly improved upon? Of course not. But that is exactly what we are telling the world with this decrease in funding.

As I said at the outset, Mr. President, much of this bill is sound. However, it is flawed. I can only hope that our colleagues will attempt to address these flaws when they go to conference.

● Mr. DOLE. Mr. President, I support the distinguished Senators from Maine (Mr. HATHAWAY) and South Dakota (Mr. MCGOVERN) in their effort to restore the agricultural conservation program (ACP) to the current funding level.

Dating from 1936, the agricultural conservation program represents one of the earliest nationwide efforts at promoting sound conservation and erosion control practices on agricultural land. It is also the principal single channel of Federal soil and water conservation assistance.

ACP offers cost-share assistance each year to more than 300,000 farmers, ranchers, and other landowners to undertake needed conservation measures and practices. During its four decades of existence, the program has transformed the rural landscape, and prevented a recurrence of the Dust Bowl tragedy of the 1930's. ACP funds have built thousands of miles of terraces and thousands of acres of windbreaks and shelter belts. ACP funds have established long-lasting protective cover over thousands of acres of unstable soil, and has done much to enhance water quality by curbing surface runoff from farm fields.

In the early years, the program was funded at $500 million per year. In more recent years, the program has received about $200 million per year. The House appropriation bill for 1979 provides $190 million for ACP. The Senate bill provides only $85 million.

Judging from this decline in the program's funding level, one might assume that the job of soil and water conservation is nearly completed. Unfortunately, the need for erosion control measures is greater than ever.

On January 30, 1978, the Soil Conservation Service released the findings of a national study of soil erosion and sedimentation which concluded that our cropland is being lost at a rate of 9 tons of topsoil per acre per year—three times the rate at which new soil is generated.

This disquieting study reinforces the conclusions of two recent General Accounting Office reports which spell out the need for greater Federal efforts to curtail soil erosion in order to preserve agricultural productivity and improve water quality.

Mr. President, given the vital need to protect our agricultural resources, the Senator from Kansas can only conclude that this is not the time to gut the agricultural conservation program.●

The ACTING PRESIDENT pro tempore. All the time having expired, the question is on agreeing to the amendment of the Senator from Maine. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Texas (Mr. BENTSEN), the Senator from Delaware (Mr. BIDEN), the Senator from Mississippi (Mr. EASTLAND), the Senator from Alaska (Mr. GRAVEL), the Senator from Colorado (Mr. HASKELL), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Hawaii (Mr. INOUYE), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Washington (Mr. MAGNUSON), the Senator from Montana (Mr. MELCHER), the Senator from Ohio (Mr. METZENBAUM), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY), would vote "yea."

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from Pennsylvania (Mr. HEINZ), the Senator from New York (Mr. JAVITS), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

I further announced that, if present and voting, the Senator from New Mexico (Mr. DOMENICI) would vote "yea."

The result was announced—yeas 55, nays 26, as follows:

[Rollcall Vote No. 307 Leg.]

YEAS—55

Abourezk	Durkin	Nunn
Allen	Ford	Packwood
Anderson	Hart	Percy
Baker	Hatch	Randolph
Bartlett	Hatfield, Paul G.	Riegle
Bayh	Hathaway	Sarbanes
Bumpers	Hodges	Sasser

NOT VOTING—19

Bentsen	Humphrey	McClure
Biden	Inouye	Melcher
Domenici	Javits	Metzenbaum
Eastland	Johnston	Wallop
Gravel	Magnuson	Williams
Haskell	Mathias	
Heinz	Matsunaga	

So Mr. HATHAWAY's amendment (UP No. 3442) was agreed to.

Mr. HATHAWAY. I move to reconsider the vote by which the amendment was agreed to.

Mr. EAGLETON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. EAGLETON. Mr. President, I yield 4 minutes on the bill to the Senator from Alaska.

Mr. STEVENS. Mr. President, last evening, I offered an amendment that would have deleted money from the budget for the operation primarily of the Assistant Secretary level of the Department of Agriculture. At that time, I pointed out that the staff has increased by 55 percent in 18 months, and that the House committee made a finding in its report that one of the difficulties with the Department of Agriculture is that there stands between the Secretary and the old-line agencies such as the Forest Service, a new group of staff that has been brought in, so that the people in the old-line agencies no longer have access to either the Assistant Secretaries or to the Secretary himself. I am not too disappointed that the amendment was defeated because this matter will be considered in conference and I want to point out that the effect of my amendment would have been to cut the bill down to the House level.

As one who is going to be a conferee on this bill, I am hopeful that the Department of Agriculture will come in and try to convince both the House and Senate conferees that something will be done about the over-staffing at the policy level and the inattention to that section of the Department of Agriculture that has the experience and the expertise to deal with both the problems of the farmers and the problems relating to our national forests.

I am personally very disturbed about how difficult it is for a Member of the Congress to contact the Secretary of Agriculture on a matter of extreme importance to his State, without having his call returned by someone from this new staff group who seems to be shielding the Secretary from the policy level officers in his own department.

It seems to me that a Member of the Congress is entitled to a response from a Cabinet officer, especially if the Member is working on a problem of extreme urgency and he is placing the call on an emergency basis.

Having experienced this kind of treatment, I would hope other Members of the Senate will not try it and find that their calls, too, are being returned by the very person on this new staff operating between the Secretary and the other agencies within the Department, the person whose actions the Member is seeking to have curtailed by the Secretary himself.

Now, we have in the Department of Agriculture, in my opinion, an extreme environmentalist cadre that seems to be responsible to some equally extreme environmentalists in the White House.

They are not loyal to the Secretary. They are not loyal to the Department. They are not loyal to the agencies that Congress has entrusted to the supervision of the Cabinet officer we confirmed.

Instead, they come from the various organizations that have alined themselves in the past with programs aimed at attacking organizations like the Forest Service, and I think it is high time the Senate looked into this situation.

I would call to the attention of every Member of the Senate an article that was recently published entitled "The Environmentalists Come Out of the Cold." This article documents how well these people in subpolicy, nonconfirmation posts are being paid by the Federal Government to do exactly what they were doing before they came to work for these agencies as members of the Wilderness Society, the Sierra Club, Friends of the Earth, and other organizations; that is, to attacking the actions of the Forest Service and other land management agencies—but now they do it from within Government.

Madam President, let me close by stating again that I am going to be a member of this conference, and that I am going to try to defend the House version of this bill as far as it affects this increased staffing unless, and until, the Secretary of Agriculture determines just who is running the Department of Agriculture.

The PRESIDING OFFICER (Mrs. ALLEN). Who yields time?

Mr. LEAHY. Madam President, will the Senator from Missouri yield 5 minutes on the bill?

Mr. EAGLETON. I yield 5 minutes to the Senator from Vermont on the bill.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Madam President, I would like to take, first, a moment just to respond to what the Senator from Alaska said. I am sorry he has already left the floor.

But it has been my experience in calling the Secretary of Agriculture that he has either immediately answered the phone or, if he was out of the office, returned my phone calls.

I have a practice of very rarely having anybody else place a phone call for me. I usually place it myself.

I found it has been very easy to get hold of him, very easy to get him to return phone calls. I found him to be quite accessible.

In fact, he came and spent a couple of days in Vermont with me, went around everywhere, from breakfasts in farm kitchens to even attending one of the town meetings I hold in Vermont on a regular basis, answering questions from anybody who came in, no matter what their subject or what their affiliation was.

So I am sorry that the Senator from Alaska (Mr. STEVENS) has had this problem. I do know the problem we have sometimes with staff speaking to staff and not individuals speaking directly.

I recommend to him and others who have problems that they do the same thing I do and place their own phone calls. Maybe they would get through.

UP AMENDMENT NO. 1635

(Purpose: To prohibit funds to be made available to implement any regulation of the Department of Agriculture relating to the establishment of certain standards of thermal insulation)

Mr. CHILES. Madam President, I send an amendment to the desk on behalf of myself, Mr. STONE, and Mr. DECONCINI and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Florida (Mr. CHILES), for himself, Mr. STONE, and Mr. DECONCINI, proposes an unprinted amendment numbered 1635.

Mr. CHILES. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the bottom of page 53, add the following:

SEC. 611. None of the funds contained in this Act may be made available for the purpose of implementing Farmers Home Administration Instruction Numbered 424.1, effective July 1, 1978, relating to the establishment of new thermal insulation standards for concrete masonry construction or any other regulation prescribed by the Secretary of Agriculture relating to the establishment of comparable standards.

Mr. CHILES. Madam President, the amendment I have just called up provides that no funds appropriated under this act would be used for implementing new thermal insulation standards promulgated by the Farmers Home Administration for concrete masonry construction.

I am offering this amendment in response to a situation which has arisen with respect to the application of these standards in warm weather areas. These regulations involve insulation requirements for concrete masonry construction in Florida and other States lying in warm weather areas. The Farmers Home Administration is requiring U value (insulation) standards of .07 and .08 for opaque walls. While these values may be reasonable for many parts of the country, they are not appropriate for Florida and other warm weather States due to their unique climatic characteristics. The cost of meeting these standards would prove prohibitive and result in a suspension of concrete masonry construction for residences financed through the Farmers Home Administration. It is estimated the cost of insulating a concrete masonry wall to the .07 or .08 level is more than 10 times that incurred in meeting the present 0.16 standard.

As Florida is a cooling area, it makes better economic sense to provide such features as shading glass, attic ventilation and eave easement in a residence than to require these greatly increased insulation standards. I am certainly not suggesting that warm weather States should be exempted from insulation standards but only that these standards be practical and reasonable given the climate in which they will be applied.

It is important these regulations not go into effect at this time as they will only serve to significantly disrupt the homebuilding industry. This would particularly be the case if other Federal lending agencies follow the course of the Farmers Home Administration. I am confident that when this situation is examined and clearly understood it will be possible to develop standards that will meet necessary energy efficiency goals and be sensible for warm weather climates.

In fact, Madam President, the people at the Farmers Home Administration acknowledge that when they were adopting their standards, they were looking at the 46 or 47 States that use wood paneling and wood struts for setting wall insulation. They were thinking about that type of construction at the time they were proposing these standards, and they had not given adequate thought to those States—primarily Florida, Arizona, parts of Texas, and parts of California—which predominantly use concrete block and masonry in construction.

The effect of these standards would be to put this type of construction out of business, at the same time depriving people in our States of a home that could be built at a much lower cost. We simply do not need the same kind of insulation standards that are warranted in cold-weather States.

For those reasons, I move that the amendment be adopted at this time. It will give the Department time to work out a reasonable standard to apply to the warm-weather States.

Mr. EAGLETON. May I ask a question or two of the Senator from Florida, so that I can have a better comprehension of his problem in Florida?

Mr. CHILES. Yes.

Mr. EAGLETON. I take it that standards were published in the Federal Register about a year or 13 months ago.

Mr. CHILES. The standards went into effect July 1.

Mr. EAGLETON. But they were originally published about a year ago?

Mr. CHILES. They were published earlier, that is correct.

Mr. EAGLETON. Was there some kind of hearing after the standards were initially sent out for comment?

Mr. CHILES. I know that the people from Florida and Arizonia, in particular, went to the Farmers Home Administration and made the case that these standards were going to cause problems. I think Farmers Home Administration said, "Yes, and we'll work something out on that." I think it slipped through the cracks, which is basically what they tell us now.

Suddenly they are saying, "We recognize that you do have a unique situation, but we have already got a standard that went into effect July 1, so we do not know what we can do now to help the situation." They acknowledge that it will be a tremendous hardship on our States at this time.

Mr. EAGLETON. Do I correctly understand that the thrust of the Senator's amendment would be specifically to exempt masonry contractors from the standards that went into effect on July 1?

Mr. CHILES. Yes; in the warm-weather States. Primarily, it would apply to Florida, Arizona, parts of California, and parts of Texas, which use that particular kind of construction.

Mr. EAGLETON. Where does it say "warm-weather States"? As I read the amendment, it says, "None of the funds contained in this act"——

Mr. CHILES. Those are the only States that are using that type of construction in any great degree.

Mr. EAGLETON. Florida, Arizona, California and Texas are the warm-weather States involved. Are they the only ones using this kind of construction technique to any degree?

Mr. CHILES. That is correct.

Mr. EAGLETON. As I understand it, the standards that were promulgated and went into effect on July 1, were in response to a 300-percent increase in utility bills.

Mr. CHILES. Yes.

Mr. EAGLETON. And has there been a comparable economic impact even in the State of Florida in winter months.

Mr. CHILES. Not that problem in the winter months. When we are talking about an insulation standard, we primarily are talking about a summer insulation standard, because our concern is more with cooling than heating.

Mr. EAGLETON. Has the Senator had some conversations with the Department of Agriculture with respect to the problem he faces in Florida?

Mr. CHILES. Yes.

Mr. EAGLETON. Is there some way short of adoption of this amendment, which would appear as a rider to an appropriation bill, to modify the whole set of standards nationwide? Is there some way short of this amendment that we could get some satisfaction for the Senator from Florida, but without going as far and as broadly as this amendment, on an initial reading, appears to do?

Mr. CHILES. I know of no way at this time. We will have time between the time this is adopted and the bill goes to conference. Representatives of the Farmers Home Administration tell me they have had discussions with their counsel, and on the basis of those meetings, they see nothing that they can do to give us relief. They admit it is unfair to disrupt our industry but see no way to provide relief.

I think that if we could take this amendment to conference, by that time we would have some solution. I hope we would.

Mr. EAGLETON. I understand it a bit better now than I did before the Senator offered his amendment. I understand the dilemma he faces in Florida. I am not convinced that this is the best way to handle it. However, since this is about the only vehicle that the Senator from Florida can find in the near future that would pertain to Farmers Home Administration, I think that perhaps we could accept the amendment, take it to conference, and hope that some conversations and negotiations might go on between now and when the conference committee ultimately reports the bill.

Mr. CHILES. I hope so, and I hope they will find a solution for us.

Mr. EAGLETON. Madam President, I believe we can accept the amendment, with the understanding that there will be further discussion on this matter before the conference committee reports the bill.

Mr. CHILES. Madam President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1635) was agreed to.

Mr. EAGLETON. Madam President, I suggest the absence of a quorum, with the time charged to neither side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1636

(Purpose: Technical amendment to restore internal consistence of figures)

Mr. EAGLETON. Madam President, I have a technical corrective amendment that I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Missouri (Mr. EAGLETON) proposes unprinted amendment numbered 1636.

Mr. EAGLETON. Madam President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 13, line 10, strike out "$179,520,000" and insert in lieu thereof "$199,520,000".

Mr. EAGLETON. Madam President, this is in the nature of a housekeeping amendment. It is a necessary correction as a follow-on to the Melcher amendment of last night, and it conforms the bill in all regards.

I move the adoption of the amendment.

The PRESIDING OFFICER. Is all time yielded back?

Mr. EAGLETON. I yield back the remainder of my time.

Mr. BELLMON. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Missouri.

The amendment (UP No. 1636) was agreed to.

AMENDMENT NO. 3447

(Purpose: To prohibit use of funds under the Agricultural Trade Development and Assistance Act of 1954 from being used to finance assistance to Korea)

Mr. WEICKER. Madam President, I have an amendment at the desk and I ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk reads as follows:

The Senator from Connecticut (Mr. WEICKER) proposes an amendment numbered 3447:

On page 48, line 14, strike out the period and insert in lieu thereof a colon and the following: "*Provided*, That none of the funds appropriated or otherwise made available under this paragraph shall be obligated or expended to finance assistance to Korea. The Congress declares that the foregoing prohibition is a reaction to the lack of cooperation from South Korea with efforts to investigate alleged Korean influence-buying among Members of Congress and that such prohibition should not be construed as an attempt to interfere with or circumvent any right, privilege, or immunity provided for under the Vienna Convention on International Relations.".

Mr. WEICKER. Madam President, I ask unanimous consent that Mr. Tim Keeney, Mr. Peter Goldfarb, and Mr. William Knowlton of my staff be accorded the privilege of the floor during debate and votes on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Madam President, I ask unanimous consent that the transcripts of the hearings before the Senate Select Committee on Ethics, dated March 23 and April 10, 1978, be printed in their entirety in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HEARINGS BEFORE THE SELECT COMMITTEE ON ETHICS, U.S. SENATE

THURSDAY, MARCH 23, 1978

The committee met at 11:15 a.m., pursuant to notice, in room S-210, The Capitol, Hon. Adlai E. Stevenson III (chairman of the committee) presiding.

Present: Senators Stevenson, Morgan, Schmitt and Weicker.

Staff Present: Frank McNamara, Carol Harvey, Michael Epstein, George Hritz, Erica Ward, Larry Ellsworth, Robert Pender, Judith Schneider, Victor Kramer, Marie Mullis and Yvonne McCoy.

Senator WEICKER. Mr. Chairman, I don't know what the plans are, further plans of the special counsel as to the witnesses. But I would like to at this time request that in order to further our investigation of the matters as it relates to the involvement, possible involvement of United States Senators, that the following persons be called as witnesses by this committee, the format being immaterial whether an executive session or however: Dr. Henry Kissinger, Richard Kleindienst, Melvin Laird, Robert Maridan——

Senator MORGAN. Who is he?

Senator WEICKER. He was the Assistant GA under Mitchell specifically given the task of investigating aspects.

RICHARD PETERS. And then those Koreans: Kim Sang Keun, Heung Lee, Keun Pal Lee, Jai Shin Ryu and Kim Hyung Wook; and additionally, Mr. Lawrence Merthan and Mr. Richard Smizer.

Secondly, Mr. Chairman, the other day in the course of the questioning of the witnesses, this kuchel letter was brought forth as I think it related particularly to contributions alleged to have been made to Senator Tunney. I would like to ask counsel at this time, since that was used as a basis of questioning relative to Senator Tunney as to whether or not in addition to Senator Tunney all the other Senators mentioned in this correspondence, were queried on this matter. I was sort of under the impression that this letter, for whatever it was, was of dubious value until it was used as a basis for the questioning of the witness.

I will have to ask the question whether it is a dubious matter.

Mr. KRAMER. I think it is of dubious value. The answer to your previous question as to whether all the other Senators mentioned were queried, of course, all of them have answered questionnaires. Some of them have been queried and some haven't.

Senator WEICKER. There are five additional Senators on that letter.

Mr. KRAMER. Yes.

Senator MORGAN. Who were they?

Senator WEICKER. They are here in the letter. As I said, I pretty much put this out of my mind. If that is not the case, by virtue of the questioning that I heard, at least let's make certain that everything is in order. It would be rather embarrassing if somebody came up and said we understand Senator Tunney has been mentioned in this letter; we understand there are other Senators, you know.

Mr. KRAMER. You are right that we have to be as sure as we possibly can be.

Senator STEVENSON. On the first proposition, counsel, do you have any reaction to the Senator's suggestion?

Mr. KRAMER. I do, Senator, and I start out with some trepidation because I know Senator Weicker disagrees with me. I have taken from the beginning the position that it is not part of my duty as special counsel and I was not employed for the purpose of discovering whether or not the Executive Department or any person in it knew or had good reason to believe that Tongsun Park was a foreign agent attempting to carry favor and influence with Senators, but rather to find out if he succeeded and to what extent.

That covers the five names. It gives you my view as to the five names through Peters.

Senator WEICKER. I don't understand your comment.

Mr. KRAMER. What could you get from former Secretary Kissinger, former Attorney General Kleindienst, former Secretary Laird, former Attorney General Maridan, Richard Peters—and I should exclude him. I don't know him, don't know anything about him.

Senator MORGAN. Wasn't he Assistant Attorney General?

Senator WEICKER. No. He was embassy official.

Mr. KRAMER. What could you get out of them to determine whether or not the Senators had been influenced?

Senator WEICKER. Counsel, let me put it this way: We have been through one week of testimony by a man whose testimony I think is highly dubious. I don't know what credibility factor you want to assign to that testimony. I assign it a pretty low credibility factor. We are here to find out what went on. I don't think there is one of us that has sat through these hearings that feels this has been much of a help to anybody.

Now the question is as to whether you are satisfied to leave it there or you try to find other sources of information. I am not asking this committee to go ahead and investigate what it is the Executive Branch of Government knew. I don't care. I am not anxious to even go ahead and have this committee investigate as to whether or not Mr. Park was or was not a KCIA agent.

I am trying to find some sources of information that might be able to give a more credible response to the questions than the witness that we have had for the past week.

It is an established fact that the officials of government which I mentioned knew what was going on. I am no longer anxious to prove it. As far as I am concerned, it is a matter of fact. I am satisfied to my own knowledge relative to the communications that I have seen—the Fraser Committee has

done the job over in the House. That, to me, is a moot point.

What is not moot is the knowledge of those individuals as it relates to the United States Senate and the United States Congress.

Let me give you a good example. We know, for example—and it has not been investigated by this committee—we know I am going to make reference to a classified document here, Mr. Chairman.

Senator STEVENSON. We are secure, are we not?

Senator WEICKER. If we are secure, I am willing to go ahead and proceed.

Senator STEVENSON. Aren't we secure? We have all been through here, through this entire executive session. So I would hope so.

[Deleted]

[Deleted]

[Deleted]

What I am saying to you is that the record that has been established, counsel, in the sense of what knowledge was had by the individuals that I have mentioned, is one of obviously we should go further; *not in any way trying to go ahead and determine whether they did the right thing or the wrong thing, or not in any way trying to determine what the official capacity of Mr. Tongsun Park was; but simply to go to another potential source of knowledge and get the answers which are our responsibility on this committee.*

I again repeat, having been through a one-week exercise with a source that I don't consider half as good as any of the ones on this list, I think that is the least we should do if we are going to do a complete job. We sit here, I don't know what the plans are, as I said when I started off, as to the Korean defectors. There are at least three or four Koreans in this country that have some form of knowledge of what it is that we are engaged upon. They should be questioned by this committee.

The other names that are on the list, Smizer was the Chief of the East Asian Desk at the National Security Council to which this information went. He could very well go ahead and illumine our deliberations.

It might interest you to know as to the extent of coverup or whatever in this—I asked the question in the open hearing so this is not classified, in open hearing at the Appropriations Committee of the gal from NSC, as to what was in the minutes of the NSC from this period, during this period of roughly 1969 to 1976. Not one word. Not one word in the minutes of the NSC.

Now, look. If you are satisfied with this as being the basis of our deliberations, I am not and I won't accept it, either. I won't deny that. That, to me, is just not—to use the kindliest term—not complete investigation.

Senator SCHMITT. Would you yield?

Senator WEICKER. *So that is the reason why—I am afraid what you have done is to make certain suppositions of your own as to why these witnesses should be called. They are clearly not in line with the reasons that I have stated here before the committee.*

Senator SCHMITT. I think it is wise to remember that we have only recently started calling this effort an initial review in that it has been my understanding that the task of counsel some time around the first of May is to make recommendations on whether investigation, further investigation is required.

I think the comments you are making are very pertinent comments to that determination of the investigation on a case-by-case basis. I think it is also important to realize that the testimony of Mr. Park was somewhat unanticipated. It was desired but unanticipated and has interjected itself in a time frame which frankly I did not believe it would occur. I think it has been of value in that, first of all, it was something we would be expected to do and could not as a committee, I think, very well say, we are not interested in it, in reference to other things.

It has also, I think, added at least an understanding of the principle in this affair and an understanding as to what degree other information that we have may or may not be of value. So although he may not be the most, the best witness one could imagine, he, I think, is of value and I am certainly not sorry that we did it.

Senator WEICKER. We said that. I am just saying I wouldn't base your investigation on what you have heard. My request is not to issue a statement censoring Tongsun Park, it was a request to bring additional witnesses before this committee upon which we could go ahead.

Senator SCHMITT. I would interpret the request being only to move to another level of investigation, really, because I have not personally assumed that we were in an investigation in the sense, term of art sense, of the way we have been thinking in the past. That may be something we should do and on a case-by-case basis, and I am still awaiting recommendation of counsel on that and will be making my own inputs hopefully into that process.

I think there is one major thing we must consider before launching into an investigation on any particular case, and that is that no matter what we show, will we be able to show that Senators were aware of the the situation? If we cannot show that the Senators were aware of Park as an agent or the source of funds, other things, then we really have no case.

Senator WEICKER. I don't understand that comment. Again I have to repeat, I think some people have got some things planted in their minds which really have little to do with what I am trying to do here. I don't know whether he is an agent or whether he isn't. That is somebody else's business.

But do you also understand the other aspect of the situation? If indeed our Government knew what was going on and failed to inform United States Senators as to what the situation was, that is a pretty important piece to the puzzle as far as we are concerned in delivering a full report; very important.

Senator SCHMITT. Lowell, I am very concerned about that also. I am not sure it is our jurisdiction. That is what I think we have to determine.

Senator WEICKKER. What I am saying to you is if we are going to stand out there and try in some way to depict what it is the United States Senate did or didn't do, I think at least on the positive side on behalf of some of our colleagues that the people should know that they were led down the path in spite of the knowledge of the same government, if you will of which we are all a part. I am not trying to prove that point, but it is certainly something that has to come forth.

That is not the reason for my calling up these people here. What I am saying to you is I think they are as credible if not more, as witnesses in the sense of what they knew and who was involved than the man we just sat here a week with.

Look, if you assure me that this is all part of this investigation, let me say this right now, Jack: The technicalities of preliminary investigations, investigation, all the rest of it, I have been around this bush very frankly with both you and the chairmen when we first came up with the initial evidence before the committee. Look, we are on the spot. We are expected to do a job. Nobody is going to understand the various parts of that job out there. It has been started. Let's do it right; then let's finish it, call it whatever you want to.

Senator SCHMITT. Because we are on the spot you are right. We have to do it right. That is one reason why we get into the technical discussion.

Senator WEICKER. You explain the technicalities to the American people. I am afraid you are going to lose them.

Senator MORGAN. Counsel, did you have a comment on this request? I thought I saw you nod.

I don't have any particular observations, Mr. Chairman, except I think Senator Weicker has made a point in that we must look elsewhere to be sure, to make sure that we have explored all avenues to determine whether or not other Senators have been involved and if it is likely that there may be any of these people who may have knowledge, or may know of something, that we should know, and then we should explore it.

As a matter of interest, I am interested to know whether or not the Executive Branch had knowledge and did not disclose it. I think that is something that somebody somewhere ought to explore. Whether or not it is this committee's prerogative I don't know. But we ought to give some thought to trying to see if any of these gentlemen or any one of them might have had reason to know about any Member of the Senate accepting money for services.

I don't know that we can make the decision from the list itself. We may have to analyze each one of them and see what his position is and confer with Senator Weicker or someone as to why this man might have knowledge.

Senator STEVENSON. Before I call on the special counsel let me just make two points: First, so far as I know, no one has suggested leaving the initial review there, or here, at this point. The committee is authorized to make an initial review. That is what we are conducting. Already there are two more executive sessions scheduled by the committee of which we will receive additional testimony.

Yesterday, Senator Schmitt and I chaired all day long such a hearing; or almost all of it. We were the only Senators present. This initial review is not by any means finished. I just don't think we should leave the record with such an impression.

Secondly, the question of knowledge in the Intelligence Community and the performance together with the possible KCIA and CIA links to Park is being investigated by the Senate Intelligence Committee and has been investigated by that committee for many months now. It is my impression that that investigation is well along, farther along than the investigation of the Subcommittee of the Committee on Foreign Relations that has been publicized recently, Representative Frazer's subcommittee.

One possibility which is more than a possibility, it is already happening, has been cooperation between the Ethics Committee and the Intelligence Committee for the purposes of conducting an investigation through this committee into the conduct of Senators and through the other committee, an investigation into the conduct of the Executive Branch, and with the view to exchanging such information as each requires which is relevant to the inquiry or investigation of the other.

That process is taking place, and offhand—I am not, I just don't know why it can't continue to take place, and I see so many reasons why it should continue; namely, that committee having already done much of the work and accumulated much of the materials, is way ahead of this committee and it has access to information in ways which are much easier for it than for us.

Finally, both of these committees are shortly going to be in a position, I believe, to make initial reports or in the case of this one, a report on the basis of an initial review which presumably will enable these committees then to determine what further action is indicated, including the possibility of public hearings.

We have to, under our rules, complete an initial review and make a confidential report to ourselves at which time the full committee decides what comes next. I believe that the Intelligence Committee is also planning in the very near future to issue an initial review on the matter to which Senator Weicker has alluded.

With that, more as a informational presentation than expression of opinion on my part, let me recognize the special counsel.

Mr. KRAMER. I wanted to continue with the list of witnesses. The Koreans mentioned there, five in number, it should be understood that the House has interviewed several of them and interviewed them on the record and that record is available to us and we may well reinterview them, but we doubt—we don't want to offer much hope. This is not true of all of these Koreans, but some of them.

In addition, Mr. Wook has testified publicly and privately several times that those records are available and so far we haven't gotten anything important on our inquiry that we don't know about.

Finally, I agree we must talk with Merthan; probably, although I am less enthusiastic, Smizer.

I think that I have nothing more to say, unless I am to launch into a broad-scale discussion of the whole inquiry which doesn't seem appropriate. I guess—should I remind the Senators who the witnesses are for the next two days?

Senator STEVENSON. I think that would be good.

Senator WEICKER. I am anxious to hear that. That is important. But just so this is not left in the air, Mr. Chairman, I move that the individuals that I previously named be called before this committee as witnesses in the matter that this committee is investigating at the present time.

Senator SCHMITT. You mean prior to the counsel's report on the initial review up to this time?

Senator WEICKER. That is correct.

Senator MORGAN. Let me make a motion, if it is in order, with regard to that; that the action, that the motion before the committee be postponed until after the recess and at that time I would hope that the committee, the staff would have a résumé, a general outline of where we have been and where we are going.

Senator STEVENSON. If the Senator would yield, I don't want to oppose this motion. I think we should. In my mind, it is largely a question of timing. It is a question of how to conduct the most orderly and effective investigation and, the case of certain of these witnesses, who should do it; whether it is this committee or the Intelligence Committee.

So I would hope that the Senator would contemplate also that during this period, if his motion prevails, that there would also be consultations between the Ethics and the Intelligence Committees to decide who is going to do it. Certainly, we don't want to, I presume, bring them before both committees to ask the same questions. We might consider some thing joint. I just don't know. But I think there is plainly the potential for a conflict in jurisdiction that ought to be worked out somehow.

Senator MORGAN. I would contemplate such conferences of liaison with the Intelligence Committee and I would hope that when we come back, as soon thereafter as feasible, that we have some recommendations as to how to proceed.

Senator WEICKER. I was very specific in my motion to move that these persons be brought as witnesses before this committee, to give testimony as to the matter before this committee, specifically the involvement of the United States Senate, Senators—past, present, whatever—in the Korean influence-peddling scheme. That is what I want them called for.

I don't want them called for as to whether Tongsun Park was or wasn't a KCIA agent or whether or not the Executive Branch of Government was doing its job. I want them called specifically so that they can give testimony, whatever testimony they have, as it relates to the matter which we can investigating.

I am perfectly willing, as long as the motion passes, to make obviously, subject to the scheduling of this committee, whether it is reinvestigation, whether it is previous witnesses, et cetera—that is out of my hands—as long as the motion is accepted, you know, what you do with the motion, that is in the administration of the committee itself. It is in the hands of the chairman and the counsel. But on the mater of their being called—I don't want to kid around on that—yet I think they should be called before this committee if indeed our investigation is to be completed.

Senator MORGAN. Mr. Chairman, the question of which committee or what committees they will be called before is a question I think should be worked out. I don't think there is any way that you could question them, either one of those witnesses, before this committee probably without involving the questions before the Inteligence Committee.

I would hope that if it would necessitate a joint meeting of the committees that we do that. I would make this clear for the committee's benefit right now, that in the final analysis I will vote to call any person before this committee as a witness that any Member of the Senate, any member of this committee feels is necessary to our full inquiry, unless there should come a time in the distant future—which I don't foresee—that I feel like we are going completely on a fishing expedition.

But basically. I feel if a member of this committee, if a Member of the United States Senate, feels that any witness has light to shed in the final analysis, I will vote to call him. But my only reason for the motion now is to let us get a better perspective of where we have been and where we are going and also give some time to consider the question of joint hearings.

Senator SCHMITT. Mr. Chairman, I would hope that in the list of witnesses proposed by Senator Weicker that we could have—that counsel would have time to look at that list to be able to tell us, as Senator Morgan suggested, what would be the area of questioning that he would perceive as well as for each individual Senator to be able to tell us that they would perceive being fruitful for these witnesses.

I don't deny that it is a good list and I think we should at some point consider talking to them. But I really think that for an orderly conduct of our affairs counsel should have some time to think in terms of whether—of the timing of talking to those witnesses—whether we have the information now that we can best utilize their testimony or whether that would come after his recommendations are made.

Senator WEICKER. No portion of my motion indicates at what time the witnesses ought to be called up. It is merely a motion to go ahead and have these persons to appear before our committee, to go ahead and give testimony. That is, obviously, to be worked out within the convenience of the schedule of the Senators and the staff. But the motion stays out there on the table as to calling these particular individuals.

Let me say this: As you can tell—because you happened to glance at the whole list I gave you—it couldn't even be termed a fishing expedition, Bob, if I asked for every one of the names on this list, because candidly, they all do touch upon Park and the situation. I have boiled this thing down, believe me, to men who have direct knowledge on the basis of what I have seen in the various files of this matter.

Senator MORGAN. I don't question that.

Senator WEICKER. That is why it is as narrow as it is, and even whittled down. So I reiterate my motion, Mr. Chairman.

Senator STEVENSON. Do you have objection to the suggestion of Senator Morgan that we try to work out something with the Intelligence Committee and hear from staff, act on your motion when we get back?

Senator WEICKER. I have no objection, number one, to something being worked out with the Intelligence Committee with the understanding that if the Intelligence Committee says we have no desire to interview them, it is still incumbent upon this committee to interview them. We will, obviously, try to cooperate. There might be some further information desired by the Intelligence Committee. But I want this committee, as a matter of record, to have a commitment to call these persons as witnesses.

Senator STEVENSON. Counsel?

Mr. KRAMER. Senator, I am beginning to get a grasp of your point, and I may not have before. I would like to put words in your mouth and see if I have got your point right.

If, by chance, every one of these witnesses knew nothing, nevertheless, you would have wanted to have done it to be sure that you have covered their testimony?

Senator WEICKER. Absolutely not. The reason why I want these people to appear is I have sufficent evidence already that they did know.

Senator MORGAN. Even if they had——

Mr. KRAMER. About contributions, Senator?

Senator WEICKER. That is right, yes, absolutely; of the lobbying scheme.

[Deleted]

[Deleted]

Senator STEVENSON. Name some names.

Senator WEICKER. The ones I have seen, trying to think of Senators?

Senator STEVENSON. Yes.

Senator WEICKER. There might be a couple. But all I am saying to you is that the record is both general and specific. All right that general and specific record was within the kin of the highest officials in the government, and obviously we have to know if they knew that, what else did they know? It is a logical question. If they didn't know anything, that would be sufficient.

Just to pull out Attorneys General, in other words, NSC heads, whatever have you, that happened to be in office during that time of history, that is a fishing expedition. We are talking about something very specific that I assume was in their knowledge. I know it was in their knowledge.

That being the case I ask the second question. What else did they know?

Senator MORGAN. Succinctly, I would support Lowell in his efforts to examine this area. My only question is, I would like to see us wait until we come back to say are we going to call them before this committee or a joint meeting of the Senate Intelligence Committee. I don't believe that Senator Weicker's motion would be hurt and I would say to him here and now that in the final analysis I will vote that these witnesses be before this committee. It may be, I would say joint hearings.

Senator STEVENSON. I think the list may not be completed.

Senator WEICKER. Look. I am sure, counsel is going to tell us the witneses he wants. I am not trying to give you a complete list. I am trying to make a contribution to it. I will tell you why Mr. Chairman.

You say why press the point? Unfortunately, my efforts which I think are as valid as these being conducted by counsel for the committee as valid as these being conducted

by the chairman and others on the committee, very frankly have been more than a little harassed during the course of this investigation. Now I am making the point, in a formal way, just so it sits there on the record and it is followed up on.

Otherwise—Bob, you have been very supportive—I want to make that point very, very clear that I am not willing to let this to chance, to judgments of either counsel or other members. If the motion is voted down, fine. But go ahead and vote it down. I want to be on the record to have what I feel is necessary to have a complete investigation.

Senator STEVENSON. Do you have a substitute?

Senator MORGAN. I had one. But I see no reason why we shouldn't go on and vote on his motion. It may be that if we have a joint committee meeting I think it would still suffice and meet the requirements of his motion.

Senator STEVENSON. Let me see if I can phrase a possible substitute or modification, that this committee, in cooperation with the Intelligence Committee, obtained the testimony of all the persons mentioned by Senator Weicker and such additional persons as the committee shall determine for the purpose of determining to what extent, if any, they have knowledge of unethical conduct in the Senate occasioned by Korean nationals.

Senator SCHMITT. Mr. Chairman, I would like to have you leave the "and"—and in addition, as Senator Weicker mentioned and I think all of us have, their testimony, obtaining their testimony as to whether the Senate was informed or could have been informed of the Korean lobbying scheme in time to avoid any improper conduct.

Senator STEVENSON. I accept that modification. I intended to include that and to make it broader, not only their knowledge of unethical conduct but of activities of the Korean nationals to influence Members of the Senate. That seems to me—do you have any objection to that ?

Senator WEICKER. I have no objection to that motion; absolutely not.

Senator STEVENSON. If there is no objection, that will be agreed to. We will get to work right away with the Intelligence Committee to see how best to accomplish this objective of this committee and cooperatively the objectives of the Intelligence Committee, which are related. Maybe this can be done in one hearing.

Mr. EPSTEIN. We hope so.

Senator SCHMITT. Mr. Chairman. I am sorry that Senator Weicker feels that he has been harassed. I think that the effort of the committee has, up until now, been a very professional one. I hope it will continue that way. That has certainly been my intent in any activities I have undertaken as a member of this committee, as vice chairman. I hope that with this present situation that with the motion now that has been passed, that we will see all members cooperating directly with each other on this activity.

If there has been any problem, it has been due largely to, I think, lack of communication. I hope that that is done with.

Senator STEVENSON. I share those sentiments, too. I would like to be the only member who feels harassed.

Is there any further business? If not, the committee is adjourned.

(Whereupon, at 12:05 p.m., the committee recessed, to be reconvened subject to the call of the chair.)

APRIL 10, 1978 TRANSCRIPT—SELECT COMMITTEE ON ETHICS

Senator Weicker?

Senator WEICKER. Mr. Chairman, I think at this time it might be wise to have a progress report on the motion I made or that was made jointly with the chairman at the last meeting and a discussion thereof. Do we have that motion in front of us here?

Mr. KRAMER. Yes.

Senator STEVENSON. I would be glad to give the committee status report to the best of my ability.

Pursuant to the order that was entered, which called for a cooperative effort between this committee and the Intelligence Committee, for the purpose of taking the testimony of certain individuals named in the order, Senator Schmitt and counsel met with counsel for the Intelligence Committee and several members of the Intelligence Committee. We had quite a number of discussions of the subject.

And the feeling on both sides, staff and members, as far as I am aware, was that the predominant jurisdiction was in the Intelligence Committee, and that that committee, having already begun many months ago an investigation of the subject, should continue. And the feeling, the consensus was further that to the extent the investigation of the Intelligence Committee involved matters within the jurisdiction of this committee, that the Intelligence Committee could handle or raise any questions that needed to be answered or asked by this committee.

So there is no agreement, but the consensus, as I understand it, between the two committees is that the Intelligence Committee should go ahead and call these witnesses with the exception of certain witnesses who may have information of value to this committee, not the Intelligence Committee. They would then be called by this committee. And that any subjects within the jurisdiction of this committee would be covered by the Intelligence Committee. And arrangements to carry out that understanding are I believe being worked out now between the staffs of the two committees.

Do you have anything to add, Senator?

Senator SCHMITT. Only as I recall, Mr. Chairman, I was unable to be at the specific meeting. Just so the record is clear. Although I concur with the decision made. We discussed it before and after, and I have talked with Senator Goldwater.

Senator STEVENSON. If you will yield, I think the specific meeting you are referring to was a meeting of members of the Intelligence Committee to consider the policy of the Intelligence Committee and the effect and the precedent any other arrangement would establish for that committee.

That meeting was held in Senator Goldwater's office, with Senator Morgan and myself present. I can mention the other Senators, those that I am aware of, that have been consulted. I think they include Senator Hathaway, who is next ranking on the majority side on the Intelligence Committee to me. They do not include the chairman of that committee, Senator Bayh. They do include Senator Morgan as I indicated. I believe Senator Pearson serves on both committees, and Senator Schmitt. And the staff.

Senator WEICKER. Mr. Chairman, as I read the statement, the motion was presented by the chairman at the previous meeting, and I am now just dropping down—let me just read the whole thing.

Let me see if I can maybe phrase the possible substitute. ". . . the cooperative of the Intelligence Committee to obtain the testimony of all the persons mentioned by Senator Weicker and such additional persons as the committee shall determine for the purpose of determining to what extent, if any, they have knowledge of unethical conduct in the Senate occasioned by Korean nationals."

The information sought by me clearly falls within the jurisdiction of this committee.

Point number two——

Senator PEARSON. Pardon me. We don't have enough to do anything formally, do we?

Senator STEVENSON. We do have a quorum, with your presence.

Senator PEARSON. Okay.

Senator WEICKER. Let me continue, if I might. That is their business to get to the meeting, not mine.

[Deleted]

Now, Mr. Chairman, so much for my precise comments as to your analysis of what went on. Generally speaking, I think it was very clear that I did everything I could to attempt to reconcile different points of view at the last meeting. I tried to accommodate my motion and the thrust of my motion to both the convenience of the committee and of its staff and whatever else might have enhanced my request.

I will put it very bluntly. I think I got sand-bagged by the chairman of the committee and the vice chairman.

Senator SCHMITT. Senator, I would not——

Senator WEICKER. I will say what I want and you can say what you want.

Senator SCHMITT. I just didn't want to be left out.

Senator WEICKER. You are not left out.

I repeat my request as I initially made it. And at this time I am afraid it is without modification, which modification was only intended to go ahead and defeat the initial request, as I now interpret what the chairman has done.

[Deleted]

And I don't see how unethical conduct in the Senate occasioned by Korean nationals is anything but within the purview of the work of this committee. And if it is, I would like you to explain it to me.

And I am not interested in comments of either the chairman or counsel, well, you know, the business of whether or not the Executive Branch informed us in time. This is within the purview of the Intelligence Committee. I would admit that it is. I said at the time I was merely interested in that information enjoyed by the Executive Branch which pertained to our investigation.

Senator SCHMITT. Senator, if the chairman would yield, I feel that within the jurisdiction of both the Select Committee on Ethics and the Intelligence Committee there exists adequate capability to investigate all aspects of the matter concerning the Senator from Connecticut as well as the rest of the committee, that we do have sufficient cross-fertilization between the two committees so that we can oversee each other's work as that appears to be necessary; and I also have a great deal of confidence in our counsel and the ability of counsel and staff to gather information that is being obtained through other means, including the activities of the House.

Counsel is proceeding to call some of the witnesses and interview some of the witnesses that are mentioned in the Senator's comments at the last meeting. I personally, with a critical eye, at this time don't have any reason to second-guess counsel or to second-guess the jurisdictional division between two committees. I think we are going to get all the relevant information. If we find after some time that we are not, then I will be the first to suggest alternative means of gathering information. I don't think we have exhausted them.

Senator WEICKER. Senator, what you think really doesn't interest me, nor does it influence the conduct of the job which I am elected to go ahead and do.

Senator SCHMITT. I gather that.

Senator WEICKER. As I repeat, each of us is on the committee to give our own effort, not anybody else's effort. It was only in that regard that I made the motion. And I think it is a perfectly logical one and a very narrow one.

Now you have seen fit to go ahead and dilute that to the point where it is not effective. If my position on the committee is not going to be effective, the investigation committee is not going to be effective in the sense of what I propose is going to be cast

aside, then let's have it cast on the table. I think that seriously questions my being on the committee at all, which is fair enough.

But what I am not going to do is put my name on a committee and accept either the work product of others or the opinions of others or the actions of others which are intended to go ahead and dilute whatever contribution I make.

Senator SCHMITT. Before the Senator takes any——

Senator WEICKER. I don't know how anybody can be clearer than that motion is, Senator.

Senator SCHMITT. I would hope we would see what the final product or the draft product of what the work of this committee turns out to be.

Senator WEICKER. I have no doubt that counsel and the assistants he has are doing a good job or an adequate job. I am not criticizing them. I merely ask for assistance on something I proposed as being another avenue toward obtaining the facts which we were charged with obtaining.

Senator SCHMITT. I think we are going to obtain those facts.

Senator WEICKER. That is not good enough. A motion was made in this committee. That is why I wanted it in motion form.

Senator SCHMITT. I will move to reconsider the motion.

Senator WEICKER. Go right ahead. Go ahead and do it legal.

Senator SCHMITT. I think we are acting perfectly properly within the context of the committee's jurisdiction and the motion.

Senator WEICKER. Senator, make your motion to reconsider and then modify the original motion. I would be delighted to have that on the record.

Senator PEARSON. Let me ask a question. Did the motion raise a pure jurisdictional question and was it resolved on a pure jurisdictional question? Is that what we are really talking about?

Senator WEICKER. When I initially made the proposition to the committee, the point was raised that we would run into difficulty because in effect what I was looking for was an explanation as to why the Intelligence Community and the law enforcement agencies hadn't acted upon the information when they received it early in the 1970s.

I specifically explained—look, it is all in here. I specifically explained to the committee that no, I was not interested, and that is an editorial comment on my part which I have been known to say publicly in the past, but I wasn't interested in that. I was only interested in that information which pertained to our investigation—the names, the places, the information that was within the den of those agencies.

And Senator Stevenson's motion is absolutely correct the way it is stated. It couldn't be clearer, more concise. It doesn't say shall determine, in other words, whether the law enforcement or intelligence agencies were doing their job. It says determine for the purpose of determining to what extent, if any, they have knowledge of unethical conduct in the Senate occasioned by Korean nationals.

That is solely why we wanted them before us. Now we are told this is not for some reason within the jurisdiction of this committee.

Senator STEVENSON. Would counsel like to be heard on this matter?

Mr. KRAMER. No.

Senator PEARSON. I don't think I have an answer to my question. If you did give me an answer, I didn't understand it. We are talking about a jurisdictional thing?

Senator STEVENSON. I think so.

Senator PEARSON. At least that is the way the chairman and vice chairman looked at it when they had this. This is a pure jurisdictional thing.

Senator STEVENSON. Let me try to answer it.

Senator WEICKER. That is the way they view it.

Senator PEARSON. You don't.

Senator WEICKER. How can I? And it is proof of what I am saying.

[Deleted]

[Deleted]

If at anytime, in other words, a member of another committee comes up, regardless if it is this investigation or not, we plead jurisdictional differences, how are we ever going to do our job among the colleagues? We are talking about unethical conduct of our colleagues, period; that is all.

Senator STEVENSON. If you will let me try to explain once again the contrary position, and with great regret that the Senator feels I have sand-bagged him, and with a strong feeling of responsibility, too, because this whole subject might never have arisen had it not been for an action which I took at the outset for the purpose of making certain not only that this committee did its duty but also that the Intelligence Committee did its duty.

It was the chairman of this committee who arranged with the Intelligence Committee to take advantage of Tongsun Park's presence before this committee in order to further the investigation before the Intelligence Committee. That is where this whole situation began. And the Intelligence Committee cooperated fully, made staff available, made its records available.

I believe the principal beneficiary of that cooperation was the Senator from Connecticut. He used it well; he used it effectively and to the benefit of I believe both committees.

Now the situation has changed. It is no longer Tongsun Park.

It is now the case of the Intelligence Committee, the continuation of its investigation into the performance of the Intelligence Community during the time in question.

This committee, as the Senator has pointed out, is interested in possible misconduct in the Senate, not the performance of the Intelligence Community. We could, I suppose, call these witnesses before both committees.

I believe that staff has some feeling—I can call on staff, however reluctant they may be—that certain of the witnesses have nothing to testify to of value to this committee, or may not have, or the other committee. Certain of these individuals have already been called to testify before the committees of the Congress, and the record of their testimony may be made available to this committee.

There is no intention on the part of anyone with whom I have discussed the matter to neglect any aspect of either of the investigations. On the contrary, the purpose is to conduct both and to do both thoroughly.

But in the change of the circumstances, the consensus not just of myself, the consensus of all the members of both committees with whom I have discussed the matter, with the exception of the Senator from Connecticut, is that now the investigation is predominantly an investigation of the performance of the Intelligence Community and that, as a part of that investigation, witnesses can be asked—they would be asked in any event—what they knew about these activities and what they knew of any misconduct in the Senate.

Any questions along those lines within the jurisdiction of this committee that need to be asked can be asked. If the Senators want to prepare questions, they can be asked through the Intelligence Committee, just as this committee has been interrogating the witness on behalf of the others.

Senator PEARSON. We are not going to do anything until the other members get here this afternoon. I am sorry to interrupt.

Senator STEVENSON. I am sorry to be so long-winded.

Senator PEARSON. Off the record.

[Discussion off the record.]

Senator STEVENSON. I was going to suggest if Senator Weicker has a problem with his consensus, that instead of acting here, I don't believe that a motion to reconsider is necessary because I believe that what has been done is within the intention of the motion that was agreed to last time. Motion or no motion, what is important is that both of these investigations get on and that the integrity of both the committees, including the Intelligence Committee, be maintained. And because the Intelligence Committee feels strongly about it, you might want to ask to meet with the Intelligence Commitee. That is where I think the strongest feelings are.

It can't be resolved without the Intelligence Committee, which is why I spoke of my modifications, of the cooperation——

Senator WEICKER. Am I to understand, Mr. Chairman, we cannot call the persons that I indicated in my motion without the approval of the Intelligence Committee before this committee?

Senator STEVENSON. You could call them, but I personally would be very reluctant to call them just to ask questions which can't be answered without getting into the jurisdiction of that committee, with a strong impression that we already know what they knew.

Senator WEICKER. I don't believe as a matter of fact in my list of witnesses that I even requested that a member of the Intelligence Committee appear before us, with the exception of possibly Schmizer of the NSC. Mr. Henry Kissinger, Mr. Richard Kleindienst, Melvin Laird, Robert Mardian, Schmizer—and Schmizer worked for NSC and is not a member of the CIA.

Senator STEVENSON. Well, the Intelligence Committee includes more than the CIA. It includes, for example, the Justice Department.

Senator WEICKER. That is now within the purview of the Intelligence Committee solely?

Senator STEVENSON. Yes; counterespionage.

Senator WEICKER. Well, I am perfectly willing—let me put it this way. There is really little point in my serving on this committee, Mr. Chairman, since the obvious pre-occupation with judisdictional matters, and whatever else might go along with it, makes it impossible for me to go ahead and conduct perfectly pertinent inquiries to this matter that we have before us.

I don't intend any more to have clearly stated what I believe needs to be done only to either have it thrown in the wastepaper basket or have it shunted aside in a parliamentary maneuver. I am sorry it has to be that way, but I was under the impression we were here to do a hard-nosed job and get all the facts. I am sure the people investigating it are doing just that. As far as I am concerned, that is these six members and whatever staff is concerned. It does not include the investigation conducted in the opinion of either the chairman or vice chairman.

I have no further comments to make.

Senator SCHMITT. Senator, I think the record should show that this committee is dedicated—I am certainly and I believe the chairman is and other members—to a hard-nosed investigation, to use the Senator's words. I think the counsel we have is a hard-nosed counsel. I think the staff is hard-nosed. I think the Intelligence Committee in their areas of jurisdiction will be and has been hard-nosed.

I think when the final report is written it will be as complete a report as possible into the knowledge of the individuals concerned that we can get to.

Senator WEICKER. How can it be if you refuse to call the witnesses that are necessary?

Senator SCHMITT. The Senate is not refusing to call those witnesses.

Senator WEICKER. It is the responsibility of the Intelligence Committee to inquire of Dr. Kissinger whether or not he has knowledge of Senators who received money?

Senator SCHMITT. I think it very definitely is.

Senator WEICKER. Then it is impossible—and I know I am supposed to accept the word of a committee that they are on. We had one man voluntarily get off this committee for the very reasons you are defending that other persons can serve on other committees.

Senator SCHMITT. No, sir.

Senator WEICKER. John Tower at least had the guts and decency, and there was a lot of political fall-out due to what he did, to stand up here and say, "Look, my name is connected, and I am withdrawing."

Senator SCHMITT. Senator, for the purpose of the record, there was a great deal of material that came to light in various ways, made available to this committee and to its counsel.

In the judgment of counsel, concurred in by the committee, some of that information was deemed not only unsubstantiated but immaterial and that our investigation has proceeded on the basis of counsel's recommendation on what Senators and other individuals may have had either some involvement or some light to shed on the involvement of the Senate as a whole.

I think that that job has been done well. Senator Tower was one of the individuals who was felt to have significant information pertinent to the investigation and under those circumstances I think he felt and I felt and all felt it was appropriate that he not participate beyond a certain point in this activity.

Other individuals whose names may have appeared on the list of various kinds, without any investigation of substantiation, that was involved—in fact, all indications to the contrary—were not called and are not considered subject to this investigation.

Senator WEICKER. By whose determination?

Senator SCHMITT. By counsel's determination, concurred in by this committee.

Senator WEICKER. Concurred in by certain individuals on the committee.

Senator SCHMITT. Senator, certainly at the time we were making those decisions you had every opportunity to raise an objection.

Senator WEICKER. May I say to the vice chairman, we are supposed to be in the process of an investigation.

Senator SCHMITT. That is right.

Senator WEICKER. I have not arrived at any conclusions one way or the other as to the investigation that has been done.

Senator SCHMITT. But at a certain point in the investigation one may make decisions as to how one looks at it.

Senator WEICKER. Has counsel arrived at his conclusion? Can he write his report right now?

Mr. KRAMER. No, sir.

Senator WEICKER. Counsel has answered the question. And I might add, he did properly so, if it is a proper investigation. If it is a geared investigation or a cover-up, that is something else again.

I thank you very much, I have enough faith and integrity in counsel, I know it is not that.

Senator SCHMITT. Are you accusing the vice chairman of some attempt to cover up?

Senator WEICKER. I am accusing the vice chairman and chairman of making it impossible for a member of this committee, for this Senator, to conduct the investigation. Apparently the vice chairman has arrived at certain conclusions already on his own. I have not arrived at conclusions and can't arrive at any until I have the facts.

Senator SCHMITT. I have a right to a conclusion on the basis of recommendation of counsel, that the focus of our investigation has been along certain lines. I approve of those lines.

Other individuals who by circumstances or by some other reason may have had their names appear in connection with this inquiry have been looked at. Information has been looked at. At this time there is no indication there is any reason for further investigation. At some point we have to make those kinds of decisions.

Senator WEICKER. Then there is no point in people serving on this committee. Go by whatever your conclusions are and that is it. That is fine for you, not for me.

Senator STEVENSON. Senator, if you feel strongly that the investigation of this committee or other committees or your own efforts are being frustrated, shouldn't you present your arguments to the members of both committees? I don't want to act as intermediary or to be a party to any arrangement which dissatisfies any Senator, if that is possible.

Senator WEICKER. Mr. Chairman, I have no obligation to present my views to the Agriculture Committee or Public Works Committee or Intelligence Committee. I feel it obviously incumbent on me to present my views to my own committee, which is exactly what I am doing.

I have been told exactly as to what it is that is going to be investigated, what it is that is not going to be investigated, and how I am to go about my investigation. I find those conditions intolerable. I think it is an academic point at this time.

Senator SCHMITT. Just so the record is clear, no one has told you exactly how this is going to be done. There has been a certain process by which the inquiry has been conducted. That process has at this time focused on certain particular cases, to use that term, and that is the way we are proceeding. There is additional information which is required, and everybody has agreed to that.

The question as I see it is how is the Senate best able to acquire the information necessary so that both the responsibilities of the Ethics Committee and the Intelligence Committee can be properly discharged?

I think we are going about it in the right way. It is open, within the context that we can be open. The Senator makes his inputs. I think he is going to find all the information he desires will eventually become available. The question is, what is the best mechanism by which we can gather that information with the least damage to the individuals involved?

Senator WEICKER. The best way is between the people involved and myself, and not through you as a conduit or anyone else. It was a request that was made obviously to them. I understand that to be the case. It is as simple as that.

I don't intend to go ahead and talk about it any further. Very frankly, Mr. Chairman, neither do I intend to participate in the investigation effort.

Senator STEVENSON. Is there any further questions or discussion? We are due to come back at 1:30. The next witness will be present at 1:30.

Mr. KRAMER. Yes, sir.

Senator STEVENSON. Do we know the attendance of Senators at the meeting?

Mr. KRAMER. I don't, Senator.

Senator STEVENSON. Senator Weicker, I think you should——

Senator WEICKER. I do not intend to participate any further in the investigation. I will so inform the minority leader this afternoon.

Senator STEVENSON. I regret your decision.

Senator SCHMITT. As I also regret the decision. I think the Senator provides a very valuable service and has and could continue to do so in this committee.

Mr. WEICKER. Madam President, the thrust of this amendment is to try and bring back into focus what has been to date a shamefully inadequate investigation of the Korean influence peddling scandal by the Senate Ethics Committee and which has been a shamefully inadequate piece of cooperation insofar as the Government of South Korea is concerned.

Unfortunately we were given a job to do, both the House of Representatives and the Senate, on a matter that related to the possible improper conduct of Members of those two respective bodies.

I can assure you as a former member of the Senate Ethics Committee, as an observer of what has gone on over on the House side, and as a party to discussions between this branch and the executive branch of government, that nowhere near the thoroughness and intensity of investigation that was demanded by these circumstances was applied in the instance of the Korean influence peddling scandal, certainly nowhere near the thoroughness and the intensity of a previous investigation of the executive branch of government undertaken by this branch and more particularly by this body in 1973.

Why this amendment on Public Law 480 funds? And it is a proper vehicle with which to insist on cooperation by the Government of South Korea?

I think it must be clear to everyone that that cooperation has been nowhere of the same quantity or quality that the cooperation of this country has provided to the Government of South Korea over the years: $13 billion since 1946 in military assistance, $13 billion, only second to our commitment to Vietnam, and billions more insofar as food is concerned to that nation. I think that merited some form of cooperation.

We know now that far from a situation of mutual trust and of assistance the Government of South Korea was in the process of bribing officials of this Nation even while the people of this country, the taxpayers of this Nation were giving of their generosity to the Government of South Korea. That is bad enough and that alone would warrant a complete review of our relationship.

In any event, when the fact was discovered, then it seems to me that the least that was owed was total unrestricted, unqualified support and assistance in the investigation.

That has not been forthcoming and not just by my evaluation, but by the evaluations of persons in the executive branch of Government, later on the House side, later on the Senate side, indeed, by that same Senate Ethics Committee which in its report of May 22, 1978, said:

> A number of leads must yet be followed before the inquiry can be considered complete. For example, there is the on going investigation into charges that the former Korean Ambassador to the United States, Kim Dong Jo, and possibly other Korean officials or agents, made payments to some Members of Congress (though not necessarily to Senators) or their families. Efforts to obtain access to these officials has thus far proved fruitless. The Korean Government has not agreed to permit the Committee to interview these officials on a face-to-face basis, quite apart from granting permission to examine them under oath. Thus, the inquiry to date, while substantial, is not yet complete.

There are those who will say that the recent accession to written interrogatories is proof of such cooperation, and there is not one lawyer, including the

special prosecutor over on the House side, Leon Jaworski, who would agree with that proposition.

I will tell you what kinds of words you hear when you get written interrogatories without the opportunity of cross-examination.

I have here the written interrogatories of the Select Committee on Government Operations of Richard Nixon, back in 1976. In interrogatory after interrogatory there are the words "I do not recall," "I do not recall," "Apart from that incident, I do not recall," "Except to the extent indicated, I do not recall."

Written interrogatories are worthless. So I want to anticipate the argument that will be used here on the floor that indeed we are getting cooperation. We have not gotten cooperation except for the limited appearance of Tongsun Park, and I will get to that in a minute. Any steps which have been forthcoming have been under the most extreme duress, and I can assure you the Government of South Korea hopes the whole matter is going to blow over and go away.

The difficulty with that, my colleagues, is that, No. 1, it strains our credibility as the appropriate body to investigate ourselves; and, No. 2, it invites such similar incursions into the integrity of this body in the future.

The history of the matter demands that we act, and in the toughest possible way. I realize this is no longer a popular subject in Washington, D.C., especially because it touches upon so many people. It is not one U.S. Senator or one U.S. Congressman. It involves both political parties, Democrat and Republican; it involves the national campaign committees of both political parties; it involves some of the better known political legends of our time; it involves the executive branch of Government as well as the Congress, so ever since this matter started there has been the attempt to get it out of the way just as soon as possible and with as little trouble or as little noise as possible.

I hope here today that at least the Senate will show it has the courage to insist upon the fullest possible type of an investigation.

I said at the outset that the Senate investigation was shamefully inadequate, and it was. To read from the same report, the report of May 22, 1978, let me read a statement, two paragraphs there, which are outright lies:

> Special Counsel determined at the outset to attempt to avoid broadening the inquiry beyond that necessary to accomplish the purposes for which he was retained. It was especially important to work as swiftly as thoroughness allowed because of the cloud hanging over the Senate formed as a result of continually reiterated allegations and rumors in the press that widespread corruption in the Congress had occurred as a result of the activities of Tongsun Parak and other Koreans.
>
> Special Counsel opposed a suggestion that the Committee include in its work an inquiry to determine to what extent, if any, high-ranking officials of the Executive Branch had knowledge in the early 1970s of the activities of the Korean Central Intelligence Agency and Tongsun Park to influence the Senate by improper means and, if so, whether those officials had failed to warn the Congress. The basis for Special Counsel's position was that the Senate Code of Ethics prohibited Senators from being improperly influenced or bribed whether or not they were warned of any plans to do so. He argued that there are not two standards of ethical conduct for Senators: one for those who have been warned and one for those who have not. Ultimately, the Commitee decided to leave this proposed aspect of the inquiry to the Senate Intelligence Committee, which had already been working on it for a number of months.

I have already had printed in the RECORD verbatim the transcripts of March 23 and April 10, and it is absolutely clear in those transcripts that the only purpose for calling a group of witnesses, both Korean and U.S. Government officials, was to find out what knowledge they had relative to the Korean influence peddling scheme as it related to U.S. Senators. That was the basis of the request, and that is not the truth in the report printed by the committee.

Let us talk about that request. We had just gotten through 1 week's interrogation of Tongsun Park. Is there anyone here who believes that he told anything other than that which we already knew by our investigations, as it related to agencies of the U.S. Government? There was nothing new that came forth during the course of that week. Talk about blowing smoke, believe me, that happend insofar as Tongsun Park and that committee were concerned.

I thought it essential that there be some form of other evidence, corroborative or otherwise, from sources which had within their knowledge the very same information that Mr. Park had but which was subject to our legal and judicial processes.

It was for that reason that I submitted a list of witnesses which included Dr. Kissinger, Richard Kleindienst, Melvin Laird, Robert Mardian, Richard Peters, Kim Sang Keun, Heung Lee, Keun Pal Lee, Jai Shin Ryu, Kim Hyung Wook, and Lawrence Merthan and Richard Smizer.

The committee agreed to a motion which I made to call those witnesses, first of all opposing the motion, and then realizing, when I was going to press it to a vote, they did not want to be on record as to not having witnesses called before our committee, and so agreed to the motion, with the one stipulation that we work in cooperation with the Senate Intelligence Committee.

The motion was passed on March 23, but it was not until April 10, 1978 that I realized that the matter had been disposed of. There could be no calling of these witnesses before the Senate Ethics Committee; rather the matter was disposed of by referring it to the Senate Intelligence Committee, which had at least four members on it who had allegations of impropriety lodged against them.

So there was no opportunity for either examination or cross examination of that group of witnesses even though the Ethics Committee had voted to do so.

We come to the business of this amendment. Nobody can say we have gotten the type of cooperation we deserve as a nation from our ally. Written interrogatories are not a substitute for direct and cross-examination under oath. The special prosecutor, Mr. Jaworski, himself made that very, very clear within the last several days:

> Q: You tried vehemently to get [South Korean ambassador] Kim Dong Jo's testimony. Why? What did you hope to learn?
>
> A: I did not think that he had an involvement this this matter. And in the public hearings I produced some evidence to the effect that he had been active in trying to reach some congressmen. The imponderables are [that] I don't know whether he actually succeeded in delivering funds to these congressmen, and I don't know whether they retained it. The congressmen, under what is equivalent to an oath, have all denied to me, in writing, any such involvement.
>
> Now I wanted to know from him precisely what he had done, but I wanted it in credible form. I did not want . . .
>
> Q: Which means sworn—which means sworn.
>
> A: Yes.
>
> Q: Now, [ethics committee chairman John] Flynt has just said that in fact Kim's going to be in a position of answering committee questions, although he won't be under oath, apparently. Is that sufficient in your mind?
>
> A: Of course it isn't sufficient. . . .

I will say it here, it is not sufficient. It was difficult enough dealing in front of the committee with that slime that kept on running through everybody's fingers called Tongsun Park. Never mind about written interrogatories.

The PRESIDING OFFICER. The Senator's 15 minutes have expired.

Mr. WEICKER. I ask for 2 minutes on the bill.

Mr. BELLMON. I yield 2 minutes.

The PRESIDING OFFICER. The Senator is recognized for 2 minutes.

Mr. WEICKER. That is the reason, Madam President, I ask my colleagues now to join in the type of action which makes it clear that this body, and, to at least the extent it represents the Government of the United States, will tolerate nothing short of the whole truth.

The American public and this body do not have the whole truth as to the Korean influence peddling scandal yet. I think the issue of credibilty in our Government is probably the dominant issue of these times, whether it is regarded on this floor, in the press, in the editorials, or anywhere else.

I ask that the Senate accept my amendment, and I would hope that I would be able to respond to whatever the arguments are against it. I will obviously have to ask for time on the bill, which I can assure Senators will not be great in length.

Mr. BELLMON. Madam President, I ask unanimous consent that the time I yielded to the Senator from Connecticut be charged against the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BELLMON. Does the Senator from Illinois wish to be recognized?

The PRESIDING OFFICER. Is the Senator from Illinois managing the time in opposition?

Mr. STEVENSON. No; I was going to ask if the distinguished Senator from Oklahoma would yield me 5 minutes on the amendment.

Mr. BELLMON. I am happy to yield 5 minutes on the amendment to the Senator from Illinois.

Mr. STEVENSON. I thank the Senator for yielding.

Madam President, my purpose in asking for this opportunity is not to respond to these accusations, except to say that in time the investigation into activities of the Republic of Korea in Congress will be completed, and at that time it would be appropriate to judge the thoroughness and the integrity of the investigation. The investigation is not now concluded, and such a judgment is premature.

Moreover, a judgment by one who is no longer a member of the Ethics Committee and never was a member of the Intelligence Committe is, on its face, not entitled to much credibility. My good friend the Senator from Connecticut is not familiar with these investigations. The investigations by the Ethics Committee is not completed, and for both those reasons, I suggest to the Senate that his words are unjustified.

I do rise, Madam President, to say a few words about the Senator's amendment and to urge the Senate to defeat this amendment resoundingly, in order that we can complete our investigation and offer to the American public the truth about the activities of the Republic of Korea in Congress. This amendment, if approved, would have the reserve effect, and that judgment is made obvious by recent history.

Our efforts to obtain the cooperation of the Republic of Korea for the purpose of access to Kim Dong Jo and to other nationals of that country has gone on now for more than 6 months. Those activities have involved myself and the vice chairman of the Senate Ethics Committee; they have involved the distinguished majority and minority leaders; they have involved the State Department; and they have also involved the National Security Council. Last week these lengthy negotiations with the Republic of Korea finally produced an agreement.

At this point, a cutoff of Public Law 480 funds would have no positive effect on our efforts to obtain Korean cooperation. It could undo the arrangement now approved by both Congressional Ethics Committees for Korean cooperation.

It may not be coincidental that this arrangement, which contains a concession and change of position by the Koreans, followed the Appropriations Committee's inclusion of Public Law 480 funds for the Republic of Korea.

During that long period of negotiation with the Koreans, we were not surprised to find that every threat of reprisal, every threatening act, every measure taken by the House, including the House disapproval of Public Law 480 funds for Korea, has been followed by a stiffening of Korean resistance.

I say we were not surprised because the reasons are obvious. That which a nation might do voluntarily is made the more difficult by threats, and when pride and sovereignty are on the line. We are mistaken, as Americans, to act and think as if ours was the only Nation in the world with pride.

It would be better to set a process of cooperation in motion than one of continued confrontation and reprisal. Cooperation can produce favorable results.

Mr. EAGLETON. Madam President, will the Senator yield for a moment?

Mr. STEVENSON. Yes.

Mr. EAGLETON. I ask for the yeas and nays on the Weicker amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENSON. Madam President, a token aid cutoff, and that is all this is——

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. EAGLETON. I yield the Senator from Illinois 2 additional minutes.

Mr. STEVENSON. Madam President, a token aid cutoff, and that is all this is, just a token, punishes the American economy, thwarts the investigation and causes speculation in the world that such perversity is the product of an ulterior design to which the national interest has been subordinated.

The Senate would be taking a more productive approach if it makes a gesture of cooperation to follow that of the Government of the Republic of Korea.

As to the arrangement between the Ethics Committees of Congress and the Republic of Korea, it provides that Mr. Doug Jo, will respond in writing to written questions and carries with it the assurances of the Korean Government that it will do all it can to assure substantive responses. Follow up questions are contemplated.

Madam President, this is not an ideal process for questioning Mr. Kim. We had sought face to face communication. But it may be the best we can get. And for now, at this point, it is acceptable. The Korean Government is assuring substantive responses. It understands that anything less will invite congressional expressions of displeasure. The Korean Government knows we will have ways to determine how complete and forthcoming the responses are.

The PRESIDING OFFICER. The Senator's 2 additional minutes have expired.

Mr. EAGLETON. Madam President, I yield the Senator 2 additional minutes.

Mr. STEVENSON. I thank the Senator. All the talk about sworn testimony in Congress was never related to the requirements of a serious investigation Testimony by a foreign national under an unenforceable oath is of little evidentiary value. Besides, the United States, exposed as it is to the world, would prudently encourage compliance with the Vienna Convention, and not its violation.

So, for the sake of a thorough investigation, I support the Appropriations Committee's recommendation that Public Law 480 funds for the Republic of Korea be included in this bill. Another threat, this one to follow Korean cooperation, would only invite noncooperation. If the arrangement with the Koreans fails, we will know it, and there will be time enough for reprisal, with far less to lose than now.

Madam President, this amendment should be defeated. If that process of cooperation is to move ahead, which alone can produce all of the information and evidence that this investigation requires, this amendment will be defeated resoundingly. Whether it goes forward or stops is up to the Senate. Later, if a gesture of cooperation and good will by the Senate is not reciprocated, we will have time enough. We will have an opportunity to express our displeasure. The approval of this amendment would make it impossible for these committees, the Ethics Committees of both Houses, to conduct a thorough investigation.

Its defeat will make such an investigation possible.

The resounding defeat by the Senate will make it probable.

I thank the Senator.

Mr. EAGLETON. Madam President, I yield 3 minutes to the distinguished Senator from Kansas.

Mr. DOLE. Madam President, I listened carefully to the distinguished Senator from Illinois and I agree with much of what he said.

I certainly understand the frustration and the concern of the distinguished Senator from Connecticut (Mr. WEICKER) with reference to the so-called Korean investigation.

It has been suggested that there be more cooperation rather than less, based upon how this amendment is treated. I assume it can be said that while some of us who raise commodities that may end up in Korea have a selfish interest in not supporting this amendment, I think there is a very fine line and a very difficult choice to make. Certainly, the Senator from Connecticut has a very lofty goal, and that is to find out the facts.

There has not been, in the minds of many, the same scrutiny, the same concern, the same attitude by the media as we had in another recent investigation.

It seems to this Senator that by adopting the Weicker amendment we could, in effect, have an adverse impact on any incentive for greater cooperation.

I do not believe the stakes are high enough to compel or coerce the Korean Government into greater cooperation. We are talking about $56 million worth of title I shipments during fiscal year 1979. These shipments are not a gift. They must be paid for with interest by the Republic of Korea. The amendment could have the opposite effect from that which the Senator intended. It may result in less cooperation by the Korean Government

I am inclined to agree with the distinguished Senator from Illinois, that maybe we ought to see what comes. There is still time for a lot of action by the Congress, by the Senate, and by the Senator from Connecticut. I might very well find myself supporting the Senator from Connecticut, whether it is Public Law 480 or whether it is some other aid or trade with the Republic of Korea.

For the reasons stated, it just seems to me that Korea is one of our best customers. They continue to favor American grain, even though they are usually offered better prices by the Canadians and Australians. Because of the trust and good will we have developed there, it seems to me that we not only jeopardize the $56 million, but we jeopardize

about $1 billion annually in agricultural exports to the Republic of Korea in regular commercial transactions.

Having said that, I would repeat that it is not just for that, what some might consider a selfish interest, coming from a farm State. That may be part of it. But beyond that it is my hope that by not taking this action suggested by the concerned Senator that we will encourage more cooperation by the Republic of Korea and the officials there.

I appreciate the Senator from Missouri yielding.

Mr. EAGLETON. Madam President, I yield 6 minutes to the Senator from Connecticut.

Mr. WEICKER. I thank the distinguished Senator from Missouri. This will be my final comment on the matter.

The Senator from Illinois keeps referring to that which a nation can do voluntarily, of their own volition, so far as cooperation is concerned. We are talking to the national equivalent of a felon. There is no argument over the fact that the Government of South Korea bribed the Government of the United States. Nobody is arguing that point.

With that fact having been established, you do not go ahead and say, "Now, will you please give me your cooperation in the suit against you?"

Indeed, the investigations against any one of the Members of this body or the House are a further indictment of the Government of South Korea. The only way to produce the evidence is to hang on and squeeze.

The Vienna Convention was mentioned. Specifically, it is excepted in this amendment. May I point out that the Vienna Convention does not forbid testimony. It merely does not oblige the giving of testimony.

To respond to the distinguished Senator from Kansas, this does not cut off $56 million of commodities to be purchased in this country. It means that $56 million is not going to go to the Government of South Korea, but it can go anywhere else.

When this investigation started I introduced a similar motion within the committee. At that time the Senator from Illinois asked that the consideration of that amendment be postponed. Indeed, weeks went by until again consideration of such action did come up in the committee because the Government of South Korea was not cooperating. Then all of a sudden because of the pressures brought by the Justice Department, the Tongsun Park arrangement was arrived at. Now he wants to follow again the lead of the Government of South Korea.

You know as well as I do, Madam President, from having watched it, just as long as it drags out, everybody sitting around here and in the executive branch and in the Government of South Korea are hoping it is going to go away.

"It has gone on too long; it is going to go away."

The Senator from Illinois asked for a resounding defeat.

If members resoundly defeat this amendment, believe me, it adds to what so far has been a resounding cover up.

Witnesses not called before the committee, pressures not brought on the Government of South Korea—the story goes on and on in what I said at the outset was a shamefully inadequate investigation shamefully inadequate cooperation by the Government of South Korea. But at least it lies within each one of us to demand that the whole truth be put on the table.

When the Senator from Kansas says that the price is too high, let us say that this meant that $56 million was not going to go into the pockets of Americans; let us say that there was some retribution by the Government of South Korea. How do Members think they will get the truth? The easy way? By sitting there and asking the nation that just bribed ours to give it to us on a silver platter?

Obviously, there is a price to be paid, a price to be paid in the sense of our hard-nosed investigations, letting the chips fall where they may; a price to be paid monetarily if they want to go ahead and engage in some sort of economic retribution. But then what are the priorities in this Nation? Nobody believes this Senate; nobody believes the House or the President. I suggest of all the issues confronting us, this is the most important because until that belief exists no program can move forward.

Trust is the most important ingredient in a prospering United States; and certainly, no trust has been engendered by the actions of the Congress in the matter of the Korean influence-peddling scandal.

So I ask that it be resoundingly passed as one element of a no-holds-barred investigation and as a condemnation of what went on in the past and a statement that we will not allow it in the future.

The PRESIDING OFFICER (Mr. ANDERSON). All time has expired.

Mr. EAGLETON. Does the Senator need additional time?

Mr. WEICKER. No, I thank the Senator.

Mr. STEVENSON. Will the Senator yield me some time?

Mr. EAGLETON. I yield off the bill 1 minute to the Senator from Illinois and, following him, the Senator from New Mexico.

Mr. STEVENSON. Mr. President, if the distinguished Senator from Connecticut knew anything about these investigations, he would not make such silly charges; and if he has any evidence of bribery in the U.S. Senate by Kim Dong Jo or anybody else, he ought to turn it over to the Justice Department and the appropriate committees of the Congress.

Mr. SCHMITT. Mr. President, I have spent a great deal of my first 18 months of my Senate career—many, many hours each week, much time each day—as part of the inquiry into the allegations of improper influence on the U.S. Senate by agents for the Republic of South Korea. The counsel, the special counsel, and his staff that we engaged for this effort have done an outstanding job. There has been no coverup, there will be no coverup of the information that has been gathered during that investigation, as far-reaching as it has been.

The investigation is unique, maybe, because it has not been carried on in the glare of television cameras and the glare of headlines, because it is the belief of the Senator from New Mexico and, I believe, the belief of the Senator from Illinois, that that is not the way to get to the facts. We have gotten to the facts, we are getting there. It is not just the testimony of Kim Dong Jo that is important. It has been the testimony in the search for facts over the last year that is important.

As an additional adjunct to that investigation, the questioning of Kim Dong Jo will be very important, but it is not absolutely the only thing that is important to the investigation. I think it will occur that we will get information that will, if nothing else, confirm things we already know. But to take this action with the amendment of the Senator from Connecticut, to fly in the face of an agreement that has taken many, many months to reach with the Republic of South Korea for the testimony of Kim Dong Jo, I think would be a terrible mistake for the Senate to make.

As the Senator from Illinois has said, we have other opportunities to act in reprisal against the Republic of South Korea if that is necessary or becomes necessary. I do not think it will be; I hope it will not be. I have already talked to at least one, if not other, Senators who want to offer similar amendments out of doing so, because I think we must pursue this to the end. The amendment of the Senator from Connecticut would not allow us to do so.

I thank the Senator from Missouri for his courtesy in yielding the time and hope this amendment will be defeated.

Mr. EAGLETON. Mr. President, I yield myself 5 minutes on the bill.

Mr. President, I think that this amendment, which would cut off $56 million in projected Public Law 480 aid to Korea, is unwise from both economic and diplomatic standpoints.

Taking the economic one first, this prohibition would prevent the United States from meeting its obligations under the 1971 "Kennedy understanding" in which it was agreed that the United States would provide Public Law 480 commodities in return for Korea's agreement to limit voluntarily its textile exports to the United States. Eliminating Public Law 480 could result in the Koreans dropping their voluntary limit, thus causing a significant increase in Korean textiles imported into this country. Such a situation would be detrimental to domestic U.S. industry, particularly the cotton producers.

In addition to the textile situation, the overall United States-Korean agricultural trade balance could be significantly affected. U.S. agricultural exports to Korea were $919 million in 1977, representing 95 percent of Korea's major crop imports of cotton, wheat, corn and soybeans. They represented two-thirds of total Korean agricultural imports. It is very possible that a loss of the Public Law 480 program would cause the Koreans to turn to other sources of supply for agricultural products. Both the State and Agriculture Departments indicated that they felt such a shift was likely. It is cer-

tain that our competitors in world agricultural markets will use the alleged reduction in U.S. reliability as a reason not to buy from this country.

Mr. President, I ask unanimous consent that the letters from both the State Department and the Department of Agriculture be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. EAGLETON. On the diplomatic side of the question, there are two key issues. First, as a signatory to the Vienna convention on diplomatic relations, the State Department has indicated that any action by this country to require testimony by a former diplomat would be both improper and illegal. While I completely agree that we need the testimony of Ambassador Kim Dong Jo, I do not think this provision is the way to accomplish that. Coercion has not worked through the Public Law 480 program.

Last week, the Korean Government offered assurance of cooperation in obtaining additional information to assist the Ethics Committees. As I understand it, this includes obtaining written responses to questions. Now this may not be totally satisfactory, but it is a clear sign of progress in this situation. To slap the Korean Government in the face at this time by adopting this amendment is likely, in my judgment, to kill off the first really promising initiative with respect to the testimony of the Korean Ambassador.

EXHIBIT 1

DEPARTMENT OF AGRICULTURE,
Washington, D.C., July 18, 1978.

Hon. THOMAS F. EAGLETON,
U.S. Senate,
Washington, D.C.

DEAR MR. CHAIRMAN: On June 19, 1978, we provided you with our detailed comments and recommendations on the fiscal year 1979 agricultural appropriations bill as approved by the full House Appropriations Committee. Subsequent to that time, two additional provisions were added to the bill during House floor action. We would like to offer our comments on those provisions.

A proviso was added to the appropriation for Public Law 480 which states, "Provided, That none of the funds appropriated or otherwise made available under this paragraph shall be obligated or expended to finance assistance to Korea."

While we recognize the concerns of the House which resulted in the addition of this language to the bill, we believe the following points should be considered:

This prohibition would prevent the United States from meeting its obligations under the 1971 "Kennedy Understanding" in which it was agreed that the U.S. would provide P.L. 480 commodities in return for Korea's agreement to voluntarily limit its textile exports to the U.S. It is not known at this point whether the Koreans would choose to drop their voluntary limit if the House proviso is finally approved. A significant increase in Korean textile exports to the U.S. would, of course, be detrimental to our domestic industry and particularly to our cotton producers.

This proviso could also have severe implications for the general competitive position of the U.S. in agricultural trade. U.S. agricultural exports to Korea were $919 million in 1977. This represents 95% of major crop imports (cotton, wheat, corn, soybeans) and about two-thirds of total Korean agricultural imports. There are strong indications that we could lose a substantial share of this billion dollar Korean market if the P.L. 480 proviso is finally approved. It is also clear that our competitors will use this alleged lack of U.S. reliability against us in other markets.

The second action by the House was to add a new Section 613 to the general provisions of the bill which states that: "None of the funds herein appropriated shall be available to pay the expenses of parties intervening in any regulatory proceeding or of any person acting as a witness, an expert, or an advisor for or upon behalf of any organization appearing before the United States Department of Agriculture, Food and Drug Administration or Commodity Futures Trading Commission."

One of the most significant initiatives of this Administration is the improvement of public participation in regulatory and other Executive Branch decision-making processes. In many ways we have become a nation of rules and regulations which in the past were generated by the bureaucracy without effective input from the individuals or groups most significantly affected. The Department is presently revising its procedure to require better advance notice of proposed actions as well as clearer writing and improved analysis to explain and support them.

However, it is clear that in some instances the most important impediment to public participation is lack of resources. This is especially true with respect to programs which are designed to serve the poor such as the Food Stamp program. We believe that these people ought to be given a fair chance to state their views on program rules and regulations which directly concern them. In some cases, this may require that they be reimbursed by the Government for the travel and other expenses associated with their appearance. We believe that a policy of paying such expenses when absolutely necessary is both wise and equitable. To the extent that such participation will lead to better policies and programs, the Government and the general public will be the real beneficiaries. Recent Comptroller General decisions indicate that there is a legal basis for these payments. For these reasons, we urge the Senate to delete Section 613 from the 1979 Appropriations bill.

We appreciate your consideration of these comments.

Sincerely,

BOB BERGLAND,
Secretary.

DEPARTMENT OF STATE,
Washington, D.C., August 4, 1978.

Hon. THOMAS F. EAGLETON,
Chairman, Subcommittee on Agriculture, Committee on Appropriations, U.S. Senate.

DEAR MR. CHAIRMAN: The Senate is scheduled to consider the Agriculture Appropriations Bill next week, and we understand that an amendment may be introduced on the floor to prohibit PL–480 Title I sales to Korea unless the Korean Government requires former Ambassador Kim Dong Jo to return to the United States to testify before congressional panels. We strongly feel that economic issues, such as commodity export sales, and the issue of forcing a former diplomat to testify are separate and distinct, and should be argued on their separate merits.

Our position on requiring testimony by a former diplomat is well known to you, and was best expressed in the testimony of Deputy Secretary Warren Christopher before the House International Relations Committee on May 22, 1978. In essence, the Department's position is that as a signatory to the Vienna Convention on Diplomatic Relations any action by the Government of the United States to require testimony by a former diplomat would be both improper and illegal.

Commodity sales to the Republic of Korea through the PL–480 Title I program are extremely important to the commercial interests of the United States. As stated in the original PL–480 legislation, an important purpose of Title I sales is the development and preservation of overseas markets for American agricultural products. Korea is the fifth largest export market for our agricultural goods—a market approaching $1 billion annually, and growing. In 1977, Korea purchased over $760 million in cotton, wheat and corn alone. Clearly Korea is an important market which we should preserve and develop and particularly avoid any actions which could prove detrimental to these efforts.

The effectiveness of PL–480 sales as a marketing tool in Korea is demonstrable—the Korean Government has consistently expressed its appreciation over the years by making virtually all of its commercial purchases of agricultural goods from the United States. Our market share for these products in Korea is well over ninety percent. We would not expect that an abrupt and somewhat rancorous termination of the Title I program would immediately turn Korea to other supply sources for all of its agricultural imports, but it would be easy for Korean buyers to shift a portion of purchases to our major competitors who are constantly making new approaches to them. A loss of only ten percent of our current market share would represent a loss to American farmers of nearly $100 million annually.

In summary, we feel that the linkage of economic issues with that of the testimony of a former diplomat is inappropriate, and we hope that the Senate will avoid such a linkage. We would further note that the Korean Government has recently offered assurance of cooperation in obtaining additional information to assist the Congressional Ethics Committee to conclude satisfactorily their investigation. This process will be underway shortly.

Sincerely,

DOUGLAS J. BENNETT, Jr.,
Assistant Secretary for Congressional Relations.

Mr. EAGLETON. A few final remarks before I shall move to table, Mr. President. I have listened to the presentation very vigorously and forthrightly set forth by the distinguished Senator from Connecticut (Mr. WEICKER) and the rejoinder thereto by the chairman and the ranking minority member of the Senate Ethics Committee (Mr. STEVENSON and Mr. SCHMITT). We all get a bit exuberant sometimes in debate, Mr. President. I guess I am as guilty of that sin as anybody in this body. And I know that the Senator from Connecticut holds his views very deeply. However, I think it goes far beyond the pale of legitimate commentary in this instance to say that there is either a conscious or an unconscious, either a witting or an unwitting coverup. That word, coverup, that is an attention grabber. That implies that there is some kind of conspiracy or conscious design to keep things away from public scrutiny. It implies that the Senator from Illinois (Mr. STEVENSON) and the Senator from New Mexico (Mr. SCHMITT), as chairman and ranking member of the Ethics Committee, are handmaidens in this kind of coverup endeavor. I certainly know that is not the case.

As the Senator from Illinois has pointed out, if the Senator from Connecticut (Mr. WEICKER) has information of any kind, direct or indirect—from live witnesses, written interrogatories, hearsay,

rumor, innuendo, or surmise—if he has information of any sinister or even quasi-sinister type, he can certainly give that information to the Senator from Illinois or the Senator from New Mexico. The lines of communication are open within this body at all times.

Mr. WEICKER. Will the Senator yield at that point?

The PRESIDENT OFFICER. The Senator's time has expired.

Mr. EAGLETON. I yield 4 additional minutes on the bill.

The PRESIDING OFFICER. The Senator from Missouri has 2 minutes remaining.

Mr. EAGLETON. Mr. President, I ask unanimous consent that an additional 30 minutes on the bill be allocated, with 15 minutes under my control and 15 minutes under the control of Senator BELLMON.

I withdraw my request. I yield 2 minutes or whatever I have to the Senator from Connecticut.

Mr. WEICKER. As the distinguished Senator from Missouri knows, or may not know, I was a member of the Ethics Committee. I resigned from the Ethics Committee because of the fact that I attempted to get witnesses, ones I have named here today, before the committee, had the motion passed in the committee, and then saw my motion administratively buried for national security reasons in the Intelligence Committee.

I have too much respect for civil liberties and the Constitution to go ahead and use any other procedures but those of our legal process of the U.S. Senate, and I do not throw names out willy-nilly.

But I cannot go ahead and conduct an investigation when my own committee has to pass my motion unanimously, denies me the fact of ever seeing those witnesses or cross-examining them.

Now I submitted at the outset of my talk this morning the verbatim transcripts of March 23 and April 10. In there, you will see acceptance of the motion and see how it died in a parliamentary maneuver after it had been passed.

So I just want you to understand I do not throw those words out, and I might add I have no intention of correcting the words used today in the RECORD. I will stick right by them.

Let the Senator from Illinois and let the Senator from New Mexico defend that transcript, which will appear for the world to see tomorrow, as to what they did with trying to use a proper procedure to obtain witnesses and then having that procedure denied them.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. EAGLETON. I yield.

Mr. ROBERT C. BYRD. Mr. President, I do not think the Senator from Illinois or the Senator from New Mexico need defend any transcript before the world. I have every confidence in those two Senators and in that committee.

Mr. WEICKER. Was the Senator there?

Mr. ROBERT C. BYRD. And I do not believe in engaging in innuendos. If the Senator has anything other than innuendos, let him produce it. Let him bring it to the Senate floor.

Now, Mr. President, as I have said in connection with the SALT agreement, if and when a SALT agreement is ever produced, I think the Senate ought to make its judgment based on the content of what is within the four corners of that agreement and not on other extraneous matters which we may or may not like.

I do not like the adventurism of the Soviets in Africa. I do not like the adventurism of the Cubans in Africa. But when it comes time to make a decision on the SALT agreement, if it is ever presented here, I, for one, will attempt to make my decision based on the contents of that agreement and what is in the best interests of the United States.

I say the same thing with respect to aid to Korea. I think the administration has performed in an admirable way in its efforts to get the Korean government to cooperate.

I am sure the Ethics Committee of the Senate has done the same.

I do not believe that we should resort to cutting off aid to a friendly government like Korea. We have a treaty with the Korean Government. I do not believe we ought to resort to cutting off our nose to spite our face, cutting off our aid to a friendly government simply because we cannot get all the cooperation we want.

I think we should persist in trying to cooperate with the Government of Korea, persist in our efforts to get whatever information we need, but not go around this indirect route, cutting off our nose to spite our face.

Let us think of what is in the best interests of the United States.

Mr. WEICKER addressed the Chair.

Mr. ROBERT C. BYRD. I want to see all the facts come out. and I am confident that the Ethics Committee is doing its best.

Mr. President, I hope that the motion to table which the Senator from Missouri will make will be supported.

Mr. WEICKER. Will the Senator from West Virginia yield for a question?

The PRESIDING OFFICER. All time has expired.

Mr. WEICKER. Will the Senator yield for a question?

Mr. ROBERT C. BYRD. I yield the floor.

The PRESIDING OFFICER. There is no time.

Mr. WEICKER. Will the Senator from Missouri yield me 2 minutes?

The PRESIDING OFFICER. There is no time.

Mr. ROBERT C. BYRD. I ask unanimous consent that the Senator from Connecticut have 2 minutes.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. WEICKER. I then ask the Senator from West Virginia whether a friendly nation. which is the term he used for South Korea, bribes its allies, is that the make charges if he was familiar with the

Mr. ROBERT C. BYRD. The Senator is beating around the bush. He is attempting by indirection to get around the point.

The point that is before the Senate is whether we should cut off aid to Korea, simply because a Senator feels that that Korean Government is not forthcoming, Perhaps they are not. The point is, will we cut off our nose to spite our face? Will we cut off aid to a friendly government simply because there are some problems in getting the full cooperation in the presentation of whatever evidence may or may not be available?

Let us continue to persist. Let us not let up in our efforts to get the information. I think the Korean Goverment will be much more likely to cooperate, if we do not take our eyes off the ball and cut off aid which, in itself, is not going to get the information that the Senator wants.

But, Mr. President, I think that the——

Mr. WEICKER. I still believe I have time. May I just read the statement of the committee:

> Efforts to obtain access to these officials has thus far proved fruitless. The Korean Government has not agreed to permit the Committee to interview these officials on a face-to-face basis, quite apart from granting permission to examine them under oath.

There is the statement of the committee.

Mr. ROBERT C. BYRD. Well——

Mr. WEICKER. How long does it go on? It will be forgotten. It is almost forgotten now.

Mr. ROBERT C. BYRD. I am not asking anybody to forget anything that should not be forgotten, and the effort should persist. But the Senator will not get the information the Senator wants by cutting off aid. I respect the Senator for his desire to get all pertinent and accurate information. So do I. But do not cut off aid to a friendly country simply because all of the cooperation is not yet forthcoming. Let us attempt to continue to get the cooperation. But to go about getting that cooperation in this way, in my judgment, is a futile and unwise and counterproductive effort.

Mr. WEICKER. As the saying goes, Mr. President, with a friend like that, who needs enemies?

The PRESIDING OFFICER. The time has expired.

Mr. WEICKER. I hope the distinguished Senator will not table, but allow it to go up or down.

Mr. STEVENSON. Will the Senator yield?

Mr. EAGLETON addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. STEVENSON addressed the Chair.

The PRESIDING OFFICER. There is no time remaining.

Mr. EAGLETON. I ask unanimous consent that the Senator have 30 seconds.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENSON. Mr. President, the Senator from Connecticut could not mark of a friendly nation?
investigations. But he is not a member of the committees which are conducting the investigations. We are making prog-

ress. This amendment will prevent us from making more progress and determining whether, in fact, there is any impropriety in the Senate.

Mr. ROBERT C. BYRD. What the Senator is saying is that the amendment would be counterproductive.

Mr. STEVENSON. Exactly.

There is a process moving now which ought to continue. If it does not produce more cooperation, then it would be timely to react.

Right now, we ought to keep the process of cooperation moving. It is going to produce information from Kim Dong Jo. If he does not produce truth and a full response, we will know and we can react later.

But the progress we have been making includes the sworn testimony of all of the witnesses mentioned by the Senator from Connecticut with the exception of one, and we will obtain his.

This amendment, for the sake of the truth and a full investigation, ought to be defeated and it ought to be defeated resoundingly.

Mr. EAGLETON. Mr. President, I move to lay the amendment on the table and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Connecticut. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mrs. HUMPHREY), and the Senator from Hawaii (Mr. INOUYE) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "yea."

Mr. STEVENS. I announce that the Senator from Pennsylvania (Mr. HEINZ) and the Senator from New York (Mr. JAVITS) are necessarily absent.

The result was announced—yeas 71, nays 24, as follows:

[Rollcall Vote No. 308 Leg.]

YEAS—71

Allen	Gravel	Muskie
Anderson	Hart	Nelson
Bellmon	Hatch	Nunn
Bentsen	Hatfield,	Pearson
Bumpers	Mark O.	Pell
Burdick	Hatfield,	Percy
Byrd,	Paul G.	Proxmire
Harry F., Jr.	Hathaway	Randolph
Byrd, Robert C	Hayakawa	Ribicoff
Cannon	Hodges	Roth
Chafee	Hollings	Sarbanes
Chiles	Huddleston	Sasser
Clark	Jackson	Schmitt
Cranston	Johnston	Scott
Culver	Kennedy	Sparkman
Danforth	Leahy	Stafford
DeConcini	Long	Stennis
Dole	Lugar	Stevenson
Durkin	Magnuson	Stone
Eagleton	Matsunaga	Talmadge
Eastland	McGovern	Thurmond
Ford	McIntyre	Williams
Garn	Melcher	Young

Bayh	Hansen	Riegle
Biden	Haskell	Schweiker
Brooke	Helms	Stevens
Case	Laxalt	Tower
Church	Mathias	Wallop
Curtis	McClure	Weicker

NOT VOTING—5

Abourezk	Humphrey	Javits
Heinz	Inouye	

So the motion to table Mr. WEICKER's amendment (No. 3447) was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the motion to lay the amendment on the table was agreed to.

Mr. METZENBAUM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. EAGLETON. Mr. President, I believe the Senator from Indiana (Mr. LUGAR) has the next amendment, or perhaps the Senator from Nebraska (Mr. CURTIS).

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. EAGLETON. Mr. President, I ask unanimous consent that an additional 30 minutes on the bill be granted, the time to be equally divided between myself and the Senator from Oklahoma.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. I now yield 1 minute to the Senator from Nebraska.

Mr. CURTIS. Mr. President, the Senator from Nebraska is faced with this problem. The Finance Committee has been in since 9 o'clock this morning. We have a great many programs we have to move. At this moment, revenue sharing and the controversy over countercyclical revenue sharing and the formula, is under consideration.

I have an amendment I wish to present. I do not believe this bill can be finished until after the noon hour. I just cannot be here to offer my amendment. My amendment is calling for a cut that is larger on the same item than the amendments by the Senator from Indiana. If his amendment is accepted, I am out of court.

The Committee on Finance is part of the official business around here, and there is nothing I can do about it.

Mr. EAGLETON. Mr. President, I yield to the Senator from Oklahoma for a unanimous-consent request.

Mr. BARTLETT. Mr. President, I ask unanimous consent that Ed King and Bob Cooper of my staff be accorded the privileges of the floor during the voting and consideration of this bill.

The PRESIDING OFFICER. Without objection, it is ordered.

Mr. EAGLETON. Mr. President, I ask unanimous consent that the amendment of the Senator from Nebraska be in order notwithstanding whatever action may occur on the amendment of the Senator from Indiana (Mr. LUGAR), including the approval thereof.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

(The following statement was made yesterday and is printed at this point in the RECORD by unanimous consent.)

Mr. ROTH. Mr. President, yesterday the Senate witnessed a travesty of this body's sense of purpose. Supporters of reduced spending were warned by several of the Senate's own Members that any effort made to decrease funding figures arrived at by the Appropriations Committee would be met with direct reprisals.

Even though these Members acknowledge the proposed reduction was not a meat-ax approach, they nevertheless charged their final figures were sacrosanct and untouchable. Mr. President, I ask—is this the proper role of this body? Were we elected by our people to merely nod our approval to the decisions—valuable as they may be—reached by certain committee members?

Is the Senate saying it is governed entirely by committee—rather than arriving at decisions by discussion and debate of all its Members—even those not privileged to be on a particular committee?

Mr. President, are we to agree with those who yesterday suggested that because certain Members had been contacted as to their respective preferences, further reduction in a piece of legislation was totally unthinkable?

Mr. President, I certainly cannot agree with this concept of the purpose of the Senate—nor will I bend to their threats.

The purpose of the SOB (Save Our Bucks) group is not to be a thorn in the Senate's spending side, merely for the sake of being a thorn. Rather, it is our purpose to curb—though only little by little perhaps—the spending propensity of the Congress.

As members of this group we are often told, "I agree with your ideas—but not this bill." It is time that this body—just as the taxpayer he or she represents—bites the bullet on each bill, not just the one that hurts the least.

Most importantly, no Member yet has been able to state that waste and inefficiency—the object of our proposed reductions—is indeed nonexistent within each piece of legislation.

Mr. President, my colleagues and I represent the person unable to be present at committee meetings—whether budget, appropriations, or others—the person most important of all—the American taxpayer.

May I close, Mr. President, by saying that as long as the message from people across the country continues to beg for financial relief, threats or intimidations will not silence me nor my colleagues. We have too much respect for this body for that.

AMENDMENT NO. 3438

(Purpose: To reduce the funds provided for the Food Stamp Program by $250,000,00)

Mr. LUGAR. Mr. President, I call up amendment No. 3438.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Indiana (Mr. LUGAR) proposes an amendment numbered 3438:

On page 45, line 6, strike out "$5,779,200,000" and insert in lieu thereof "$5,529,200,000".

Mr. LUGAR. Mr. President, the amendment that I offer would, in effect, cut $250 million from the food stamp provision of the appropriation bill.

A $250 million cut must be seen in the perspective that the budget now calls for $5.779 billion to be spent on the food stamp program. My amendment would cut only $250 million from that amount, a cut of less than 5 percent.

I have chosen that sum with some degree of care, and I would like to explain the rationale for that degree of cut.

Certainly the food stamp program has been widely praised, and in some quarters widely condemned. It has been widely praised by many Americans who have received nourishment because of the humanitarian provisions of the food stamp program.

It has also been praised by farmers; it has been praised from time to time by grocers and others who have marketed food. It is an important part of the agriculture and food picture in this country.

The effect of my amendment is not an attack on the food stamp program; it is not an attempt to summon up the various prejudices and ill feelings there are about that program.

Let me say, Mr. President, there is substantial sentiment in this country that the administration of the food stamp program has been filled with fraud and abuse. That, indeed, has been the recognition of this body from time to time.

A while back various work incentive programs were, in fact, put into effect to offer at least some possibilities for those who were recipients of food stamps to earn income and thus to move from those rolls. Specifically the work registration program has come into effect, and I cite as to how that program is working a report by the Comptroller General of the United States to Congress entitled "Food Stamp Work Requirements, Ineffective Paperwork or Effective Tool?" This is a report of April 24, 1978.

Chapter 2 of the report is entitled "Why Work Registration Has Had Limited Success." I quote the first paragraph:

The food stamp program's work registration requirements have not achieved the results the Congress thought they would. Even though some people have gotten jobs as a result of the requirements and others have been denied benefits for not cooperating fully with the local officials, the actual savings thus far have been meager compared to what could be saved by a well-run work registration effort.

One reason for the lack of success of the vocations we reviewed was that the work registration requirements seem to be viewed as just more administrative paperwork and were not seen as a way to reduce the need for program benefits.

The report follows on with a chart on page 8. Samplings were made in five cities of the United States in which 1,000 or more registrants were, in fact, interviewed. I quote again, "We randomly selected 1,061 cases from applications generally approved during January 1976." These are applicants for food stamps. "We found 620 recipients were required to register for work."

Now, Mr. President, let us take a look at the perspective of this situation. Of the 1,061 persons interviewed, according to the Comptroller General's report, 620 under the Food Stamp Act were required to register for work. How many of the 620 would you suspect have obtained jobs? These are jobs that would have provided income and might have taken them off the food stamp rolls. Of the 620 people who were required to register for work, only 3 have obtained jobs, and only 233 others were even registered at the local employment offices responsible for trying to help them find jobs. The other 384 were not even registered at such offices.

Mr. President, the report goes on in some detail to try to illuminate this situation further. There could be mitigating circumstances in our society as to why out of 1,061 people receiving food stamps, with a work requirement that made it necessary under law for over 600 to be registered for work, only 236 were registered, and only 3 obtained jobs.

A question might be raised, Mr. President, whether, in fact, there were jobs available in our society, and jobs that under the terms of the law were deemed to be suitable.

On page 18 and page 19, the highlight of that particular portion of the report had this headline which says, "Jobs Were Available for Food Stamp Work Registrants." In Detroit, Philadelphia, and San Francisco the number of food stamp work registrants is listed, and the number of jobs that were available. At least half of the cases in those three cities had jobs available to them.

The report goes on into a more sophisticated line, and it says:

Because of such factors as distance of the job from the registrant's home, lack of public transportation, and the low salaries of the jobs available not all jobs can be considered suitable. In Detroit and Philadelphia we considered these factors, with assistance from local employment service officials, in order to estimate the number of job openings that were suitable In Detroit all 38 job openings were considered suitable. In Philadelphia 46 of the 55 available jobs were considered suitable.

Mr. President, I suggest that these figures from the Comptroller General's report of April 24, 1978 indicate what seems to me to be obvious, and that is that work is available in this country, not only jobs available but suitable jobs under the definition of the act, for a large number of food stamp recipients.

To begin with, those administering the food stamp program are not even registering a majority of the recipients as required by law, making known their names and availability in the job market. Even in those areas where there are jobs available and jobs under the law regarded as suitable, suitable because of transportation, pay, and other factors, these jobs are not being taken by the food stamp recipients.

Mr. President, I know of no better way to make certain that the administration of this act begins to move in a way that has a degree of fairness for American citizens generally than to suggest under this amendment that $250 million, less than 5 percent of the allocation of the program, be deleted, with the strong suggestion this implies that the administration get its act together and begin to administer the food stamp program in a way that does not discredit it with all Americans.

To blandly suggest that the food stamp program is a popular program with America generally seems to me to court a political disaster for the food stamp program and for many other humanitarian programs which come under the heading of the feeding of Americans who are poor or unemployed or who are children who are dependent.

We are in the process, through our failure to tailor programs that clearly have excess and administrative waste, going to put in jeopardy a great number of other things. Mr. President.

I know the argument will be made that in a way the food stamp program is an entitlement program. If you qualify for the benefits you ought to get them. If the function of this body is simply to provide the money once the requirements are set up, whether it be $5.7 billion or $5.5 billion or whatever it may require, the argument will be made that with the dropping of the purchase requirement more people will qualify this year; and the suggestion is always that the administration might improve and, therefore, fewer people would qualify.

The committee has suggested in its report, and I think that this is important to cite, Mr. President, and I cite page 75 of the report that is before us on the Agriculture Rural Development, and Related Agencies appropriation bill, that:

As passed by the Congress, the Food Stamp Act of 1977 was intended to simplify administration, eliminate fraud and abuse, encourage participation among and open access to eligible households, and tighten eligibility standards.

I call particular attention to this sentence:

However, the Committee is concerned that two of these four goals—namely the elimination of fraud and abuse and simplification of administration—may not be achieved by the regulations proposed to implement this new act.

Mr. President, I think that is an important comment made by the committee, commenting on the food stamp appropriation. The committee finally decided, all things considered, that while probably there may be some fraud and abuse, and some mismanagement, with tightened eligibility standards and eliminating the cash requirement these things may balance themselves, and the committee retained the $5.779 billion level.

Not only am I convinced of the desirability of cutting this level by $250 million, but I am convinced that nothing short of that will lead to the desired result.

I am saying the American public as a whole believes in the program, and we are talking about, now in this bill, not

less than 1 percent of the entire budget, involved in the food stamp program. If we are now unable to bring this 1 percent to the poor, and make certain that not only the poor and needy are on the rolls, but, more importantly, that the people who can work have that opportunity, that the food stamp program in fact brings people together with jobs and with income opportunities, it just seems to me very important that we move in that direction.

Finally, I would add that the proposition 13 idea has been attacked by many as being a rather crude meat-ax attempt to do what could have been done surgically through a legislative body. And, indeed, perhaps it is. Indeed, the citizens of California decided that the legislature of California simply was incapable of bringing to the fore public policy changes such as the elimination of fraud and abuse in such programs as food stamp programs. As a result, in proposition 13's idea, you simply cut the money and then ask people to scatter around and try to find out how it is all to be done, entitled to it or not.

I have not suggested a cut of the order that is going to debilitate the food stamp program. I have suggested a $250 million cut, because I believe that will stimulate the administration of the food stamp program to such a point that the officials will make sure that those able to work will come together with the jobs; they are going to find a way; the people administering this program are going to be under the gun to pull their act together; the American public will have more confidence in the food stamp program, and its likelihood of providing benefits in the future is likely to be enhanced rather than detracted.

Mr. President, I would hope that this committee might be willing to accept this amendment. I reserve the remainder of my time.

Mr. EAGLETON. Mr. President, I am sympathetic to the hope that we could bring down the cost of the food stamp program. Various GAO reports have criticized its administration, and various reforms have been proposed, passed into law, and are being implemented. I refer specifically to those in last year's farm bill, which eliminated the purchase requirement, replaced itemized deductions with standard ones, instituted a maximum deduction for excess shelter and child care costs, eliminated the automatic categorical eligibility for welfare recipients, and required tougher enforcement and administration of the program by the States. The new legislation has not been fully implemented, but it is in the process of being so.

I think the Senate is kidding itself if it believes that it can institute reforms and improvements in the food stamp program by cutting the appropriation. This is an entitlement program. People will receive food stamps regardless of how much is appropriated in this bill—$250 million more or $250 million less. What will happen if we fail to appropriate enough money is that we will face a supplemental next spring.

I want to point out to my colleagues that 1 week ago the subcommittee asked the Department to take another hard look at the food stamp budget estimate. We did this because the Congressional Budget Office had just recently reestimated food stamp requirements and projected the need for a $143 million supplemental—not a decrease, but an increase, based principally on rising food prices. The Department's response was that, based on changing patterns of unemployment, plus food price increases, and taking into consideration all factors, including some carryover funding, it would be premature for Congress to provide additional amounts above the budget estimate at this time.

A cut of $250 million would virtually insure that the program will need a supplemental. It would be far better to wait until we see the effect of the new law before making cuts in a carefully constructed budget request.

I urge my colleagues to defeat this amendment. If further reforms in food stamps are feasible beyond those passed last year, I would urge the consideration and adoption of those reforms—not the meat-axe approach to the appropriation proposed today which has little programmatic effect.

I yield 3 minutes to the Senator from North Carolina (Mr. MORGAN).

Mr. MORGAN. Mr. President, I rise to oppose the amendment proposed by my good friend, the Senator from Indiana.

The Members of this body know the Senator from North Carolina as a fiscally conservative individual, one who is concerned about reducing budgetary outlays in almost any way possible. Rarely a weekend goes by that I do not visit my home State and hear the concerns of the citizens of North Carolina concerning the large expenditures of the Federal Government, expenditures which exacerbate inflation and plunge us deeper into debt.

Food stamps has never been a popular program in my home State. Virtually every citizen there is aware of cases that border on fraud and deceit. However, I believe that I can assure them that the food stamp program we have today is vastly different than the one that was in place when I came to the Senate in 1975.

In the 3½ years that I have been here, the Senate has considered four reform bills, bills that have altered the nature of the program and thrust it in the direction of reaching the poorest and most desperate people of this land.

Since I have been in the Senate, we have:

First. Essentially eliminated households with luxury cars;

Second. Eliminated college students;

Third. Eliminated much of the fraud and abuse, by both vendors and participants; and

Fourth. Reduced the income level to the poverty level, reducing the rolls by over a million people.

Of course, not all the defects have been cured, but we have and are improving this program and that much of the fraud has been substantially reduced.

One of my major concerns regarding this amendment concerns the entitlement nature of the program. Any cut is likely to be fictitious, forcing the executive branch to seek either a supplemental appropriation or legislation that would reduce the allotment each State receives or further reduction in the food stamp rolls. This will be especially true in view of the fact that food prices have risen 7.4 percent since the President submitted his budget for fiscal year 1979.

Mr. President, over 390,000 people receive food stamps in my home State. These people are poor. Many of them are temporarily unemployed, and still others are physically or mentally unable to work. And, more importantly, Mr. President, many of the people that benefit from food stamps are the elderly, who use food stamps as that little extra supplement to survive on. Many of them are children. All these are people who deserve our attention and concern.

I will close by saying that the requirement to register for work, a provision that the Senator from Indiana has alluded to was enacted by Congress last September and signed into law in the Food and Agriculture Act of 1977. I think that the reduced food stamp rolls indicate that this new provision of law is working.

I urge my colleagues to defeat the amendment offered by the Senator from Indiana.

I thank the Senator from Missouri.

Mr. EAGLETON. Mr. President, I yield 3 minutes to the Senator from South Dakota.

Mr. McGOVERN. Mr. President, I rise in opposition to the amendment offered by my friend, the distinguished Senator from Indiana. I know the amendment is well-intentioned, but it could not come at a worse time. As the Senator from Indiana knows, we spent many months reviewing all of the charges that have been leveled against the food stamp program last year. Any program that involves somewhere between 17 and 18 million people is bound to have a few cheaters. There are some people who cheat on their income tax.

It might indicate that we ought to increase the number of people involved in the enforcement of these programs, but we should not cut the program.

What the Senate did last year in the far-reaching Food Stamp Reform Act of 1977 was to respond to every one of the abuses that the Senator from Indiana has mentioned, and a good many he has not mentioned here today. We came up with a comprehensive reform plan that is just now being implemented. In fact, the regulations have been published and are now out for review and evaluation.

If there are some of those regulations the Senator thinks can be improved, he ought to make his objections known to the Department, and not come in with a major across-the-board cut in this program just at the time when we are trying to implement the reforms.

Beyond this, as the Senator from North Carolina has pointed out so well, we have had food price inflation in this country during the past year since the Senate passed its new guidelines. Both the cost estimates of the Congress last year and the cost estimates of the Department are, if anything, out of date.

It may very well be that we will be faced with the necessity of a supplemental appropriation to carry out what was so carefully authorized by the Senate last year.

The last thing we want to do at this time, Mr. President, with these new guidelines about to go into effect, regulations designed to clean up the abuses that exist in the program, is to pass the kind of slash now proposed.

There are only two things that could happen if this amendment were to carry: One, an outright increase in the suffering and the malnutrition in the United States; or second, require the Congress to come in with a substantial supplemental appropriation later on.

I think it is already clear, as was pointed out in the debate in the other body, that the cost of food today makes impossible any practical cutback in what we have authorized and appropriated for the food stamp program.

I might say, Mr. President, that the information in the letter of the Senator from Indiana to those of us in the Senate, is based on the reports of the program as it existed prior to the reforms mandated by the Congress last year. I think we need to give these programs a chance. I hope the amendment will be defeated.

The PRESIDING OFFICER (Mr. CHURCH). The Senator's time has expired.

Mr. EAGLETON. I am prepared to yield back the remainder of my time.

Mr. LUGAR. My time has expired.

Mr. EAGLETON. I yield 2 minutes to the Senator from Indiana.

Mr. LUGAR. I appreciate the Senator yielding.

Mr. President, let me summarize by saying this: I have not proposed a meat-ax approach which would bring about malnutrition or suffering by people. I have suggested that in the food stamp offices in this country the people are not being given an opportunity to find work When opportunities have been given, recipients are, in fact, not attempting to obtain work.

In Detroit and Philadelphia, as I cited jobs were found for a majority of the recipients who registered. They were suitable jobs. But only 3 persons out of 600 able-bodied persons—we are not talking about children or the aged but the able bodied—found work and thus moved into an income level which removed them from the food stamp program.

This is intolerable with regard to fairness in this program. To keep talking in terms of cutting off people and bringing about malnutrition and suffering is simply nonsense. It is that type of situation that is likely to lead to discrediting the whole program.

Mr. McGOVERN. If the Senator will yield, is the Senator aware that the latest statistics on this from the Department of Agriculture indicate that the error rate in the work registration requirement under this program has been more than cut in half since the statistics to which the Senator referred were published? We are making progress.

If the Senator feels that the regulations the Department has drawn up with regard to the work registration requirement is inadequate, I think the recourse is to make that dissatisfaction known to the Department, rather than to come in with a $250 million cut in the whole food stamp program. Let us target in on what the problem is. I gather from the Senator's remarks he believes the regulations are not drafted correctly.

Mr. LUGAR. Let me respond to the distinguished Senator by saying that the regulations are clear, they are perfectly clear. I am simply indicating that the Department has not felt it incumbent to work through those regulations before its people come into contact with those jobs. This sort of activity will stimulate that sort of contact.

Mr. McGOVERN. Does the Senator know that the Department of Agriculture is now moving against one State because of their violations of the work requirement?

Mr. LUGAR. I am encouraged to hear that today. I hope that will bring about a widespread situation.

Mr. McGOVERN. The Senator has not targeted on the work registration requirements. This amendment is an across-the-board cut of $250 million in the whole food stamp program.

Mr. BELLMON. Mr. President, since coming to the Senate I have consistently opposed action to liberalize and increase the costs of the food stamp program. Nevertheless, I must oppose this amendment as being unworkable. I, like the sponsor of this amendment, and the majority of the Senate, favor any reasonable measure to curb fraud and abuse in the food stamp program. This amendment, however, while symbolic of this concern, will have no impact on the administration of the food stamp program, because the program is mandated by law as an entitlement. The appropriation contained in this bill for all practical purposes is only an estimate of the program requirements. Actual program levels and program costs will be determined by the number of participants claiming benefits and adjustments in the costs of food.

If we fail to appropriate an adequate amount for the program, we will have to make a supplemental appropriation in the latter part of the fiscal year. Since this program is an entitlement, should the Federal Government fail to make the necessary funding available, recipients would have a valid legal claim against the government, which would have to be satisfied under a judicial judgment.

The Food and Agricultural Act of 1977 incorporated a number of provisions to address the problems with the food stamp program. The regulations implementing these changes have already received public comment and will be issued in final form late this summer. Full implementation of these regulations is expected from 4 to 6 months following that date. As a member of the Senate Agriculture Committee, I worked on that legislation and I am hopeful that the improvements incorporated there will reduce the abuse of the food stamp program.

Should even these measures prove inadequate, Congress has the authority and the responsibility to make further revisions in the legislative authorization. It is clear, however, that a cut in the appropriation would not achieve any of these goals.

I urge the Senate to reject this amendment.

Mr. LUGAR. Mr. President, I yield back the remainder of my time.

Mr. EAGLETON. Mr. President, I yield back the remainder of my time.

Mr. President, I ask unanimous consent that Kathryn Files, of Senator CRANSTON's staff, be granted the privilege of the floor during the debate and votes on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I ask the same privilege for Jay Urwitz, of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Indiana. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mrs. HUMPHREY) and the Senator from Hawaii (Mr. INOUYE) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "nay."

Mr. STEVENS. I announce that the Senator from Pennsylvania (Mr. HEINZ) and the Senator from New York (Mr. JAVITS) are necessarily absent.

The result was announced—yeas 38, nays 57, as follows:

[Rollcall Vote No. 309 Leg.]

YEAS—38

Allen	Hatch	Proxmire
Baker	Hayakawa	Roth
Bartlett	Helms	Sasser
Bumpers	Hodges	Schmitt
Byrd, Harry F., Jr.	Johnston	Schweiker
Curtis	Laxalt	Scott
DeConcini	Long	Stennis
Eastland	Lugar	Stevens
Garn	McClure	Thurmond
Goldwater	Nunn	Tower
Griffin	Packwood	Wallop
Hansen	Pearson	Young
	Percy	Zorinsky

NAYS—57

Anderson	Eagleton	McIntyre
Bayh	Ford	Melcher
Bellmon	Glenn	Metzenbaum
Bentsen	Gravel	Morgan
Biden	Hart	Moynihan
Brooke	Haskell	Muskie
Burdick	Hatfield, Mark O.	Nelson
Byrd, Robert C.	Hatfield, Paul G.	Pell
Cannon	Hathaway	Randolph
Case	Hollings	Ribicoff
Chafee	Huddleston	Riegle
Chiles	Jackson	Sarbanes
Church	Kennedy	Sparkman
Clark	Leahy	Stafford
Cranston	Magnuson	Stevenson
Culver	Mathias	Stone
Danforth	Matsunaga	Talmadge
Dole	McGovern	Weicker
Domenici		Williams
Durkin		

NOT VOTING—5

Abourezk	Humphrey	Javits
Heinz	Inouye	

So Mr. LUGAR's amendment (No. 3438) was rejected.

Mr. EAGLETON. Mr. President, I ask for the yeas and nays on the Curtis amendment that we will take up in about 3 or 4 minutes; I ask for the yeas and nays on an Eagleton-Bellmon amendment which we will take up after the Curtis amendment; and I ask for the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second on all three items? There is a sufficient second.

The yeas and nays were ordered.

Several Senators addressed the Chair.

Mr. EAGLETON. Mr. President, I ask unanimous consent that Miss Nancy Barrow of Senator CHAFEE's staff be granted privilege of the floor on this measure.

The PRESIDING OFFICER Without objection, it is so ordered.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that Karen Darling be granted privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR Mr. President, I ask unanimous consent that David Lyons be granted privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURKIN. Mr. President, a similar request for Mike Fleming and Steve Mau of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BELLMON. The same request for Bob Reynolds of Senator WALLOP's staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1637

(Purpose: To eliminate tobacco production research of $3,106,000 from the bill)

Mr. PELL. Mr. President, I offer an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Rhode Island (Mr. PELL) proposes unprinted amendment numbered 1637.

Mr. PELL. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 5, line 11, strike out "$337,791,000" and insert in lieu thereof "334,685,000."

Mr. PELL. Mr. President, I am offering an amendment today to eliminate $3,106,000 in funds from this bill which would be used to support tobacco production research.

This amendment is a simple one, the intent of which is obvious—to end a Government support program for a cancer-causing substance. My amendment does not prohibit the growing of tobacco, nor does the amendment attempt to limit its use or affect its sale. What the amendment does is put the Senate on the record as being firmly opposed to spending taxpayers' dollars on a tobacco production research program whose thrust is to increase the yield of a plant which has been verified as a severe health hazard to the public.

Our Government has too long been involved in a senseless, and fiscally unsound policy of, on the one hand, supporting and encouraging the growth of this deadly weed, and on the other, spending millions of dollars to educate people not to use tobacco, to finance research on how to deal with the diseases caused by tobacco, and to develop systems to help people who have become addicted to tobacco to break the habit. It is time we signal an end to this waste and inconsistency on the part of the Federal Government.

It is particularly appropriate that we act now, less than a week after the American Medical Association released its report—the result of a 14-year, $15 million research project—which concludes that cigarette smoking can cause irreversible heart damage and may be responsible for medical maladies ranging from indigestion to cancer. It has been 14 years since the first Surgeon General's report was issued warning of the dangerous links between smoking and health. At that time in 1964, the tobacco industry refuted the Surgeon General's report, protesting that his findings were based on inconclusive evidence. A new project was undertaken, sponsored by the AMA's Committee for Research on Tobacco and Health and financed by the tobacco industry. The results of this study are now in and they support the contention that—and I quote—"cigarette smoking plays an important role in the development of chronic, obstructive pulmonary diseases and constitutes a grave danger to individuals with pre-existing diseases of the coronary arteries." Researchers also found links between smoking and heart disease, most notably strokes and heart attacks. The research committee also confirmed previous findings of cancer-causing agents in nicotine. I do not think there can be any doubt left as to the severe medical hazards connected with smoking.

HEW Secretary Califano testified this spring before a House public health subcommittee that the country spent between $5 billion and $7 billion in 1975 to treat smoking related diseases. As much as $18 billion in worker productivity may have been lost due to absenteeism caused by smoking-related illness, he said. He estimated that 4,000 youngsters start smoking every day, that the teenager who becomes a habitual smoker stands a 1 in 20 chance of developing lung cancer; the nonsmoker's chance is 1 in 200. The same smoking teenager has a 6 in 10 chance of having heart disease; the nonsmoker a 3 in 10 chance. The smoker has a 1 in 10 chance of having lung disability; the nonsmoker a 1 in 200 chance. These statistics are staggering. It makes this Government's policy of continuing to spend millions of dollars to support the growth of this deadly plant, while at the same time spending millions of dollars on smoking education and research not only a senseless and irresponsible act but also an immoral one. During the past fiscal year, HEW spent $19.4 million on smoking and health.

I believe it is a matter of poor policy on our part to facilitate the growing of this hazardous weed.

According to HEW estimates, 320,000 Americans died last year from smoking-related causes, 37 million Americans alive today will die prematurely due to smoking.

I do not believe the U.S. taxpayers should foot the bill for a tobacco research program which is more concerned with growing more tobacco than with growing safer tobacco.

Mr. President, this amendment would seem to me to go at this problem, although I congratulate the tobacco industry on the emphasis they have been putting lately on research more directly related to health than to production. My concern is to make sure that the money that is spent in tobacco production research is spent in that direction.

The PRESIDING OFFICER. The Chair advises the Senator from Rhode Island that his amendment is out of order, inasmuch as it revises a figure that already has been amended.

Mr. EAGLETON. Mr. President, I ask unanimous consent that the Pell amendment be considered in order, because it will be debated.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. HUDDLESTON. Mr. President, reserving the right to object, will the Senator withhold that until we discuss it?

Mr. EAGLETON. The Chair has ruled on my request, has it not?

The PRESIDING OFFICER. The Chair has stated that the unanimous-consent request has been agreed to. The Chair did not hear the Senator from Kentucky.

Mr. HUDDLESTON. Mr. President, will the Senator yield?

Mr. EAGLETON. I yield 5 minutes to the Senator from Kentucky.

Mr. CURTIS. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is the amendment of the Senator from Rhode Island.

Mr. HUDDLESTON. Mr. President, I understand the concern and the sincerity of the distinguished Senator from Rhode Island in offering this amendment. However, I believe that upon examination of the facts, he will find that the amendment will not accomplish his purpose and, as a matter of fact, will be counterproductive to what his objective appears to be.

Although this category is listed as tobacco production research, the fact is that you cannot separate production research from research that has a bearing on the health aspects, whatever they might be, of the tobacco leaf. Whatever is healthful or unhealthful in the leaf is determined by what the leaf is. Research in growing the leaf, in breeding plants, the question of insecticides or what fertilizer might be used—all this has a direct bearing on what the final composition of the leaf is. And that is what influences the question of whether or not it is healthful or unhealthful.

Second, as the Senator mentioned, there is now no great incentive, no great need, for concentrating on purely production increasing research. Several years ago, tobacco allotments were made on the basis of acreage. At that time, of course, the more you could produce on a given acre the more profit you made.

That is no longer the case. Today, tobacco allotments are made on the basis of poundage. A quota holder can sell only so many pounds of tobacco.

So there is no great need now to try to increase the yield from a specific plot of ground. The amount of land use is not consequential. The average allotment for tobacco in my State of Kentucky is less than 1 acre.

What is important is that some of the great breakthroughs in the question of health and tobacco have come from tobacco production research. Production and health research are interrelated and cannot be separated.

Dean Charles Barnhart, of the University of Kentucky College of Agriculture, where much of this research is carried on, says:

It is very important to maintain the total tobacco research effort if we are to respond to the need for a safer cigarette.

Mr. President, just to give the Members of the Senate some idea of the kind of research that has been carried out under this category, which is labeled production research, I have reports on actual projects that have been undertaken and completed:

"Influence of Herbicides on Burley Tobacco Leaf Chemistry." Again, it is the chemistry of the plant that determines whether or not it is safe or unsafe.

"The influence of Variety and Fertilization on Yield and Composition of Burley Tobacco." Again, it is leaf composition.

"Nature and Fate of Insectide Residues Inhaled by Rats in Cigarette Smoke;" "Insectide Residues in Cigarette Smoke. Transfer and Fate in Rats;" "Influence of Puff Frequency and Puff Volume on the Alkaloid Content of Smoke." What could be more related to the health aspects of smoke than these kinds of projects?

"Cigarette Smoke as a Source of Pesticide Exposure." Again, directly related to health.

Mr. President, I believe this will demonstrate that research under this category, of which all these projects have been a part, is directly related to the production of a safer cigarette.

I point out one thing further: Today, in the Washington Post, on the front page, is a story about a finding by Dr. Gio Batta Gori, who is Deputy Director of Cancer Prevention at the National Cancer Institute—not the Tobacco Institute or the Burley Tobacco Growers Association—who has determined that some cigarettes could be smoked, up to as many as 23 a day, which is more than a pack, with no measurable risk beyond a nonsmoker's.

Progress is being made, as the Senator from Rhode Island pointed out. The point I want to make here is that the program the Senator is attempting to eliminate is in fact a program that has a direct bearing on accomplishing what the Senator, I believe, wants to accomplish, and that is to provide a safer cigarette.

Mr. PELL. Mr. President, I have great respect for the knowledge of the Senator from Kentucky in this field. I am aware that because of his important position and work on both the Appropriations Committee and the Agriculture Committee, he sees this from both sides. I am impressed with his statements.

I ask unanimous consent to have printed in the RECORD an article published in today's Washington Post, in which it is indicated that the only cigarette that is safe is a cigarette that is not lit.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SMOKING—SOME CIGARETTES NOW "TOLERABLE," DOCTOR SAYS

(By Victor Cohn)

Some cigarettes now have so little tar, nicotine and other harmful elements that they can be called "less hazardous" and can even be smoked in "tolerable" numbers without "appreciable" ill effects on the average smoker, a leading federal cancer scientist said yesterday.

Cigarettes in recent years have been found guilty beyond reasonable doubt of causing lung cancer, heart diesease and several other illnesses.

But Dr. Gio Batta Gori, deputy director of cancer prevention at the National Cancer Institute, and Dr. Cornelius J. Lynch said yesterday there has been huge progress "in the last year and year and a half" in removing toxins—or poisons—from some.

They expect this will reduce deaths from all diseases linked with smoking. They expect to report this soon in the Journal of the American Medical Association.

"I am not calling any cigarette 'safe,'" Gori emphasized. "The only cigarette that is safe is the cigarette that is not lit.

"I am not talking about what might happen to any individual. I am talking about averages. There may be a risk that still may be there even though we might not see it in overall, large population studies."

Still, he said, there has been so much progress in removing toxins that "we can now begin to talk about 'tolerable' levels of smoking from an overall, public health standpoint. I think we will begin to see some beneficial effects in this country"—that is, same abatement in this nation's lung cancer epidemic and in other diseases—"in five or six years."

Gori said one brand—Carlton Menthols—is so low in the toxins that most persons could smoke 23 a day, more than a pack, with no measurable risk beyond a nonsmokers'.

He said the average smoker might similarly consume 18 Now Menthols, 17 Nows or Strides or 16 Carltons without any problems beyond a nonsmoker's, so far as large-scale statistical studies could detect.

A cancer institute spokesman yesterday said Gori "probably represents the best expertise we have on smoking and health." Until two weeks ago he headed the institute's program in that field, including the effort to learn to make less hazardous cigarettes.

Dr. Arthur Upton, cancer institute director, nonetheless issued a more cautious statement yesterday saying "our present knowledge does not permit us to establish" any levels "below which smoking might be safe."

"It is the firm position of the National Cancer Institute, the National Heart, Lung and Blood Institute and the Public Health Service that no cigarette now on the market can be considered wholly without risk to health," he said.

He said Gori's figures cannot indicate whether the risk to any single individual is large or small, only that it is "not demonstrable" in epidemiologic or population studies. Upton said "you might double your own risk of cancer," for example, "with no appreciable effect" on large-scale population studies."

Gori also said there are many "high risk" individuals who should "never" smoke. These include present or former workers exposed to asbestos or the families of such workers, women using oral contraceptives, pregnant women, and persons with any of the heart, lung or breathing disorders linked to cigarettes.

Some scientists would also caution anyone exposed to any potentially cancer-causing chemical, since many harmful chemicals add to each others' effects in ways that are still little understood.

"What I am saying," Gori explained, is that the average effect of smoking "tolerable" levels of certain "less hazardous" cigarettes today would be as small as the ill effect on persons who smoked only two cigarettes a day before 1960. Virtually all cigarettes then were loaded with poisons like tar and nicotine far beyond present levels.

Gori disclosed his estimates first in an interview with Associated Press reporter Michael Putzel. The Washington Post then obtained a copy of the Gori-Lynch report.

Lynch is manager of the smoking and health program at Enviro Control Inc. of Rockville, the cancer institute's main contractor in the effort.

The five leading brands of less hazardous cigarettes on the Gori-Lynch list—Carlton Menthols, Now Menthols, Nows, Strides and Carltons—represented just under 2 percent of all cigarettes sold last year, Lynch estimated. But 22 more brands—with 17 to 18 percent of the market—are low enough in toxins so the average smoker might use between three and eight a day without appreciable added risk, Lynch said.

The cancer institute program to remove or minimize the effect of the main toxins found in cigarettes or cigarette smoke—tar or "total particulate matter," nicotine, carbon monoxide, nitrogen oxides and acrolein—began in 1970. At the most it has cost $4 million a year, a drop in the bucket compared to the cost of smoking's huge toll in death and disease.

Still, it is a program that has often been flayed by some critics of smoking who have argued that efforts should be concentrated on halting smoking altogether.

"I think ours has been a worthwhile program," Gori replied. "We are not trying to endorse cigarettes or smoking in any way. We are only trying to put the facts before the public.

"If we could go from 100,000 cases of lung cancer a year to, say, 2,000 or 3,000 by the development of less hazardous cigarettes, I would still regret the 2,000 or 3,000 deaths but I would think we would have made a tremendous public health gain."

Mr. PELL. Mr. President, I ask this question: Can I be sure that the primary purpose of funds allocated under this program will be for research related to the health aspects of tobacco?

Mr. HUDDLESTON. It is my judgment—and I think the facts will bear it out—that that is the situation that is prevailing at the present time. Although it is called production research, virtually all of it is directly related to research or to developing a leaf that would eliminate whatever harmful properties are determined to be involved.

Mr. BELLMON. Mr. President, will the Senator yield?

Mr. PELL. I yield to the Senator from Oklahoma.

Mr. BELLMON. If the Senator will allow me, I ask unanimous consent to print in the RECORD a breakdown of what the tobacco research programs propose for inclusion in the 1979 budget station by station. I believe the Senate will find this information very enlightening.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Tobacco research programs proposed for reduction in fiscal year 1979 budget

Locations and research thrusts	Numbers of people	Funds
Georgia, Tifton—Research on flue-cured tobacco culture practices which includes: plant spacing, fertilization, disease and pest control, and harvest timing—focusing on the deep South growing area. Studies on natural products of fungi metabolism for pest control, and breeding research to inhibit the formation of suckers—abnormal growth stimulated during "topping" when the flower is removed and the natural sucker inhibitor it contains is also removed—which robs sustenance from the leaves yielding an inferior product.		
Scientists	2	$166,400
Support	3	
Kentucky, Lexington—Burley, dark-air and dark fire-cured tobacco breeding and culture practice research which includes: plant spacing, fertilization, disease and pest control, and harvest timing and resultant effects on leaf quality and wholesomeness. Mechanization research on burley tobacco planting, growing, harvesting, curing and pre-marketing handling and storage while maintaining or improving product quality and wholesomeness. This includes homogenized leaf curing where the green leaves are ground up, cured, and pressed into sheets prior to shredding for utilization in cigarettes, for example.		
Scientists	10	728,600
Support	15	
Maryland, Beltsville—Basic tobacco breeding research on a variety of tobacco types including cigar tobacco. Tobacco quality improvement work through new cell and tissue culture technique development. Studies on the basic physiology of growth and growth regulation. Research is also done on means to control the tobacco budworm.		
Scientists	11	824,400
Support	19	
North Carolina, Oxford—Research on flue-cured tobacco breeding and culture practice—plant spacing, fertilization, etc.—to improve and evaluate the inherent quality and wholesome composition of the product. Basic research on tobacco insects and diseases and their control. Research to develop methods and equipment to evaluaute tobacco quality before processing.		
Scientists	10	1,143,800
Support	24	
North Carolina, Raleigh—Tobacco physiology research emphasizing sucker suppression, and research on growth regulation to facilitate mechanized harvesting methods.		
Scientists	2	181,500
Support	1	
Tennessee, Greenville—Burley tobacco breeding and culture practices—plant spacing, fertilization, etc.—for Mountain and Highland Rim growing areas of Tennessee.		
Scientists	2	170,300
Support	4	
Virginia, Richmond—Research to develop and evaluate fumigants, insecticides and application methods in controlling destructive insects affecting stored tobacco. Research to develop and evaluate barriers to insect entry and modification of the storage environment, e.g., moisture and temperature, that will cause physiological dysfunction in the insect.		
Scientists	1	72,000
Support	3	
Totals: Scientists	38	3,287,000
Support	69	

Mr. BELLMON. Mr. President, also, if the Senator will allow me, I join as a cosponsor to the Pell amendment and say that I believe we should look more carefully into this program to be sure just where this money is going.

Mr. President, I join in support of the Pell amendment to delete $3,106,000 from the appropriation for the Agricultural Research Service for tobacco production research. This will cause the termination of all production related to tobacco research conducted in Federal laboratories. Research on health and safetv aspects to tobacco use will be continued at the current level of $2,246,000 annually.

Mr. President, one of the most devastating criticisms which can be lodged against the Federal Government is the observation that it spends billions annually on programs designed to provide health care and treat illnesses while it simultaneously subsidizes activities which can only detract from the public health, such as tobacco production research. While the Congress and the administration are trying to contain the spiraling costs which are associated with medical care, the Government continues to subsidize research into better and more efficient ways to produce tobacco. In case there is any doubt, the health effects of smoking tobacco constitute a serious drain on the country's people and the resources it can devote to health care.

In 1977, smoking was a major factor in 220,000 deaths from heart disease; 78,000 lung cancer deaths; and 22,000 deaths from other cancers, including cancer of the mouth, cancer of the esophagus, cancer of the pancreas, cancer of the kidnev, and cancer of the bladder.

Fortv percent of all cancer in males is caused by smoking.

Eightv-five percent of deaths from bronchitis, emphysema, and other lung disease would not happen—if people would stop smoking.

We now know that unborn children whose mothers smoke during pregnancy may be stillborn or developmentally deficient because of their mothers' heavy smoking.

According to the Secretary of Health, Education, and Welfare, the economic cost of smoking represents each year an additional $5 to $7 billion in health-care costs; furthermore, the cost of lost productivity, wages, and absenteeism caused by smoking is $12 to $18 billion. Yet the Federal Government spends $3,106,000 in tax dollars to find ways to improve the methods of production in the tobacco industry. Such contradiction and inconsistency in Federal policy is a major source of disillusionment and cynicism on the part of voters with respect to the performance of Government.

In 1964, the Surgeon General of the United States issued a report on smoking and health which clearly delineated the health hazards of smoking. The tobacco industry, arguing that the Surgeon General's report was based on insufficient evidence, funded at that time a 14-year, $15 million research project under the auspices of the American Medical Association to further investigate the links between smoking and health. That study has just been released. The AMA Committee for Research on Tobacco and Health, which had responsibility for the study, states that:

> The bulk of research sponsored by this project supports the contention that cigarette smoking plays an important role in the development of chronic, obstructive pulmonary diseases and constitutes a grave danger to individuals with pre-existing diseases of the coronary arteries.

The research report is 365 pages long and contains more than 750 abstracts of individual research projects on the effects of cigarette smoking on various bodily functions. While most of the research linking smoking with cancer has been performed by the National Institutes of Health, this new AMA study also found cancer-causing agents in tobacco. Links between smoking and heart disease and stroke were confirmed by the AMA study. Researchers found that a combination of nicotine and a temporary lack of oxygen can cause irreversible heart damage. They also found smoking increases the risk of blood clots that could cause fatal strokes or heart attacks.

The report indicated that free fatty acids, which have been linked to fatal heart rhythm irregularities, were found in greater amounts in the blood of smokers than in blood samples from nonsmokers. One study found nicotine from cigarettes can irritate the gastrointestinal tract, causing problems ranging from indigestion to peptic ulcers. Another study indicated that cigarette smoke might inhibit the body's bacteria-destroving organisms, making smokers more susceptible to infections. Predictablv, the tobacco companies have repudiated this latest studv, paid for with funds supplied bv the tobacco industry, because it did not provide the answers desired.

Mr. President, this country now de-

votes nearly 10 percent of its GNP to health care and medical expenses. Unless we are successful in controlling the inflation which characterizes these costs we can expect an even higher proportion of the GNP required for health care in the future. Under these circumstances, it is absurd to continue the Government subsidy of tobacco production research when the only consequence of that subsidy can be to increase the production of tobacco products and hence their detrimental impact upon the public health. With one arm of the Government, we are desperately trying to contain medical costs and provide quality medical care; with the other arm of the Government, we are subsidizing tobacco production research as if there were no conflict between that goal and the goal of maintaining and improving the public health.

Congress needs to end this nonsense today, before its credibility is totally destroyed. We have the means to do this today, by simply terminating funding for tobacco production research.

Since 1965, our production of tobacco in this country has risen from 1,854,586,000 pounds to a total of 2,134,184,000 pounds in 1976. During this same period, our domestic consumption of cigarettes has risen from 511.5 billion in 1965, to 607.4 billion in 1976. The significance of these figures is to demonstrate how efficient that we have become in the production of tobacco and the most widely used product of tobacco, cigarettes. This efficiency has been promoted by the Federal Government by providing moneys through research efforts to make tobacco production a more provtable enterprise. With recent information made available by a study financed by tobacco companies themselves, this production research effort is totally counter-productive.

Mr. EAGLETON. Mr. President, will the Senator yield?

Mr. PELL. I yield the floor.

Mr. EAGLETON. Mr. President, I have a few remarks to make on the amendment. Perhaps the Senator from North Carolina, though wishes to speak on the amendment.

Mr. HELMS. I thank the distinguished manager of the bill.

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

Mr. HELMS. Mr. President, I want the distinguished Senator from Rhode Island to know that this Senator from North Carolina respects his motivations and understands them, and while I do not agree with the Senator in terms of what the amendment would achieve, I know what his intentions are. I want him to know that I have the utmost respect for him.

I shall not reiterate what my friend from Kentucky, Senator HUDDLESTON, has said because there is no use burdening the record with a duplication of argument, but it should be emphasized, Mr. President, that a major emphasis of tobacco production research does give consideration to health-related matters.

The Senator from North Carolina believes that is as it should be, and I am very pleased that such production research has always been attentive to that consideration.

I have often shared such information with the Senators and will not consume the Senate's time in recounting every detail again. Earlier this year, I did extensive study of an exciting new development in the utilization of tobacco as a source of protein—food to feed a hungry world—a project very dependent upon tobacco production research.

In a letter to Senator EAGLETON of March 13, 1978, and inserted in the RECORD on April 20, I outlined the five major areas of tobacco production research conducted at the Oxford, N.C. Research Station. Four of those stated purposes are directly beneficial to health related matters as well as enabling farmers to produce a more valuable crop at less cost and at less damage to the environment—by genetically altering the chemical constituencies in tobacco leaf and other methods.

In addition, the tobacco production research laboratories provide almost all the leaf used in pure health related research, according to the USDA.

Further, in remarks on June 19, I discussed how tobacco production research designed to lessen the farmers dependence upon pesticides and other agricultural chemicals also directly benefits production of peanuts and soybeans—two of the most nutritious crops grown—through the use of one kind of insect to prey upon another.

So that the record may conveniently reflect the excellent achievements of tobacco production research in considering the health and welfare of our people, I ask unanimous consent that certain of these materials be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so rodered.

(See exhibit 1.)

Mr. HELMS. Mr. President, the distinguished Senator from Kentucky (Mr. HUDDLESTON) has no peer when it comes to looking after the best interests of his tobacco farmers. Indeed, DEE HUDDLESTON is regarded as the "spokesman" for burley tobacco farmers in the Senate. He is very knowledgeable and helpful in matters relating to flue-cured tobacco as well. Time and time again, the able Senator from Kentucky has stood firm in his defense of tobacco farmers, and his help to me has been invaluable.

I recall that in 1977 when our flue-cured loan rates were under assault from the administration, it was Senator HUDDLESTON who helped turn the tide. The president of the North Carolina Farm Bureau Federation told me our success that day saved farmers in my State of North Carolina alone $10 million a year.

It is a privilege to work with the Senator from Kentucky. We share a willingness to go to every proper length to defend tobacco, and to protect the livelihoods of hundreds of thousands of tobacco farmers in his State and mine. I commend my friend from Kentucky, and thank him for the privilege of working with him on matters of mutual interest.

I thank the Chair and the Senator for yielding.

EXHIBIT I

TOBACCO—A MAJOR FOOD SOURCE FOR A HUNGRY WORLD?

Mr. HELMS. Mr. President, over 350 years ago tobacco provided this Nation with its first cash crop. Today it is supporting more than 500,000 farm families. In my State alone over 150,000 families depend upon tobacco as the vital cash crop. It is tobacco that enables these farm families to remain on the small family farm to produce the food and fiber that our country and the rest of the world need.

Last year, taxes on tobacco amounted to more than $6 billion—$2.5 billion to our national treasury, and $3.6 billion to the States, cities, and counties.

Tobacco exports are contributing more than $1 billion to our international trade balance this year—over 100 countries are buying our tobacco. It is not only the finest tobacco crop in the world, but nearly the largest—only China's is bigger.

Mr. President, these statistics tell an important story about tobacco. Unfortunately, the administration seems to have forgotten the crucial role tobacco plays in this country's agricultural economy.

President Carter's Secretary of Health, Education, and Welfare has virtually declared war on tobacco, a decision that has left tobacco farmers, manufacturers, workers, and exporters disillusioned and frightened.

Secretary Califano, you may remember, even suggested that tobacco farmers should quit farming and go on welfare. Then he announced that the administration would spend $23 million in a massive advertising campaign against tobacco. Just the other day, Mr. Califano again attacked the tobacco companies for what he termed "sinister" advertising.

That is not all. The Carter administration's proposed budget for fiscal year 1979 represents yet another serious attack on tobacco. If the administration has its way, all funding for tobacco production research will be terminated. This research is conducted in various States, including Georgia, Maryland, North Carolina, Virginia, and Tennessee.

Mr. President, several of us have appealed time and time again to the President and Secretary Califano urging them to reconsider their actions. But so far, these appeals have been in vain.

The total elimination of the federally supported program of tobacco research greatly troubles me. Had it not been for this research—which the administration now proposes to end—tobacco would not be grown efficiently in the United States today. Those impressive figures I mentioned at the beginning of my remarks simply would not exist.

Tobacco research efforts designed to develop a safer product, to improve production methods for our farmers, and to conduct scientific studies on potential new uses of tobacco have apparently been the victim of the administration's negative approach toward tobacco generally.

This sad turn of events, Mr. President, is so disturbing to me because right now our scientists are working on a new project to extract protein from green tobacco leaves. This offers great potential for producing protein for food; and by removing the protein from tobacco, a safer smoking product should be obtained. Instead of pursuing their attacks on tobacco and related research, I urge administration officials, and indeed Mr. Califano himself, to carefully examine—as I have—the promising benefits of this tobacco protein research.

Late last month, I spoke at some length with a distinguished scientist in California, Dr. Benjamin Ershoff, president of the Institute of Nutritional Studies at Culver City, Calif.

As Secretary Califano should have known, Dr. Ershoff, and another distinguished scientist, Dr. Samuel Wildman of the University of California at Los Angeles, have together achieved an astonishing breakthrough

in experiments showing that tobacco has the highest potential of any green plant in providing protein to feed, and to improve the health of hungry people all over the world.

Also, as Secretary Califano should have known, the National Science Foundation is excited about the discovery achieved by Dr. Ershoff, Dr. Wildman, and other distinguished tobacco research scientists.

But there is another equally important potential in this discovery. Today, thousands of Americans suffer diseases to the kidney and other vital organs. Preliminary test indicate that the use of protein from tobacco may very well save the lives of people whose present hope of survival is limited to the use of kidney machines and expensive medication.

And what is the potential effect for North Carolina's farmers—as well as those from the other tobacco producing States?

Dr. Ershoff told me that the downstalk tobacco, which now presents a problem of oversupply, can be used for the production of food protein, thus indicating a multibillion-dollar market for tobacco growers.

He also suggested that tobacco farmers could probably plant, harvest and sell two crops each year, instead of one—if and when the protein potential of tobacco can be fully developed. Dr. Ershoff also stated that this could occur in the relatively near future if research funds for testing and developing are made available.

One further comment from Dr. Ershoff: He suggested that, when tobacco can be commercially produced for its protein content, 20 times as much tobacco can and should be grown per acre. We would, of course, have to coordinate this kind of production with our present tobacco support program which we want to protect.

Think of the income potential for our tobacco farmers. Think of the economic opportunities for the United States in exporting to other countries a product which will both relieve the hunger of the world, and improve the health of the people of the world.

Mr. President, earlier this month I toured the Tobacco Research Laboratory at Oxford, N.C. Much of the work on extraction and recovery of tobacco leaf protein is now in progress there; however, this research will stop unless Congress restores the funds the administration wants to cut.

In Oxford, I saw first-hand the efforts of Dr. James F. Chaplain and his staff to make protein recovery from tobacco leaf commercially feasible. It was also my privilege to meet with Dr. Thurston Mann, assistant director of the North Carolina Agricultural Experiment Station in charge of tobacco research, who definitely feels this research has great potential. Also with me at Oxford was Dr. E. Leon Moore, one of the outstanding scientists in this field of research who himself developed a tobacco variety resistant to root knot nematode while employed at the Oxford laboratory.

Mr. President, after seeing the research work in progress at Oxford and talking with some of the distinguishsd scientists and leaders in this effort, I am convinced that tobacco will continue to be an important agricultural crop in our Nation's economy.

The point, Mr. President, is that this is clearly not the time to terminate tobacco research funding from the Federal budget. While much has been accomplished, the need for continued research should be obvious. Indeed, the Federal Government ought to consider increasing the $3 billion current outlay for this research.

We should give more than just a passing interest to the studies of outstanding scientists who tell us that within 10 to 20 years tobacco grown as a food crop will be one of the major agricultural products in the world.

I urge the administration to reverse its negative position on tobacco and to join in a creative approach to solving problems confronting us all. Instead of shutting down vital research facilities, let us make even greater use of creative and constructive research for the betterment of mankind.

Mr. President, I ask that Dr. Ershoff's letter, the Wildman, Kwanyuen-Ershoff paper presented to the NSF Conference on Nonconventional Proteins and Foods, my letter to Senator EAGLETON seeking reinstatement of tobacco research funding, two reports on the Oxford Tobacco Research Laboratory, and a summary of tobacco research affected by the President's proposed budget elimination all be printed in the RECORD following my remarks. I urge my colleagues to give this matter the serious attention and study I so strongly believe it merits.

The material follows:

INSTITUTE FOR NUTRITIONAL STUDIES,
Culver City, Calif., March 31, 1978.

Senator JESSE HELMS,
Russell Senate Office Building
Washington, D.C.

DEAR SENATOR HELMS: Dr. S. G. Wildman and I are most grateful for the interest you expressed during our telephone conversation of March 30th concerning our studies on tobacco proteins. We feel that such studies have the potential of vastly improving the economic status of the tobacco growers not only in your state but throughout the entire country, and we feel that within 10 to 20 years tobacco grown as a food crop will be one of the major agricultural products in the world.

With the rapid increase in world population, the importance of obtaining new sources of protein fit for human consumption, high in biological value and low in cost, cannot be overemphasized if worldwide protein malnutrition is to be avoided in the future. Leaf proteins are by far more abundant of all protein sources; but for them to serve as a significant source of protein for man, they must be concentrated. The cost of such concentration has priced these proteins out of serious consideration as a source of protein in the past. Technological improvements in the concentration of leaf proteins (particularly from tobacco) now make it possible to produce at nominal cost highly purified proteins from tobacco of high biological value to have no odor or taste and that can be added to foods to improve their protein content without altering their appearance, texture or taste.

When tobacco is grown for smoking purposes, the plants are harvested when mature. In the case of Burley tobacco grown in Kentucky, tobacco culture as presently practiced calls for planting approximately 8,000 plants per acre. When tobacco is grown as a food crop for its protein content, however, the plants are harvested while still immature (i.e., approximately 6 weeks after the seeds are planted with a second harvest from the same plant 4 weeks later). Under the latter conditions, close spacing culture is employed with as many as 150,000 plants per acre. Two or more plantings can thus take place depending on weather conditions during the course of the growing season. This can result in a substantial increase in the financial return to the farmer per acre of land per year over that obtained when tobacco is grown for smoking purposes.

Dr. Wildman and associates have prepared from young tobacco plants 3 different classes of proteins of major economic importance: (1) a crystalline, water-soluble protein of high biological value that contains no sodium or potassium that would have marked value in the treatment of patients with certain kinds of renal, liver and heart disease; (2) a series of water-soluble proteins of high biological value that are odorless, colorless and tasteless that could be incorporated in beverages, liquid foods (such as soups for senior citizens), etc. to increase their nutritional value; these proteins would be particularly valuable in the preparation of milk replacers in parts of the world where milk is not readily available for infants and children; and (3) a non-soluble protein that could be incorporated into cereal grain products, flour and other food substances to increase their protein value both quantitatively and qualitatively.

The material remaining from tobacco plants after the above protein products are removed can be processed to produce material that is similar in color, texture and taste to various blends of smoking tobacco but from which many of the constituents which have patients suffering renal failure, maintaining adequate protein nutrition of patients with pylorospasms and other disorders of the gastro-intestinal tract, and as a more adequate milk replacer for infants and children allergic to cow's and goat's milk. The absence of taste altogether with superior nutritional quality would indicate F-I-p to have advantages over current protein hydrolysates employed in medically supervised reducing diets.

U.S. SENATE,
Washington, D.C., March 13, 1978.

Hon. TOM EAGLETON,
Chairman, Subcommittee on Agriculture and Related Agencies, Committee on Appropriations, Washington, D.C.

DEAR TOM: The Administration's proposed budget for Fiscal Year 1979 terminates all funding for tobacco production research. This research is conducted in various states, including Georgia, Kentucky, Maryland, North Carolina, Virginia, and Tennessee, at a total cost of $3,311,000.

The elimination of these research programs represents another serious blow to our farmers who are in the midst of the worst farm crisis since the Great Depression. Farm income, which, in terms of current dollars, was $33 billion four years ago (1974), fell to about $20 billion in 1977. To cut research programs out from under the American tobacco farmer in this manner again shows an insensitivity to what is happening to farmers all over the nation.

Senators Huddleston, Ford, Stone, and I met with Rupert Cutler, Assistant Secretary for Conservation, Research, and Education, on February 3, 1978 to protest the elimination of these vital research efforts from the President's proposed budget. In our meeting with Mr. Cutler, there was no doubt that we had persuaded him of the necessity to restoring the money. He took our request back to the Office of Management and Budget with the recommendation that funds be provided for the tobacco research program. Unfortunately, OMB refused to alter its original decision to cut off these funds. What bothers me a great deal is that administration officials were apparently not even aware that these research programs were actively involved in the general area of health and smoking research when the decision was made to eliminate the funds.

On March 8, 1978, the Senate Agriculture Committee voted its recommendation to include funding for tobacco production research in the 1979 budget. Thus, I am writing you now to urge your support for inclusion of this funding in the budget.

I am particularly concerned about the closing of the Richmond, Virginia Stored Tobacco Insects Laboratory and the Oxford, North Carolina Tobacco Research Laboratory. There are very strong reasons for continuing both of these facilities in operation.

I have enclosed with my letter a statement prepared by Fred G. Bond, General Manager of the Flue-Cured Tobacco Cooperative Stabilization Corporation in Raleigh, North Carolina, supporting the funding of both the Richmond and Oxford facilities. I hope you will take time to study his remarks, particularly dealing with the benefits of the Richmond Laboratory research which has provided solutions and control methods that have protected and preserved stored tobacco.

especially as it relates to Commodity Credit Corporation's interest and investment.

The Oxford Tobacco Research Laboratory has an outstanding record of accomplishments in tobacco research throughout the years of its existence. The research work at Oxford, begun in 1912, emphasizes tobacco production efficiency and the development of a safer product. The research work at Oxford has long been important for improving the over-all economy of North Carolina, the flue-cured tobacco growing region of the Southeastern United States, and all tobacco growing areas of the country. The primary objectives of the research at the laboratory are:

(1) Breeding and developing varieties and lines resistant to diseases and insects with varying chemical and other quality characteristics.

(2) Controlling disease by use of pesticides that leave little or no residue and the use of methods that do not require the use of pesticides.

(3) Controlling tobacco insects by nonchemical means, such as use of male sterile techniques, better use of insect predators, and host plant resistance.

(4) Improving quality of the cured leaf by eliminating or reducing chemical constitutents that might be harmful to health. This is being done by breeding, curing methods, and cultural practices.

(5) Reducing labor requirements for the production of tobacco by developing breedline lines and varieties that may be more adaptive to mechanization and different harvesting methods.

A new project is the extraction of protein from green tobacco leaves. This offers great potential for producing protein for food; and by removing the protein a safer smoking product should be obtained.

Researchers at Oxford developed the first Granville Wilt resistant, the first black shank resistant, and the first root knot resistant variety of tobacco. If it were not for this research, tobacco could not be efficiently grown in this country. So many of our citizens—600,000 farm families nationwide and over 150,000 in my state alone—depend upon tobacco as an important cash crop. It is this crop which enables them to remain on the small family farm to produce the food and fiber that our country and the rest of the world needs.

The Oxford laboratory should be looked upon as a vital component of the total research program in tobacco. Termination of production research will leave health research personnel without support or plant materials to work with, which will seriously jeopardize or even paralyze the health-related tobacco program.

If this funding is not restored, experienced tobacco production scientists will be no longer available to conduct any crash program in the event of a ma'or disease or other important production problem. The U.S. tobacco industry could soon be relying on foreign tobacco producers to supply their raw materials.

Approximately 40% of the U.S. grown flue-cured tobacco is sold in overseas markets. Because of the demand for American quality in world markets, exports of tobacco and tobacco products resulted in a positive net contribution of $1.2 billion to the U.S. balance of payments last year. If this is to be maintained, it is imperative that research efforts must continue in the years ahead.

Your consideration of this matter is appreciated. In addition to Mr. Bond's statement, I am also enclosing some helpful and convincing information about the Oxford Laboratory, as well as a synopsis of the tobacco production research programs and the amounts necessary to continue them. I strongly urge the Subcommittee to restore those funds. As you know, the Agriculture Committee has recommended that action.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. EAGLETON. I yield 1 minute to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I rise in opposition to the amendment offered by the able and distinguished Senator from Rhode Island (Mr. PELL). I respect the Senator for offering this amendment. However, I feel that it is counterproductive to his purposes to eliminate tobacco research under the Agricultural Research Service by $3.1 million.

Tobacco research in the past 10 years has proven to be one of the most cost effective research programs under the Agriculture Research Service. This is not only in terms of production research but also in health research. Researchers work to develop higher yielding, more disease resistant varieties of tobacco, while also working to reduce health hazards. In fact, this very research is responsible for today's low tar and nicotine content cigarettes.

This amendment is simply another attempt at destroying the tobacco support program.

The flue-cured tobacco program is unique, in that for 44 years we have maintained a program based upon production control and price supports. Few, if any other, farm program can match its record of farmer cooperation and fiscal responsibility.

In my home State, as well as in the other flue-cured tobacco-producing States, the flue-cured tobacco farmer typifies the "family farmer." This remains true even though many changes have taken place over the years. In the early years of the program all the cultivation was done with mules and the crop was hand harvested by the family and neighbors. Now we are in an age of expensive tractors, bulk barns, and mechanical harvesters. Yet, despite this extensive mechanization, the flue-cured tobacco farmers still exemplify the independent family farm operator whose economic vitality is essential to future well-being of American agriculture.

Because of the willingness of the flue-cured tobacco leadership to make legislative changes to meet changing conditions, and because of the flexibility of the program, the program we have today remains basically the same as it was at the beginning. This longevity of the program indicates to me that it has remained fundamentally strong.

Mr. President, I urge my colleagues not to support this amendment. Production research and health research in tobacco are inseparable. To reduce funding for research by $3.1 million would only result in less health research. This is not what this amendment wishes to accomplish. It is my hope the distinguished Senator from Rhode Island will see fit to withdraw the amendment.

Mr. FORD. Mr. President, will the distinguished floor leader yield me 1 minute?

Mr. EAGLETON. I yield 1 minute to the Senator from Kentucky.

Mr. FORD. Mr. President, I thank the Senator from Missouri.

I associate myself with the remarks made by my distinguished colleague, Senator HUDDLESTON.

I also wish to make it a part of the record that the State of Kentucky spends $4 million annually of its own money without any Federal funds in the area of research, and I have been told by those who should know that this program that the distinguished Senator from Rhode Island is trying to eliminate in fact gave us the low tar and nicotine cigarette that we now see coming on the market, and I think he has the best of both world. He is interested in having a low tar and nicotine cigarette and a safe cigarette. The industry itself is probably in the biggest war of any industry in order to try to come up with a low tar and nicotine cigarette.

I encourage him to withdraw his amendment.

Mr. EAGLETON. Mr. President, I wish to speak on the Pell amendment.

I identify myself with Senator PELL in this regard. I am a confessed smoker, but nonetheless am concerned about the health hazards of smoking. I am very impressed by a reading, albeit not a reading in depth, of the recent report by the American Medical Association based on their 14 years of study. The report, by the way, was financed by the tobacco companies themselves at a cost of some $15 million. The result of the study is once again a very clear indictment of the health hazards of smoking.

I smoke about a pack and a half of cigarettes a day. I presume that on an annual basis, that takes about a week or maybe 30 days off my life by continuing that obnoxious habit.

So next year, Mr. President, I intend to hold hearings by the Agriculture Appropriations Subcommittee, in which Senator BELLMON and I will participate. We are going to welcome the participation of any and all experts who wish to address their remarks to us on this subject matter. This will include scientists, researchers and Federal officials and it will certainly include, if desired, the tobacco companies, plus partisans from their point of view.

So, I would expect that about from now when the fiscal 1980 Agriculture appropriations bill is on the floor of the Senate we will have a rather full debate on this subject matter. I think that we will by that time we will have had the benefit of full testimony from the American Medical Association based on this 14-year, $15 million study, as well as detailed testimony of others.

I share Senator PELL's viewpoint that it is duplicitous and nonsensical to say the least to appropriate Federal dollars to encourage the further production of tobacco on the one hand while on the other hand, to wage war on the use of tobacco by the Department of HEW.

How many times do we get letters from our constituents, Mr. President, saying the Government is inconsistent, that Government says one thing but does another. We have to answer those letters. Well, any letterwriters who write to me on this one and say that the Federal Government is inconsistent in how it treats of the production and use of tobacco, will receive the honest answer, which is a categorical yes. We are very insonsistent to encourage tobacco production on the one hand and to discourage use on the other.

So I think that about a year from now, after we have been able to hold these detailed hearings and after we have been

able to go through, meticulously and carefully, the AMA's report, that this matter be the subject of a complete senatorial debate. I do not think we are prepared for that now.

The AMA study just came out a few days ago. As I say, I have been able to give it a rather cursory appraisal, and I believe a much closer study than that would be advisable. We will provide that opportunity early next year when we hold hearings on the 1980 agriculture appropriations bill.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. EAGLETON. I am pleased to yield to my colleague from Georgia.

Mr. TALMADGE. Mr. President, one of the objectives to agricultural research is to develop lower nicotine tobacco, is it not?

Mr. EAGLETON. There are different types of research, if I may respond to the Senator from Georgia. There is the health-related research in which one might look at growing tobacco with lower tar or nicotine. There is other research that spends Federal money to determine how to grow more tobacco, or how to grow it in a more efficient way, and it is the latter kind of research that I find inconsistent with the health objectives of the Department of Health, Education, and Welfare.

Mr. TALMADGE. Will the Senator yield further?

Mr. EAGLETON. I yield.

Mr. TALMADGE. Did he not notice an article I believe that appeared in the morning paper that some medical authorities were quoted as saying that certain types of cigarettes were not bad for your health? Did the Senator see that article this morning?

Mr. EAGLETON. I did not see that article in the morning paper. I know there is a cigarette out that is made out of spinach.

It is absolutely awful. I tried it, and I do not like the spinach cigarette.

Mr. TALMADGE. I do not smoke cigarettes. The Senator knows I do smoke a cigar, but I could not go for spinach either.

I thank the able Senator.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. To answer the points raised by the Senator from Georgia, the article was put in the RECORD a little earlier in the course of the debate, and it does show the difference between different kinds of cigarettes.

But my understanding from my colloquy with the Senator from Kentucky is that the primary purpose of funds allocated under this program will be for research relating to health aspects of tobacco.

Mr. HUDDLESTON. I believe it is an accurate statement of the situation as it exists now.

Mr. TALMADGE. I think that is correct, and I tried to make that point in my colloquy with the distinguished chairman of the subcommittee and floor manager of the bill.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator yield me 1 minute?

Mr. EAGLETON. I yield 1 minute to the Senator from Virginia.

Mr. HARRY F. BYRD, JR. I think the able Senator from Kentucky (Mr. HUDDLESTON) has made an excellent presentation.

The arguments against the pending amendment indicated, and the Senator from Kentucky emphasized, the importance of this research in developing a more healthful product which, I think, would be the objective of almost everyone, absent the complete prohibition on smoking, which I know of no one who will suggest that.

I just want to commend the Senator from Kentucky for his presentation and to associate myself with his views.

TOBACCO PRODUCTION RESEARCH

● Mr. MORGAN. Mr. President, I would like to associate myself with the remarks just made by the distinguished Senator from Kentucky (Mr. HUDDLESTON). One of the three research stations that would be essentially eliminated by the amendment offered by the Senator from Rhode Island is in my home State of North Carolina. That center, the Oxford Tobacco Research Station, has five principal research objectives, four of which that are directly related to health concerns. Nearly all of the research that is currently being generated at Oxford has, as a primary consideration, improvement in the health of our people. Mr. President, I believe that the evidence will indicate that the concerns of the Senator from Rhode Island are recognized in the Nation's tobacco research program.●

Mr. HUDDLESTON. I thank the Senator.

Mr. PELL. Mr. President, with respect that I have for the knowledge of the Senator from Kentucky and because of his reassurance that the primary purpose of the funds allocated under this program will be for research relating to health aspects, I ask unanimous consent to withdraw my amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The amendment is withdrawn.

UP AMENDMENT NO. 1638

(Purpose: To reduce total budget authority by $126,500,000)

Mr. EAGLETON. Mr. President, I have an amendment on behalf of myself and Senator BELLMON, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Missouri (Mr. EAGLETON) for himself and Mr. BELLMON proposes an unprinted amendment numbered 1638.

Mr. EAGLETON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

COOPERATIVE STATE RESEARCH SERVICE

On page 11, line 22, strike out "$113,866,000" and insert in lieu thereof "$104,366,000".

On page 13, line 10, strike out "$199,520,000" and insert in lieu thereof "$190,020,000".

RURAL HOUSING INSURANCE FUND (RENT SUPPLEMENT)

On page 25, line 5, strike out "$30,000" and insert in lieu thereof "$25,000".

On page 25, line 10, strike out "$555,000,000" and insert in lieu thereof "$462,500,000".

RURAL WATER AND WASTE DISPOSAL GRANTS

On page 27, line 14, strike out "$300,000,000" and insert in lieu thereof "$265,000,000".

VERY LOW INCOME HOUSING REPAIR GRANTS

On page 27, line 19, strike out "$24,000,000" and insert in lieu thereof "$19,000,000".

RURAL HOUSING FOR DOMESTIC FARM LABOR

On page 27, line 24, strike out "$38,000,000" and insert in lieu thereof "$33,000,000".

RURAL DEVELOPMENT PLANNING GRANTS

On page 28, strike out lines 14 through 18.

RURAL HOUSING SUPERVISORY ASSISTANCE GRANTS

On page 28, strike out lines 19 through 21.

SALARIES AND EXPENSES, FARMERS HOME ADMINISTRATION

On page 29, line 14, strike out "$230,582,000" and insert in lieu thereof "$217,582,000".

GREAT PLAINS CONSERVATION PROGRAM

On page 36, line 20, strike out "$23,288,000" and insert in lieu thereof "$13,288,000".

NONPOINT SOURCE POLLUTION CONTROL GRANT AGREEMENTS AND TECHNICAL ASSISTANCE

On page 37, lines 9 and 10, strike out "$75,000,000" and insert in lieu thereof "$60,000,000".

NONPOINT SOURCE POLLUTION CONTROL COST-SHARING

On page 42, line 11, strike out "$25,000,000" and insert in lieu thereof "$20,000,000".

EXTENSION SERVICE

On page 13, line 22, strike out "$186,831,000" and insert in lieu thereof "$179,831,000".

On page 14, line 20, strike out "$267,383,000" and insert in lieu thereof "$260,383,000".

ANIMAL AND PLANT HEALTH INSPECTION SERVICE

On page 8, lines 10 and 11, strike out "$233,150,000" and insert in lieu thereof "$230,150,000".

MUTUAL AND SELF-HELP HOUSING

On page 28, line 3, strike out "$16,500,000" and insert in lieu thereof "$13,500,000".

RURAL FIRE PROTECTION

On page 28, strike out lines 8 through 13.

Mr. EAGLETON. Mr. President, I ask unanimous consent that this amendment be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, I ask unanimous consent that despite the fact that this amendment in part amends figures already amended that it nevertheless be considered in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, let me describe this amendment that we put together hurriedly, in part last night and in part this morning. The reason for the amendment, Mr. President, is that as a body we have accepted the following amendments that have added the following amounts to the bill: the Hathaway amendment on the agricultural conservation program, $105 million; the Melcher animal health amendment, $20 million; the Morgan cotton dust study amendment, $200,000; and the Eagleton-Dole-Zorinsky grasshopper amendment, $5 million. All together, that totals **$130,200,000.**

The bill in this posture, Mr. President, will undoubtedly be vetoed. Despite strenuous efforts by Senator BELLMON and myself to keep this bill down, it has been increased at the subcommittee level, the full committee level, and on the Senate floor.

I point no finger of blame at that. I mentioned that one of the add-ons is the Eagleton-Dole-Zorinsky grasshopper amendment. I guess I am, in part, guilty of adding funds. But the grasshopper situation is a recent phenomenon that we were not aware of when the bill was put together.

The net result of all of this, Mr. President, is that we have now exceeded the House bill in comparable budget authority. We are also roughly $400 million or so over the President's budget.

Although no direct threats have been made to the body or to any individual Member thereof, it is certainly within the veto range.

Well, what can we do about that? When we go to conference it is likely that the bill will be increased and will come back out of conference with figures higher than both the House and the Senate. That is because the House sometimes yields to the Senate and takes the Senate's high figures, and the Senate then yields on other portions and takes the House's high figures. This has almost become an art form with the Defense appropriations bill. I have seen some, what I would call, rather temperate Defense appropriations bills go into conference and come back as giants from a monetary and fiscal point of view.

So we can go to conference and, more than likely, come back with a figure even higher than the $400 million over the budget. Maybe by that time it will be up to $500 million, and then we know it would be vetoed.

Then we will start all over again. We do not have to hold the 20 days of hearings we have already held, I guess, but we just start from ground zero again and mark up the bill again.

As an alternative, we can try to salvage the operation with an amendment, and that is what Senator BELLMON and I are seeking to do with the amendment now before the body. Let me just summarize what this amendment is about. It would take $126.5 million from the bill in the following categories: $9.5 million from cooperative research; $5 million from rent supplements; $5 million from housing repair grants; $5 million from domestic farm labor grants; $5 million from rural development planning grants; $2.5 million from housing supervisory grants; $35 million from water and waste disposal grants; $13 million from Farmers Home salaries; $10 million from Great Plains conservation; $20 million from the nonpoint source pollution program; $7 million from the Extension Service; $3 million from the Animal and Plant Health Inspection Service; $3 million from mutual and self-help housing grants; and $3.5 million from rural fire protection grants. The grand total, as I stated, is $126.5 million. I ask unanimous consent that a list showing the program reductions in this amendment be printed in the RECORD at this point.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

Specific program reductions

[Dollars in millions]

Cooperative Research—Reduce formula grants by $9.5 million	−$9.5
Rent supplements—Provides 25,000 new units instead of 30,000 new units	−5.0
Housing repair grants—cuts 20 percent from budget request, which had risen by 150 percent over 1978 (program level reduction)	−5.0
Domestic Farm labor grants—cuts about 20 percent from request, which increased from $8 to $38 million from 1978 to 1979 (program level reduction)	−5.0
Rural Development planning grants—Eliminates lower priority program	−5.0
Housing supervisory grants—Eliminates unbudgeted item	−2.5
Water and waste disposal grants—deletes unbudgeted increase	−35.0
Farmers Home Salaries—Provides 594 new positions instead of 1200	−13.0
Great Plains Conservation—Program level reduction	−10.0
Section 208 Non Point Source Pollution—Program level reduction	−20.0
Extension Service—Smith-Lever Grants and Retirement	−7.0
Animal and Plant Health Inspection Service, consisting of:	−3.0
Brucellosis	−1.0
Noxious weed	− .2
Range Caterpillar	− .5
Fever ticks	−1.0
Cattle scabies	− .3
Mutual and Self-Help Housing Grants	−3.0
Total	−$126.5

In all but three of those programs, Mr. President, we are reducing items in the bill so they are closer to or all the way back to the budget level. In three programs we cut below the President's budget. These are: housing repair grants, domestic farm labor grants; and mutual and self-help housing grants.

The Department of Agriculture, as a matter of consistent policy, of course, sticks with its budget. So the Department of Agriculture supports all portions of this Eagleton-Bellmon amendment except the three I just enumerated. They endorse in overall thrust that we are seeking to do because they know best of all the dangers of getting into the veto range where we are now.

So here, then, is the choice before us, Mr. President: we take this remedial action at this time in the hope that we can salvage something and work out a bill in conference that will be signed by the President. Or, if we do not take this, then I think we are pell-mell and most assuredly traveling down the road to an almost certain veto.

I have conferred on this amendment a 2-percent across-the-board cut amendnot only with Senator BELLMON, but with Senator LUGAR, who had intended to offer ment. Senator LUGAR has informed me and Senator BELLMON that if this amendment passes, he will not offer his 2-percent amendment.

So, to summarize, Mr. President, some of these programs, I think, are very good ones. It was the judgment of our committee when the bill came to the floor that the programs in here were worthy. I am reluctant about some of the cuts that we are proposing, but reality is reality, and the veto threat is indeed a reality.

So I think this is the kind of fiscal medicine that perhaps this bill is going to require. I yield at this time to my colleague, the Senator from Oklahoma (Mr. BELLMON).

Mr. BELLMON. I thank the Senator from Missouri.

Mr. President, I join in support of this amendment somewhat reluctantly. The subcommittee tried hard to bring to the floor a tight bill, one that we felt covered the most pressing needs of the programs that this appropriation will fund. We worked for several weeks through hearings and through markups to bring such a bill to the floor, but now that the action of the Senate has added substantial sums of money to the bill, I join in the feeling that we must reduce it or we are going to wind up with a veto.

This bill as it presently stands has the potential of exceeding the Senate budget resolution allocation by $579 million. Let me state that figure again: This bill, as it now stands, is $579 million above the budget resolution taking into account likely future happenings. That simply means that unless the bill is cut back, some other program will have to be cut back.

I agree that we should do all we can to bring this bill down to the allocation which the budget provides. Even with the amendment proposed by the Senator from Missouri, should it be agreed to, the bill will still be $453 million above the budget resolution.

Mr. President, I much prefer this kind of surgical cut to an across-the-board 2-percent, 3-percent, or 4-percent cut. To me, those across-the-board cuts are much less responsible, because they hit all programs. We have gone through this bill, choosing the programs that appear to be most able to stand some small cut without doing serious damage to the operation of the total USDA program. I believe when Senators look at what we have done here, they will agree that we have taken out generally the low priority programs, and in most cases, still left enough in the programs to continue the activity, though at a reduced rate.

Therefore, I strongly urge a vote in support of the Eagleton amendment as the best way. While I do not believe we can be assured that the bill will be signed even if this amendment is approved, I do believe it has a much better chance than if we send a bill down to the President that is $400 million over his budget and more than $500 million over the Senate's own budget resolution.

Mr. EAGLETON. Mr. President, I am prepared to yield back the remainder of mainder of my time.

Mr. BELLMON. I yield back the remainder of my time.

The PRESIDING OFFICER (Mr. SARBANES). All remaining time having been yielded back, the question is on agreeing to the amendment of the Senator from Missouri (Mr. EAGLETON). The yeas and

nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZEK) and the Senator from Minnesota (Mrs. HUMPHREY) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "yea."

Mr. STEVENS. I announce that the Senator from New York (Mr. JAVITS) is necessarily absent.

The result was announced—yeas 73, nays 24, as follows:

[Rollcall Vote No. 310 Leg.]

YEAS—73

Anderson	Glenn	Nelson
Baker	Goldwater	Nunn
Bartlett	Griffin	Packwood
Bayh	Hansen	Pearson
Bellmon	Haskell	Pell
Bentsen	Hatch	Percy
Biden	Hatfield,	Proxmire
Bumpers	Mark O.	Ribicoff
Byrd,	Hayakawa	Riegle
Harry F., Jr.	Heinz	Roth
Byrd, Robert C.	Helms	Sarbanes
Cannon	Hollings	Sasser
Case	Inouye	Schweiker
Chafee	Jackson	Scott
Chiles	Johnston	Sparkman
Church	Laxalt	Stafford
Cranston	Leahy	Stevens
Curtis	Long	Stevenson
Danforth	Lugar	Talmadge
DeConcini	Magnuson	Thurmond
Dole	Mathias	Tower
Durkin	Matsunaga	Wallop
Eagleton	McIntyre	Weicker
Eastland	Moynihan	Williams
Garn	Muskie	Young

NAYS—24

Allen	Hatfield,	Metzenbaum
Brooke	Paul G.	Morgan
Burdick	Hathaway	Randolph
Clark	Hodges	Schmitt
Culver	Huddleston	Stennis
Domenici	Kennedy	Stone
Ford	McClure	Zorinsky
Gravel	McGovern	
Hart	Melcher	

NOT VOTING—3

Abourezk	Humphrey	Javits

So the Eagleton-Bellmon amendment (UP No. 1638) was agreed to.

Mr. EAGLETON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McGOVERN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. EAGLETON. Mr. President, I know of only one other amendment, that being the Curtis amendment, which would propose a $2 billion cut in the food stamp program. We had an earlier vote on the Lugar amendment cutting $250 million. That amendment failed. Senator CURTIS has a $2 billion cut. Once that is disposed of, I know of no other amendment. We can then go to final passage.

Mr. President, I yield to the Senator from New Mexico (Mr. DOMENICI) 2 minutes.

Mr. DOMENICI. Mr. President, I rise to thank the committee and, in particular, the floor managers (Mr. EAGLETON and Mr. BELLMON), for the assistance that they have provided in the continuing efforts of the State of New Mexico and the Federal Government to rid the open ranges in our State and some of the adjoining States of the range caterpillar. They have been involved in trying to help us for the last 3 or 4 years.

I first want to commend them for their effort last year to instigate a permanent and on-going research program which has already been funded, which our universities and experts tell us is proceeding well. I then want to thank them for including money in this budget for next year's spraying program or control program. I am sorry that the $1.5 million which was in this bill was reduced to $1 million by the amendment which was just voted in. However, that million dollars is $500,000 more than the House had. I encourage Senator EAGLETON and Senator BELLMON, when they go to conference, to try their best to maintain this million-dollar figure, because it appears to me that we must, in the next 2 or 3 years, rid the range of this infestation or we are in for some real serious trouble.

Mr. BELLMON. Mr. President, may I say, in response to my friend from New Mexico, that it is my full intention, and I am sure I speak for all the Senate conferees, to defend this appropriation for the range caterpillar as completely as we can.

I agree with the Senator from New Mexico that the range caterpillar is a growing threat, not only to New Mexico but to all the range States. We can now, if we apply ourselves, either control or eradicate it before it spreads to other areas. To me, this is a totally defensible investment of tax dollars, one which perhaps should be larger and was larger in the original bill. I say to the Senator from New Mexico that, if it is necessary, we could perhaps include money in a supplemental if it turns out this money is inadequate.

Mr. DOMENICI. I know the Senator from Oklahoma is fully aware that the State of New Mexico and the ranchers invest substantial sums in this program, because wherever it is non-Federal land, the payments are divided so each pays one-third; that is, the State, the land owner, and the Federal Government. They are putting up their share of money because they feel this is a very serious problem.

Mr. President, I yield the floor.

AMENDMENT 3448

Mr. CURTIS. Mr. President, I have an amendment at the desk. I ask that it be read.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Nebraska (Mr. CURTIS) proposes an amendment numbered 3448. On page 45, line 6, strike out "$5,779,200,000" and insert "$3,779,200,000".

The PRESIDING OFFICER. The yeas and nays on this amendment have already been ordered by unanimous consent.

Mr. CURTIS. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. CURTIS. How much time are the proponents allocated for this amendment?

The PRESIDING OFFICER. One-half hour on the amendment, 15 minutes for the proponents and 15 minutes for the opponents.

Mr. CURTIS. I yield myself 10 minutes.

The PRESIDING OFFICER. The Senator from Nebraska is recognized for 10 minutes.

Mr. CURTIS. Mr. President, this is a sizeable cut. The amendment calls for a cut of $2 billion.

I will, in the short time alloted to me, spell out specifically the areas where we can save this money. It is offered in good faith, it is workable, it is within reason.

The food stamp program started in 1965 with $60 million. The next year, it was $100 million. By 1969, it was $280 million. This bill is for $5.7 billion.

Back in 1973, it was only $2.5 billion. This is a bill to provide nournishment for people who cannot provide it themselves. How many died of starvation in the United States in 1973? How many?

This program was intended for the very poor that could not get enough money.

Here is how we can save $2 billion and not take food away from anyone that cannot get it otherwise.

There are certain basic eligibility revisions which we have an estimate on that would save $700 million. There is no asset test in the law. There is no asset test of how much assets one can have to get food stamps. One can be written in that would save $522 million.

Under the present law, someone goes in and tells what they expect their income to be, instead of a retroactive check as to how much income they had in the past. To change that method, it is estimated would save $400 million.

Oh, there is great fraud. Better fraud control. How do we do it? By requiring a photo identification card.

Mr. President, that is not tyrannical government. I had to go through that to get my driver's license.

We have had these stories about individual's going from different jurisdictions and qualifying many times. They go to court and get a slap on the wrist. However, a card with a photo on it would save $130 million.

That does not take food away from any needy person.

Under the present law, they do not count income inkind in determining eligibility. To do so would save $174 million.

We exclude certain items of income, such as student grants, on the ground they cannot be properly calculated. We exclude housing subsidies.

If we would end those exclusions and find the true income, we would save $38 million.

Mr. TOWER. Will the Senator yield?

Mr. CURTIS. I just have limited time, but I will yield 30 seconds.

Mr. TOWER. I just wanted to ask the Senator if he is aware that not too long ago there was a full-page ad which appeared in the comic section of a major newspaper saying, "Send in $4.95 and we will send a booklet showing how you can qualify for food stamps, even if you earn $20,000 a year."

Mr. CURTIS. That is correct.

Here is another thing, Mr. President, and I hope every member of the Com-

mittee on Budget will support this amendment.

I am for these small amendments that will eliminate waste and do some other things. That will never balance the budget. We have to face this issue in a bigger way.

Income tax rebates, count those as income and we will save $29 million. Require a work registration. Restore the age of a child which exempts an individual from work registration to age 6, not 12.

At the present time, a one-parent household can say, "I have an 11-year-old child, therefore, I cannot work."

In other programs, it is down to six. To change that would save $14 million.

Strengthen the work registration requirements, permitting the States to establish community work experience programs as a condition of eligibility, would save $14 million.

Ending payment of food stamps for strikers would save $18 million.

The college students, some of that has been done in this bill, $11 million, but they are not the big items.

Mr. President, this program can go on and take care of every hungry person in the country. But it is not intended as a general welfare program.

Keep in mind also, Mr. President, that the same individual who qualifies for one program oftentimes qualifies for some others automatically.

The recipient of the food stamps may be the recipient of medicare benefits, may be the recipient of housing subsidies.

Mr. President, what we are doing in this country is promoting dependency. What we are doing is enlarging the welfare state. We are carrying out the mandate of the director of the staff of the Congressional Budget Office who has repeatedly said publicly that we need larger deficits.

Now, of course, we need the smaller amendments here and there, every way we can. If we save money, we have to look at the little items. But here is a big program.

Mr. President, I ask unanimous consent to have printed in the RECORD the analysis of where we could save this money, plus a list that shows the amount of money spent on this program since it started in 1965.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

POSSIBLE AMENDMENTS TO THE FOOD STAMP ACT WITH SPECIFIED SAVINGS*

1. Basic eligibility revisions, including:

(a) Limiting eligibility to those with gross incomes at the poverty line, plus a 15 percent allowance for work-related expenses, $700 million.

(b) Establishing purchase requirement at percentage of gross income expended for food by average household of same size and income range, with regional variations, as established by the most recent Consumer Expenditure Survey of the Bureau of Labor Statistics, or 30 percent, whichever is less.

(c) Use of the Thrifty Diet Plan for a family of specified size and ages or the lowest cost diet which meets recommended dietary allowances, established by the National Research Council of the National Academy of Sciences, for all nutrients for which reliable food composition data are available, whichever is less. Prohibits the use of food stamps for items of low nutritional value or insignificant enhancement of palatability, such as ice cubes, artificial food colorings, powdered and liquid cocktail mixes, chewing gum, carbonated beverages, and cooking wines.

2. Assets test: Use the assets test initially established for SSI, with a limit on a principal residence and lot of $25,000; a limit on a motor vehicle of $1,200; limit on property used in a trade or business essential to the self-support of a household of $15,000; and an overall limit on liquid and non-liquid resources (with the above exceptions) of $1,500 for the household, or $2,250 for households of two or more persons with a member or members age 65 or over, $522 million.

3. Retrospective accounting and monthly income reporting. Institute a retrospective accounting system of 90 days and a monthly reporting system; eliminate immediate application by the "recently unemployed," $400 million.

4. Fraud control: Mandate a photo-identification card, countersigned warrants, a national application cross-check, and an earnings clearance system, $138 million.

5. In-kind income: Count any in-kind income which provides food assistance, $174 million.

6. Income exclusions: Eliminate new exclusions (student loans and grants, all which "cannot reasonably and properly be computed", and housing subsidies), $38 million.

7. Income tax rebates: Count as income, $29 million.

8. Work registration: Restore the age of a child which exempts an individual from work registration to age six, not age 12, $20 million.

9. Work registration: Strengthen the work registration requirement by permitting States to establish community work experience programs as a condition of eligibility, $14 million.

10. Strikers: Eliminate the eligibility of strikers, $18 million.

11. College students: Eliminate the eligibility of college students, $11 million.

Total, $2,064 million.

*Approximations.

Appropriations history of the food stamp program from inception to date

1965		$60,000,000
1966		100,000,000
1967		140,000,000
1968		185,000,000
1969		280,000,000
1970		610,000,000
1971		1,670,000,000
1972		2,200,000,000
1973		2,500,000,000
1974		3,000,000,000
1975		4,874,600,000
1976		5,203,000,000
1976,	transitional quarter	1,239,117,000
1977		5,514,400,000
1978		5,627,000,000

Mr. CURTIS. Mr. President, I am not suggesting, or I am not hopeful, that I will get more votes than the distinguished Senator from Indiana got on a cut of $250 million when I want to cut eight times that. But the record is there. The record is there for the Budget Committee. The record is there for the Appropriations Committee. That establishes that it can be done and that it ought to be done.

Food stamps were never intended as a catchall relief program to everybody that was just a little short of income. That is what we have a welfare program for, and there, they work it out case by case. It was intended as a means of getting food in the hands of people that without that program would be hungry and not have enough to eat.

Mr. President, there is a publication by the Office of Budget and Management called "The Budget in Brief." On the inside page are some charts where our money comes from and where it goes. What is the biggest item in there? Direct payment to individuals, and it grows and grows and grows.

We are creating a dependency in this country by lax, out-of-bounds programs of this kind.

Of course, one neighbor learns that others are getting it, why not apply for it, and it goes on and on.

Why has not the Congress established an asset test in this program?

The Appropriations Committee has it within its power to do something about this. They can say they are shutting off the money, will only give them enough money to do what was originally intended, to prevent hunger and malnutrition. That is what they would be able to do and have some money left over if this amendment were adopted.

There are not that many hungry people in the country. There are some. They ought to be taken care of.

But here is a program that grows and grows and grows. I wish that every Senator would investigate the overlapping of programs.

If you meet certain requirements, you are eligible for subsidized housing, you are eligible for free medicine, you are eligible for food stamps.

Who pays for it? The middle class. The middle class are doing it. It would take a little money, but this country could take care of everybody who cannot take care of themselves. But we cannot afford to take care of those who should be taking care of themselves.

Mr. President, how much of my 10 minutes have I used?

The PRESIDING OFFICER. The Senator from Nebraska has just used his time. Five minutes remain.

Mr. CURTIS. I reserve the remainder of my time.

Mr. BELLMON. I yield myself 5 minutes.

Mr. President, both the Senator from Nebraska and the Senator from Oklahoma serve on the Agriculture Committee, which authorizes the food stamp program and which has responsibility for oversight. The speech the Senator from Nebraska just made should be made to the Agriculture Committee.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. BELLMON. I listened patiently to the Senator from Nebraska, and I am going to use my 5 minutes.

Mr. CURTIS. I offered every one of these amendments in the Committee on Agriculture and on the floor.

Mr. BELLMON. Mr. President, I did not yield to the Senator from Nebraska.

The PRESIDING OFFICER. The Senator from Oklahoma has the floor.

Mr. BELLMON. Mr. President, there is nothing in the world that the Senate Budget or Appropriations Committee can do to change the provisions of the food stamp law. That has to be done by the legislative committee, which is the Agriculture Committee.

I agree with the Senator. The Senator from Nebraska and the Senator from Oklahoma offered those amendments

and lost. We voted for an assets test, but the committee did not go along with us, nor did Congress.

There is no way for the Appropriations Committee to cut out $522 million because we would like to see an assets test instituted. It is up to Congress to make that decision, and Congress decided against us.

Also, I say to the Senator from Nebraska that if we do not provide these funds, it has been shown that those who are entitled to these programs will go to court. The court will say that we have to give it to them, and we will have to appropriate it eventually. We looked at the law, we figured the cost of these entitlements, and we provided the funds.

If the Agriculture Committee will change the law, I assure the Senator from Nebraska that we will be happy to reflect that in our appropriations.

Also, Mr. President, this program is not growing. In fact, between 1977, when the appropriation was $5.5 billion, and 1978, when it is $5.6 billion, the program actually shrunk in real dollars. It went down in size. It is a program we have tried very hard in the Agriculture Committee to bring under control, and we seem to be having some success.

I agree with much that the Senator has said, but an appropriation bill is not the place to mandate those changes. It should be done in the Agriculture Committee, and I would be glad to work with the Senator on that objective.

Mr. McGOVERN. Mr. President, will the Senator yield me 2 minutes?

Mr. EAGLETON. I yield 2 minutes to the Senator.

Mr. McGOVERN. Mr. President, I wish to make a brief observation about the Senator's amendment, a proposed cut of some $2 billion in the Nation's food stamp program.

We have had a number of amendments offered in the last few days that would have cut some 2 percent from various Federal programs. Most of those amendments have been rejected, on the ground that a slash of that kind is a meat ax approach that a 2-percent across-the-board cut in Federal programs would be irresponsible.

What we now have before us is a 35-percent cut in a program which millions of people depend upon to maintain a reasonable degree of nutritional health.

The Senator from Nebraska has asked us how many people died from starvation in the United States in 1972 or 1973, when the food stamp program was considerably smaller than it is today.

I hope that is not going to become the criterion on which the food stamp program is judged—that we are interested only in preventing starvation. That might be a modest goal for a country like Bangladesh, in its poverty, to aspire to—that the rate of starvation could be held down within limits. But for the wealthiest country in the world to suggest that the food stamp program should be set at the level where it simply prevents starvation seems to me to be an affront to the ideals and the values of this country.

It is my judgment, as one who has sat through literally hundreds of hours of testimony from people in all parts of this country with respect to the food stamp program, that we do not have any program on the books today that, in the long run, saves the American people any more than this nutritional program that we operate through food stamps.

The human potential that we save and the health that we preserve save us billions of dollars down the road in medical costs and dependency cases that would cost infinitely more than the $5 billion we are investing in feeding hungry people.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. EAGLETON. I yield the Senator 1 additional minute.

Mr. McGOVERN. It occurred to me as I listened to the Senator, that when he talks about a $2 billion cut in food stamp programs, which is more than a one-third slash in the size of this program, just a 2-percent reduction in the military budget of this country would save more than the $2 billion he is seeking to save.

If we were to knock out the proposed nuclear aircraft carrier, which the administration says they do not need, which is not necessary for the defense of the country, that one item would save the $2 billion that the Senator from Nebraska is proposing we cut from the food stamp program.

I just make this final point, Mr. President: It is true that the food stamp program cost has increased substantially since 1972. But I remind Members of the Senate that in the last few years we phased out the commodity food distribution program. We used to operate both a food stamp program and a direct commodity distribution program. In fact, the commodity distribution program was the larger of the two. That program has been terminated, at a saving of many hundreds of millions of dollars to the American taxpayer, and has been folded into the food stamp budget.

Last year, the Senate passed a comprehensive reform program to correct the abuses—the fraud and the deficiencies—in that program. It is just now going into effect. This is the wrong time to be proposing a destructive amendment of this kind. I hope the amendment will be rejected.

The PRESIDING OFFICER. The Senator from Nebraska has 5 minutes remaining on the amendment, and the opponents of the amendment have 7 minutes remaining.

Mr. CURTIS. I yield myself 3 minutes.

Mr. President, I am fully aware that we should have some changes in the authorizing law. One of the best ways to bring that about would be if we could have a solid vote of the Appropriations Committee and the Budget Committee and they would say to the rest of us, "Change this law. This is all the money you are going to get."

Here is where we have gone in this food stamp program: We have created a situation in which one person out of four is eligible for food stamps. It is a program intended to deal with malnutrition. I used the word "starvation." Perhaps that was unwise. It is a program to prevent malnutrition. We have created eligibility for one-fourth of America to qualify for food stamps.

Also, I have news for the Appropriations Committee. The cost of this program is going to go up and up. It used to be that a person would have to pay some of his own money to get food stamps. That has been changed, but we have not been hit by the cost of it yet.

I am thoroughly convinced that with $3.7 billion, we can take care of all the cases in which there would be undernourishment, malnutrition, if they did not get those food stamps. It is not intended to take over the welfare program.

Again I emphasize that one of the reasons why the cost of all these programs has grown so much is the overlapping of benefits; that the same household that is eligible for food stamps, eligible for rent subsidies or purchase subsidies, eligible for free medicine, does not have the cash income to have a great tax burden. We are adding to the dependency.

As long as Congress goes on and does not take action to restrict this and confine it to people who should have it so that they are properly nourished, the more dependency we create in this country.

Mr. President, I am not unaware that it is hard for some Senators, because maybe in all instances the public has not been properly informed about all the facts connected with this program, to vote for a $2 billion cut. I am satisfied, however, that the facts that I placed in the RECORD and other facts that are in the RECORD justify such a cut and while to be a good fellow there is an urge that I should withdraw the amendment, I cannot do that. I cannot do that because here is a program that needs tightening up and instead of that, Congress is opening it up.

The PRESIDING OFFICER. The Senator's 3 minutes have expired.

The Senator has 2 minutes remaining on the amendment.

Mr. CURTIS. I reserve the remainder of my time.

Mr. EAGLETON. Mr. President, I shall be very brief. I spoke earlier today on the amendment by the Senator from Indiana (Mr. LUGAR), which would have made a cut of $250 million in food stamps. We have the same subject matter before us again, although the magnitude of the reduction has changed. It is now $2 billion.

The adoption of the Lugar amendment would have been very harmful. The adoption of the Curtis amendment would be callous.

I yield back the remainder of my time.

Mr. CURTIS. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Nebraska. On this question the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

(Mr. PAUL G. HATFIELD assumed the chair.)

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mrs. HUMPHREY), and the Senator from Mississippi (Mr. EASTLAND) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "nay."

Mr. STEVENS. I announce that the Senator from New York (Mr. JAVITS) is necessarily absent.

The result was announced—yeas 16, nays 80, as follows:

[Rollcall Vote No. 311 Leg.]

YEAS—16

Bartlett	Hansen	Proxmire

NOT VOTING—4

Abourezk	Humphrey	Javits
Eastland		

So Mr. CURTIS' amendment (No. 3448) was rejected.

Mr. EAGLETON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. BELLMON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1639

Mr. BELLMON. Mr. President, I send an amendment to the desk and ask that it be reported.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Oklahoma (Mr. BELLMON) proposes an unprinted amendment numbered 1639.

Mr. BELLMON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 44, line 15, strike "$142,000,000" and insert in lieu thereof "$117,000,000: Provided, That no part of this appropriation may be used to pay for the cost of a special milk program in a school having both a school lunch and school breakfast programs."

Mr. BELLMON. Mr. President, very quickly, the amendment I have just offered would——

Mr. EAGLETON. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. BELLMON. This amendment would eliminate the special milk program from schools that participate in both the school lunch and the breakfast programs. It would save $25 million.

Mr. President, the special milk program provides Federal subsidies to schools and other institution which serve milk to children, in addition to milk subsidized as part of other USDA child nutrition programs such as the school lunch program and the school breakfast program. Milk subsidized through this program is served either free or at a reduced price to children during midmorning and afternoon breaks and during the lunch period in addition to the milk served as part of the school lunch and school breakfast.

Because of the supplementary nature of the program, a child enrolled in a school that has both the school lunch and school breakfast programs, may receive three, and in some cases, four federally subsidized half-pint cartons of milk a day. I believe this is excessive.

My amendment would simply remove the special milk program from these schools that have both the breakfast and lunch programs. Children in these schools will still be eligible to receive milk as part of two nutritionally balanced meals. The amendment will reduce the appropriation for the program by $25 million.

The change that I am proposing is a compromise between the current program and that which has been requested by the administration which has repeatedly sought to remove the program from schools having any other child feeding program in which milk was served.

Concerns that the savings of the amendment will be replaced by increased costs of the dairy price support program are unfounded. An analysis by USDA revealed that the likely impact of my amendment on the half-billion dollar program will be only 6 to 8 million dollars. This represents a net savings to the taxpayers of $17 to $19 million.

I believe it is imperative that we do all we can to keep down Federal expenditures. Making cuts is never an easy task but when a program has outlived its original purpose and represents a continuing drain on the Treasury with so little return, we have no excuse for not acting.

I urge my colleagues to adopt this amendment.

Mr. McGOVERN. Mr. President, will the Senator yield?

Mr. BELLMON. I am glad to yield to the Senator from South Dakota.

Mr. McGOVERN. Mr. President, I appreciate what the Senator is trying to accomplish by this amendment. As he knows, we considered in the Agriculture Committee a proposal from the administration to completely eliminate the special milk program. It was very strongly rejected by the committee.

It is true that we did not look at the possibility of a $25 million cut. One of the reasons for that however, I will say to the Senator, is that, we are trying to encourage expansion of the school breakfast program in the United States. We did not mandate such a program, but we are attempting to encourage schools to participate.

I think the impact of the Senator's amendment would be that of discouraging school districts from participating in the school breakfast program. If they know that by participating in the breakfast program they are going to lose the benefits of the special milk program, they are clearly going to be reluctant to implement a breakfast program.

What I would like to suggest to the Senator from Oklahoma is that, if he will not press his amendment at this time, our Subcommittee on Nutrition will hold hearings on this matter and evaluate the questions raised by the Senator from Oklahoma. I will make that pledge to him if he will consider withdrawing his amendment.

Mr. EAGLETON. Mr. President, I would like to speak for 2 minutes on this amendment before yielding back to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. EAGLETON. In one respect, Mr. President, I would hope that the Senator from Oklahoma would not withdraw his amendment, although I understand that is his intention and I presume he will follow up on it. I would like this amendment to proceed to a final vote, because this would perhaps be the first time in Senator PROXMIRE's career that he voted not to cut money from some budget or other. He would tell the Senate, as he has often told me, that this $25 million is absolutely necessary for the strength of the Nation. When Senator BELLMON points out that his amendment applies only in those situations where the child is already getting milk with breakfast and milk with lunch, Senator PROXMIRE would say that mid-morning milk is also a prudent expenditure of Federal money. Milk, milk, and more milk. He finds no redundancy in all of this. Wisconsin is the biggest dairy State in the Nation, as we all know.

However, just a few moments ago, Senator PROXMIRE voted to slash $2 billion out of the food stamp program. In his opinion it is wise and prudent to slash $2 billion from the eating tables of needy people, but never, never, never cut out the third serving of mid-morning milk. Thus, I would like to see Senator PROXMIRE vote on this amendment and reconcile this milk vote with the earlier food stamp vote.

Mr. McGOVERN. Mr. President, will the Senator yield?

Mr. EAGLETON. I yield.

Mr. McGOVERN. I hope he will not penalize the appeal of the Senator from South Dakota because of the Senator from Wisconsin.

Mr. EAGLETON. No, no. I visit no Senator's sin on any other Member of the body.

Mr. BELLMON. Mr. President, I was pleased by the response of the Senator from South Dakota. I agree with him this special milk program needs to be examined. It certainly has a purpose, and I am not at all in favor of doing away with it totally. But it seems to me, as the Senator from Missouri just stated, that if we are providing free milk at breakfast and free milk at lunch, it is very redundant and may not even be healthful to provide one or two additional servings of milk for the same children per day.

Because the Senator from South Da-

kota is willing to go into the matter in depth in hearings, I feel that we would be wiser, perhaps, to put off action until next year. But I will say to the Senator that unless I am convinced that this special milk program is needed, I will be back next year with the same amendment.

Mr. McGOVERN. Mr. President, I appreciate the attitude of the Senator from Oklahoma. Depending on what the hearings reveal, I may at that time be willing to join him in support of such an amendment. But I assure him we will hold hearings as part of the next child nutrition bill and I appreciate his willingness to withdraw the amendment at this time.

The PRESIDING OFFICER. The amendment is withdrawn.

● Mr. MUSKIE. Mr. President, the Senate has before it H.R. 13125, the Agriculture and Related Agencies Appropriation bill for fiscal year 1979.

The bill as amended provides $23.4 billion in new budget authority. Outlays associated with the bill total $13.7 billion, including $2.0 billion in outlays from budget authority provided in prior years.

Under section 302(b) of the Budget Act, the Appropriations Committee divides among its subcommittees the total budget authority and outlays allocated to the committee under the first budget resolution. The Appropriations Committee has allocated $24.9 billion in budget authority and $14.6 billion in outlays to the Agriculture Subcommittee.

The funds provided by H.R. 13125 as reported plus permanent appropriations under the jurisdiction of this subcommittee put the subcommittee $0.1 billion over its 302(b) budget authority allocation and $0.6 billion under its outlay allocation. Possible later requirements known at this time could increase the budget authority overage to $0.6 billion while outlays would remain $0.3 billion below the allocation.

Mr. President, I ask that a table showing the relationship of this bill and possible later requirements to the subcommittee allocation be printed in the RECORD at this point.

The table follows:

H.R. 13125 Agriculture and Related Agencies appropriation bill, 1979: Relationship to subcommittee's section 302(b) allocation

[In billions]

	Budget authority	Outlays
Subcommittee's section 302(b) allocation	$24.9	$14.6
Amounts enacted in prior years	1.6	0.3
H.R. 13125, as reported	23.4	13.7
Amount over (+) or under (−) subcommittee allocation	+0.1	−0.6
Possible later requirements:		
Agriculture conservation program	+0.1	+0.1
SCS emergency assistance	(1)	(1)
Non-point source pollution control	+0.1	(1)
Food stamps	+0.1	+0.1
Child nutrition	+0.1	-----
Possible amount over (+) or under (−) subcommittee allocation	+0.6	−0.3

[1] Less than $50 million.

Mr. MUSKIE. Since there is a potential budget overage, I would point out that if it materializes, other subcommittees will need to stay below their allocations if the Appropriations Committee is to stay within its total allocation.

H.R. 13125 as reported is consistent with the functional and aggregate targets in the first budget resolution, and I support it. I commend the distinguished chairman of the Subcommittee on Agriculture, Senator EAGLETON, for his dedicated efforts in support of the budget process.

I note that the committee has included in this bill $75 million requested by the President, as part of his water policy, for full funding for water projects of the Soil Conservation Service. This full funding is a change from current practice, and was not anticipated at the time of the first budget resolution, which was prior to the President's policy announcement. I wish to point out that if this change is enacted by the Congress, the budget process is sufficiently flexible to accommodate this change in the second budget resolution, which the Senate Budget Committee will begin marking up shortly. Moreover, as a member of both the Budget and Environment and Public Works Committees, I intend to review this policy carefully in water projects throughout the budget, and hope to make this review a part of the congressional consideration of the fiscal year 1980 budget.●

FUNDING FOR THE SOUTHERN REGIONAL RESEARCH CENTER IN NEW ORLEANS

● Mr. JOHNSTON. Mr. President, I commend the distinguished senior Senator from Missouri for his fine work on the Agriculture appropriations bill. He has undertaken a difficult task and has managed to hold a tight line on this bill through subcommittee and full committee markup. Particularly in view of the clear veto threat, the gentlemen has had a tough job, one with many unpleasant choices and one which requires setting priorities amongst our many competing needs.

However, Mr. President, I am seriously concerned, as the Senator knows, about one area which was cut in the budget request and for which no funds were appropriated in the Senate—the regional research centers of the Department of Agriculture. The regional research laboratories were established in 1939 and have had a remarkably productive record over the past 40 years.

The deep tank fermentation process which opened the way to large-scale commercial production of penicillin was developed by the Northern Regional Research Center.

Similarly, USDA scientists developed the process for making frozen orange—which permits storage of surplus citrus fruits and has led to the development of the multimillion dollar citrus industry.

Another laboratory developed the "Philadelphia Cook" process which replaces freeze-drying and saves manufacturing, shipping and storage costs. Over 4 billion pounds of potatoes are dehydrated this way each year.

And the Southern Regional Research Center, located in New Orleans, has done the leading work on permanent press and flame resistance in fiber processing and production. This, of course, is absolutely critical to the future of cotton.

The fiscal year 1979 budget request calls for a $9.4 million reduction in these programs. And this will reduce the SRCC's budget by $975,000. This will not only retard important fiber research, but it will also result in the loss of 30 jobs. Twenty-eight of these positions are currently filled by professionals—by agricultural scientists. Many of these employees have devoted their careers to agricultural research and, as a result, have developed a specialized expertise on fiber production. I am told that the average age of these scientists is 50. Now, Mr. President, these dedicated employees are being told that—as of October 1, 1978—they must find other jobs. The Department says that private industry may—and should—pick up this research.

However, the Department does not allow for a phase-in procedure, and has done little to prepare these employees for this sudden loss of their jobs.

Mr. President, I believe we are asking too much of these men and women. After working for many years at USDA, some are now told to find other jobs. At age 50, this is difficult for anyone. It is even more difficult when you try to seek comparable employment, and comparable employment without totally disrupting your family by possibly moving to another city or State at midcareer.

Mr. President, these funds were restored in the House bill and I hope very much that the Senate conferees will be able to work out a fair solution. It may be that private industry should pick up some of this research. Frankly, I do not know if this will occur. But I do know that 30 people in New Orleans will suffer as a result of this decision. And the families of these 30 employees will also suffer.

Over 11.6 million acres of cotton were planted in the United States in 1976, yielding over 10.5 million bales of cotton. According to USDA the value of these exports was worth about $881.9 million.

The production, processing, and manufacturing of cotton also provided many jobs in this country. Mr. President, if we are to keep the cotton industry healthy, we must continue research on fibers at least at current levels. Otherwise, more people will lose their jobs and we will be losing some of these exports if production declines.

Mr. President, in conclusion I urge that the conferees try to work out a reasonable solution, one which will minimize the impact of budget cuts on these individuals and one which will be fair. We are, of course, continuing to fund other agricultural research programs in this country and overseas. I am sure that these programs are as justified as those at the regional centers. I hope we can find a way to fund them all and, especially, to prevent the sudden loss of 30 jobs and valuable fiber research in New Orleans.●

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed for third reading, and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. Is all time yielded back?

Mr. EAGLETON. I yield back our time.

Mr. BELLMON. I yield back my time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Minnesota (Mrs. HUMPHREY) is necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "yea."

Mr. STEVENS. I announce that the Senator from New York (Mr. JAVITS) is necessarily absent.

The result was announced—yeas 90, nays 8, as follows:

[Rollcall Vote No. 312 Leg.]

NOT VOTING—2

Humphrey	Javits

So the bill (H.R. 13125), as amended was passed.

Mr. EAGLETON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BUMPERS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. EAGLETON. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make any necessary technical and clerical corrections in the engrossment of the Senate amendments to H.R. 13125.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, I move that the Senate insist on its amendments to H.R. 13125 and request a conference with the House on the disagreeing votes of the two Houses and that the Chair be authorized to appoint conferees.

The motion was agreed to and the Presiding Officer (Mr. HATHAWAY) appointed Mr. EAGLETON, Mr. STENNIS, Mr. PROXMIRE, Mr. ROBERT C. BYRD, Mr. INOUYE, Mr. BAYH, Mr. CHILES, Mr. BURDICK, Mr. MAGNUSON, Mr. BELLMON, Mr. YOUNG, Mr. MARK O. HATFIELD, and Mr. STEVENS conferees on the part of the Senate.

Mr. ROBERT C. BYRD. Mr. President, the agricultural sector of our economy is one of our most valuable assets. Nowhere else in the world can an abundance of food and fiber be found to match that of the United States. Our country is blessed with a fertile soil and great natural resources. With industry and intelligence, our farmers have used advanced technology to improve upon nature's gifts, bringing forth bountiful crop yields. American ranchers and dairy farmers have similarly used scientific methods to produce better livestock.

But all is not bright for the future of American agriculture. A burden of debt is putting the squeeze on the farmer. Heavy borrowing has become necessary because increases in the cost of land, fuel, fertilizer, and farm implements have far outstripped the farmers' revenue. They are forced to borrow or go out of business.

This point was clearly made to the Congress and the Nation last winter, when hundreds of representatives of the American Agriculture Movement came to Washington. They spoke with many Senators and Congressmen about the crisis that they face. Their words did not fall on deaf ears. Building on the foundation of the Food and Agriculture Act of 1977, Congress passed the Agricultural Credit Act of 1978 to help alleviate some of the farmers' short-term problems.

Pursuant to this and other authorizing legislation, the Senate has just passed H.R. 13125, a bill making appropriations for Agriculture, Rural Development, and Related Agencies for fiscal year 1979. Senator TOM EAGLETON, chairman of the Agriculture Subcommittee—of which I am a member—has devoted a great deal of effort to this bill. Since assuming the chairmanship of the subcommittee this year, Senator EAGLETON has engaged in a careful assessment of the programs contained in this appropriation.

The report accompanying H.R. 13125 notes that "* * * many items and projects [could] well provide a good return on investment. However, only those of highest priority have been recommended for funding in the bill." It is never an easy task to eliminate potentially valuable programs, yet budgetary discipline demands such action. Our goal is, of course, to achieve the maximum benefit possible from each appropriated dollar. I believe the bill goes a long way toward achieving this goal.

I take this opportunity to comment briefly on several important provisions of this bill. Public Law 95-113, the 1977 farm bill, authorized an increase of $10.5 billion in the borrowing authority of the Commodity Credit Corporation. This authority is to be used to finance many of the programs contained in the 1977 law, and is fully supported by the administration. H.R. 13125 includes an appropriation for that purpose.

In addition, the bill provides funds for continued operation of valuable agricultural programs such as the Agricultural Research Service. Among its more important research responsibilities are soil and water conservation, food processing and storage, and plant and animal production. The Research Service performs these functions in a professional manner, and the results of its work have been of substantial benefit to farmers and consumers alike.

Another key program is the Cooperative Extension Service. Its purpose is to disseminate information gathered by researchers to local groups who can put it to practical use. The Service works closely and productively with 4-H youth groups and State agricultural colleges.

Rural development programs are covered in H.R. 13125 as well as agricultural programs. Two major agencies funded under this part of the bill are the Farmers Home Administration (FmHA) and the Rural Electrification Administration.

The Farmers Home Administration is a primary source of credit for rural America. Among the important programs administered by FmHA is the Rural Housing Insurance Fund, which provides Federal guarantees for insured home ownership loans. Other parts of this program provide loans and loan guarantees for home repairs and rental housing. The Agricultural Credit Insurance Fund, also run by FmHA, is designed to promote farm ownership and operation, soil and water conservation, and it serves a source of emergency credit.

An FmHA activity of great benefit to those in rural areas is its loan and grant programs for water and sewage facilities. Funds are provided to public, quasi-public, or nonprofit corporations to finance construction and operation of such facilities.

The Rural Electrification Administration, as its name suggests, promotes the installation of electric and telephone equipment in rural areas by making direct loans to consumers.

Complementing the impetus for rural development are conservation programs. Two main bodies receive appropriations for this purpose under the bill. The Soil Conservation Service has structured a nationwide series of conservation projects aimed at preserving our valuable land resources. The Agricultural Stabilization and Conservation Service encourages long term conservation projects and more efficient land use.

Mr. President, although fewer Americans each year turn to farming as a way of life and an occupation, the importance of agriculture in our country has never diminished. Every American, obviously, is a food consumer. What happens on the farm—drought or flood, economic prosperity or hardship, improved technology or a threatening crop disease—impacts directly on each consumer's pocketbook, lifestyle, and health. What happens on the farm affects not just the farmer, but each one of us. It affects the national and the international economy.

Senator EAGLETON, chairman of the Agriculture Subcommittee of the Appropriations Committee, has demonstrated his familiarity with the concerns and the interests of the farm community. With one eye on the need for fiscal restraint, he has provided leadership to the subcommittee which has resulted in an excellent bill. He has been assisted in this by the very able Senator from Oklahoma, Mr. BELLMON, the

ranking minority member of the subcommittee. Senators EAGLETON and BELLMON, together with the other members of the subcommittee, have carefully scrutinized each of the many budget requests for the programs contained in this bill. Their recommendations are sound.

The bill represents the continuing Federal commitment to American agriculture. That commitment, which has as many facets as there are programs funded in this bill, is called for on grounds of commonsense and equity. We cannot afford to turn our backs on the American farmer, for the products of his labor are essential to us all. Nor can we, in fairness, desert a historic tradition of providing assistance to our rural and farm communities. Senator EAGLETON and Senator BELLMON have reaffirmed their understanding of American agriculture today and of rural America. I wish to thank them for their work.

ENERGY AND WATER DEVELOPMENT APPROPRIATIONS, 1979

Mr. EAGLETON. Mr. President, what is the next order of business?

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to consideration of H.R. 12928, which the clerk will state.

The legislative clerk read as follows:

A bill (H.R. 12928) making appropriations for public works for water and power development and energy research for fiscal year ending September 30, 1979, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Appropriations with amendments.

Mr. DECONCINI. Mr. President, I ask unanimous consent that Mr. Jerry Bonham of my staff be accorded the privilege of the floor during debate and votes on this pending matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

Time on this bill is limited. Who yields time?

Mr. MATSUNAGA. Mr. President, I ask unanimous consent that a member of my staff, Mr. Takeshi Yoshihara, be granted the privilege of the floor during debate and votes on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. I ask the same privilege for Richard Arnold and Len Parkinson of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, we are awaiting the distinguished Senator from Louisiana (Mr. JOHNSTON).

Mr. HATCH. Mr. President, will the Senator yield?

Mr. EAGLETON. I yield time to the Senator from Utah.

Mr. HATCH. I ask unanimous consent that Norma Holmgren and Douglas Fellman, of my staff, be accorded the privilege of the floor for the remainder of the day.

Mr. THURMOND. Mr. President, I ask unanimous consent that Mr. Ed Twilley, of my staff and Sally Rodgers, of the Judiciary Committee staff, be granted the privilege of the floor today and tomorrow on bills and votes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. I ask unanimous consent that Chip Waggoner, of Senator STEVENS' staff, and Mr. Ed King, of Senator BARTLETT's staff, may be granted the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, I suggest the absence of a quorum, with the time charged to neither side.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. JOHNSTON. Mr. President, the pending business, H.R. 12928, is the annual appropriation bill for fiscal year 1979 for programs and activities of the Department of Energy, the U.S. Army Corps of Engineers, the Bureau of Reclamation, the Tennessee Valley Authority, the Nuclear Regulatory Commission, and other agencies. The bill as recommended by the committee provides a total of $10,120,144,900 in new budget obligational authority. The budget request submitted for our consideration totals $11,039,449,000. Thus, the bill as reported by the Committee on Appropriations is $919,304,100 less than the amended budget estimates. It is $221,489,000 less than the House-passed bill and over $400 million less than the appropriations for fiscal year 1978.

I hope that point is well understood by all Senators that this bill is substantially less than the President's budget, the House-passed bill, and less than the appropriations for last year.

Mr. President, the Subcommittee on Public Works has worked very hard to present to the Senate a good, well-balanced bill for the upcoming fiscal year. The subcommittee held 37 sessions of hearings on 30 different days on the bill. Most of the hearings, of course, were with the executive agency witnesses testifying on behalf of their proposed programs and budget estimates. Almost 2 weeks of hearings were held for public witnesses and over 1,000 citizens of all walks of life from throughout the United States came to Washington for those hearings. All, of course, did not testify. But there were many spokesmen from several delegations speaking on behalf of those many people who came to the hearings. Governors, Members of the House and Senate, State and local officials testified also. I hasten to point out that work, time and effort have been devoted to this bill for over 6 months beginning shortly after the President submitted his budget in late January up until now. I mention this because of an article in the Washington Post last weekend which has been interpreted by some, who apparently are not familiar with the work on this bill, that the subcommittee met that single time in formulating the bill.

Mr. President, I thank all the members of the subcommittee for their help and cooperation. Many members helped, including presiding at the very long hearing sessions. And, Mr. President, I pay special tribute to the distinguished ranking minority member of the subcommittee, the distinguished senior Senator from Oregon (Mr. HATFIELD). We have worked together in a totally nonpartisan manner, and one could not have a better man to work with than the Senator from Oregon.

Mr. President, energy and water are the fundamental, inseparable subjects of this appropriation bil. Simply stated, these resources are the Nation's lifeblood. Only with secure supplies and careful management of these, our most precious resources, can our Nation be assured of a secure, stable, and prosperous future. And, the wise use, development and management of these resources for current needs and thoughtful conservation for future needs are essential.

The activities and projects funded in this bill are an integral part of the foundation and infrastructure required to provide for the needs and wants of the people of our Nation today and in the future. While relatively small in the context of the total Federal budget, the expenditures authorized in this bill are capital investments that will return significant economic and other benefits to the Nation. The significance of past investments in these programs is great, and the tangible returns to the Nation as a whole and to the communities throughout the country have been analyzed and found to be far greater than the costs of undertaking them.

TITLE I—DEPARTMENT OF ENERGY

Title I of the bill provides appropriations to the Department of Energy. This bill contains the first direct, annual appropriation to the Department for its programs and activities which were previously scattered among the Energy Research and Development Administration, the Federal Power Commission, the power marketing activities of the Department of the Interior and other agencies. These agencies and other functions were consolidated in this new Department which is responsible for a comprehensive, coordinated approach to energy policy, regulation, research, development and demonstration as well as for formulation and implementation of a national energy program.

The committee recommendation provides a total of $6,044,394,000 in new budget—obligational—authority for the Department's programs and activities funded in this bill. This amount is $464,633,000 less than the amended budget estimates and $138,672,000 less than House allowance. Other appropriations to the Department are included in the Interior and Related Agencies Appropriation bill for Fossil Energy R. & D., production, demonstration and distribution; conservation programs; the Economic Regulatory Administration; Energy Information Administration; and Strategic Petroleum Reserve.

Funds recommended in this bill provides for programs and activities relating to Energy Research and Technology Development; Uranium Supply and Enrichment; General Science and Research; Atomic Energy Defense Activities; Policy, Management and Support; Power Marketing Activities; the Federal

Energy Regulatory Commission; and Special Foreign Currency programs. No additional funding is required in fiscal year 1979 for the Geothermal Resources Development Fund since adequate resources for 1979 activities are available from prior year appropriations.

For Energy Research and Technology Development, the committee is recommending $2,539,355,000. The budget estimates for these programs total $2,320,645,000. This recommendation reflects the basic resolve of the committee to provide a prudent level of funding for all energy technologies which can reasonably be expected to enhance our domestic energy supplies in the short and long term. In the short term, we have only two supply alternatives to higher oil imports: Coal and nuclear power. Mr. Chairman, it is not well known, but currently we are producing about 30 percent of our electricity with precious oil or natural gas. This practice is wasteful and could be significantly reduced. One way would be to increase the use of nuclear power. Now we all know that some significant issues have emerged in recent years about nuclear power; chiefly environmental and safety issues. The program recommended in the bill not only continues and expands research and development on nuclear technology but also commits the Department to a substantial environmental and safety program.

The bill also includes $413,100,000 for solar energy; $142,200,000 for geothermal energy; $351,900,000 for fusion energy; $290,300,000 for the light water reactors program; and $547,867,000 for the breeder reactor program, including $172,300,000 for the breeder reactor demonstration project approved by Congress in authorizing legislation.

For uranium supply and enrichment activities, the committee recommends net new budget authority of $110 million consisting of $1,419 million in obligational authority less $1,209 million in uranium enrichment revenues.

For general science and research, the bill provides $430,300,000, of which $294,700,000 is for the high energy physics program.

The recommendation for the Atomic Energy Defense activities total $2,639,183,000, of which $1,429,294,000 is for weapons activities; $714,400,000 is for special nuclear materials production; and $290,600,000 is for naval reactors development.

For policy management and support activities of the Department, $333,553,000 is recommended.

$51,300,000 is included for the Federal Energy Regulatory Commission, and $145,473,000 is recommended for the power marketing agencies.

TITLE II—ARMY CORPS OF ENGINEERS

For the civil works program of the Army Corps of Engineers for which appropriations are provided in title II of the bill, the committee is recommending a total of $2,645,620,000. This is $325,545,000 less than the budget estimates and $34,139,000 less than the amount approved by the House.

The committee recommends $137,138,000 for general investigations; $1,354,147,000 for construction, general; $223,035,000 for flood control, Mississippi River and tributaries, and $795,500,000 for the operation and maintenance account.

TITLE III—BUREAU OF RECLAMATION

Mr. President, for the Bureau of Reclamation, the total amount recommended in title III of the bill is $566,915,000. This amount is $168,855,000 less than the amended budget request and $58,351,900 less than the House allowance. An appropriation of $30,870,000 is recommended for general investigations; $208,572,000 for construction and rehabilitation; $87,399,000 for the Upper Colorado River storage project; $74,770,000 for the Colorado River Basin project; and $86,373,000 is recommended for operation and maintenance.

TITLE IV—INDEPENDENT OFFICES

A total of $863,215,900 is provided in title IV of the bill for the related independent offices, an amount which is $39,728,900 over the budget estimates. For the Appalachian regional development programs, $368,700,000 is recommended; $328,287,000 is included for the Nuclear Regulatory Commission; and $151,531,000 is provided for the Tennessee Valley Authority programs funded by direct appropriations.

Mr. President, I have given a brief summary by title and major accounts of the recommended appropriations. In the interest of time, I will not undertake a detailed explanation or elaborate on the numerous programs, projects and activities in the bill. I do want to point out that almost 65 percent of the funds in the bill is for the Department of Energy and the Nuclear Regulatory Commission. If the funds for hydroelectric power projects and activities of the corps and the Bureau and certain TVA programs are also included, better than 75 percent of the funding in the bill is for energy and related matters, including atomic energy defense activities. The remaining 25 percent is for water resource development and related activities—a relatively small but highly important part of this bill.

New project starts under the Army Corps of Engineers are recommended for both planning and construction categories. The House of Representatives approved 40 Corps of Engineers new construction starts including 17 requested by the President. The committee recommendation deletes seven of the new starts approved by the House and two new starts were added by the committee. Under the planning category, the committee deleted 12 projects including 7 new starts approved by the House. The committee added funds for six projects in planning of which two are new starts. Also, a number of decreases and increases were made in the surveys and studies program—amounts on 17 House approved studies were decreased; 2 new ones were deleted; 17 continuing studies were deleted; and amounts on 4 new ones were decreased. The committee added two new surveys; two continuing studies; two new phase 1 studies; and increased several continuing studies by small amounts. No significant changes were made in the Bureau of Reclamation new projects starts included by the House.

The President submitted a budget amendment for an additional amount of $642.8 million in June of this year for new project starts for the corps and the Bureau. The budget amendment provided for full funding of the new construction starts and loans of the Bureau of Reclamation. The House rejected the out-year funding requested by the President and continued with annual incremental funding. The committee agreed to continue annual incremental funding also, and I call specific attention to this full-funding proposal and the congressional disagreement with it. This is the principal reason that the recommended bill is almost $920 million—close to a billion dollars under the President's estimate.

Even putting that difference aside, however, the overall bill as recommended would still be under the budget estimates submitted for the bill. In some cases reductions were made to conform to action on the authorizing legislation, but most of the reductions were made by the committee in a serious effort to restrain the growth of Federal expenditures.

Mr. President, as I stated at the beginning of my remarks, this is a good, well-balanced bill and we urge that it be approved by the Senate.

Mr. President, I simply emphasize that of the $10 plus billion in this bill most of that sum is for the energy research and development and related matters and military applications of the bill. Indeed, 65 percent of the bill is in that category, including the Nuclear Regulatory Commission. And, if the hydroelectric projects of the corps, Bureau, and TVA are included, it is about 75 percent energy matters.

I mention that because there is some misunderstanding that the entire $10 billion is for public works for water development. Precisely the opposite is true. Sixty-five percent is for other purposes. The public works part of this bill constitute a little more than one-half of 1 percent of the total Federal budget. They are a very important essential part of the Federal budget, constituting revenue-producing and economic activity-producing activities. But they constitute only a little more than one-half of 1 percent of the Federal budget. I will repeat the major appropriations for the corps and the Bureau.

For the civil works program of the Army Corps of Engineers for which appropriations are provided in title II of the bill, the committee is recommending a total of $2,645,620,000. This is $325,545,000 less than the budget estimates and $34,139,000 less than the amount approved by the House.

The committee recommends $137,138,000 for general investigations; $1,354,147,000 for construction, general; $223,035,000 for flood control, Mississippi River and tributaries, and $795,500,000 for the operation and maintenance account. And, the committee recommendation for the Bureau of Reclamation totals $567 million. Many members have asked about the breakdown between the energy part and water resources development portion of the bill and the report of the committee shows these numbers in the tabulation and comparative statement.

Mr. President, I ask unanimous con-

sent that the committee amendments be agreed to en bloc and that the bill be considered as original text for the purpose of further amendment, provided that no point of order shall be considered as having been waived by reason of this unanimous-consent agreement.

The PRESIDING OFFICER (Mr. NUNN). Is there objection? The Chair hears none, and it is so ordered.

The committee amendments agreed to en bloc are as follows:

On page 1, line 5, strike "public works for water and power development and energy research" and insert "energy and water development";

On page 2, line 13, strike "$4,865,437,000" and insert "$4,839,850,000";

On page 3, line 12, strike "$1,120,856,000" and insert "$1,005,771,000";

On page 3, line 24, strike "$143,473,000" and insert "$145,473,000";

On page 4, line 10, strike "$103,738,000" and insert "$105,738,000";

On page 5, beginning with line 19, after "SEC. 101." strike through and including line 25, and insert in lieu thereof the following:

None of the appropriations in this title shall be available for obligation until enactment into law of S. 2692, S. 2693, or similar authorizing legislation.

On page 6, line 18, strike "$140,014,000" and insert "$137,138,000";

On page 6, line 23, after "Waterway" insert "or would result in adverse diminution of generation of hydroelectric facilities on the Niagara or Saint Lawrence Rivers";

On page 7, line 12, strike "$1,392,515,000" and insert "$1,354,147,000";

On page 7, line 14, after "That" strike through and including line 18, and insert in lieu thereof the following:

Funds appropriated for the Willow Creek Lake, Oregon project shall be used to construct that project in accordance with the Special Report of the Chief of Engineers dated May 15, 1974.

On page 8, line 2, strike "$232,930,000" and insert "$223,035,000";

On page 9, line 4, strike "$29,000,000" and insert "$46,000,000";

On page 10, line 20, strike "obligations" and insert "accrued expenditures of the capital investment program";

On page 10, line 22, strike "$1,186,861,000" and insert "$102,500,000";

On page 11, line 5, strike "30,600" and insert "30,300";

On page 12, line 2, strike "$29,870,000" and insert "$30,870,000";

On page 12, line 12, strike "$244,391,000" and insert "$208,572,000";

On page 14, line 13, strike "$27,315,000" and insert "$17,315,000";

On page 14, line 19, strike "$87,873,000" and insert "$86,373,000";

On page 15, line 11, strike "$38,745,000" and insert "$36,366,000";

On page 16, line 20, strike "nineteen" and insert "thirty";

On page 19, beginning with line 9, strike through and including line 16;

On page 21, line 6, strike "7,900" and insert "7,800";

On page 21, line 24, strike "$374,000,000" and insert "$368,700,000";

On page 22, line 1, strike "$246,000,000" and insert "$231,000,000";

On page 22, line 17, strike "$545,000" and insert "$245,000";

On page 23, line 16, strike "$321,487,000" and insert "$328,287,000";

On page 24, line 3, after "expended" insert a colon and the following:

Provided further, That none of the appropriation contained herein shall be available for obligation until enactment into law of S. 2584 or similar authorizing legislation.

On page 24, line 17, strike "$500,000" and insert "$200,000";

On page 24, line 25, strike "$154,531,000" and insert "$151,531,000";

On page 25, beginning with line 3, insert the following:

WATER RESOURCES COUNCIL

WATER RESOURCES PLANNING

For expenses necessary in carrying out the provisions of the Water Resources Planning Act of 1965 (42 U.S.C. 1962–1962d–3), as amended, including services as authorized by 5 U.S.C. 3109 and 42 U.S.C. 1962a–4(5), and hire of passenger motor vehicles (42 U.S.C. 1962a–4(6)), $11,773,900, to remain available until expended, including $2,668,000, for expenses in administering the Act (42 U.S.C. 1962(b)), $2,172,900 for preparation of assessments and plans (24 U.S.C. 1962d(c)), $1,047,000 for preparation of plans (33 U.S.C. 1289), $2,886,000 for expenses of river basin commissions under title II of the Act (42 U.S.C. 1962d(a)), and $3,000,000 for grants to States under title III of the Act (42 U.S.C. 1962c(a)).

On page 25, beginning with line 22, strike through and including page 26, line 3;

On page 28, line 4, strike "Public Works for Water and Power Development and Energy Research" and insert "Energy and Water Development";

Mr. MARK O. HATFIELD. Mr. President, the subcommittee chairman has already described the bill and our efforts on it in some detail. I would like to add just a few remarks of my own to emphasize some noteworthy aspects of the bill we are about to take up on energy and water development and to mention some special concerns I have about it.

Title I of the bill provides full funding for most of the Department of Energy, all but the fossil and conservation programs. In this title, we were once again faced with the situation that authorizing legislation has not yet passed the Senate. Accordingly, we have taken special care to see that none of our recommend funding levels exceed the levels allowed in the authorizing legislation reported by the authorizing committees.

Late in our deliberative process, the President sent up a budget amendment calling for reallocation of funds already contained in the original budget request. The major beneficiary of this $100 million budget realinement was the solar program. This explains the fact that the committee's generous recommendations for the solar program appear only slightly higher than the budget request. I have been consistently a strong supporter of solar energy and have pushed for additional funding for it whenever I felt the additional funds could be utilized productively. I believe the level recommended by the committee is essentially at that point of maximum productive utilization.

When it comes to the nuclear programs, I must express my belief that we have gone beyond the point of maximum productive utilization. Particularly in relation to the breeder program, I feel we have erred not only in providing for the possibility of continued funding of the Clinch River breeder reactor project, but also in providing more than is required for that project if it is not terminated and more than is required for other breeder development efforts if CRBR is terminated. In addition to the $666 million already in the budget request for other fission research and development work aside from enrichment activities and the $367 million in the budget request for the breeder program and approximately $100 million in carryover funds within the breeder program, we are proposing to add another $180.5 million to the budget request for the breeder reactor program.

I must also note my concern about the recommended continued funding of production of enhanced radiation weapons. I will not address myself to that issue on this bill. But I do wish to register my opposition to the proposed funding.

Despite the specific instances in title I where I feel the funding levels are too generous, I must point out that title I is, nevertheless, $464.5 million under the budget request and even $223.8 million under the fiscal year 1978 appropriation. Some of us may disagree on the levels provided for specific programs. But there can be no argument in regard to the committee's general restraint in this title.

Nor can anyone justly say the committee has been profligate in titles II and III, the Corps of Engineers' and Bureau of Reclamation's Water Resources Development programs. The recommended level for these two titles is over $500 million less than the budget request. Some of this difference can be explained by the fact that the amended budget request called for full funding of certain new construction starts. But to keep this mitigating factor in perspective, our recommended level for water resources development is still $100 million below the House amount, which did not include any full funding of such projects.

After careful consideration, we have added some new construction starts to the President's request. We believe these new starts are essential to maintaining a balanced, on-going water development program. Last year, of course, we had no new starts and provided for very few in the 2 years prior to fiscal year 1978. The President's decision to reverse this trend by making his own new start proposals were welcome. But it did not go far enough in providing for initiation of other high priority projects that have been put off for several years.

In regard to last year's so-called "hit list" projects, no construction funding is recommended for seven of the nine corps and Bureau construction projects deleted from last year's bill as part of the compromise with the President to achieve a bill that would not be vetoed. Thus the committee has shown great restraint here, as well.

Title IV of the bill provides funding for the Nuclear Regulatory Commission, the Tennessee Valley Authority, the Water Resources Council, the Appalachian Regional Commission, and several other commissions. The total increase above the budget for this title is approximately $40 million.

Taking the proposed committee amendment into account, this year's bill is $932 million under the budget request, $233 million under the House allowance, and $332 million under the fiscal year 1978 appropriation. It has taken great discipline to maintain such fiscal

restraint. That restraint is required if we are to pass a bill that stands a fighting chance of not being vetoed. But trying to carry that restraint any further by requiring a percentage across-the-board cut as the House has done can cause serious problems. We have already taken almost every cut that would not jeopardize vital program efforts. We have managed to come up with a bill that is 2 percent less than the House bill even after the House's 2-percent cut. Further cuts now will only cost more in the long run by forcing construction projects to be stretched out and exposed to inflaperiod.

I hope our demonstrated restraint on this bill will persuade Members that a tion-caused price increases over a longer further percentage cut is not appropriate on this bill and, indeed, would be a poor reward for our determination to hold the line prior to floor consideration.

I also urge that we observe the same restraints here on the floor as to adding additional funding through amendments to this bill. I think we have developed a conservative, yet fair and productive bill. Therefore, I urge its adoption.

Mr. President, I ask unanimous consent that Michael Shorr of Senator JAVITS staff be granted privilege of the floor during consideration of all matters pertaining to this bill; and I also ask unanimous consent that Mary Gedde and Kathryn Bruner of Senator HAYAKAWA's staff be granted privilege of the floor during the consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MARK O. HATFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Does the Senator request that the time be charged to both sides?

Mr. MARK O. HATFIELD. Yes; Mr. President, I suggest that the time be deducted from each side equally.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. MARK O. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MARK O. HATFIELD. Mr. President, I ask unanimous consent that the following staff members have the privilege of the floor during the debate on this matter: Will Smith and Chuck Trabandt, of the Energy Committee; Ed Neff and Bill Kingston, of Senator DOMENICI's staff; and Charles Wood, of Senator DANFORTH's staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1640

Mr. JOHNSTON. Mr. President, I have an amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Louisiana (Mr. JOHNSTON) proposes an unprinted amendment numbered 1640.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 7, line 13, strike: "$1,354,147,000" and insert in lieu thereof "$1,342,147,000"

Mr. JOHNSTON. Mr. President, the committee reported this bill on Monday, August 7, with 12 million included in the bill for Meramec Park Lake in Missouri.

The committee included these funds subject to the local referendum on the project, which was held on Tuesday, August 8. The local people in Missouri voted against proceeding with the project, and this amendment deletes the appropriation for the Meramec Park Lake project. It deletes the $12 million in the bill.

The PRESIDING OFFICER. Does the Senator yield back all his time?

Mr. JOHNSTON. All time is yielded back.

The PRESIDING OFFICER. Does the minority yield back all time?

Mr. JOHNSTON. Mr. President, I am authorized by the minority staff to yield the time on behalf of the Senator from Oregon.

The PRESIDING OFFICER. All time is yielded back by the minority staff on behalf of the minority, and the question is on agreeing to the amendment of the Senator from Louisiana.

The amendment was agreed to.

Mr. JOHNSTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. McCLURE. Mr. President, I ask unanimous consent that Mr. Charles Trabandt of the Energy Committee staff be accorded privileges of the floor at all stages of the proceedings on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. And Everett Wallace likewise be accorded privileges of the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. ROBERT C. BYRD. Equally divided.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CHURCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

UP AMENDMENT NO. 1641

Mr. CHURCH. Mr. President, I offer an unprinted amendment.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. CHURCH) proposes an unprinted amendment numbered 1641:

On page 3, line 12, strike $1,005,771,000" and insert in lieu thereof "$1,035,771,000".

Mr. CHURCH. Mr. President, the Committee on Energy and Natural Resources included $30 million in construction funds for project 79-1-p, a repository for 5,000 metric tons of spent light water reactor fuel with a site to be determined. This amendment increases the total budget authority appropriated for plant and capital equipment by $30 million to provide funding for project 79-1-p. The budget outlays in fiscal year 1979 are expected to be only $6 million, but the budget authority of the full $30 million is needed to insure that contracts for architectural and engineering design work, long-lead time procurement of components, and site acquisiton can be signed.

I am concerned that the administration's budget request lacks a sense of urgency in achieving a repository at an away-from-reactor site for spent fuel which is accumulating in storage pools at operating nuclear reactors. Analyses by the Department of Energy and outside organizations indicate that a spent fuel repository will be necessary by early 1983, in order to provide for the orderly operation of existing reactors. The reactor storage pools at many reactors will be filled to capacity or seriously limited in their ability to accept fuel from the reactor core in the event of a required removal of fuel from the core by 1983.

The Committee on Energy and Natural Resources does not believe that private industry will build these spent fuel repositories with private investment funds given the history of reversal of position on nuclear policy by the Federal Government in several previous actions in the nuclear, as well as the nonnuclear, areas. Thus, the committee authorized $30 million for the initiation of a 5,000 metric ton spent fuel repository to be initiated in fiscal year 1979. I believe that building this project is the most prudent route to implement the spent fuel policy announced by the administration in October, 1977. By offering this amendment, it is my intent and expectation that the spent fuel repository authorized in project 79-1-p should be completed to the point in December, 1982, that the first increment of capacity would be available to start receiving shipments of spent fuel assemblies from operating reactors.

I believe that the distinguished man-

ager of the bill is familiar with the problem we face and sympathetic with the objective we seek in the amendment I have offered. I hope that he will find the amendment acceptable.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. CHURCH. I yield.

Mr. McCLURE. I wonder if he would add my name as a cosponsor of the amendment.

Mr. CHURCH. Yes, I will be happy to do that. I ask unanimous consent that the name of my colleague (Mr. McCLURE) be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON. Mr. President, the Appropriations Subcommittee on Public Works is strongly in support of this program. As a member of the Committee on Energy and Natural Resources, I have a special interest in the program. The failure to include this $30 million line item has nothing at all to do with our lack of enthusiasm for the program, or with our desire and indeed mandate that this program be begun. Indeed, on page 34 of our report, we included the following language:

> Department witnesses testified that adequate funds are available in the nuclear fuel cycle program to begin a facility design in fiscal year 1979. The Committee understands that the design of a spent fuel storage facility must begin in fiscal year 1979 to avoid delaying an operating date beyond 1983, and possibly beyond 1984. Such a delay may prove intolerable for utilities operating reactors without full core reserves by that time unless spent fuel storage facilities are provided; it threatens a further loss of operating flexibility and courts the prospect of nuclear plant shutdowns with serious economic results.
>
> The Committee expects the Administration to assure utilities that storage is to be accomplished on an interim basis with adequate retrievability.

Mr. President, as pointed out in our report, the committee expects that this design be begun this year. It is our understanding that the Department has a $6 million obligational ability with respect to this design. We also understand that there are adequate funds available in the nuclear fuel cycle program to begin this facility in 1979.

It was because of this money in the nuclear fuel cycle program that we thought that this language in the report would be adequate to insure that the design would get underway. I can understand the Senator's desire, however, to absolutely nail this down by putting it as a line item in the budget, because there has been some hesitation on the part of the Department to actually begin this design.

For that reason, Mr. President, I would be inclined to accept a line item on this matter, not of $30 million, because $30 million would exceed their obligational ability, but in the amount of $5 million, because I believe the language in the report would ensure that this design would be begun in 1979, and would constitute more of a mandate than the Senator's amendment.

It is our absolute intent there be no delay in this program and that if the Department finds that they can use more than $6 million, that is, this $5 million plus another $1 million from the nuclear fuel cycle program, that they will come in to us with a request for reprogramming.

So, Mr. President, I would suggest that the $5 million line item, if the Senator would be willing to amend his amendment, would insure the beginning of this program in 1979 with no delay, and would constitute the full endorsement of this body to the beginning of that program.

Mr. McCLURE. Will my colleague yield to me?

Mr. CHURCH. I am happy to yield.

Mr. McCLURE. I thank the Senator for yielding.

Mr. President, I rise in support of the amendment to add $30 million to H.R. 12928 to provide initial funding for project 79–1–p, A 5,000 metric ton capacity, away from reactor storage facility for nuclear spent fuel from commercial reactors. This so-called AFR facility is of critical importance to the electrical energy supply to the United States in the next decade. The 68 nuclear reactors now in operation and the 94 nuclear reactors now being built will be dependent upon the storage capacity of this and similar facilities in the future. It is important to recognize that 13 percent of total United States electrical generation capacity was provided by nuclear power in 1977, and that percentage will continue to grow in future years.

Because of the importance of nuclear power to our electrical energy supply, we in fact are on the verge of a major energy supply crisis in the next decade in the absence of strong positive action now to avert that crisis. But, at the same time, we have an excellent opportunity now to avert that crisis by providing the proposed funding to initiate the work on this facility now.

Let me briefly review the background associated with this facility and the amendment to fund $30 million in fiscal year 1979. A full fuel loading for a commercial nuclear reactor includes from 190 to 750 fuel assemblies, depending on the design of the reactor, with a total weight of from 86 metric tons to 140 metric tons. Commercial nuclear reactors are refueled annually with replacement of about one-quarter to one-third of its fuel loading, or the equivalent of a full load replacement every 3 to 4 years. The used fuel is called "spent fuel" and the spent fuel assemblies are stored at the reactor site to allow cooling for later transshipment to a longer-term, off-site storage facility. Most reactor plants have on-site storage facilities for spent fuel with a capacity of about 1½ full fuel loads, or from 4 to 5 years of spent fuel discharge.

Planning by nuclear utilities for the ultimate disposition of this spent fuel has been promised for many years, because of past Federal Government policies, on reprocessing of this spent fuel to obtain the one-third of the initial fuel load which has not been burned up in the reactor, and also to process the remaining waste products for final disposition. As we all know, the final disposal of nuclear wastes has been and continues to be a major challenge in our nuclear power program, particularly because the Federal program for nuclear waste disposal continues to be diffused in research, studies, and reviews. All of us are anxious to get on with the solution to this challenge. It is noteworthy that the administration again has concluded that technical solutions do exist, and now, as in the past, our real challenge is to stop all the debates and studies and to get on with demonstrations and actual disposal operations. I am hopeful that a concerted and well-focused Federal effort can and will eventually move us toward a solution which is technically available.

Importantly, we are all aware that the President on April 7 of last year announced a new nuclear power policy for the Federal Government which was primarily based on the new administration's views on nuclear nonproliferation. One important and relevant part of the policy announcement was the indefinite deferral of the commercial reprocessing which had formed the basis for nuclear utility planning for spent fuel. Additionally, the administration mandated the termination of all support for commercial reprocessing activity in nuclear licensing and in the new Department of Energy programs. In fact, last fall, the Nuclear Regulatory Commission canceled its ongoing generic environmental impact statement affecting the licensing of reprocessing facilities at the request of the White House.

As a result of this reversal in Federal Government policy away from reprocessing, our nuclear utilities were faced with a new requirement to provide for the storage and disposition of spent fuel which previously would have been transferred to commercial reprocessing facilities. Consequently, the utilities and the Nuclear Regulatory Commission have initiated efforts to maximize the storage capacity available in the existing on-site spent fuel storage facilities. Those efforts are being hampered by the increasingly strong opposition of public interest and antinuclear groups and in any event, those efforts can only be a stopgap measure because of the inherent technical limitations on those storage facilities.

The administration, in recognition of this increasingly critical problem, announced on October 18, 1977, a new commercial spent fuel policy that the Federal Government would accept commercial spent fuel from utilities for a fee based on all Federal costs. Since that time, the Department of Energy and the administration have been struggling to organize the commercial spent fuel program and the AFR storage capacity which will be required in the future to meet this Federal commitment.

The Energy and Natural Resources Committee of the Senate and several committees in the House of Representatives have reviewed the administration's plans for providing the required AFR capacity. The conclusion of all of the committees was that the administration had to move as fast as possible to get this storage capacity on line to meet the critical deadlines which face us in the future. Specifically, we have determined

that up to 12 nuclear powerplants could be shut down by 1983 in the absence of Federal AFR storage capacity. In response to an industrywide survey of nuclear utilities, the Department of Energy determined that there may be as much as 900 metric tons of spent fuel from 13 reactors by the end of 1982 and an additional 800 metric tons from a total of 26 reactors in 1983 for transfer to a Federal AFR. The Energy Committee accordingly seized the initiative and authorized project 79–I–p at an initial funding level of $30 million for fiscal year 1979 because it is apparent that activity must begin in calendar year 1979 to support the required operational date in 1982 or 1983. This amendment will provide that authorized funding and will insure the facility is available on schedule, in terms of funding considerations. We recognize that even with this commitment of funds, it is going to be a horserace to avert the crisis which otherwise will develop.

Let me suggest to my friend from Louisiana and my friend from Oregon that the reasons the $5 million is probably inadequate are two: First of all, that may be all that they can actually obligate and spend in outlays during 1979, but there is no assurance at all that they are going to start on the program unless the program is authorized. This is a $30 million program, and I realize this is an appropriations measure and not an authorization measure, and I do not see, if we put in $5 million and suggest that they have reprograming authority, unless we have directed them, that they are going to reprogram for the amounts of money that may be necessary during 1979. I think we need to underscore the absolute seriousness of this problem.

If, as a matter of fact, they do not go forward as rapidly as they can, they will not have the storage available in 1983 and there will be operating shutdowns of operating nuclear powerplants. In some areas of this country that can be absolutely devastating to the electric power loads that are now on line in those areas.

I understand we do not like to inflate budgets. No one around here likes a tight and lean budget any better than this Senator from Idaho, but I am very much concerned that the administration has understated their needs. They have done so consistently. That is why in the Energy Committee we overrode their suggestions and installed this in the Energy Authorization Act.

I think it would be penny wise and pound foolish to cut us back to the bare bone. Assuming the worst-case scenario from the standpoint of the Appropriations Committee, they could come in for a supplemental or to reprogram, because they have not shown that dedication and determination to get this done.

I know the administration officials are very reluctant to admit it, but there are those, as the Senator from Louisiana knows, who have told us in our conversations with them that they need this program.

Mr. JOHNSTON. Mr. President, if I may reply to the distinguished Senator from Idaho, with this language and with the $5 million line item we will insure that we will be back in business beginning on the project in a period of 3 months. We have stated very clearly in the report, and again here on the floor, our intent that the Department pursue the program without delay. The Department witnesses have testified that even without this $5 million there are adequate funds in the budget to begin on this project. However, we accept the $5 million as a line item only to insure that the project must be funded to allay any doubts or any hesitation on the part of the Department to begin.

I would suggest to the Senator that so long as I am chairman of this subcommittee we will pursue the Department to insure that they are beginning and continuing with this project as rapidly as possible. We will monitor them very closely to see that that is done and make a request of them to reprogram as necessary and as they are able to use the money.

Mr. McCLURE. Will the Senator from Louisiana yield for a question?

Mr. JOHNSTON. I yield, yes.

Mr. McCLURE. I thank the Senator for yielding.

We had the same administration witnesses telling us the same thing before the Energy Committee and before very hard, probing questions they had to admit they could not do it, that they did not even plan to do it unless we pushed on this issue.

We have a new director of the waste disposal program. I think Dr. Deutch is a very forthright and very able administrator as well as a very able scientist. He will tell us that this $30 million is needed. I have had him say that both before the committee and to me privately in my own office. I have no doubt in my mind that if we ask the administration through OMB what they need, they will say, "We do not need more than $5 million." But if we get down to the man who is managing the program, if we are really going to get it done by 1983, $5 million will not do it in 1979.

The only thing I can suggest, if, as a matter of fact, the committee is going to insist upon that level, is that we have to have, as a very minimum, an absolute assurance that any supplemental that is needed will be granted; an absolute assurance that any reprograming that can be demonstrated will be allowed. And that is not going to come from the administration witnesses, I will tell my friend.

Mr. JOHNSTON. I can tell the distinguished Senator from Idaho that speaking at least for the chairman, and I am trying to make that clear here, I reiterate the fact that not only will the committee, insofar as I have anything to do with it, approve the supplemental as needed, or approve reprograming as needed, but we will go a step further and ride herd on the administration to insure that they submit those requests for supplementals or submit those requests for reprograming and submit to us the necessary information to insure that this program is proceeding as rapidly as possible.

Mr. McCLURE. Will the Senator yield further?

Mr. JOHNSTON. I yield.

Mr. McCLURE. I appreciate the Senator yielding to me.

The trouble that I have with that is that it depends upon the initiative of the administration to come forward with the requests. They have shown a notable lack of interest in this program, a tremendous lack of appreciation of the time lag, and the critical nature of getting this underway right now. This is not in the category of the usual arguments over nuclear energy or nonproliferation. It is a question of whether or not those operating reactors are going to have sufficient storage for their spent fuel so that they can refuel in 1983.

There is no slack to be taken up here. There is no argument on the nonproliferation issue here.

This is simply a question of whether operating reactors are going to continue to operate or whether they are going to shut down.

The administration in their official pronouncements will tell us, "Do not worry. We have it under control." As a matter of fact, the experts in the field, and even within the administration, will say, "Hey, there is an awful lot to worry about. We do not have it under control. We will need a lot more than that $5 million if we are to assure the American people that their electrical energy will not be shut off beginning in 1983."

I understand what the Senator from Louisiana is saying but I have grave doubts that the administration will come forward and ask and that the committee will grant. We got that into the act over their protests, as I am sure my colleague from Idaho will remember, and I am sure my colleagues from Louisiana and Oregon remember that struggle in the Energy Commission. The assurance that we will support the administration is no assurance at all. The assurance we need is that we will support the program.

Mr. CHURCH. Mr. President, the fate of the authorization bill which contains $30 million for this project is, to say the least, uncertain. At the moment, we can insure the availability of funds for this project by the addition of money in an amendment to this appropriation bill. I think that the manager of the bill has given us all the assurances that he can that he not only sympathizes with the need for the project but that he will follow up with supplemental appropriations to make certain that the project does not fall behind schedule. Beyond that, he cannot go. Clearly, unless we get the authorization bill enacted into law, we shall have to depend upon such authority as the appropriation measure gives us.

Mr. President, I should like to ask the distinguished manager of the bill if there is any question in his mind that the addition of this $5 million as an amendment would constitute an authorization to proceed in the absence of an authorization bill. If the Senator will remember, there have been times in the past when it has not been possible for the two Houses to agree upon an authorization bill and the whole program has then been carried by the appropriation meas-

ure. I want to be certain that we, through the adoption of this amendment, have sufficient authority in the law to justify and make legal the expenditure of the funds should no authorization measure be enacted this year.

Mr. JOHNSTON. The Senator is correct. This constitutes not only an authorization but a mandate to proceed which may be ignored only by sending up a rescission or a deferral, subject to one caveat, and this applies to all projects in the energy R. & D. section. That is that there is a provision at the end of the bill that all of these appropriations are subject to authorization. We shall have to deal with that overall question later, either by getting an authorization out on the floor and voted or by some other means. There are other, alternative means which we do not want to use, because we like to insist on authorizations before we proceed.

On the general subject of does this authorize and require the beginning of this project, there is no question that that is so.

Mr. CHURCH. I thank the Senator very much.

Mr. JACKSON. Will the Senator yield?

Mr. CHURCH. Yes, indeed. I am prepared to yield the floor at this time.

Mr. JACKSON. Will the Senator from Louisiana yield?

Mr. JOHNSTON. Yes.

Mr. JACKSON. Mr. President, in connection with the construction funding—before I do that, I yield to the Senator from New Mexico.

Mr. DOMENICI. Mr. President, I want to direct this to the floor managers and to Senator CHURCH and Senator MCCLURE.

Senator JACKSON and I have an amendment with the same construction item. Rather than hold up Senator CHURCH'S amendment, we ask unanimous consent that it be in order for us to offer an amendment to this same section after the passage of his amendment. It has nothing to do with this subject, but it is in the same construction line item. Unless we offer it now as an amendment to his, it might be out of order and we are asking unanimous consent that it be in order to offer it and thus permit his amendment to proceed at this point.

Mr. CHURCH. Certainly. I have no objection.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. JOHNSTON. Mr. President, I yield to the distinguished Senator from West Virginia such time as he may require.

Has the amendment been modified?

Mr. CHURCH. Mr. President, I modify the amendment by reducing the amount involved from $30 million to $5 million.

The PRESIDING OFFICER. The Senator has that right.

The amendment is so modified.

Mr. CHURCH. As modified, I move the adoption of the amendment.

The PRESIDING OFFICER. Is all time yielded back?

Mr. JOHNSTON. Mr. President, I yield back the remainder of my time.

Mr. CHURCH. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment as modified.

The amendment, as modified, was agreed to as follows:

On page 3, line 12, strike "$1,005,771,000" and insert in lieu thereof "$1,010,771,000".

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the amendment was passed.

Mr. JACKSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. JOHNSTON. Mr. President, I yield to the Senator from West Virginia such time as he may require.

Mr. RANDOLPH. I thank the manager of the bill.

Mr. President, I ask unanimous consent that Richard Harris, counsel for the Committee on Environment and Public Works, have the privilege of the floor during debate and voting on this bill.

The PRESIDING OFFICER. Is there objection? Withoout objection, it is so ordered.

Mr. RANDOLPH. Mr. President, for more than a century in our Nation's history, the development and management of our water resources have been recognized as an important and essential Government function.

It will, I am convinced, continue so despite any changes which may come about as a result of the administration's new water policy proposals on which the Environment and Public Works Subcommittee on Water Resources opened a series of hearings only this morning. That will be a part of the effort that we, as the authorizing committee—complementing, of course, the work of the Appropriations Committee—will be considering in this body.

I am just as sure, from my own knowledge and experience, that the civil works function will continue to be worth what it costs as a practical Federal investment in the country's present interests and future prospects.

We are considering the appropriations bill to finance the civil works program, as well as the activities of the Department of Energy, for the coming fiscal year.

The measure is vitally important both to the country and to our State of West Virginia in the provisions it makes for operations of the Corps of Engineers.

While I support the measure as a whole, I confine these remarks to that portion of the legislation I agree with the priorities it establishes in balancing existing needs with future requirements. It recognizes practical realities and budgetary limitations and that it reflects careful planning.

From West Virginia's standpoint it addresses some very pressing needs in a total allocation of approximately $26 million in construction outlays and about $1.3 million in study funds.

One of the top priority items on our State's list is $10 million earmarked for snagging, clearing and channelization on branches of the Big Sandy River in West Virginia and Kentucky.

That project is designed to provide short-term flood control on the Tug Fork until more permanent measures can be taken to prevent the kind of damage resulting from the major storm of April 1977.

The construction list also includes $8 million for that final phase of work on the R. D. Bailey Lake, $6.4 million for the Stonewall Jackson Lake project and $1.2 million for the Burnsville Lake development.

Study money is provided for the Kanawha River Basin investigation, for the Huntington area metropolitan area study, for an assessment of development needs in the Big Sandy Basin for a Guyandotte Basin review, and to further accomplish phase I advanced engineering and design on the Gallipolis locks and dam on the Ohio River.

The bill provides necessary operation and maintenance money for the Kanawha River navigation project and for Summerville, Sutton, Tygart, and Bluestone Lakes.

These items have a significant place in West Virginia's water resources development plans and in its growth prospects.

Those needs have been recognized by the Senate Appropriations Committee in reporting H.R. 12928. I commend the able Senator from Louisiana (Mr. JOHNSTON) for his attention and consideration of these projects. I very much hope the provisions for meeting them can be retained without reduction.

I hope, too, that the bill as a whole can be adopted promptly and with a favorable margin insuring that it will be signed into law without delay or question.

Mr. President, this program envisaged in this appropriations is a measure vitally important both to the country and to our State of West Virginia in the provisions it makes for the operation of the Corps of Engineers.

Mr. JACKSON. Mr. President, in connection with the funds for the laboratory at Argonne, Ill., which is on page 16 of the conference report, the committee deleted the funds for the current fiscal year in the sum of $10,600,000. The House had allowed that sum.

Mr. President, I have been working with Senator STEVENSON of Illinois on this matter. He called to our attention certain facts that we did not have at the time the Energy and Natural Resources Committee deleted the funds. I just talked with Senator STEVENSON and stated I would indicate to the Senate that it would be our position, when the authorization bill came up, that we would ask for the restoration of the funds for the Argonne Laboratory.

Mr. President, I point out that our concern related to what appeared to be a very high cost per square foot for the construction of the building. We have since received additional information which indicates that this aspect of the problem can be resolved. Senator STEVENSON has been advised of what I was going to say here and I have assured him that I shall do everything I can in urging the conference committee, when they meet, for the conferees on the part of the Senate to concur in the action taken by the House.

Mr. President, with that statement, it will not be necessary to offer an amendment. I ask the Senator from Louisiana if we could have that cooperation, based on the premise that the Senate would restore the funds in the authorization bill. I feel that there is no point in making or offering an amendment at this time in light of the fact that we have not had an opportunity, of course, to act on the authorization bill.

Mr. JOHNSTON. Mr. President, the distinguished Senator from Washington has discussed this matter with me and has pointed out that the deletion of the funds for the laboratory was inadvertent, that it was, in fact, due to the authorization committee.

I think the case he makes is a very strong one. This matter will be in conference. I would expect the committee to view this most sympathetically.

Mr. JACKSON. As I understand the Senator from Louisiana's position, the floor manager and chairman of the subcommittee, it is that had the committee approved the authorization, that is, the Energy and Natural Resources Committee, had they approved the authorization, the Appropriations Subcommittee would have approved it.

That is essentially it, is it not?

Mr. JOHNSTON. I would think the Senator is probably correct, that our committee would have approved that. The only major problem here was that the Energy Committee's bill did not provide an authorization.

Mr. JACKSON. I understand that, and that will be taken care of when the energy authorization bill is brought up on the floor of the Senate.

I thank the Senator from Louisiana, not only for myself, but for Senator STEVENSON, as well.

Mr. JOHNSTON. I thank the distinguished Senator from Washington.

UP AMENDMENT NO. 1642

(Purpose: To reduce funding for Dickey/Lincoln project)

Mr LEAHY. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Vermont (Mr. LEAHY) proposes unprinted amendment numbered 1642.

Mr. LEAHY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 7, line 13, strike $1,342,147,000, and insert in lieu thereof $1,340,391,000.

The PRESIDING OFFICER. The Chair observes that this amendment amends a figure which has already been amended and would require unanimous consent in order to be considered.

Mr. LEAHY. I ask unanimous consent that be allowed.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I rise to propose an amendment to the public works for water and power development bill (H.R. 12928). I move to delete $1,756,000 in planning funds for the Dickey-Lincoln School lakes hydroelectric project from the bill.

Quite frankly, after doing a nose count around the Senate, I am not optimistic about the chances of this amendment succeeding, but I do feel compelled to bring this matter to the Senate's attention and to express my feelings on Dickey-Lincoln.

I am firmly convinced that, in the case of Dickey-Lincoln, the stakes are too high. I wish to outline the reasons for my opposition to any continued funding for this project.

For some time, Mr. President, we Americans have been faced with a serious problem—we are constantly called upon to choose between the pursuit of our energy needs and the protection of our environment. In most cases, we arrive at conclusions that are less than 100-percent satisfactory from either perspective, conclusions that amount to trade-offs between economic imperatives and ecological realities. The majority of our energy production trade-offs are at least able to be rationalized in terms of the benefits that can be derived. This is not the case with the Dickey-Lincoln project—the environmental costs are staggering and the energy benefits are not substantial enough to warrant its continuation.

The evidence against Dickey-Lincoln's construction is quite substantial on environmental grounds alone. Construction would result in the inundation of over 50 miles of the St. John River, over 88,000 acres of unspoiled forest, 200 miles of other rivers and streams, and 30 natural ponds and lakes. The wildlife of the region, most notably deer, would be dislocated and most likely decimated. The natural plant habitat would be at best partially sacrificed, and at worst destroyed. Over 160 families would be forced from their homes and the local communities would be severely disrupted. I am not able to put a monetary value on the cost of such dislocation, to say nothing of the actual construction cost of the project that will certainly approach, if not exceed, a billion dollars.

Let me turn, Mr. President, to those benefits that would be derived from the construction of the Dickey-Lincoln project. This hydroelectric plant will not be a panacea for New England's energy woes. It will not provide base power, but only peak power—the St. John River will never provide enough power generation to warrant continuation of Dickey-Lincoln. This plant cannot be justified economically, let alone ecologically, because it would run only about 15 percent of the time. The cost benefit ratio, even calculated with an unrealistic interest rate, was determined to be 1.2 to 1. In actual fact, it would be less than 1 to 1. Overall electrical demand has grown in the region at a rate of less than 1 percent in the past year. That does not even approach the Corps of Engineers 4 percent estimate. In Vermont, peak-load demand grew by 0.4 percent last year; the corps estimated a growth rate of 5 percent. I submit that it is questionable as to whether Dickey-Lincoln's peak-power will be necessary by the time the project would be in operation.

In closing, Mr. President, I only wish to state that this project will not adequately address New England's energy needs. It cannot be justified, and we in the Senate should not appropriate any additional funds for its continuation. It is my belief that we have already squandered nearly $9 million and it is time to stop. Additional study will only raise additional problems. We can far better spend the taxpayers' money and move forward to meet the energy demands of this region by allocating funds for alternatives to Dickey-Lincoln. Today, there are over 200 small dams and low head hydroelectric plants throughout New England that could provide supplemental peak-power with little further environmental impact. I believe that unrestricted energy growth and continued destruction of precious natural resources when viable alternatives have not been given a fair trial constitute a dangerous approach to our energy problem.

It is for these reasons, Mr. President, that I bring up this amendment. Should it fail to be accepted by the Senate, I can only say that I hope our colleagues in the House will hold fast in conference, and reject this appropriation for the continuation of the Dickey-Lincoln project.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. MUSKIE addressed the Chair.

Mr. MARK O. HATFIELD. How much time does the Senator wish?

Mr. MUSKIE. Four minutes.

Mr. MARK O. HATFIELD. I am happy to yield 4 minutes to the Senator from Maine.

Mr. MUSKIE. I thank my good friend from Oregon.

Mr. President, I am pleased to support H.R. 12928, the energy and water development appropriations bill for fiscal year 1979. I commend the chairman of the Public Works Subcommittee for his efforts in shaping and reporting this bill, which is consistent with the second budget resolution.

There are several provisions in the bill of particular interest to my State and my region.

The bill provides $1.76 million to fund preconstruction engineering and planning efforts on the Dickey-Lincoln hydroelectric and flood control project on the St. John River in northern Maine, to which the Senator from Vermont referred. The funds were requested by the President in his budget for fiscal year 1979 and will assure continued efforts on the project as we complete the required environmental studies and proceed toward construction.

I do not believe there can be many Senators who have not heard me express my support for the Dickey-Lincoln project. I will not repeat the entire case here today. I am delighted that the Appropriations Committee has again supported this project. I congratulate and thank

the committee for their continued support. The project has been before the Senate many times in the past years and we have continued to support it each time.

The project has been under intensive scrutiny in recent years as the environmental impact statement is prepared. The environmental impact statement will be completed and filed this fall but the preliminary findings reaffirm my conviction that Dickey-Lincoln offers the best opportunity for development of an indigenous energy resource available to Maine and New England. There are, of course, necessary trade-offs required but I am firmly persuaded that economically and environmentally Dickey-Lincoln is the best option available to Maine and an opportunity which we can not afford to pass up.

A final decision to proceed with construction of Dickey-Lincoln has not been made and should not be made until the environmental review required under the National Environmental Policy Act has been completed. Provision of these funds, however, is necessary to assure that continuity of efforts is maintained and that unnecessary delays and related costs are avoided.

Dickey-Lincoln has one of the highest benefit-cost ratios of any major Federal hydro project that I have seen approved by the Senate in my tenure. The benefit-cost ratio, under the formula applied by law to this project, is 2.1 to 1. More than $2 will be returned to the Federal Government for every dollar invested. If one uses the current cost of money to the Federal Government the return to the Government for funds invested remains impressive—1.2 to 1. Following the return of capital the project will continue to produce power at inflation-proof costs and continue to provide revenues to the Government. The annual savings in electricity costs in Maine alone is estimated to be at least $15 million annually. The benefits to other New England States will be similar, depending on the ultimate distribution network.

Environmentally, the project is the most acceptable of the choices facing Maine. It is given, that a portion of the St. John River will be flooded and thousands of acres of forest land inundated. But one must keep in perspective the fact that Maine has approximately 18 million acres of forest land and we are talking about less than one-half of 1 percent of that forest land being flooded. The lakes created will make forests and streams now inaccessible from Maine accessible for recreational and other uses and will discourage the exporting of our raw forest products to Canada, enhancing their availability for processing in Maine.

Mr. President, I think there is little doubt that from any realistic perspective Dickey-Lincoln offers a great opportunity to Maine, New England and the country. I again commend the committee for supporting it and urge my colleagues to do the same.

The bill, as reported by the Appropriations Committee also provides $610,000 under general investigation for continuing studies of the Passamaquoddy tidal power project in eastern Maine. I welcome the committee's funding of this study which is being conducted pursuant to a resolution I introduced in the Senate Public Works Committee in 1975. Passamaquoddy offers an additional source of nonpolluting renewable energy which I have long been persuaded we should develop. I am hopeful that this study will provide the groundwork to harness the termendous energy potential of the tides in eastern Maine.

The bill also appropriates $28,000,000 to providing technical assistance and loans for the development of low-head hydroelectric sites and retrofit of existing sites. This provision, as the report notes, can be of benefit to New England where more than 2,600 dams and reservoirs are without generating capacity.

Mr. President, I ask unanimous consent that certain documents relating to this subject be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DICKEY-LINCOLN SCHOOL LAKES, MAINE: FACT SHEET

PROJECT SETTING

The purpose of the proposed Dickey-Lincoln School Lakes Hydroelectric Project is to convert the natural energy of the upper St. John River in northern Maine for use as a source of electricity to meet future needs of New England consumers.

The project, which would be financed by the Federal Government, is located in a remote part of Aroostook County in the St. John River Valley, adjacent to the Canadian border. The proposed project would involve about 127,000 acres, including approximately 8,000 acres of water and wetland areas. The land area is presently utilized principally for commercial lumbering operations and wildlife habitat.

Electricity would be produced by capturing the annual spring runoff of the river in a large reservoir behind a 335-foot high earth-fill dam located in the village of Dickey. The power plant at Dickey Dam would be capable of generating 1,183 million kilowatt-hours of electricity annually for use during periods of peak energy demand.

Operating as a peaking plant, large surges of water would be released from Dickey Dam during short periods of time. A second dam, 11 miles downstream at Lincoln School, would be constructed to impound the releases from Dickey Dam and regulate discharges to the river before it travels through New Brunswick to the Bay of Fundy. Electrical generation at Lincoln School would supply 262 million kilowatt-hours of energy annually to Maine consumers.

Additional increased generation of 350 million kilowatt-hours per year would be realized at downstream hydroelectric plants in New Brunswick. One-half of this energy would be returned to the United States.

The impoundment of water during the spring snowmelt would have the further benefit of protecting downstream communities from damaging floods which have been especially severe in recent years.

Development of the Dickey-Lincoln School Lakes Project would have an extensive impact on the natural environment, social and economic character of the immediate area. Some 267 miles of streams, including 55 miles of the free-flowing St. John River, would be flooded to create an 86,000-acre reservoir above the Dickey Dam.

The Dickey-Lincoln School Lakes facilities would be the largest public works project ever undertaken in New England. If ultimately built, it would cost $690.3 million to construct at March 1977 prices ($544 million for the dams and related features and $146.3 million for the transmission facilities). Approximately $676.6 million of this cost would be recovered through the sale of energy to consumers.

This Fact Sheet contains background information about the proposed project and its impacts. Because preconstruction planning and design activities are not complete, ongoing and future studies may suggest modifications to specific details. Consequently, this document is subject to revision as updated information warrants. Readers may verify details by addressing inquiries to the Chief, Engineering Division, New England Division, Corps of Engineers, 424 Trapelo Road, Waltham, Massachusetts 02154.

I. Genesis

Dickey-Lincoln School Lakes evolved as a result of a study of the Development of Tidal Power at Passamaquoddy, a system of tidal bays studied since 1919 by both private and public engineers. The most comprehensive report was that completed by the International Joint Commission in April 1961 after 3 years of study at a cost of $3 million. The Commission concluded that the project was not economically feasible under the then existing conditions. At the request of President John F. Kennedy, the Commission report was reviewed to determine if the project was feasible in view of the advanced engineering techniques and prevailing economic conditions. In July 1963, a report was submitted to the President, which concluded that application of a different use-concept of power coupled with advanced engineering techniques would result in a favorable project.

On 16 July 1963, the President directed the Departments of Interior and Army to make additional studies to supplement the July 1963 report. An Army-Interior Advisory Board on Passamaquoddy and upper St. John River was formed. Interior performed studies on power facilities, power transmission, marketing benefits and other economic aspects. The Corps of Engineers developed the physical components of the project.

The Study Committee completed its evaluation in August 1964, and submitted its report to the Secretary of the Interior. Recommendations included: early authorization of the Passamaquoddy Tidal Project and upper St. John River Developments and early construction of the project to develop low cost firm power for Maine and peaking power for the remainder of New England.

The Secretary of the Interior submitted a report on 9 July 1965 to President Johnson summarizing the August 1964 report. Subsequent to August 1964, a review was accomplished to update the power benefits. The power rates had decreased due to larger, more economical developments by the power industry since the previous analyses. The reduction caused the benefit-to-cost ratio for the Passamaquoddy Power Project to fall below unity (.86 to 1). However, the benefit-to-cost ratio for Dickey-Lincoln School Lakes remained above unity with a value of 1.81 to 1.

One recommendation included in the July 1965 report approved by President Johnson was:

"Immediate authorization, funding, and construction of the Dickey and Lincoln School Projects on the St. John River and their associated transmission system. Construction would be contingent upon completion of necessary arrangements with the Canadian Government. This would also have the immediate and major by-product of preserving the famed Allagash River in Maine, one of the few remaining wild rivers east of the Mississippi River."

The Dickey-Lincoln School Lakes Project was authorized by the 1965 Flood Control Act, Public Law 89–298 dated 27 October 1965, substantially in accordance with the plans included in the August 1964 report.

II. Project description

A. Physical Characteristics

Dickey Dam is located on the upper St. John River immediately above its confluence with the Allagash River, near the village of Dickey in the Town of Allagash, and 28 miles above Fort Kent in Aroostook County, Maine. As authorized, the dam would be an earthfill structure impounding a reservoir with gross storage capacity of 7.7 million acre-feet (2,500 billion gallons) for power, flood control and recreation. The reservoir water area would total 86,000 acres (134.4 square miles) at maximum pool elevation of 910 feet mean sea level (msl). Five dikes would be located in saddle areas along the reservoir perimeter at Campbell Brook, Cunliffe Brook, Falls Brook, Hafey Brook and South Dike adjacent to the Dickey Dam, to prevent overflow into adjacent watersheds.

Dickey Dam would have a total length of 10,200 feet and a maximum height of 335 feet above the streambed. Its outlet works would include two 26-foot diameter concrete-lined tunnels, a low level tunnel 2,170 feet long at streambed elevation and an upper level tunnel 970 feet long, approximately 100 feet above the streambed. The power facilities would include four generating units at 190,000 kilowatts (kw) each, one of which would be a reversible unit, for a total initial installed capacity of 760,000 kw. This value reflects the manufacturer's generator capacity rating at minimum head. However, the dependable capacity of the units, i.e. the generating capacity of the units to meet maximum system load during the severest hydroperiod, totals 874,000 kw. Basic provisions would be included in the initial project to accommodate the potential future installation of two additional reversible units at 190,000 kw each for an ultimate installed capacity of 1,140,000 kw (1,311,000 dependable capacity). These provisions would include excavation for the adjoining forebay and tailrace channels, construction of the adjoining headworks, construction of the powerhouse foundation and raising Lincoln School Dam an additional eight feet. The installation of the additional units would be subject to Congressional authorization and would not be added until required by future power demands and an adequate source of off-peak energy is available for pumping. The project would be operated to meet peaking power requirements.

Lincoln School Dam site is located on the upper St. John River, 11 miles downstream from Dickey Dam in the Town of St. Francis. It provides for an earthfill dam impounding a reservoir with useable storage capacity of 32,450 acre-feet. The reservoir would serve principally to regulate releases from the Dickey Dam and as power pondage. The lake would also serve as afterbay storage for the Dickey Dam pumped-storage feature. Its reservoir would ultimately encompass 2,620 acres with 59,090 acre-feet of useable storage at its maximum pool elevation of 620 feet msl. However, until the installation of future reversible units at Dickey Dam is required and authorized, the maximum pool elevation would be 612 feet msl with an area of 2,240 acres.

Lincoln School Dam would be 2,100 feet long, including the powerhouse and spillway structures, and have a maximum height of 90 feet. Its power facilities would consist of two units at 30,000 kw each and one unit at 10,000 kw, for a total installed capacity of 70,000 kw. This facility would be operated as an intermediate load power plant.

The estimated construction first cost for the project totals $690.3 million based on 1 March 1977 price levels, consisting of $544.0 million for the dams and related features, and $146.3 million for the transmission facilities.

Real Estate Requirements—The total acreage required for the project is approximately 127,000 acres (environmental studies may suggest that additional acreage is needed to mitigate loss of wildlife habitat). Of this total, 106,000 acres is timberland. The acreage required for the Dickey Dam and reservoir is 124,000 acres, including 5,700 acres in Canada, and the requirement for the Lincoln School Dam and reservoir is 3,000 acres. The project would require the relocation of 161 year-round households (116 in Allagash; 45 in St. Francis). Also, 16 commercial properties and 14 miscellaneous properties would be displaced.

B. Operational Characteristics

The project would be operated principally as a peaking power plant. In this role, the project would not be a high energy producing (i.e. kilowatt-hours) facility. A peaking power plant is designed to operate for short periods of time, at high capacity, to meet critical daily peak demands. It has quick starting capability and provides spinning reserve for load protection. Typical peaking plants are hydroelectric projects—both conventional and pumped storage—and gas turbine units. On the other hand, baseload power is provided by large fossil-fueled or nuclear steam plants which operate most economically on a continuous basis and as a result are high energy producing installations. However, these latter plants are not suitable for peaking use and load protection because of economic considerations and operational constraints. The 1970 National Power Survey published by the Federal Power Commission notes that the current trend towards construction of very large fossil-fueled and nuclear steam-electric baseload units has increased the need for plants designed specifically for meeting daily peak demands.

In addition to its reliability, a hydroelectric facility has a lower operating cost than alternative power sources because it does not rely upon costly fuels. Water is a continuous and clean source of power. Beyond the economic aspects, there would also be an annual savings in natural resources. To produce an equivalent amount of electrical energy, annual fuel consumption—dependent upon the type of alternate—would total 2.3 million barrels of oil, 636,000 tons of coal or 16.6 billion cubic feet of gas.

C. Generating Time

The operating time of the project is very flexible and basically would be responsive to system power demands. Under normal operating conditions, the project would generate energy to meet varying demands 12 months per year. The electrical energy producing potential of the project is a function of the river basin hydrologic characteristics such as amount of annual discharge, reservoir storage and hydraulic head available at the dam site. This energy potential can either be realized through small power units operating for long periods of time, i.e. baseload operation, or through large size units for short periods of time, i.e. peak load operation. From the standpoint of economic and operational efficiency, hydroelectric sites have their greatest value as peaking plants, such as Dickey Dam.

The annual capacity factor for Dickey Dam is approximately 15%. In simplistic terms, this means the project is capable of being operated at full capacity for 15% of the time on an annual basis to meet peak power demands. The project would also have "load following" capability on a daily and seasonal basis with potential to operate for longer periods of time at reduced capacity.

The operational time should not be viewed on a uniform daily basis, i.e. three to four hours each and every day. Rather the project would be a very flexible installation capable of generating for varying periods of time dependent upon the demand placed upon the New England system. For example, the spring season is a historical period of minimum power demand, accordingly the project generation would be minimal. Weekends and nights are also times of minimum demand during which the project would usually not generate electricity. On the other hand during periods of maximum power demand; December and January, the project could be operated for long periods extending up to eight to nine hours daily. The quick starting, flexible and reliable nature of a hydroelectric plant are assets to a coordinated power system.

The Lincoln School reregulating dam with an annual capacity factor of approximately 48 percent would normally operate 10 hours per day, 7 days a week. With the Dickey facility operating 7 or more hours per day, the Lincoln School facility would be capable of generating energy 24 hours per day at full capacity.

In addition, the project would benefit the New England system in a reserve capacity. In the event of an electrical blackout emergency, the project is capable of generating electricity for a continuous period of up to 35 days.

D. Construction Period

Construction of the project, including all necessary land acquisition, would require approximately eight years. Initial power-on-line would be scheduled some six years after limitation of construction and incrementally increased until total power-on-line capability would be realized approximately 1¼ years later.

III. Project economics

A. General

The project economics have been computed on the basis of both the 3¼ percent rate authorized for the project and at 6⅜ percent which was the prevailing water resource development rate prescribed by the Water Resources Council for Fiscal Year 1977 (1 Oct. 1976–30 Sept. 1977). An explanation of the history of the authorized 3¼ percent interest rate is presented in Section III C, *Economic Analyses*.

The benefit-to-cost ratio for the initial planned development is 2.1 to 1 at the 3¼ percent interest rate. At the 6⅜ percent rate, the benefit-to-cost ratio is 1.2 to 1.

B. Benefits

The project's average annual benefits (1 March 1977 Price Levels) are summarized on the following page. A description of each benefit follows:

Benefit	Amount	
	3¼ percent	6⅜ percent
Power	$75,410,000	$75,410,000
Flood control	696,000	686,000
Area redevelopment	1,691,000	2,689,000
Recreation	172,000	145,000
Total benefits	77,969,000	78,930,000

1. Power

Power would be the principal benefit realized through implementation of the Dickey-Lincoln School Lakes Project. On-site annual power generation of 1.45 billion kilowatt-hours (kwh) would result from the total initial installed capacity of 830,000 kw (944,000 kw dependable capacity) of which 190,000 kw would be of pumped-storage capability. Additional annual power generation of 350 million kwh would also be gained at downstream Canadian power plants due to seasonally regulated flows from the project.

The power generation at the Dickey facility would be peaking power amounting to 1,182,600,000 kwh annually from a dependable capacity of 874,000 kw. The Lincoln School facility would generate intermediate power amounting to 262,800,000 kwh annually from a dependable capacity of 70,000 kw. The increased generation at downstream

Canadian plants is assumed to be off-peak energy.

The power benefits for Dickey-Lincoln School Lakes are equated to the cost of the most feasible privately-financed equivalent alternative sources of power likely to develop in the absence of the Federal project. The at-market unit power values, furnished by the Federal Power Commission, are based on gas turbines for the portion of project power expected to be marketed for peaking purposes and a combined cycle generation plant as an alternative for that portion to be marketed as intermediate power. The downstream energy is assumed to be off-peak energy and equivalent to fuel saving costs.

2. Flood Control

The Dickey-Lincoln School Lakes Project would substantially reduce flooding along the St. John River between Allagash and Hamlin, Maine. Spring floods caused by snowmelt runoff or snowmelt runoff combined with rainfall currently result in damages to urban structures, crops and erosion of land along the riverbanks. Urban flooding consists of damages to structures, contents, and associated lands due to overland inundation. Crop loss refers to potato crops lost in the field because of sustained flooding. Bank erosion is the loss of land of varied use (idle, forest, urban, crop) as a result of the force of high velocity waterflows.

Three economic damage zones (determined by correlation with hydrological data) were employed for computing benefits, namely I, St. John and St. Francis; II, Frenchville and Fort Kent; and III, Van Buren, Grand Isle, Hamlin and Madawaska. In addition, the Fort Kent flood-prone areas in Zone II above the 100-year level of protection afforded by the local protection project under construction have been treated separately inasmuch as the proposed Dickey-Lincoln School Lakes Project was credited only with those damages prevented acting after the local protection dike.

Flood control benefits would accrue from the prevention of the urban, crop, and bank erosion losses. Flood damage prevention to urban structures with the project applies to the currently unprotected flood-prone area along the St. John River downstream of Allagash and to the Fort Kent protected area for events rarer than the 100-year flood. The dollar value of this urban flood prevention at March 1977 price levels is $495,000. A reduction in crops lost in the field is estimated to be $170,000. Finally, streambank erosion control is estimated to effect a modest reduction of 10% of current annual losses. This latter reduction provides a benefit of $31,000 at the authorized interest rate of 3¼% or $21,000 at the 6⅜% rate. Total tangible flood control benefits amount to $696,000 at 3¼% and $686,000 at 6⅜%.

3. Redevelopment

Redevelopment benefits represent the value of local labor within reasonable commuting distance that would be used in project construction and which, in the absence of the project, would otherwise be unemployed or underemployed, i.e., direct hires and/or transfers.

Aroostook County has had areas of substantial and persistent unemployment since 1966. The five major labor market areas in Aroostook County are presently designated by the Economic Development Administration, Department of Commerce as Title IV Redevelopment Areas under Public Law 89-136.

The current supply of available local workers is insufficient to satisfy total demand over the construction period of the project. However, as much as 90% of the unskilled workers and 24% of the skilled workers required during peak years could be supplied from Aroostook County through direct hire of the unemployed or transfer of those underemployed.

Redevelopment benefits include both initial construction work and future operation and maintenance. The operation and maintenance period has been limited to the initial 20 years for purposes of claiming redevelopment benefits.

4. Recreation

The Dickey-Lincoln School Lakes Project would alter the existing recreation patterns within the project area. At the present time, this area is valued for its semi-wilderness quality with hunting, white-water canoeing, and stream fishing especially valued. The project would reduce these wilderness activities within the project site (canoeing would be eliminated) and substitute, in their place, flat-water recreation and increased day-activity usage.

A comparison of the projected recreational usage of the area without-the-project with the estimate future recreational use with-the-project was used as a basis for developing the recreational benefit. On this basis, at the 3¼% interest rate, the average annual recreation benefit without Dickey-Lincoln School Lakes totals $388,000 as compared to $374,000 with the proposed full development for a net annual loss of $14,000. At the 6⅜% interest rate, the relative values are $307,000 without and $329,000 with the project for a net annual gain of $22,000.

In order to evaluate the economic justification of providing recreational facilities—should the project proceed to construction—the procedures described in the following paragraphs were used to record the benefits that would be realized through site development and to properly reflect the lost opportunity cost due to benefits foregone.

To measure the incremental benefits associated with full development of the project, annual recreational usage and related benefit values were also estimated for a project with minimum required facilities (those basic facilities required for the health and safety of visitors). The pertinent data is summarized as follows:

Annual recreation benefits	3¼ percent	6⅜ percent
Without project	$388,000	$307,000
With minimal facilities	202,000	184,000
With full development	374,000	329,000

The annual recreation benefit for the project is defined as the difference in benefits between full development and the minimal required facilities, i.e. $374,000–$202,000 or $172,000. This value has been used to evaluate the economic justification for the proposed recreational development.

The net loss of recreational opportunity has been reflected as an annual cost. The loss is measured as the difference between without project conditions and with project with minimal facilities, i.e. $388,000–$202,000 or $186,000. In addition, the lost opportunity during construction equating to an average annual value of $7,000 has been included in a total annual cost of $193,000.

The above values are based on the authorized 3¼% interest rate. The corresponding values at the 6⅜% rate are $145,000 for the recreational benefit and an annual cost of $136,000 representing the lost recreational opportunity.

C. Economic Analyses

The justification for authorization of all Corps of Engineers' projects is measured in terms of the benefit-to-cost ratio. The economic analysis used to develop this yardstick for Dickey-Lincoln School Lakes is based on standards prescribed by Senate Document No. 97, 87th Congress, entitled Policies, Standards and Procedures in the Formulation, Evaluation and Review of Plans for Use and Development of Water and Related Land Resources. As previously noted, total project benefits for Dickey-Lincoln School Lakes are comprised of at-market power, total downstream energy, flood control, recreation and area redevelopment type benefits.

The project cost is evaluated on an annual basis reflecting amortization of the investment and annual operation and maintenance expenses over a 100-year project life. The cost has been increased to provide for the has been increased to provide for the transmission of power by adding the total annual cost of a line between the project and the New England Power Pool (NEPOOL) System Transmission Grid. Attached as Table I is a summary of the economic analysis for both interest rates.

The 3¼% interest rate used in the economic analysis has been the subject of considerable discussion. Accordingly, an explanation of the derivation of this rate is appropriate. The interest rate is in accordance with a Water Resources Council (WRC) regulation implemented in December 1968. This regulation revised the method of computing the interest rate as previously outlined in Senate Document 97. The regulation permitted an exception, however, for those projects already authorized such as Dickey-Lincoln School Lakes which was authorized in 1965. The exception noted that if an appropriate non-Federal agency provided—prior to 31 December 1969—satisfactory assurances that requirements of local cooperation associated with the project would be met, then the previous interest rate would be retained. At Dickey-Lincoln School Lakes, local cooperation would be required for the cost-sharing of recreational facilities. Assurances were received from the Governor of Maine by letter, dated 24 February 1969, that the non-Federal requirements would be fulfilled at the appropriate time. As a result, the interest rate was retained at 3¼%.

The WRC subsequently established new principles and standards for water resource planning effective in October 1973. A section of these new standards included the provision for increasing the interest rate to 6⅞%. However, the Water Resources Development Act of 1974, enacted by the Congress on 7 March 1974, included a section which requires that interest rates used for water resource projects be consistent with the implementation of the December 1968 WRC regulation. Accordingly, the 3¼% interest rate remains applicable to Dickey-Lincoln School Lakes.

The Corps of Engineers also uses a procedure referred to as an "Economic Efficiency Test". The objective of an ideal system operation is to meet area power demands at least cost to consumers. Therefore, the least costly addition to a region's capacity could be considered as a yardstick for purposes of making a decision regarding such additions. The "Economic Efficiency Test" provides for such a determination. Bascially, the test provides for a comparison of the costs of providing an equivalent amount of power from the most feasible alternatives, likely to develop in the absence of the Federal project, evaluated on a basis comparable with the determination of the project costs (with respect to interest rate, i.e., 3%¼, taxes and insurance). The Corps' "Economic Efficiency Test" indicates that the annual cost for Dickey-Lincoln School Lakes amounts to $37,696,000 while alternative equivalent costs, with an appropriate adjustment for benefits foregone, amount to $60,333,000. This results in a favorable comparability ratio of 1.6 to 1. At the 6⅜% interest rate, the comparability ratio is 1.02 to 1. The attached Table II illustrates the derivation of the "Economic Efficiency Test" for each interest rate.

D. Repayment Analysis

The above analyses are used to define the economic worth of the project. The financial value of power, however, is determined through the repayment analysis. Marketing of electric power from Federal projects is the basic responsibility of the Secretary of Interior as authorized by Section 5 of the 1944 Flood Control Act. Repayment rates must be sufficient to recover costs of power production and transmission including annual operation and maintenance expenses. The total investment allocated to power must be repaid over a reasonable period of years. As a matter of administration policy, this period has been specified as 50 years. On 29 January 1970, the Secretary of Interior, under his administrative discretion to establish power rates, instituted new criteria for determining interest rates for repayment purposes for projects not yet under construction. The interest rate for Fiscal Year 1977 was 7 percent. This rate has been used for the Dickey-Lincoln School Lakes repayment analysis.

A financial feasibility study has been completed by the Department of Interior. The results indicate that the project's power costs can be recovered through power revenues at rates competitive with existing rates in New England.

The difference between the economic analyses previously described and the repayment analysis warrants further clarification. This has caused a considerable amount of misunderstanding and misinterpretation. The economic analyses—both for the benefit-to-cost ratio determination and the "Economic Efficiency Test" are economic parameters measuring a project's worth. These analyses are not unique to Dickey-Lincoln School Lakes. The benefit-to-cost ratio is employed universally by the Corps in measuring a project's economic justification. The "Economic Efficiency Test" is also universally used by the Corps in conjunction with projects having generation of electric power as a project purpose. The economic analyses utilize 3¼ percent and 6⅜ percent interest rates and 100-year period of evaluation. On the other hand, the repayment analysis—which is computed by the Department of Interior—is a financial measure which determines the appropriate price at which bulk power must be marketed to return the total annual investment allocated to power. For this analysis, an interest rate of 7.0 percent and a 50-year repayment period have been used.

IV. Environmental studies

Detailed data essential to a comprehensive environmental evaluation consistent with the National Environmental Policy Act of 1969 (NEPA) were not developed for Dickey-Lincoln School Lakes during earlier preconstruction planning which was terminated in the fall of 1967, prior to passage of NEPA. With the resumption of activity in 1974, environmental studies and preparation of an Environmental Impact Statement (EIS) received priority attention.

An initial activity in environmental studies was the preparation of a scope-of-work for the EIS, completed in August 1975. This scope-of-work was the plan of action for developing a comprehensive EIS. It identified all significant environmental, social and economic impacts induced by the project and recommended methodology for measuring and evaluating these impacts. Subsequent studies to develop data and analyze the various impacts have been accomplished by private consulting firms, academicians, the Corps of Engineers and other applicable Federal and State agencies. The results of these studies have been presented in the project's draft EIS distributed for public review on September 1, 1977.

Copies of the draft EIS are available by writing to: Division Engineer, U.S. Army Corps of Engineers, New England Division, 424 Trapelo Road, Waltham, Massachusetts 02154.

The draft EIS is supported by a series of 14 detailed documents—10 Appendices and 4 technical Design Memoranda. Copies of the Appendices and Design Memoranda have been distributed to depositories throughout New England for public review. A list of these depositories is included as an attachment to this Fact Sheet.

V. Marketing of power

The Department of Interior would be responsible for marketing the electric power from Dickey-Lincoln School Lakes per authority of Section 5 of the 1944 Flood Control Act. This statute requires that power be sold in such a manner as to encourage the most widespread use thereof at the lowest possible rates consistent with sound business practice. Section 5 further directs that preference in the sale of power and energy is to be given to public and cooperative power interests.

A Financial Feasibility Study for the project power, addressing the marketing aspects, has been prepared by the Department of Interior. The report notes that after considering transmission losses and offsetting load diversities, approximately 900,000 kw of capacity and 1.2 billion kwh of streamflow energy would be available for sale at the customers' premises. The energy value excludes about 290 million kwh from the initial pumped-storage operation which is proposed to be marketed on a split-the-savings arrangement. The present concept envisions marketing of 700,000 kw (667 million kwh) as peaking power to New England outside of Maine and marketing of 200,000 kw in Maine, 50% as intermediate load power (438 million kwh) and 50% as peaking power (95 million kwh). These allocations include the United States portion of additional energy generated at downstream Canadian projects.

Marketing studies currently indicate that the 100,000 kw of peaking power allocated to Maine and 250,000 kw of the peaking power allocated to New England outside of Maine would initially be sold to private utilities. As preference customer loads grow, the sale of this power would be withdrawn from the private utilities and sold to preference customers. The proposed rates, required to repay all project costs allocated to power, were determined to be a $56 per kilowatt capacity charge and a 15 mills per kilowatt-hour energy charge. The Department of Interior noted that these values are competitive with existing rates in New England and would provide substantial savings to some customers today while providing modest savings to others. The Department of Interior concluded that sufficient power revenues could be obtained from the sale of power to repay all costs associated with the production and distribution of project power. The power features would, therefore, be financially feasible.

Historically, the Department of Interior does not proceed with definitive marketing and transmission plans until construction of the project is underway and the power-on-line data is relatively firm. Prior to that time, their studies are of sufficient depth to determine marketability and to evaluate the financial feasibility of the power installation.

The existence of NEPOOL—comprised of the major utilities within New England—provides an effective vehicle through which Dickey-Lincoln School Lakes output could be utilized to the mutual benefit of New England. A report dated 21 November 1974 submitted to the New England Planning Committee of NEPOOL stated that, "the Dickey project capacity would be fully effective capacity to the interconnected New England system if it were dispatched in a peaking assignment during the 1985–1986 power year. The enormous storage reservoir makes it possible to use Dickey with maximum flexibility. It can run at full capacity whenever it is needed and can sustain that power level for the duration of any peak that the system experiences. It makes an ideal source of reserve with quick response, a fact that is most valuable to have as an option open to those responsible for load dispatching."

VI. Current Status

A. General

Preconstruction planning resumed in November 1974, seven years subsequent to earlier post-authorization planning. Primary efforts to date have concentrated on preparation of an EIS, updating of project design to reflect current criteria and updating of the project cost estimate and economic justification. The draft EIS and the revised General Design Memorandum for the dams were partment of Interior which has statutory respectively.

In conjunction with Corps activity, the Department of Interior which has statutory responsibility for transmission and marketing of power from Federal projects, has been conducting studies of these two aspects. The Bonneville Power Administration has been assigned the task to define transmission requirements to tie into the existing NEPOOL grid system and to prepare an EIS for these facilities The Southeastern Power Administration has been charged with the marketing analysis. The report on the transmission system requirements was completed in February 1977 and the Financial Feasibility report, including the preliminary marketing concept, was completed in August 1977. The draft EIS for the transmission facilities is scheduled for release in February 1978.

Subsequent to release and review of the draft EIS for the transmission facilities, a final EIS combining the dams and transmission will be prepared. The scheduled date for filing the combined final E'S with the Council on Environmental Quality is August 1978.

B. Funding Summary

Prior 1966–67	($2,154,000)
Current:	
Fiscal year 1975	949,000
Fiscal year 1976	2,256,000
Transition quarter (July 1, 1976 to Sept. 30, 1976)	435,000
Fiscal year 1977 (Oct. 1, 1976 to Sept. 30, 1977)	2,000,000
Fiscal year 1978 (Oct. 1, 1977 to Sept. 30, 1978)	1,000,000
Total current	(6,640,000)
Total	8,794,000

C. Current Activities

Because of the controversial nature of the project, decisions on its future have awaited completion of environmental studies presented in the draft EIC and updated engineering plans and project economics included in the revised General Design Memorandum.

Pending future decisions, the preconstruction planning activities for this Fiscal Year (Oct. 1977–Sept. 1978) will essentially be limited to completion of added environmental studies resulting from review comments on the draft EIS and completion of specific feature design memoranda. With repsect to the latter, only those memoranda that have input substantially advanced as a result of activities in support of environmental and general design studies will be completed.

Subsequent to public review of the project draft EIS, responses to the comments will be prepared for incorporation in the final EIS.

TABLE I.—DICKEY-LINCOLN SCHOOL LAKES ECONOMIC ANALYSIS

[March 1977 price levels]

	3¼ percent	6⅜ percent
Dams:		
Total investment:		
Construction cost of dams	$544,000,000	$544,000,000
Interest during construction	56,600,000	111,000,000
Present worth of future recreation facilities	236,000	170,000
Total	600,836,000	655,170,000
Capital recovery factor (dams)	0.03388	0.06388
Annual costs:		
Interest amortization	20,356,000	$41,852,000
Operation and maintenance	2,100,000	2,100,000
Pumping power (438,000,000 kWh × $0.010)	4,380,000	4,380,000
Major replacements	315,000	166,000
Loss of land taxes	142,000	142,000
Lost recreational opportunities	193,000	136,000
Subtotal, dams	27,486,000	48,776,000
Transmission lines:		
Total investment:

Operation and maintenance	3,650,000	3,650,000
Reduction—Future wheeling by others; Granite-Essex	—390,000	—450,000
Subtotal, transmission	10,210,000	14,810,000
Total project:		
Total investment:		
Construction	690,300,000	690,300,000
Interest during construction	67,010,000	131,920,000
Present worth—Future recreation	236,000	170,000
Total	757,546,000	822,390,000
Annual costs	37,696,000	63,586,000
Annual benefits:		
Power:		
Peaking power (15.4 percent capacity factor):		
874,000 kWx0.904 x$30	23,703,000	23,703,000
1,182,600,000 kWhx0.914 x $0.034	36,750,000	36,750,000
Intermediate power (42.9 percent capacity factor):		
70,000 kWx0.980x $68.50	4,699,000	4,699,000
262,800,000 kWhx 0.989 x $0.026	6,758,000	6,758,000
Downstream: 350,000,000 kWhx$0.010	3,500,000	3,500,000
Subtotal, power	75,410,000	75,410,000
Recreation	172,000	145,000
Redevelopment	1,691,000	2,689,000
Prevention of flood damages	696,000	686,000
Total annual benefits	77,969,000	78,930,000
Total annual costs	37,696,000	63,586,000
Benefit-cost ratio	2.1 to 1	1.2 to 1

Note: The 0.904, 0.914, etc., factors noted in power benefit analysis reflect estimated reduction in capacity and energy outputs due to transmission line losses.

TABLE II.—DICKEY-LINCOLN SCHOOL LAKES ECONOMIC EFFICIENCY ANALYSIS—COMPARABLY FINANCED—FEDERAL FUNDS

[March 1977 price levels]

	3¼ percent	6⅜ percent
Power alternatives:[1]		
Peaking:		
874,000 kW × 0.904 × $11.50	$9,086,000	
874,000 kW × 0.904 × $15.50		$12,246,000
1,182,600,000 kWh × 0.914 × $0.034	36,750,000	36,750,000
Intermediate:		
70,000 kW × 0.980 × $27	1,852,000	
70,000 kW × 0.980 × $35.50		2,435,000
262,800,000 kWh × 0.989 × $0.026	6,758,000	6,758,000
Downstream: 350,000,000 kWh × $0.010	3,500,000	3,500,000
Subtotal, power	57,946,000	61,689,000
Benefits foregone:		
Redevelopment[2]	1,691,000	2,689,000
Flood control[2]	696,000	686,000
Total, alternative costs	60,333,000	65,064,000
Annual charges—Dickey-Lincoln School	37,696,000	63,586,000
Comparability ratio	1.6 to 1	1.02 to 1

[1] The 0.904, 0.914, etc., factors noted reflect estimated reduction in capacity and energy outputs due to transmission line losses.

[2] Redevelopment and flood control benefits which are provided incidentally to construction of Dickey-Lincoln School would be foregone by the alternative. Therefore, the values of these benefits are added to the alternative in order to obtain a valid comparison. No credit has been included for the recreational benefit as without project benefits approximate the with project benefits.

EASTERN MAINE ELECTRIC CO-OPERATIVE, INC.,
Calais, Maine, September 12, 1977.

Mr. JOHN JOSEPH,
Maine State Planning Office, State House, Augusta, Maine.

DEAR JOHN: In response to your phone call of September 9, 1977, we have put together some calculations that pretty well support our estimates to you regarding the great power cost savings available to Maine consumers when Dickey-Lincoln power becomes available.

First, from 1970 to 1976, the Maine consumer-owned systems we checked increased their purchases from 157,481,000 KWH annually to 231,609,000 KWH annually. This shows as an annual percent increase of 6.64% during this period. In our area, we expect this increase to be sustained indefinitely due greatly to new consumer growth. Also, our usage at our Cooperative has been low due to the general low income of the area we serve. Maine population trends recently released tend to back up the population growth and new construction we have experienced recently. We might also add that rural areas all across the United States are experiencing a population shift back to the rural areas according to releases we have recently had an opportunity to review.

In addition to the historic KWH growth trend of 6.64%, we are including tables showing three other percent growth trends. Our recent growth trends, and National trend estimates showing that electricity will be used to a greater percent in the future, to deliver energy to the consumer, seem to suggest a higher than historic growth rate for future estimates.

[In thousand kilowatt-hours]

	Percent			
Year	6.64	5	7.5	8
1970	157,481			
1976	231,609	231,609	231,609	231,609
1986	440,511	377,266	477,353	500,026
1988	500,953	415,936	551,164	583,231
1990	569,688	458,570	637,491	680,280
2000	1,083,524	746,962	1,313,889	1,468,675

The combined MW loads of these same consumer owned systems is now in the order of 50 MW. By 1986 the MW load will be 95 MW based upon the historical growth rate. By the year 1990 the MW load will have increased to 123 MW. We believe that this trend is moderate and in actuality will be exceeded, but for the purposes to be shown here, it is sufficient.

Based upon the $50.000 capacity charge in 1976 and an energy charge of 15 mills, as designed by the Southeast Power Administration, and on a growth rate of 5 percent per year on the capital cost portion only, we come up with the following cost in 1986. Since the cost of falling water will not change over the years, we have placed all construction cost escalations into the capacity charge. The capacity charge will be

$81.44 plus 15 mills in 1986. At a 50 percent load factor, the cost/KWH would be $.033594/KWH. Our Maine cost for 438 GWH, delivered, would be $14,000,000 per annum. Even if the growth rate goes to 6 percent the cost would be only $15,500,000 with savings only slightly less than calculated with the 5 percent growth rate. The projected power cost for Maine's newest plant in 1986, delivered, will be in the order of 6¢ per KWH. (See enclosure). The cost to our systems' consumers, therefore, would be $26,280,000. Dickey-Lincoln, thus, will save our systems on the order of $12,280,000 each and every year after 1986.

You brought up the subject that we will be utilizing other low cost Maine hydro electric plants and older less costly conventional power plants for our loads in 1986. In our Cooperative's case, very little such power is expected to be used in 1986 as we now buy most of our power outside Maine. Other consumer-owned systems purchase a Maine power mix. Our point is that the low cost power some consumer owned systems, in 1986, may obtain in their mix from other Maine plants will be returned for use by the power plant owner to serve other Maine loads. Reductions in the use of the more costly plants for Maine users can readily be scheduled in advance. Thus, it becomes evident that the entire $12,280,000 saving comes into Maine to help Maine citizens. In addition, the 100 MW of peaking power will benefit Maine citizens as will the emergency value of Dickey, the Lake, water control, jobs, etc. etc.

If you expand the $12.280,000 saving for 100 years, as some did with lumber, the total saving is an astronomical $1.228,000,000. But that's not all. That expands only the 1986 costs. It doesn't take much imagination to realize that conventional energy costs will increase after 1986 but falling water will not because Mother Nature will place the water above the dam each year at no cost. The savings indicated here, therefore, could be only the tip of the iceberg insofar as the total savings that Dickey-Lincoln represents for Maine citizens. Note also that we haven't even considered the 594,000 KW to be used in other New England states nor the emergency value of the project to all systems, in this letter. Nor did we discuss the benefit associated with the 100,000 KW of peaking power asigned to Maine.

We are not very well satisfied with the pricing arrangement designed by the Southeast Power Administration. We have no particular objection to the use of a 50 year amortization period and 7% interest on money in calculating the rate structures for Dickey-Lincoln which are the current figures used by the Southeast Power Administration. We don't object to the postage stamp rate principle. We do believe that the use of a 15 mill charge for the energy portion is unrealistically high for falling water. We also believe that the transmission charges are predominately associated with the capacity component rather than the energy component. Our suggestion is that the energy portion of the rate structure be established at 6 mills, which is certainly sufficient for energy cost produced by falling water (not fossil fuel), and the capacity factor set at $62.00. This new pricing would produce the same overall revenue and would provide a greater fairness in the pricing impact as the peaking power purchasers were getting a far better value than were the Maine purchasers of load factor power. We believe our Governor should insist upon this alternative pricing arrangement, or something close to it, to balance the benefits between the lower quantity of load factor power to be used in Maine and the much larger quantity of power, predominately peaking, to be used in other sections of New England.

With this change in rate structure, Maine's saving would increase to $17,500,000 per year. Again, if we expand this saving 100 years on the initial year's figure only, it results in an astronomical benefit of $1,750,000,000. Let us repeat that this benefit is an expanded 100 year reflection of savings during the first year of the Dickey-Lincoln plant operation and represents only the Maine load factor entitlement. It does not show how benefits increase each year after the first and does not include the benefits derived from peaking power purchases in Maine and New England. We don't necessarily subscribe to 100 year figures like this, but this type of calculation was made and published in headline form, we believe, for adverse Dickey effects on lumber value starting some time after the turn of the century.

We are enclosing a sheet and cover from a Westinghouse Electric Corporation publication indicating power cost projections for 1986. These figures are the same as we have received from other sources. We hope this information helps.

Sincerely yours,

ROBERT V. CLARK,
General Manager.

Mr. MUSKIE. Mr. President, the bill as reported provides $10.1 billion in new budget authority. Outlays associated with the bill total $9.5 billion, including $4.5 billion in outlays from budget authority provided in prior years.

Under section 302(b) of the Budget Act, the Appropriations Committee divides among its subcommittees the total budget authority and outlays allocated to the committee under the first budget resolution. The Appropriations Committee has allocated $10.8 billion in budget authority and $10 billion in outlays to the Energy and Water Development Subcommittee.

The funds provided by H.R. 12928 as reported put the subcommittee $0.7 billion under its 302(b) budget authority allocation and $0.5 billion under its outlay allocation. Possible later requirements known at this time could leave the subcommittee $0.2 billion below its budget authority allocation and $0.2 billion below its outlay allocation.

Mr. President, I ask unanimous consent that a table showing the relationship of this bill and possible later requirements to the subcommittee allocation be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

H.R. 12928, Energy and Water Development appropriation bill: Relationship to subcommittee's section 302(b) allocation

[Dollars in billions]

	Budget authority	Outlays
Subcommittee's section 302(b) allocation	10.8	10.0
H.R. 12928, as reported	10.1	9.5
Amount over (+) or under (−) subcommittee allocation	−0.7	−0.5
Possible later requirements:		
Energy supply	+0.4	+0.2
Water resources	+0.1	+0.1
Possible amount over (+) or under (−) subcommittee allocation	−0.2	−0.2

Mr. MUSKIE. Mr. President, H.R. 12928 as reported is consistent with the functional and aggregate targets in the first budget resolution, and I support it. I commend the distinguished chairman of the Subcommittee on Energy and Water, Senator JOHNSTON, for his dedicated efforts in support of the budget process.

Mr. LEAHY. Mr. President, I concur with the distinguished Senator from Maine that these are not funds for construction, as such, of the Dickey Lincoln project.

As I alluded earlier, I did a nose count of my fellow Senators. I realize that the position maintained by the Senator from Maine would be the prevailing position in a rollcall vote. However, I think the question might be a much closer one if we were discussing appropriations for actual construction.

However, if nothing else, I have learned to count. The distinguished Senator from Maine has been here longer than I and has been counting longer than I, and I suspect that he has reached precisely the same count as I have on this matter.

So, unless the floor leaders or the Senator from Maine request a rollcall vote, I will not request a rollcall vote on this matter.

Mr. MUSKIE. I see no reason to take the time of the Senate. I would be delighted to dispose of it by voice vote.

Mr. HATHAWAY. Mr. President, the debate these past 2 days on the future of the entitlements program has brought out the essence of New England's energy problem—how shall we reduce our region's dependence on imported oil, and how much will it cost New Englanders to do so.

With Dickey Lincoln we have an opportunity to address both prongs of this dilemma—to reduce both our oil dependency and our consumers' energy bills.

What will that reduction be? Dickey-Lincoln hydropower can replace 2.3 million barrels of oil per year, over $30 million at today's prices which will not be exported overseas.

As those who come from the Northwestern States know well, hydropower is inflation-proof, it is embargo proof, and it is nonpolluting as a fuel. There are, of course, undeniable environmental impacts in developing hydropower, as there are with all energy development projects. But I would venture that Dickey-Lincoln may be among the most carefully scrutinized hydropower projects we have considered. The Corps of Engineers spent 3 years developing the draft, multi-volume environmental statement on the dam, as well as the technical design memoranda. Public hearings and workshops were held in New England before and after the release of the draft last September. Extended public comment periods were provided. A separate study was done on the transmission lines alone.

The final EIS on the dams and lines is not yet in. It is due late this summer or early fall. The environmental and social impacts of the project are not being slighted.

Even the now-famous snapdragon—the furbish lousewort—was first threat-

ened by the project but has recently been cited as a fine example of how the Endangered Species Act can serve the interests of both preservation and development.

Dickey-Lincoln is principally a power project. It is economically sound under the corps' analysis and 98 percent of its costs can be repaid to the taxpayers over 50 years. Electrical rates for the project's power would still be at or below current rates. It can save Maine consumers alone an estimated $12 million per year when it's on line. But in addition to providing 25 percent of Maine's peak power needs in the 1980's, 15 percent of all of New England's peak needs, and intermediate power for Maine preference customers, it also provides flood control and jobs for the economically depressed area of northern Maine.

Mr. President, I support Dickey-Lincoln now as I did in 1965 when it was first authorized. It is not a solution for meeting all our region's future energy needs, but it is one step we can take to help bring down our oil imports and our oil bills.

I support energy conservation. I support solar energy, small hydro, wind, tidal and wood development. I agree we need to broaden our energy alternatives through increased emphasis upon our renewable, clean and benign resources. My record speaks to that support, which I intend to continue. Dickey-Lincoln is among those renewable resources, and that is nearly at hand if the commitment one that is nearly at hand if the commitment is made to proceed. It is a real alternative whose contribution we can be sure of in the 1980's.

The final commitment to construction of Dickey-Lincoln is not being made today in this appropriations bill. The final EIS is yet to come and will be duly considered. These funds, however, will be immediately available if a decision to construct is made, so long as they are included in this fiscal year 1979 bill. Otherwise we will lose time and we will lose money without these funds.

Mr. President, at this time I submit for the RECORD a recent letter to the editor which addresses many of the issues raised about Dickey-Lincoln, as well as a letter from Senator MUSKIE and myself addressing this fiscal year 1979 appropriation.

The letters follow:

U.S. SENATE,
Washington, D.C., May 19, 1978.

EDITOR,
Bangor Daily News

DEAR SIR: Your Guest Column of May 9, "Dickey Limitations," contains several inaccuracies or misconceptions which I would like to correct.

First, the article contains a fundamental misunderstanding of the design of Dickey-Lincoln. It is not a "run of the river" hydropower facility, dependent upon the continuous flow of the St. John River. Rather, the purpose of the Dickey dam is to capture the high spring runoff—and "store" that water—to be released through the year at peak demand times. The smaller Lincoln School dam smooths out the water's flow, producing intermediate power and increasing the output of Canadian hydro facilities downstream, which would share that increase with the U.S.

Dickey-Lincoln is not a pumped storage project. A pure pumped storage project, such as that proposed at Wyman Dam, is a net energy loser, consuming 3 units of energy for every 2 units it can produce. It is doubtful that there would be sufficient surplus capacity in New England available to fuel a pumped storage project equivalent in power output to Dickey-Lincoln.

While Dickey-Lincoln is not dependent upon having any pumped storage capability, one of the four 190 MW turbines has been designed to be reversible so that any surplus power which is available during off-peak periods could be used. The Corps estimates that use of this feature would increase the output from Dickey-Lincoln from 1.2 billion kilowatt hours annually, to 1.45 billion kilowatt hours, a small factor in Dickey's overall power supply. There should be sufficient surplus energy available in New England in the late 1980's to take advantage of this pumped storage feature of the project.

As to the economic impact of the project on Aroostook County, it is true that there will be up to 1900 jobs available during the 7–8 year construction period. Up to 75% of the workers are expected to be from Maine, with ½ of them from Aroostook. It is difficult to understand how the availability of good jobs at good pay would be a negative impact on Maine. Projects of comparable size have been built in the State without adverse local impacts.

In addition, historically, long-term economic development has followed from hydro projects located in relatively undeveloped areas. The projects themselves may become the center of a local tourist economy. High energy-intensive businesses are attracted by the reliable and low-cost energy, a factor increasingly important in siting decisions. These developments can bring long-term economic benefits after construction is completed.

The final point of the article is the distribution of Dickey-Lincoln's power. First, the preliminary marketing analysis for Dickey establishes Maine as a "special marketing area" within New England. 44 percent of the energy from the project will be marketed in Maine, even if it cannot all be absorbed immediately by preference customers (i.e. municipalities and cooperatives).

However, at growth rates comparable to those of the past 8 years, preference customers will be able to use all of the 438 million KWH of intermediate load power. The additional 95 million KWH in peaking power would be sold to private utilities in Maine until the preference customers could use it.

While the northern and eastern areas of the State will be the most direct beneficiaries of this power, all Maine people will benefit from Dickey. The mix of power now sold to the preference customers will be freed up for sale elsewhere in the State. The flood control, economic development and jobs from Dickey will benefit all Maine people, as will the decrease in dependency upon foreign oil.

Dicky-Lincoln alone is not going to solve Maine or New England's energy problems. Those supporting the project do not make that claim. However, hydroelectric power is a known, developed and available technology. Dickey-Lincoln's flexibility will permit it to be easily integrated into a future mix of energy use, including conservation, small hydropower, solar, wood, wind and perhaps even tidal power.

Dickey-Lincoln is not a panacea for the reality of our foreign energy vulnerability. It is instead a major investment in Maine which can quicken our region's path to expanded economic opportunities and a stable and reliable energy future.

With best wishes.

Sincerely,

WILLIAM D. HATHAWAY,
U.S. Senator.

U.S. SENATE,
Washington, D.C.

DEAR COLLEAGUE: We are writing to request your support for the President's FY 1979 budget request of $1,756,000 for the Dickey-Lincoln Hydroelectric Project in northern Maine. These funds are included in H.R. 12928, and the Senate Appropriations Committee overwhelmingly rejected an attempt to delete these funds.

We believe the funds should be included for these reasons:

1. We support the project as a sound alternative energy resource for New England, lessening our dependence upon oil imports by 2.3 million barrels per year;

2. In addition, the project can provide both flood control and economic development for Maine;

3. Appropriating the funds will permit continuity in engineering and planning work and avoid additional costly delays on this project which has been authorized since 1965;

4. Expenditure of these funds would await an affirmative decision to proceed following completion of the Environmental Impact Statement.

New England needs Dickey-Lincoln. It can provide over 15% of the region's peaking power needs, and provide intermediate and peak power to Maine. Along with development of many other alternative resources, it can lessen our dependency upon oil imports. The fuel is inflation-proof, embargo-proof, and non-polluting. While there are environmental impacts involved, as there are with every energy producing facility, we do feel that they are offset by the power production, and by the fact that the nearby Allagash River in Maine has been preserved in perpetuity as a wilderness river.

Failure to provide funds in this fiscal year budget could result in a waste of resources should a decision be made to go ahead with construction. Funding for the advanced engineering and design would then have to await action on a FY 79 supplemental or until the FY 1980 budget, resulting in delay and cost increases.

We are awaiting completion of the final EIS on the dams and transmission lines expected in late summer or early fall of this year. Extensive comments have been made on the draft statements, and the Corps is doing further work and revision for that final statement. After the final EIS is completed, a decision can be made on construction.

The Administration and the U.S. Army Corps of Engineers have made it clear that no further engineering work would be done on Dickey-Lincoln until that final decision is made. In a February statement, the Corps said:

"It is important to note at the outset that . . . no further engineering work, as outlined below, would be resumed until decisions have been made on the project. . . . The availability of funds in the upcoming fiscal year preserves the option of maintaining work continuity on an orderly and efficient basis. Should decisions not favor continued work, appropriate provisions would be taken to revoke the funds or reallocate to other projects."

In light of this, we hope that you will oppose any attempt to delete funding for the Dickey-Lincoln project from the FY 79 Public Works Appropriation bill.

Best wishes.

Sincerely,

WILLIAM D. HATHAWAY,
U.S. Senator.
EDMUND S. MUSKIE,
U.S. Senator.

Mr. LEAHY. Mr. President, I yield back the remainder of my time, and I am perfectly willing to go forward on a voice vote.

Mr. JOHNSTON. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment was rejected.

Mr. MUSKIE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who yields time?

Mr. JOHNSTON. Mr. President, I ask unanimous consent that Tom Dougherty, of Senator GLENN's staff, have the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1643

(Purpose: Adding funds to Project 79-6, General Plant Projects (+$3.2 million) and Project 79-8, Plant Engineering and Design (+$1 million))

Mr. DOMENICI. Mr. President, I send to the desk an unprinted amendment on behalf of Senator JACKSON, Senator THURMOND, and myself.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI) proposes an unprinted amendment numbered 1643.

Mr. DOMENICI. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On line 12, page 3 strike "1,010,771,000" and insert in lieu thereof "1,014,971,000"

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HART). Without objection, it is so ordered.

UP AMENDMENT NO. 1643 (MODIFIED)

(Purpose: Adding funds to Project 79-6, General Plant Project (+$4.2 million) and Project 79-8, Plant Engineering and Design (+$1 million))

Mr. DOMENICI. Mr. President, I send to the desk a modified amendment.

The PRESIDING OFFICER. The modified amendment will be stated.

The legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI) proposes a modification to amendment No. 1643.

Mr. DOMENICI. Mr. President, I ask unanimous consent that reading of the modified amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The modified amendment is as follows:

On line 12, page 3 strike "1,010,771,000" and insert in lieu thereof "1,015,971,000".

Mr. DOMENICI. Mr. President, this is a very simple amendment, and I will be very brief.

Basically, the amendment adds the total of $4.2 million, $1 million of which is for project 79-8, the plant engineering and design requirements for the electron beam fusion facility which may be constructed at Sandia Laboratories, in Albuquerque, N. Mex. This does not begin construction, but, rather, will provide for the engineering and design of that facility, which is much needed. If we do not put this million dollars in this year, it will delay the entire ultimate availability of that labor by a full year.

The remainder of the amendment is made in behalf of Senator JACKSON and Senator THURMOND, and I yield to Senator THURMOND, if he cares to explain the $4.2 million that is included in the amendment for general plants projects 79-6, as reported in the appropriate budget bill.

Mr. THURMOND. Mr. President, we have already discussed this matter, and I think it is clear that the Senate Armed Services Committee authorized $21.2 million for this purpose and the House committee authorized a similar amount, but the Senate has appropriated only $12 million. The difference really would be $9.2 million, but in an effort to try to keep the spending down as much as possible we have agreed to an addition of $4.2 million.

We think full funding of the budget request is extremely important. Obsolescence is taking place in these nuclear weapons production plants. There is inefficiency where facilities are not properly maintained. It is absolutely essential that these funds be provided if we are going to keep the equipment in anything like the shape it should be.

Mr. President, this is a small increase I am recommending but a highly important one.

The majority of the equipment and facilities at our special nuclear materials production facilities is 20 to 30 years old. A recent investigation by the Armed Services Committee of the House found that this situation needed immediate attention.

This project Number 79-6, under the title General Plant projects, which is addressed by this amendment, received special attention in both the House and Senate authorization bills. For the benefit of the Senate I would like to read from the House Report:

General plant projects
(special materials production)

	millions
Requested fiscal year 1979 for waste management	$5.950
Requested fiscal year 1979 for materials production	10.250
Requested fiscal year 1979 for general plant projects	16.200
Committee recommendation, fiscal year 1979	21.200
Increase	5.000

Included within Project No. 79-6, General Plant Projects, is an authorization request for $16.2 million for various items of new construction, additions, alterations, and retirements to the facilities used for the special materials production waste management program. Of the $16.2 million requested, $5.95 million is for the defense waste management program. The committee notes that $14.2 million of the total request will be used in two locations—the Savannah River and Richland facilities—while the remaining $2 million will be divided among five other facilities.

Based upon visits to the facilities involved, the committee believes that this item is underfinanced. Most of the facilities used for special materials production have been in continuous operation from 25 to 35 years. Heating, ventilation, electrical, and steam systems in particular are in need of replacement and modernization. Improvements mandated by occupational health and safety laws and regulations, by environmental regulations, and by safeguard and security concerns, have been given priority, while repairs and improvements in production facilities have been deferred year after year. This is an area where a small additional expenditure can result in improved operating efficiency.

Committee action.—The committee recommends an authorization of $21.2 million—an increase of $5 million, to be applied to special materials production activities.

These words in the House Report adequately explain the situation. These funds are not for a certain plant in one State, but for several plants at which these general plant project repairs and improvements have been deferred or reduced year after year.

The Senate Appropriations Committee has reduced the administration request even below the funding level which the authorization committees have found to be inadequate.

House Committee Chairman MELVIN PRICE wrote Dr. James Schlesinger about this problem and stated "the subcommittee found that increasing percentages of machinery and facilities are becoming obsolete, unrepairable or useless for performing the work assigned."

Dr. Dale Myers, the Under Secretary, replied on February 1 and acknowledged this general problem stating that current estimates indicated it would take $260 million to meet these requirements which he termed serious.

Mr. President, I have taken this matter up with Dr. Duane Sewell, recently appointed Assistant Secretary for Defense Energy programs. He also recognizes the problem and has promised to make a proposal to address it in the fiscal year 1980 budget.

In conclusion, Mr. President, I would ask the distinguished manager of the bill, Mr. JOHNSTON, to accept this amendment. I know he nor his committee has any desire to add to the backlog already prevalent in our defense plants. I am sure there is no intention to see our facilities deteriorate further.

We need a long range, aggressive program to meet these problems. The modest increase of $4.2 million will be merely a push to get DOE moving. It would be a mistake to step backward at this time. I am confident this entire issue will be addressed in a line item next year, but we cannot afford to lose even 1 year by going below the budget request in fiscal year 1979.

Mr. DOMENICI. Mr. President, I have discussed this item with the managers, and I believe the amendment is acceptable. If that is the case, I need no further time.

The PRESIDING OFFICER. Who yields time?

Mr. JOHNSTON. Mr. President, the ranking minority member, Senator MARK O. HATFIELD, and I have discussed these two projects at length with the distinguished Senator from South Carolina (Mr. THURMOND) and the distinguished Senator from New Mexico (Mr. DOMENICI).

These projects, of course, have merit. In the case of Senator THURMOND it constitutes overdue maintenance and the figure of $1 million at Sandia is a worthy one. We point out, of course, that the House of Representatives had no money on Sandia and had lower levels for the general plant projects at South Carolina and other places.

However, we will do our dead level best in conference and recognize the merit of these two matters. We will be glad to take it to conference for a fight.

I will, therefore, accept the amendment on behalf of the committee and yield back the remainder of my time.

Mr. THURMOND. Mr. President, I thank the distinguished Senator from Louisiana for doing this and I assure him that these amounts are sound, that they are badly needed, and we deeply appreciate his accepting this and taking it to conference, and I am sure he will fight to hold it there.

I also thank the able distinguished Senator from Oregon, Senator MARK O. HATFIELD, for going along with this because we know it is extremely important, and we wish to express our appreciation to him.

Mr. DOMENICI. I, too, Mr. President, thank the Senator from Louisiana and the Senator from Oregon. I am most appreciative.

I do believe that this project is badly needed.

I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified by the Senator from New Mexico.

The amendment, as modified, was agreed to.

Mr. DOMENICI. I move to reconsider the vote by which the amendment was agreed to.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. Mr. President, I rise at this point to thank the Appropriations Committee and in particular the distinguished Senator from Louisiana, Senator Johnston, and the distinguished Senator from Oregon, Senator MARK O. HATFIELD.

I wish to just discuss with them for a moment the $10 million which is found in this bill for the Waste Isolation Pilot Plant at Carlsbad, N. Mex., and indicate that I am most appreciative of their consideration not only of this Senator but of the people of the State of New Mexico.

I believe what they did for us, for the people of our State at my request is eminently fair. In fact, I think it is the only thing that a fair Congress could do.

Basically, $40 million was requested for this project, $30 million of which would have gone for land and lease acquisition for land surrounding a project that has not yet been determined or defined, and it seemed to the people of our State and this Senator who represents them that there were many things that had to be cleared up before we went ahead with this project, not the least of which is what will the ultimate scope of this project be, will it be licensed by the Nuclear Regulatory Commission or not, should it be expanded from a military facility to a military and civilian facility?

And I am most grateful that this committee on page 44 captured the essence of what I will do in the authorizing bill by way of amendment. I will offer an amendment to the authorizing bill which will basically say that the Department of Energy, the Nuclear Regulatory Commission, in cooperation with the State of New Mexico and the Department of Defense will study and report with next year's budget. That study will include the feasibility, cost and benefits of licensing, whether or not its scope should be expanded, does the military security in some way involve itself negatively or positively in terms of licensing, and all of those aspects that have not yet been studied for Congress.

They have captured the spirit of that amendment which will be offered on that authorization bill, I believe, with full support of Senator JACKSON, and others, and I thank the committee for so adequately describing why they have only put $10 million in for this project, clearly indicating that any other moneys are to be deferred until this study which I have just briefly described and which I will offer to the Senate when the appropriate authorizing bill comes to the floor.

I cannot tell both Senators, the Louisiana Senator and the Oregon Senator, not only how grateful I am but how grateful the people of the State of New Mexico are to them. They have been told that this project should be licensed by the administration. They have been told that its scope might be increased. But none of these items have been passed upon by Congress. Yet they would have come before us asking for a full $40 million for next year.

This will mean the research can proceed but the study should be available to my people in New Mexico, to the representatives of all of Americans here in the Senate so that they can pass judgment on what ultimately should transpire there in Lea County, N. Mex.

Mr. President, I yield the floor.

Mr. JOHNSTON. Mr. President, we are very cognizant of the problems of the Senator from New Mexico and indeed we put that language in the report. First of all, we reduced the appropriation down to the $10 million level deferring land acquisition as requested by the Senator from New Mexico, and this amendment adds——

Mr. DOMENICI. I am not offering an amendment. I was just thanking the Senator and reflecting on how I perceived that it arrived here. I did indicate that I would not accept the time limit on this bill because of this provision and if the Senator intends to finish the bill tonight I will have no amendments to this section. If he does not I might amend it so it will not be further amendable.

Mr. JOHNSTON. We do indeed intend to finish the bill tonight and I even hope this afternoon, and we will protect the Senator on his amendment. We recognize its importance and will protect him on the floor and do our best with a capital B in conference.

Mr. DOMENICI. I thank the Senator very much.

The PRESIDING OFFICER. Who yields time?

Mr. MARK O. HATFIELD. Mr. President, I suggest the absence of a quorum and ask unanimous consent that it be equally charged.

The PRESIDING OFFICER. Without objection, it is ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON. Mr. President, I yield to the distinguished Senator from Hawaii (Mr. MATSUNAGA) such time as he may require.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. MATSUNAGA. I thank the Senator from Louisiana for yielding.

I note that the committee has agreed to an appropriation of $20 million for ocean thermal energy conversion projects. The Energy Committee, as the Senator from Louisiana well knows since he is a member of that committee, authorized specifically the appropriation of $2 million in matching grants for establishment of ocean thermal energy conversion shoreside facilities.

My question to the Senator from Louisiana is, Is it the intent of the committee to appropriate $2 million for this specific project out of the $20 million designated for OTEC?

Mr. JOHNSTON. The Senator is correct. We actually earmark in the report on page 24 $1 million for evaluation of the tropic grazing pilot plant concept. But it is also our intention that $2 million be allocated to the OTEC offshore concept.

Mr. MATSUNAGA. That is not what I am referring to. I am speaking of the OTEC shoreside facilities, matching funds for the establishment of which were specifically authorized by the Energy and National Resources Committee. It would fall, as I understand it, within that total figure of $4,839,850,000, on page 2, line 13 of the bill which the committee has reported.

Mr. JOHNSTON. The Senator is correct, and I misspoke myself a moment ago.

In addition to the $1 million for the tropic grazing pilot plant concept mentioned in the report we intend for $2 million to be spent on the OTEC shoreside facility as described in the authorization committee's action. The Senator is correct.

Mr. MATSUNAGA. I thank the Senator from Louisiana. I had intended to

offer an amendment, but with his assurance that the shoreside OTEC facilities will be provided for in matching funds of at least $2 million, I will not offer my amendment. I thank the Senator from Louisiana.

Mr. President, I know my colleagues will agree with me that recent developments in the research of ocean thermal energy (OTEC) technology give promise that OTEC can provide the Nation a new and renewable source of energy with almost unlimited possibilities. I am excited over the potential of the ocean in providing vast amounts of power which would be environmentally clean and pollution free. Furthermore, the fuel supply is virtually inflation free! Ocean energy could be of major importance, especially on a local or regional scale in areas where the resource potential is substantial.

OTEC is now a technology in which no scientific breakthroughs are needed to build an operating plant, but the technology for several major components must be further tested ashore and at sea in order to remove remaining uncertainties which might inhibit its commercialization.

The need for a shore-based test facility which is provided with both warm and cold water deep ocean pipes has been recognized by the Department of Energy, which recently issued a request for proposals for the establishment of such a site.

Hawaii, of course, is one of the leading candidates for the shore-based test facility, and has responded to the RFP. Of particular interest is the fact that the State of Hawaii recently appropriated $10.2 million for alternate energy research, of which $3.75 million was earmarked for the construction of an onshore OTEC research and testing facility. The funds appropriated were made with the anticipation that the Federal Government would be willing to share in the construction of this facility. As stated earlier the Senate Energy and Natural Resources Committee, of which I am a member, recently included in its authorization bill, a provision for matching grants up to $2 million for this purpose.

Mr. President, this amendment is not intended specifically for Hawaii, although Hawaii would be one of several leading candidates. The objective of my amendment, whose amount is relatively modest, would be to encourage the establishment or improvement of a needed facility through joint funding between the Federal Government and a non-Federal entity. Any grants, of course, would be expected to be made on a competitive basis considering the merits of each case.

Once again I thank the Senator from Louisiana, chairman of the subcommittee, for clarifying the intent of the Committee on Appropriations to fully fund the authorized OTEC shoreside facilities project.

Mr. JOHNSTON. I thank the distinguished Senator from Hawaii.

Mr. DURKIN. Mr. President, I do not have an amendment.

Mr. JOHNSTON. I yield to the distinguished Senator from New Hampshire such time as he requires.

Mr. DURKIN. I thank the Senator from Louisiana.

In the authorization legislation, H.R. 8309, we specifically authorized the Army Corps of Engineers to study two existing dam sites in the city of Nashua, N.H., and the authorization passed the Senate, but it has not been finally resolved.

I understand the floor managers' position is that they do not want to get into projects that have not been authorized. But while this is an important sum to the people of Nashua, N.H., it is only $135,000. I was wondering if the distinguished floor manager would be able to assure me that in conference some language could be worked out so that the Army Corps of Engineers could use otherwise appropriated funds, because by that time the authorization process will have been completed, and it will not be violating the rules set down for this very bill.

Mr. JOHNSTON. Mr. President, I think the Senator's request is appropriate. I think there is merit in this study as described to me. Between now and the time we get to conference we will look into the matter and see if it is possible to accomplish it and that upon authorization, and from within available funds, the study may proceed. This of course would have to be within the confines of the conference language by both Houses.

Mr. DURKIN. I thank the Senator.

Mr. JOHNSTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON. Mr. President, I ask for the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. JOHNSTON. Mr. President, I suggest the absence of a quorum.

Mr. HASKELL. Mr. President——

The PRESIDING OFFICER. Does the Senator withhold his request for a quorum call?

Mr. JOHNSTON. I withdraw that, Mr. President.

UP AMENDMENT NO. 1644

(Purpose: To fund final design and initial construction of the Solar Energy Research Institute)

Mr. HASKELL. Mr. President, I send an amendment to the desk on behalf of myself and my distinguished colleague (Mr. HART), the present occupant of the chair, and ask for its immediate consideration

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Colorado (Mr. HASKELL), for himself and Mr. HART, proposes an unprinted amendment—

Mr. HASKELL. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, lines 12 and 13, strike out "$1,015,971,000" and insert in lieu thereof: "$1,020,971,000".

The PRESIDING OFFICER. The Chair wishes to inform the Senator from Colorado that the amendment amends a figure which has already been amended, and therefore it would require unanimous consent for the amendment to be in order.

Mr. HASKELL. I ask unanimous consent that the amendment be considered in order.

The PRESIDING OFFICER (Mr. DURKIN). Is there objection? Without objection, it is so ordered.

Mr. HASKELL. Mr. President, the amendment I am proposing will make $5 million available for the final design and initial construction of the facility to house the Solar Energy Research Institute, or SERI, in Golden, Colo. This facility will incorporate the latest advances in solar technology with 90 percent of its energy needs supplied by the Sun. It is projected that the total cost for the structure will be in the neighborhood of $30 million.

In 1974, Congress passed the Solar Energy Research Development and Demonstration Act, Public Law 93–473, which established SERI. As indicated in the law, the Solar Energy Research Institute is to be the central focus of the Nation's solar research, development, and demonstration effort. As a result of a national competition, SERI was designated in March 1977 to be located in Golden, Colo. At present SERI is housed in interim administrative and laboratory facilities in Golden. The SERI staff currently numbers around 200 and will grow to well over 500 in 1980.

The Department of Energy currently holds an option on 560 contiguous acres in Golden on South Table Mountain adjacent to the SERI interim facilities for use for construction of the permanent facilities. This site was donated to the Federal Government by the State of Colorado specifically for SERI's construction.

On several occasions the Department of Energy has indicated its desire to expedite the site evaluation process and commence construction as soon as possible. On Sun Day, May 3, 1978, President Carter, speaking at ceremonies to dedicate the Solar Energy Research Institute site stated:

Here on South Table Mountain, if all goes according to plan, ground will be broken in the fall of 1979 for the Institute's permanent home.

In order to begin construction in the fall of 1979 funds will have to be appropriated well in advance of ground breaking in order to perform final design, engineering and site preparation as well as for negotiating and entering into construction contracts.

Pursuant to these initiatives the Department of Energy's solar division made an internal request for $5 million to the Secretary and OMB for final design and initial construction. The Senate Committee on Energy and Natural Resources

has recommended in its report on S. 2692, the DOE authorization bill, that $5 million be available for these purposes. Despite the pronouncements of the President and the initiatives already undertaken, the DOE last week said that for budgetary reasons it could not support the $5 million figure, although they were not against it. For those of us who have fought to retain the central role and survival of SERI as well as an adequate level of funding for other solar programs the vacillations on the part of the administration are nothing new. I believe it is too important to get the SERI facility off the ground as a visible symbol of the Nation's commitment to the future of solar energy for it to be potentially jeopardized by indecisive and contradictory actions.

SERI recently selected from a large number of firms eight architect-engineer firms who will perform preliminary design work. By December 1978 this number will be competively narrowed to a single contractor. If all goes according to schedule this phase I design work will be completed next June or July. Funds for this first phase come from a variety of accounts, but no specific appropriation. All work after phase I, including final design, site preparation, and construction requires congressional appropriation. This amendment for $5 million is designed to address this final design and initial construction period since no funds have been appropriated for this purpose.

Mr. President, unless these moneys are available there is no guarantee that the final design work and initial construction can proceed smoothly and according to schedule. If we are to meet the President's own desire for beginning construction by late 1979, it is essential that this modest amount of money be available for these purposes in fiscal year 1979.

In conclusion, Mr. President, I repeat that the President of the United States, upon his visit to Colorado, stated that groundbreaking would take place in the fall of 1979, and these funds are necessary to do the design work prior to the groundbreaking, as well as to actual construction.

I understand that the distinguished manager of the bill and the distinguished minority manager handling the bill find this amendment in order.

Mr. HART. Mr. President, will the Senator yield to me?

Mr. HASKELL. I am pleased to yield to my distinguished colleague (Mr. HART).

Mr. HART. Mr. President, as a cosponsor of this amendment, I would like to commend my distinguished friend and colleague from Colorado (Mr. HASKELL) for his efforts to insure that work proceeds expeditiously on the permanent facility for the Solar Energy Research Institute (SERI).

On May 3 of this year, President Carter visited Colorado to celebrate "Sun Day." In his address to an audience assembled on South Table Mountain near Golden, Colo.—the eventual site of the SERI facility—the President stated:

> If all goes according to plan, ground will be broken in the fall of 1979 for the Institute's permanent home.

Similarly, during his confirmation hearings for the position of Assistant Secretary of Energy for Energy Technologies in March, Mr. Robert Thorne stated:

> What I would like to see . . . is a facility that is a showcase of solar technologies. I intend to meet with the SERI people shortly to discuss the possibility of holding some kind of national contest to see if we can incorporate creative, innovative solar technologies into the building itself.
>
> A contest of this nature would, I assume, take 3–4 months. I would expect that, by summer, ground could be broken, provided that Congress authorizes funds for construction.

The Department of Energy authorization bill for fiscal year 1979, which is pending on the Senate Calendar, provides just such an authorization. It was introduced as an amendment in committee by Senator HASKELL. A similar amendment was included in the House-passed version of the DOE authorization.

In light of the commitment of the President and Department of Energy officials to early construction of SERI's permanent facility, it is somewhat surprising that the administration made no request for appropriations for this purpose during fiscal 1979.

Mr. President, the fact of the matter is that the preliminary work for construction of SERI's permanent facility is already well under way. Some 80 firms have already responded to a request for competitive concepts and designs. If it is determined that a comprehensive environmental impact statement will not be required before proceeding with construction, a contract for design of the facility could be let as early as next summer.

But therein lies the catch. Lacking an appropriation, design work for SERI's permanent facility could not begin until fiscal 1980.

Mr. President, SERI was created by Congress to serve as a focal point for Federal efforts to accelerate the various solar technologies. The bill which is before us significantly upgrades the Federal solar program from the level originally proposed by the administration. It is a strong statement of the Senate's commitment to the early realization of this energy alternative.

Senator HASKELL's amendment is consistent with this commitment.

So, Mr. President, I commend my senior colleague for his efforts in this regard, not only for the State of Colorado but for the entire country. I think, as the years evolve in the near term, the work being done at the National Solar Energy Research Institute can well be among the most important research efforts in this country.

In order to get the research underway, as the Senator has indicated, it is extremely important to have that facility under construction as quickly as possible, so that the Institute will have a permanent home and can carry out its work. That work, I think, not only will advance solar research, but will help foster a solar industry in this country, and thus help solve one of the major problems the country and the world face.

So I am pleased to join my colleague in urging the adoption of the amendment.

Mr. JOHNSTON. Mr. President, the two Senators from Colorado have been two of the leading forces for the development of solar energy in the U.S. Senate. As a member of the Committee on Energy and Natural Resources, particularly Senator HASKELL has led the fight for solar energy in the areas of solar heating, the development of photovoltaic cells, and many other applications of solar energy. I know that the Senators from Colorado were in large measure responsible for securing the enthusiastic support of the President for this Solar Energy Institute in Colorado, which I believe he announced on Sun Day.

If we are going to develop alternative forms of energy, we must pursue things like solar energy with real vigor, and this institute will help in developing a form of energy which is renewable and clean and in no way pollutes the atmosphere.

So I congratulate the two Senators from Colorado. We are pleased to accept the amendment. I yield back the remainder of my time.

Mr. HASKELL. I thank the distinguished floor manager of the bill for his gracious remarks. I yield back the remainder of my time and move the adoption of the amendment.

The PRESIDING OFFICER (Mr. HODGES). The question is on agreeing to the amendment of the Senator from Colorado.

The amendment was agreed to.

Mr. HASKELL. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HART. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I have a letter addressed to me by James T. McIntyre, Jr., the Director of the Office of Management and Budget. I ask unanimous consent that the letter be printed in the RECORD following the disposition of the amendment by Mr. HASKELL.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

> EXECUTIVE OFFICE OF THE PRESIDENT, OFFICE OF MANAGEMENT AND BUDGET,
> *Washington, D.C., August 10, 1978.*
>
> Hon. ROBERT BYRD,
> *Majority Leader, U.S. Senate,*
> *Washington, D.C.*
>
> DEAR SENATOR BYRD: The Energy and Water Development Appropriations Bill, under consideration by the Senate today, contains excessive funding increases for discretionary programs above the President's budget. When placed on a comparable basis with his budget, which incorporated the full cost of completing proposed new starts, including inflation during construction, the bill reported to the Senate exceeds the budgeted total Federal commitments by over $1.4 billion.
>
> In addition, the bill contains the following major objectionable provisions:
>
> Mandates by law the hiring of 2,300 more Federal employees than we believe necessary to carry out the program;
>
> Funds construction of four of the projects terminated last year for economic, environmental, or safety reasons and funds planning of three more of these projects;
>
> Doubles the number of new starts and

triples the budgeted long-term funding commitment required to complete new projects; and

Provides excessive funding for breeder reactors.

In my judgment, the bill in its current form is not in accord with the program of the President, and I would find it difficult to recommend approval of the bill.

Sincerely,

JAMES T. McINTYRE, JR.,
Director.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. JOHNSTON. Mr. President, I would announce at this point that I know of only two small amendments remaining, and accordingly I would announce to the Senate that we are very close to calling for third reading. If any Senator has an amendment, let him soon present it or forever hold his peace.

Is the distinguished Senator from Michigan ready with his amendment?

Mr. GRIFFIN. Could we perhaps have a quorum call?

Mr. JOHNSTON. Yes. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON. I yield the distinguished Senator from Colorado (Mr. HASKELL) such time as he may require.

Mr. HASKELL. I thank the Senator.

Mr. President, I wish at this time to offer my observations about the bill now before the Senate.

I do not need to remind my colleagues of how important water and water policy are to the Western United States.

The projects included in this bill are not only vital to our continued production of food and to other sectors of our economy, but this bill also includes projects to provide water for homes, schools, and businesses—in some places for the first time.

Last year, over the objections of westerners such as myself, we gave the administration the benefit of the doubt about funding water projects. Since last year, however, it has become increasingly clear that Congress must assume more authority over water resources development that previously we had delegated to the executive branch.

In the past year we have witnessed a multiplicity of water policy options presented by the administration. Many of these when considered as a package were contradictory. At the very least they were confusing.

The Senate expressed its concern about water policy last year, adopting a resolution requesting a 6-month moratorium on implementation of the water policy to allow States, regional basins and Congress to consider the effect and the wisdom of the prospective policy.

The budget we have before us today must be considered in light of this background.

The President has chosen to disregard the wishes of the Senate and has begun unilaterally to implement his water policy as he announced on June 6.

The methods and principles used to arrive at a negative decision on the Narrows Dam project in Colorado, announced by Secretary Andrus July 20, establish a precedent that endangers every future water project in the Eastern as well as the Western United States, no matter how well-designed or vital it may be.

In my view, public review of these policies is crucial. Not only are the projects themselves vital, but the process now is being called into question.

The Committee on Appropriations has had a difficult task to perform. It has had to evaluate the items in this bill in light of the administration's criticism of many of these projects. The shifting administration policy has only added to their difficulty. The committee has done a remarkable job, and I commend it for the results of its deliberations.

I would like to take a few moments to discuss the specific budget items within my State.

The Narrows project in Northeastern Colorado is one with wide-spread benefit. It would provide the irrigation necessary during the dry months of the year when rainfall and surface water are not available. That makes the difference between a good crop and no crop at all.

The last three Governors of Colorado have supported this project. It has been designated the No. 1 project of the State since 1973. No Colorado Senator has opposed this project nor does substantial opposition exist within the State today. Until questions were raised last year, this project enjoyed the support of Congress. It received construction status from Congress in 1973. The questions raised last year were answered in February of this year by the Bureau of Reclamation and its conclusions have not been challenged by any substantial evidence to date.

In view of the wide-spread support this project enjoys, the agricultural and flood protection benefits to be derived, and favorable cost-benefit ratio, this project deserves to be started again. Colorado cannot afford the negative effects further delay would cause.

Two projects within my State also are victims of this administration's hit-list mentality. Last year, the Savory-Pot project and the Fruitland Mesa project were stopped at the 11th hour. A multitude of criticisms were leveled at them, many times by those least familiar with these projects. Given the hysteria of last year's atmosphere and the recalcitrant position shown by the administration, the State of Colorado has requested that these two projects not be constructed, but that study money be provided so that they may be investigated in a calm and dispassionate manner. $75,000 is requested for each of these studies in fiscal year 1979. I stress that contrary to the impression given by Secretary Andrus, we are not asking for construction funds but are asking for study money.

The Animas-La Plata project in the four corner area of Colorado is a project that also enjoys wide support. It is a project that will benefit not only the community at large, but serve the special needs of Colorado's Indian community. This project is cosponsored by the Southern Ute Indian Tribal Council and the Ute Mountain Ute Tribal Council in conjunction with the La Plata Water Conservancy District of Colorado and the La Plata Water Conservancy District of New Mexico. The construction of this project together with the Dolores project will satisfy the water needs of the two tribes.

If these two projects are not constructed, it is expected that pending litigation to establish Indian water rights will be pursued. Both tribes support the Animas-La Plata project and its sister project, the Dolores project, as a better answer to their water problems. It is an answer that will not cause the severe disruption that litigation would bring.

This project is a shining example of cooperation between Indians and their neighbors and as such should be taken by others as an example of what can be done to resolve such thorny issues as Indian water rights.

The Closed Basin project is one that is unique. It involves little in the way of structural construction; it will reclaim water now being lost through evaporation, and it will help pay the deficit now owed to Texas and New Mexico under the Rio Grande River compact.

This project also will help the United States meet its obligation to Mexico under the May 21, 1906, treaty.

A major benefit of this project would be the creation of a reliable water supply for the Alamosa National Wildlife Refuge. The continuous flow provided by this project would promote migratory bird and fish habitat and restore the Rio Grande River to its earlier condition. A project as beneficial as this one should not be allowed to stagnate while the finer details of a national water policy are being contemplated. This project promotes President Carter's concern for conservation of water and protection of the environment.

Finally, I want to make clear that my concerns are not just about Colorado's water projects. The concerns raised by the administration's water policy affect the entire Nation. For that reason the Senate expressed its concern last year and I would hope that it would do so again this year.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. JOHNSTON. To be equally divided, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. GRIFFIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1645

(Purpose: To add $8.8 million for civilian applications of inertial confinement (laser) fusion technology)

Mr. GRIFFIN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Michigan (Mr. GRIFFIN) proposed an unprinted amendment No. 1645:

On page 2, line 13, strike the figure and insert in lieu thereof "$4,848,650,000."

Mr. GRIFFIN. Mr. President, inertial confinement fusion—that is, laser fusion—offers tremendous promise for solving our energy problems in the decades to come.

This technology is so promising that this bill includes in excess of $100 million for research into its military applications. I support this appropriation, and in the long run I am confident it will produce knowledge useful in commercial power applications of laser fusion power.

But our energy problems are such that we should not wait for the byproducts of military research. We should vigorously pursue civilian applications of this technology now.

It is with that in mind that I have proposed this amendment, which will insert $8.8 million for civilian applications of inertial confinement fusion technology.

Mr. President, last November 21 Newsweek magazine carried an article in its science section which said this:

In an energy-starved world, nuclear fusion may be the last best hope. Water would be its main source of fuel, and all U.S. energy needs for the next 300 years could be supplied by tapping only one-sixteenth of an inch from the level of San Francisco Bay.

More recently, on May 15, 1978, Business Week reported:

A significant shift in the pace and direction of federally financed fusion-power research appears to be under way in Washington. If the trend continues, laser-fusion power may well emerge as the preferred technology over competing approaches. . . . Most important, the government now seems convinced that commerical fusion power—the comparatively 'clean' energy technology that would generate electricity from the multiple explosions of miniature hydrogen bombs, without producing large quantities of troublesome radioactive wastes—should be pursued through civilian as well as weapons research. . . .

Next fall, the White House is expected to make a pitch for more fusion money, a move in line with its continuing emphasis on renewable energy resources. And . . . the Energy Dept. is known to be reviewing its entire program and is likely to recommend that military and civilian research projects be brought under separate management for the first time.

Further, impetus for such moves could come this summer, when the General Accounting Office will issue a study of federally backed fusion research. It is expected to argue that still more research money should go to private industry. . . .

. . . (T)he experts agree that not just federal but also private support of fusion will be necessary for such technology to be proven. "Commercial development of fusion power is not simply a question of federal funding," says Evert H. Beckner, director of physical research at Sandia National Laboratories in New Mexico. "It is essential to get more private companies involved. The next five years will be critical."

The potential of this technology was suggested by John Emmett, of the Lawrence Livermore Laboratory in California, who said:

If we can make this business work, then every gallon of water on the face of the earth will have the energy equivalent of 300 gallons of gasoline. The payoff is spectacular. For one thing, the geopolitical considerations of energy would be eliminated. It's really hard to corner the market on water.

Laser fusion has also received support because from an environmental standpoint it is both safer and cleaner than other forms of nuclear energy. And unlike fission energy systems, laser fusion does not produce highly radioactive byproducts like plutonium, which—because they could be diverted for military purposes—increase the dangers of nuclear weapons proliferation.

Speaking at Princeton last October, President Carter asserted that:

Fusion is the last energy source available and [it] presents the highest challenge to put science to work for the benefit of mankind.

The $8.8 million which I am proposing this afternoon would be a strong first step in that direction.

I have chosen the sum $8.8 million, because that is the amount that has already been authorized and appropriated by the House of Representatives. In other words, my amendment if adopted would bring the Senate bill into accord with its House-passed counterpart on this issue.

I make no secret of the fact that important civilian laser research is being done in my State of Michigan by KMS Fusion, Inc. We are very proud of the fact that this is the case.

I had intended to offer this amendment when the Department of Energy authorization bill came to the floor, but we are being forced to do it now because we are considering the appropriation bill before taking up the authorization bill.

It is my understanding that one of the reasons—at least—why the Senate Appropriations Committee's bill does not include funds for civilian applications of laser fusion is that no such funds have been recommended by the Senate Energy Committee in its authorization legislation. When the authorization bill reaches the floor I intend to try to rectify that situation.

But it is interesting to note that the Appropriations Committee report includes the following language—extracted verbatim from the House Appropriations Committee report, which did include funds for this program:

. . . [T]he potential promise of a clean, inexhaustible source of energy from the fusion process is of sufficient importance to warrant an aggressive development program.

Mr. President, it is for that purpose that I have proposed this amendment.

I would hope that the managers of the bill would appreciate the desirability and the merit of this amendment and might accept it.

I yield to the distinguished Senator from Louisiana.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. JOHNSTON. Mr. President, the inertial confinement fusion program is one that has very great promise and merit. The primary reason the Senate Public Works Subcommittee on Appropriations has no funds for this project is that it was not authorized by the Senate Energy Committee. That is the single, sole, and principal reason for this omission. However, the House does have $8.8 million, so this matter will be in conference. We will, therefore, be able to go to conference without any prejudice at all against this project. In fact, we will have a sympathy for it because we think it holds great promise.

So the matter will be in conference. The reason we did not have money was simply because it was not part of the Senate Energy Committee's authorization. On this bill, we must observe and stay within what the authorizing legislation calls for in this area.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. GRIFFIN. In line with the earlier conversation we had during the quorum call, I understand that in this appropriation bill there was no other items which have not been authorized.

Is that correct?

Mr. JOHNSTON. All of title I has not been authorized finally. Title I authorization has come through the Energy and Natural Resources Committee but has not passed the Senate. There is an overall provision that these appropriations are subject to authorization. The difference here is that not only was this not authorized by a final authorization bill signed into law by the President, but it was not approved in the legislation by the Senate Energy and Natural Resources Committee. It is my understanding that it was not rejected, it simply was not considered, if I am correct on that. It is, therefore, without prejudice that we will be able to go to the conference committee on this matter and consider it at that point.

Mr. GRIFFIN. I find that I am in a very difficult situation. The committee resists the amendment because the authorization bill has not yet passed. Of course, that is not the fault of the Senator from Michigan and if the authorization bill were on the floor, as I have already indicated I would be offering an amendment to make sure that this item is authorized.

I am familiar, of course, with the procedures here and I appreciate the difficulty of the situation in which the managers of the bill find themselves.

In light of the assurance that there is no prejudice against this program, and the understanding that it was excluded only because of the policy of the committee not to appropriate funds that have not yet been authorized, I shall withdraw the amendment. I do this with the understanding that the managers and the conferees on the part of the Senate will take to heart and consider very carefully the points and the arguments that I have made here with re-

spect to the commercial implications of laser fusion and the need for funding research in this area.

Aside from the other reasons that the country may be impatient with Congress for not getting on with the energy program, I believe that most people would find it very difficult to understand why we would have an energy program that would ignore the potential of inertial confinement fusion. As everybody seems to recognize outside of Congress, the potential of this technology is almost limitless. But with the assurances that the distinguished Senator from Louisiana has provided for the record——

Mr. RIEGLE. Will the Senator yield at this point?

Mr. GRIFFIN. Yes, I am glad to yield to my colleague from Michigan.

Mr. RIEGLE. I thank the Senator for yielding. I should like to join him in offering this amendment. If I may, I should like to be added as a cosponsor to it.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. I think the points he has been making are important for the Senate as a whole to consider, because the House has acted on this matter. I think there is a very substantial body now of scientific information that indicates that this is a road that we ought to pursue and that time is wasting. We ought to get on with it.

Frankly, I am reluctant to see us withdraw the amendment. I should like to see us try to persuade the committee, if they could possibly, to accept this amendment. I do not know if that is possible or not, but, at the very least, I would hope that, as long as it is in the House bill, if we do not force the issue today, something can be worked out with the House to see to it that some step is taken.

I ask the manager of the bill, if I may, my good friend from Louisiana—I did not hear the first part of the colloquy that took place between him and the senior Senator from Michigan. I take it that it is the feeling of the committee that it would not be willing to accept this amendment today, is that correct? I should certainly like to see if we could.

Mr. JOHNSTON. The Senator is correct. This has not been authorized even by the Senate Energy Committee. The senior Senator from Michigan, along with his colleague, has made a very persuasive case for this technology. We shall be able to go to conference with the House with it without any prejudice to the case of the Senators from Michigan.

In other words, the Senate has not rejected this project, not voted on it and rejected it. It is not included here simply because there is not any authorization for it from the Senate Energy Committee. There are other items that are not finally authorized, but not authorized because the bill has not matriculated through the Senate and House fully; but they were authorized by the Senate Energy Committee.

We will, indeed, consider this carefully and prudently and sympathetically in the conference committee and in light of the very strong and eloquent case made by the two Senators from Michigan.

Mr. RIEGLE. I say to the Senator that I appreciate what he has said. I know that if he says this will be given careful and sympathetic consideration, that is what will happen. I just note, by the way, so that this does not have the appearance of being just something for our State, that the moneys we speak of here will be available to research facilities across the United States. As a matter of fact, much of the research that is going on is going on in a variety of places in the 50 States.

It is true that there is one facility in our State that has moved out and is in a very forward position in this area. It by no means is alone. There are many others, and this would in no way give that particular entity any advantage over any other research facility in the country that wanted to apply for money to push this science forward.

So, while it happens that two of us from the same State are interested in it, it really is something that is national in scope and the scientific community across the United States that is centering on this activity would like to move more rapidly. We speak for them today as well in offering this.

I say finally to the Senator from Louisiana that I, for one, would be very hopeful that, in sitting down with the House, we could reach some agreement where we could take some forward step here. If the amendment is withdrawn today, I hope that we would still be able to make that gain. If it is the wish of the Senator sponsoring the amendment to withdraw it on that basis, I think that is probably the step to take. I certainly hope that out of this will come something from the conference committee that will move us ahead.

Mr. GRIFFIN. I thank my colleague from Michigan for his excellent comments and for the support he has given, now as in the past. I am reluctant to withdraw the amendment, but under the circumstances, in view of the fact that pressing it to a vote would be met with the argument that we are not in compliance with the rules of the Senate, and in view of the fact that there are not enough Senators on the floor to be persuaded by our arguments against the position of the committee, I think there is too much risk involved.

I think we would do better to go to conference with the assurances that the chairman of the subcommittee has given. Senator HATFIELD of Oregon, the ranking minority member, has given me similar assurances. I believe our chances would be better in the conference if I withdrew the amendment. So I shall do that. We shall pursue our efforts with members of the conference on both the House and the Senate side.

Mr. President, I withdraw the amendment.

The PRESIDING OFFICER. The Senator has that right.

The amendment was withdrawn.

Mr. JOHNSTON. Mr. President, I congratulate the two Senators from Michigan for the withdrawal of the amendment at this time in light of the failure to have authorization. We congratulate them on a very strong case and we will go to conference with the eloquence and convincing nature of their arguments ringing in our ears and, I suspect, with a very favorable mindset with respect to this amendment.

Mr. SCHMITT. Mr. President, will the distinguished Senator from Louisiana yield me some time off the bill to engage in a colloquy on three subjects?

Mr. JOHNSTON. Yes; I yield to the distinguished Senator from New Mexico.

Mr. SCHMITT. Each one will probably take about 5 minutes. Will he yield 15 minutes?

Mr. JOHNSTON. I yield 15 minutes to the Senator from New Mexico.

Mr. SCHMITT. Mr. President, the first topic I would like to discuss with the distinguished floor managers has to do with the provision in the bill under title III for moneys for the Colorado River Basin project.

It is my understanding that within the funds allocated, there is no money for studies relative to increased consumptive use in New Mexico of water from the central Arizona project; namely, 18,000 acre-feet of water per year was authorized by Public Law 90–537 and the debate for the use of this water has generally centered around a project called Hooker Dam.

There has been considerable controversy about Hooker Dam in the southwestern part of New Mexico.

It further attracted the administration's attention and was included in the famous hit list after failing to survive attempts for a compromise.

But, Mr. President, that does not mean that the future need for increased consumptive use of water in southwest New Mexico has gone away.

I would like, for the record, to indicate that whether the final answer is a dam called Hooker, or whether it is some other means of providing this water authorized by law to southwest New Mexico, it is an issue that will remain very close to this Senator's heart and to the people of that part of New Mexico.

I recently wrote several parties responsible for certain aspects of this potential program. I would like at this point to read a portion of the response from the Deputy Assistant Secretary for Land and Water Resources, Daniel P. Beard, to my question of what alternative means have been studied for the provision of the 18,000 acre-feet per year to southwestern New Mexico where increasingly there is a shortage of water.

The small town of Bayard, N. Mex., is now in a major crisis with respect to water availability. I am afraid this will be a continuing and accelerated problem.

I quote from the May 4, 1978 letter:

> On April 18, 1977, President Carter recommended to the Congress that Hooker Dam be eliminated as a feature of the Central Arizona Project (CAP). That decision by the President did not change the authorizing legislation of the CAP, which allows for the increased consumptive use of water in New Mexico subject to a number of provisions. Additional studies to find suitable structural or nonstructural alternatives to Hooker Dam will be required and, as you suggest, will include an evaluation of developing groundwater supplies. However, the Bureau of Reclamation's current program objective for the

CAP is to complete the construction of the conveyance features necessary to deliver water to the Phoenix area and the five central Arizona Indian tribes by 1985, and to the Tucson area by 1987. Delivery of Colorado River water at the Gila River near Buttes Dam site, the exchange point, is prerequisite to completion of any alternatives to Hooker. As emphasis on this effort eases, the Bureau of Reclamation will be able to concentrate on other project features.

The reconnaissance investigations you mentioned did conclude that there were no physical constraints on pumping 18,000 acre-feet annually from two areas along the upper Gila River. However, the studies also identified some potential restraints on groundwater pumping. These include the high fluoride content of the groundwater and legal problems related to depleting the water supply of downstream users and landownerships.

Now, Mr. President, I included this in the RECORD just to make sure it is clear that as time goes by the question of obtaining that 18,000 acre-feet of water will become more critical to the residents of New Mexico and to this Senator. I hope it will be possible within the next year or two to see the study of the alternatives to Hooker Dam, or Hooker Dam itself, included in the budget for the Colorado River Basin project.

I wonder if the distinguished Senator from Louisiana has any assurances he can give me that, at the very least, this problem will not be lost within the massive amounts of money we are appropriating here today.

Mr. JOHNSTON. Mr. President, there are three problems, but no planning money for the Hooker Dam. First, there is no capability in 1979. Second, the additional consumptive use from the reservoir has not been identified. Three, local agreements have not been completed.

However, this does not preclude a further consideration of this project. As the Senator points out, this was part of the central Arizona project and this one, along with the other dams, were deleted in the process of working out a compromise with the administration on the central Arizona project last year.

That does not preclude further study, particularly when the consumptive use has been identified. With the agreements completed, then we would be in that position to move forward with hearings and with additional funding, if warranted, on the studies.

So I can assure the Senator that this will not get lost in the shuffle when these necessary items are in place. Then it will be ready for consideration.

Mr. SCHMITT. I thank the Senator for his comments.

Although 18,000 acre-feet may not sound like a great deal in comparison to other portions of the central Arizona project or, certainly in the rest of the country, it is crucial to the future development of southwestern New Mexico. The continued difficulty in the copper industry and the need for water to support diversification, not only of industry, but just of living conditions, makes the development of this and ground water supplies extremely important.

I am sure that within the next year or two the justification for increased consumptive use in that area, with projections of developmental needs for the next decade, will be possible to make.

I hope the State of New Mexico, in cooperation, of course, with our congressional delegation, will be able to demonstrate that increased need to the satisfaction of the subcommittee.

I thank the Senator for those comments.

Mr. President, on a second issue relative to title I and, in particular, relative to the Department of Energy, appropriations for energy, science and defense activities, I would like to draw the Senate's attention to the issue of fusion energy.

This Congress has spent a good deal of time recently debating the various energy issues. It has been this Senator's privilege to try to remind my colleagues that the basic issue is, how do we transition from our present time of dependency on fossil fuels and an overdependency on imports of fossil fuels to a time when there are essentially inexhaustible energy sources available in this Nation? Along with solar electric systems and the development of hydrogen energy, with hydrogen as a portable fuel, we have been looking for many years at the practical and theoretical possibilities of fusion reactors.

I should like to mention briefly the potential research on advanced concepts of fusion energy. Research on fusion power has been in progress for over 20 years; however, as we move closer toward the next century, it is necessary to accelerate our efforts and explore all the possible options. I have listened to the colloquy between the two Senators from Michigan, and I know they feel very much the same way.

At this point, however, I commend the committee for their foresight in recommending in their report on fusion energy, on page 30, "an aggressive evaluation of the small system concepts to the mainline fusion machines presently pursued."

The reason this is of particular interest to this Senator is that recently I have become aware of a new approach to harnessing fusion power with the potential of achieving near-term results. It is based on an aerospace engineering approach to the development of small tokamak reactors of magnetic fields, and it pushes stresses and heat transfer materials to the present liimts of materials.

It is brought about by the fact that over the last two decades, because of efforts in aerospace, we have seen new materials and new processes and new understandings of materials develop to a much more significant point than was available at the time many of the original policy decisions were made with respect to fusion research. Because of this, a concept such as small tokamak reactors embodies elements of research risk that may not be found in the mainline national fusion effort. However, the cost of attempting this is only a few percentile points of the main program cost, and its payoff potential is so great that it would seem unreasonable not to continue work on this concept to a point of clear success or of a clear judgment that the technique was not feasible.

The unique nature of this approach derives from the small size and resulting low cost of future fusion devices using the modular concept. These tokamaks are modular units that are approximately two square meters and can be put together into an array of 5–20 unit cores. Each unit will generate approximately 100–200 MWe and the anticipated lifetime of the individual units is typically 1 month, although that is something for the further research to determine. This modular concept has the advantage of being able to replace or repair the recyclable units without shutting down the entire plant. The small size of each unit and the low cost for manufacturing these units make this concept a promising advancement in fusion engineering and possibly a technically and economically feasible near-term fusion power program.

Successful demonstration of this concept could save millions of dollars in future costs, at a fairly low initial investment—albeit high risk investment. It could bring practical fusion power years sooner than otherwise, and as a result could have a much broader influence than previously had been anticipated on our general problem of energy imports and energy alternatives to fossil fuel.

It is my belief that the time to pursue this concept, and to pursue a number of reasonably advanced fusion concepts in parallel with the mainline program, is now, if we are to consider fusion energy as part of our future—an inexhaustible, environmentally sound contributor to our national energy supply problem.

Mr. President, again I compliment the committee for recognizing in their report—and I hope it will be clear to the Department of Energy—that "an aggressive evaluation of the small system concepts to the main line fusion machines presently pursued" will be interpreted as the intent and the will of Congress.

Mr. President, on a final subject, again dealing with title I, in the light water reactor section of the report there is discussion of the Barnwell reprocessing plant in South Carolina.

The distinguished Senator from South Carolina (Mr. THURMOND) is in the Chamber, and he has a great interest in this activity. As a Senator from New Mexico, I also have a great interest in it because of the implications of the reprocessing technology on the possibilities of and the options for nuclear waste management.

It has become increasingly apparent that the present administration is not considering the reprocessing of spent fuel rods from nuclear reactors as one of the options that must be dealt with as we develop a nuclear waste management program in a significant way.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. SCHMITT. Mr. President, will the Senator from Louisiana yield another 4 minutes?

Mr. JOHNSTON. I hope the Senator can conclude, because I assured a number of Senators that we were getting close to final passage.

I yield another minute to the Senator.

Mr. SCHMITT. I appreciate the Senator's courtesy.

Mr. President, the administration's policy is clearly geared to the concepts

of permanent disposal of spent fuel rods, without consideration of the potential of reprocessing. That reprocessing potential is not only in the obtaining of energy still in those fuel rods, in the form of unused uranium and plutonium, but also in the form of other elements and isotopes of elements that can provide our society with great economic material.

It also is very clear at this point that reprocessing will simplify, in many respects, our waste management problem.

I thank the distinguished Senator for his courtesy.

I join Senator HOLLINGS and Senator THURMOND in hoping that the report language is a clear indication to the administration that we intend to have the reprocessing issue at least remain an open option.

Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the statement of Jerry Apodaca, Governor of the State of New Mexico, to the Public Works Subcommittee of the Appropriations Committee of the Senate on April 5, 1978.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CENTRAL ARIZONA PROJECT

The Colorado River Basin Project Act P. L. 90–537, enacted in 1968 authorized construction of the Central Arizona project in Arizona and New Mexico. The President's FY '79 budget proposal includes an appropriation request for $73,770,000. The Hooker Dam and Reservoir or suitable alternative in southwestern New Mexico is authorized for construction as part of the Central Arizona Project. No funds are proposed in the President's FY '79 budget for the continued study necessary in order that this unit of the project can be completed on a timely schedule. I urgently request that at least $200,000 be included as a line item for continued study of the Hooker Dam and Reservoir or suitable alternative.

Mr. THURMOND. Mr. President, will the Senator yield me 1 minute?

Mr. JOHNSTON. I yield.

Mr. THURMOND. I thank the Senator.

Mr. President, I commend the able Senator from New Mexico for the statement he has made. I express our sincere appreciation to him for his vision and foresight in the atomic field and the matter of reprocessing nuclear energy.

Mr. President, on Monday of this week, the Appropriations Committee approved a total of $18.5 million for research in fiscal year 1979 at the Barnwell nuclear fuel plant in South Carolina. Earlier, the Committee on Energy and Natural Resources authorized this same amount for fiscal year 1979 for Barnwell. Yesterday, I placed in the CONGRESSIONAL RECORD, so that it would be readily accessible to my colleagues, a recent GAO report evaluating Federal funding for Barnwell. The report concluded that—

Congress should continue to fund short-term research studies at Barnwell until the completion of the international study on alternative fuel cycle technologies.

The International Nuclear Fuel Cycle Evaluation (INFCE) is a 2-year, 40-nation study initiated by the administration to evaluate alternative fuel cycles which will reduce the danger of nuclear proliferation. I urge my distinguished colleagues to support the determination made by these committees and by the GAO that funding for the Barnwell reprocessing plant should be continued for the coming year.

Mr. President, I support continued funding for Barnwell for one simple reason—it preserves certain options for the future. I strongly believe that it is important to our country to keep open all options in the field of nuclear energy. By keeping Barnwell in operational status, we can preserve the very important option that this unique, modern facility may yet be used to reprocess commercial spent nuclear fuel. On April 7, 1977, the President issued a policy statement calling for an indefinite deferral of commercial reprocessing in the United States.

Other nations have not, as the President had hoped, followed our lead in deferring the reprocessing of spent fuel. The recent GAO report on Barnwell funding stated that Japan, France, West Germany, the United Kingdom, and the Soviet Union all have ongoing breeder reactor development programs as well as planned or operating reprocessing facilities. They apparently view breeder technologies and reprocessing as vital to their economic stability and have not evidenced a desire to discontinue these programs. Our own plant at Barnwell, the first large-scale commercial reprocessing venture in the United States, should be kept in operational status in the event that the President either at the conclusion of the INFCE or at some other time reconsiders his ban on commercial reprocessing. I very strongly believe that the United States should retain the reprocessing option and keep up with reprocessing developments.

The alternative to reprocessing, the so-called "throwaway" fuel cycle, causes me great concern for two reasons. First, we are wasting a significant amount of energy. British Foreign Secretary David Owens, in explaining his country's decision to expand one of its reprocessing facilities over strong U.S. objection, recently stated that:

The throwaway route means throwing away more than ninety percent of the energy value of nuclear fuel—roughly the equivalent of throwing away seven pints out of every gallon of petrol that a motorist buys.

Secondly, reprocessing is the superior alternative from the standpoint of managing nuclear waste. Reprocessing waste, for example, takes less time to become innocuous than do spent fuel elements. Also, the total integrated radioactivity is about three times greater for spent fuel elements than for reprocessing wastes. I believe that reprocessing represents a safer method for nuclear waste management.

A second option preserved by fiscal year 1979 funding for Barnwell is the continuation of the research program being conducted there. Federal dollars are being well spent because the Barnwell R. & D. program is producing results. The highly technical, talented staff at Barnwell recently developed a new more proliferation resistant fuel cycle which would make it practically impossible for terrorist groups to fashion crude nuclear explosives from the end products of the new cycle. This technological breakthrough has been submitted to the INFCE for further evaluation.

Another option is the use of Barnwell to reprocess military production fuel. Although some technical changes would be required to enable the Barnwell facility to reprocess military fuel as opposed to commercial fuel, the owners of the plant assure me that such changes would not be excessively difficult or costly. This option needs careful study in that our military facilities are becoming aged and are deteriorating.

I believe that the preservation of all these options is important to the future of our country. I thank Senator MAGNUSON, chairman of the Appropriations Committee and Senator YOUNG, ranking minority member of this committee, for their leadership in continuing this vital program through fiscal year 1979. I sincerely urge my distinguished colleagues to join with me in supporting the $18.5 million approved by the Appropriations Committee for fiscal year 1979 research at Barnwell.

I also thank the able Senator from Louisiana (Mr. JOHNSTON), floor manager of the bill, and the able Senator from Oregon (Mr. HATFIELD), ranking minority member, for the excellent manner in which they have handled the bill on the Senate floor.

UP AMENDMENT NO. 1646

(Purpose: To designate a certain amount as available for streambank repairs subject to favorable report from Army Corps of Engineers)

Mr. SCHWEIKER. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania (Mr. SCHWEIKER) proposes an unprinted amendment numbered 1646.

Mr. SCHWEIKER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 7, line 22, insert the following: ": *Provided further*, That an amount not to exceed $4,000,000 may be allocated to the Streambank Erosion Demonstration Program authorized in Section 32 of the Water Resources Development Act of 1974 for such bank stabilization measures on the North Branch of the Susquehanna River in the vicinity of Forty Fort, Pennsylvania, at approximate river mile 189.4, as the Chief of Engineers deems necessary and subject to the favorable findings and recommendation from the Chief of the Army Corps of Engineers and approval of the Committees on Appropriations of the House and the Senate."

Mr. SCHWEIKER. Mr. President, a very serious problem is developing along the north branch of the Susquehanna River in Forty Fort, Pa. Forty Fort is a neighboring community to Wilkes-Barre which is the area devastated by Hurricane Agnes in 1972.

During the Federal disaster recovery effort to restore the communities along the Susquehanna River, the Army Corps of Engineers, at the direction of the Office of Emergency Preparedness, rebuilt about 1,800 feet of riverbank in Forty Fort.

On July 19, 1978, the Luzerne County engineer wrote the Baltimore district engineer informing him that portions of this rebuilt riverbank are eroding and sliding into the Susquehanna. I ask unanimous consent that the Luzerne County engineer's letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

LUZERNE COUNTY,
Wilkes-Barre, Pa., July 19, 1978.

U.S. ARMY CORPS OF ENGINEERS,
Baltimore District,
Baltimore, Md.
(Attention: Col. G. K. Withers, District Engineer)

DEAR COLONEL WITHERS: Within the last two weeks, a very serious embankment failure has been brought to my attention by Luzerne County's Levee Maintenance Personnel. The embankment failure is serious enough to bring to the attention of the U.S. Army Corps of Engineers and I have done just that within the past several days. I have spoken to several gentlemen from the Baltimore District and find that the question of jurisdictional authority is an impediment to allowing the Corps of Engineers to perform repair work in this area.

I am writing this letter in an effort to describe to you the details of events surrounding this embankment failure and to ask that you pursue the possibility of having the Baltimore District perform repair work necessary to stabilize the existing embankment.

Forty Fort Borough, as I am sure you are aware, is protected by substantial Federal Flood Protection System (Forty Fort-Swoyersville Flood Protection System) constructed by the U.S. Corps of Engineers several years ago. The southern most or downstream terminus of the Flood Protection System ties into high ground at a location along River Street in Forty Fort immediately adjacent to several residential properties. This particular high ground suffered substantial erosion during the 1972 flood disaster and subsequently was restored by the Corps of Engineers under direction from the President's Office of Emergency Preparedness. The restoration work consisted basically of several hundred feet of embankment restoration and the installation of a rock armor facing along the full extent of the restoration. Within the past two weeks, we have noticed a substantial and rapid movement both vertical and horizontal of a portion of this embankment which is creating considerable concern on the part of adjacent property owners as well as the Borough Council in the Borough of Forty Fort. I believe their concerns are well founded for several reasons, primarily however because of the potential of rapid erosion of this embankment during a high water condition which could jeopardize the integrity of the Flood Protection System in Forty Fort.

In discussing the problem with several Baltimore District Personnel, I find that your authority is limited in this particular area since the property in question is privately owned and does not fall within your jurisdiction as it relates to flood protection. My contention is however, that since the Corps of Engineers performed the restoration work after the Agnes Disaster and since that restoration work has obviously failed to perform the function for which it was designed, a responsibility exists to perform the necessary repair work to restore the embankment to a condition as it existed prior to the failure and to perform necessary work to prevent similar failures in the future. I have some very serious reservations concerning the adequacy of the design and construction performed in this area after the Agnes Disaster in view of the recent failures which I believe can be obviously attributed to a failure of the embankment rather than a failure of the base structure upon which the embankment rests.

I just today spoke to Mr. Al DeLucia from the Federal Disaster Assistance Administration and discussed the problem with him since he is a representative of the agency which assigned the Corps of Engineers to this project. I was somewhat amazed in listening to his comments concerning the type of restoration work that had been performed along this embankment. In essence, he told me that the restoration work was designed to be only a temporary restoration and certainly not something that was designed or constructed to last an indefinite period of time. I told Mr. DeLucia that had that been the case, I believe that the President's Office of Emergency Preparedness would have had an obligation to tell the property owners along River Street who are affected by this embankment that the restoration was only temporary and that they could expect failure of the embankment in the future. It is inconceivable to me that the Corps of Engineers approached this restoration with that type of performance in mind.

In light of these events, I am asking that you review the entire status of your authority and/or responsibility relative to stabilization of this embankment and to exercise any authority you may have in effecting immediate repairs. I believe this problem is serious enough to require your immediate attention and I would very much appreciate some correspondence from you concerning this matter. Mr. Dave Buettner, Mr. Ed Hecker and Mr. Joe Hemler of the Baltimore District are all familiar with this problem and I believe would be able to discuss it with you.

Would you please at your earliest possible convenience, get back to me with your decision relative to permanent repairs. In the interim, Luzerne County will construct a temporary protective fence which will hopefully prevent any accidents due to the deep open cracks which have evidenced themselves in the embankment.

Thank you very much.

Very truly yours,

JOHN L. CHURNETSKI,
Luzerne County Engineer.

Mr. SCHWEIKER. Subsequently, Mr. President, an onsite inspection was undertaken by the Army Corps of Engineers and the Federal Disaster Assistance Administration which confirmed the existence of this problem.

I have discussed this matter with Lt. Gen. John W. Morris, Chief of the Army Corps of Engineers, who informs me that while an erosion problem affects approximately 400 to 500 of the 1,800 feet of riverbank, his engineers have not been able to undertake a detailed engineering analysis to determine the extent of the problem.

On August 3, 1978, the Corps of Engineers wrote me describing the present situation at Forty Fort, and I ask unanimous consent this letter be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE ARMY,
Washington, D.C., August 3, 1978.

Hon. RICHARD S. SCHWEIKER,
U.S. Senate,
Washington, D.C.

DEAR SENATOR SCHWEIKER: As requested, and relating to your earlier conversation with General J. W. Morris, Chief of Engineers, I am sending you the current information as seen by this office on the Forty-Fort situation near Wilkes-Barre, Pennsylvania.

As a result of Hurricane Agnes in 1972, a section of the Susquehanna riverbank at Forty-Fort collapsed, leaving several homes in immediate danger of falling into the river. During the disaster relief efforts the OEP (now FDAA), requested and funded the Corps of Engineers to make emergency repairs to the bank in order to protect these homes. This work was done as a part of a disaster relief program and has served well for five years.

The present situation, based primarily on photographs and without any detailed engineering analysis, is that the emergency protective embankment mentioned above is failing in the vicinity of the homes. Once again these property owners are in danger of early and significant losses. The total embankment is about 1800 feet long and begins just downstream from the end of the Forty-Fort flood control project authorized by the Congress and constructed through the Corps of Engineers. I understand that of the total 1800 feet which is affected about one-fourth shows signs of serious cracking. Indications are that additional failure, apparently as a result of subsidence is possible.

There is currently no authority, emergency or otherwise, which would permit the Chief of Engineers to repair the work which was done as part of the post-Agnes Disaster Declaration.

There are two reasons why the Congress might desire that repairs should be undertaken. First, there is the danger to individuals and their personal property and, secondly, regardless of the circumstances under which the work was done following Agnes, the public perception quite probably is that since the Corps of Engineers was involved, a responsibility exists for the Federal Government to correct the current situation. While the second point is technically not correct, the perception remains nevertheless.

Should you and the Congress conclude and desire that the Corps of Engineers repair and correct the existing situation in the vicinity of Forty-Fort, the most immediate available opportunity appears to be to include this location as part of the streambank erosion demonstration program authorized in Section 32 of WRDA 1974. It is estimated that an additional $4,000,000 would be required to accomplish this work.

I trust this information is satisfactory.

Sincerely yours,

JAMES W. PECK,
Colonel, Corps of Engineers Assistant Director of Civil Works, Atlantic.

Mr. SCHWEIKER. Mr. President, my amendment is designed to protect the town of Forty Fort should the Corps of Engineers determine that a project is needed and justified to restore this riverbank and prevent further erosion. When the Senate debated the fiscal year 1978 second supplemental appropriations bill, Senator MAGNUSON and I discussed this problem, and we agreed to direct the Chief of the Army Corps of Engineers to provide the House and Senate Appropriations Committees with a preliminary analysis of this situation no later than September 15, 1978. My amendment would allow the Corps of Engineers to

undertake repairs if their analysis indicates work needs to be performed.

Mr. President, as I stated earlier, this is a serious problem; however, it is not possible to determine the extent of the damage at this time. My amendment clearly states that this project must be studied, justified, and recommended by the Chief of Engineers of the Army Corps, and approved by the respective Appropriations Committees before these funds can be spent.

Mr. JOHNSTON. Mr. President, Representative DAN FLOOD, of Pennsylvania, has called me on this matter and has pointed out the very serious nature of erosion on the banks of the Susquehanna River.

This matter was begun by calling for a preliminary study which was requested in connection with the second supplemental appropriations bill.

And this will be the next step in furtherance of doing the necessary work to be determined by the study. The $4 million may be expended only upon the completion of this preliminary study, the approval by the Chief of the Corps of Engineers, and approval by both Appropriations Committees on the House and Senate side.

I think it is a very appropriate amendment that gives us the ability to deal with that serious problem.

We, therefore, accept the amendment, and yield back the remainder of my time.

Mr. SCHWEIKER. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Pennsylvania.

The amendment was agreed to.

Mr. GLENN. Mr. President, will the Senator yield?

Mr. JOHNSTON. Mr. President, I yield to the Senator from Ohio such time as he may require.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. I thank the distinguished floor manager.

Mr. President, I am pleased to see that the committee included $300,000 for phase I planning for the Cleveland Harbor dredging project. The project is vital to the economy of my State of Ohio. When the project proceeds, the Cleveland harbor will be dredged and restructured so that it can accommodate 1,000-foot ore carriers. If the harbor is unable to handle these modern ore carriers, Ohio's steel industry will be placed at a great competitive disadvantage which could over a period of time result in significant unemployment and the weakening of a viable industry employing thousands of individuals.

Earlier in this session I was successful in attaching to the waterway users bill an amendment authorizing an additional $27.6 million to provide for the completion of this project. It is my understanding that there is movement in the House on this authorization and that prospects for sending a bill to the President containing a full authorization for the project are good. None of the construction which would be authorized by that legislation, however, can proceed until a phase I design memorandum is completed. The $300,000 provided by the committee, if ultimately appropriated and spent, would allow for the completion of this design stage of the project.

Unfortunately, Mr. President, there is a hitch. Last month it was reported that the Office of Management and Budget has directed Secretary of the Army Clifford Alexander to have the Corps of Engineers conduct another feasibility study of the project. A full-fledged feasibility study has already been completed and later supplemented. The final report has been favorably reviewed by the appropriate District Office, by the Board of Rivers and Harbors, and by the Office of the Chief of Engineers. Yet in spite of the comprehensive review given the project by the corps and the pressing economic need to proceed with design and construction at the earliest possible date, the OMB is asking for still further review of the project's feasibility.

It is with great regret that I have watched OMB's action on this project. To my mind the case has not been made for an additional feasibility study, and the funds which would be appropriated by the committee's bill should be spent on design planning as early as possible. I would like to address a question to the distinguished floor manager of the bill, the Senator from Louisiana, who is the chairman of the Appropriations Subcommittee which approves the budget for the corps and its projects. Would the Senator agree with my assessment that no effective case has been made for an additional feasibility study and that phase I design planning and ultimately construction should proceed with the greatest possible speed?

Mr. JOHNSTON. I thank the Senator for his explanation and most certainly do agree with him in his assessment. The committee included language in its committee report that it expects the corps and other executive agencies to vigorously proceed with phase I planning at the earliest possible time, and I am happy that his words have reinforced the committee's intent. We will keep a watchful eye on this project since, as the Senator has pointed out to me and my colleagues, the project is essential to the economic stability of northeastern Ohio.

Mr. GLENN. Mr. President, this is with regard to our fabrication of nuclear fuel in this country.

One of the salient points on which there appears to be virtually unanimous agreement among all parties dealing with U.S. nonproliferation policy is the need for the United States to back up its nuclear fuel commitments with the clearly perceived enrichment capacity to carry out those commitments. Otherwise, U.S. leadership in nonproliferation will be forfeited as nuclear fuel customers go elsewhere to satisfy their needs.

Seen in that light, the construction of the Portsmouth gas centrifuge enrichment plant becomes a major element of the U.S. drive to limit the spread of nuclear weapons capability around the world.

The importance of this project has been reiterated on several occasions by the President, both during his campaign and afterward. The most recently stated commitment of the administration to the completion of this project was contained in a letter to me dated June 7, 1978, from DOE Under Secretary Dale Myers, referring to the commitment to build the $8.8 million SWU centrifuge plant at Portsmouth, and explaining administration thinking regarding the new revised schedule for completion. I ask unanimous consent that this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF ENERGY,
Washington, D.C., June 7, 1978.

Hon. JOHN GLENN, Jr.,
U.S. Senate,
Washington, D.C.

DEAR SENATOR GLENN: I have been asked to respond to your letter of May 8, 1978, to the President in which you expressed your concerns regarding the recently announced revisions to the Portsmouth Gas Centrifuge Enrichment Plant (GCEP) schedule. These recent changes resulted from a review conducted by the Department which has reaffirmed the eventual need for the additional centrifuge enrichment capacity.

Since committing to build the 8.8 million SWU centrifuge plant at Portsmouth, Ohio, last year, several changes have occurred in the projections of future uranium enrichment needs. First, a careful review of nuclear plant construction has led to a revision downward in the forecast growth of nuclear plants. Our estimates for the number of reactors that we expect to supply in 1985 and 1990 are shown below, along with the earlier estimates which had driven the previous schedule for the GCEP.

Previous estimate—GWE

Year	Domestic	Foreign	Total
1980	78	50	128
1985	163	101	264
1990	205	112	317

Current estimate—GWE

Year	Domestic	Foreign	Total
1980	60	41	101
1985	115	65	180
1990	185	100	285

The impact of this in terms of SWU demand (at 0.25 tails assay) is shown below:

Previous estimate of MSWU required

Year	Domestic	Foreign	Total
1980	10	5	15
1985	21	11	32
1990	22	11	33

Current estimate (MSWU)

Year	Domestic	Foreign	Total
1980	8	5	13
1985	14	7	[1]21
1990	20	11	31

[1] Based on CIP/CUP, capacity will be 27.3 MSWU in 1984.

Second, the DOE has offered to permit both domestic and foreign utilities to slip deliveries of enriched uranium (upon payment of schedule adjustment charges) to

reflect the similar slips in nuclear power plant construction schedules. Third, the DOE has announced its intent to take new orders for enrichment for domestic and foreign utilities which may increase the need for new enrichment supply.

On balance, these factors when considered with the inherent flexibility and cost effectiveness of the centrifuge process have dictated a schedule revision which will insure enriched uranium supply against a realistic expectation of demand.

The new schedule will provide 2.2 million separative work units (SWU's) of centrifuge capacity by the end of 1988, with additional capacity being added sequentially in increments of 1.1 million SWU's as needed to match future demand. This slip in the plant schedule will in no way affect our ability to meet all future domestic and foreign uranium enrichment needs.

All information pertinent to any future decisions on the production plans for the existing diffusion plants, the enriched uranium stockpile and the centrifuge plant will be assembled during this summer. As is always the case if the enrichment requirement situation warrants it, changes to existing plans may occur.

The proposed reduction in funding for FY 1979 has not modified the front end of the centrifuge plant schedule. The revised schedule does not change the date for beginning construction of the first process building, FY 1979, or for operation of the first train, FY 1984. I believe the presently planned program will reinstate the United States as a reliable and economical source of enrichment services to domestic and foreign customers and will provide for more efficient use of this Nation's resources. Since the schedule for operation of the GCEP is tied to when additional capacity will be needed, demand for enrichment services, and methods of operating the diffusion plants must be watched carefully as the GCEP progresses.

The revised schedule for the GCEP is expected to reduce adverse social and economic impacts in the Portsmouth area during construction of the plant. Under the new schedule, the peak construction work forces would be reduced by 25 to 35 percent. However, this will permit the work force to have a large percentage of workers hired from the construction worker pool in the vicinity of the plant. These workers also will be required for a longer period of time. The lower number of construction workers stretched out over a longer period of time, coupled with the hiring of an operating work force as construction is completed, will result in reduced adverse impact on schools, roads, traffic, and housing services in the area.

I appreciate your continued support of the GCEP Project.

Sincerely,

DALE D. MYERS,
Under Secretary.

Mr. GLENN. Mr. President, it would have been prudent, in my view, for the Portsmouth facility to be funded at a level that would enable completion of the entire facility by 1988.

In fact, I so wrote to Senator BYRD in a letter that also contained a recommendation for the funding of a high Btu synthetic fuel industrial demonstration plant (a recommendation, I am pleased to say, that was adopted by the Appropriations Committee).

Mr. President, I ask unanimous consent to have my letter to Senator ROBERT C. BYRD printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

report by the Administration to justify the

U.S. SENATE,
Washington, D.C., July 19, 1978.

Hon. ROBERT C. BYRD,
Committee on Appropriations, Chairman, Subcommittee on Interior and Related Agencies, 1208 Dirksen Senate Office Bldg., Washington, D.C.

DEAR BOB: I would appreciate consideration by you and your Subcommittee of this request to fully fund two projects in the current DOE budget. These are (I) the Portsmouth Gas Centrifuge Enrichment Plant (GCEP) and (II) the second generation High-Btu coal gasification demonstration plants. These projects are currently fully authorized by the Senate Energy and Natural Resources Committee.

The reasons that I bring these projects to your attention are as follows:

I. PORTSMOUTH GAS CENTRIFUGE ENRICHMENT PLANT (GCEP)

The DOE recently advised Congress of its desire to delay the construction schedule and to reduce by approximately half its authorization and appropriation requests for the Portsmouth GCEP.

I have been given an informal briefing by DOE on the reasons that have prompted their decision. Certainly the notion of better matching and smoothing of component production and plant construction schedules and the desire of more closely matching SWU supply to demand are considerations to which one must pay attention on the basis of good management practice.

However, this additional enrichment capacity is so vital to our economic, health, foreign policy, and national security that we must ensure this nation's ability to remain an assured supplier of reactor fuel.

We have already observed the severe adverse effect upon the cause of non-proliferation as well as on our balance of payments resulting from the decision in 1974 to close the order books for new enrichment services. If we are to enhance our non-proliferation policy, improve our balance of payments, and create an appropriate climate of confidence within which our domestic nuclear industry and utilities can flourish, there must be no question about the ability of the U.S. to maintain a strong position as a reliable supplier of enrichment services. To that end, the Nuclear Non Proliferation Act of 1978 provided in Title I that:

(a) The United States, as a matter of national policy, shall take such actions and institute such measures as may be necessary and feasible to assure that it will provide a reliable supply of nuclear fuel to recipients that adhere to policies designed to prevent proliferation;

(b) The United States shall ensure that it will have available the capacity on a long-term basis to enter into new fuel supply commitments consistent with its non-proliferation policies and domestic energy needs;

(c) The Secretary of Energy shall initiate construction planning and design, construction and operation activities for expansion of uranium enrichment capacity;

(d) The President shall study and report to the Congress on the need for additional United States enrichment capacity to meet domestic and foreign needs and to promote United States non-proliferation objectives abroad; and

(e) The President shall submit proposals to the Congress for creation of a stockpile of low enriched uranium for fuel assurances with the intermediate aim of creating an international fuel bank and with the ultimate aim of creating an International Nuclear Fuel Authority to deal with all aspects of the fuel cycle.

In the absence of the study of U.S. enrichment needs called for in the Non-Proliferation Act or other detailed substantive proposed reduction in FY 79 authorization for the Portsmouth GCEP, I find it difficult to support the reduction and the associated extension of the construction schedule.

Accordingly, unless the Administration provides convincing documentation that the proposed schedule stretchout will cause no substantial risk to our non-proliferation policy, to our domestic nuclear fuel position, to the creation of a fuel bank, or to our ability to open wide our order book for new contracts, I recommend to the Subcommittee on Interior and Related Agencies that it vote the full FY 79 appropriation of $220 million for the Portsmouth GCEP.

II. SECOND GENERATION HIGH-BTU COAL GASIFICATION DEMONSTRATION PLANTS

I am extremely concerned by recent actions which suggest a major shift in DOE policy on funding and support of second generation High-Btu coal gasification demonstration plants. Testimony given in April by DOE Undersecretarory Myers stated that DOE was reevaluating second generation coal gasification and was considering skipping second generation to concentrate on third generation technology.

Although technical and budgetary considerations require a continuing review of all projects, I believe:

1. The question of second generation gasification technology versus liquefaction technology seems cast as an "either/or" proposition. This is an erroneous conception as today's existing energy system permits substantial substitution of liquids for gas and vice versa. Considerable gas has already been replaced by imported oil and this situation can be reversed easily. Therefore, both second and third generation projects should be fully funded.

2. There are methods which have not been considered by DOE to ease the budgetary crisis such as a request by CONOCO to provide a smaller demonstration plant with a single modular reactor instead of three modules.

As a minimum, I believe that DOE should assure the application of gasification technologies to all parts of the U.S. coal resource. It is especially important that a developed process be applied to the eastern coals, particularly those in Appalachia, for the production of synthetic pipeline gas. Recent test results are quite positive that this goal is attainable.

In this regard I urge that you, as Chairman of the Subcommittee on Interior and Related Agencies of the Senate Appropriations Committee, reaffirm the Senate's support of the High-BTU gasification project as currently constituted. We also urge that you support the authorized funding for *two* High-BTU demonstration plants, and finally, given the existence in the U.S. of major coal fields in Appalachia and in the Mid-continent, we believe it should be the intent of your subcommittee and the U.S. Senate that the legislation assures that a demonstration plant be placed in each of these two major coal resource areas.

Your consideration of my requests is appreciated.

Best regards.

Sincerely,

JOHN GLENN.

Mr. GLENN. The administration's position, as has been expressed to me on several occasions by its representatives, is that the reduced funding sought by the administration is for a schedule stretchout and nothing more.

In the case of Portsmouth, the Appropriations Committee has chosen to follow the administration's recommendation of a $135 million appropriation for fiscal year 1979—an appropriation that

will cause the schedule for completion of the facility to slip beyond the original target date of 1988.

Mr. President, because of the importance of this facility to our national security, our balance of payments, and our image as a reliable supplier of low-enriched fuel, there must be no misunderstanding of the intent behind this lowered appropriation. Accordingly, I would like to engage in a colloquy with my distinguished colleague from Louisiana and the floor manager of the bill, Senator JOHNSTON.

The Appropriations Committee has provided $135 million for fiscal year 1979 for the Portsmouth gas centrifuge add-on facility although $250 million would have been needed for completion of the facility by 1988. I was pleased to see that in the committee report on this bill the following statement appeared:

The Committee strongly supports this needed addition and believes the Department should proceed expeditiously with its construction.

Do I understand correctly that the committee's position is that the entire 8.8 million SWU of capacity for the Portsmouth facility should be constructed by the Department of Energy?

Mr. JOHNSTON. That is correct. The committee believes that there should be no reduction in the commitment to the Portsmouth facility and that the entire 8.8 million SWU capacity plant should be completed.

Mr. GLENN. Is it the committee's understanding that the reduced level of funding is a response to the administration's request for a stretchout of the timetable for completion, that the administration is still committed to building the entire 8.8 million SWU plant, and that the $135 million appropriation will be sufficient to complete a module of 2.2 million SWU for the Portsmouth facility in 1988?

Mr. JOHNSTON. That is correct. It is important to note that this $135 million together with amounts previously appropriated will provide a total of nearly $465 million for the facility.

Mr. GLENN. I have heard some suggestions made that one factor in the administration's request for a lower appropriation for the Portsmouth facility in fiscal year 1979 was the progress being made in advanced isotope separation technology. It is my view that even if such advances have been made, the need for the United States to remain a reliable supplier of low-enriched nuclear fuel, to improve its balance of payments, and to meet its nonproliferation objectives, requires that the Portsmouth facility be expeditiously completed.

Mr. JOHNSTON. I agree with you.

Mr. DOLE. Mr. President, will the Senator yield me 2 minutes?

Mr. JOHNSTON. I yield to the distinguished Senator from Kansas 2 minutes.

Mr. DOLE. Mr. President, Kansas has long had a proud record of responsible public works development assisted by Federal dollars, and their economic benefits are immeasurable. I believe that the action taken by the Committee on Appropriations will insure for present and future generations of Kansans an adequate water supply and reasonable protection from floods.

While I am pleased with the committee's recommendation for funding of Kansas public works projects, I noted with disappointment that the Tuttle Creek Lake road and bridge improvements were not included in the bill.

MARSHALL COUNTY ROAD AND BRIDGE

In 1976, the Senate approved legislation I introduced to authorize construction of a road and replacement bridge in Marshall County, Kans., on the Little Blue River. This project, described as a "modification of the Tuttle Creek Reservoir plan," was authorized as section 189 of the 1976 omnibus rivers and harbors bill.

In 1973 there was considerable destruction of area roads and bridges due to flooding conditions enhanced by the Tuttle Creek Reservoir downstream. I think it is only fair, as well as vital, that the residents of this area around Marysville, Blue Rapids, and Waterville, be assisted in their efforts to reconstruct necessary thoroughfares for local commerce and transportation. Although no funding recommendation was contained in the Senate bill for the Tuttle Creek projects, it is my understanding that the conference committee will most likely retain the House figures, which will provide $34,000 for Tuttle Creek road construction and bridge replacement and $50,000 for Tuttle Creek Lake road improvements.

Again, Mr. President, I want to thank the committee for funding these worthwhile Kansas public works projects and strongly urge the conference committee to adopt the House figures with respect to the Tuttle Creek projects.

Mr. President, I only take this time to at least try to impress upon the distinguished floor manager of the bill, who undoubtedly will be a conferee, that in April of this year in testifying before the committee I asked for funding of several Kansas projects, specifically the Tuttle Creek projects at a level of $630,000. However, there was no money included in the Senate version by the Senate Appropriations Committee. On the House side they incuded $35,000 for road construction and bridge replacement and $50,000 for Tuttle Creek lake road improvements for a total of $85,000.

I am hopeful, and again urge the distinguished floor manager and the ranking Republican on the conference committee to retain the House figures which would provide $35,000 for the Tuttle Creek road construction and bridge replacement and $50,000 for the Tuttle Creek lake road improvements.

This matter has been discussed with the distinguished floor manager of the bill. I wonder if the Senator from Louisiana could give me some assurance that there is a good chance we might be able to retain this small amount in the conference?

Mr. JOHNSTON. I think the Senator makes a very strong case, and we would certainly give every consideration to this matter in conference.

Mr. DOLE. I thank my distinguished colleague.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make a technical correction on page 24 of the bill at line 6 by deleting the word "for" and inserting in lieu thereof "or."

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield to me?

Mr. JOHNSTON. I yield to the distinguished majority leader.

(Unanimous-consent orders for tomorrow are printed later in today's RECORD.)

Mr. JOHNSTON. Mr. President, I ask unanimous consent that the previous unanimous-consent request relative to technical correction on the bill on page 24 be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1647

Mr. JOHNSTON. Mr. President, I have a technical amendment at the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Louisiana (Mr. JOHNSTON) proposes unprinted technical amendment numbered 1647:

On page 24, line 6,

Strike "for" and insert "or".

Mr. JOHNSTON. Mr. President, this is a technical amendment that does precisely the same thing as the previous orally unanimous-consent request, and I ask for its consideration and yield back the remainder of my time.

The PRESIDING OFFICER. Is all time yielded back on both sides?

Mr. MARK O. HATFIELD. I yield back all our remaining time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Louisiana.

The amendment was agreed to.

Mr. JOHNSTON. Mr. President, I would hope we can move on to third reading at this point.

Mr. WALLOP. Mr. President, I ask indulgence. I know we have been here a long time. I have an unprinted amendment I wish to bring up and discuss with the managers of the bill.

Mr. JOHNSTON. Very well. I know the Senator will be eloquent but brief.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. WALLOP. The Senator is always brief if not eloquent.

UP AMENDMENT NO. 1648

(Purpose: To require compliance with Senate Resolution 284, 95th Congress, with respect to certain national water resources management policies)

Mr. WALLOP. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wyoming (Mr. WALLOP) for himself and Mr. MELCHER, proposes unprinted amendment numbered 1648.

Mr. WALLOP. Mr. President, I ask

unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 26, after line 3, insert the following:

SEC. 502. No funds appropriated by this Act shall be available to implement any national water resources management policies announced on or after June 6, 1978, or to enforce any regulation to carry out such policies, if such policies would—

(a) impose additional burdens on recipients of municipal, agricultural, or industrial water supply from Federal projects through the revision of general contract conditions or procedures; or

(b) impose additional burdens on recipients of Federal grant or loan assistance for the development of water supply or treatment works through the revision of general program conditions or procedures,

unless the procedures relating to such policies and such regulations set forth in Senate Resolution 284, 95th Congress, agreed to October 5 (legislative day, October 4), 1977, have been complied with.

On page 25, line 18, strike out "PROVISION" and insert "PROVISIONS".

Mr. WALLOP. Mr. President, the amendment which I offer with the Senator from Montana (Mr. MELCHER) seeks only to implement the provisions of Senate Resolution 284, which was agreed to on October 5, 1977, by providing that funds appropriated by this act will not be used for certain contrary purposes.

Senate Resolution 284 expressed the serious concern of the Senate that water resources policies were being developed and implemented without congressional concurrence, and without review by the States, which would be so seriously affected. Since Senate Resolution 284 was agreed to, the President's water policy study has covered considerable ground. That study culminated in the President's policy statement of June 6, 1978. It was generally conceded that the lack of specificity in the statement precluded meaningful comment.

But on July 12, 1978, the President issued no fewer than 13 directives to the heads of executive departments and agencies directing them to implement various portions of the water policy. Most of the actions which these directives order do not violate the spirit of Senate Resolution 284. However, a few seek to immediately implement water policies which will have a direct effect on all those who contract for water from Federal facilities, or who are or will be dependent on Federal grant or loan assistance for water supply and treatment works. Those directives which seek to immediately implement policies of this nature directly violate the spirit of Senate Resolution 284.

Since the passage of Senate Resolution 284, we have not been silent on this issue. On June 23, 1978 I joined 18 of my collegues in cosigning a letter to the President initiated by the distinguished Senator from Colorado, (Senator HART), which stated in part:

The establishment of a new national water resources policy hold both promise and problems for virtually every region of the United States. Before implementation, it should be subject to rigorous scrutiny and consideration. Therefore, the Senate took a clear position on the need for thorough review and Congressional involvement when it unanimously passed Senate Resolution 284 on October 5, 1977.

As participants in the Senate Western Coalition, we respectfully urge you to respect this sentiment and to refrain from implementing new water policies and procedures until Congress and the States have had the opportunity to consider their effect thoroughly and comment on them.

The President's response to our letter, was preceded by a full 2 weeks by his directives which seek to immediately implement water policies which will directly affect the citizen of every State.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter dated June 23, 1978, to the President, signed by Senators HASKELL, LAXALT, MCGOVERN, DOMENICI, STEVENS, HART, CRANSTON, MELCHER, CANNON, PAUL G. HATFIELD, YOUNG, MCCLURE, GRAVEL, HAYAKAWA, WALLOP, BURDICK, GARN, DECONCINI, and CHURCH; and a letter of July 26, 1978, to me from Stuart Eizenstat, Assistant to the President for Domestic Affairs and Policy.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., June 23, 1978.

Hon. JIMMY CARTER,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Last year, you initiated a process for a comprehensive review of Federal water policy, under the chairmanship of Secretary Cecil Andrus. A number of Federal agencies were involved in that process, together with state and local officials from the states that we represent. This process culminated very recently with your statement to Congress outlining many proposed changes to the Federal government's water programs.

We believe it is imperative for the future objective consideration of the national water policy that you clearly state that your opposition to water projects which the House of Representatives has voted to fund in fiscal year 1979 is in no way based on the proposed new policy and, further, that no effort will be made to delete water projects based upon the proposed water policy until full Congressional review is provided.

The proposed new water policy is intended to meet objectives which many of us have supported and worked toward for years. The goals of improved planning and efficient management of Federal water resource programs, enhanced Federal-state cooperation in resource planning, increased attention to environmental quality, and appropriate water conservation programs have been priorities of Westerners for many years.

The establishment of a new national water resources policy holds both promise and problems for virtually every region of the U.S. Before implementation, it should be subjected to rigorous scrutiny and consideration. Therefore, the Senate took a clear position on the need for thorough review and Congressional involvement when it unanimously passed Senate Resolution 284 on October 5, 1977. The sense of the Senate, expressed in that resolution, is that:

"No new national water resources management policy shall be implemented without Congressional concurrence, and no proposed regulations for such a policy shall take effect for a period of six calendar months, during which Congress is in session, from the time of publication of proposed regulations in the Federal Register and of notification by the Executive Branch of such proposals to the Congress."

As participants in the Senate Western Coalition, we respectfully urge you to respect this sentiment and to refrain from implementing new water policies and procedures until Congress and the states have had an opportunity to consider their effect thoroughly and comment on them.

Sincerely,

Floyd K. Haskell, Paul Laxalt, George McGovern, Pete V. Domenici, Ted Stevens, Gary Hart, Alan Cranston, John Melcher, Howard W. Cannon, Paul Hatfield, Milton R. Young, James A McClure, Mike Gravel, S. I. Hayakawa, Malcolm Wallop, Quentin N. Burdick, Jake Garn, Dennis DeConcini, Frank Church.

THE WHITE HOUSE,
Washington, July 26, 1978.

Hon. MALCOLM WALLOP,
U.S. Senate,
Washington, D.C.

DEAR SENATOR WALLOP: On behalf of the President, thank you very much for your letter of June 23 concerning water policy and water projects. In particular, your letter refers to Senate Resolution 284 of October 5, 1977, which proposes a six-month period before water policy regulations take effect and in general Congressional concurrence for the water resources policy.

The letter further requests that the President's position on water project funding in fiscal year 1979 not be based on the new water policy.

The water policy message does not initiate a package of unilateral actions. Rather, it is a combination of general policy, legislative proposals and directives to administrative agencies to initiate improvements in their water-related programs, a few of which involve regulations. The water policy also does not propose any new regulatory program for water management.

Each of the initiatives was based on careful analysis and extensive consultation with the Congress, the states, and the public. Many of the initiatives will require many months of further work and analysis for complete implemetation. For example, the legislative items will of course be handled on a timetable adequate for deliberate Congressional consideration. Another major portion of the water policy—improving the application of the Principles and Standards—will take place over the next twelve months, and will include public input as well as extensive interagency analysis. Thus, no one blanket timetable is appropriate for the entire water policy, yet the entire effort has been geared to maximizing Congressional and public involvement, while assuring that needed improvements are made in a reasonable period of time.

One of the parts of the water policy which has been implemented already is the use of rational and reasonable criteria for selecting new water project construction starts for the President's fiscal year 1979 budget. No new starts had been proposed by a President for 4 years. As he announced in his January budget submission, the President wanted to break that log-jam, but only in the context of the water policy study. Thus, the criteria, which were widely discussed before being announced on June 6, were necessary in order for the President to make this positive step in supporting new water projects, rather than continuing to oppose new starts, or worse, having no basis to determine the best allocation of scarce budget resources.

The President undertook last year a specific project-by-project analysis before initiating the overall water policy review. On the basis of that extensive analysis, he recommended that 18 water projects be deleted from the fiscal year 1978 budget, a recommendation partially adopted by the Congress last year. The water policy study and the gathering of additional information on

several of these projects has uncovered no information which would change the judgment made last year by the President and the Congress on the 9 projects deleted and the 1 project to be terminated after finishing a small segment. The President's fiscal year 1979 budget reflects that fact.

We look forward to working with you and your colleagues in acting on and implementing the initiatives announced in the President's water policy message.

Sincerely,

STUART E. EIZENSTAT,
Assistant to the President for Domestic Affairs and Policy.

Mr. WALLOP. Senate Resolution 284, and thus this amendment, does not seek to preempt or preclude any new national water policy initiatives of the administration, but only seeks to insure proper imput and consideration by the States and Congress before they are implemented with the effect of law.

My amendment only seeks to deny funding for implementary of certain of the policies which have been announced. It would only affect those policies which seek to systematically increase the burdens of those who are supplied with water from Federal projects or seek Federal loan and grant assistance. Changes in policies such as these are the constitutional prerogatives of Congress, and deserving of State review before implementation.

Mr. President, we have made this amendment as tight and as narrow as we can to address two very specific parts which concern us greatly. It is in spirit and in keeping with the concerns that this Senate has already expressed itself upon.

Mr. JOHNSTON. Mr. President, I am very much in agreement with the thrust of the amendment of the distinguished Senator from Wyoming. It is, in my judgment, the responsibility of this Congress to set national water policy, and not the responsibility of the Executive. That policy should be set by this body and by the House of Representatives meeting together.

I also agree that the thrust of the President's policy insofar as it has been announced is unwise and should not be implemented.

My only disagreement with the distinguished Senator's amendment is that this is, in my view, not the proper time and place to legislate with respect to that water policy. This is, after all, an appropriation bill, and it contains many greatly needed water projects across the country.

So the two reasons principally why I would urge the Senator not to pursue the amendment at this time—and I say that as one who believes his amendment expresses not only my sentiments but the sentiments of the majority of the Members of the Senate—are, first of all, this is an appropriations bill and we ought to consider this in another light.

Second, I think this would be a very heavy straw that could break the camel's back, and surely not only insure but invite and insist on a veto. We do not want to do that because we have got so much in this bill that is essential for the good of the country.

So I urge the Senator to withdraw his amendment and bring it back on another day and on another vehicle, and I think he will get wide support not only from this Senator but from other Senators on our committee and in this body.

Mr. WALLOP. Mr. President, before I withdraw it, I would say that I recognize there is a point that, perhaps, can be raised against it on the basis that the distinguished Senator from Louisiana states.

On the other hand, the amendment does seek to go rather directly to how the money that is being appropriated is spent, perhaps spent for the very projects the Senator is talking about that are so sorely needed.

I am more persuaded by the Senator's argument that the amendment might cause a veto of the bill, which contains funds for some needed projects which I support, than I am by the legislative argument that the Senator raises.

I am really very concerned about policies which are not well thought out—we had hearings on them this morning. They were just suddenly launched. They were not even particularly well-defended or particularly well-described or particularly knowledgeably described by those whom the administration sent up here to defend them.

In spite of the fact that it is a significant matter to the entire country—and the chairman of the Water Resources Council is, in fact, the Secretary of the Interior—Secretary Andrus did not even dignify us with his presence. So I wonder if maybe this is not the moment and the time to bring this up.

Mr. JOHNSTON. Mr. President, if the Senator will yield, I think the appropriate thing to do, particularly in view of the hearings this morning, would be to report an urgent joint resolution which, I think, would be considered in this body very promptly and probably be on the President's desk long before this bill would be, and I would urge him to do so. It is not because of opposition from anybody in this body that I know anything about to the Senator's amendment that I ask him to withdraw it, but simply for the reasons stated.

I would also urge him to report that joint resolution from his committee promptly, and I think he will receive favorable consideration.

Mr. WALLOP. Well, Mr. President, in light of straws on the camel's back, and the persuasive argument raised on that level by the distinguished Senator from Louisiana, I am persuaded to withdraw the amendment, but not the logic of the moment and the time, and the necessity for this body and Congress to act immediately on these affairs.

Mr. President, I ask unanimous consent that I may be permitted to withdraw the amendment.

The PRESIDING OFFICER. The Senator has that right and the amendment is withdrawn.

Mr. JOHNSTON. Mr. President, I thank the distinguished Senator from Wyoming for withdrawing his amendment and for a very strong case made.

Mr. President, I hope we can proceed to third reading.

Mr. GRIFFIN. Mr. President, will the Senator from Louisiana allow me a few minutes then we will be ready to go to third reading?

Mr. JOHNSTON. Mr. President, I would yield to the distinguished Senator. How many minutes does he wish?

Mr. GRIFFIN. Three minutes.

The PRESIDING OFFICER. The Senator from Michigan may procced for 3 minutes.

Mr. GRIFFIN. Mr. President, on Saturday morning I will be in the upper peninsula of Michigan in Grand Marais, where there is great concern about the problem of repairing the deteriorating pile dike in their harbor.

On July 14, 1978, I directed a letter to Gen. J. W. Morris, Chief of the Army Corps of Engineers. I ask unanimous consent that this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., July 14, 1978.

Lt. Gen. J. W. MORRIS,
Chief of Engineers, Department of the Army, Washington, D.C.

DEAR GENERAL MORRIS: As I understand, your office recently disapproved a recommendation by your District and Chicago Regional Offices that $3.5 million be made available under the Corps' "Major Rehabilitation Program" for repair of the severely dilapidated pile dike at Grand Marais Harbor in Michigan's Upper Peninsula. This is disappointing news that has potentially tragic consequences for residents and tourists in Northern Michigan. I strongly urge you to reconsider your decision.

As you must know, Grand Marais Harbor is the only small boat refuge along a treacherous 90-mile stretch of southern Lake Superior shoreline stretching from Sault Ste. Marie to Munising. The Harbor is a vital link in the Great Lakes chain.

Unfortunately, the Corps has failed to provide sufficient maintenance and repair work on the pile dike—which was originally constructed in 1895—and it has been allowed to deteriorate to an alarmingly dangerous point. This, despite the fact that repairs have been recommended as necessary since the early 1950s. Due to this situation, the Harbor now poses serious safety hazards for boaters and fishermen. Needless to say, this has had a depressing effect upon tourism and the economy of the area.

In your letter of disapproval, you indicate that the proposed work cannot be justified on the basis of current "commercial need." I would call to your attention the fact that the community of Grand Marais derives its very livelihood from tourism and fishing; the commerce of Grand Marais is tourism. For the Corps to hang its decision upon a rigid, narrow reading of the term "commercial need," while the economic viability and safety of a community is threatened by inaction, is a dangerous injustice.

Further, I believe that—in view of the history of neglect of this Harbor—the Corps has an affirmative responsibility. For almost 30 years the Corps has recognized that repairs to the dike have been needed. If the repairs had been made earlier, they could have been done at a relatively small expense.

I urge you in the strongest term to reconsider your decision and to allow this important work to go forward.

With best wishes, I am

Sincerely,

ROBERT P. GRIFFIN,
U.S. Senate.

Mr. GRIFFIN. I regret that as of this date—almost 4 weeks later—this letter has not even been acknowledged, much less answered by the Chief of Engineers. But, I do wish to thank the Committee

on Appropriations—and particularly the Public Works Subcommittee—for responding to a request I made by letter to the committee asking for help on the Grand Marais Harbor project.

At page 85 of the report it refers to the $795 million appropriation for operation and maintenance of projects already constructed under title II of the bill. It includes this language:

The increase recommended is sufficient to provide for the most critical needs expressed to the Committee. The attention of the Corps of Engineers is directed specifically to the following projects in need of maintenance and for which the Committee has received testimony and funding requests:

Then among the specific projects mentioned is Grand Marais Harbor in the upper peninsula of Michigan.

I am hopeful that, in addition to the letter I have directed to the Chief of Engineers, this direction on the part of the committee will be heeded by the Corps and that the work that is so desperately needed up in Grand Marais can be started at the earliest possible moment.

Mr. President, I ask unanimius consent that the excerpt from the committee report to which I referred be printed.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

OPERATION AND MAINTENANCE, GENERAL

Appropriations, 1978	$745,370,000
Budget estimate, 1979	750,500,000
House allowance	795,500,000
Committee recommendation	795,500,000
Comparison:	
Budget estimate	+45,000,000
House allowance	

The Committee recommends $795,500,000, the same as the House allowance, which is $45,000,000 over the budget request.

The funds provided are for maintenance and operation of projects already constructed so full value can be obtained from the public's prior investment in them. In fiscal year 1979, the Corps of Engineers will operate and maintain 218 locks and dams, 273 flood control reservoirs, 71 multi-purpose projects with power, and about one fourth—some 270—of the completed channels and harbors.

In accord with the long-standing policy of the Committee, no specific allocations to individual projects are recommended. Such specific allocations would impede the corps' ability to adjust to continuously changing needs. Only if the corps' financial flexibility to respond to emergencies and other unanticipated urgent requirements is preserved can the Chief of Engineers carry out his responsibility to perform the O. & M. work of greatest overall importance to the Nation.

The increase recommended is sufficient to provide for the most critical needs expressed to the Committee. The attention of the Corps of Engineers is directed specifically to the following projects in need of maintenance and for which the Committee has received testimony and funding requests. The Chesapeake and Delaware Canal; Delaware River, Marcus Hook and Mantua anchorages; New Haven Harbor, Wilmington Harbor; Indian River Inlet; the Ohio River navigation channel; Mispillion River; Kanawha River; Summerville Lake; Sutton Lake; Tygarts Lake; Bluestone Lake; Marmet Locks; Grand Marais Harbor; and Houma Navigation Canal. These are in addition to the items already brought to the attention of the corps and adequate funds to remedy the deficiencies are to be allocated to the field offices for these items also.

Mr. GRIFFIN. I thank the chairman very much.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. PROXMIRE. Mr. President, I want to take this opportunity to thank the distinguished floor manager of the bill, Senator JOHNSTON, for the very good job he has done in his first year as chairman of the Senate Public Works Appropriations Subcommittee. I also commend the distinguished Senator from Oregon (Mr. MARK O. HATFIELD) for his fine work. The bill as reported represents a 3-percent cut in the amount appropriated in fiscal year 1978 for energy and water development. It cuts 2 percent from the amount appropriated by the House of Representatives for fiscal year 1979.

I am particularly gratified by the committee's favorable action on my requests for Corps of Engineers' activities in the State of Wisconsin. The Senate bill provides $840,000 for four Wisconsin projects that I supported, including $500,000 in construction funds for an outstanding nonstructural flood control program at Prairie du Chien. I have been an enthusiastic supporter of the Prairie du Chien relocation project because I think it will demonstrate to the Nation that the nonstructural approach to flood control can be a cost-effective and superior alternative to the traditional structural approach.

The committee also accepted my request to cut $1 million from the House bill for further studies of the La Farge Dam project in Wisconsin. The La Farge project has been studied and restudied. It is a bad project. It is environmentally unacceptable and economically unsound. I very much appreciate the committee's cooperation in eliminating these funds. By supporting my request, the committee has appropriated $840,000 for four good projects and eliminated $1 million for one bad project for a net savings of $160,000 in the Wisconsin column. A good deal all around.

I wish that I could vote in favor of the public works appropriations bill for the first time in many years. The fiscal year 1979 bill is under the House allowance, under the budget, and under the appropriations for fiscal year 1978. Unfortunately, although the bill is an improvement over prior year bills, it nonetheless appropriates millions of dollars for unnecessary water resource development projects, projects that are neither cost-effective nor compatible with environmentally acceptable uses of our natural resources.

At first glance it appears that the committee has drastically cut funding for Corps of Engineers and Bureau of Reclamation projects. But a careful look shows that the wide discrepancy between the budget request and the committee recommendations results from the committee's decision to continue funding water projects on an annual incremental basis rather than providing full upfront money when construction is initiated.

The administration requested full funding for all 26 new project starts recommended by the President for fiscal year 1979. This approach was designed to encourage Congress to recognize the enormous long-term cost of water projects from the beginning. The committee however, chose to continue the traditional practice of funding these projects year by year. Thus, in order to get an accurate comparison of the committee recommendation with the budget, the administration's request must be adjusted to reflect only the fiscal year 1979 increment for new project starts. Once that is done, we find that the Senate bill as a whole is $400.5 million under the budget instead of $919.8 million. The additional $519.3 million in water project "cuts" from the Corps of Engineers and Bureau of Reclamation will just be appropriated in future years instead of in fiscal year 1979. Viewed in this light we see that the lion's share of the committee bills budget cuts are not in water projects, but in the Department of Energy. In fact, as the small print in footnote No. 3 on page 67 of the committee report indicates, the Corps of Engineers' construction appropriation is $441 million under the budget only if we are willing to compare apples with oranges, full funding with incremental funding. On an annual incremental basis, the corps construction money in the committee bill is actually $23 million over the budget request.

Among the Corps of Engineers and Bureau of Reclamation projects funded in this bill are six particularly disastrous water resource developments that were included on President Carter's 1977 "Hit List":

Bayou Bodcau, Louisiana.
Yatesville Dam, Kentucky.
Meramec Park Dam, Missouri.
Narrows Unit Dam, Colorado.
Savery-Pot Hook Dams, Colorado.
Fruitland Mesa Dam, Colorado.

Report language also directs the expenditure of funds from within available appropriations to restudy alternatives for another hit list project, Oklahoma's Lukfata Lake.

Mr. President, I know that many Senators and Congressmen have vigorously defended these and other projects against the administration's efforts to get rid of them. I can understand that reaction. One of the original hit list projects was a Corps of Engineers dam and lake program in my own State of Wisconsin. I know as well as anyone can the pressures that are brought to bear to preserve these projects, no matter how high the cost, how low the benefit/cost ratio or how great the environmental damage that results. But unless more of us are willing to make the hard economic choices, we can never hope to curb the inflationary tides that threaten to continue to reduce America's standard of living. We are going to have to explore environmentally acceptable alternatives to traditional flood control approaches if we hope to maintain the ecological quality of our national life.

I am not going to try to amend the Public Works Appropriations bill to eliminate funds for these particularly bad projects. It is clear to me that such an amendment would stand absolutely no chance of passage and that the Sen-

ate could be tied up for days as we argue back and forth on every little detail of each one of these items. But I do think that now is an appropriate time to remind the American people why it is that the administration wants to stop funding these projects. And it may be helpful to my colleagues, when the time comes, in understanding why the President chose to veto this appropriations bill.

The hit list projects funded in this bill will cost the American people nearly $20 million in fiscal year 1979. By the time the projects are completed, if everything goes well, the total cost will be nearly one-half billion dollars. Things rarely go that well. The cost overrun on the Wisconsin hit list project was more than 100 percent. These projects, if completed, will probably cost the taxpayers nearly $1 billion before they are completed.

Mr. President, I ask unanimous consent that a brief summary of the administration's objections to each of these so-called hit list projects be printed at this point in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

BAYOU BODCAU AND TRIBUTARIES (CORPS OF ENGINEERS, LOUISIANA)

Project description:
Levees 57 miles long and channelization of Flat River for 11.6 miles to increase agricultural production of about 24,000 acres.
Major benefits claimed:
Flood protection, 86 percent.
Unemployment, 14 percent.
Benefit/cost ratios:
Remaining costs and benefits and current rate (6⅜ percent): 1.12.
Total authorized rate (3¼ percent): 1.2.
Financial data (in millions):
Estimated Federal cost: $14.5.
Allocated to date: $4.5.
Estimated local share: $3.4.
Allocated to date: $0.3.
Total project is 27 percent complete including lands.
Construction is 31 percent complete.
Factors in decision:
Only 60 landowners will benefit, at a federal investment of $240,000 each.
The project will eliminate 1,560 acres of wildlife habitat and 11.6 of fishing streams; the annual benefits in excess of project costs are inadequate to offset the environmental effects.
President's recommendation:
Delete funding and deauthorize project.

YATESVILLE LAKE

(Corps of Engineers, Kentucky)

Project description:
Rockville dam on tributary of Big Sand River, primarily for recreation; other purposes include water pollution dilution and flood control.
Major benefits claimed:
Recreation, 37 percent.
Flood control, 25 percent.
Water quality control, 22 percent.
Unemployment, 16 percent.
Benefit/cost ratios:
Remaining benefits and costs at current rate (6⅜ percent): .99.
Total at authorized rate (3¼ percent): 1.2.
Financial data (in millions):
Estimated Federal cost: $53.6.
Allocated to date: $10.9.
Estimated local share: $3.3.
Allocated to date: 0.
Total project is 19 percent complete.
Construction is 17 percent complete.
Factors in decision:
Major benefit is flatwater recreation, yet water quality problems could jeopardize this use; relative need for additional flatwater recreation has been questioned.
Relocation of 93 cemeteries, 213 dwellings, 6 churches and 4 commercial buildings would be required.
Water quality problems anticipated from operating oil wells, oil spills and overflows, industrial development and domestic waste.
Project will inundate 6000 acres, causing loss of fish and wildlife habitat.
The project is economically marginal.
President's recommendation:
Delete funding and deauthorize project.

MERAMEC PARK LAKE

(Corps of Engineers, Missouri)

Project description:
One million acre-foot impoundment on the Meramec River about 65 miles southwest of St. Louis, to provide full flood protection for 11,900 acres of agricultural and urban land and partial protection for 20,000 acres more; additional purposes are flatwater recreation and future water supply.
Major benefits claimed:
Flood control, 42 percent.
Recreation, 25 percent.
Water supply, 12 percent.
Benefit/cost ratios:
Remaining benefits and costs at current rate (6⅜ percent): 1.5.
Total at authorized rate (3¼ percent): 1.9.
Financial data (in millions):
Estimated Federal cost: $124.0.
Allocated to date: 35.3 (through fiscal year 1977).
Estimated local share: 0.
Allocated to date: 0.
Total project is 28 percent complete including lands.
Construction is 22 percent complete.
Factor in decision:
Recreation is 25 percent of claimed benefits, yet heavily used natural river area would be inundated, including 75 miles of Ozark streams, scenic caves, including one of the nation's most beautiful caves, forest habitat, archaeological sites and fisheries; nearly half of the claimed recreation benefits are for "sightseeing"; ample flatwater recreation exists in the area.
Lake will inundate 12,600 acres, about half of which is prime farmland, to fully protect only 11,900 downstream acres of land.
Habitat of two endangered species would be adversely affected.
President's recommendation:
Delete funding and deauthorize project.

NARROWS UNIT

(Bureau of Reclamation, Colorado)

Project description:
Earthfill dam on South Platte River to provide supplemental irrigation water to 287,000 acres.
Major benefits claimed:
Irrigation, 56 percent.
Recreation, 35 percent.
Benefit/cost ratios:
Remaining costs and benefits at current rate (6⅜%): 0.9.
Total at authorized rate (3¼%): 1.4.
Financial data (in millions):
Total estimated Federal cost: $145.7.
Allocated to date: 6.5.
Estimated local share: .01.
Allocated to date: 01.
Total project is 5 percent complete.
Construction is 4 percent complete.
Irrigation investment per acre: $291.
Factors in decision:
Reservoir would dislocate 642 people and their community.
Water quality problems in reservoir might negate recreation benefits.
Safety/seepage issues remain unresolved; the right abutment of the dam is located on sand and gravel.
Over 40 historical and archaeological sites would be destroyed.
15,000 acres of agricultural and wildlife lands would be regularly inundated by the reservoir; 15 miles of free-flowing river would be lost.
Flood control benefits are questionable.
President's recommendation:
Delete funding pending re-evaluation of project, including study of the alternative of a groundwater recharge system, determination of the effects of the project on the Platte River system, resolution of water quality issues, resolution of the safety and seepage questions, and re-evaluation of the claimed flood control benefits.

SAVERY-POT HOOK

(Bureau of Reclamation, Colorado)

Project description:
2 dams and conveyance systems to supply irrigation water on Little Snake River.
Major benefits claimed:
Irrigation, 95 percent.
Benefit/cost ratios:
Remaining Costs and Benefits at current rate (6⅜ percent): 0.4.
Total Cost and Benefits at authorized rate (3⅛ percent): 0.7.
Financial data (in millions):
Estimated Federal Cost: $75.8.
Allocated to Date: 4.1.
Estimated Local Share: 0.
Irrigation investment per acre: $2,563.00 ($4,008 on a full-service equivalency basis).
Total project is 5 percent complete.
Construction is 6 percent complete.
Factors in decision:
The benefit/cost ratio at both the current and authorized rate is below unity.
The project as planned will benefit only 106 existing farms, at an average irrigation investment per farm of almost $700,000.
High dissolved salt concentrations in project return flows would increase existing water quality problems downstream in the Colorado River.
Project lands are at 6,500 feet altitude, and thus have a short growing season.
Approximately 20,100 acres of wildlife habitat would be modified or eliminated, affecting deer, elk, antelope and sage grouse. While these losses are substantially mitigated by development of additional habitat, significant losses in sage grouse and antelope population would occur.
There is a concern that energy developers will build project for a coal development use if federal government does not build it for agriculture.
President's recommendation:
Delete funding and deauthorize project.

FRUITLAND MESA

(Bureau of Reclamation, Colorado)

Project description:
Soap Park Dam and conveyance system to provide irrigation to 11,940 acres of dry farmed land and supplemental irrigation to 6,310 acres.
Major benefits claimed:
Irrigation, 93 percent.
Benefit/cost ratios:
Remaining Costs and Benefits at current rate (6⅜ percent): 0.3.
Total Costs and Benefits at authorized rate (3⅛ percent): 0.5.
Financial data (in millions):
Estimated Federal Cost: $87.9.
Allocated to Date: $5.4.
Estimated Local Share: $0.
Irrigation investment per acre. $4,615.00.
Total project is 6 percent complete.
Construction is 7 percent complete.
Factors in decision:
Benefit/cost ratio at both the current and authorized rate is below unity.

The irrigation investment per acre is very high at $4,615, of which only $208 will be repaid by irrigators.

The project area is farmed or ranched by only 69 landowners; this amounts to an irrigation investment per landowner of about $1.2 million.

Increased salinity from irrigation return flows would decrease water quality in the lower Colorado River Basin.

The project would convert 12,000 acres of rangeland to irrigated cropland, inundate 584 acres of land and 4.5 miles of good fishing stream.

The lands benefitted by the project are located at high altitudes—six to eight thousand feet—with a short growing season.

President's recommendation:

Delete funding and deauthorize project.

LUKFATA LAKE

(Corps of Engineers, Oklahoma)

Project description:

176-foot high dam on Glover Creek 17 miles northwest of Broken Bow in eastern Oklahoma, to provide agricultural flood protection and water supply.

Major benefits claimed:

Flood control, 53 percent.

Water supply, 36 percent.

Benefit/cost ratios:

Remaining costs and benefits at current rate (6⅜ percent): 1.02.

Total at authorized rate (3¼ percent): 1.3.

Financial data (in millions):

Estimated Federal cost: $31.5.

Allocated to date: 0.2.

Estimated local share: 0.

Allocated to date: 0.

Total project is 6 percent complete including lands.

Physical construction has not yet started.

Factors in decision:

Economically marginal.

Inundates 1,680 acres of wildlife habitat and bottomland hardwood forest, considered of unusually high natural value.

Provides critical habitat for proposed threatened species of fish.

EPA indicates severe water quality problems in reservoir.

Most of "water supply" benefits would go to one catfish farm, and several potential catfish farms; remainder would go to future supply for a small town with questionable growth potential.

Glover Creek is last major free-flowing small mouth bass stream in the Oklahoma Ouachita Mountains.

President's recommendation:

Delete funding and deauthorize project.

Mr. PROXMIRE. Mr. President, I believe that throwing away scarce tax dollars on water resource development schemes like these is unconscionable at a time when we must do all that we can to promote a sound fiscal policy in every aspect of Federal spending.

Therefore, I have voted against the Public Works Appropriations Act for fiscal year 1979.

● Mr. HOLLINGS. Mr. President, the Appropriations Committee has supported continuing the current fiscal year 1978 program at Barnwell through fiscal year 1979. I would like to thank the chairman and members of the committee for their support.

As you are probably aware, after the President decided to defer commercial reprocessing indefinitely, my concern was to insure that possible alternative uses of this major plant and its valuable advanced equipment and staff receive careful consideration. In particular, new policies on proliferation—resistant fuel cycles requires new research and development, and I wanted to see if Barnwell might be an appropriate and cost-effective place for such work. Thus, I supported the fiscal year 1978 program at Barnwell which provided $13 million for research on nuclear safeguards and alternative fuel cycles and $1 million for a 6-month Department of Energy study on the long-term optional uses of the Barnwell facility.

The DOE Barnwell nuclear fuels plant applicability study was submitted to Congress on April 11, 1978. The study concluded that it was not possible to make a policy decision on Barnwell until the completion of the 40 nation International Nuclear Fuel Cycle Evaluation (INFCE). Specifically, it stated:

Several more proliferation resistant reprocessing modes as well as various international, multinational and national ownership/management options might be applicable to the Barnwell Nuclear Fuel Plant (BNFP). The study concluded that the BNFP could be modified to reprocess uranium/plutonium in alternative operational modes that after improved proliferation-resistant features compared to conventional reprocessing.

However, until the INFCE, NASAD and any follow-on studies and international consultations are completed, it is not possible to determine whether, when, under what conditions or at what cost, any of these reprocessing alternatives might be undertaken in a manner that would be supportive of U.S. non-proliferation objectives.

The 40-nation INFCE was only in the planning stages when we voted the fiscal year 1978 appropriation for Barnwell, now it is not scheduled for completion until early 1980. The administration's understandable decision to delay its own decisionmaking until the completion of the INFCE leads me to support a fiscal year 1979 extension of the project program.

With the completion of the INFCE, both the administration and the Congress will be in a good position to judge whether Barnwell is the appropriate place to do it.

Continuing the fiscal year 1978 program at Barnwell through fiscal year 1979 is the right thing to do. The General Accounting Office agrees with my conclusion in a recent report entitled "An Evaluation of Federal Support of the Barnwell Reprocessing Plant and the Department of Energy's Spent Fuel Storage Policy." GAO concluded that Federal funding of short-term research activities at the Barnwell reprocessing plant should continue until the completion of the INFCE. This will keep the facilities and keep people available in the event the United States decides, as a result of the study, that some method of reprocessing is consistent with its nonproliferation objectives.

Therefore, the funding for Barnwell should be continued through fiscal year 1979.●

● Mr. STAFFORD. Mr. President, I would also add two further comments concerning this bill. I commend the committee for the additional sums it has recommended for hydropower studies. The retrofitting of power facilities at existing damsites will prove significant in meeting national energy demands. I testified for such an increase, and I commend the committee for including it.

Second, I would urge that the Senate conferees on this bill, in conference, accept the sum of $50,000 that was included in the House bill under the Corps of Engineers construction for the drift and debris removal program—section 220 of 1976 Water Resources Development Act. This program which includes cost sharing, will enable the corps and cities to improve the waterfront environment, just as the corps is now doing in New York City. While the authorization for section 202 expires at the end of 1979, I am confident that it will extend continuing a broader approach to a program that is otherwise limited to a few specified cities.●

● Mr. YOUNG. Mr. President, I want to express my support for the energy and water development appropriation bill as reported by the full committee. The chairman and ranking minority member of the subcommittee have devoted a great deal of time and careful attention to making this an excellent bill. The subcommittee held 37 hearing sessions, including 7 days of testimony from the general public.

This is a well-balanced, fiscally responsible bill. When the committee amendment is taken into account, the total amount of the bill is $10,108,144,900, which is $931,804,100 below the budget request. This amount is $233 million under the House bill, $332 million under the fiscal year 1978 appropriation, and only $27 million above the fiscal year 1977 appropriation.

Despite this restraint, this bill provides for the acceleration of research and development on nuclear energy and on alternative energy technologies and for the initiation of certain high-priority public works projects which were not in the budget and for continuation of others.

As occurs every year, there are many more worthwhile projects and programs available for funding in this bill than there are dollars to fund them. Some difficult decisions had to be made, and priorities had to be set and adhered to.

It is my firm opinion that the subcommittee chairman and ranking minority member have performed with distinction in a demanding situation, and that the bill as reported is fair, responsible, and deserving of our full support without further modification.●

● Mr. STAFFORD. Mr. President. I would like to inquire of the distinguished floor manager (Mr. JOHNSTON) if this legislation provides funds so that the Army Corps of Engineers can undertake an aquatic plant control program?

Mr. JOHNSTON. Yes, the committee bill includes $4,605,000 for such weed control work during fiscal year 1979, the same as in the House bill.

Mr. STAFFORD. Is it also correct that this money is available for use throughout the Nation, and could be allocated for use in Vermont and New York for the control of water chestnut, yellow floating heart, Eurasian milfoil, and other nuisance weeds creating problems on

Lake Champlain and other lakes in the area.

Mr. JOHNSTON. Yes, the Senator is correct.

Mr. STAFFORD. I thank my good friend from Louisiana for clarifying that point.●

Mr. JOHNSTON. Mr. President, I believe there are no further amendments. I suggest third reading.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendments to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, shall it pass? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Minnesota (Mrs. HUMPHREY), the Senator from South Dakota (Mr. ABOUREZK), the Senator from Mississippi (Mr. EASTLAND), the Senator from Alaska (Mr. GRAVEL), and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "yea."

Mr. STEVENS. I announce that the Senator from New York (Mr. JAVITS) is necessarily absent.

The result was announced—yeas 89, nays 5, as follows:

[Rollcall Vote No. 313 Leg.]

YEAS—89

Allen	Glenn	Metzenbaum
Anderson	Goldwater	Morgan
Baker	Griffin	Moynihan

NOT VOTING—6

Abourezk	Gravel	Javits
Eastland	Humphrey	Stennis

So the bill (H.R. 12928), as amended, was passed.

The title was amended so as to read:

An act making appropriations for energy and water development for the fiscal year ending September 30, 1979, and for other purposes.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of the Senate amendments to H.R. 12928.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON. Mr. President, I wish to first of all congratulate the Senate for its help and forbearance in bringing forward a very lean and tight bill that is in the spirit of proposition 13. It is $900 million less than the President's budget. It is $219 million less than the House bill. It is over $400 million less than last year's bill.

On the floor of the Senate we added a net of only some $2 million to this bill, which I think is some kind of record.

I would particularly like to thank and congratulate the distinguished ranking minority Member (Mr. MARK O. HATFIELD) for his most excellent teamwork in this matter.

We were helped by a staff of superb quality headed by Proctor Jones, David Gwaltney, and Gloria Butland and on the minority side by David Lohman and Cathy O'Connor. It is their great work that I think has made this bill possible.

Mr. President, I move to reconsider the vote by which that bill passed.

Mr. MARK O. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. JOHNSTON. Mr. President, I move that the Senate insist on its amendments, request a conference with the House on the disagreeing votes thereon, and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to and the Presiding Officer (Mr. METZENBAUM) appointed Mr. JOHNSTON, Mr. STENNIS, Mr. MAGNUSON, Mr. ROBERT C. BYRD, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. BURDICK, Mr. SASSER, Mr. MARK O. HATFIELD, Mr. YOUNG, Mr. CASE, Mr. SCHWEIKER, and Mr. BELLMON conferees on the part of the Senate.

Mr. MARK O. HATFIELD. Mr. President, will the Senator yield?

Mr. JOHNSTON. Yes, I yield.

Mr. MARK O. HATFIELD. Mr. President, I should like, first of all, to commend the Senator from Louisiana (Mr. JOHNSTON) on managing this bill. I only echo his remarks concerning the fact that there was this very extraordinary restraint demonstrated by the committee in holding this bill to its present level. I should think that that, in itself, is a feat that the new chairman of our subcommittee—which Mr. BENNETT JOHNSTON is—should take great credit for.

Also, Mr. President, I am very happy to comment and observe that this bill was managed in record time and that the Senate had its final vote before 6 o'clock. I think that is the first time that has occurred this week. I commend again the leader of the bill on this great accomplishment, which I think is equal to the accomplishment of getting the bill itself passed.

I also want to say that we have extraordinary staff on this committee. It is a great pleasure always to work with them and to be the cohort and companion in this labor with Senator JOHNSTON.

Mr. President, I thank the distinguished chairman.

Mr. BARTLETT. Mr. President, I thank the floor manager, the distinguished Senator from Louisiana, my good friend, and also my good friend from Oregon for the manner in which this was handled. I want to mention one small program in here, a dollarwise, that was very important to our State and particularly to congratuate my distinguished colleague from Oklahoma (Mr. BELLMON).

There was, in the House bill, $4 million—$3 million in land, $1 million in planning—to fulfill Public Law 94–423, for a Bureau of Reclamation project called McGee Creek. The wisdom of the committee and the Senate saw fit to put this up to full capacity of $6 million for land and $1 million for planning. The uniqueness of this program is that it virtually fulfills every single requirement that President Carter laid down. It would return almost total recovery of Federal costs, because it serves the rural areas of 10 countries for city water and rural water and the city of Oklahoma City. This takes care of human consumption and industrial use.

It had complete agreement from the rural interests, the urban environmentalists, industry, wildlife, and those interested in recreation. When we had the hearing on the authorization bill a year ago, one of the staff members who had attended many of these meetings said that this was the first time in his experience that a project of this kind, a reclamation project, had not one single person or single group objecting to it.

So I commend my distinguished senior colleague (Mr. BELLMON) for the very important role he played in this matter and on this bill.

Mr. ROBERT C. BYRD. Mr. President, this year Senator BENNETT JOHNSTON, the distinguished junior Senator from Louisiana, assumed the chairmanship of the Public Works Subcommittee of the Appropriations Committee and follows in the footsteps of that subcommittee's former chairman, Mr. STENNIS, who so ably steered this bill through the legislative process for many years.

The Subcommittee on Public Works, under the energetic leadership of the Senator from Louisiana, held 37 sessions of hearings in preparation for the fiscal 1979 appropriations bill. Extensive information was compiled with regard to the numerous programs and projects within the subcommittee's jurisdiction. The committee's recommendations, embodied in H.R. 12928, reflect an impressive understanding of energy matters and national water policy priorities.

I wish to congratulate Senator JOHNSTON and Senator HATFIELD of Oregon, the ranking minority member, as well as

all members of the subcommittee for their work on this bill.

Included in H.R. 12928 are the Appropriations Committee's recommendations for funding the Army Corps of Engineers and the Bureau of Reclamation—Department of the Interior—for the planning and construction of literally dozens of projects located throughout the country. The projects are of many types—dam construction, levee construction, riverbank erosion control, harbor repair and reconstruction. They serve many purposes: provision and protection of recreational areas, flood control, creation of hydroelectric power, improvement of waterway transportation facilities. Each of the many projects included in the bill has been carefully reviewed, each budget request studied. I think it is worth emphasizing that these projects result in lasting capital improvements to the communities where they are located and to surrounding areas.

The bill also provides for several independent agencies. I would like to comment briefly on one of these, the Appalachian Regional Commission. Established in 1965, the Commission works to advance the economic growth of the Appalachian region, which includes West Virginia and parts of 12 States. The effort is a cooperative one between the Federal and State Governments—a productive partnership arrangement. The Appalachian Regional Commission wisely concentrates its projects in areas where member States have decided that future growth and investment are probable. Careful study precedes policy decisions on where to invest the Commission's dollars.

These dollars have been wisely used to promote highway construction in order to provide access to markets, jobs, schools, and services. They have also been well used to improve health care information in the area.

Mr. President, in addition to addressing issues of local development, the bill provides funds for several crucial energy activities within the Department of Energy. These are primarily nonfossil fuel technology research, atomic weapons development programs, as well as policy and management programs.

There should be no doubt that a strong energy research effort is indispensable to our national well-being. The Department of Energy was in part created to coordinate Federal Government research activities, which are substantial. H.R. 12928 provides funds for solar energy research, aimed at perfecting the technology of extracting energy in a usable form from the Sun. Another potential source of plentiful energy is geothermal technology, which taps the heat of the Earth itself.

An unconventional fuel source being examined by the Department of Energy is biomass, which involves combustible material such as plant stalks, refuse, woodchips, and other matter. A more familiar source of power, hydroelectric, is being reexamined in this time of high energy prices with an eye toward the contribution which technological advances can make. Small hydro projects are being tested to determine if a more comprehensive construction program is justified.

Important work is being done in the nuclear field on a variety of fronts. Technology demonstration projects involving light water reactors have proved to be valuable for several years. Advanced work on fusion energy and other reactor concepts is also funded in this bill. These efforts are complemented by defense-oriented programs involving nuclear weapons and outer space systems. A strong technological base for these areas is a key element of our national security, as well as our future energy resources.

The Appropriations Committee expressed legitimate concern about the size and composition of DOE staff. The report accompanying the bill clearly indicates the intent of the committee that DOE must better coordinate and consolidate its activities so that full value is realized for each and every employee of the department.

I wish to compliment Mr. JOHNSTON, Mr. HATFIELD, and the members of the Public Works Subcommittee for their work on this bill.

TUITION TAX CREDIT ACT OF 1978

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to consideration of H.R. 12050, which the clerk will state.

The assistant legislative clerk read as follows:

A bill (H.R. 12050) to amend the Internal Revenue Code of 1954 to provide a Federal income tax credit for tuition.

The Senate proceeded to consider the bill which had been reported from the Committee on Finance with an amendment to strike all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE; DECLARATION OF POLICY

(a) SHORT TITLE.—This Act may be cited as the "Tuition Tax Relief Act of 1978".

(b) DECLARATION OF POLICY.—The Congress hereby declares it to be the policy of the United States to foster educational opportunity, diversity, and choice for all Americans. Federal legislation should recognize the heavy financial burden now borne by individuals and families who must pay tuition to obtain the education that best serves their needs and aspirations—whether at the primary, secondary, or postsecondary level—and should provide some relief (as set forth in the amendments made by this Act). Such relief shall be available only to persons enrolled in bona fide educational institutions which fully comply with all applicable Federal and State laws and requirements, including civil rights provisions. The Congress finds that without such assistance the diversity and pluralism that constitute important strengths of the American education system will be diminished. The Congress finds that this assistance can appropriately be provided through the income tax structure with a minimum of complexity and governmental interference in the lives of individuals and families. The Congress further finds that the provision of such assistance in this manner fully complies with all provisions of the Constitution; that it does not constitute excessive governmental entanglement with religion; that is wholly secular in purpose and that such assistance will neither advance nor hinder religion. The primary purpose of this Act is to enhance equality of educational opportunity for all Americans at the schools and colleges of their choice.

SEC. 2. CREDIT FOR EDUCATIONAL EXPENSES

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting before section 45 the following new section:

"SEC. 44C. EDUCATIONAL EXPENSES.

"(a) GENERAL RULE.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this subtitle for the taxable year an amount equal to 50 percent of the educational expenses paid by him during the taxable year to one or more eligible educational institutions for himself, his spouse, or any of his dependents (as defined in section 152).

"(b) LIMITATIONS.—

"(1) MAXIMUM DOLLAR AMOUNT.—The amount of educational expenses taken into account under subsection (a) for any taxable year with respect to any individual may not exceed—

"(A) $500, in the case of educational expenses allocable to education furnished before October 1, 1980, and

"(B) $1,000, in the case of educational expenses allocable to education furnished after September 30, 1980.

The $1,000 limitation contained in subparagraph (B) for any taxable year shall be reduced by the amount of educational expenses described in subparagraph (A) which are taken into account for that taxable year.

"(2) CERTAIN PAYMENTS EXCLUDED.—

"(A) SECONDARY AND ELEMENTARY SCHOOL EXPENSES.—Educational expenses attributable to education at a secondary school (including a vocational secondary school) or elementary school shall not be taken into account under subsection (a) to the extent that they are—

"(i) paid or incurred before October 1, 1980,

"(ii) in excess of $500 for any taxable year, or

"(iii) attributable to education at an elementary or secondary school of a State educational agency (as defined in section 801(k) of the Elementary and Secondary Education Act of 1965 as in effect on January 1, 1978) or of a local educational agency (as defined in section 801(f) of such Act as in effect on such day) except for expenses attributable to education at a school or institution described in the last sentence of subsection (c)(5).

"(B) PART-TIME STUDENTS.—Educational expenses paid or incurred before October 1, 1980, with respect to any individual who is not a full-time student shall not be taken into account under subsection (a). Such expenses paid or incurred after September 30, 1980, with respect to any individual who is not at least a half-time student shall not be taken into account under subsection (a).

"(C) CERTAIN PAYMENTS INCLUDED.—For purposes of subparagraphs (A) and (B), amounts paid before October 1, 1980, for educational expenses allocable to education which is furnished on or after such date shall be treated as having been paid on such date.

"(D) FULL-TIME STUDENT.—For purposes of this paragraph, the term 'full-time student' means any individual who, during any 4 calendar months during the calendar year in which the taxable year of the taxpayer begins, is a full-time student at an eligible educational institution.

"(E) HALF-TIME STUDENT.—For purposes of this paragraph, the term 'half-time student' means any individual who, during any 4 calendar months during the calendar year in which the taxable year of the taxpayer begins is a half-time student (determined in accordance with regulations prescribed by the Secretary which are not inconsistent

with regulations prescribed by the Commissioner of Education under section 411(a)(2)(A)(ii) of the Higher Education Act of 1965 for purposes of part A of title IV of that Act as such Act was in effect on January 1, 1978) at an eligible educational institution.

"(3) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) shall not exceed the tax imposed by this chapter for the taxable year, reduced by the sum of the credits allowable under a section of this part having a lower number or letter designation than this section, other than the credits allowable by sections 31, 39, and 43.

"(c) DEFINITIONS.—For purposes of this section—

"(1) EDUCATIONAL EXPENSES.—The term 'educational expenses' means tuition and fees required for the enrollment or attendance of a student at an eligible educational institution, including required fees for courses. Such term does not include any amount paid, directly or indirectly for—

"(A) books, supplies, and equipment for courses of instruction at an eligible educational institution,

"(B) meals, lodging, transportation, or similar personal, living, or family expenses, or

"(C) education below the first-grade level, attendance at a kindergarten or nursery, or education above the baccalaureate degree level.

In the event an amount paid for tuition for fees includes an amount for any item described in subparagraph (A), (B), or (C) which is not separately stated, the portion of such amount which is attributable to such item shall be determined under regulations prescribed by the Secretary.

"(2) ELIGIBLE EDUCATIONAL INSTITUTION.—The term 'eligible education institution' means—

"(A) an institution of higher education;

"(B) a vocational school;

"(C) a secondary school; or

"(D) an elementary school.

"(3) INSTITUTION OF HIGHER EDUCATION.—The term 'institution of higher education' means an institution described in section 1201(a) or 491(b) of the Higher Education Act of 1965 (as in effect on January 1, 1978).

"(4) VOCATIONAL SCHOOL.—The term 'vocational school' means an area vocational education school (as defined in section 195(2) of the Vocational Education Act of 1963, as in effect on January 1, 1978) which is located in any State.

"(5) ELEMENTARY AND SECONDARY SCHOOLS.—The terms 'elementary school' and 'secondary school' mean any elementary or secondary school (as defined in subsection (c) and (h) of section 801 of the Elementary and Secondary Education Act of 1965 as in effect on January 1, 1978), which is privately operated, but only if it is—

"(A) operated in accordance with applicable State law, and

"(B) exempt from taxation under section 501(a) as an organization described in section 501(c)(3).

The terms 'elementary school' and 'secondary school' include facilities (whether or not privately operated) which offer education for individuals who are physically or mentally handicapped as a substitute for regular public elementary or secondary education.

"(6) MARITAL STATUS.—The determination of marital status shall be made under section 143.

"(d) Special Rules.—

"(1) ADJUSTMENT FOR CERTAIN SCHOLARSHIPS AND VETERANS BENEFITS.—

"(A) REDUCTION OF EXPENSES.—The amounts otherwise taken into account under subsection (a) as educational expenses of any individual for any taxable year shall be reduced (before the application of subsection (b)) by any amounts received with respect to such individual for the taxable year as—

"(i) a scholarship or fellowship grant (within the meaning of section 117(a)(1)) which under section 117 is not includible in gross income,

"(ii) an educational assistance allowance under chapter 32, 34, or 35 of title 38, United States Code, or

"(iii) a payment (other than a gift, bequest, devise, or inheritance within the meaning of section 102(a)) for educational expenses, or attributable to attendance at an eligible educational institution, which is exempt from income taxation by any law of the United States.

"(B) REDUCTION OF CREDIT.—The amount of the credit otherwise allowable under subsection (a) shall be reduced by any amounts received with respect to any individual for any taxable year under subpart 1 or 2 of part A of title IV of the Higher Education Act of 1965 or any successor statute. Amounts taken into account under this subparagraph shall not be taken into account under subparagraph (A).

"(2) TAXPAYER WHO IS A DEPENDENT OF ANOTHER TAXPAYER.—No credit shall be allowed to a taxpayer under subsection (a) for amounts paid during the taxable year for educational expenses of the taxpayer if such taxpayer is a dependent of any other person for a taxable year beginning with or within the taxable year of the taxpayer.

"(3) SPOUSE.—No credit shall be allowed under subsection (a) for amounts paid during the taxable year for educational expenses for the spouse of the taxpayer unless—

"(A) the taxpayer is entitled to an exemption for his spouse under section 151(b) for the taxable year, or

"(B) the taxpayer files a joint return with his spouse under section 6013 for the taxable year.

"(e) DISALLOWANCE OF CREDITED EXPENSES AS CREDIT OR DEDUCTION.—No deduction or credit shall be allowed under any other section of this chapter for any educational expense to the extent that such expense is taken into account (after the application of subsection (b)) in determining the amount of the credit allowed under subsection (a). The preceding sentence shall not apply to the educational expenses of any taxpayer who, under regulations prescribed by the Secretary, elects not to apply the provisions of this section with respect to such expenses for the taxable year.".

(b) LIMITATION ON EXAMINATION OF BOOKS AND RECORDS.—Section 7605 of such Code (relating to time and place of examination) is amended by adding at the end thereof the following new subsection:

"(d) EXAMINATION OF BOOKS AND RECORDS OF CHURCH-CONTROLLED SCHOOLS.—Nothing in section 44C (relating to credit for educational expenses) shall be construed to grant additional authority to examine the books of account, or the activities, of any school which is operated, supervised, or controlled by or in connection with a church or convention or association of churches (or the examination of the books of account or religious activities of such church or convention or association of churches) except to the extent necessary to determine whether the school is an eligible educational institution within the meaning of section 44C(c)(2).".

(c) EXPEDITED REVIEW OF CONSTITUTIONALITY OF EDUCATIONAL EXPENSE CREDIT.—

(1) CERTIFICATION OF QUESTIONS OF CONSTITUTIONALITY.—In any action brought in a district court of the United States, including an action for declaratory judgment or injunctive relief, concerning the constitutionality of any provision of section 44C of the Internal Revenue Code of 1954 (relating to credit for educational expenses) or any other provision of such Code relating to such section, the district court shall certify immediately all questions of constitutionality of such provision to the United States Court of Appeals for the circuit involved, which shall hear the matter sitting en banc.

(2) APPEAL TO SUPREME COURT.—Notwithstanding any other provision of law, any decision on a matter certified under paragraph (1) shall be reviewable by appeal directly to the Supreme Court of the United States. Such appeal shall be brought no later than 20 days after the decision of the Court of Appeals.

(3) EXPEDITED CONSIDERATION.—It shall be the duty of the Court of Appeals and of the Supreme Court of the United States to advance on the docket and to expedite to the greatest possible extent the disposition of any matter certified under paragraph (1).

(4) SEPARABILITY.—If any provision of section 44C of the Internal Revenue Code of 1954 (or any other provision of such Code relating to such section), or the application thereof to any person or circumstances, is held invalid, the remainder of the provisions of such section and the application of such provisions to other persons or circumstances, shall not be affected.

(d) DISREGARD OF REFUND.—Any refund of Federal income taxes made to any individual, and any reduction in the income tax liability of any individual, by reason of section 44C of the Internal Revenue Code of 1954 (relating to credit for educational expenses) shall not be taken into account as income or receipts for purposes of determining the eligibility of such individual or any other individual for benefits or assistance, or the amount or extent of benefits or assistance, under any Federal program of educational assistance financed in whole or in part with Federal funds.

(e) WITHHOLDING EXEMPTION.—For purposes of determining the number of withholding exemptions an individual is entitled to under section 3402(f) of the Internal Revenue Code of 1954, there shall not be taken into account, before October 1, 1980, any amount which may be allowable as a credit under section 44C of such Code.

(f) CONFORMING AMENDMENTS.—

(1) The table of section for subpart A of part IV of subchapter A of chapter 1 of such Code is amended by inserting immediately before the item relating to section 45 the following:

"Sec. 44C. Educational expenses.".

(2) Subsection (c) of section 56 of such Code (defining regular tax deduction) is amended by striking out "credits allowable under—" and all that follows and inserting in lieu thereof "credits allowable under subpart A of part IV other than under sections 31, 39, and 43.".

SEC. 3. REPORT ON CIVIL RIGHTS ENFORCEMENT, INTERNAL REVENUE SERVICE

The Secretary of the Treasury, the Secretary of Health, Education, and Welfare, and the Attorney General jointly shall report to the Congress on the effectiveness of enforcement, by the Internal Revenue Service, of Revenue Ruling 71-447 (1971-2 CB 230), Revenue Procedure 75-50 (1975-2 CB 587), and any other rulings, procedures, directives, or memoranda designed to enhance civil rights enforcement by the Service. The report shall include any suggestions the Secretaries and the Attorney General may have for enhancing enforcement by the Internal Revenue Service of public policies against racial discrimination and other forms of discrimination which are contrary to law or against public policy. The first report shall be submitted to the Congress not later than June 1, 1980, and an additional report shall be submitted to the Congress not later than June 1, 1982.

SEC. 4. EFFECTIVE DATE

The amendments made by section 2 of this Act shall apply to taxable years ending after July 31, 1978, for amounts paid after such date for educational expenses incurred after such date.

Mr. MOYNIHAN. Mr. President, as the majority leader has earlier stated, it is our purpose that the formal debate on

this measure, the Tuition Tax Relief Act of 1978, should begin tomorrow morning at approximately 10 o'clock. We expect to be on the matter tomorrow, save when it might be set aside for other matters which the Senate wishes to deal with and must deal with. We shall be debating again on Monday and on Tuesday, we expect that a series of votes will resolve the matter.

At this point, Mr. President, I ask unanimous consent that during the consideration of H.R. 12050, the Tuition Tax Relief Act of 1978, the following staff be permitted the privilege of the floor: From the Finance Committee staff: Michael Stern, Bill Morris, Charles Bruce, George Pritts, and Jim Heinhold. From the staff of the Joint Committee on Taxation: Bobby Shapiro, Michelle Scott, Floyd Williams, Bernie Schmidt, Tom Hart, and Harold Hirsch.

From the staff of Senator HODGES of Arkansas, Linda Laibstain, Bill Kennedy, and Jon Able.

From the staff of Senator ROTH, Bruce Thompson; from the staff of Senator RIBICOFF, Susan Irving; from the staff of Senator PACKWOOD, John Colvin, Terry Kay, and Hugh O'Neil; from the staff of Senator ALLEN, Richard Gentry and Quentin Crommelin.

From my staff, Mr. President, Dr. Chester Finn, Mr. James Moors, Mr. Jeh Johnson, and Mr. Tim Russert.

Mr. HOLLINGS. Mr. President, reserving the right to object, and I do not want to object any more than necessary, how many staff people is that on this particular measure?

Mr. MOYNIHAN. How many? I shall tell how many for which consent was requested from committees: Eleven members; five members of the Finance Committee, since it is a finance bill, and six members of the Joint Committee on Taxation, since it is a tax bill. There are three staff members for Senator HODGES; four for myself; one for Senator RIBICOFF; one for Senator ROTH; three for Senator PACKWOOD; and two for Senator ALLEN.

Mr. HOLLINGS. I have no objection.

I would like to make a similar request when it is convenient to the manager of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that during consideration of H.R. 12050, privilege of the floor be granted to Michael Joy, Ashley Thrift, Ralph Everett, and Michael Copps.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I ask unanimous consent that privilege of the floor be granted to Sally Crossman of Senator STEVENS' staff and for Carl Anderson of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

(Routine morning business transacted and additional statements submitted today are as follows:)

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Marks, one of his secretaries.

EXECUTIVE MESSAGE REFERRED

As in executive session, the Presiding Officer laid before the Senate a message from the President of the United States submitting the nomination of William E. Pitt, of Utah, to be U.S. marshal for the district of Utah for the term of 4 years; to the Committee on the Judiciary.

REORGANIZATION PLAN NO. 4 OF 1978—MESSAGE FOM THE PRESIDENT—PM 207

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers, which was referred to the Committee on Governmental Affairs:

To the Congress of the United States:

Today I am submitting to the Congress my fourth Reorganization Plan for 1978. This proposal is designed to simplify and improve the unnecessarily complex administrative requirements of the Employee Retirement Income Security Act of 1974 (ERISA). The new plan will eliminate overlap and duplication in the administration of ERISA and help us achieve our goal of well regulated private pension plans.

ERISA was an essential step in the protection of worker pension rights. Its administrative provisions, however, have resulted in bureaucratic confusion and have been justifiably criticized by employers and unions alike. The biggest problem has been overlapping jurisdictional authority. Under current ERISA provisions, the Departments of Treasury and Labor both have authority to issue regulations and decisions.

This dual jurisdiction has delayed a good many important rulings and, more importantly, produced bureaucratic runarounds and burdensome reporting requirements.

The new plan will significantly reduce these problems. In addition, both Departments are trying to cut redtape and paperwork, to eliminate unnecessary reporting requirements, and to streamline forms wherever possible.

Both Departments have already made considerable progress, and both will continue the effort to simplify their rules and their forms.

The Reorganization Plan is the most significant result of their joint effort to modify and simplify ERISA. It will eliminate most of the jurisdictional overlap between Treasury and Labor by making the following changes:

(1) Treasury will have statutory authority for minimum standards. The new plan puts all responsibility for funding, participation, and vesting of benefit rights in the Department of Treasury. These standards are necessary to insure that employee benefit plans are adequately funded and that all beneficiary rights are protected. Treasury is the most appropriate Department to administer these provisions; however, Labor will continue to have veto power over Treasury decisions that significantly affect collectively bargained plans.

(2) Labor will have statutory authority for fiduciary obligations. ERISA prohibits transactions in which self-interest or conflict of interest could occur, but allows certain exemptions from these prohibitions. Labor will be responsible for overseeing fiduciary conduct under these provisions.

(3) Both Departments will retain enforcement powers. The Reorganization Plan will continue Treasury's authority to audit plans and levy tax penalties for any deviation from standards. The plan will also continue Labor's authority to bring civil action against plans and fiduciaries. These provisions are retained in order to keep the special expertise of each Department available. New coordination between the Departments will eliminate duplicative investigations of alleged violations.

This reorganization will make an immediate improvement in ERISA's administration. It will eliminate almost all of the dual and overlapping authority in the two Departments and dramatically cut the time required to process applications for exemptions from prohibited transactions.

This plan is an interim arrangement. After the Departments have had a chance to administer ERISA under this new plan, the Office of Management and Budget and the Departments will jointly evaluate that experience. Based on that evaluation, early in 1980, the Administration will make appropriate legislative proposals to establish a long-term administrative structure for ERISA.

Each provision in this reorganization will accomplish one or more of the purposes in Title 5 of U.S.C. 901(a). There will be no change in expenditure or personnel levels, although a small number of people will be transferred from the Department of Treasury to the Department of Labor.

We all recognize that the administration of ERISA has been unduly burdensome. I am confident that this reorganization will significantly relieve much of that burden.

This plan is the culmination of our effort to streamline ERISA. It provides an administrative arrangement that will work.

ERISA has been a symbol of unnecessarily complex government regulation. I hope this new step will become equally symbolic of my Administration's commitment to making government more effective and less intrusive in the lives of our people.

JIMMY CARTER.

THE WHITE HOUSE, *August 10, 1978.*

PRESIDENTIAL APPROVAL

A message from the President of the United States reported that on August 4, 1978, he approved and signed the following bill:

S. 785. An act to declare that all right, title, and interest of the United States in two thou-

sand seven hundred acres, more or less, are hereby held in trust for the Paiute and Shoshone Tribes of the Fallon Indian Reservation and Colony, Fallon, Nevada, to promote the economic self-sufficiency of the Paiute and Shoshone Tribes, and for other purposes.

MESSAGES FROM THE HOUSE

ENROLLED BILL SIGNED

At 9:04 a.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

H.R. 2777. An act to provide for consumers a further means of minimizing the impact of inflation and economic depression by narrowing the price spread between costs to the producer and the consumer of needed goods, services, facilities, and commodities through the development and funding of specialized credit sources for, and technical assistance to, self-help, not-for-profit, cooperatives, and for other purposes.

The enrolled bill was subsequently signed by the Acting President pro tempore (Mr. MORGAN).

At 2:35 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the House agrees to the amendment of the Senate to the amendment of the House to the amendments of the Senate to H.R. 10732, an Act to authorize appropriations to carry out the Fishery Conservation and Management Act of 1976 during fiscal years 1979, 1980, and 1981.

The message also announced that the House disagrees to the amendments of the Senate to H.R. 12932, an act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1979, and for other purposes; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. YATES, Mr. LONG, of Maryland, Mr. EVANS of Colorado, Mr. MURTHA, Mr. DUNCAN of Oregon, Mr. DICKS, Mr. CHARLES WILSON of Texas, Mr. WHITTEN, Mr. MAHON, Mr. MCDADE, Mr. REGULA, Mr. ARMSTRONG, and Mr. CEDERBERG were appointed managers of the conference on the part of the House.

COMMUNICATIONS

The PRESIDING OFFICER laid before the Senate the following communications, together with accompanying reports, documents, and papers, which were referred as indicated:

EC–4128. A communication from the Associate Director, Legislative Liaison, Office of the Secretary, Department of the Air Force, transmitting, pursuant to law, a report on experimental, developmental and research contracts of $50,000 or more, by company, for the period January 1, 1978 through June 30, 1978; to the Committee on Armed Services.

EC–4129. A communication from the Deputy Assistant Secretary of the Interior, transmitting, pursuant to law, a proposed contract with Science Applications, Inc., La Jolla, California, for a research project entitled "A Borehole Probe for In Situ X-Ray Diffraction Analysis"; to the Committee on Energy and Natural Resources.

EC–4130. A communication from the Deputy Assistant Secretary of the Interior, transmitting, pursuant to law, a proposed contract with Morrison-Knudsen Company, Incorporated, Boise, Idaho, for a research project entitled "Evaluation, Modification, and Application of Roadheaders in Underground Uranium Mining"; to the Committee on Energy and Natural Resources.

EC–4131. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Audit of the Majority Printing Clerk, House of Representatives, for the Fiscal Year Ended August 31, 1977," August 9, 1978; to the Committee on Governmental Affairs.

EC–4132. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Audit of the Minority Printing Clerk, House of Representatives, for the Fiscal Year Ended September 30, 1977," August 9, 1978; to the Committee on Governmental Affairs.

EC–4133. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Housing Abandonment: A National Problem Needing New Approaches," August 10, 1978; to the Committee on Governmental Affairs.

EC–4134. A communication from the Deputy Assistant Secretary of the Interior, reporting, pursuant to law, on the modified personal record systems covered by the Privacy Act of 1974; to the Committee on Governmental Affairs.

EC–4135. A communication from the General Counsel, Securities and Exchange Commission, transmitting, pursuant to law, a report on the proposed modification of the Commission's Complaint Processing System, SEC–16; to the Committee on Governmental Affairs.

EC–4136. A secret communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on the problems which exist in planning host nation support for U.S. forces in Europe and measures which should be taken by the Department of Defense to insure adequate logistical support of U.S. forces in wartime; to the Committee on Governmental Affairs.

EC–4137. A communication from the Administrator, Agency for International Development, Department of State, reporting, pursuant to law, a proposed amendment to their system of records AID–19; to the Committee on Governmental Affairs.

EC–4138. A communication from the Assistant Secretary for Administration, Department of Housing and Urban Development, transmitting, pursuant to law, a report on a Privacy Act system of records; to the Committee on Governmental Affairs.

EC–4139. A communication from the Secretary of Health, Education, and Welfare, transmitting, pursuant to law, the family contribution schedules for the Basic Educational Opportunity Grant Program for academic year 1979–80; to the Committee on Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By MR. SASSER, from the Committee on Governmental Affairs, with an amendment:

H.R. 4319. An Act to amend subchapter III of chapter 83 of title 5, United States Code, to provide that employees who retire after 5 years of service, in certain instances, may be eligible to retain their life and health insurance benefits, and for other purposes (Rept. No. 95–1080).

S. 408. A bill to amend title 5, United States Code, to extend certain benefits to former employees of county committees established pursuant to section 8(b) of the Soil Conservation and Domestic Allotment Act, and for other purposes (Rept. No. 95–1081).

By MR. SASSER, from the the Committee on Governmental Affairs, with amendments:

H.R. 4320. An Act to amend chapter 83 of title 5, United States Code, to discontinue civil service annuity payments for periods of employment as a justice or judge of the United States, and for other purposes (Rept. No. 95–1082).

By MR. SASSER, from the Committee on Governmental Affairs, without amendment:

H.R. 8342. An Act to amend title 5, United States Code, to provide for the application of local withholding taxes to Federal employees who are residents of such locality (Rept. No. 95–1083).

H.R. 8771. An Act to amend title 5, United States Code, to authorize the Civil Service Commission to comply with the terms of a court decree, order, or property settlement in connection with the divorce, annulment, or legal separation of a Federal employee who is under the civil service retirement system, and for other purposes (Rept. No. 95–1084).

H.R. 9471. An Act to amend title 5, United States Code, to provide that Japanese-Americans shall be allowed civil service retirement credit for time spent in World War II internment camps (Rept. No. 95–1085).

By Mr. PROXMIRE, from the Committee on Banking, Housing, and Urban Affairs:

A Special Report Summarizing a Study of the Assignment of Claims Act (Rept. No. 95–1086).

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S.J. Res. 148. A joint resolution authorizing and requesting the President of the United States to issue a proclamation designating the seven calendar days beginning September 17, 1978, as "National Port Week" (Rept. No. 95–1087).

By Mr. MUSKIE, from the Committee on the Budget, without amendment:

S. Res. 510. A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 3279 (Rept. No. 95–1088).

S. Res. 527. A resolution waiving section 303(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 3279 (Rept. No. 95–1089).

By Mr. THURMOND, from the Committee on the Judiciary, with an amendment:

S. 1680. A bill for the relief of Roland L. Outlaw and his wife Carolyn H. Outlaw of Lee County, South Carolina (Rept. No. 95–1090).

OUTER CONTINENTAL SHELF LANDS ACT AMENDMENTS OF 1978—CONFERENCE REPORT

Mr. JACKSON, the committee of conference, submitted a report on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 9) to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes (Rept. No. 95–1091).

By Mr. EASTLAND, from the Committee on the Judiciary, without amendment:

S. 153. A bill for the relief of Doctor Timothy Kam-Hung Chung (Rept. No. 95–1092).

S. 2366. A bill for the relief of Keum Sun Lee (Rept. No 95–1093).

S. 2547. A bill for the relief of Soo Yung Kim (Rept. No. 95–1094).

S. 2977. A bill for the relief of Renuka Pavia (Rept. No. 95–1095).

S. 3001. A bill for the relief of Kirthi Chandher (Rept. No. 95–1096).

By Mr. EASTLAND, from the Committee on the Judiciary, with amendments:

S. 399. A bill for the relief of Doctor Manuel Javier Mariano and his wife, Lilia Zapanta Mariano (Rept. No. 95–1097).

S. 2333. A bill for the relief of James Edward Slowey, Carole Anne Slowey, Christopher James Slowey, Elaine Margaret Slowey, and Carole-Ann Slowey (Rept. No. 95–1098).

By Mr. EASTLAND, from the Committee on the Judiciary, without amendment:

H.J. Res. 963. A joint resolution designating July 18, 1979, as "National P.O.W.-M.I.A. Recognition Day" (Rept. No. 95–1099).

S. 3382. A bill to waive the statute of limitations with regard to the tort claim of Eazor Express, Inc., of Pittsburgh, Pennsylvania, against the United States (Rept. No. 95–1100).

H.J. Res. 682. A joint resolution to provide for the designation of a week as "National Lupus Week" (Rept. No. 95–1101).

H.J. Res. 946. A joint resolution to designate October 7, 1978, as "National Guard Day" (Rept. No. 95–1102).

By Mr. DECONCINI, from the Committee on the Judiciary, with an amendment:

S. 2253. A bill to amend title 28 of the United States Code to encourage prompt, informal, and inexpensive resolution of civil cases by use of arbitration in United States district courts, and for other purposes (Rept. No. 95–1103).

By Mr. LONG, from the Committee on Finance, with an amendment and an amendment to the title:

H.R. 12232. An Act to amend the Unemployment Compensation Amendments of 1976 with respect to the National Commission on Unemployment Compensation, and for other purposes (Rept. No. 95–1104).

By Mr. LONG, from the Committee on Finance, without amendment:

H.R. 12380. An Act to amend the Federal-State Extended Unemployment Compensation Act of 1970 with respect to an individual's eligibility period for benefits under such Act (Rept. No. 95–1105).

By Mr. LONG, from the Committee on Finance, with amendments:

S. 2266. A bill to establish a uniform law on the subject of bankruptcies (Rept. No. 95–1106).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. CANNON, from the Committee on Commerce, Science, and Transportation:

Francis H. McAdams, of the District of Columbia, to be a member of the National Transportation Safety Board.

Thomas F. Moakley, of Massachusetts, to be a Federal Maritime Commissioner.

(The above nominations from the Committee on Commerce, Science, and Transportation were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

U.S. COAST GUARD

Mr. CANNON. Mr. President, as in executive session, I also report favorably sundry nominations in the Coast Guard which have previously appeared in the CONGRESSIONAL RECORD and, to save the expense of printing them on the Executive Calendar, I ask unanimous consent that they lie on the Secretary's desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of July 10, 1978, at the end of the Senate proceedings.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. SASSER:

S. 3393. A bill for the relief of Bobby G. Sanders; to the Committee on Finance.

By Mr. BROOKE:

S. 3394. A bill to amend the Internal Revenue Code of 1954; to the Committee on Finance.

By Mr. EASTLAND:

S. 3395. A bill for the relief of Jan Kutina; to the Committee on the Judiciary.

By Mrs. ALLEN:

S. 3396. A bill to change the name of the China Bluff Access Area being constructed by the Army Corps of Engineers as part of the Tennessee-Tombigbee Waterway near Warsaw in Sumter County, Ala., to the S. W. Taylor Memorial Park; to the Committee on Environment and Public Works.

By Mr. HELMS:

S. 3397. A bill to amend the Federal Crop Insurance Act; to the Committee on Agriculture, Nutrition, and Forestry.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BROOKE:

S. 3394. A bill to amend the Internal Revenue Code of 1954; to the Committee on Finance.

ANTI-INFLATION TAX REDUCTION AND REFORM ACT

● Mr. BROOKE. Mr. President, today I am pleased to introduce the Anti-Inflation Tax Relief and Reform Act, legislation which in my opinion is long overdue. It is the companion measure to H.R. 11413 introduced in the House of Representatives by my distinguished colleague Congressman WILLIS GRADISON. The purpose of this bill is to help relieve the terrible burden inflation now places upon our taxpayers.

As we all know, our system of progressive tax rates was designed for a world of stable prices. But regrettably, although we have made attempts in recent years to stabilize prices, we have failed to achieve this goal. And, during this period it is the taxpayer who has suffered immensely from our inflationary problems. For as prices have risen, there has been a steady "bracket creep" as inflated nominal incomes move taxpayers into higher tax brackets. As a result, even where a family's income merely grows with the cost of living, the average rise in tax rates consumes or exceeds any real economic gain.

An illustration of this situation was recently pointed out by Mr. John Pierson of the Wall Street Journal. According to Mr. Pierson, the typical family of four that made $15,000 last year paid taxes of $1,385 or 9.2 percent of its income. Yet, even if this family receives a 7-percent pay increase to match this year's anticipated inflation rate, its taxes will go up faster in 1978 to $1,613 or 10 percent of income. Moreover, according to Mr. Pierson's calculations, after 10 years of illusory increases, the family's tax rate would climb to 17.8 percent, almost double what it was a decade earlier.

Mr. President, I suggest that this type of tax hike, which occurs without congressional approval, was not intended by the original designers of our tax system. Therefore, I propose, and my legislation provides, that the withholding rate applied to income earned in calendar year 1980 be adjusted by the change in the Consumer Price Index over the four quarters ending September 30, 1979. Further, that the tax brackets which apply to 1980 income be adjusted by this same index. And thereafter, the entire process would be repeated for every successive year. In this way we may be sure that our taxpayers do not needlessly suffer from the ravages of inflation.

I am aware that one of the arguments advanced against indexing is that inflation brings in more Government revenues and that indexing will reduce these revenues. For example, in fiscal year 1980, the administration estimates a revenue increase of $37 billion over the previous year, if the present tax structure were extended. However, indexing the bracket for inflation would only reduce this revenue gain by about $4.5 billion. Therefore, real economic growth would still provide a 1-year increase of $32.5 billion. Certainly we in the Government can adjust to such a reduction. And more importantly this figure is a more accurate reflection of the revenues to which Government is entitled.

It has also been stated that indexing will remove the impetus for legislating review of the inequities that exist in our tax system. To this I would respond that indexing is and must be an adjunct to legislative review. Indeed my advocacy of this indexing plan should not in any way be interpreted as favoring an abdication of the continuing congressional responsibility to comprehensively reform our tax structure. On the contrary, I strongly believe that we in the Congress have the same responsibility to review the distribution of the tax burden. And, in cases where an inequity in the system is disclosed, we should act expeditiously to correct the situation.

Finally, I would like to point out that it is not uncommon for us to use an indexing mechanism to account for inflationary increases. In fact it is being used by several segments of the economy. And, in Canada where the tax structure is very similar to our own, indexing has proved to be successful.

Mr. President, this indexing bill would simply provide a more equitable tax system. For, in my opinion, an equitable taxing system taxes real income, not nominal income. And this is precisely what my indexing bill will do. Certainly, this is something that our taxpayers deserve. Therefore, I urge my colleagues to expeditiously pass this important and necessary legislation.●

By Mr. HELMS:

S. 3397. A bill to amend the Federal Crop Insurance Act; to the Committee on Agriculture, Nutrition, and Forestry.

FARM CROP INSURANCE ACT OF 1978

Mr. HELMS. Mr. President, today I am pleased to introduce the Farm Crop Insurance Act of 1978, a bill to expand and improve the Federal Crop Insurance Program.

THE NEED TO IMPROVE DISASTER ASSISTANCE

Almost everyone agrees that our current efforts to alleviate the impact of farm disasters are costly, duplicative, inequitable, and inadequate. Certainly, the farmers of this Nation are all but unanimous in their belief that Federal disaster assistance programs are themselves a disaster.

At the present time, farmers and ranchers are confronted with a bewildering variety of more than 20 Federal programs which offer some type of crop or livestock disaster relief. These programs are scattered throughout the Federal bureaucracy and take the form of emergency credit, loss indemnification, insurance, project grants, and technical assistance. Each program has its own complicated set of declaration procedures, eligibility requirements, benefits, and loopholes.

Many of the inadequacies that cripple our farm disaster assistance programs were exposed during the severe drought of 1977, which affected many regions of the Nation including my State of North Carolina. A large number of farmers and ranchers discovered that Federal assistance was inadequate or unavailable, while others were able to take advantage of loopholes and reap windfall benefits. The system is unfair to farmers, and it is unfair to taxpayers.

During the past year several of my colleagues in the Congress, as well as the administration, have cited the need to restructure farm disaster assistance programs. This task is certain to be high on the agenda of the Agriculture Committee during the coming months. Clearly, the challenge is to develop a comprehensive, responsive system of disaster relief—a system in which the costs, benefits, and rules are laid down plainly so that, when disaster strikes, farmers will know in advance what assistance is available and how to obtain it.

EXPANSION OF CROP INSURANCE

Much of this discussion about farm disaster protection centers on the possibility of expanding the Federal crop insurance program as a cost-effective substitute for direct disaster payments. Federal crop insurance, offered through the Federal Crop Insurance Corporation—FCIC—has been in existence since 1938, but farmer participation has always been low because insurance is not available in all agricultural counties, and it does not cover all major crops in counties where the program is operative.

During 1977, FCIC operated in 1,522 counties—out of 3,066 nationwide—and offered insurance on a total of 26 individual crops. Only 14 percent of eligible producers choose to participate. In North Carolina, for instance, insurance was offered on only 6 crops in 70 of the State's 100 counties.

COMPREHENSIVE COVERAGE

The purpose of the Farm Crop Insurance Act is to replace this limited program with a new, equitable, and comprehensive system of crop coverage at rates farmers can afford.

Specifically, my legislation requires FCIC to expand into all agricultural counties and provide coverage for eight basic commodities wherever they are grown commercially. These include tobacco, cotton, corn, peanuts, rice, grain sorghum, barley, and wheat.

Numerous additional crops will be covered, as now, on a county-by-county basis.

Coverage will include up to 90 percent of a farm's average yield, in contrast to the existing limitation of 75 percent. FCIC is also authorized to offer lower levels of coverage—at reduced premiums—to be selected at the discretion of each producer, depending on his or her needs.

THE INSURANCE INDUSTRY

Unlike other proposals to expand the crop insurance program, my legislation does not put the Federal Government into competition with the private insurance industry. Nor does it foreclose the possibility of greater involvement by the private sector in the future. On the contrary, this bill specifically excludes fire, hail and lightning policies from the Federal program because the insurance industry already offers such coverage nationwide at highly competitive rates.

Moreover, this legislation attempts to utilize the private sector to the maximum extent by providing for reinsurance arrangements and by authorizing the sale of FCIC policies by private agents. Far from expanding the Federal role in crop protection, my bill lays the foundation for a gradual withdrawal of the Federal Government from the crop insurance business. As more and more actuarial data and experience is developed, competitive private programs, offering comprehensive coverage at affordable rates, may come to replace the Federal program.

THE COST OF PROTECTION

My legislation also provides for a 25-percent Federal subsidy of the premiums producers pay into FCIC. A premium subsidy of this size, together with the existing Federal payment of the corporation's operating and administrative expenses, will reduce the cost of insurance to producers and make it a viable and attractive alternative to the disaster payments program.

The Federal premium subsidy will substantially increase the level of Government support, but the expiration of the disaster payments program—which cost $560 million in 1977—will more than offset the Federal subsidy of a nationwide FCIC.

The Department projects an impressive savings if an expanded FCIC were to replace the present crop insurance/disaster payments system. Crop insurance and disaster payments cost the taxpayer a total of $672 million in 1977. In contrast, a nationwide FCIC, operating with 25 percent premium subsidy and assuming a participation level of at least 28 percent, will cost the taxpayer only about $110 to $150 million per annum.

In short, taxpayers will save money and producers will enjoy more comprehensive coverage.

OTHER PROVISIONS

The proposed act also revises the way in which FCIC's activities are funded to permit greater fiscal flexibility and capital stability. These changes, which are essential for the corporation's expanded activities, include increasing the capital stock from $200 million to $300 million, deleting the $12 million authorization ceiling on operating expenses, and providing FCIC with discretionary borrowing authority.

My legislation would also delete some authorities which have never been used or are no longer needed, and would update certain other aspects of existing law.

CONCLUSION

In conclusion, Mr. President, let me state frankly that this bill is not infallible. Nor is it a definitive solution to the problem of crop protection. Rather, I offer this legislation as the subject of further improvement, and in the hope that it may serve to redirect attention toward a vital but neglected subject: Now public and private insurance efforts may interface in a way that best serves the interests of producers and taxpayers.

Mr. President, I ask unanimous consent that the bill and a section-by-section summary be printed in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 3397

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Farm Crop Insurance Act of 1978".

SEC. 2. Section 504 (a) of the Federal Crop Insurance Act, as amended, is amended to read as follows:

"SEC. 504. (a) The Corporation shall have a capital stock of $400,000,000 subscribed by the United States of America, payment for which shall, with the approval of the Secretary of Agriculture, be subject to call in whole or in part by the Board of Directors of the Corporation.".

SEC. 3. The second sentence of subsection (c) of section 505 of the Federal Corp Insurance Act, as amended, is amended to read as follows: "The members of the Board who are not employed by the Government shall be paid such compensation for their services as directors as the Secretary of Agriculture shall determine, but such compensation shall not exceed the daily equivalent of the rate prescribed for grade GS-18 in section 5332 of title 5, United States Code, when actually employed, and be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently.".

SEC. 4. Section 507 of the Federal Crop Insurance Act, as amended, is amended—

(1) by striking out ", and county crop insurance committeemen" in subsection (a);

(2) by striking out the comma after the word "title" in subsection (b) and all that follows down through the end of the sentence and inserting in lieu thereof a period;

(3) by striking out subsection (c) in its entirety;

(4) by redesignating subsection (d) as subsection (c) and amending such subsection (as redesignated) to read as follows:

"(c) The Corporation may contract with

and transfer funds to, other agencies and offices of the Department of Agriculture or with the county committees established pursuant to section 8(b) of the Soil Conservation and Domestic Allotment Act, as amended, for assistance in carrying out this title; but any employees of such other agencies and offices responsible for performing functions under this title shall be responsible directly to the Corporation without the intervention of any intermediate office or agency."; and

(5) by redesignating subsection (e) as subsection (d).

SEC. 5. Section 508 of the Federal Crop Insurance Act, as amended, is amended to read as follows:

"SEC. 508. To carry out the purposes of this title the Corporation—

"(a)(1) shall for the 1979 and subsequent crop years insure producers of wheat, cotton, grain sorghum, corn, rice, barley, peanuts, and tobacco, wherever grown commercially, but subject to the limitations herein, and may insure producers of other agricultural commodities wherever grown commercially, subject to the limitations herein, at such time as the Board determines that insurance on any other agricultural commodity has been developed to the point that it can be offered to the producers thereof. The insurance for any commodity shall be offered under any plan or plans determined by the Board to be adapted to the commodity. Such insurance shall be against loss of the insured commodity due to one or more unavoidable causes, including drought, flood, wind, frost, winter-kill, excessive rain, snow, wildlife, hurricane, tornado, insect infestation, plant disease, and such other unavoidable causes, other than hail, lightning, or fire, as may be determined by the Board: *Provided*, That, except in the case of tobacco, such insurance shall not extend beyond the period the insured commodity is in the field. Any insurance offered against loss in yield shall cover up to 90 per centum of the average yield for a representative period of years for a farm, or area in which the farm is located, as determined by the Corporation on the basis of recorded or appraised yields, subject to such adjustments as may be necessary to the end that the average yield fixed for farms in the same area, which are subject to the same conditions, may be fair and just. In addition, the Corporation may offer lower levels of coverage to be selected at the option of each producer. Insurance provided under this subsection shall not cover losses due to the neglect or malfeasance of the producer, or to the failure of the producer to reseed to the same crop in areas and under circumstances where the Corporation determines it was practical to so reseed, or to the failure of the producer to follow established good farming practices. For each crop insured, the Corporation shall not offer insurance on any acreage not suited to the production of such crop or in any county where the planted acreage of such crop is below a minimum county acreage as established by the Corporation, except that it may, if it is deemed practical to do so, offer insurance on acreage in such county through the office serving another county which meets the minimum requirement. The Corporation shall report annually to the Congress the results of its operations on each commodity insured.

"(2) may implement the program set forth in paragraph (1) for crops planted for harvest in 1979, as determined by the Board, consistent with the purposes of this Act, as amended, to insure, or reinsure insurers of, producers of such agricultural commodities under any plan or plans of insurance determined by the Board to be adapted to any such commodity.

"(3) may insure producers against losses that they may incur when they are unable to plant an agricultural crop because of a flood. Insurance issued under authority of this paragraph shall be subject to the applicable provisions of paragraph (1) of this subsection.

"(b) may fix adequate premiums of insurance at such rates as the Board deems sufficient to cover claims for crop losses on such insurance, establish as expeditiously as possible a reasonable reserve against unforeseen losses, and sell the crop insurance provided for under this Act through contract arrangements with commercially operated insurance companies. For the purpose of encouraging the broadest possible participation in the crop insurance program, 25 per centum of each participant's calculated premium shall be paid by the Federal Government. The remaining 75 per centum of the premium shall be paid by each participant and such premiums shall be collected at such time or times or shall be secured in such manner as the Board may determine.

"(c) may adjust and pay claims for losses under rules prescribed by the Board. In the event that any claim for indemnity under the provisions of this title is denied by the Corporation, an action on such claim may be brought against the Corporation in the United States district court, or in any court of record of the State having general jurisdiction, sitting in the district or county in which the insured farm is located, and jurisdicton is hereby conferred upon such district courts to determine such controversies without regard to the amount in controversy: *Provided*, That no suit on such claim shall be allowed under this section unless the same shall have been brought within one year after the date when notice of denial of the claim by registered mail is sent to the claimant.

"(d) may provide, upon such terms and conditions as the Board may determine to be consistent with Section 508(b) and sound reinsurance principles, reinsurance to private insurance companies, or groups or pools of such companies, which insure producers of any agricultural commodity under contracts acceptable to the Corporation: *Provided*, That no application for reinsurance shall be approved unless the Corporation shall have determined that the reinsurance deemed necessary is not available from recognized private sources at reasonable cost.

SEC. 6. The second sentence of section 515 of the Federal Crop Insurance Act, as amended, is amended to read as follows: "The compensation of the members of such committee shall be determined by the Board, but shall not exceed the daily equivalent of the rate prescribed for grade GS–18 in section 5332 of title 5, United States Code, when actually employed, and be allowed travel expenses, including per diem in lieu of subsistence, as authorized by law (section 5703 of title 5, United States Code) for persons in the Government service employed intermittently.".

SEC. 7. Section 516 of the Federal Crop Insurance Act, as amended, is amended to read as follows:

"SEC. 516. (a) There is hereby created within the Treasury a separate fund (hereafter in this section called the 'fund') which shall be available to the Corporation without fiscal year limitation as a revolving fund for carrying out the purposes of this title. A business-type budget for the fund shall be be prepared, transmitted to the Congress, considered, and enacted in the manner prescribed by sections 102, 103, and 104 of the Government Corporation Control Act (31 U.S.C. 847–849) for wholly owned Government corporations.

"(b)(1) There are authorized to be appropriated to the fund such amounts as may be necessary to restore the expense of the Corporation, including administrative and operating expenses, Federal premium payments, interest, the direct cost of loss adjustment and agents' commissions, but excluding indemnities. All amounts received by the Corporation as premiums, fees, and other moneys, property, or assets derived by it from its operations in connection with this title shall be deposited in the fund.

"(2) The Corporation is hereby authorized to use any funds available to it for administrative and operating expenses subject to limitations that shall be prescribed in applicable Acts: *Provided*, That, the direct cost of loss adjustment for crop inspections and loss adjustments, Federal premium payments, interest expense, and agents' commissions may be considered by the Corporation as being nonadministrative or nonoperating expenses.

"(3) All expenses, including reimbursements to other Government accounts, and payments pursuant to operations of the Corporation under this title shall be paid from the fund. From time to time, and at least at the close of each fiscal year, the Corporation shall pay from the fund into Treasury as miscellaneous receipts interest on its outstanding capital stock and outstanding borrowings from the Treasury, less the average undisbursed cash balance in the fund during the year and Federal premium payments due the Corporation. The rate of such interest shall be determined by the Secretary of the Treasury and shall be not less than a rate determined by taking into consideration the average market yield during the month preceding each fiscal year on outstanding marketable obligations of the United States to comparable maturities. Interest payments may be deferred with the approval of the Secretary of the Treasury, but any interest payments so deferred shall themselves bear interest. If at any time the Corporation determines that moneys in the fund exceed the present and any reasonably prospective future requirements of the fund, such excess may be transferred to the general fund of the Treasury.

"(c) If at any time the moneys available in the fund are insufficient to enable the Corporation to discharge its responsibilities under this title, it shall issue to the Secretary of the Treasury notes or other obligations in such forms and denominations, bearing such maturities, and subject to such terms and conditions, as may be prescribed by the Secretary of the Treasury. Redemption of such notes or obligations shall be made by the Corporation from appropriations or other moneys available under subsection (b) of this section. Such notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, which shall be not less than a rate determined by taking into consideration the average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of the notes or other obligations. The Secretary of the Treasury shall purchase any notes or other obligations issued hereunder and for that purpose he is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act and the purposes for which securities may be issued under that Act are extended to include any purchase of such notes or obligations. The Secretary of the Treasury may at any time sell any of the notes or other obligations acquired by him under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of such notes or other obligations shall be treated as public debt transactions of the United States.

"(d) The Secretary of Agriculture and the Corporation, respectively, are authorized to issue such regulations as may be necessary to carry out the provisions of this title.".

SECTION-BY-SECTION SUMMARY

Sec. 1. Short title.

Sec. 2. Raises the amount of capital stock authorized for the FCIC from $200 million to $400 million. One perennial problem with FCIC is that it is underfinanced. In 1977, for instance, FCIC had to come to Congress on two separate occasions to ask for additional funds to meet claim obligations. By industry standards, capital available for loss should approximate about 15 percent of total exposure. In the case of an expanded FCIC, this works out to about $400 million.

Sec. 3. Raises the maximum compensation of the Board of Directors (who aren't already employed by the government) to no greater than the daily rate for a G.S. 18. Their present daily compensation equates to about a G.S. 7. The estimated additional cost is less than $1,000 per year.

Sec. 4. Deletes references to county crop insurance committeemen and associations of producers. The FCIC has never established or utilized committees or producer associations in the past and has no need to do so in the future.

Sec. 5. Makes multi-risk insurance available to producers of wheat, cotton, grain sorghum, rice, corn, barley, tobacco and peanuts wherever they are grown commercially. The insurance covers all natural hazards except fire, lightning or hail. Deletes the existing limitation on the number of additional counties where FCIC may offer insurance. Current limitation is 150.

Authorizes different levels of coverage up to 90 percent of a farm's average yield. Farmers may select what level of coverage that best serves their needs.

Provides coverage for prevented planting losses caused by floods.

Provides for a 25 percent Federal subsidy of each participant's premium.

Authorizes the FCIC Board to utilize private sector insurance agents to sell insurance on a contract basis.

Authorizes the FCIC Board to enter into reinsurance arrangements with private sector underwriters.

Sec. 6 Does for FCIC advisory committee members what Sec. 3 does for Board members.

Sec. 7 Deletes existing authorization of appropriations and creates a revolving fund to be used to pay administrative and operating costs including Federal premium payments, interest, the direct cost of loss adjustment and agent's commissions, but excluding indemnities. There is authorized for appropriation to the fund such sums as may be necessary to restore administrative and operating expenses.

ADDITIONAL COSPONSORS

S. 2700

At the request of Mr. INOUYE, the Senator from New York (Mr. JAVITS) was added as a cosponsor of S. 2700, to amend the Export Trade Act to encourage increased utilization of the act, and for other purposes.

S. 2802

At the request of Mr. RIEGLE, the Senator from Massachusetts (Mr. BROOKE) was added as a cosponsor of S. 2802, the Truth-in-Lending Simplification and Reform Act.

SENATE RESOLUTION 526

At the request of Mr. DOLE, the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of Senate Resolution 526, commemorating the 10th anniversary of the invasion of Czechoslovakia.

SENATE JOINT RESOLUTION 50
SENATE JOINT RESOLUTION 138

At the request of Mr. GRIFFIN, his name was added as a cosponsor of Senate Joint Resolution 50, to amend the Constitution of the United States to provide for a balanced budget and elimination of the Federal indebtedness, and Senate Joint Resolution 138, to amend the Constitution of the United States to provide that, except in the time of national emergency declared by the Congress, expenditures of the Government may not exceed revenues of the Government during any fiscal year.

AMENDMENTS SUBMITTED FOR PRINTING

CHILD HEALTH ASSESSMENT ACT—S. 1392

AMENDMENTS NOS. 3449 THROUGH 3455

(Ordered to be printed and referred to the Committee on Finance.)

Mr. CRANSTON submitted seven amendments intended to be proposed by him to S. 1392, a bill to strengthen and improve the early and periodic screening, diagnosis, and treatment program, and for other purposes.

● Mr. CRANSTON. Mr. President, today I am submitting for printing and referral to the Finance Committee, the administration's amendments to the proposed "Child Health Assessment Act," S. 1392, introduced on April 26, 1977, by the Senator from Connecticut (Mr. RIBICOFF) and of which I am a cosponsor.

These amendments would make several important changes and improvements to the early and periodic screening, diagnosis, and treatment program (EPSDT) admendments offered last session by the distinguished Senator from Connecticut (Mr. RIBICOFF), and would also make one important new amendment to the medicaid program regarding pregnant women. As the chairman of the Subcommittee on Child and Human Development of the Human Resources Committee, these issues are of major concern to me.

This important new amendment to the medicaid program is one I had suggested last year to the Secretary of Health, Education, and Welfare. That suggestion was to broaden medicaid coverage to low-income women pregnant for the first time whose income level would make them eligible for medicaid coverage if they had a dependent child. It seemed to me inconsistent to provide medicaid coverage to these women after their child was born but to refuse medicaid coverage to these women in the critical prenatal period when, to a major extent, the future health of the infant is determined.

I ask unanimous consent, Mr. President, that the exchange of letters between Secretary Califano and me be inserted in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON HUMAN RESOURCES,
Washington, D.C., July 27, 1977.

Hon. JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare, Washington, D.C.

DEAR JOE: I am delighted that the administration has moved forward so dramatically in developing its position on adoption and foster care reform, and have greatly enjoyed the opportunity to work with you and your staff to develop these initiatives. I was privileged to introduce as S. 1928 the legislation you transmitted to the Congress yesterday.

There is, however, one specific section of S. 961 as reported which is a matter of great concern to me and, I know, to you and which is not a part of the new S. 1928 or S. 961 as we propose to amend it (Amendment No. 579).

Section 103(a) of S. 961, as reported, provided that States could utilize funds allocated to them under the Act for the provision of pre-natal, natal, and post-partum services to women who are voluntarily planning to place their children for adoption and who are unable to assume such costs, but only to the extent that assistance under other Federal or State programs in the community is not readily available to provide adequately for such services.

The text of the S. 961 provision (clause (2)) is:

The provision of pre-natal, natal, and post-partum services to women who are voluntarily planning to place their children for adoption (after having been informed in writing that the acceptance of such services does not in any way constitute an obligation to proceed with adoption) and who are unable to assume such costs, in order to protect the health and welfare of both woman and child; but only to the extent that assistance under other Federal or State programs in the community in question is not readily available to provide adequately for such services.

I strongly believe that the provision of such assistance to pregnant women is vitally important. Testimony before Senate committees over the past several years has indicated that a serious problem exists in this area. Young women who are pregnant and are unable to bear the cost of carrying their pregnancies to term are frequently forced either to deal with black market baby-sellers or to resort to abortion because of financial considerations.

Although S. 961 dealt only with those women who were voluntarily planning to place their children for adoption, I am convinced, as I know you are, that all pregnant women should be assured of financial assistance, where necessary, in order to complete their pregnancies. Hence, I joined with Senators Javits and Brooke in introducing (first in 1976 as S. 3593 and in 1977 as S. 370) the "National Health Insurance for Mothers and Children Act", under which all appropriate pre-natal and post-partum (up to 12 weeks after child birth) health care would be provided women.

While I continue to favor strongly this type of comprehensive maternal and child health approach, I would hope that the Administration would be willing to support, as a good beginning in the immediate future, an amendment to title XIX of the Social Security Act to establish a uniform federal standard under which these costs would be covered under Medicaid for any needy woman. This change could be accomplished as an FY 1979 initiative.

In view of your deep commitment to deal with this subject, I am very hopeful that you will be able to develop Administration support for legislation which would provide

Medicaid coverage for every needy pregnant woman and new-born infant so that such women will be free to carry their pregnancies to term free of economic or any other forms of direct or indirect pressure or coercion.

I look foward to hearing your views on this matter.

Sincerely,

ALAN CRANSTON,
Chairman, Subcommittee on Child and Human Development.

THE SECRETARY OF HEALTH, EDUCATION, AND WELFARE,
Washington, D.C., August 18, 1977.

Hon. ALAN CRANSTON,
U.S. Senate,
Washington, D.C.

DEAR ALAN: Thank you for your recent letter and for your support in developing our foster care and adoption reform proposal. I was especially pleased to note your introductory statement in the Congressional Record which highlighted the need for these reforms.

I share your concerns that all pregnant women have access to prenatal health care services.

We believe that the needs of pregnant adolescents and low-income women deserve particular attention. I have appointed a task force to examine problems faced by the teenage expectant mother and her child, and to recommend an action agenda which would serve the health, educational, and social support needs of both. I anticipate announcing a major legislative initiative in this area in the very near future.

In this connection, I share your deep concern that Medicaid and Aid to Families with Dependent Children in many States do not uniformly cover costs of prenatal and postpartum care for women otherwise eligible to participate in these programs. It is troubling that some pregnant women forgo prenatal and postpartum health care as a result of benefit limitations in these programs.

I am actively considering legislative revisions that would remedy this problem and others facing the pregnant mother and her child.

Sincerely,

JOSEPH A. CALIFANO, Jr.

U.S. SENATE,
COMMITTEE ON HUMAN RESOURCES,
Washington, D.C., November 1, 1977.

Hon. JOSEPH A. CALIFANO, JR.,
Secretary of Health, Education, and Welfare,
Washington, D.C.

DEAR JOE: Many thanks for your prompt response to my letter urging the development of a Federal response to the needs of expectant mothers wishing to carry their pregnancies to term. I'm delighted by your willingness and your own personal desire to move on this issue.

I was greatly pleased to learn about your plans for a task force to deal with this problem. I'd be interested in knowing who is directing this effort, and about the make up of the task force.

I recently received a copy of the new report published by the Guttmacher Institute—"11 Million Teenagers"—which sets forth the findings of the Institute's study of the problems with which your task force will be dealing. I hope you will be referring to this study in your work.

I'm also pleased to know that you will be developing a major legislative initiative in this area. I had directed my staff to explore legislative remedies, including the possibility of mandating AFDC eligibility for lower income women bearing their first child—which of course would make them eligible for Medicaid as well—and Medicaid eligibility for those women needing assistance whose income levels might nevertheless be above the AFDC eligibility cutoff. I would like to suggest that our staffs work with each other on this, and ask that you share with us an outline of the kinds of approaches you have under review at this time, as well as an indication of your time-table and plans for making such an announcement.

I look forward to working with you on this, Joe, and again want to thank you for your efforts.

Cordially,

ALAN CRANSTON,
Chairman, Subcommittee on Child and Human Development.

Mr. CRANSTON. Mr. President, experience has shown that without assurance of third-party reimbursement, many low-income women will not seek prenatal care but rather will arrive at the hospital emergency room when the birth of the child is imminent. This practice, obviously, creates a greater risk for the mother as well as the child.

Under the proposed amendment, the expectant mother can seek early prenatal care, secure in the knowledge that the physician fees will be covered. The result will be a greater chance for a healthy delivery and a greater chance for a healthy child.

I would like to point out, Mr. President, the specific benefits the proposal has in relation to the increased numbers of teenage pregnancies. These young women are particularly susceptible to bearing low-birth-weight infants. The report entitled "11 Million Teenagers" pointed out that low birth weight is not only a major cause of infant mortality, but also can lead to other childhood illnesses and neurological defects which may involve lifelong mental retardation. That report went on to say that the death rate from complications of pregnancy is significantly higher for adolescents than it is for mothers in their twenties. Good prenatal care can help prevent these tragedies.

The other amendments included in the administration's package, Mr. President would broaden the applicability of the EPSDT or, as the program would be called under Senator RIBICOFF's bill, the CHAP program to a broader age group and would provide broader health coverage for all those included in the program.

Mr. President, I would like to list briefly these amendments and ask that the letter from Secretary Califano to Senator LONG of February 27, 1978, be inserted in the RECORD at the close of my remarks following the pointing of the amendments themselves. That letter describes the justication for the amendments as well as the estimated costs of each amendment.

Mr. President, the CHAP amendments would—

Require the CHAP program to be made available to all children under 21 who meet medicaid income and resources eligibility requirements;

Clarify that services for children with mental or developmental disabilities would continue to be required to be provided to the extent the State provides them to children under the basic medicaid program;

Clarify that dental services are required to be provided to treat conditions discovered by a dentist during the health assessment;

Specify that, in addition to providing the care and services for which Federal reimbursement is available under medicaid, the State must refer a child who has been assessed to appropriate care and services not covered by the Federal medicaid program, such as special education programs;

Clarify that the health assessments required under the CHAP program would be for both physical and mental conditions;

Retroactively repeal, effective June 30, 1974, existing law which imposes a penalty equal to 1 percent of the amount made available to the State for AFDC payments, for the State's failure to carry out fully an EPSDT program. S. 1392 would have repealed this penalty provision only retroactive to September 30, 1977. Under S. 1392 a new penalty provision would be established that would recognize good faith efforts on the part of States to meet the requirements and would provide for sufficient notice to the State of its deficiences so the State would have an opportunity to correct them before imposition of the fine. The existing penalty requirement allows no flexibility and in some cases, where the State has corrected a deficiency which may have occurred 5 years ago, it is still subject to a very heavy retroactive penalty.

I would like to point out, Mr. President, that there are substantial doubts about one amendment suggested by the administration that I have included in the package I am submitting today. That is the amendment which would specify that an assessment shall include an assessment for "physical and mental problems." California State officials responsible for carrying out the EPSDT program have pointed out to me that the current requirement with respect to "mental problems" has led to considerable difficulties. They advised me that the screening process uses quick, simple procedures and tests, which can result in misleading information and misdiagnosing a child. This can in turn result in falsely labeling a child as "disturbed" or "retarded."

The Children's Defense Fund, in its report "EPSDT"—Does It Spell Health Care For Poor Children?" recommended that:

> Federal regulations should not include a separate developmental assessment component, but HEW should define, in collaboration with professionals, administrators, and consumer groups, the scope of the developmental review and how it will be carried out within the context of the comprehensive pediatric assessment.

At this point, I believe that the amendment is, therefore, probably unwise, but I have included it in the amendments I am submitting out of deference to the administration and so that the questions raised can be explored fully at the hearings and in the Finance Committee's consideration of the amendments.

Mr. President, I believe these amendments make essential improvements in the EPSDT program. I am carefully watching action being taken in the House, where the Subcommittee on Health and Environment, chaired by my good friend, Congressman PAUL ROGERS,

has recommended additional amendments and modifications to the administration amendments I am introducing today. Some of the changes being considered in the House may well warrant serious consideration in the Senate, and I intend to offer additional amendments in those instances where I believe that is the case.

Mr. President, the Senate Finance Committee is scheduled to hold hearings on S. 1392 on August 14, and I will be following with interest the progress of the underlying legislation, S. 1392, and these amendments.

Mr. President, I ask unanimous consent that the text of the amendments I am submitting today be printed in the RECORD at this point and prior to the material previously asked to be inserted at the close of my remarks.

There being no objection, the amendments and letter were ordered to be printed in the RECORD, as follows:

AMENDMENT No. 3449

On page 12, after line 13, insert the following:

MEDICAID COVERAGE OF PREGNANT WOMEN

SEC. 9. Section 1905 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(l)(1) For purposes of this title: (1) any pregnant woman shall be deemed to be a relative specified in section 406(b)(1) with whom a child is living who is a dependent child as defined in section 406(a), and (2) any pregnant woman who would meet the income and resources requirements of the State plan approved under part A of title IV if she had borne a child with whom she was living shall be deemed to be receiving aid under that State plan.

"(2) Any woman who is eligible for care and services under this title by reason of the preceding paragraph shall remain eligible for such care and services for a period of two months following the month in which the pregnancy terminates. Notwithstanding any other provision of law, any such woman shall remain eligible under this title for one additional pregnancy-related check-up beyond such two month period if the fee for the check-up has been included in a single overall charge for all pregnancy related care and services."

AMENDMENT No. 3450

On page 2, at line 22, strike out "six" and insert instead "twenty-one".

On page 3, at line 19, strike out "SIX" and insert instead "TWENTY-ONE".

On page 4, at line 1, strike out "six" and insert instead "twenty-one".

On page 4, at line 24, strike out "six" and insert instead "twenty-one".

AMENDMENT No. 3451

On page 3, line 12, insert after "disabilities" the following: when the care or services for those conditions are not provided pursuant to paragraph (1) through (5) of section 1905(a).

AMENDMENT No. 3452

On page 3, at line 14, insert after "assessment": or discovered by a dentist if the dental assessment is done by direct referral to a dentist

AMENDMENT No. 3453

On page 3, at line 18, insert before the semicolon: , and for the referral of any individual under the age of 21, who has received his periodic assessment, for appropriate care and services not available under this title.

AMENDMENT No. 3454

On page 5, at line 9, insert after "assessments": for physical and mental problems.

AMENDMENT No. 3455

On page 11, at line 21, strike out "September 30, 1977" and insert instead "June 30, 1974".

DEPARTMENT OF HEALTH,
EDUCATION AND WELFARE,
February 27, 1978.

Hon. RUSSELL B. LONG,
Chairman, Committee on Finance, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The purpose of this letter is to ask for your Committee's favorable consideration of a number of amendments, which are enclosed, to an Administration bill, S. 1392, which is now pending before your Committee.

On April 25, 1977, the President submitted to the Congress draft legislation to improve health services for children of low income families. The proposed legislation was introduced in the Senate as S. 1392, and was referred to your Committee for its consideration. The bill is intended to strengthen the Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) program for children under Medicaid and would rename the program the Child Health Assessment Program (CHAP). Hearings were held on the bill last September by your Subcommittee on Health and the Environment.

On August 1, 1977, we submitted an amendment to you which would repeal retroactively through fiscal year 1975 the provision of current law which requires a reduction in a State's welfare payment under title IV of the Social Security Act when the State does not have an adequate EPSDT program. We continue to support that amendment for the reasons previously provided, and have enclosed it as amendment no. 7. In addition, we would now like to ask for the adoption of the following amendments to S. 1392.

Amendment No. 1. This amendment would add a new section to S. 1392 which would amend title XIX of the Social Security Act to provide Medicaid coverage to low-income pregnant women. Currently a woman who does not fall within one of the categories eligible for Medicaid coverage does not become eligible for Medicaid solely by reason of becoming pregnant. The amendment would also provide for a two month period of Medicaid coverage following the termination of the pregnancy. We believe Medicaid coverage of low-income women who are pregnant is one of the most significant steps we can take to assure adequate prenatal and other health care to such women, and thereby greatly improve the chances that their children will be born healthy. Our amendment would require States to provide Medicaid to a pregnant woman who meets the income and resources requirements in her State for aid to families with dependent children (regardless of the marital and employment status of the woman or her spouse) and would also require States with medically needy programs to cover pregnant women who meet the State's medically needy standard. This amendment will increase Medicaid outlays and budget authority by $118 million in fiscal year 1979, $131 million in fiscal year 1980, $146 million in fiscal year 1981, $162 million in fiscal year 1982, and $180 million in fiscal year 1983.

Amendment No. 2. This amendment would require the CHAP program to be made available to all children under 21 who meet the income and resources requirements for Medicaid. The bill we submitted last year would require such coverage only to age six, leaving optional the coverage of older children. Current estimates of the cost of the expanded program are $263 million in fiscal year 1979, $463 million in fiscal year 1980, $586 million in fiscal year 1981, $723 million in fiscal year 1982, and $872 million in fiscal year 1983.

Amendment no. 3. This amendment would clarify the scope of medical services required to be provided as part of CHAP. The intent of our proposal is to expand health care services for children, not reduce them. This amendment makes clear that all services now required to be provided to children with mental or developmental disabilities would continue to be required.

Amendment no. 4. This amendment would make clear that dental services are required to be provided to treat conditions discovered by a dentist who makes the dental part of a health assessment. The bill we submitted did not specifically mention referrals to dentists, and therefore implied that only the individual doing the health assessment could be responsible for performing the dental check-up.

Amendment no. 5. This amendment would specify that in addition to providing to a child who has been assessed the care and services for which federal reimbursement is available under Medicaid, the State must refer the child for appropriate care and services not covered by the federal Medicaid program.

Amendment no. 6. This amendment would clarify that the health assessments required by the legislation would be for both physical and mental conditions.

The Office of Management and Budget advises us that they have no objection to our submission of the enclosed amendments, and that enactment of S. 1392, amended as we have requested, would be in accord with the program of the President.

Sincerely,

JOSEPH A. CALIFANO, Jr.,
Secretary ●

AMENDMENTS NOS. 3456 AND 3457

(Ordered to be printed and referred to the Committee on Finance.)

Mr. CRANSTON submitted two amendments intended to be proposed by him to S. 1392, supra.

URBAN MASS TRANSPORTATION AUTHORIZATIONS—S. 2441

AMENDMENT NO. 3458

(Ordered to be printed and to lie on the table.)

Mr. MUSKIE (for himself, Mr. BELLMON, Mr. PROXMIRE, and Mr. LUGAR) submitted an amendment intended to be proposed by them, jointly, to S. 2441, a bill to amend the Urban Mass Transportation Act of 1964 to provide new authorizations for the program of Federal assistance through fiscal year 1982, and for other purposes.

COMPREHENSIVE EMPLOYMENT AND TRAINING ACT AMENDMENTS OF 1978—S. 2570

AMENDMENTS NOS. 3459 AND 3460

(Ordered to be printed and to lie on the table.)

Mr. HELMS submitted two amendments intended to be proposed by him to S. 2570, a bill to amend the Comprehensive Employment and Training Act of 1973 to provide improved employment and training services, to extend the authorization, and for other purposes.

TUITION TAX CREDIT—H.R. 12050

AMENDMENT NO. 3461

(Ordered to be printed and to lie on the table.)

Mr. SCOTT submitted an amendment intended to be proposed by him to H.R. 12050, an act to amend the Internal Revenue Code of 1954 to provide a Federal income tax credit for tuition.

AMENDMENTS NOS. 3462 AND 3463

(Ordered to be printed and to lie on the table.)

Mr. HOLLINGS (for himself, Mr. ABOUREZK, Mr. BELLMON, Mr. DOMENICI, Mr. MARK O. HATFIELD, Mr. EAGLETON, and Mr. BENTSEN) submitted two amendments intended to be proposed by them, jointly, to H.R. 12050, supra.

NOTICES OF HEARINGS

COMMITTEE ON THE JUDICIARY

● Mr. EASTLAND. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Friday, August 18, 1978, at 10 a.m., in room 2228, Dirksen Senate Office Building, on S. 2361 and H.R. 10965, to revise, codify, and enact without substantive change, the Interstate Commerce Act and related laws as subtitle IV of title 49, United States Code, "Transportation."

This hearing will be before the full Judiciary Committee.●

SUBCOMMITTEE ON AGRICULTURAL PRODUCTION, MARKETING, AND STABILIZATION OF PRICES

● Mr. HUDDLESTON. Mr. President, the Subcommittee on Agricultural Production, Marketing, and Stabilization of Prices will hold hearings on legislation pertaining to the Federal crop insurance program on August 15 and 17. 1978. The hearings will commence at 10 a.m. in room 322 of the Russell Senate Office Building.

Because of time constraints, testimony at both of these hearings will be by invitation only. I plan to hold several more hearings in the not too distant future regarding proposals pertaining to the Federal Crop Insurance Corporation. It is my intention to accommodate all persons wishing to testify at these subsequent hearings.●

COMMITTEE ON GOVERNMENTAL AFFAIRS AND THE SUBCOMMITTEE ON CITIZENS AND SHAREHOLDERS RIGHTS AND REMEDIES TO HOLD JOINT HEARINGS

● Mr. METZENBAUM. Mr. President, the Governmental Affairs Committee and the Subcommittee on Citizens and Shareholders Rights and Remedies of the Judiciary Committee will hold joint hearings on S. 3005, "The Citizens' Right to Standing in Federal Courts Act of 1978." On August 16, the hearings will begin at 10 a.m. in room 1202 Dirksen Senate Office Building on August 23, the hearings will begin at 10 a.m. in room 2228, Dirksen Senate Office Building.●

COMMITTEE ON THE JUDICIARY

● Mr. MATHIAS. Mr. President, I wish to announce that hearings scheduled for tomorrow, Friday, August 11, by the Judiciary Committee to review the FBI's forcible crime against banking institutions program, have been postponed. The hearings have been rescheduled for Friday, August 18, 1978, room 357, Russell Senate Office Building, at 10 a.m.

Those who wish to testify or submit a statement for inclusion in the RECORD should communicate as soon as possible with the committee office, 2226 Dirksen Senate Office Building, telephone (202) 224–5225.●

ADDITIONAL STATEMENTS

VETERANS' HOUSING BENEFITS IMPROVEMENT ACT OF 1978

● Mr. MATHIAS. Mr. President, I was pleased that the Senate, on August 7, 1978, passed H.R. 12028, the Veterans' Housing Benefits Improvement Act of 1978.

The provision of that bill with which I am particularly pleased is the one which would provide that the VA guarantee loans for the purchase of an apartment unit in an approved converted condominium development.

In March of 1977, I, along with Senator STONE, introduced S. 989, providing for just such an expansion of the VA home loan guarantee program by including condominium conversions.

At the present time, the VA will only guarantee home loans for new condominiums. It does not guarantee home loans for buildings converted to condominiums. This is an inequitable situation which excludes from VA guarantee many substantial homes and apartment buildings which have been converted from rental to the condominium form of ownership. This also limits the housing options available to veterans.

The apparent reason for limiting VA loans to new condominiums was an interpretation by the VA that it was not the congressional intent to permit the VA to offer loans for converted condominiums. Section 5 of H.R. 12028 serves to correct this mistaken impression.

Virtually unknown in the early 1960's, condominiums are now sold all over the country. According to some estimates there are over 1.25 million condominium homes in the United States.

In a 1975 report to Congress, the Department of Housing and Urban Development stated that most economic, social, legal and environmental factors stimulating new condominium development also encourage the trend toward converting existing apartments to condominiums. As of March, 1975 there were 125,000 condominium conversions in this country. Last year alone, there were between 12,000 and 15,000 such conversions in both Chicago and Houston. Los Angeles, San Diego, and Washington, D.C., had similar volumes. There appears to be a national trend toward this form of homeownership and the option should certainly enjoy all of the financing and Federal guarantee benefits which are available for the purchase of a conventional home.

In a March 1978 report on condominium homeownership, the General Accounting Office recommended that the VA guarantee loans on individual condominiums in converted buildings. The report states that condominiums are expected to occupy an increasingly large proportion of the housing market in all parts of the country in the coming years.

Mr. President, I need not reiterate to you or my colleagues the numerous statistics on our inflationary housing market and the fact that three-fourths of our Nation's families cannot afford the median-priced new home today. The condominium form of homeownership offers one way for some of those people to buy a home because frequently the financing terms and sales price are less expensive than the terms for a conventional fee simple house.

Many of our veterans have not been able to afford a home and are currently renters. Section 5 of H.R. 12028 would provide them with the one homeownership option which could put owning a home within their financial means.

I commend the Veterans' Affairs Committee for including this provision in the Veterans' Housing Benefits Improvement Act of 1978.●

THE VIETNAM VETERAN

● Mr. HART. Mr. President, on July 27, the Washington Post carried an editorial by Stewart F. Feldman, a lawyer who has been active in efforts to focus national attention on the plight of the Vietnam veteran.

Mr. Feldman's article underscores our failure to recognize the contribution of the Vietnam veteran during this difficult period in the Nation's history. He reminds us that the nature of armed conflict has changed in the years since World War II—an event which has significant implications, both for the conduct of American foreign policy and for the men and women who must—when necessary—defend the Nation's interests in time of war.

Mr. President, I ask that Mr. Feldman's article be printed in the RECORD.

The article follows:

[From the Washington Post, July 27, 1978]

OUR FAILURE TO DISCUSS VIETNAM

(By Stuart F. Feldman)

There was probably as much heroism by American servicemen in Vietnam as in any previous war. Yet the Vietnam veteran doesn't know whether he is a hero, an honorable man for serving his country, or a fool for not evading the draft. Partly this is because of the unpopularity of the war at the time it was being waged. But a large part of the reason for the confusion in the minds of Vietnam veterans has to do with our failure to discuss Vietnam and what it meant, now that it is behind us.

Both a recent book—"Chance and Circumstance" by Lawrence M. Baskir and William A. Strauss—on the unfortunate and unfair workings of the draft and reports of candidate Jimmy Carter's speeches illustrate the problem. Both seem to take the position that people served in Vietnam because they weren't bright enough to know where Canada was or to take advantage of the multitude of ways to escape their citizen's responsibility. Neither fully acknowledged the fact that many people served in the military because they saw it as their citizen's duty.

Robert Morris, an eloquent Vietnam veteran, wrote in a letter to The Washington Post on Oct. 11, 1977: "In candor, I never knew what to think of the war either; never knew, even while I was there, whether committing U.S. forces in Vietnam was the right decision. I believed explicitly only in this: The government should be able to raise and deploy troops in accordance with decisions properly made in the national interest."

That is a view I share.

Payment of the nation's just debts to Vietnam veterans might start to strip away the

barriers to a consensus on America's future role in the world—barriers that now seem to hamper our ability to act. The disillusionment from Vietnam seems to convince many that we should never commit our troops or resources overseas again, except perhaps in Europe.

A president's Week for Vietnam Veterans, climaxed by a nationwide presidential fireside address on the honorable service of those citizens and the responsibilities of citizenship, could be a major first step in a needed nonpartisan discussion of Vietnam.

Some special presidential recognition of Vietnam veterans would, I believe, help many of them feel more at ease with their government. It might also provide them with some sense of absolution for their part in a war that so many of their fellow citizens have denounced as "immoral" or "needless" or just plain wrong. A large number of Vietnam veterans and their families are now bitterly opposed to military service. They convey that attitude to their younger brothers, relatives and friends. It may be one reason the volunteer army is having such a hard time obtaining high-caliber recruits.

A poll made in conjunction with one of the Hollywood movies made about the war showed that 61 percent of those surveyed thought that the nation needed to discuss the events of the war. Other recent signs, including the release of at least eight war-related movies, hour-long television specials on Vietnam veterans by ABC and CBS and a cover story by the Atlantic, suggest that there is, indeed, some public readiness to face up to the meaning—and the lessons—of Vietnam.

In a Memorial Day address at Loyola College in Baltimore, Clark Clifford, a secretary of defense under President Johnson, said his generation, by wrongly comparing Hitler's Germany and post-World War II Soviet expansionism to Vietnam, conducted a war that was "a disaster." The National Review of June 23 carried an analysis of the war by Norman Hannah, a retired Foreign Service officer, who also called for a dispassionate nonpartisan review. In the July Harper's, psychologist Jeffrey Jay, a fellow at George Washington University's Center for Family Research, called the Vietnam veteran a scapegoat and a victim of silence surrounding the war. He, too, urged a national debate on Vietnam for the sake of the veterans' mental health. In reviewing a book in The Washington Post, one of West Point's brightest young products, Josiah Bunting, who left the Army over the war, made a negative analysis of the officer corps' performance. All of these are recent harbingers of a willingness to examine the past for whatever it might tell us of how to proceed in the future.

Although presidential recognition of Vietnam veterans is crucial, any response requires a substantive effort to reshape and improve a number of government programs related directly to the problems of Vietnam veterans and involving education, medical care, various forms of "amnesty" for "bad paper" (less than honorable) discharges comparable to the blanket forgiveness bestowed upon draft evaders. This may require the expenditure of significant amounts of money as well as symbolic gestures by the president. But the sums involved are trifling when you consider the national obligation to those who served in Vietnam and to the importance of straight-thinking about the war and its relevance to the future conduct of American foreign policy, in honoring that obligation.●

HONEST MONEY

● Mr. GARN. Mr. President, the role of money in society is that of a measure of economic value. It is a pledge that my labor or goods can be exchanged for something of equal value. When I surrender something valuable in exchange for money, the pledge that accompanies that money is that it can be used to obtain something else of equal value. Inflation distorts that. It makes the exchange of value less than equal. Inflation violates the economic agreement.

Henry C. Wallich, a member of the Board of Governors of the Federal Reserve, has written an illuminating article that was published in the August 3, 1978, edition of the New York Times. In his article, "Honest Money", Mr. Wallich notes that with a changing value of our money—

> Our economic dealings will be neither efficient nor even honest. . . . Inflation is like a country where nobody speaks the truth. It introduces an element of deceit into all our economic dealings.
>
> Inflation has ended the dollar's role as a trustworthy measure of values.

My colleagues are familiar with the classic inflation of post-war Germany. A man could work all day and by the time he received his wages perhaps have money worth enough to buy a loaf of bread. Mr. President, we need a dollar that is worth the same value when it is paid and spent.

A great concern with inflation is the problem of disintermediation. As Mr. Wallich points out, the average saver "is not allowed to obtain an interest rate reflecting inflation." With savings interest rates fixed and inflation rising, there comes a point when the small saver is unwilling to leave his money in an account where it loses 3 percent or more in value, compounded quarterly. The individual spends his money as soon as he gets it, before it loses any more value, compounding the problem.

Mr. President, inflation is a hostile economic environment. As Mr. Wallich suggests, it is a situation of survival of the fittest:

> Inflation is a means by which the strong can more effectively exploit the weak. The strategically positioned and well-organized can gain at the expense of the unorganized and the aged.

I reject the argument that a certain level of inflation is acceptable. By its nature, it is unpredictable. If it was possible to maintain a steady rate of inflation, then by the same means it would be possible to maintain an economy with no inflation. Mr. Wallich states:

> But, any specific allowance made for inflation . . . is bound to be speculative.

Thus, the value of the dollar in my pocket today is going to be unpredictable tomorrow.

I agree with Mr. Wallich. "There is no substitute for honest money."

Mr. President, I commend the article by Governor Wallich to my colleagues and ask unanimous consent that it be printed in the RECORD.

The article follows:

[From the New York Times, Aug. 3, 1978]

HONEST MONEY

(By Henry C. Wallich)

WASHINGTON.—We have been learning for some time that inflation damages the economy and all that live by it. But inflation does more than material damage.

Inflation has ended the dollar's role as a trustworthy measure of values. Dealings and contracts based on the dollar have become deceptive. This is not simply a cause of economic injury, it is a moral as well as an economic issue. Without honest money our economic dealings will be neither efficient nor even honest.

If our contracts were made in terms of frequently shrinking measures of weight, time or space, as we buy food, sell our labor, or acquire real assets, we would probably regard that as cheating and as intolerable. Yet the case is much the same when we are dealing with monetary values. Nothing that is expressed in dollars any longer means what it says. Inflation is like a country where nobody speaks the truth. It introduces an element of deceit into all our economic dealings.

Everybody now makes contracts knowing perfectly well that they will not be kept in terms of constant values. Everybody expects the value of the dollar to change over the period of the contract. But any specific allowance made for inflation in such a contract is bound to be speculative. We do not know whether the most valuable part of the contract may not turn out to be the paper it is written on. This condition cannot be reconciled with honesty.

The moral issues posed by inflation go beyond what I consider deceit. (There are other forms of moral deficiency, and inflation involves some of the least attractive.) Inflation is a means by which the strong can more effectively exploit the weak. The strategically positioned and well-organized can gain at the expense of the unorganized and the aged.

Inflation is also a means by which debtors can exploit creditors. The debtor's burden is reduced by inflation, the creditor's assets are decimated. (High nominal interest rates provide no adequate compensation since interest is tax-deductible to debtors and taxable to creditors.) The small saver, by law, is not allowed to obtain an interest rate reflecting inflation. Interest-rate ceilings on savings deposits see to it that he will be a sufferer from inflation.

In the eyes of economists and of government, inflation becomes a means of exploiting labor's "money illusion," namely, its supposed belief that "a dollar is a dollar is a dollar." It is thought that labor will respond favorably to a seemingly large wage offer that subsequently is eroded by inflation. If labor fails to notice the trick, it will keep working for less than it really demanded, and employment will be higher. But a government pretending to serve the nation's interests by, say, misinforming the people about its military plans would be harshly taken to task. Why should trading on the people's money illusion be regarded differently?

Business accounting is made deceptive by inflation. Illusory profits on inventories, and likewise illusory profits due to depreciation rules that allow to take into account only original cost instead of replacement cost of plant and equipment, grossly exaggerates true earnings. Taxes and dividends are paid from possibly nonexistent profits.

Inflation also undermines the honesty of our public policies. It allows the politician to make promises that cannot be met in real terms, because, as the Government overspends trying to keep those promises, the value of the benefits it delivers shrinks. A permissive attitude toward inflation, allowing politicians to validate their promises by money creation, encourages deceitful promises in politics.

Inflation becomes a surreptitious means of promoting changes in our economic, social and political institutions that circumvent the democratic process. Inflation may end up making the existing system unviable. It does so, for instance, by making it almost

impossible to provide for the future by private action. Personal savings, insurance, pension funds all can be wiped out by accelerating inflation. Under conditions of inflation, only the Government, then, can offer security. The Government pensioner, reliably indexed as he is today, runs no risk short of a strike at the Bureau of Engraving and Printing.

Inflation similarly threatens to deliver business into the hands of government. As profits cease to be measurable, strong firms become less strong, less strong firms become marginal. Dependence upon and eventually absorption by government may be the only solution.

There is no substitute for honest money.●

MEDICARE-MEDICAID REFORM ACT—S. 1470

● Mr. HUDDLESTON. Mr. President, last week the Senate Finance Committee acted favorably on S. 1470, the Medicare and Medicaid Administrative and Reimbursement Reform Act, reporting this important legislation to the Senate as an amendment to a minor tariff bill, H.R. 5285. My distinguished colleague from Georgia, Senator TALMADGE, has authored and worked on this legislation for more than 3 years in an effort to design a system of incentives for efficiency in hospital management. The final product approved by the Senate Finance Committee is a promising ally in the fight to contain rising hospital costs.

Health care inflation is a major problem but it is also a complex area in which hasty, ill-conceived Government controls can be dangerous to the quality of medical services. That is why I support the Finance Committee's proposal which reflects years of study and debate and that is also why I oppose any last minute attempts to expand this important legislation by adding standby hospital price controls which include vast new regulatory powers for HEW.

Senator TALMADGE deserves our support for attacking the issue of health care inflation in a responsible manner and offering us a promising measure for containing future cost increases without jeopardizing quality and service.●

A BOW TO THE "LADY KATIE"

● Mr. MATHIAS. Mr. President, as we sit in this Chamber toiling away the summer without respite or relief in sight, it is perhaps thoughtless of me to remind my colleagues of how much more pleasantly we could be spending these dog days. But, the New York Times on August 6 published such a delightful and evocative article on a skipjack cruise on Chesapeake Bay that I want to share it with my colleagues no matter what invidious thoughts it may inspire.

The writer, Richard Lyons, has managed to convey the full romantic flavor of Maryland's magnificent native craft, the skipjack. His description of a 4-day cruise of the bay aboard the *Lady Katie*, a 65-foot sloop, brings to life a Maryland which few Marylanders even know.

Mr. Lyons describes his cruise as "4 days and 3 nights of smiles," and, in the thought that vicarious pleasure is better than no pleasure at all, I ask that Richard Lyons article, entitled "A Voyage Aboard a Vanishing Species," be printed in the RECORD.

The article follows:

[From the New York Times, Aug. 6, 1978]

A VOYAGE ABOARD A VANISHING SPECIES

(By Richard Lyons)

The captain of a passing pleasure craft fixed us with an appraising eye, then broke into an appreciative grin as his 35-knot twin-diesel fiberglass sports cruiser flashed by while we cleared Sandy Point and entered Chesapeake Bay. He swung around in his cushioned chair on the flying bridge, raised a bullhorn and electronically bellowed across the waters: "You're looking might pretty, Lady Katie."

The praise was for our 65-foot skipjack, the Lady Katie, a classic sloop that has been restored to almost mint condition. She is one of the last of her class to prowl the bay and the only one available for charter.

Several months ago I spotted a small notice in a local weekly newspaper stating that the Calvert Marine Museum in Solomons, Md., had chartered the Lady Katie for several weeks and was soliciting cruise passengers. Eager to latch onto a vanishing bit of Americana, especially if it involves boats, I quickly reserved places for myself and my two children, David 15, and Abigail, 13. The price was $35 a day a person—adult or chi d—with breakfast and lunch, but not dinner, included. The Lady Katie sleeps six or eight passengers in something less than privacy, but the children and I are not the kind to worry about that.

The result was four days and three nights of smiles as we sailed around some of the Chesapeake's backwaters, where our landings always brought out well-wishers.

"It's like seeing a horse and buggy again," said Capt. Stanley Larrimore as he watched the enthusiastic welcome at our first stop, the college dock at St. Marys City, Md. "People see a boat like this and they can't help but smile because they never expected to see one again. It's nostalgic."

But in Chesapeake Bay the skipjack, a native design, is an object of something stronger than nostalgia. Outlines of skipjacks abound, from cocktail napkins to the cover of the current Annapolis phone book. The skipjack is, in truth, the totem of the bay. And, like other vanishing bits of Americana, the enthusiasm has developed in inverse proportion to availability.

The Lady Katie is one of only 28 skipjacks left of a fleet that numbered over 500 several generations ago. As the number has diminished a cult has developed, with a few boats having been purchased by the well-to-do who seek to keep an endangered species barely alive.

COURSE TO THE POTOMAC

The Lady Katie had lured five other passengers, all from the immediate area, for the first day's sailing. South of the Patuxent River the jib and mainsail were set wing-and-wing and their 665 square feet sped us along at up to 10 knots. The wind swung out of the north, perfect for our course past Cedar Point, Md., to Point Lookout, Md., and the mouth of the Potomac River.

The pewter skies of the last three days gave way to bright sunshine as we swung past Point Lookout, came about and beat into the wind up the lower Potomac. Lunches of fried chicken, potato salad, garden salad and homemade chocolate cake had been prepared by the organizer of the trip, Dorothy Ordwein of the marine museum. We took these to the deck and they were gobbled down quickly by the eight passengers, Captain Larrimore and his mate, Frank Edwards.

We bore off the Potomac into the scenic St. Marys River where on March 27, 1634, two ships little larger than our own, the Ark and the Dove, arrived from England and landed Maryland's first pilgrims. Their leader was Leonard Calvert, the brother of Cecil Calvert, Lord Baltimore. The former found at St. Mary's an Indian tribe that was about to abandon its village. He bought the used wigwams for temporary quarters, then built a fort. In time the first state house was erected and St. Marys City became the state's first capital.

The area is as verdant today as then, for St. Mary's City, which has a permanent population of only 300, has changed little over the last three centuries. The "city" has a college, the old St. Marys Women's Seminary, and reconstruction has begun on some of the buildings raised during its moments of glory before the state house was moved to Annapolis in 1695.

'WHOLE TOWN' TURNS OUT

After tying up at the college dock and disembarking five passengers who had been aboard merely for a day's sail, we cast off, crossed the river under the gaze of a bunch of ospreys nesting atop the channel markers, and put in for the night at the Dennis Point Marina where, again, people ambled down to the dock to see the Lady Katie.

"Everywhere we go the whole town comes out to look at us," my son said as, right on cue, a voice across the marina shouted: "Hey Charlie, look at the skipjack."

Captain Larrimore had not put in at the marina in five years, yet the owner, D. Tracy Gardiner, greeted him like an old friend, saying: "What you up to, Stanley?" After eight hours aboard, we hopped off to dine at the marina. Mrs. Gardiner fixed us an emergency pizza which, considering that those aboard the Ark and the Dove, when they first went ashore, were forced to make do with oysters and venison, is a note on culinary evolution in 300 years.

It was the evening of July 4 and Mr. Gardiner loaded passengers and crew, as well as his wife and three sons and a dozen others, onto a truck and drove us all into the hamlet of Valley Lee where the volunteer fire department was celebrating with a country carnival and fireworks. Just about every pick-up truck in southern Maryland seemed to be there and the 30-minute fireworks display, if not the largest ever seen along the banks of the Potomac, was certainly the most appreciated.

We bedded down in clean spartan quarters amidships, but rose sluggishly at 6:30 having overconsumed barbecued corn chips, cotton candy, Mello bars and black powder. We were quickly underway, first under power in the St. Marys River, then under sail in the Potomac headed for Smith Island.

Blue water sailors may scoff, but the lower part of the Chesapeake seems vast although it is little more than 25 miles between the eastern and western shores at the widest points. Yet the bay is almost the size of Connecticut, its north-south axis stretching 200 miles. The bay has been characterized as the best fishing hole in the world, and it has been this abundance that has supported generations of watermen. Captain Larrimore's family has made its living off the bay for 150 years.

OYSTER HARVEST IN WINTER

From November through March 15 the Lady Katie and her sister skipjacks work the bay's oyster beds, sometimes dredging as much as $1,000 in an afternoon. By law, most of the time the skipjacks must remain under sail but some days they are permitted to use power. For this they employ push boats, about the size of rowboats, on which powerful auto engines have been mounted. Most of the rest of the skipjacks are idle in the summertime; the Lady Katie is for charter, both through the museum and through her captain.

Late in the afternoon after making 26 miles from the St. Marys River we arrived at the western channel into Smith Island, a series of sandy beaches and mud flats named

after Capt. John Smith, an early white explorer of the bay. About 600 people live on the island, most in the hamlet of Ewell. The channel is lined with crab shanties, flimsy shacks where the local watermen keep their crabs until they are shipped live to the mainland.

The main channel is Venice with a Tobacco Road flavor. Abandoned cars, rotting docks and other discards, both manmade and natural, were everywhere. The sight of the Lady Katie, however, even produced comments from the taciturn islanders. "Ho, Stanley," was the common cry. We alighted, walked up the main street, which is nameless, and eyed the largest landmark, the Ewell United Methodist Church, and its graveyard.

The headstone that caught my eye had engraved on it the outline of a skipjack and the words: "David R., son of Noah A. W. & Margaret A. Tyler, Born Aug. 23, 1874, died Feb. 10, 1904," then verses of "Nearer My God to Thee."

The island was settled in 1657 by religious dissenters who fled the mainland. Most were converted to Methodism by Joshua Thomas, the "parson of the island," 150 years later. Methodist tracts are abundant, even being stacked in the island post office.

Hungry from a day on the water, we hurried by foot over to the Pitchcroft Restaurant where Barabara Dize was presiding over the range. It was the seafood dinner all around and she overwhelmed us with island delights. Crab soup came first, rich with succulent morsels of crabmeat mixed with local vegetables into a consistency like a thick Manhattan clam chowder. Then out came platters piled with softshells, known locally as paperthins, plus crab cakes, shrimp and macaroni salad, and the biggest treat of all, wafer- thin clam fritters. Add green beans, spiced apples, boiled kale, spoon biscuits and bread pudding for dessert, and we left the table limp with overindulgence.

THE TASTE TRIUMPHS

My children, whose suspicions of strange food increase the farther they are from a McDonald's, wolfed everything down, even the softshells, which even I normally find put me off, I watched my daughter as she bit into a softshell, and was rewarded as her eyes glazed with approval.

We loafed back to the boat, stopping along the way to hear from an old friend of Captain Larrimore the story that is still the talk of the island, the Great Safe Robbery. The winter before last, it seems, someone stole a 180-pound steel safe from the home of a local waterman. The safe was said to contain $67,000 in cash. Neither the money nor the safe was ever found even though the island was iced in at the time, and remained so for weeks, and the ground was too hard to dig a hole to hide it. There were no tracks leading to or from the house.

Theories and suspicions are running high, even now, with the generally accepted notion that the $67,000 that was said to have been in the safe was actually many times that amount. Smith Islanders seem to have an independent mind about banks, and most of the local transactions are for spot cash.

Claps of thunder pushed us back to the boat where we were greeted by flying insects of Olympian dimensions and fearless disposition.

Doused with mosquito repellent and logy with food, we quickly fell asleep only to be awakened by a blare of auto horns and a blast of auto engines whose mufflers had been eroded by the salt air. Could it be that, almost cut off from civilization and tetched with loneliness, the islanders go slightly bonkers from time to time? I was too blissful to investigate further.

We were up at 7 and off through the eastern channel to Deal Island, nearer the Eastern Shore. The trip took much of the day as we beat against an unfavorable wind. We moored the Lady Katie at the Last Chance Marina near the hamlet of Chance, dined on crab burgers, tolerantly eyed several drunken women as they lurched from boat to boat demanding to be taken to a local hot spot, and turned in early exhausted not by exertion but by the first real relaxation in months.

By the afternoon of the next day we were back at the dock of the Calvert Marine Museum, saying our goodbyes. Leaving in the car I saw a few buildings away a newspaper vending machine. The paper in its window had a large black banner headline. I had not seen a newspaper or heard a news broadcast for three days, yet I averted my eyes. I did not want to know. What I really wanted to do was turn the car around, go back to the dock and get aboard the Lady Katie again.●

POPE PAUL VI

● Mr. WILLIAMS. Mr. President, I would like to take a moment today to honor the memory of Pope Paul VI, truly one of the great spiritual leaders in modern times, and a man to whom the world looked for guidance and inspiration.

He was a natural diplomat, a statesman, and a missionary.

In his own words, he "lived to serve God by serving God's people," and left behind a legacy of rapprochement with other Christian religions unequaled in many years.

For the first time in centuries, relations were established again with the Catholic Churches in Constantinople and England, because he made a special effort to mend the rift which had been allowed to grow among members of the same faith.

Paul's doctrines gave hope to missionaries and clergy, too, who were fighting for justice and human rights in Third World countries, where the policies of totalitarian governments ran contrary to the teachings of the church. He was their ally in the struggle to overcome the problems of the poor and downtrodden.

Paul was pope at a time of tremendous political, social, and scientific turmoil which demanded changes from the Catholic Church. His flock of 600 million looked to him for guidance and direction during a period of rapid changes.

Paul traveled the globe, meeting with religious leaders of all faiths to foster world peace and encourage spiritual unity. At the same time, he internationalized the Catholic Church and changed the administration within its own ranks. He spread the responsibility for administration throughout all levels of the clergy and encouraged more personal involvement and greater flexibility in faith and practice.

Certainly, not everyone agreed with the path Paul chose for the Catholic Church during his 15-year reign, but everyone must agree that he was a dedicated and pious man whose every action was guided by what he considered to be the church's fundamental laws.

We can all trust that the Cardinals will choose a man equally as capable and forward-looking to be his successor.●

ALASKAN LANDS LEGISLATION

● Mr. BROOKE. Mr. President, I am cosponsoring the Alaska National Interest Lands Conservation Act (S. 1500/ Amendment 2176) because it represents the most significant land and wildlife conservation program ever presented to the American people. We must preserve as much of Alaska's precious and, in some instances, fragile natural environment as possible.

The reason for the present debate over Alaska—or, the Great Land, as it is called by the Native Aleut people—can be traced to the 1958 Alaskan Statehood Act. Under its terms, Alaska was given 25 years to select 103.5 million acres of unclassified Federal land for itself; the State had the opportunity to choose the acreage from well over 300 million acres of unreserved Federal lands.

As in the 1884 Organic Act, the Congress attempted to protect native claims by providing that the "State and its people do agree and declare that they forever disclaim all right and title * * * to any land * * * which may be held by any of the Indians, Eskimos, or Aleuts." But, during the selection process, native Alaskans claimed that the law was being violated and that important Indian lands were being taken over by the State, including the lands on beautiful Lake George, the 2 million acres of shore known as the North Slope and the land surrounding the lakes near Minto Village, one of the world's best duck breeding grounds.

In response to the claims made by the Alaskan Natives, former Interior Secretary Stewart Udall halted the transfer of additional lands (5.8 million acres had already been transferred to the State, and an additional 20.2 million acres had either been selected or granted tentative approval by the Bureau of Land Management), suspended further oil and gas leasing, and finally imposed a "land freeze" in 1966 until Native claims were settled.

To provide adequate title to land for the Natives, and spurred in part to settle claims before the planned construction of the trans-Alaska pipeline, the Congress in 1971 passed the Alaska Native Claims Settlement Act (ANCSA). The bill set aside 116 million acres of Federal lands, and it allowed 44 million acres to be selected by Native corporations. One provision of ANCSA which I supported provided for the Federal Government to withdraw additional acreage and for the Congress to classify it or any other Federal lands into our four land conservation systems by the end of 1978; that provision was section 17(d)(2).

The need to protect the so-called D–2 lands falls squarely on the shoulders of the 95th Congress. It is our responsibility to pass a comprehensive conservation program to incorporate Alaskan lands into our four land use systems: national parks, wildlife refuges, forests and wild and scenic rivers. I believe we should preserve as much as possible of the great land for ourselves and for future generations.

The House of Representatives has already acted on this important national issue. Last May, the House passed H.R. 39. While the bill represents a good conservation program, we would be deceiving ourselves if we did not admit it was a compromise solution. The final bill included nearly 102 million acres—not in-

cluding 22.5 million acres of the national petroleum reserve which was redesignated as a "wildlife refuge"—and 65.5 million acres was given a "wilderness" designation. But, as originally proposed, H.R. 39 would have included 115 million acres and the wilderness designation twice as much acreage.

I believe that S. 1500/amendment 2176 comes closer to the original intent of H.R. 39. It covers a total of 110 million acres, with 88.2 million acres to be placed under the wilderness designation. And, its wilderness designation will be applied to 4.7 million acres in southeastern Alaska which contain such truly majestic areas as Admiralty Island and West Chichagof-Yakobi, as well as the spectacular Misty Fiords and several other areas which were eliminated from the wilderness designation in the House-passed bill.

The proposed 2.3 million acre Misty Fiords Wilderness is located east of Ketchikan at the southern tip of the Alaskan Panhandle. It is an area where fiords weave their way back toward mountains which look like sharp-toothed stalagmites rising in the distance. Along the shore, the grey mists of the Pacific appear to blend into the dark rainforest of spruce, hemlock, and cedars which stands in silent splendor. The area is the home of a variety of wildlife, including four species of bear—brown, cinnamon, black and glacier—and mink, mountain goats, marten, and muskrats. And, complementing the entire scene are waterfalls cascading down mountain cliffs.

Admiralty Island and the West Chichagof-Yakobi Islands are no less spectacular. The 860-mile shoreline of Admiralty Island is crowned with bald eagle nests; there are nearly as many bald eagles on this portion of the Tongass National Forest as there are in all the lower 48 States. And, on West Chichagof-Yakobi Islands, sea otters flourish at Surge and Khaz Bays near the forests of Sitka spruce and western hemlock which rise toward the heavens.

Another one of the many important areas which would be incorporated under S. 1500/amendment 2176 would be the additions to the Arctic National Wildlife Range. And it is here that one of the primary goals of the Alaskan Lands bill is most vividly demonstrated: The attempt to preserve entire ecosystems for wildlife. In 1960, when the existing 8.9 million acre Arctic National Wildlife Range (ANWR) was created, additional adjoining acreage which is extremely important to distant traveling caribou, wolves, and bear was omitted. S. 1500/amendment 2176 will increase the size of the ANWR in Alaska's northeastern corner by 9.4 million acres, about 1 million acres more than under the House-passed bill.

In total, S. 1500/amendment 2176 will add 47.5 million acres to our national park system, along with 56.5 million acres to our national wildlife refuge system. Also, 3.04 million acres would be added to our wild and scenic rivers system and 3.34 million acres would be attached to our national forests. The wilderness designation would be given to over 62 million acres of the additions to the national wildlife refuge and park systems.

Many of the opponents of the "D–2" lands proposal which I am cosponsoring have bitterly protested that the bill would "lock up" a large portion of Alaska's mineral wealth. However, studies conducted on this issue do not agree with that conclusion. Indeed, the congressionally established Joint Federal-State Land Use Planning Commission for Alaska found that S. 1500/amendment 2176 would not adversely affect the State or the Nation. Specifically, on the question of oil and natural gas development, the Commission reported that:

> The bulk of potential Alaska and national oil and gas, and other energy resources, will continue to be available for exploration and development purposes. The impact of continued closure of the Arctic National Wildlife Range simply means that energy resource development will proceed in other areas favorable for exploration, development and production.

And, on the question of mineral development, the Commission said that:

> The nation is not presently dependent on Alaska hardrock minerals, and important areas for mineral development remain outside of the (d)(2) lands. Alaska minerals are not necessary to meet strategic mineral demands of the United States.

I believe it is important to note that 60 percent of Alaska's lands with metallic mineral resource potential lie outside of the boundaries envisioned under S. 1500/amendment 2176. And, this means that 93 percent of our Nation's hardrock mineral resources are unaffected by the bill.

In keeping with our genuinely balanced approach, about two-thirds of Alaska's 375 million acres will be open to all economic activity—including over 100 million acres of residual Federal lands, 44 million acres of tidal and offshore lands another 44 million acres which have been turned over to Native Alaskans, and the 105-million acre statehood land grant. These areas will be available for timber harvesting, mining and oil and gas exploration.

I believe that sensitivity toward the needs of all Alaskans has been demonstrated by the allowed continuation of many activities on the D–2 lands and by the protection of existing private rights S. 1500/amendment 2176 provides for the continuation of subsistence fishing and hunting by Alaskan Natives and other local residents, provided they choose this lifestyle. And, established patterns of access to land are protected, including access by motorboats, snowmobiles, and float plane landings.

Alaska is separated from the lower 48 by a distance of 600 miles. But, in many respects, we are much closer to Alaska than the physical distance would indicate. For, to millions of Americans, Alaska is a state of mind. Alaska is a vision of undisturbed and unblemished splendor, where the pristine beauty of nature is retained. It is Aniakchak Caldera, one of the world's largest dry craters; and the Wrangell Mountains, which are glaciated and adjacent to the St. Elais Range; and the Charley River, the crystal-clear river which runs through the hilly Tanana uplands. It is the beautiful and dark Kenai Fjords; the Copper River which flows past the glaciers and steep peaks of the Chugach Range; and the arresting Katmai Valley, formed by the volcanic explosion of Mount Katmai in 1912. Alaska is clean, wild, free, expansive, and majestic. And we have an obligation to the American people to keep it that way.

The vision of an Alaska clean and free is not inconsistent with the reality of an Alaska open to resource mining and exploration. By far, the greater portion of Alaska's 71.5 billion barrels of petroleum lies outside the boundaries recommended under S. 1500/Amendment 2176. And, we will still have the opportunity to mine the State's extensive mineral wealth in copper, fluorine, iron, nickel, platinum, mercury, and lead under a comprehensive management program—when and if those mineral resources become competitive on the world market.

Passage of S. 1500/Amendment 2176 would not only be a tribute to the American people, but to the distinguished men and women who have spent so much of their lives stressing the need to conserve Alaska's wilderness. These individuals include the late Senator Lee Metcalf, who introduced the original version of the Alaskan Lands bill during the 1st session of the 95th Congress; to Robert Marshall, the cofounder of the Wilderness Society who wrote in the 1920's about the dream of a preserved Alaskan wilderness north of the Yukon River; and to Art Davidson, the dedicated conservationist who was among the group which made the first winter ascent of Mount McKinley.

The need to pass S. 1500/Amendment 2176 in the Senate has never been stronger than it is today. Because the House-passed bill is already a compromise solution to the D–2 issue, we must have a comprehensive environmental bill to take into the subsequent conference committee.

Presently, the Senate Energy Committee is discussing all of the Alaskan Lands bills submitted in the 95th Congress and that action has led many people to conclude that a compromise is in the offing. I am deeply concerned about our ability to protect the integrity of the approach and thus, the integrity of Alaska's wilderness. I only wish I could say confidently that most of my colleagues shared my views on this important matter. It will take a great deal of work and education before we have real hope of victory.●

OVERWHELMING MAJORITY OF AMERICANS OPPOSE TUITION TAX CREDITS

● Mr. ABOUREZK. Mr. President, on July 27 the Roper Organization, a nationally respected polling firm, released a poll showing broad public opposition to tuition tax credits for private elementary and secondary schools tuition, as well as for tax aid for college tuition.

Among the findings of this nationwide poll was the finding that only 9 percent

of the public supports a proposal recently approved by the Senate Finance Committee which allows tuition tax credits for up to $250 a year for each college and vocational school student, effective this year, and up to $500 in 1980.

The Finance Committee also voted to allow tuition tax credits of up to $250 a year, beginning in 1980, for students in parochial and other private elementary and secondary schools. Yet, the Roper poll shows that only 28 percent of the public favors this measure.

The findings of this poll clearly show that when the public is presented with the alternative of expanding and broadening eligibility rules for existing student aid programs, or adopting a tuition tax credit as a means to aid families in meeting college costs, the public clearly prefers the student aid option.

This survey demonstrates that the public overwhelmingly rejects the Packwood-Moynihan scheme for cash tax credits, regardless of need. Tuition tax credits are not an effective, equitable, or efficient way to offer needed financial relief from education costs.

I hope that all Members of the Senate will carefully examine the results of this new survey.

Mr. President, I ask that the survey be printed in the RECORD.

The survey follows:

CHAPTER V—TAX AID FOR EDUCATION

CHAPTER SUMMARY*

A major issue with regard to tax reform during the past year has been that of providing tax aid for education. This study explored public opinion on tax aid for college tuition and for private elementary and secondary tuition.

Of four plans to provide tax aid for college tuition, the Carter proposal to make more middle income people eligible for government grants or loans by raising income eligibility was the most popular. A relatively small minority approved direct government aid to colleges and universities. But the public turns thumbs down on a flat $250 personal tax deduction annually when a child is in college—either for everyone regardless of income or for those with less than $25,000 income.

Furthermore, the public gives a resounding "No" to extending tax aid to private elementary and secondary schools. The idea is equally disapproved when parochial schools are mentioned and when they are not mentioned.

TAX AID FOR COLLEGE TUITION

With college tuition costs rising at a rapid rate, a number of proposals have been made for providing tax aid for college tuition. In this study four plans were put before the public as means of helping people cope with the cost of college. The question explained that all four would mean higher tax rates to bring in the extra billion and a half dollars each plan would cost.

The public turns thumbs down on a flat $250 annual tax reduction for each year a child is in college—either for everyone regardless of income or for those with less than $25,000 income. The Carter proposal to make more middle income people eligible for government grants or loans by raising the income eligibility for them was the most popular of the four plans, approved by one-third of the public. Only 1 in 5 approved direct government aid to colleges and universities so they can hold down tuition fees. Only 16% favored none of the plans.

All subgroups of the population agreed pretty much along the same lines on the four plans, including those who have children of college age.

Q23. There's a good deal of concern about the high cost of college. Here are four approaches that have been suggested for helping people cope with the cost of a college education—all of which would mean higher tax rates to bring in the extra billion and a half dollars that each of these four plans would cost. (Card shown respondent) Which of these plans would you favor, or wouldn't you favor any of them if it meant raising the tax rate?

[In percent]

	Total public	Total tax-payers	Have children 19 to 22
Number of respondents	2,007	1,684	189
Plan C: Make more middle income people eligible to get government grants or low cost college loans by raising the income ceiling under which these grants and loans are available	34	36	35
Plan D: Provide direct government aid to colleges and universities so they can hold down tuition fees	20	20	16
Plan B: A $250 reduction in taxes for those with less than $25,000 of income for each year a child is in college	14	14	19
Plan A: A $250 reduction in taxes for everyone regardless of income for each year a child is in college	9	10	11
None	16	16	15
Don't know	7	5	4

TAX AID FOR PRIVATE ELEMENTARY AND SECONDARY SCHOOLS

The public gives a resounding "No" to extending tax aid to private elementary and secondary schools. It was explained that the same four plans for college aid could be used for lower private schools, but that doing so would mean tax rates high enough to bring in four and a half billion dollars rather than one and a half billion dollars. On this basis, the public said it was opposed to extending aid to lower schools by 64% to 28%. For half the sample, the question asked about private and parochial schools, for the other half the question asked only about private schools, with no mention of parochial. Answers were virtually identical regardless of mention of parochial schools.

A majority of all subgroups are opposed to tax aid for private elementary and secondary schools with the exception of Catholics and even Catholics are more opposed (48%) than in favor of it (43%).

Q24X. These same four plans could be used for children in private elementary and secondary schools as well as for children in colleges But if they were extended to private schools it would mean tax rates high enough to bring in four and a half billion dollars rather than one and a half billion dollars. Would you be in favor of or opposed to extending tuition aid to private schools?

Q24Y. These same four plans could be used for children in private and parochial elementary and secondary schools as well as for children in colleges. But if they were extended to private and parochial schools it would mean tax rates high enough to bring in four and a half billion dollars rather than one and a half billion dollars. Would you be in favor of or opposed to extending tuition aid to private and parochial schools?

	Total public	Parochial schools not mentioned	Parochial schools mentioned	Total tax-payers
Number of respondents	2,007	1,004	1,003	1,684
Favor extending tuition aid to private schools	28	28	28	28
Opposed to it	64	65	63	66
Don't know	8	7	9	6

OPENING FOREIGN MARKETS TO AMERICAN AGRICULTURAL EXPORTS

● Mr. HAYAKAWA. Mr. President, I read with great interest a copy of the communique Ambassador Robert Strauss recently released regarding the ongoing trade negotiations. We have applauded in public the Ambassador's dedication, energy, and determination in pursuit of a very elusive goal, perhaps even illusory, given by the President, to negotiate an agreement "whose purpose is to create jobs, spur noninflationary economic growth in our cities and on our farms, and provide wider consumer choices."

But, as with the understanding reached on January 13, 1978, between the Ambassador and Japanese Minister of State for Foreign Economic Affairs Ushiba, serious and fundamental concerns clearly stand out.

If these concerns are not dealt with in terms of a simple mechanism to expand responsible access to foreign markets for U.S. agricultural products including California specialty crops, the ultimate result will be a reduction of America's market share abroad to its principal markets, and a significant measure of the industry's profitability. The administration's strategy to "spur noninflationary economic growth * * * on our farms" will have failed.

Before describing and assessing my specific concerns, one fundamental dilemma facing the United States may yet require further examination before it is resolved:

What do we in the United States perceive to be the goals of the EEC and Japan so far as America is concerned?

On the public record, Japanese demands on the United States are modest—some additional penetration in a few selected industrial areas, but none critical to that nation's economy which may have a trade surplus as high as $12 billion in 1978.

Some suggest Japanese strategy in Geneva is a negative or static strategy; that is, to prevent the United States from retreating to a more "protectionist" stance. Generally, under such conditions, few if any concessions are needed to maintain a status quo—fewer still if such a retreat is perceived by the Japanese as unlikely.

Under present negotiating conditions, perhaps it is a measure of Japan's success with a negative or static strategy that it has found unnecessary making worthwhile concessions.

For the EEC, unchallenged and unrestrained growth of a self-sufficient common agriculture policy (CAP), and the prospect of a European Monetary Union (EMU) leave unclear what value the EEC attaches to the U.S. requirement to open its market further to U.S. export growth in specialty crops in particular, or in commodity crops in general.

In connection with the EEC, Sir Peter Ramsbotham, United Kingdom Ambassador to the United States, told a small group of businessmen in 1974 that his estimate of EEC negotiating strategy was simply to prevent the United States from retreating from its then current trade policy.

As with Japan, a strategy aimed at simple preservation of a status quo requires little of value be given up. The modest character of EECs offers in Geneva so far tell much about how EEC strategy has worked.

Perhaps of further interest is a statement of EEC Agriculture Minister Finn Gundelach in Kansas City recently. He declared simply that the EEC does not want the EEC "farm deficit with the United States to get any bigger." This arbitrary and unilateral decision is not based on GATT principals, its articles or international summit statements.

The minister's pronouncement is a direct contradiction of his own statements about "trade liberalization" and at the same time attempts to set "pre-conditions" for MTN negotiations.

In sum, Ambassador Strauss' assignment may yield no positive result whatever, unless principal trading partners of the United States recognize the need to concede additional access to their markets. Perhaps the price to the EEC for such concessions is, in fact, the simple extension of present policies as Sir Peter and others understand them—no retreat. Without foreign concessions however, retreat is entirely likely, necessary, legal, and defendable.

Having seen the July 13 communique, though not the specific texts relating to individual items of the negotiations, I would like to briefly describe my specific concerns:

First, most appear convinced that the antidumping and countervailing duty statutes constitute the principal bargaining device needed to achieve the objectives of the Trade Act of 1974, and now simply repeated 3½ years later in the Geneva communique.

The Congress wisely made clear in the Trade Act of 1974, in section 303, that the special waiver on countervailing duty assessment be limited to only the first 4 years of the 5-year statutory life of the act.

The sole purpose of this section was to provide an inducement to our principal trading partners to make real the objectives of the Trade Act of 1974 for America through elimination or substantial reduction of artificial barriers to freer flow of trade around the world, during those first 4 years. It was also a threat that a U.S. retreat from previous policies might well follow a lack of understanding of U.S. objectives given life in a new trade agreement.

In that context, the July 13 communique speaks only in the vaguest terms about the countervailing duty/subsidy matter. It was overwhelming dismay that met Ambassador Strauss' suggestion that the administration may ask for an extension of the waiver.

But, on July 26, Treasury Assistant Secretary Bergsten testified before a House subcommittee of the House Banking Committee that the administration would recommend an injury test in the countervailing duty statute, without the slightest explanation beyond tidying up the provisions of GATT. There was no concern implicit for barriers put in place against California specialty crops exports by the EEC; just tidying up for no announced purpose or objective.

Is it the intent of Congress that any administration indulge in this kind of unilateral disarmament?

Second, I am concerned that no formal challenge has been made, on the public record, that Japan's use of quotas on agricultural products are illegal under GATT article XI, and unacceptable under section 301 of the Trade Act of 1974. Without challenge, Japan may already have concluded that the U.S. accepts the quota system without reservation.

Because of this lack of attention to the enforcement remedies provided in international law on domestic statutes, a serious breach has occurred in the administration's set responsibility under law to provide continuing access abroad for U.S. agricultural products. Without change from present course, California growers face a long-term reduction of profitable income, the State faces a loss of jobs and revenue, and a blow will have been dealt to the economic foundation of California agriculture itself.

At an International Business Outlook Conference panel in Los Angeles in February 1978, there were reports that Mr. Ushiba said this of Japanese import quotas—"legal or illegal, they will be continued." I believe that the expression speaks for itself.

Third, I am not aware that any administration witness before Congress has at any time alluded to section 122 of the Trade Act of 1974 as an additional incentive for U.S. trading partners to provide more access to their markets. The balance-of-payments authority provided the President in this section was approved by the Congress even though most were well aware that one oft-repeated theory among certain educators and scholars certified that a free floating exchange rate should be the final arbiter of prices of goods sent around the world.

Apart from any judgment on the efficacy of such theory, no part of the debate on the act, nor the Senate or House reports suggest that such a theory, if projected by an administration, would take precedence over the provisions of the act. Yet, in the past 2 years, we hear that more reliance is being placed on the theory.

Is it the sentiment of the Congress that all trade matters are to be decided by such a mechanism? Or, was section 122 put in place to provide remedy for too rapid a change in the trade balance, whether by efficiency or special subsidies adjustable by the foreign government to suit a given export objective?

Fourth, I am concerned about the language of the framework statement on agriculture, which states very clearly the principle that confrontations among world producers should be avoided and replaced by consultations, exchanges of information and a review body to lead to an "improved level of international cooperation." Without benefit of any specifics, this approach suggests a headlong advance to a world body to achieve what was called by the EEC "organized free trade" and is now referred to as concerted disciplines, a price-fixing international cartel.

A more appropriate term might be "managed economy." Although a lot of people reserve this expression for scare tactics, the implication is clear; government-to-government resolution of all foreign sales, for political purposes, and without regard to economics of production.

I believe the political concept, so often proposed recently by the EEC, and favored by the French for generations in varying cartel concepts must be resisted at all costs.

Fifth, I am concerned that no basis exists in the EEC for acceptance of any kind of dispute settlement mechanism that imposes measurable guidelines for conduct, and which imposes penalties for violations. Without a mechanism specifically designed for prompt settlement of disputes, "exchange of views" becomes a replacement for decisionmaking. Avoidance of trade disputes is a laudable objective; however, if the price of such avoidance is an economy in which U.S. agriculture's interests and economic superiority are negated, then the price is too high.

Such a price is not in the American tradition. It violates fundamental economics and is completely inconsistent with the thrust of U.S. economic enterprise.

Far worse is the prospect that the U.S. Government would become the international agent for all export sales, an ambassador in charge of computers, an ambassador responsible for dried prunes, one for apples, one for cars and so on. If no mechanism exists for responsible access to foreign markets, can U.S. enterprise survive in the export market?

Sixth, I am concerned about the vagueness of the language contained in the framework communique regarding subsidies. It does seem clear that it authorizes a clear drift toward the "managed economy" theory. For example, use of the phrase "equitable share of world trade in such product, account being taken of the shares of the signatories in trade in the product concerned during a previous representative period * * *" provides the opportunity, consultation and discussion without decision, and with the prospect that a monopoly or cartel conclusion could be reached without penalty to any party.

Seventh, I am concerned about the level of protest in connection with the

assessment by the EEC of an outrageous internal subsidy on dried prunes and peaches, and continuing threats by EEC members against walnuts. I have heard that further restrictions may be planned by the EEC on poultry imported from the United States—all these actions taken while good faith negotiations looking to "trade liberalization" were underway.

These barriers are all new. They go hand-in-glove with the Mediterranean Preference Scheme and the Rome Convention which are so patently mutually exclusive arrangements with the EEC that there is no longer room for dispute. This was done at the expense of all the EEC's trading partners.

In sum, I am concerned that there is not a single part of the "framework of understanding" which addresses itself to the discussion and analysis of such measures that are calculated to expand trade of U.S. products abroad, as required by law.

I agree completely with Mr. Bergsten when he says that:

> The United States has far more to gain from negotiating more open markets abroad than from closing off our own markets to imports.[1]

But not a single word goes to the matter of opening up those foreign markets except perhaps market manipulation techniques, "managed economy" measures, and Government programs not yet announced.

On the record so far, there are no numbers noted in the public record, no markets mentioned, no products described, no barriers to be negotiated out of existence, no foreign import quotas to be turned into simple market access based on quality and price, anywhere in the world.

Over the past 3 years there have been statements made that the U.S. Government will not come back to the Congress without an agreement that does not provide meaningful gains to agriculture, including, I assume, California specialty crops.

The latest word on that subject is Assistant Secretary Bergsten in his testimony noted earlier in the House on July 26, 1978:

> We will not accept an agreement that does not tackle the thorny problem of limiting subsidized competition in world agricutural markets.[2]

Does the Treasury Department pledge to provide for the removal of Japanese quotas, and internally imposed subsidies to stifle and confound U.S. exports now in effect in the EEC?

With just 5 months remaining before the new deadline for concluding an agreement for submission to the Congress, many specialty crop producers in California still look for some breakthrough. They want the use of leverage available in the Federal statute to provide them with the increased market share economics of production has given them, and an access abroad they believe they have been promised.●

MR. MEANY AND MR. McGOVERN DEBATE VISA POLICY

● Mr. McGOVERN. Mr. President, the president of the AFL–CIO, Mr. George Meany, has sent an additional letter to me, concerning legislation to reestablish the Secretary of State's obligation to rule on visitors' visas for members of the Communist party in any country. Mr. Meany takes exception to certain comments I made during the Senate debate on this issue, and asks that I insert his letter in the RECORD so that my colleagues might better understand his position.

I am happy to do so. Indeed, since this issue has aroused considerable controversy, I think it might be worthwhile to include a series of documents, including Mr. Meany's letters along with my Senate floor statement and supporting documents which he found objectionable and my response to his latest, detailed exposition of his view. For the convenience of those interested in this issue, it would also be useful to have printed in the RECORD the text of the McGovern amendment and a guest editorial from the New York Times of August 9, 1978, supporting my amendment. I ask that these documents be printed in the RECORD, following my remarks, in chronological order.

The material follows:

AMERICAN FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS,
Washington, D.C., July 25, 1978.

DEAR SENATOR McGOVERN: I am writing to urge your support for a bipartisan amendment to the Foreign Assistance Bill which would repeal the so-called McGovern Amendment passed last year.

The McGovern Amendment, you will recall, lifted virtually all restrictions on the issuance of entry visas to Communists in the name of encouraging the U.S. and other signatories to the Helsinki Final Act to comply with its provisions. For example, this amendment permits Soviet agents to come to this country in the guise of "trade union" representatives, despite the fact that Soviet "unions" are not genuine workers organizations but instrumentalities of the Soviet state designed to enforce labor discipline.

The McGovern Amendment has clearly failed in its purpose of encouraging Soviet compliance with the human-rights provisions of the Final Act. No sooner was the Amendment passed then Soviet authorities denied exit visas to Dr. Andrei Sakharov and five other Soviet citizens invited to the AFL–CIO convention in December.

Since then the Soviet Union has stripped Mstislav Rostropovich and General Pyotr Grigorenko of their citizenship, put Vladimir Klebanov and his fellow workers in mental institutions for attempting to form genuine trade unions, sentenced Yuri Orlov, Anatoly Shchransky and Aleksandr Ginzburg to cruel prison terms, and persecuted countless others for the "crime" of seeking their government's compliance with the Helsinki Accord.

For the United States to go far beyond the requirements of Helsinki, as the McGovern Amendment does, while the Soviet Union not only fails to live up to the accord but jails those of its citizens who think it should, is to accept and perpetuate an imbalance in U.S.-Soviet relations that the American people should not tolerate. How much longer should we acquiesce in an arrangement by which KGB agents disguised as "trade unionists" can visit the United States, at the invitation of Americans sympathetic to the Soviet system, but men like Andrei Sakharov and other voices for human freedom in the Soviet Union, invited by mainstream American organizations like the AFL–CIO, are not permitted to come here?

Repeal of the McGovern Amendment would be a specific, reasonable and moderate response by our government to the accelerating Soviet violations of the Final Act. It would reassure the American people that their government intends to deal with the Soviet Union on the basis of reciprocity. It would serve notice on the Soviet Union that we do intend to hold them to the provisions of the Final Act. And it may give fresh hope to the Orlovs, Sakharovs, Shcharanskys, and Ginzburgs that the United States will not passively observe their persecution without exacting any penalty from their persecutors.

Sincerely,

GEORGE MEANY,
President.

UPHOLDING A VALUABLE SYMBOL

Mr. McGOVERN. Mr. President, it is a curious coincidence that in considering this Security Assistance bill, the Senate has been asked to deal with two provisions which, though of substantial importance, are largely symbolic. The first, of course, was the so-called Turkish embargo. The second, now the subject before us, is a provision enacted last year—a so-called McGovern amendment relating to visa applications by prospective visitors to the United States.

In the case of the almost nonexistent embargo against Turkey, I argued earlier my strong belief that symbolism was proving to be counterproductive—that by retaining a provision the primary purpose of which was to stigmatize Turkey, the United States was foregoing its opportunity and duty to foster constructive negotiations on Cyprus. With regard to the visa provision enacted last year, however, my purpose now is to defend symbolism—because the result of altering this provision of law, rather than serving U.S. interests, would be instead to seriously damage those interests by undercutting American leadership in the international fight for human rights.

This may sound like an overstatement. What, after all, do visits to the United States have to do with human rights around the world? The answer, Mr. President, arises from the Helsinki Final Act and the U.S. effort to push for compliance with the provisions of that agreement relating to the freer international movement of people and ideas.

Before that agreement was signed—on August 1, 1975—the United States already had a solid record in this field. Our American policy, however, flawed that record, and was used regularly by our adversaries as evidence of U.S. hyprocisy. This was our policy, embodied in law, with regard to prospective visitors to the United States belonging to organizations adhering to philosophies not approved of in this country, organizations such as the Communist Party. All nations, to be sure, should and do reserve the right to exclude from their boundaries persons constituting a threat to national security. Our law, however, created a presumption against prospective visitors on the basis of ideological affiliation alone—imposing a negative presumption, for example, even against an Italian Communist who espoused peaceful, democratic change.

The implementation of this law, it should be noted, was not nearly as rigid as its appearance. A waiver procedure allowed the Secretary of State to recommend to the Attorney General the granting of a visa, notwithstanding the negative presumption; and in many cases—indeed almost routinely—this method was used. Nonetheless, in the aftermath of the agreement at Helsinki, this law stood as a U.S. liability, for it seemed to say that we were afraid of ideas, of what a visitor to our country might have to say.

This liability was recognized, I would point out, by the U.S. Commission on Security and Cooperation in Europe in its 1977 report on implementation of the Helsinki Act, the relevant pages of which I ask unanimous consent to have printed in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MCGOVERN. The liability was recognized, too, by the Carter administration, which made clear its intent to use the waiver procedure on a regular basis, so as to show our genuine commitment to implementation of Helsinki principles.

What was really needed, however, was a change in the law itself. It was for this reason that last year I sponsored a provision designed to strengthen the position of the United States in the international fight for human rights by showing, through legislative action, that we are a Nation unafraid of the free flow of ideas and that we have an affinity for the principles of Helsinki not because they have value as a tool for disparaging our adversaries but because they have value in themselves and deserve to be implemented.

The provision I sponsored was intended, in its own words, to achieve "greater United States compliance with the provisions of the Final Act" and to encourage "other signatories to comply with those provisions." It sought to do so by removing the negative presumption against a prospective visitor whose only possible reason for exclusion was organizational affiliation. It accomplished this by mandating the Secretary of State to act automatically, in such cases, making an immediate waiver recommendation to the Attorney General so that a visa might be issued. No change was made.

I should emphasize, with regard to any person subject to other grounds for exclusion, such as persons who might be involved in advocating or engaging in violence or who might in some other way pose a threat to the national security. Nor was any change made in the ability of the Attorney General or the President to deny the Secretary of State's waiver recommendation with regard to any prospective visitor, even one falling under the terms of the McGovern amendment.

The provision was, in that sense, entirely symbolic, in that it left to the executive branch full flexibility to determine what persons will and will not come to the United States. On the other hand, by making automatic the Secretary's favorable recommendation in cases relating to ideology alone, the provision created a useful symbol, demonstrating a certain maturity and magnanimity on the part of the U.S. Government which might strengthen U.S. leadership in the field of human rights.

Indeed, this was precisely the result. At the Helsinki followup conference held at Belgrade, the U.S. delegation repeatedly found it useful to refer to the new provision as exemplifying the U.S. practices to the principles of the Helsinki agreement. For example, in his opening statement at the Belgrade Conference, Ambassador Goldberg highlighted the effort to conform its own policies and congressional action, in a passage which I shall read for the RECORD at this point:

Let me comment first on what my own country has done to implement the Final Act. In general, the Act codified standards which reflect American policy in dealing with other nations and with our own citizens. Nevertheless, in response to the Final Act we have looked closely at our own behavior and—where we have found the need and the means—have acted to improve our conduct. In particular, we took two steps regarding the Final Act pledge to "facilitate freer movement and contacts." First, President Carter this year removed all restrictions on travel abroad by American citizens. Second, with President Carter's support, Congress recently relaxed our visa requirements, so that people wishing to visit the United States will not be excluded because of political affiliation or belief, except in the rarest instances.

The change in U.S. law was noted by our allies as well as our adversaries. For example, at its September 1977 session, the North Atlantic Assembly, consisting of parliamentarians of all the NATO countries, passed the following resolution, which in effect formally congratulated the United States on its action:

RESOLUTION ON THE HELSINKI PRINCIPLES AND VISA POLICIES

The Assembly,

Recognizing the fundamental validity of the principles set forth in the Final Act of the Conference on Security and Cooperation in Europe, signed in August 1975 at Helsinki, and in particular those principles relating to the free movement of people and ideas;

Noting with approval the steps taken by NATO member countries to comply more fully with the principles of the Final Act, and in particular the recent legislative initiative of the United States in removing from United States visa policy exclusion solely on the basis of political or organizational affiliation;

Expresses hope that such exemplary efforts at compliance with the Helsinki principles by the NATO and other Western countries will promote increased compliance by Warsaw Pact signatories of the Final Act.

What we are now asked to consider, Mr. President, only a few months later, is a proposal that would alter this valuable symbolic provision, and thereby undercut U.S. prestige. It can only be asked, Why? The answer can perhaps be found in an editorial from Sunday's Washington Post entitled "Chief Visa Officer George Meany?" which I ask be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

CHIEF VISA OFFICER GEORGE MEANY?

Sen. Howard Baker (R-Tenn.) gave his colleagues fair warning the other day that he was about to submit an amendment restoring the old cold-war way of processing the visa applications of communists who wanted to visit the United States. The old way was simply to keep communists out unless the State Department requested a waiver to let them in. That approach was changed last year, in an amendment offered by Sen. George McGovern (D-S.D.), to let communists in unless the State Department requests a waiver to keep them out. That's the proper way, expressing this country's traditional openness and hospitality to foreigners and establishing the presumption that they're welcome to come.

Mr. Baker justifies his request for a rollback on grounds that the communist countries have defaulted on their Helsinki pledges to allow "freer movements and contacts" among signatory nations. In fact, though the communists' performance has been far from fully satisfying, the Helsinki Accords have provided a standard by which communist performance could be judged. The United States, in passing the McGovern amendment last year, was responding precisely to the letter and spirit of the Helsinki Accords. That amendment has been a useful piece of diplomatic ammunition to the United States since its passage. Mr. Baker and many others are currently protesting against Moscow's falling away from various pledges it made at Helsinki. This is no time for the United States to fall away from its own.

There is really only one serious opponent of the McGovern amendment—the AFL–CIO, which has been carrying on its own private anti-travel war with Soviet-bloc countries for many years. George Meany evidently has a heavy personal investment in the position that to let communist trade unionists into this country is to give them a political seal of approval. We find the argument unpersuasive and the policy designed to support it retrogressive. George Meany is not the country's chief visa officer, and Mr. Baker should not offer him the post.

Mr. MCGOVERN. Today there has been circulated in the Senate a letter from George Meany, who is the man behind this amendment and who has written to Senators calling upon them to support it.

Let me be blunt, Mr. President, Mr. Meany's letter is a preposterous fabrication—nothing less, a preposterous fabrication. In it, he points the picture of the McGovern amendment having opened the borders of the United States to a horde of Soviet KGB spies, who have supposedly traveled here disguised as trade union leaders and committed unspeakable acts of espionage against our country. This is plain, unadulterated baloney, to put a charitable word on it.

Mr. President, I asked the State Department to prepare a list of persons who have come to the United States over the past year who might be said to have come in under the terms of the McGovern amendment. I should emphasize that a precise figure is impossible to select because the McGovern amendment does not require the administration to let anyone in. It does, however, encourage tolerant attitude toward prospective visitors who are members of the so-called "proscribed organizations." Since the administration was inclined to adopt a more tolerant attitude anyway—so as to be able to assume international leadership in the fight for implementation of the Helsinki principles—it is difficult to trace causation precisely. But it can be said that in the past year approximately 40 persons have come to the United States who, in past years, according to past policies, would not have been allowed to come to the United States.

The number, Mr. President, is 40. Not 40,000. Not 4,000. Not 400. But 40. And of this number a high percentage are not even from Warsaw Pact countries. Some of them are from Australia, some from Italy, some from Finland, others are from other countries. So what we are talking about does not have anything to do with a horde of foreigners—but rather a very small number who might have been let in anyway even without the McGovern amendment, which as I explained earlier is almost entirely symbolic.

Now what about the allegation that they are spies. That is very easy to answer, Mr. President. Anyone judged to be coming to the United States for purposes of espionage does not even fall under the terms of the McGovern amendment. And therefore that allegation is irrelevant and immaterial—nothing more than a scare tactic used as a part of this campaign of misinformation. The McGovern amendment relates only to persons who fall afoul of the category of excludability having to do with organizational affiliation. That is category No. 28 out of a total of 32. Category No. 29 has to do with espionage. Any persons known or thought to be coming to the United States for purposes of espionage would fall into category No. 29 and would therefore not receive the automatic favorable recommendation mandated by the McGovern amendment. So the whole assertion that what we are talking about here is a provision opening the United States to espionage is ridiculous.

Let me again be blunt, Mr. President. What is at issue here is one man's war against Communist trade union leaders. Mr. Meany believes that the phrase "Communist trade union leader" is a contradiction in terms—that communism and trade unionism do not have anything to do with each other and are indeed mutually exclusive. In that,

Mr. President, I can agree with Mr. Meany: trade unionism, as we know it in the Western democratic countries, could not exist in a Communist society. But that is as far as my agreement with Mr. Meany goes.

I do not draw the conclusion, as he does, that because I do not approve of a person's system I should not talk to him. I think I have a little more confidence in the United States than that. I do not believe that this country is placed in danger by the beliefs, even if they are articulated, of a handful of foreigners who may come here for a brief visit. On the contrary, I think the odds are that, while they are here, they may learn something—and perhaps go home a little less certain of any dogmatic beliefs they may have brought with them.

Mr. Meany's letter wraps itself in expressions of great concern about human rights. It was precisely a concern for human rights that caused the enactment of the McGovern amendment in the first place, with the open support of the Carter administration. This amendment put this country on record as taking a leadership position in the international fight for implementation of the Helsinki principles. I am proud that we did it, and I think we should hold to it and continue the fight.

Everyone knows that the Soviet Union has not fulfilled its obligations under the Helsinki Final Act. Only a dreamer would have expected that they would. But the Helsinki Act sets a standard. And it is now our duty—a long-term duty—to adhere to that standard and to continue to press, month after month, year after year, in every effective way we can find, for other nations, including the Soviet Union, to move toward that standard. It is either that or we start moving toward the standard they have set—of hypocrisy and repression and fear. That is what Mr. Meany asks us to do. I propose that his effort to conduct this Nation's foreign policy be rejected. President Carter and Secretary Vance are making a strong effort to press for implementation of the Helsinki principles. It would be sad indeed if, while pretending to show concern for human rights, the Senate undercut that effort.

We do not make the United States stronger by copying the worst features of the Soviet system. I deplore the trials of Shcharansky and Ginzburg. But we will not save either them or others by duplicating the paranoia of the Soviet Union.

I also ask that there be printed in the Record at this point a letter from Secretary of State Vance in which he warns that a successful effort to reverse this provision, "when we are criticizing the Soviet Union and Eastern European countries for violations in human rights field, would be to rob our efforts of force and credibility." The Secretary reminds us also that—

"Not only the Soviets, but also many of our friends in Western Europe would wonder about the sincerity of a Government and Congress which urge progress on others while at the same time moving backwards in the administration of its own legislation."

I hope strongly that the Senate will defeat the proposal to change existing law.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF STATE,
Washington, D.C., June 27, 1978.

Hon. GEORGE MCGOVERN,
U.S. Senate.

DEAR SENATOR MCGOVERN: I have been informed that there may be an effort to remove the "McGovern Amendment" from the State Department authorization bill. This proposal, if adopted, would be extremely detrimental to U.S. efforts to further respect for human rights and to persuade other nations to permit freer movement of persons.

Since last year the U.S. has been able to use the McGovern Amendment both as a tool to allow a fuller interchange of ideas between journalists and political officials of Western and Eastern countries alike and as an example which we hope others will emulate of our determination to implement the letter of the Helsinki Final Act. This commitment was highlighted at the recent Belgrade follow-up meeting of the Conference on Security and Cooperation in Europe, during which members of our delegation referred several times to the McGovern Amendment as the type of provision which other countries should adopt as a means of stimulating a freer flow of persons and ideas. In its report on implementation of the Helsinki Final Act, issued on September 23, 1977, the CSCE Commission specifically criticized the U.S. immigration practices which were later amended by the McGovern Amendment as being inconsistent with the Helsinki accord.

For the United States to repeal the McGovern Amendment at this point when we are criticizing the Soviet Union and Eastern European countries for violations in the human rights field, would be to rob our efforts of force and credibility. Not only the Soviets, but also many of our friends in Western Europe would wonder about the sincerity of a Government and Congress which urge progress on others while at the same time moving backwards in the administration of its own legislation. Public commitment to the goals of the Helsinki Final Act in the United States could also be weakened by this example of American disregard for the spirit of this undertaking.

The careful discussions which led to adoption of the McGovern Amendment a year ago were to my mind a prime example of the way in which the Administration and the Congress can work together to achieve practical progress on complicated technical issues. It would be very unfortunate if the benefits which have already been gained from this cooperation were to be lost by removal of the McGovern provision from the books.

Sincerely,

CYRUS VANCE.

EXHIBIT 1

EXCERPT FROM THE AUGUST 1, 1977, REPORT OF THE COMMISSION ON SECURITY AND COOPERATION IN EUROPE

UNITED STATES

The United States has taken action—under the stimulus of the Final Act—to bring its passport and visa issuance practices more nearly into compliance with implicit Helsinki standards. In March 1977, President Carter ordered the removal of what he called "the last remaining restrictions" on foreign travel by Americans, provisions which had made U.S. passports invalid for travel to Albania, Cuba and North Korea. He also announced that the United States "will move to liberalize travel opportunities to America."

More precisely, Secretary of State Vance told the Commission in early June, "the whole visa question is under consideration in the Executive Branch right now." The Executive review, however, has so far produced no notable changes in the cumbersome and controversial procedures by which U.S. officials are bound in determining whether or not to admit an alien for a temporary or permanent stay in the United States. Action by the Congress and the President in August may result in a marked simplification of the visa-issuance process in 1977, but the United States will nonetheless be open to justifiable criticism at the Belgrade conference for failures fully to honor the Final Act provisions "to improve conditions in this [human contacts] area."

Cumbersome U.S. visa policies affect visitors from all countries, as an Industry-Government Special Task Force reported in 1968:

"Entry procedures for vacation and business visitors to the United States are outmoded. They serve only to protect an adverse image of this nation's willingness to receive foreign guests. They are overly defensive and bespeak an unfriendly attitude based upon feelings of suspicion. . . .

"In order that the United States rid itself of this stigma, a dramatic new policy of simplified procedures must be adopted, specifically geared to the short term visitor."

Visa procedures have not changed significantly since the issuance of the report.

U.S. compliance problems originate in the 1952 (McCarran-Walter) Immigration and Nationality Act, establishing 32 categories of aliens considered ineligible to receive entry visas. While many of the categories are unexceptional, one definition does proscribe entry by aliens who are or have been members or affiliates of a Communist organization. The proscription can be lifted by a waiver from the Attorney General, and 96 percent of those initially refused visas in fiscal year 1975 under the terms of section 212(a) 28 did, in fact, receive such waivers.

One class of applicants—Communist trade unionists intending to meet with labor union groups in the United States—has been, before and since Helsinki, systematically denied those waivers. Although, at the insistence of U.S. negotiators, the Final Act makes no mention of encouraging trade union contacts, the practice of denying them admission to the country can scarcely be reconciled with the overall thrust of the Helsinki accord.

Nor do such practices gibe with the specific Basket III subsection under which signatories committed themselves to "facilitate wider travel . . . for personal and professional reasons" and registered their intention "gradually to simplify and to administer flexibly" existing visa procedures. The pledge to make conditions easier for temporary travel applies across the board. Conditions are to be eased for all travelers—butchers, bakers, candlestick-makers and trade union representatives.

It can certainly be argued that Communist unionists travel on false pretenses, representing a political affiliation rather than a commitment to the labor movement. In the open American marketplace, however, that argument can best be made in direct confrontation of opposing views. The argument is not served by a priori exclusion of spokesmen for one side of it.

In recent months, for instance, an Australian Communist labor leader and environmental expert was barred from attending a union-organized discussion of environmental protection issues, although he had previously been admitted to the United States to lecture to Sierra Club audiences. Three Soviet trade unionists, invited to a longshoremen's union convention in Seattle this April, were also denied visas. On occasion, U.S. consular officials in Moscow have found themselves in the embarrassing position of issuing visas to U.S.S.R. unionists, but conditioning the visas with written instructions to the Soviets not to make contact with American unionists during their visit.

U.S. practice, in short, is discriminatory. The grounds for the discrimination—that Communist unionists are government agents and neither free nor true representatives of workers—reflect a mind-set the Final Act does not condone.

Every nation, of course, has the right to bar entry to individuals whose presence could jeopardize its security, but that standard does not appear to be the one applied at present to Communist trade unionists seeking visas to the United States. The difference between American rhetoric and practice on the issue of expanding travel opportunities is one which exposes the country to telling criticism from other signatories.

including those whose practices in the same field are profoundly at variance with Helsinki standards.

That same divergence also undermines otherwise sound U.S. protests against Communist restrictions on professional travel of Warsaw Pact state subjects. Americans are right to seek freedom for Prof. Benjamin Levich to attend an Oxford colloquim in his honor, for Pavel Kohout to see the Broadway opening of his play or for Andrei Sakharov to receive his Nobel Peace Prize in person. But right or wrong, Americans cannot be effective while vulnerable to charges that their own restrictions on similar travel are in violation of the Final Act.

AMERICAN FEDERATION OF
LABOR AND CONGRESS OF
INDUSTRIAL ORGANIZATIONS,
Washington, D.C., August 2, 1978.

Hon. GEORGE S. MCGOVERN,
U.S. Senate, Washington, D.C.

DEAR SENATOR MCGOVERN: I read with great interest your remarks in the Senate on July 26 in the course of the debate over repeal of the so-called McGovern Amendment. I was especially interested in your comments on my July 25 letter to your Senate colleagues in which I urged their support for repeal of the McGovern Amendment.

I regret that you found my letter "a preposterous fabrication," not to mention "plain unadulterated baloney." I would have to share your opinion of my letter if, indeed, it said what you claimed it said—namely, if it painted "the picture of the McGovern Amendment having opened the borders of the United States to a horde of Soviet KGB spies, who have supposedly traveled here disguised as trade union leaders and committed unspeakable acts of espionage against our country."

There is a point, even in Senatorial oratory, when forgiveable hyperbole crosses over into demogogic distortion and subverts the honest discussion of issues. I refer to these remarks, in particular:

"So what we are talking about does not have anything to do with a horde of foreigners. . .

"Now what about the allegation that they are spies. . . Anyone judged to be coming to the United States for purposes of espionage does not even fall under the terms of the McGovern Amendment.

"So the whole assertion that what we are talking about there is a provision opening the United States to espionage is ridiculous."

What is remarkable about these passages is that they have nothing to do with my letter. I never mentioned "hordes of foreigners," "spies," or "espionage." I cannot imagine your reasons for using these phrases, unless you are trying to set up a strawman which you can easily knock down by pointing to the protections against spies afforded by existing legislation. I am aware of these protections. What my letter said was that—

"This amendment permits Soviet agents to come to this country in the guise of 'trade union' representatives, despite the fact that Soviet 'unions' are not genuine workers organizations but instrumentalities of the Soviet state designed to enforce labor discipline."

And I asked:

"How much longer should we acquiesce in an arrangement by which KGB agents disguised as 'trade unionists' can visit the United States, at the invitation of Americans sympathetic to the Soviet system, but men like Andrei Sakharov and other voices for human freedom in the Soviet Union, invited by mainstream American organizations like the AFL–CIO, are not permitted to come here?"

The point is, not that the McGovern Amendment admits "hordes" of Soviet "spies" bent on "espionage," but that it permits agents of the totalitarian Soviet state to come here under false pretenses, bearing false credentials. You assume that the only function of KGB agents is to spy. Surely you know that they also serve as political policemen, enforcers of ideological discipline. The key issue here is not espionage but the nature of Soviet "trade unions."

You say you agree with me that "trade unionism, as we know it in the Western democratic countries, could not exist in a Communist society." The implication is that some other kind of trade unionism exists there—perhaps not as free and democratic as ours, perhaps flawed and deficient, but trade unionism nonetheless.

Our contention is that a trade union controlled completely by the state for the purpose of enforcing labor discipline is no trade union at all. Representatives of such unions are not trade unionists but agents of the state and represent its interests.

You miss the point entirely when you impute to me, and then criticize, "the conclusion . . . that because I do not approve of a person's system I should not talk to him." Talk to him, by all means—but not as a trade unionist. Let the exchange be on a government-to-government basis, or on an agent-to-agent basis. When you meet with Leonid Brezhnev or Fidel Castro, you are all government representatives, although not all of you are democratically elected. The concept of democracy is not automatically built into the legitimacy of governments. The same is not true of trade unions. It is not merely that my colleagues and I disapprove of Mr. Shibayev or his predecessor, Mr. Shelepin; they are not our counterparts; they are not trade unionists of any kind. (Prior to his appointment, Shibayev was first Party Secretary of the Saratov Region and had no previous trade union experience. Shelepin, before his appointment, was head of the KGB.) And we believe that to recognize them as such in any way is to betray the workers of the Soviet Union—and at a particularly poignant moment in their struggle.

That is the main point, and your failure to grasp it lies at the heart of our disagreement. Perhaps if you had a clearer understanding of the nature of trade unionism, here and abroad, the occasion for disagreement between us would be less frequent.

Although it scarcely seems possible, perhaps you are not aware of the relationship of the All-Union Central Council of Trade Unions to the Communiist Party of the Soviet Union. It is spelled out plainly in the new Soviet Constitution, article 6 of which states:

"The Communist Party of the Soviet Union is the leading and guiding force of Soviet society and the nucleus of its political system, of our State and public organizations. The CPSU exists for the people and serves the people. Armed with Marxist-Leninist teaching, the Communist Party shall determine the general prospects of society's development and the line of the internal and external policy of the USSR, give guidance to the great creative endeavor of the Soviet people and place their struggle for the triumph of communism on a planned, scientific basis."

If any doubt remains, it should be dispelled by the Labor Union Statutes of the Soviet Union, which state that:

"Labor unions carry out all their work under the control of the CPSU, the organizing and guiding force of the Soviet society."

Can you conceive of such a relationship between the AFL–CIO and the Democratic Party? Between the British Trade Union Congress and the British Labor Party?

The subordination of Soviet workers organizations to the State is detailed in the 1970 Soviet Labor Code, which provides for "enforcement of work norms by the state with the help of the trade unions" (Section 1, Article 2). It decreess that "The standard wage shall be established by the State with the help of the trade unions." And "the work of employees shall be remunerated on the basis of charts of job salaries established centrally." (Section V, Article 37).

I think these citations from Soviet law demonstrate conclusively that Soviet "trade unions" are not only different from Western trade unions. They are not unions at all. In the Soviet Union, the Communist Party owns the state—i.e., monopolizes state power—and the state owns the means of production. The CPSU is thus the employer of Soviet workers. What the Labor Union Statutes really mean is

"Labor unions carry out all their work under the control of their employers, the organizing and guiding force of Soviet society."

You may want to do business with such company unions, but we choose not to. Incidentally, I cannot recall your having advocated such recognition of Franco's company unions when he was in power. Neither did we. What is the difference between the way Fascist and Communist dictatorships treat their workers? Is a left-wing dictatorship preferable to a right-wing dictatorship?

There are several other points in your Senate remarks that need correction:

(1) The first has to do with numbers. You told your colleagues that

"If one looks at the 40-some people who have visited the United States under the terms of the so-called McGovern Amendment during the last year, and only 40 have come in under the authority that it provides, only 7 of them come from the Soviet Union."

It would seem that an awful lot of fuss is being made about seven people. But is that all that's really involved?

I attach lists from the State Department and stories from various publications that indicate that over 50 Soviet "trade unionists," not 7, have in fact been admitted to the United States since passage of the McGovern Amendment. The March 16, 1978, *Daily World*, official publication of the Communist Party, U.S.A., reports on a visit to Detroit of 30 Soviet autoworkers.

Curious about the discrepancy between your figure of 7 and our figure of over 50, I made some inquiries and came upon an interesting discovery: The State Department has been processing numbers of Soviet "trade union" visa applications not under the McGovern Amendment but under the category of "specialist exchange"—as "tourists." Prior to the passage of the McGovern Amendment, there was a stipulation that any Soviet trade unionist admitted to the U.S. under this category would be barred from contacts with U.S. trade unionists In other words, Soviet "trade unionists" have been admitted here not only under the specific terms of the McGovern Amendment but under new administrative procedures adopted in the State Department in consequence of the passage of the McGovern Amendment. In effect, the State Department has been operating a two-track system for admitted Soviet "trade unionists," but your remarks in the Senate dealt only with one of those tracks, the one that bore the least traffic.

I do not know whether your colleagues in the Senate will be as surprised by the discovery of these facts as I was, but I think they should be made aware of the real impact of the McGovern Amendment and of the interesting procedures being used at the State Department. Among the individuals who have been admitted under these procedures are, to name but a few:

Vsevolod Yevgen'yevich, Chief of the International Section of the All-Union Central Council of Trade Unions.

Vladimir Ivanovich Nikitin, Manager of the same International Section.

Boris Vasil'yevich Denisov, Consultant to the above.

Rimm Aleksandrovich Papilov, Secretary of the Moscow City Council of Trade Unions.

These "tourists" are high officials in the Soviet "trade union" structure. They would not hold such positions unless they were responsible to the Communist Party. Moreover, it is standard Soviet practice to have one or more KGB agents with every delegation to the U.S., as can be attested by virtually any U.S. agency with experience in this field.

(2) I think you owe it to your colleagues not to mislead them into thinking that the McGovern Amendment is required by the terms of the Helsinki agreement. Specifically, your colleagues should be aware of the following passage from the State Department's Second Semiannual Report to the Commission on Security and Cooperation in Europe (June 3, 1977):

"In April the United States refused visitors' visas to three Soviet labor representatives who had been invited to a longshoremen's union gathering in Seattle. In press articles and in a note to our Embassy, the Soviet Union again called this a violation of the human contacts provisions of the Final Act. We pointed out that it is a *long-standing U.S. policy* not to recommend waivers of ineligibility for Communist labor representatives because labor exchanges with Communist unions *would equate our free and voluntary trade unions with the Communist labor organizations.* There is no specific Final Act reference to travel and contacts among labor representatives, and, *when signing the Final Act, all CSCE participants were aware of our long-standing policy* on this matter." (My emphasis.)

This statement makes it crystal clear that the U.S. was not bound by the provisions of the Helsinki accord to remove restrictions on labor exchanges with Communist labor organizations.

Now it may be your own judgment, as it was the judgment of the August 1, 1977, report of the Commission on Security and Cooperation in Europe that

"Although, at the insistence of U.S. negotiators, the Final Act makes no mention of encouraging trade union contacts, the practice of denying them admission to the country can scarcely be reconciled with the overall thrust of the Helsinki accord."

But this interpretation of the "thrust" of the Helsinki accord, made after the fact and in contradiction to the official position of our government at the time of the signing, is merely that—an interpretation. It is clearly not binding.

It is instructive, moreover, to review the reasoning contained in the Commission's August 1 report, which goes on to say:

"The pledge to make conditions easier for temporary travel applies across the board. Conditions are to be eased for all travelers—butchers, bakers, candlestick-makers and trade union representatives.

"It can certainly be argued that Communist unionists travel on false pretenses, representing a political affiliation rather than a commitment to the labor movement. In the open American market place, however, that argument can best be made in direct confrontation of opposing views. The argument is not served by a prior exclusion of spokesman for one side of it. . . .

"U.S. practice, in short, is discriminatory. The grounds for the discrimination—that Communist unionists are government agents and neither free nor true representatives of workers—reflect a mind-set the Final Act does not condone."

The inclusion of "trade union representatives" along with butchers, bakers and candlestick makers reveals precisely the dangerous confusion I referred to earlier. We know how to judge whether a man is a butcher or a baker or a candlestick maker. But who is a trade union representative? The Commission statement says this issue should be debated in the "open American marketplace." Thus it demotes a policy to a debatable issue. It then goes on to say that the issue has already been decided—in Helsinki. The position of the U.S. government that Soviet labor organizations are not trade unions and cannot be equated with American trade unions—a position which consistently led the U.S. government to refuse to include labor exchanges in our cultural exchange agreements with the Soviet Union—that position is now judged to be a "mind set the Final Act does not condone." Apparently, our side made even more concessions at Helsinki than we had realized!

It is clear that the McGovern Amendment represents much more than a change in our long-standing visa policy. It represents a radical change in our official attitude toward the nature of Soviet labor organizations. The McGovern Amendment has given the Kremlin an important victory by conferring a legitimacy and respectability on Soviet trade unions at the very time these fraudulent institutions are under attack from Soviet workers.

That such an about-face in policy should have taken place virtually without serious debate and without regard for the opinion of the American trade union movement suggests that this policy has less support among the American people than it does among certain narrow elements of the foreign policy establishment.

Yet the American people are being told that to avoid the charge of retreating on our commitment to human rights, we must recognize as legitimate trade unions institutions that repress workers; and, indeed, we must encourage relations and contacts with the representatives of these institutions. In the name of human rights we are asked to accommodate to those who trample on the human rights of their workers. I can imagine how George Orwell would have described this doublespeak.

(3) I would like to turn your attention to the actual character of the labor exchanges your amendment has opened up. What actually happens in these exchanges? What is their value in terms of promoting human rights? How do they encourage the free flow of ideas and information?

In his recent introduction to the classic *Custine's Eternal Russia*, former U.S. Ambassador to the Soviet Union Foy D. Kohler gives this assessment of the Soviet attitude toward East-West contacts. Noting that these contacts have "enormously increased" in the past few years, Ambassador Kohler nonetheless points out that—

"the Kremlin leaders have been at special pains to ensure that, so far as the Soviet Union is concerned, these expanding contacts be limited in scope, channelled to Soviet requirements and kept under strict control. The very thought of any free interplay between the Russians and outsiders of free exchange of information and ideas is anathema. Every theory and argument put forward in the West that lends itself to the direct or indirect support of any such idea is denounced from the highest to the lowest levels of the vast ideological and propaganda apparatus of the Soviet Union * * * The Soviet leaders have in fact been exploiting Western theories about closing existing gaps between societies to justify a general tightening of controls and the conduct of massive vigilance and ideological indoctrination campaigns at home, designed to immunize the Soviet people against any possible ideological contamination in consequence of contacts and exchanges with Americans, as well as Westerners generally. * * * the leaders make clear that the Soviet Union needs and expects to receive important benefits from the new relations, but even as they are entering into agreements with Western countries they are multiplying restrictions and creating a climate designed to minimize the resulting impact on the Soviet system and society."

While Kohler deals with East-West exchanges generally, pointing out that they do not lead to the kind of internal liberalization their proponents promised but to the opposite, Vladimir Bukovsky, the courageous Soviet freedom fighter, had this to say to the AFL–CIO convention last December:

"An equal exchange of people and information is one of the basic principles of the Helsinki Agreements. And we have always consistently demanded its observance. But we demand a real exchange not a fictitious one.

"Delegations of Western parliamentarians, genuinely elected by their peoples, travel to the Soviet Union. Labor union leaders genuinely representing the interest of the workers go there. And who are they trying to saddle you with—under the guise of Soviet parliamentarians and labor leaders? Party officials, KGB agents, that is, the executioners of our people, those who shot down the workers at Novocherkorsk, those who keep the human rights movement rotting in jail. Since when do the hangmen represent the hanged?

"Who needs such an 'exchange of people?' It merely lends a respectable coloring of phoney Soviet institutions, but it does not help our nations better to understand each other."

These remarks were addressed to a convention to which the AFL–CIO had invited Dr. Andrei Sakharov, Mrs. Nadezhda Mandelshtam, Mr. Aleksandr Pobrabinek, Mr. Anatoli Tikhonovich Marchenko, Mr. Valentin Anatolievich Ivanov, and Mr. Vladimir Borisov all of whom (with the exception of Mr. Ivanov, who was told to leave the Soviet Union before our invitation arrived) were denied exit visas by the Soviet Union, despite the good example afforded by the McGovern Amendment. I enclose for your information the report made by Secretary-Treasurer Lane Kirkland on the fate of our invitation to these Soviet citizens.

For ideas and people to flow freely, there needs to be reciprocity on both sides. Much as we might wish otherwise, we cannot unilaterally assure such a flow. It takes two to tango. If we remove all obstacles to entry visas for Communists while the Soviet Union maintains a ban on the travel of non-Communists or anti-Communists to the United States, we shall have moved from a situation in which no Communists can come here to a situation in which only Communists can come here from the Soviet Union. All we shall have done is transfer the control point on nonimmigrant visas from Washington to Moscow. How does this serve the cause of human rights?

So long as the Soviet government retains its present policy, no genuine free flow of people and ideas is possible. Instead, we have an inherently unbalanced and unfair arrangement in which Americans who visit the Soviet Union may criticize the United States and praise aspects of Soviet life, while Soviet "trade union representatives" who visit us dare not criticize their government but do criticize American life. The attached stories from the Daily World and Flashes (publication of the Communist-dominated World Federation of Trade Unions) are entirely representative in their illustration of this point.

And what do these Soviet visitors say about American life when they return to the Soviet Union? We now have eloquent testimony on this point from Anatoly Marchenko, who, incidentally, faces imminent arrest on trumped-up criminal charges. In a letter dated December 1, 1977, and intended for our convention delegates, Marchenko reports on the return home of the first group of Soviet "trade unionists" admitted as a result of your amendment.

"Recently some of our citizens visited the U.S. as invitees of the American National Committee of Labor Union Action for Democracy. At first they had certain problems

with their U.S. entry visas, but they received Soviet exist visas with no difficulty. Whom do they represent? Metallurgists, schoolteachers, the trade union masses in general? Not at all. They are the eyes, ears, and mouthpiece of our regime.

"They told us about the desperate situation of one black woman worker; that American teachers beat their pupils and that some American high school graduates don't know how to read; that there is inadequate industrial safety technology in American mines; and that American workers have a friendly attitude toward the USSR. That was all they derived from a two-week trip through the U.S.

"How much does that poor black woman make, and what can she buy for her pay? Are her five children in school, and how does she pay for their medical care? Where, how, and in what schools did America train its scientists, who year after year have come away with most of the Nobel prizes? Perhaps they are semi-literate? What is the accident rate at an American mine? There was nothing concrete—only a general and grim picture.

"If Semyonova had not visited you as a representative she might have possibly shared with your teachers the fact that in our schools there is also a low level of education—I know more than a few semi-literate people who have recently graduated from our schools. And the miner Gatsenko, perhaps, might have told about the systematic practice we have of not registering-on-the-job injuries so as not to spoil the statistics and not to deprive a shop or a team of its bonuses. But our representatives, judging by the newspaper account, did not see a single positive feature in the life of working America, and enriched you with the information that we walk around in shoes and our women use cosmetics.

"The reporting of their trip is published in the column 'Chronicle of Detente.' Apparently this means that now you and we, American and Soviet working people, know each other better. But we used to read the same sort of stuff about America thirty years ago in the worst years of the Cold War."

These representatives of Soviet "trade unions" *did not see a single positive feature in the life of working America!*

How do such exchanges contribute to the free flow of people and ideas? How do they enhance the human rights of Americans or Russians? Whose human rights would be violated by the repeal of the McGovern Amendment?

(4) One final point. I am at a loss to understand your attitude toward the Helsinki accords and Soviet compliance with their human rights provisions. This is a matter of some importance to the McGovern Amendment which explicitly states that one of its two major purposes is that of "encouraging other signatory countries to comply with those provisions."

But in your Senate speech you said:

"Everyone knows that the Soviet Union has not fulfilled its obligation under the Helsinki Final Act. Only a dreamer would have expected that they would."

I strongly object to this flippant and cavalier attitude toward Soviet violations of the Helsinki accord. If only a dreamer would expect them to live up to their international obligation, why did we sign the Final Act at all? Why did you introduce the McGovern Amendment in the hope of encouraging their compliance?

I think you could do a lot more to encourage Soviet compliance with the Helsinki Final Act. If a man of your views—known as an opponent of the "Cold War" and as an advocate of detente—were to announce that, upon reflection, you favored repeal of the McGovern Amendment until such time as the Soviet Union permitted men like Andrei Sakharov to leave and return to the Soviet Union, I believe this might have an impact on Soviet leaders. Certainly, it would let them know that all American leaders, not just dreamers, expect them to live up to their obligations, as we live up to ours. And I believe such an action on your part would give heart to countless Soviet citizens whose capacity to struggle for a wider measure of personal freedom depends on the sense that we will hold their rulers to account.

I wonder if I might prevail upon you to insert this letter in the Congressional Record so that your colleagues might better understand the position of the AFL–CIO.

Sincerely,

GEORGE MEANY,
President.

U.S. SENATE,
Washington, D.C., August 10, 1978.

GEORGE MEANY,
President, AFL–CIO,
Washington, D.C.

DEAR MR. MEANY: I think it now fair to conclude that you and I have a basic difference of opinion regarding the merits of the so-called McGovern Amendment.

Your letter of August second goes to great lengths to imply that this difference arises out of my inability to understand the deficiencies of the Soviet system in general and of Soviet "trade unions" in particular. This is not the case, for the issue is not the nature of our adversary but rather how we respond to that adversary. You are obviously offended by the use of "trade unionist" to describe a Communist representing an organization which bears no resemblance to the American trade unions you lead. This is understandable. But I disagree entirely with your conclusion that because this nomenclature is offensive—because such a person is not really a trade unionist but rather part of the Soviet governmental structure—he should be barred from a visit to the United States.

The logical consequences of such reasoning are fairly obvious: Since most Soviet institutions are, in some sense, a part of that structure, then other persons—not just "trade unionists"—should also be barred from our country if your logic is to be applied consistently. Soviet "scholars" would have to be kept out because their scholarship is often used to buttress Marxist dogma. Under your logic, the Soviet "parliamentarians" (from the Supreme Soviet) who visited Congress earlier this year should have been rejected. Soviet "journalists" here should be expelled. We should cease contacts with state-supported Soviet "athletes" and performing "artists," who are instruments of propaganda. And most surely, our elected President should avoid any summit meeting with a Soviet leader who purports to be "democratically" selected.

I cannot see how our national interests would be served if American scholars, parliamentarians, journalists, athletes, artists, and Presidents adopted your reasoning and insisted on shunning any U.S. contact with their "illegitimate" counterparts. Are you asking for one visa criteria for so-called trade unionists, misnamed or otherwise, and another visa criteria for other applicants?

Your letter raises four points you feel require clarification:

(1) The first concerns the discrepancy between my figures and yours on persons who have come to the U.S. under the McGovern Amendment. The figures I used were supplied by the State Department and I presented them without distortion. As I stated in my remarks on the Senate floor, however, this is an inherently imprecise matter, because the McGovern Amendment did no more than mandate the Secretary of State to use, in certain circumstances, a waiver-recommending authority he already possessed. Since this Administration was intent upon exercising that authority quite frequently even in the absence of the McGovern Amendment, its effect was to encourage and formalize a trend already in effect.

(2) You argue that the McGovern Amendment is not required under the terms of the Helsinki Act because the Act makes no mention of trade unionists and because the United States indicated at Helsinki its longstanding policy of excluding Communist trade unionists. What is "required" by the Final Act is, of course, not subject to precise definition, but I would agree with the Commission on Security and Cooperation in Europe that past U.S. visa practices "can scarcely be reconciled with the overall thrust of the Helsinki accord." Moreover, the McGovern Amendment is not directed at trade unionists in particular, but at affirming an important general principle—that United States visa policy should not discriminate solely on grounds of organizational or ideological affiliation. You charge that, by causing us to "recognize as legitimate trade union institutions that repress workers" and by encouraging "relations and contacts with the representatives of these institutions," the McGovern Amendment represents an Orwellian interpretation of the Helsinki Act. I would say that yours is an Orwellian interpretation of the McGovern Amendment. It has nothing to do with recognizing an organization as legitimate. Nor does it encourage relations between legitimate and illegitimate trade unions. It is neutral on both points.

(3) Regarding the value of exchanges that do occur, you speak disparagingly, citing Soviet "trade unionists" which, after visits to the United States, have not returned to the Soviet Union openly praising the merits of the American system. I wonder why you would expect otherwise in a society as repressive as you know the Soviet Union to be. The absence of immediate and obvious gains is hardly an adequate basis for repudiating the value of expanding human contacts. The whole premise for exchange-of-persons activities is that they work over the long-term, steadily increasing the number of people with firsthand knowledge and thereby slowly eroding ignorance and misperception.

(4) You object to my saying that I did not realistically expect the Soviet Union to comply with all of its obligations under the Helsinki Final Act. I stand by that and reiterate that only a dreamer would have. What the Final Act did was set a standard to which we and others can be held accountable. We sacrifice nothing by abiding by the spirit of Helsinki. On the contrary, we greatly strengthen our ability to win admirers around the world and also, by our example over the long term, to foster change in the Communist systems which neither you nor I approve.

I am sorry that the Senate's passage of the repeal amendment, which you so actively supported, has provided grist for propaganda against the United States by Communist countries which, embarrassed by their own deficiencies in meeting the Helsinki standard, were pleased by the opportunity to excoriate the United States for hypocrisy. In that this embarrassment for the Administration's human rights effort was quite predictable, I regret that your determination to express disapproval of Soviet "trade unions" took priority over your concern for our country's international standing.

There is one final point: The effect of your position as advanced by Senator Baker is to deny visas except by a formal waiver request from the Secretary of State to members of all Communist parties around the world—including party members from western European countries such as Italy, France and Spain, who in some instances have been independent if not outspokenly critical of Soviet policies. I have enough confidence in American democracy to believe that our people can withstand contact with visitors

whose ideology differs from ours. I even believe that our way of life is appealing enough so that we might modestly influence the thinking of some of our Communist visitors. I see no reason to make a "federal case" out of every visa application from those whose views and party affiliation differ from yours and mine.

Sincerely yours,

GEORGE MCGOVERN.

SECTION 21 OF THE BASIC AUTHORITY OF THE STATE DEPARTMENT

The McGovern Amendment

SEC. 21. For purposes of achieving greater United States compliance with the provisions of the Final Act of the Conference on Security and Cooperation in Europe (signed at Helsinki on August 1, 1975) and for purposes of encouraging other signatory countries to comply with those provisions, the Secretary of State should, within 30 days of receiving an application for a nonimmigrant visa by any alien who is excludible from the United States by reason of membership in or affiliation with a proscribed organization but who is otherwise admissible to the United States, recommended that the Attorney General grant the approval necessary for the issuance of a visa to such alien, unless the Secretary determines that the admission of such alien would be contrary to the security interests of the United States and so certifies to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate.

[From the New York Times, Aug. 9, 1978]

LETTIN' IN THE COMMIES

(By Daniel Yergin)

PARIS.—It is not surprising that the recent show trials in the Soviet Union have stimulated Congress to look for appropriate responses. But those responses should be chosen with care. For actions generated in a burst of self-righteousness could end up advancing Soviet interests at the expense of America's.

That certainly would be the paradoxical result of a little noticed amendment added by Senator Howard Baker to the military-assistance bill. Given its intent, the amendment could end up providing Moscow with a powerful propaganda victory.

The Baker amendment concerns visa policy for visitors to the United States, which may sound like a rather technical matter. In this case, it is not. It is of primary political importance.

Until 1977, a legislative relic of the McCarthy era made it very difficult for foreign Communists to visit the United States. They were not allowed in unless the State Department requested a special waiver. A Leonid Brezhnev could always get in, could even get invited to the White House. But not the Italian or Spanish Communists who had publicly criticized his doctrine—and his regime. It was odd—the rigid ruling Communists could visit but not the non-ruling Western Communists somewhat closer to Western pluralist values. This was changed in 1977 with passage of the McGovern amendment, which permitted Communists to enter on the same basis as other visitors, unless the State Department requested otherwise.

But now comes the Baker amendment, which would effectively revoke the McGovern amendment and return to the former restrictive practice. The Baker amendment was passed two weeks ago by the Senate, with the A.F.L.-C.I.O.'s support, and is scheduled for discussion in a Senate-House conference committee tomorrow.

Howard Baker explains that his amendment would be a "visible reminder to the Soviet Union" of American concern about repression. But much of this concern is couched in terms of the Helsinki agreement, which is supposed to promote increased contacts between peoples and ideas, East and West. Yet the amendment would re-erect a barrier to increased contacts, undercutting American credibility and indeed our claim to the very Helsinki principles from which we argue.

The amendment would also unnecessarily complicate the conduct of our foreign policy. Each decision on each application by Communists would be read as a political statement in his home country. Granting a visa would be seen as a form of approval; rejection, as a sign of unmitigated hostility; either way, the decision would embarrassingly end up on the front pages of local newspapers. The resurrection of the barrier would be regarded as offensive in Western Europe, not only by Communists but by Socialists, centrists, even by some conservatives—fulfilling old stereotypes about McCarthyism.

While the amendment is supposedly aimed at the Soviet Union, its most ill effect would be on our relations with those Western European countries where the left—composed variously of Communists and Socialists—is strong and could become stronger if there is no economic recovery.

Italy is the most obvious and important example. Its Communist Party, representing about a third of the electorate, is, along with the Christian Democrats, one of the two key parties in the parliamentary majority that runs the country. Virtually everyone who has examined the question agrees that the party has been evolving away from the Soviet model, from Stalinism. Considerable disagreement exists even among the most informed analysts as to how far, sincere, and deep—and how beneficial—that evolution is. We should want to find out. We should want to increase communication, without having each exchange appear to be graced with our seal of approval. No purpose is served by excluding Italian and other Western Communists. It will not lose them votes, and may well win them some. The amendment would hardly keep out genuinely subversive elements.

Western European Communists should have the opportunity to see American society as it is. Their vision of America has been doubly distorted—first by our habit of being the most self-critical society in the world, then refracted yet again through the ideological prisms of the left. Many, though not all, in the Italian Communist Party are deeply curious about the United States. To exclude them is to deny one possible influence on the evolution of their party, and to strengthen the position of the Stalinists and, in so doing the hand of the Soviet Union itself.

We have nothing to fear from letting Western Communists make the comparison themselves between the realities of Soviet and American societies, and perhaps even something to gain. This will be better done through a normalized visa process, and not through the self-defeating mechanism of the Baker amendment, which would turn each application, at the very least, into an awkward Federal case.●

RATIFICATION OF THE GENOCIDE CONVENTION WILL COUNTER SOVIET CHARGES OF HYPOCRISY

Mr. PROXMIRE. Mr. President, earlier this week the Central Intelligence Agency forwarded to me a translated version of a Tass radio broadcast entitled "American Administration's Hypocrisy."

"The United States displays an amazing hypocrisy," the translation reads, "by its refusal to accede to the International Convention on the Prevention of Genocide."

Are we vulnerable to such charges that our human rights policy is consistent? Are we?

Well, consider this: despite our cries for human liberties abroad and at home we have failed to ratify a treaty which safeguards the most fundamental human right—the right to live.

And who is responsible for this failure?

The President? No. In all that period every President—Truman, Eisenhower, Kennedy, Johnson, Nixon, Ford, Carter—all have pleaded with the Senate to act.

The House of Representatives? No. They have no power to act.

Who then? This body. The United States Senate and this body alone has the responsibility.

For 29 long years this body has deliberated over the issue of acceding to an international agreement which outlaws mass murder. And, during those 29 years, millions have suffered needless deaths as victims of genocide.

Is the Genocide Treaty an agreement which would compromise this Nation in any way? Does it conflict with any of our other responsibilities?

Mr. President, this treaty would not endanger the life or freedoms of a single American. It does not conflict with any of our other commitments or responsibilities.

Has this treaty met with the approval of the American people and our Western allies?

Mr. President, the answer is a resounding yes. This treaty has already been ratified by 83 other nations including our Western allies. It has been supported by nearly every major interest group in this country.

Mr. President, this is not the first time the Soviet Union has criticized us for our stand on this convention. In fact, the Soviet Union is already a party to this agreement. For years they have capitalized on our failure to condemn mass murder. Our inaction has only been an embarrassment to this Nation in the eyes of the world community.

What, then, can we do to unify our human rights policy, to eliminate this potential for embarrassment, and to demonstrate to the world our commitment to our moral responsibilities?

The answer is a simple one. U.S. Senators can vote to make genocide an international crime.

Mr. PELL. Mr. President, this is just to congratulate the Senator from Wisconsin on his speech, and his regular speeches, on genocide.

I hope that like the water that drips, eventually it would wear its path—I cannot say to victory—but to the Senators, and we should pass this treaty, as we long since should have done.

"LOCKING UP GUAM FOR LOCAL 3"

Mr. HATCH. Mr. President, shortly the Senate will consider S. 2570, a bill to revise and extend CETA. In this regard, a recent article in Inquiry magazine charging that U.S. Labor Department officials and others have conspired to use

CETA job programs and funds illegally to subsidize the efforts of a construction union to organize all the unorganized workers on the island territory of Guam, is alarming and shocking, to say the least.

The article, entitled "Locking up Guam for Local 3," states that over the past 2 years the Labor Department has not only abused CETA programs, but has manipulated Guam's economy and the certification procedures for alien workers in an attempt to clear the way for the Operating Engineers Union to control the construction industry on Guam.

Specifically, says the article, high Labor Department officials have apparently broken the law by awarding $450,000 in CETA contracts for training construction workers to the Operating Engineers, thereby circumventing competitive bidding requirements.

The article recounts several meetings at which Labor Department officials and union agents devised plans to use these CETA funds to train union organizers on Guam. According to the article, the same evidence has already been presented to Labor Department investigators who commenced an investigation at the request of Guam Employers Council and others in March, but the investigation seems to be stalled for some unknown reason.

In any event, our colleague (Mr. HELMS) has written to Secretary of Labor Ray Marshall on July 7, 1978, requesting that he initiate an investigation into the entire situation in light of the alleged involvement of high officials within the Labor Department. Senator HELMS also reasonably suggested that the Secretary schedule an administrative hearing in Guam so that all who had information could have the opportunity, under oath, to substantiate the numerous charges which have been raised by those on Guam and elsewhere. As of this date, Secretary Marshall has not responded to Senator HELMS' letter, although, the Secretary may not determine to give the matter expeditious attention.

Mr. President, the American people have a right to get to the bottom of what is alleged to be one of the most scandalous episodes in the history of the Labor Department. As a member of the Human Resources Committee which has the oversight responsibility for CETA and the Department of Labor, I intend to use all means at my disposal, including having other Government agencies look into the matter if necessary, to see that the charges are fairly evaluated and the truth ascertained. I hope that my chairman (Mr. WILLIAMS), and my ranking member (Mr. JAVITS) will join me in this endeavor, to preserve the integrity of the CETA programs and its administrators.

Mr. President, I ask unanimous consent to have printed in the RECORD the inquiry article referred to above, as well as Senator HELMS letter to Secretary Marshall, for the information of my colleagues.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LOCKING UP GUAM FOR LOCAL 3

(By Bill Keller)

Last February, employers in the construction industry on Guam sent a formal complaint to Secretary of Labor Ray Marshall alleging that Labor Department officials in San Francisco had conspired with the Operating Engineers Union and the Dillingham Corporation to award a $1.8 million CETA contract for job-training on the island. In March the department began an investigation of the charges, but to date it has issued no finding.

If the Labor Department has been slow in making a judgment on these charges, it is not because of a lack of evidence. Indeed, interviews and government documents reveal that Labor Department officials and politicians, notably Phillip Burton (D.-Calif.), attempted to use the CETA program to help the Operating Engineers lock up the construction trades on Guam. In so doing, they have apparently broken the law by circumventing competitive bidding requirements and exercising administrative powers to promote union activities and accomplish objectives far broader than the employment and training Congress intended. They have also attempted to disable competition from Asian firms by manipulating Guam's wage and labor structures. According to these sources, the department awarded a $450,000 training contract to the union— without soliciting bids as required by law—and issued regulations that raised construction wages and restricted the use of nonunion, alien labor. When Governor Ricardo J. Bordallo of Guam opposed these actions, Labor Department representatives threatened to withhold CETA employment and training funds as a means of obtaining his cooperation.

Oddly enough the Labor Department-Operating Engineers plan to lock up Guam's construction trades for the union had its beginnings not on Guam, but in Hawaii. Late in 1976, when unemployment in the Hawaiian building trades was high, Governor George R. Ariyoshi and representatives of various trade unions set their sights on Guam as a possible solution for the problems of Hawaii's construction business.

Guam was an obvious choice. Located 6000 miles from the West Coast of the United States, Guam is a central link in the chain of islands on which the United States has anchored its military might in the Western Pacific. Major installations on the island include a nuclear submarine base, a large naval ship repair facility, and a Strategic Air Command airfield. Military spending is almost always a boon for the construction industry, but in 1976, nature and the military combined to make Guam especially attractive to builders. In May of that year, Typhoon Pamela swept the island, causing major damage; shortly afterwards, the navy was prepared to let over $400 million in contracts for redevelopment and construction on Guam. Short-term spending of this magnitude presaged a booming economy and certain prosperity for the construction industry. Everyone, including Governor Ariyoshi's friends, wanted to share in the feast.

Especially eager was Local 3 of the International Union of Operating Engineers. Based in San Francisco, Local 3 has 35,000 members in a jurisdiction covering Northern California, Nevada, Utah, Hawaii, and the mid-Pacific Islands. Local 3 has long been interested in organizing on Guam—it assigned staff members to the island in 1963 and built offices in Agana, the capital, in 1971—but its efforts have met with little success. Union officials have conceded that as of August 1977, they had organized only about 130 of Guam's estimated 4800 construction workers. Therefore, in recent years the union has intensified its drive on Guam, hoping to cash in on what it contends will be "massive amounts of construction and industrial development in the next 10–15 years" for "storm repair," "oil depots," and "industrial and trade zone work to supply the booming Pacific Rim economy and the entire spectrum of ocean resources development."

Also anxious to get in on the construction boom in Guam was the Dillingham Corporation of Hawaii, a multinational conglomerate with a broad range of construction operations on the Pacific coasts of the United States and Canada, and in Hawaii, Australia, and New Zealand. Already involved on Guam through its subsidiary, the Hawaiian Dredging and Construction Company, Dillingham was looking for new ways to compete against local and Asian construction firms.

But it was not easy for the Operating Engineers or Dillingham to cash in on Guam's new construction prosperity. Guam's construction industry has traditionally used foreign laborers, principally "non-immigrant aliens" from the Philippines and South Korea, who are admitted for temporary work assignments. These workers have been brought in to ease a shortage of skilled construction workers. Many Chamorros, or natives of Guam, look down on construction work. As a result, few of them have been trained in the construction trades, and those who are skilled often leave the island for the higher wages and better working conditions on Hawaii or the U.S. mainland. Hence, in March 1977, temporary alien workers held approximately 82 percent of Guam's construction jobs. Moreover, the ready availability of foreign workers has kept wages low. For example, in 1977 a construction electrician on Guam received $3.22 an hour, while his counterpart in Hawaii was paid $10.34.

The use of alien workers angers the Operating Engineers, who have termed it "the inhuman and cancerous exploitation of working people on Guam." The union asserts that the practice artificially holds down wages and forces workers to accept substandard working conditions. The union is also concerned that its efforts to organize the island have failed largely because alien workers are granted only temporary working permits and generally must acquiesce in conditions offered by their employers or face deportation. But firms on Guam, as well as many Japanese and Korean companies that do business on the island, depend on temporary alien workers to fill their demand for skilled construction artisans. Without a ready supply of relatively inexpensive Asian labor, they cannot compete with huge, off-island American firms such as Dillingham.

It was with this in mind that the Operating Engineers and their government friends developed a strategy to unionize Guam's construction trades. According to informed sources, late in 1976 Governor Ariyoshi of Hawaii and trade union representatives met with Labor Department officials, including top Labor Department regional administrators William Haltigan and Royce Hulsey. At the meeting, they asked the Labor Department not to certify aliens for employment on Guam unless the employers there first recruited in Hawaii at prevailing Hawaiian wage rates. Similar meetings were held early in 1977. During these sessions the idea first surfaced of changing the certification of aliens and increasing wage rates to aid a union takeover on Guam. According to persons present at the meetings, Labor Department officials agreed to the concept of unionization for Guam, and supported Dale Marr of Local Union 3 in his plans to use the Comprehensive Employment and Training (CETA) program as a means of locking up the island. This could be accomplished if the Labor Department paid the union to run the CETA training program on Guam. CETA funds would then be used to recruit new union members and train them in organizing techniques, as well as in construction indus-

try trades. The new union men would then enter "open shops" on Guam and apply their newly acquired skills.

Misuse of CETA funds on Guam has been commonplace for several years, and the training program has been an annual fiasco. In December 1976, a federal audit revealed "gross mismanagement and lack of control," and questioned nearly half of all CETA expenditures, an amount exceeding $1 million. Federal correspondence with Governor Bordallo chronicles numerous violations of CETA regulations, including "loss of control over program activities," "enrolling and employing ineligible participants," and "improper expenditure of program funds." On March 10, 1977, the Labor Department fired the CETA staff on Guam and ended funding for all CETA training programs and related activities. Within a fortnight, the associate regional administrator for Region IX withdrew Guam's letter of credit for federal funds, charging that the governor had overdrawn the CETA accounts by $192,112.

In mid-August 1977, Regional Administrator Haltigan traveled to Guam to present proposals that would set up a construction-trades training program under CETA, double wages paid to construction workers over a two-year period, and provide for new alien certification procedures to be administered by the Labor Department. Local newspaper accounts of that period document the near universal panic with which the Haltigan proposals were received on Guam. On August 20, the *Pacific Daily News* reported, "The proposals are directly opposed by business, construction, military and government officials, who say the increases will come too soon and will have a direct negative impact on the island's economy." Haltigan's proposals included a requirement that any employer who used alien labor must pay higher rates determined by the U.S. Department of Labor. Governor Bordallo stated, "This whole thing is going to hit Guam like a bombshell."

Alone in welcoming the proposal was Local 3 of the Operating Engineers Union. In a letter to Haltigan, dated August 9, 1977, union leader Dale Marr underscored his support for the proposals and warned, "I would point out to you that you can expect formidable opposition from a number of employees of federal [Government of Guam] agencies and politicians whose ox you will be goring. We are of the opinion, however, that the Carter administration, Secretary Marshall, and above all, Don Elisburg [assistant secretary of Labor] and the American labor movement will support your efforts on all fronts. Hang tough." According to another *Pacific Daily News* story, the Labor Department was under acute political pressure to solve the alien labor problem on Guam. "The pressure, sources have said, comes from the Governor of Hawaii, the AFL-CIO, representatives of the Departments of Defense and Interior and unnamed persons in the White House." In confirmation, Haltigan said, "Guam is something of a *cause célèbre* at the moment. This thing has been squirreling around at very high levels on Capitol Hill."

The new proposals and the reaction on Guam also caused consternation at the Department of Defense. On August 19, 1977, high-level Defense Department officials telegrammed Undersecretary of Labor Brown, stating that "the bidding for all construction work for military activities on Guam has been postponed because of confusion about labor availability and wage policy applicable to Guam, and that DOD's contractual efforts to carry out the typhoon damage restoration effort have come to a complete standstill." Apparently, the navy was under pressure to spend its Guam construction funds, which exceeded $400 million. It became incumbent upon the Department of Labor to produce a labor force and get Guam's house back in order—to make sure that future allocations for the navy would not be jeopardized.

On September 13, 1977, under the Immigration and Nationality Act, the Labor Department published new regulations that imposed "adverse effect rates," doubling the wages of construction workers on Guam over two years, with the first increments to become effective as of March 1, 1978. The regulations also specified new certification procedures for temporary alien workers on Guam, and provided that the certification process was to be administered by the U.S. Department of Labor. Many Guam employers reviewed the new regulations uneasily, fearing the Labor Department's new certification power. In the face of mandatory wage hikes, they questioned whether they could continue to compete with large off-island and multinational construction firms. Many cast a wary eye at the Operating Engineers Union, fully aware that the new regulations removed major barriers to a union takeover on Guam.

The Guam employers did not know that early in September the Labor Department had begun informal discussions with a private consulting firm in San Francisco. During October and November, Labor Department representatives briefed members of the firm's staff on the situation in Guam and showed them many documents and letters. The name of Congressman Phillip Burton cropped up more than once in their discussions as a reference point and, though unseen, a force to be reckoned with.

On November 16, 1977, the consultants met in San Francisco with the Department of Labor grants officer and his staff to discuss a way to refund the Guam CETA program. At that meeting a strategy was hashed out to hire and train a new CETA staff and to tender contracts to employers on Guam who had demonstrated training capabilities. Five days later, on November 23, the consultants submitted the final proposal to Associate Regional Administrator Hulsey. According to persons who were present, during that meeting Hulsey offered to hire the consulting firm to legitimize or "launder" illegal contracts with the Dillingham Corporation and the Operating Engineers Union, Local 3. When Hulsey made the offer, he mumbled under his breath, "What's that?" one of the consultants asked. "Dillingham," he repeated, "and the Engineers. The training contracts will have to go to them." On the following day, when the firm withdrew from the proposed scheme, Hulsey stated his intention to continue without its participation or assistance.

On the afternoon of November 18, 1977, another meeting took place on the ninth floor of the Federal Building in San Francisco. Labor Department administrators Haltigan, Hulsey, and Charles Pickens met with Local Union 3 officials, including Dale Marr, and with two executives of the Dillingham Corporation. Virginia Allee, regional administrator for the Employment Standards Administration, also was present. A plan to use CETA Title I funds to train construction workers on Guam was reviewed. The sum of $1.8 million was earmarked for the Engineers Union and Dillingham. At approximately 2:45 p.m., Congressman Burton arrived. Assistant Secretary of Labor Donald Elisburg arrived a few minutes later. The group exchanged greetings and the progress of the meeting to that point was summarized. Both Burton and Elisburg agreed on the soundness of the plan and on the scheme to set the union and Dillingham up in the training business. "Burton was brought in by the Engineers," one source said. "It was a show of strength; they go back a long way together."

This entente represented the culmination of a longstanding political alliance between the Operating Engineers and the Burton machine. Burton, who presides over the House National Parks and Insular Affairs Subcommittee which oversees Guam and the Pacific Trust Territories, found himself in a position to help his friends—friends whose unquestioned loyalty could be tabulated in terms of large yearly campaign contributions and membership support. The Guam employers didn't know they never had a chance.

In December, the Labor Department sent representatives Jess Ramos and Tony Cordero to Guam to convince Governor Bordallo to go along with the union-Dillingham CETA training deal. According to informed sources, the governor relented only after he was told that his complicity was a condition for refunding the CETA programs that had been terminated six months earlier. At that time, severe media criticism had been leveled at the governor's men for bungling the program and losing the CETA revenues and jobs. Presumably to protect his own reelection prospects, Bordallo agreed to support the union-Dillingham deal through a subcontract financial arrangement.

On January 18, 1978, the Pacific Daily News reported an agreement to start a new construction training program on Guam. The article stated, "The agreement was reportedly reached after three days of negotiations last week in Honolulu between officials of Dillingham Construction Company, the Operating Engineers Union, GovGuam and the U.S. Department of Labor."

By late January, the Labor Department was well on its way to insuring unionization for Guam and to meeting Defense construction industry needs. But for an indiscretion on the part of the associate regional administrator, the Labor Department might have succeeded in containing the alien problem, controlling construction industry wages, and enriching the friends of Phillip Burton—all at the expense of the people of Guam and the increasingly rebellious American taxpayer.

This indiscretion took the form of a memo to Haltigan, which fell into the hands of Michael McClure of the Guam Employers Council sometime in early February. In it, Hulsey alludes to the opposition of the Guam employers to the union-Dillingham training agreement. According to the January 30 memo, Dillingham Vice President Pete Errect suggested that the Labor Department use its new certification power to snap the already weakening opposition of the Guam employers. Hulsey wrote:

He [Errect] said that a little pressure from us—some overt manifestation of our commitment—should do the trick.

I asked for something more specific, and he said our most effective leverage in this situation was our certification actions. He thought that if word got out that non-cooperating contractors might have their certification requests reviewed with great pains, they would become noticeably more anxious to cooperate in the program.

I see his point and agree that he is likely right in what he says. I told him we would do whatever we could do legitimately and legally. He thought that if that were our attitude, word to that effect ought to get out. I told him we would look into the matter and take the best course available to us.

At any rate, I agree that the opposition is weakening and full atcive participation by all contractors seems to be fairly imminent. We will feel our way carefully and give a fateful push when we feel the time is right.

To many Guam employers whose businesses depend on foreign workers, this memo signaled the Labor Department's determination to exclude local firms from operating the training program and, if necessary, to move against them economically—using the new labor certfication procedures as a weapon. Contrary to its intended purpose, the Hulsey memo galvanized opposition to the

training program. On February 10, 1978, attorneys for the Guam Employers Council, Black Construction Company, and Modular Homes, Inc. sent a formal letter of complaint to the Secretary of Labor requesting an investigation. And on March 9, a suit was filed in federal district court on Guam to halt the award of the joint union-Dillingham contract.

Representatives of the aggrieved employer organizations and their attorneys have met with the Labor Department's investigators on Guam and provided substantial documentation supporting the charges in their complaint. In San Francisco, the investigators have questioned regional Labor Department officials closely and made copies of pertinent documents in their files. According to reliable sources who request that their names be withheld, the investigation team was informed of Congressman Burton's involvement, including the meeting of November 18 —in which he and Assistant Secretary of Labor Don Elisburg met with the Operating Engineers and Dillingham to approve the joint training program. In addition, they were given copies of correspondence and complete information regarding the private consulting firm through which high-ranking Labor Department officials attempted to "launder" the training contracts under investigation. Since March, four months of official silence have elapsed. According to federal regulations, the Secretary of Labor must investigate all complaints promptly, publish findings within a reasonable time, and provide an administrative hearing in all appropriate cases. Despite impressive evidence, repeated efforts, and rising costs, the Guam employers and their attorneys report that they "have been unable to secure any relief, prompt or otherwise, from the Secetary of Labor."

Faced with a lawsuit in the district court and the internal Labor Department investigation, the Dillingham Corporation has backed away from the union-management deal and its coercive tactics which were revealed in the fatal Hulsey memo of January 30. On the other hand, the Operating Engineers and Labor Department regional administrators remain unflappable—seemingly oblivious to the course of recent events and unconcerned about the as-yet unpublished findings of the investigation.

On May 13, 1978, the Department of Labor awarded a construction training contract to the Operating Engineers Union in the amount of $450,000. General President Jay Turner of the union jetted to San Francisco for the signing ceremony. A union press release of May 13 said, "Turner complimented Secretary of Labor F. Ray Marshall and Representative Phil Burton (D.-San Francisco) for their cooperation in establishing the new training program." The statement quoted Turner as saying that Burton had been very active in supporting the Department of Labor and the Operating Engineers in their efforts on Guam. The contract provides funds to train 150 workers in construction trades, and to upgrade the skills of 50 additional workers. Dale Marr, who was present both at the November 18 meeting with Burton and at the signing ceremony, characteristically predicted, "If Guam contractors do not cooperate with the government by hiring these workers once they are trained, the Labor Department undoubtedly will have to tighten its enforcement of federal wage and hour rules."

This remark makes it clear that union leaders anticipate the continued assistance of the U.S. Labor Department in their drive to organize the construction trades on Guam. And they may just be right. It is likely that most of the 200 union trainees will turn out to be union men. If 10 percent of them also receive training in organizing techniques, the union will then have a 20-man task force to spread its influence across the island. Under current regulations, no contractor who uses alien labor will be able to refuse union-trained workers. And since all contractors depend on alien labor, all will have to welcome the newly trained worker-organizers. For the next 18 months, the union can consolidate its membership while "adverse effect rates" push up industry wages.

Large American construction concerns like Dillingham are favored by these conditions. Because wages are established by the Labor Department and paid through Defense Department contracts, cooperation with the Operating Engineers becomes a viable and paid through Defense Department contracts, cooperation with the contractors will dwindle as increased payrolls and tighter controls on the use of alien labor force many contractors out of business. As wage rates in Guam approach parity with those on Hawaii and the U.S. mainland, importing American workers will become more and more common. Foreign construction firms, which have traditionally depended on cheap labor and advantageous currency exchange rates for their competitive edge, will be handicapped by increased unionization and Labor Department policies structured to accomodate American interests and workers on Guam.

Several unanswered questions remain. They suggest that a full congressional investigation of this matter may be appropriate: What, if anything, did Representative Burton and the governor of Hawaii get for their troubles? Was their action a political payoff involving public funds? Why has the Labor Department investigation been stalled? By what reasoning has Secretary Marshall failed to grant an administrative hearing or, in fact, take any action in the face of blatant official wrongdoings perpetrated by top Labor Department administrators? And finally, what remedies will be available to the Guam employers when Local 3 has succeeded in locking up the island?

Re Investigation into Administration of Funds under the Comprehensive Employment Training Act of 1973 in the Territory of Guam.

U.S. SENATE,
Washington, D.C., July 7, 1978.

Hon. RAY MARSHALL,
Secretary of Labor, Washington, D.C.

DEAR MR. SECRETARY: I am writing to request that you initiate an investigation into certain alleged improprieties involving the use of CETA funds in the Territory of Guam. It is my understanding that Mr. Willias R. Lawrence of the firm of Klemm, Dear and Lawrence in Agana, Guam has previously asked for such an inquiry, but that your office has been reluctant to proceed.

I am enclosing for your benefit a copy of a letter dated May 8, 1978 from Mr. Lawrence to Congressman Lester Wolff which outlines the allegations of improper use of CETA funds. It appears that you also received a copy of this letter.

It seems that Mr. Lawrence and others have uncovered a rather blatant attempt by USDOL to finance what amounts to a union drive in Guam through the guise of "CETA funded training." I am also advised that local businessmen have suffered deplorable abuse in USDOL concerted efforts to suppress their opposition to the government funded training.

To ascertain the truth of these allegations, I believe you should—at the least—schedule an administrative hearing in Guam, with full subpoena power being given so that USDOL officials and others who are willing to testify may do so under cover of subpoena.

I am, of course, at this time in no position to make a determination as to the merits of the allegations involved. Nevertheless, the whole area of CETA funding is a matter of particular interest to Congress at this time and, for that reason, we are most desirous that you conduct an investigation into the situation I have now brought to your attention.

Awaiting your response, I appreciate your giving this request your immediate attention.

With best wishes, I am
Sincerely,

JESSE HELMS.

LEAA AND PRISON OVERCROWDING

Mr. THURMOND. Mr. President, overcrowded conditions in our prisons have become a national crisis. Federal and State courts are consistently ordering correctional authorities to improve conditions of incarceration and relieve overcrowding conditions.

An urgent need exists for the improvement of correctional facilities. In spite of this need, S. 3270, the administration's bill to reauthorize LEAA, would eliminate part E which specifically authorizes funding for corrections. The bill would also eliminate the 50 percent funding authorization for correctional construction projects.

The elimination of these provisions from the LEAA bill may be a serious mistake. Our prisons are bursting open, violence is erupting within them; and some States do not have enough institutional space to hold all of the persons who commit serious crimes in our society.

It seems that the Attorney General, at the same time he proposes to cut off earmarked LEAA correctional assistance to State and local governments, is promulgating Federal standards of questionable legal status, which would impose additional burdens on State and local authorities.

The Attorney General is scheduled to appear shortly before the Senate Criminal Laws Subcommittee to be the lead-off witness on the LEAA reauthorization hearings. The future of the part E programs will be one of this Senator's major interests.

I wish to include in the RECORD, three articles which relate to this crisis. The first article appeared in the U.S. News and World Report on August 7, 1978, entitled, "Crisis Builds in America's Crowded Prisons." The second article appeared in the August 5 edition of the Washington Post and is entitled, "Maryland Given 8 Months to Remove 1,000 Inmates From Prisons." The third article appeared in the New York Times on August 6, 1978 and is entitled, "Justice Department and a Private Group Press Standards for Prison Reform."

Mr. President, I ask unanimous consent that these three attached articles be inserted in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

CRISIS BUILDS IN AMERICA'S CROWDED PRISONS

Inmate riots in Illinois and Georgia in late July are drawing new attention to a critical national problem: State and federal prisons alike are jammed to overflowing.

The inmate population of this country keeps swelling. In the last five years, it jumped from 204,000 to 278,000—an increase of 36 percent. Yet the space available for confining criminals has lagged far behind.

The result: More and more penitentiaries have become powder kegs that foster violence, racial tension, sexual assault and unrest.

It was overcrowding, exacerbated by the summer heat, that was blamed in large part for the inmate riot at the Pontiac Correctional Center in Illinois. Three guards were killed in the July 22 uprising.

Built in 1871 to hold 600 prisoners, the Pontiac prison houses about 2,000 today—most doubled up in 4-by-6-foot cells. Conditions are so bad that state officials say they haven't been able to recruit an adequate number of guards.

Overcrowding also may have helped trigger a riot at the Georgia State Prison in Reidsville on July 23, the day after the Pontiac disturbance. One guard and two inmates were stabbed to death. Built to house 1,100 prisoners, the Georgia institution now holds nearly 2,500.

Why the upsurge in people behind bars?

The basic cause, the experts say, has been the dramatic rise in crime in recent years. This, in turn, sparked a public demand to get tough on criminals. Police and prosecutors have been doing so. Increasingly, state legislatures are following the path set by California and New York—pushing through laws requiring stiffer sentences. And many judges, on their own, are giving criminals longer terms.

Life in the corridor. These measures have dumped tens of thousands of lawbreakers into prisons that critics say were overcrowded when they were built—often more than 50 years ago. Increasingly, two or three inmates are squeezed into small cells designed for one. Others are confined in crowded dormitories or prison corridors.

In some states, officials are turning to makeshift arrangements to house "surplus" prisoners—tents, trailers, vacant hospitals, schools and warehouses.

In at least a dozen states, officials are under court order to reduce overcrowding. And in almost every state, plans for new prisons are on the drawing boards. But no quick relief is expected. It takes at least five years to build a facility, even if funds are available. Many law-enforcement people worry that the blueprints they have drawn up will be scuttled by economy-minded state legislators. According to one estimate, it would cost about 3 billion dollars to construct all the federal and state prisons now planned.

Proposals for bigger outlays for prisons "have never been good political fodder for anyone," observes one corrections official. If the taxpayer revolt that surfaced in California continues to spread, state legislators could become even more tightfisted in the future.

After Californians on June 6 approved Proposition 13—a sweeping property-tax cutback—funds for a new prison were deleted from the state budget. The action provoked cries of alarm from prison official. "If the rate of intake keeps going up, we will fill every available space by 1979 or 1980," complains one. "We could have an absolutely critical situation."

Ruining the neighborhood. Lack of money isn't the only roadblock to the building of prisons. Almost invariably, construction plans are opposed by property owners in the area. In Miami and Atlanta, officials have searched for months for prison sites that will be acceptable to the communities. "Homeowners object to inmates in their back yard," says one Florida official.

On top of this, many prison-reform groups are pushing for an end to prison construction. They urge that only hardened criminals be sent to prison and that larger numbers of lawbreakers who seen capable of rehabilitation be dealt with outside prison walls.

One approach gaining favor in recent years is to allow an offender to hold a job in the community, returning nightly to a so-called halfway house. But community-based programs often stir up even more local opposition than proposals for new prisons do.

Some corrections experts believe that the prison crisis won't be solved until something approaching a national consensus emerges on what to do with criminals.

"You have one segment that says offenders must be punished and put away, and another that says offenders should be helped and given treatment in the community," observes Raymond S. Olsen, associate executive director of the American Correctional Association.

While the debate goes on, America's prisons face years of overcrowding and unrest.

Md. Given 8 Months To Remove 1,000 Inmates From Prisons

(By Saundra Saperstein)

Two U.S. judges in Maryland yesterday ordered state officials to remove 1,000 inmates in the next eight months from the overcrowded Maryland Penitentiary and the Maryland House of Correction.

Maryland Attorney General Francis (Bill) Burch said that meeting the deadline will pose "a substantial threat to public safety."

The state has asked for 22 months to reduce the populations at the maximum-security penitentiary in Baltimore and the medium-security House of Correction in Jessup.

"When we asked for 22 months, we were not bargaining," Acting Gov. Blair Lee III said recently. "That's what it's going to take."

Told of the court order yesterday, Deputy Commissioner of Corrections Elmanus Herndon said: "That's incredible," and then fell into silence for several seconds.

An aide to the governor said he does not know what the state will do if it has to meet the eight-month deadline. "The only thing I can rule out is premature release of prisoners," said Thomas Peddicord, the governor's chief legislative officer.

Burch said the state will appeal the ruling of U.S. District Court Judges Alexander Harvey II and Stanley Blair immediately.

The judges, in separate opinions last May, had ruled that the two prisons are so overcrowded that conditions represent cruel and unusual punishment for the inmates and therefore are unconstitutional.

The penitentiary is the state's only maximum-security prison. Most prisoners there are serving lengthy sentences for serious felonies such as murder, armed robbery and rape, according to Deputy Commissioner Herndon.

The century-old House of Correction holds many of the same type of prisoners, but those who have been in the system longer and in many cases have been moved from the maximum-security penitentiary, Herndon said.

Burch said yesterday that none of the public officials involved "intended to participate in any program requiring the premature release of violent offenders or other prisoners whose release posed a threat to public safety."

But none of the state officials questioned yesterday offered any proposal for meeting the 8-month deadline if the state does not win its appeal of the order.

In their ruling last May, the judges found that the heart of the overcrowding problem was the widespread practice at both institutions of housing two inmates in one cell.

In the House of Correction, what the judges referred to as "double-celling" allowed more than 1,700 prisoners to be housed in a facility designed for 1,100 inmates, according to testimony in the case.

In the Maryland Penitentiary, which included the Maryland Reception, Diagnostic and Classification Center, there are more than 1,500 inmates—about 1,000 of them double-celled, according to the court opinion.

The judges found that the housing of two inmates in 40 to 44 square-foot cells offends "contemporary standards of human decency."

The rulings came in two class action lawsuits against state officials brought by prison inmates.

Judge Harvey yesterday ruled that officials are permanently prohibited from double-celling inmates at the House of Correction.

Judge Blair, however, ruled that the penitentiary may have up to 25 cells used for double-celling under certain circumstances, and that other prisoners may be double-celled if they give voluntary, written permission for the practice.

Specifically, the judges ordered officials to remove 100 prisoners from each institution by December. They then ordered officials to remove 100 inmates each month from each prison for the next four months after that.

Peddicord said the state will have no problem meeting the December deadline, but did not know how it can meet the timetable ordered for the next four months.

The state's 22-month proposal for reducing the prison populations had relied on the 1980 opening of a new institution in Jessup to house 500 inmates, and a second facility in Hagerstown, scheduled for completion in 1979, that would house about 130, Peddicord said.

Attorneys for the inmates had proposed that the state be given a six-month deadline for reducing the prison populations.

They suggested that officials consider reclassifications of prisoners, transfers of inmates to correctional camps, transfer to halfway houses, expedited paroles and the purchase or rental of temporary housing such as military installations or motels to meet the deadline.

Paul Bekman, an attorney who represents a House of Correction inmate yesterday criticized the state for failing to be "innovative" and failing to look for alternatives to new construction to meet an accelerated deadline.

But Peddicord said the state had ordered construction speed-ups on two facilities to come up with the 22-month timetable.

Judge Harvey last May also found unconstitutional the use of a special confinement area in the Jessup institution, which he said "merely warehoused" inmates with psychological or psychiatric problems. Yesterday, he ordered officials to transfer actively psychotic inmates and others in need of treatment to appropriate state mental institutions and to close the special area by Dec. 1.

In the penitentiary case, Judge Blair found that an isolation area, intended to hold mentally disturbed inmates on a short-term basis, was instead being used for extended periods of time to house inmates without adequate professional care.

Yesterday, he prohibited officials from using the area for "punishment" of inmates, and set strict rules on its use.

The judges' rulings were similar to a federal judge's 1975 opinion that found conditions in the century-old D.C. jail unconstitutional because of overcrowding.

Bekman said the state would have to show that the rulings by Judges Harvey and Blair were "entirely erroneous" in order to win an appeal.

Justice Dept. and a Private Group Press Standards for Prison Reform

(By Pranay Gupte)

The Department of Justice and the American Correctional Association have drafted

tough and specific new standards for the nation's prisons in an effort to bring about better living, working and administrative conditions for prisoners in Federal, state and local institutions.

The two groups are also pushing for a system of "accreditation" of the country's 3,000 correctional facilities. The Justice Department's Bureau of Prisons will require that its 38 correctional facilities and 11 halfway houses meet its standards.

The association, a group of professionals and scholars in the corrections field, will seek the voluntary compliance of other institutions with its parallel standards, drafted in consultation with the Justice Department.

Both the standards and the accreditation drive grow out of a belief held by corrections authorities that the greatly publicized "new penology" of the 1960's, a broad movement of experimental attempts at preventing recidivism and improving prison conditions, generally fell short of its goals.

But while approaches of the "new penology" may be fading, the political and philosophical questions they inspired concerning the purposes and procedures of the prison system continue to be hotly debated. Further complicating the issue of corrections reform is the fact that improvements in prison conditions are frequently costly and politically unpopular.

The new developments signal a fundamental shift of emphasis in corrections reform, according to Clair A. Cripe, general counsel to the Bureau of Prisons.

In the 1960's, he said, the great push by civil liberties groups and others was to win court decisions against mistreatment of inmates, poor food and medical care and inadequate programs of education and vocational training.

"But now it's clear to us that most of these issues have been litigated to their fullest," Mr. Cripe said. "It's obvious that you can take prison reform only so far in the courts, and that details of further reforms can be accomplished now more completely through regulatory standards and model statutes.

"This is being called the 'Reality Shift,'" he added.

The Commission on Accreditation of Corrections, set up by the corrections association with Justice Department help, has drafted its more than 1,500 standards in the form of seven manuals for adult and juvenile correctional institutions and programs.

To be accredited, correctional institutions would permit officials to regularly monitor their compliance with the new standards, which cover the rights of inmates, living and working conditions, discipline, recreation and the administration of facilities. In the past, standards in these areas have been set piecemeal by courts, legislatures, other governmental units and prison administrators.

COSTS PUT AT $1,000 TO $5,000

Accreditation, which would cost from $1,000 to $5,000 for each facility, depending on its size, would probably help non-Federal prisons obtain more money from state and local governments, said Raymond S. Olsen, associate executive director of the American Correctional Association, because officials will be able to cite their need for funds to comply with the new standards.

He said that compliance with the standards, which have been endorsed by the American Bar Association, the American Medical Association and the Commission for Uniform State Laws, "will show to the public that the corrections field has matured to the level of a profession."

The accreditation commission has more than 100 applications pending. In the last few weeks it has granted certification to community corrections agencies in Youngstown, Ohio; Washington; Cincinnati, and St. Louis, Mo., said Dr. Robert H. Fosen, the commission's director.

The New Jersey Parole Board has expressed interest in accreditation for facilities, and in Connecticut the chairman of the Department of Corrections, John Manson, has endorsed the idea. But in New York State, according to Jane Ferris, the accreditation commission's assistant director, only a private nonprofit agency that works with inmates, Volunteers of America, has thus far shown any interest.

OVERCROWDING IN PRISONS

The push for tough new standards and accreditation was fueled by a nationwide shift toward imposition of longer sentences. A result of that shift has been overcrowding in prisons, which now hold more than 425,000 inmates in institutions that authorities generally agree are capable of handling 325,000 to 375,000. Experts say that each week about 400 more people enter the nation's prisons than are discharged.

Such overcrowding often means unrest, especially since many activities and programs were cut in the first wave of disenchantment with the "new penology.'

Inmates have rioted in recent weeks in at least five prisons, including the Illinois State Penitentiary in Pontiac, Ill., where three guards were stabbed to death and three others were injured after inmates set fire to three buildings. In Reidsville, Ga., at the racially troubled state prison, two inmates and a guard who were taken hostage were stabbed to death last month.

The question of prison reform has been raised in various ways in many states.

ALABAMA

The impetus for changes in Alabama's prison system was a 1976 court order by Judge Frank M. Johnson of Federal District Court declaring conditions in the state's prisons unconstitutional. He set minimum standards—such as 60 square feet of living space per inmate, three "wholesome and nutritious" meals a day, and "meaningful educational, vocational and recreational programs"—to correct the conditions and ordered a 39-member human rights committee to monitor compliance.

While there has been some compliance, Alabama's prisons continue to be criticized. The state's $24 million allocation for its prison system is among the lowest in the country, and critics charge that, while the state Board of Corrections has made same effort since Judge Johnson's landmark ruling, education programs and living conditions continue to be substandard.

CALIFORNIA

While the state is strenuously pushing for the adoption of uniform standards and accredition, several prison systems, San Francisco's among them, have suffered from fiscal cuts in recent months. The passage in June of Proposition 13, the tax-cutting initiative, is expected to be especially harmful to prison funding. The Seventh Step Foundation, an innovative program that offered food, clothing and discussion sessions to inmates, has been discontinued. Grant Micken of San Francisco's Human Rights Commission contends that interest in civil rights issues has diminished significantly in recent years.

ILLINOIS

David Granley of the state's audit program says that officials nowadays rarely talk about "rehabilitation." The emphasis in Illinois now is on vocational programs that prepare a prisoner for earning a livelihood once he is released, although critics says there simply are not enough programs for the state's 8,000 prisoners.

LOUISIANA

Overcrowding, poor sanitation and allegations of brutal treatment have long afflicted the state's prisons, and there is virtually no effective monitoring of corrections practices. The director of the Louisiana Coalition of Jails and Prisons, John Vodicka, says rehabilitation programs are minimal and are worse than they were several years ago, despite court orders for improvement. Funds for several federally financed education and recreation programs have run out in the past year, and there seems little prospect of renewal.

"Rehabilitation?" asked Nina Sulzer, corrections supervisor for the Jefferson Parish prison system outside New Orleans. "We just don't use the word very much any more."

MICHIGAN

While the state's educational and vocational training programs for prisoners have been regarded highly, overcrowding continues to be a problem. Jackson Prison, near Grosse Pointe Farms, has 6,000 inmates and is believed to be one of the biggest in the world.

Even so, says William Kime, the state's deputy director of corrections, this prison and others in the state badly need additional buildings. Wayne County Jail officials have frequently been charged with brutality and other abuses.

OREGON

Prisoner representatives and corrections officials in Oregon say that in recent years the shift has been toward punishment, not rehabilitation. Last December, a group of 12 inmates filed a suit in the United States District Court in Portland, alleging that guards apply "cruel and unusual punishment," including torture. Although the suit has yet to come to trial, the state corrections division has produced new guidelines prohibiting the alleged abuses.

TEXAS

W. J. Estelle Jr., director of the Texas Department of Corrections, has been a consistent critic of the "new penology." and he acknowledges that his operation has "always been seen as a pretty conservative sort of outfit." He adds: "As far as we're concerned, we're going to use what we know works and we'll let somebody else use expensive programs."

Of the state's 24,000 inmates, 8,482 are taking college courses. The operating budget for the state prison system now exceeds $60 million a year, of which only $1 million goes into education programs. Little has been done with bilingual programs, despite the large numbers of Spanish-speaking prisoners in Texas, and there have never been any programs in such areas as black studies.

WISCONSIN

Prison reform has become a major issue in the gubernatorial race Barbara Kahn, a state legislative aide, said: "We are having strikes and hostage-taking in our prison institutions, not just because of cutbacks on programs instiuted before. The problem is that many measures introduced were implemented only half-way." There is also criticism in the state Legislature that the Department of Corrections is slow to implement legislative mandates for reforms. Critics have cited serious flaws in work and educational programs within correctional institutions, and now there are vocal demands for inspections and stricter standards.

ESTES KEFAUVER

Mr. SASSER. Mr. President, I rise tc pay tribute to a fellow Tennessean who rose to national prominence as one of the foremost contemporary champions of the working people. This day, August 10, 1978, is the 15th anniversary of the death of Senator Estes Kefauver. This great man has already become a legend for his fights on behalf of the "little people" against organized crime and special interests.

I have written President Carter asking that the Post Office issue a commemorative stamp honoring Senator Estes Kefauver. I hope that my Senate colleagues, some of whom were Estes' colleagues as well, will join me in urging that this be done.

Estes was my friend. In his last campaign for the Senate in 1960, I was his regional youth director. Knowing him, and following his career, helped spark my own interest in running for the Senate in 1976. But it really was not unusual that Estes Kefauver should have been my friend. He was the personal friend of so many thousands of people throughout the Nation.

Many of his friends still remember Estes' coonskin cap, his warm handshake and his friendly grin. More people also still remember that there was a substance to his populist image that went far beyond such folksy symbols.

Estes Kefauver won election to the Senate by beating an entrenched Tennessee political organization, and effectively represented the people of his State for almost 15 years. He first came to national prominence through the televised Kefauver committee investigations of organized crime. In later Senate hearings, he hammered away at oil cartels, pharmaceutical monopolies, and big business trusts. He successfully halted a private utilities' deal aimed at crippling the Tennessee Valley Authority, which has been a boon to the economy of the Southeast.

Estes was a major crusader for the preservation of competition in the marketplace because he knew that the consumer benefits from competitive pricing. With his fights against the privileged interests on behalf of the average man, Senator Estes Kefauver's crusade for equity in the marketplace was a harbinger of the current emphasis on the consumer and the public interest.

In Tennessee, Estes won his elections by tireless personal campaigning in small towns and on courthouse squares. He kept in touch with thousands of Tennesseans regularly by letter and telephone.

His personal campaign style became a national trademark when he ran for President of the United States. In 1952, Estes won 14 of 17 Presidential preference primaries. In 1956, largely because of his popular support, Estes was the Vice-Presidential nominee for his party.

Estes Kefauver was born in the shadow of the Smoky Mountains and he grew up in a small town. I think one of the most important attributes to this great man is that he never lost that small town concern for and interest in other people.

He came a long way in his public career but the Senate investigations he chaired, and his national campaigns all reflected his humanity and his interest in the welfare of his fellow human beings.

I am proud to have been one of Estes' many friends, proud of the role I played in his last, hard fought, campaign for the Senate and proud that I have the opportunity to represent the people of Tennessee as he did. I think that we all could seek to emulate his concern for the average man as we go about our legislative duties here in the U.S. Senate.

BUREAUCRATIC FRUSTRATION

Mr. HELMS. Mr. President, I recently received a letter from a constituent in Pineville, N.C., who described his frustrating experience with the Department of Housing and Urban Development.

Mr. Tommy L. Therrell of Lee Drywall, Inc., a small construction firm, related his first, and probably his last, encounter with a federally funded job.

This company operates in the southern piedmont section of North Carolina and has a well-earned reputation for the quality of its construction work. The company was called in to complete a drywall project because the previous subcontractor had walked off the job. Mr. Therrell was told by the Department of Housing and Urban Development that the job must be first class, and that there was a time limitation. Also, the project was subject to inspection and approval by the architect, as well as HUD.

Mr. Therrell went on to explain that the work required thoroughly experienced personnel which were difficult to find because of a recent building boom in the area.

With the company prepared to commence work and the contract finalized, HUD sent Mr. Therrell a letter listing a set of guidelines with seven items of information they wanted. Mr. Therrell estimates that it would take over 25 hours to compute this information—time, Mr. President he simply does not have.

However, as I read HUD's letter to Mr. Therrell, I hope my fellow colleagues will agree that HUD should be spending its time and our money in less foolish endeavors.

DEAR MR. THERRELL: This office has determined that you, as a contractor on the above project, are subject to the provisions of Executive Order 11246, as amended. The Order covers all Federally-assisted construction projects in excess of $10,000. It prohibits discrimination in employment on the basis of race, color, religion, national origin or sex.

This letter is to notify you that a compliance review will be conducted at 1:00 p.m. on June 27, 1978, at the Prime Contractor's Archdale Drive Trailer Office. The purpose of the review is to determine if you are in compliance with your equal employment obligations and are taking affirmative action to provide equal employment opportunity with the trade(s) you employ on the project.

An officer of the company empowered to make and discuss policy and to make commitments for corrective action, where necessary, should be present during this review.

The following information is to be assembled and presented at the time of the review with a copy for our records, as required.

1. A list of employees who worked in the skilled trade(s) since the beginning of the construction on the project. This list should show the name, address, date employment began, rate of pay, number of hours worked, job classification, racial or ethnic designation and sex of each.

2. A copy of the collective bargaining agreement(s) to which you are a party.

3. Davis-Bacon and other payroll records pertaining to the area. From the payrolls, please prepare a summary of minority/majority hours, by craft, for each month of the construction period.

4. Copies of fringe benefit reports for the covered period. Minorities and Females should be identified.

5. A copy of your signed contract of sub contract for the Federally-assisted project(s).

6. Copies of any contracts in excess of $10,000 received after the award date of this Federally-assisted project.

7. Documentation of your firm's efforts to implement the twelve (12) affirmative action steps for your project(s) now currently under construction. A copy of the good faith efforts is enclosed for your convenience.

Please ensure that all copies are legible.

Included as an essential part of the compliance revew is an on-site inspection of one of your sites. This will be done as the final part of the review process.

Request for additional information may be addressed to this office at (404) 881-7791. The compliance officer who will conduct the review is Leroy Neal.

Sincerely,

CHARLES E. CLARK,
Assistant Regional Administrator for Fair Housing and Equal Opportunity.

In this letter, Mr. President, HUD cites Executive Order 11246, as amended as justification for their prying. This order was purportedly intended to stop discrimination in areas involving Government contracts. I submit that HUD has overstepped itself by requiring this small business to meet these petty requests.

Now, Mr. President, these ridiculous requests by HUD are hindering productivity, increasing the cost of this project, and in my view, feeding the fires of inflation.

No wonder, Mr. President, that so many Americans feel they are paying taxes to finance a government that insists on working against them.

TAXPAYERS WEARY OF CETA

Mr. HELMS. Mr. President, one can hardly pick up a newspaper anywhere in the country without reading about a new and startling example of CETA funding abuse. It is no wonder that the Labor Department bureaucrats are expressing fears that Congress might consider reducing CETA appropriations. And if we really wanted to do something for the oppressed taxpayers of this country, we would curtail this massive boondoggle.

A story recently appeared in the Raleigh, N. C., News and Observer describing what has become an all too familiar CETA failure. It just happens that this particular blunder has cost the taxpayers $46,834. My constituents in North Carolina are outraged by abuses such as this and they know full well that such colossal blunders will continue in spite of our so-called reforms to the legislation.

I ask unanimous consent that the July 29, 1978, article from the News and Observer entitled "Weeds cover $46,834 CETA project at St. Aug's" as well as James J. Kilpatrick's excellent column, "The CETA boondoggle should be stopped," be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WEEDS COVER $46,834 CETA PROJECT AT ST. AUG'S

(By Cole C. Campbell and Johanna Seltz)

Laborers in Raleigh's federal jobs program worked 12 months and were paid $46,834 to clear and begin developing a nature garden and recreation area at St. Augustine's College.

Today, the 35-acre site stands undeveloped and overgrown.

The project, ranked second in priority

among all 1977–78 public service job projects in Raleigh's Comprehensive Employment and Training Act program, ended last month.

This week, it was criticized by Bryant A. Lindsey, a former administrative assistant in the Raleigh CETA office, in a letter sent to City Council.

Lindsey also disclosed that he had protested the project prior to its approval in a memorandum to CETA officials.

"We obviously winked at blatant misrepresentation within project proposals," Lindsey said in the memo, dated May 23, 1977.

"For example, St. Augustine's College does not need nine persons to work 12 months to develop 35 acres—those ground maintenance persons are either going to be idle a lot of the time or they are going to be doing routine maintenance for the college, in my opinion."

One major Raleigh contractor estimated in an interview Friday that it would take only about 30 days for nine men using hand tools to clear a tract such as the one at St. Augustine's, which took a year.

If the nine workers were paid the federal minimum wage of $2.65 and worked eight-hour days, the project would cost $5,724, according to the contractor.

Lawrence E. Wray Jr., Raleigh's intergovernmental coordinator who oversees CETA programs for Raleigh and Lee and Chatham and Johnston counties, said in an interview it was impossible to compare CETA projects with work done by private contractors.

"There's no comparison," he said, observing that CETA tries to find jobs for people who have poor motivation and poor working habits. He said the primary purpose of the public service projects was not the projects themselves but jobs provided for unemployed people.

"It's a program whereby folks can get some money for their family and get some food on the table for their children," Wray said.

Lawrence B. Bradley, building and grounds superintendent at St. Augustine's, said the clearing work was slow because the undergrowth was dense and the CETA workers inexperienced. There was also turnover among the crew, he said.

Workers took long breaks in hot weather to avoid heat prostration, he said. Whenever it rained or the temperature dropped below 40 degrees, work stopped altogether, he said.

On those days, the CETA workers did such things as maintenance work on equipment they used in the project, Bradley said.

Federal regulations prohibit agencies with CETA workers from using the workers to do jobs that an agency would normally do with its own staff.

Bradley said Monday the CETA crew did not do any regular college maintenance work. "The guidelines are very clear cut," he said.

However, J. Mills Holloway, St. Augustine's vice-president for financial affairs and Bradley's supervisor, said Friday, "Frankly, the fellows did mow grass in other sections of the campus. A fellow can't swing a blade all day . . . If that's a violation of regulations, I didn't know it."

Ruby D. Green, head of the Raleigh CETA office, said any irregularities in the St. Augustine's project should have been reported by Gail L. Manecio. As coordinator of CETA public service employment projects from October 1976 to June 1978, Mrs. Manecio monitored the projects, Miss Green said.

But Mrs. Manecio, who now lives in Charlotte, said in a telephone interview there was no monitoring of CETA projects.

"There were no guidelines to go by," Mrs. Manecio said. "There were never any procedures set up at all for monitoring projects. This is something that should have been done by the administration.

"I would visit job sites and ask the clients (CETA workers) things like, 'How are you doing?' or 'Are you having any problems?'

"Several times I inquired if I should be monitoring. But there was no system set up . . . I was told to just visit the projects."

Evaluation of a CETA project is done by the organization using the workers, Mrs. Manecio said. The organization reports how well it fulfilled its goals and the CETA staff reviews that evaluation, she said.

Asked about Mrs. Manecio's comments, Wray said his office had received no guidelines for monitoring from the U.S. Department of Labor, which supervises CETA.

Wray said Bradley would write an evaluation of St. Augustine's project soon.

"If it doesn't look right, we will have some conversations with people," Wray said. He said he had no plans to initiate an investigation.

Federal officials in the Labor Department's Atlanta office said that because CETA emphasizes local control, they would ask Wray about the St. Augustine's project before considering an investigation of their own.

"It is his responsibility to see that the goals are accomplished," said S. Hoyte Blackwell, regional CETA supervisor for North Carolina. "We will, of course, contact him and talk to him about that."

The St. Augustine's proposal submitted to CETA officials lists as objectives clearing trash and debris from the 35 acres as part of long-range development of a park and recreation area.

The proposal states that using CETA workers, "The College will be able to clear and landscape" 15 acres for a public mini-park and exercise trail and also will renovate several athletic fields and construct two baseball dugouts.

"These people weren't hired to build us a minipark or an exercise trail. They were hired to clear out debris," Wiley M. Davis, St. Augustine's vice president for administration, said in an interview Friday.

"Since they left, we have been in a growing season. Of course, it has been growing again," Davis said.

Davis said St. Augustine's would continue development of the facilities when the college found money to do it.

The college did not use the CETA workers to renovate the athletic fields or construct dug-outs because it decided to use a professional contractor for the work, he said.

The project was recommended by an advisory council for approval by the CETA executive committee, which is composed of representatives of the four governments.

William R. Knight, a member of the Raleigh City Council and assistant to the vice president for academic affairs at St. Augustine's, is a member of the advisory council.

Knight said advisory council members as a practice never voted on projects requested by the institutions they worked for. He said he was not present when the council approved the St. Augustine's project.

"I 'm not connected with any (CETA) project at St. Aug," Knight said.

Lindsey was Miss Green's administrative assistant at CETA, where he worked from October 1976 to August 1977. He resigned and currently is a doctoral candidate in adult education at N.C. State University.

Lindsey sent his 1977 memo criticizing the St. Augustine's project to Miss Green.

Asked about the memo Friday, Miss Green said Lindsey was not directly involved with public service job projects such as the one at St. Augustine's. She also said she was only responsible for day-to-day operations, not approving projects.

The CETA Boondoggle Should Be Stopped

(By James J. Kilpatrick)

Sometime this week, if everything goes on schedule, the House will take up the CETA Reauthorization Bill. The bill ought to be shouted down and stomped on. Instead, the bill is likely to be wafted toward the Senate on waves of hot air and good intentions. Barring a fullscale revolt, another $10 billion to $12 billion of your money is about to gurgle down the drain.

CETA is the Comprehensive Employment and Training Act of 1973. It is now set to expire Sept. 30. The pending bill would rewrite portions of the original act in an effort to prevent multiple abuses, and would extend the program for four more years.

The authors of this grotesque imposition on the taxpayers could not prevent abuses if they kept at the rewriting job till Christmas. Nothing in my experience—not food stamps, nor foreign aid, nor the old Job Corps, nor the follies of the arts and humanities people—nothing has approached the sheer mind-boggling, boondoggling waste and corruption of the CETA billions.

That is not even the worst that can be said of the program. The original idea was to train the hardcore unemployed for productive jobs in the private sector. The original idea was to rely upon public service jobs in local government only as temporary expedients.

Those original ideas have been reduced to imbecility. The act has done virtually nothing toward solving the problems of the hardcore unemployed—their plight is as pathetic as ever—but the act has provided some glorious new revenue-sharing for the municipalities.

What CETA has accomplished—about all it has accomplished—is to transfer a few hundred thousand jobs from the private sector of our economy to the public sector. This is marvelous, it it not?

In Massachusetts, newsman Warren T. Brookes has reported, between July 1974 and January 1978 government employment rose by 23,500 jobs (mostly CETA), while the state's private sector actually lost 26,700 jobs. The effect of the program is to damage the very private employers who in the past have supplied the most employment to marginal workers.

Brookes has some figures on CETA employment in public service. In May 1977, for example, Boston had 1,221 CETA jobs under the city government. By March 1978, the number had grown to 3,207. In New Bedford-Fall River, city jobs under CETA swelled from 402 to 2,106 in the same period. The jobs pay an average salary of $10,000, far above what an untrained 18-year-old could get in private employment, but the jobs have no permanence and few of them provide serious training.

Doubtless, the CETA outlays have helped some jobless men and women. It would be incredible, considering the billions that have been spent, if some persons had not been constructively assisted. But the program is riddled with abuse.

Here in Washington, a spendthrift District government used $480,000 in CETA funds (translation: your tax funds) to set up a massive bureaucracy staffed in large part by relatives and cronies of City Council members. The 56 CETA recipients on the council's payroll averaged $18,000 a year for jobs that paid only $8,571 in other government agencies.

Writing in Reader's Digest, Ralph Kinney Bennett chronicles other outlays of your money. There was the payment in Atlanta of $475 a month to a former leader of the Black Panthers just "to keep an eye on city, county, and state governments and their living off the masses." There was the $640,000 turned over to the Gay Community Service of Los Angeles, "to provide education about gay people's problems." Another $34,000 went to the Gay Alliance of Rochester, N.Y., to provide speakers at local campuses so that students could learn about homosexual lifestyles. And then there was the grant in Miami for a "nude sculpting workshop" in which naked men and women "ran hands

over one another's bodies . . . to help them discover that they had 'both male and female qualities.' "

There is no way—no way on earth—that this miserable boondoggle can be retrieved for socially useful purposes. The House amendments make some feeble gestures toward reform, but a close reading of the changes suggests that local sponsors will evade the tighter requirements with ease. The CETA program, launched with good intentions five years ago, has come to a woefully bad end. If the House has any regard for the people's taxes, the House will let CETA die right there.

ORDER TO CONVENE AT 9:30 A.M., MONDAY, AUGUST 14, 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate convenes on Monday it convene following a recess at 9:30 a.m.

The PRESIDING OFFICER. Without objection. it is so ordered.

Mr. ROBERT C. BYRD. I thank the Chair.

ORDER FOR RECESS UNTIL 9:45 A.M. TOMORROW AND FOR CONSIDERATION OF EDUCATION BILL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 9:45 a.m. tomorrow and that at 10 a.m. the Senate resume consideration of the tuition tax credit bill.

The PRESIDING OFFICER. Is there objection?

Mr. GOLDWATER. Mr. President, reserving the right to object, I did not hear what was coming up.

Mr. ROBERT C. BYRD. I was simply asking that at 10 tomorrow morning; the Senate resume its consideration of the education bill which involves the tuition tax credit.

Mr. GOLDWATER. Mr. President, will the Senator yield.

Mr. ROBERT C. BYRD. I yield.

Mr. GOLDWATER. Because there will be a large number of absentees tomorrow, I am wondering——

Mr. ROBERT C. BYRD. Not on this side. We have five.

Mr. GOLDWATER. I have not completed my question.

Mr. ROBERT C. BYRD. I am sorry.

Mr. GOLDWATER. I am wondering if we could put off holding until Monday at a certain time on all amendments offered to that tax bill.

Mr. ROBERT C. BYRD. No. But I can assure the Senator that the vote on that particular amendment, the tuition tax credit, will not occur tomorrow. There may be other amendments to the bill.

Mr. GOLDWATER. I am interested in my amendment that does have a tax credit. That is $150 for public schools.

Mr. ROBERT C. BYRD. That would not occur tomorrow, but there may be some other amendments to the bill not dealing with tax credits that could be called up. Otherwise, I would hope that on tomorrow the Senate could proceed to discuss the bill and perhaps lay the bill aside temporarily and take up some other bill such as the D.C. appropriations bill, for example.

Mr. GOLDWATER. I have no objection.

Mr. ROBERT C. BYRD. I thank the distinguished Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the prayer tomorrow, the two leaders' time be limited to the remaining time between that point and the hour of 10 o'clock a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE SUBWAY ROLLCALL CLOCK

Mr. ROBERT C. BYRD. Mr. President, the clock at the Capitol end of the subway has been out of commission for some time. It is now again in working order starting today, August 10.

Its purpose was to alert Senators of the time remaining on votes. When the votes start the clock will register the full allotted time of the vote or, in other words, 15 minutes on a rollcall vote so the clock would register the full allotted time, 15 minutes, to wit, for the standard 15-minute vote. If we reduce that number to a 10-minute vote, the time for a 10-minute rollcall vote, then the clock would start at 10 minutes and work itself down so that Senators, when they reach the subway, can see exactly how many minutes remain. So the time remaining on a vote will then be indicated on that clock.

I thought I ought to announce that important development.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, I would hope there would be rollcall votes tomorrow—on issues, not just to have rollcall votes. I say this to alert Members that tomorrow is not a day out of school. We are going to proceed tomorrow to the tuition tax credit bill. I would hope other measures could be called up tomorrow and disposed of.

We have only 37 working days left, not including Saturdays or the legislative holiday which will come around Labor Day. But if we run out of gas tomorrow on the discussion of amendments to the tuition tax credit bill, I would hope the Senate would be able to shift to something else that the Senate could act on.

I am thinking about the D.C. appropriation bill. I do not know whether we can get the 3-day rule waived or not. I would hope we could do that, and proceed with that measure. At any rate, I would hope we can take up some other legislation tomorrow, in the event that we run out of gas on the tuition tax credit bill, so that the Senate could accomplish something on Friday.

So I hope Senators will not schedule trips out of town under the illusion that there will be no rollcall votes tomorrow. We might even have D.C. representation up tomorrow. Senator KENNEDY wants that measure up, I want it up, and we are going to get it up at some point; and I hope we can get cloture on it.

RECESS TO 9:45 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 9:45 a.m. tomorrow.

The motion was agreed to; and at 6:16 p.m., the Senate recessed until tomorrow, Friday, August 11, 1978, at 9:45 a.m.

NOMINATION

Executive nomination received by the Senate August 10, 1978:

DEPARTMENT OF JUSTICE

William E. Pitt, of Utah, to be U.S. marshal for the district of Utah for the term of 4 years, vice Royal K. Buttars, term expired.

HOUSE OF REPRESENTATIVES—*Thursday, August 10, 1978*

The House met at 10 o'clock a.m.

Rev. Edward Bradley Lewis, Capitol Hill United Methodist Church, Washington, D.C., offered the following prayer:

O Lord, our God, how marvelous it is this morning to feel and know Your spirit is with us according to our faith. Today is the first day of the rest of our lives, help us to make the best use of it. We are not alone. You are with us.

How wonderful it is to have the opportunity to pray and receive strength. Bless and strengthen the Members of the House of Representatives and all leaders of this Nation.

How great it is, O Lord, to know that forgiveness can be ours by Your love. Transform us in an hour of need in our world.

In days of international stress guide us as a nation. Empower world leaders in ways of justice and peace in a late hour. We pray in the Master's name. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its Clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 12932. An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1979, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 12932) entitled "An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1979, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. BYRD of West Virginia, Mr. HOLLINGS, Mr. BAYH, Mr. JOHNSTON, Mr. HUDDLESTON, Mr. LEAHY, Mr. DECONCINI, Mr. BURDICK, Mr. STEVENS, Mr. YOUNG, Mr. HATFIELD of Oregon, and Mr. BELLMON to be the conferees on the part of the Senate.

REV. EDWARD BRADLEY LEWIS

(Mr. STEERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STEERS. Mr. Speaker, it is my great privilege to have Dr. Edward Bradley Lewis with us today to offer the opening prayer.

Dr. Lewis is an old friend of the Congress, having served several years as the Chaplain of the Senate. He has many friends among us and we appreciate his taking the time to share his thoughts with us today. He has our best wishes on the trip he is starting tomorrow to the Far East where he has been invited to speak in Tokyo, Hong Kong, and Bangkok. Happy landings and come back again often.

FAILURE TO PROVIDE FOR ROLLBACK OF SOCIAL SECURITY TAXES

(Mr. BURKE of Massachusetts asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURKE of Massachusetts. Mr. Speaker, last evening we witnessed a display of arrogance of power. The Rules Committee has recommended a bill here failing to provide for a rollback of social security taxes despite the fact that 198 Members of the U.S. Congress have indicated that they favor such a rollback.

The Democratic Caucus met here in this Chamber and voted 3 to 1 recommending a rollback in social security taxes. Yet we find a rule coming out of the Rules Committee that prevents this House from working its will on this matter.

I say there is a lack of courage in the U.S. Congress in failing to allow this House to work its will on such an important matter. Today we have throughout this country a proliferation of strikes, labor disorders, and a rising unemployment rate to over 6 percent.

We can have a recession on our hands in 1979 unless we do something about the payroll taxes. We have got the chance to do it and it is only an arrogant use of power that would prevent a vote of that type, and I condemn that arrogant use of power.

PROPOSAL TO CORRECT INEQUITIES IN CHAMPVA AND CHAMPUS PROGRAMS

(Mr. SIKES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SIKES. Mr. Speaker, it may come as a surprise to many of my colleagues to learn that medical benefits under the civilian health and medical program of the Veterans' Administration (CHAMPVA) are denied those individuals whose husbands or wives were killed in action or who died while on active duty. Because of a quirk in the present statute, those deceased members of the Armed Forces never achieved a veteran's status for purposes of CHAMPVA benefits for their dependents. Yet, such service personnel are considered veterans for purposes of other benefits for their dependents from the Veterans' Administration.

Normally, surviving spouses of members of the Armed Forces are provided medical care under the civilian health and medical program of the uniformed services (CHAMPUS). However, under this program—unlike the CHAMPVA program—surviving spouses of military personnel who remarry and then subsequently obtain a divorce or are widowed cannot have their eligibility reinstated for medical benefits. Under the CHAMPVA program, reinstatement is permitted.

As a result, I am today introducing two bills which will correct the inequities in the CHAMPVA and CHAMPUS programs. My first bill amends title 38, United States Code, to provide that a member of the Armed Forces who dies while on active duty shall be considered to be a veteran for purposes of medical care under the CHAMPVA program. My second proposal provides reinstatement in the CHAMPUS program for surviving spouses of members of the Armed Forces who remarry and then subsequently obtain a divorce or are widowed.

It is my sincere hope this Congress will act favorably on one or the other of these measures. Either will correct the problem. The number of individuals affected is approximately 9,500. Obviously, a situation involving this many people should be corrected.

"OUTREACH" RADIO BROADCASTS

(Mr. EILBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EILBERG. Mr. Speaker, very recently the Immigration and Naturalization Service has commenced a series of radio broadcasts to advise illegal aliens of the various immigration benefits and constitutional protections which may be available to them.

The messages also advise foreign visitors and students of the possibility of their being permitted to remain in the country permanently; illegal aliens of their constitutional right; and all aliens of their right to institute lawsuits in U.S. courts.

I question the need for these broadcasts. I am concerned that they may encourage unnecessary litigation, raise false expectations among illegal aliens, and increase the flow of illegals across our southwest border. The broadcasts will undoubtedly cause great confusion, as well as create an administrative strain on an already-overburdened Immigration Service.

Mr. Speaker, I am concerned about the legality of the expenditure of the American taxpayer's dollar in this manner and suggest that this money might be better spent to improve INS' enforcement and service to the public functions.

APPOINTMENT OF CONFEREES ON H.R. 12932, DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS, 1979

Mr. YATES. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 12932) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1979, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Illinois? The Chair hears none, and appoints the following conferees: Messrs. YATES, MCKAY, LONG of Maryland, EVANS of Colorado, MURTHA, DUNCAN of Oregon, DICKS, CHARLES WILSON of Texas, WHITTEN, MAHON, MCDADE, REGULA, ARMSTRONG, and CEDERBERG.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 13467, SUPPLEMENTAL APPROPRIATIONS FOR FISCAL YEAR 1978

Mr. MAHON. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 13467), making supplemental appropriations for the fiscal year ending September 30, 1978, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

CRITICISM OF RULE ON TAX BILL

(Mr. OTTINGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OTTINGER. Mr. Speaker, I deplore the action taken by the Committee on Rules in granting a rule on the tax bill which grants to the minority side an unfettered right to offer what we understand will be a calamitously inflationary provision based on the Kemp-Roth bill, and denying to the majority the right to consider a rollback of the social security taxes which the majority has supported overwhelmingly. I strongly urge defeat of the previous question on the rule.

I would also like to express my concern at the action taken by the Committee on Rules by an 8 to 7 vote to refuse to consider tax credits for solar equipment and conservation which have been overwhelmingly approved by the House and are presently bottled up in the energy conference. And 103 Members recently wrote the chairman of the Ways and Means Committee asking that these credits be brought to the House immediately and separately.

The solar industry is being destroyed by having hung over its head the promise of a tax credit which has not been delivered. In fact, 50 small businesses in the solar energy field, many of which have been pioneers in this field, have gone out of business since the beginning of the year. A survey made by the Department of Energy indicates that the prime reason for the financial trouble in the solar industry is that the tax credit which was promised has not been delivered.

I am very pleased that the Speaker has committed himself to bring the solar and conservation tax credits to the House before the end of this session, but I hope it will be soon. Otherwise, it may be too late. The promise to the American people will not be kept, and it will be a devastating blow to the solar industry. It will deprive the country of energy savings and jobs which might otherwise be achieved.

I hope all Members will express their concern to the leadership that the solar and conservation tax credits be voted upon separately at the earliest possible date. Continuing to hold them hostage to the COET tax will be unproductive as it has been for the past 15 months and risks passage of these important credits altogether.

TO ESTABLISH UNIFORMITY IN FEDERAL EMPLOYEE HEALTH BENEFITS AND COVERAGE

Mrs. SPELLMAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 2931) to amend chapter 89 of title 5, United States Code, to establish uniformity in Federal employee health benefits and coverage provided pursuant to contracts made under such chapter by preempting State or local laws pertaining to such benefits and coverage which are inconsistent with such contracts, with Senate amendments thereto, and concur in Senate amendments numbered 1 and 2, concur in Senate amendments numbered 3 and 4 with amendments, and concur in the Senate amendment to the title, with an amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 1, line 7, after "(m)" insert: (1)

Page 2, line 5, strike out "provisions."." and insert "provisions.".

Page 2, after line 5, insert:

"(2)(A) Notwithstanding the provisions of paragraph (1), if a contract under this chapter provides for the provision of, the payment for, or the reimbursement of the cost of health services for the care and treatment of any particular health condition other than a mental health condition, the carrier shall provide, pay, or reimburse for any such health service properly provided by a person licensed under State law to provide such service.

"(B) The provisions of this paragraph shall not apply to group practice prepayment plans.".

Page 2, after line 5, insert:

SEC. 2. Section 8901(8) of title 5, United States Code, is amended by striking out "before January 1, 1964" and inserting in lieu thereof "after December 31, 1978, and before January 1, 1980".

Amend the title to read as follows: "An Act to amend chapter 89 of title 5, United States Code, to establish uniformity in Federal employee health benefits and coverage by preempting certain inconsistent State or local laws while recognizing the rights of States to determine who is to provide health services, and for other purposes.".

The Clerk read the House amendments to Senate amendments numbered 3 and 4, as follows:

Strike out the matter proposed to be inserted by Senate amendment numbered (3) and insert in lieu thereof the following:

"(2)(A) Notwithstanding the provisions of paragraph (1) of this subsection, if a contract under this chapter provides for the provision of, the payment for, or the reimbursement of the cost of health services for the care and treatment of any particular health condition, the carrier shall provide, pay, or reimburse up to the limits of its contract for any such health service properly provided by any person licensed under State law to provide such service if such service is provided to an individual covered by such contract who is a member of a medically underserved population (within the meaning of section 1302(7) of the Public Health Service Act (42 U.S.C. 300e–17)).

"(B) The provisions of subparagraph (A) shall not apply to contracts entered into providing prepayment plans described in section 8903(4) of this title.".

After the matter proposed to be inserted by Senate amendment numbered 4, insert the following:

"SEC. 3. The provisions of section 8902(m)(2) of title 5, United States Code, as added by the first section of this Act, shall apply to services provided under any contract entered into or renewed after December 31, 1979; except that such provisions shall not apply to services provided after December 31, 1984."

The Clerk read the House amendment to the Senate amendment to the title, as follows:

Amend the title so as to read: "An Act to amend chapter 89 of title 5, United States Code, to establish uniformity in Federal employee health benefits and coverage by preempting certain State or local laws which are inconsistent with such contracts, and for other purposes.".

Mrs. SPELLMAN (during the reading). Mr. Speaker, I ask unanimous consent that the House amendments to the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentlewoman from Maryland?

There was no objection.

The SPEAKER. Is there objection to the first request of the gentlewoman from Maryland?

There was no objection.

A motion to reconsider was laid on the table.

FISHERY CONSERVATION AND MANAGEMENT ACT OF 1976 AUTHORIZATION DURING FISCAL YEARS 1979, 1980, AND 1981

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 10732) to authorize appropriations to carry out the Fishery Conservation and Management Act of 1976 during fiscal years 1979, 1980, and 1981 with a Senate amendment to the House amendment to the Senate amendments, and concur in the Senate amendment to the House amendment to the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendment to the House amendment to the Senate amendments as follows:

In lieu of the matter proposed to be inserted by the House engrossed amendment, insert:

SEC. 2. (a) Section 2(a)(7) of the Fishery Conservation and Management Act of 1976 (16 U.S.C. 1801(a)(7)) is amended by striking out "United States fishermen" and inserting in lieu thereof "the United States fishing industry".

(b) Section 2(b)(6) of such Act (16 U.S.C. 1801(b)(6)) is amended by inserting immediately after "development" the following: "by the United States fishing industry".

SEC. 3. Section 3 of the Fishery Conservation and Management Act of 1976 (16 U.S.C. 1802) is amended by redesignating paragraph (25) as paragraph (27), and by inserting the following new paragraphs immediately after paragraph (24):

"(25) The term 'United States fish processors' means facilities located within the United States for, and vessels of the United States used or equipped for, the processing of fish for commercial use or consumption.

"(26) The term 'United States harvested fish' means fish caught, taken, or harvested by vessels of the United States within any fishery for which a fishery management plan prepared under title III or a preliminary fishery management plan prepared under section 201(h) has been implemented.".

SEC. 4. Title II of the Fishery Conservation and Management Act of 1976 (16 U.S.C. 1821–1825) is amended as follows:

(1) Section 201(a)(2) is amended by striking "(f)" and inserting in lieu thereof "(g)".

(2) Section 201(c)(3) is amended by striking out "exceed" and inserting in lieu there-

of "harvest an amount of fish which exceeds".

(3) Section 201 is amended by redesignating subsections (f) and (g) as (g) and (h), respectively, and by inserting after subsection (e) the following new subsection:

"(f) FOREIGN ALLOCATION REPORT.—The Secretary of the Treasury, in cooperation with the Secretary and the Secretary of State, shall prepare and submit a report to the Congress and the President, not later than July 1 of each year, setting forth—

"(1) a list of species of all allocations made to foreign nations pursuant to subsection (e) and all permits issued pursuant to section 204(b)(6)(B); and

"(2) all tariff and nontariff trade barriers imposed by such nations on the importation of such species from the United States.".

(5) Section 201(h)(1), as redesignated by paragraph (2), is amended to read as follows:

"(1) shall contain a preliminary description of the fishery and a preliminary determination as to—

"(A) the optimum yield for such fishery;

"(B) when appropriate, the capacity and extent to which United States fish processors will process that portion of such optimum yield that will be harvested by vessels of the United States; and

"(C) the total allowable level of foreign fishing with respect to such fishery;".

(5) Section 204(b)(3) is amended—

(A) by amending subparagraph (D) to read as follows:

"(D) the estimated amount or tonnage of fish which will be caught, taken, or harvested in each such fishery by each such vessel during the time the permit is in force;",

(B) by redesignating subparagraph (E) as subparagraph (F), and

(C) by inserting immediately after subparagraph (D) the following new subparagraph:

"(E) the amount or tonnage of United States harvested fish, if any, which each such vessel proposes to receive at sea from vessels of the United States; and".

(6) Section 204(b)(4) is amended by striking out "such application in the Federal Register and" and inserting in lieu thereof "a notice of receipt of the application in the Federal Register. Any such notice shall summarize the contents of the applications from each nation included therein with respect to the matters described in paragraph (3) and shall be set forth under the name of each Council to which it will be transmitted for comment. The Secretary of State".

(7) Section 204(b)(6) is amended—

(A) by inserting "(A)" before "After" in the first sentence thereof,

(B) by inserting ", subject to subparagraph (B)," immediately after "may approve" in the second sentence thereof, and

(C) by adding at the end thereof the following new subparagraph:

"(B)(i) In the case of any application which specifies that one or more foreign fishing vessels propose to receive at sea United States harvested fish from vessels of the United States, the Secretary may approve the application unless the Secretary determines, on the basis of the views, recommendations, and comments referred to in subparagraph (A) and other pertinent information, that United States fish processors have adequate capacity, and will utilize such capacity, to process all United States harvested fish from the fishery concerned.

"(ii) The amount or tonnage of United States harvested fish which may be received at sea during any year by foreign fishing vessels under permits approved under this paragraph may not exceed that portion of the optimum yield of the fishery concerned which will not be utilized by United States fish processors.

"(iii) In deciding whether to approve any application under this subparagraph, the Secretary may take into account, with respect to the foreign nation concerned, such other matters as the Secretary deems appropriate.".

(8) Section 204(b)(7) is amended by redesignating subparagraph (D) as subparagraph (F), and inserting immediately after subparagraph (C) the following new subparagraphs:

"(D) If the permit is issued other than pursuant to an application approved under paragraph (6)(B), the restriction that the foreign fishing vessel may not receive at sea United States harvested fish from vessels of the United States.

"(E) If the permit is issued pursuant to an application approved under paragraph (6)(B), the maximum amount or tonnage of United States harvested fish which may be received at sea from vessels of the United States.".

SEC. 5. Title III of the Fishery Conservation and Management Act of 1976 (16 U.S.C. 1851–1861) is amended as follows:

(1) Section 302(h)(5) is amended by inserting "the capacity and extent to which United States fish processors will process United States harvested fish from," immediately after "from,".

(2) Section 303(a)(4) is amended—

(A) by striking out "and" at the end of subparagraph (A);

(B) by striking out "; and" at the end of subparagraph (B) and inserting in lieu thereof ", and" and

(C) by adding at the end thereof the following new subparagraph:

"(C) the capacity and extent to which United States fish processors, on an annual basis, will process that portion of such optimum yield that will be harvested by fishing vessels of the United States; and".

(3) Section 303(a)(5) is amended by striking out "and number of hauls." and inserting in lieu thereof "number of hauls, and the estimated processing capacity of, and the actual processing capacity utilized by, United States fish processors.".

(4) Section 307 is amended—

(A) by striking out "and" at the end of paragraph (1)(H);

(B) by striking out the period at the end of paragraph (2) and inserting in lieu thereof "; and"; and

(C) by adding at the end thereof the following new paragraph:

"(3) for any vessel of the United States, and for the owner or operator of any vessel of the United States, to transfer directly or indirectly, or attempt to so transfer, any United States harvested fish to any foreign fishing vessel, while such foreign vessel is within the fishery conservation zone, unless the foreign fishing vessel has been issued a permit under section 204 which authorizes the receipt by such vessel of United States harvested fish of the species concerned.".

Mr. MURPHY of New York (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment to the House amendment to the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER. Is there objection to the first request of the gentleman from New York?

Mr. FORSYTHE. Mr. Speaker, reserve the right to object, I would like to ask the gentleman from New York a few questions pertaining to what the Senate did to the earlier House-passed bill. It is my understanding that the Senate made two major amendments to the House measure. First, they amended the findings and purposes of the Fishery Conservation and Management Act to clarify the Congressional intent that the entire U.S. fishing industry, not just the harvesting segment of the industry, should be benefited by the act's assertion of extended jurisdiction. Second, they added a provision to the bill requiring the Secretary of the Treasury, in cooperation with the Secretaries of Commerce and State, to report annually to the Congress and the President on all allocations of U.S. fish to foreign nations and all tariff and nontariff trade barriers imposed by such nations on the importation of such species from the United States. Is my understanding correct?

Mr. MURPHY of New York. The gentleman is correct.

Mr. Speaker, I wish to clarify one technical point associated with the legislation. In the course of our discussions of the bill, some question was raised about whether the definition of "fishing" under section 3 of the FCMA includes "processing." This question is important because the FCMA uses the term "fishing" so that the statute applies to the processing industry in some situations only if "fishing" includes processing. As originally reported, the House bill would have amended the FCMA to make clear that fishing does include processing fish at sea for human consumption or commercial use by any method including freezing, cooking, canning, smoking, salting or drying. The Senate bill would have achieved a similar result by adding a new definition of processing in the FCMA and extensively amending the FCMA to conform to the dual definition.

In the end, we decided to leave the FCMA definitions unchanged on this point while, at the same time, making clear the act was intended to benefit the entire fishing industry. I want to emphasize that, even though the final bill does not include the House clarification, it is the understanding of the House that "fishing" in section 3 of the FCMA does include "processing" and that, for that reason, the proposed clarification is unnecessary.

I would like to commend the gentleman from Oregon for clarifying this point for us.

Mr. Speaker, H.R. 10732 passed the House on April 10, 1978. As it originally passed the House, H.R. 10732 would extend the funding authorization under the Fishery Conservation and Management Act of 1976 for an additional 3 years at a level of funding of $40 million for fiscal year 1979 and $45 million for each of fiscal years 1980 and 1981

Mr. Speaker, on June 14, 1978, the Senate agreed to the bill as it passed the House, with amendments, to provide as follows:

First, it reduced from $40 million to $30 million the funding authorization for fiscal year 1979 and eliminated the

funding authorizations for fiscal years 1980 and 1981.

Second, it added language to the bill to make it clear that it is the intent of the Congress to develop not only our fish harvesting capability but our fish processing capability as well. In carrying out this intent, the Senate amendments would allow the Secretary of Commerce to approve a foreign permit application for the purchase of U.S. harvested fish for processing at sea only if U.S. fish processors do not have the capacity, or will not utilize their capacity, to process all of such fish from the fishery concerned. In other words, U.S. fish processors would be given a preference to fish caught by U.S. fishing vessels and the Secretary could approve an application permitting foreign processing at sea of any of such U.S. harvested fish but only for the excess fish which will not be utilized by U.S. fish processors.

Mr. Speaker, on July 11, 1978, the House concurred in the Senate amendments to the bill, with an amendment.

The amendment had the effect of agreeing to the Senate version of the bill, which limited the funding authorization of the act to a period of 1 year.

In addition, it rewrote the remainder of the bill which would provide a preference to U.S. fish processors to U.S. harvested fish. The language for this purpose was taken from H.R. 13340, a bill which was laid on the table after it passed the House immediately prior to the House's passing of H.R. 10732, as amended, on the same day, July 11, 1978. This language had the effect of reaching the same result as the Senate amendment but approached the result in an entirely different manner.

Mr. Speaker, since the 18th of last month the staffs of the House Committee on Merchant Marine and Fisheries and the Senate Committee on Commerce, Science, and Transportation have been working toward resolving the differences between the two versions of this provision. Compromise language has been worked out to which both committees agree, and the House is being asked today to agree to such language which was agreed to by the Senate last Friday, August 4.

Briefly explained, the compromise language makes it clear that it is the intent of the Congress to encourage the development by the U.S. fishing industry, in particular by U.S. fishermen and by U.S. fish processors, of the currently underutilized fisheries off the United States.

In addition, the compromise language would give a preference to U.S. fish processors of U.S. harvested fish and it would authorize the Secretary to allow U.S. fishermen to transfer at sea to foreign fishing vessels only the excess of such fish that the Secretary has determined that would not be utilized by U.S. fish processors. It is to be noted that the compromise language would make it unlawful for U.S. fishermen to transfer U.S. harvested fish at sea to a foreign fishing vessel for any purpose except when such transfer relates to excess fish to which the foreign vessel has been issued a permit authorizing the receipt of such fish.

Finally, the compromise language contains a provision which would require the Secretary of Treasury, in cooperation with the Secretaries of Commerce and State, to prepare and submit to the Congress and the President an annual report setting forth a list by species of all allocations made to foreign nations by the Secretary of State and of all permits issued by the Secretary of Commerce authorizing receipt of any excess harvested fish by the vessels of such foreign nations, and all tariff and nontariff trade barriers imposed by such nations on the importation of such species from the United States.

Mr. Speaker, the compromise language is germane to the bill and it would not result in any additional cost to the Federal Government.

Mr. FORSYTHE. Further reserving the right to object, Mr. Speaker—and I will not object—I think this is a very beneficial piece of legislation for the fishing industry, in particular the American fish processors. I, therefore, urge its adoption.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from New York to dispense with further reading of the Senate amendment to the House amendment to the Senate amendment?

There was no objection?

The SPEAKER. Is there objection to the initial request of the gentleman from New York?

There was no objection.

A motion to reconsider was laid on the table.

DIRECTING THE CLERK TO MAKE CORRECTION IN ENROLLMENT OF H.R. 10732

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent for the immediate consideration of the concurrent resolution (H. Con. Res. 687) directing the Clerk of the House of Representatives to make a correction in the enrollment of H.R. 10732.

The Clerk read the concurrent resolution as follows:

H. CON. RES. 687

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill (H.R. 10732) to authorize appropriations to carry out the Fishery Conservation and Management Act of 1976 during fiscal years 1979, 1980, and 1981, the Clerk of the House of Representatives shall strike out "paragraph (2)," in section 4(4) of the bill and insert in lieu thereof "paragraph (3),".

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

FISHERMEN'S PROTECTIVE ACT AMENDMENTS

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 10878) to extend until October 1, 1981, the voluntary insurance program provided by section 7 of the Fishermen's Protective Act of 1967, and for other purposes, with Senate amendments thereto, and concur in the Senate amendments with amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 1, strike out line 6 to 9, inclusive, and insert: "1981".".

Page 2, strike out all beginning with line 1 over to and including line 8 on page 13.

The Clerk read the House amendments to the Senate amendments, as follows:

In lieu of the matter proposed to be inserted by Senate amendment numbered 1, insert the following: "1981; except that payments may be made under this section only to such extent and in such amounts as are provided in advance in appropriation Acts.".

In lieu of the matter proposed to be stricken out by Senate amendment numbered 2, insert the following:

SEC. 2. Section 8 of the Fishermen's Protective Act of 1967 (22 U.S.C. 1978) is amended—

(1) by amending subsection (a) thereof—

(A) by inserting "(1)" immediately before "When", and

(B) by striking out the last sentence and inserting in lieu thereof the following:

"(2) When the Secretary of Commerce or the Secretary of the Interior finds that nationals of a foreign country, directly or indirectly, are engaging in trade or taking which diminishes the effectiveness of any international program for endangered or threatened species, the Secretary making such finding shall certify such fact to the President.

"(3) Upon receipt of any certification made under paragraph (1) or (2), the President may direct the Secretary of the Treasury to prohibit the bringing or the importation into the United States of fish products (if the certification is made under paragraph (1)) or wildlife products (if the certification is made under paragraph (2)) from the offending country for such duration as the President determines appropriate and to the extent that such prohibition is sanctioned by the General Agreement on Tariffs and Trade.";

(2) by amending subsection (b)—

(A) by inserting "or the Secretary of the Interior" immediately after "Secretary of Commerce", and

(B) by inserting "or wildlife products" immediately after "fish products" each place it appears therein;

(3) by amending subsection (c) by inserting "or wildlife products" immediately after "fish products";

(4) by amending subsection (d)(2) by inserting "and wildlife products" immediately after "fish products";

(5) by amending subsection (e)—

(A) by inserting "and wildlife products" immediately after "fish products" in paragraph (1) and the first sentence of paragraph (5),

(B) by inserting "or other conveyance" immediately after "vessel" in paragraph (4)(B), and

(C) by striking out "Any fish products" in the second sentence of paragraph (5) and inserting in lieu thereof "Fish products and wildlife products";

(6) by amending subsection (f) by striking out "is" and inserting in lieu thereof ", the Secretary of Commerce, and the Secretary of the Interior are each";

(7) by amending subsection (g)—

(A) by striking out "in force" in paragraph (3) and inserting in lieu thereof "in effect",

(B) by striking out "to which the United States is a signatory party," and inserting in lieu thereof "which is in force with respect to the United States,", and

(C) by adding at the end thereof the following:

"(5) The term "international program for endangered or threatened species' means any ban, restriction, regulation, or other measure in effect pursuant to a multilateral agreement which is in force with respect to the United States, the purpose of which is to protect endangered or threatened species of animals.

"(6) The term 'wildlife products' means fish (other than those to which paragraph (4) applies) and wild animals, and parts (including eggs) thereof, taken within an offending country and all products of any such fish and wild animals, or parts thereof, whether or not such products are packed, processed, or otherwise prepared for export in such country or within the jurisdiction thereof. Such term does not include any wild animal or fish if brought or imported into the United States for scientific research.

"(7) The term 'taking' means—

"(A) for purposes of subsection (a)(2)—

"(i) to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or

"(ii) to attempt to engage in any such conduct with respect to,

animals to which an international program for endangered or threatened species applies; and

"(B) for purposes of paragraph (6), any conduct described in subparagraph (A)(i), whether or not such conduct is legal under the laws of the offending country, undertaken with respect to any wild animal.".

SEC. 3. (a) Section 10 of the Fishermen's Protective Act of 1967 (22 U.S.C. 1980) is amended to read as follows:

"SEC. 10. (a) For purposes of this section—

"(1) The term 'fishery conservation zone', 'fishing', 'fishing vessel', 'Secretary', and 'vessel of the United States' shall each have the same respective meaning as is given to such terms in section 3 of the Fishery Conservation and Management Act of 1976 (16 U.S.C. 1802).

"(2) The term 'fishing gear' means any equipment or appurtenance which is necessary for the carrying out of fishing operations by a fishing vessel, whether or not such equipment or appurtenance is attached to such vessel.

"(3) The term 'fund' means the Fishing Vessel and Gear Damage Compensation Fund established under subsection (f).

"(b) Subject to the provisions of this section, the owner or operator (hereinafter referred to as the 'vessel owner') of any fishing vessel which is a vessel of the United States is eligible for monetary compensation under this section for any damage to, loss of, or destruction of such vessel, or any fishing gear used with such vessel, or both, if the damage, loss, or destruction—

"(1) occurs when such vessel is within, or such gear is being used for fishing within, the fishery conservation zone; and

"(2) is attributable—

"(A) in the case of such vessel, to any vessel (or its crew or fishing gear) other than a vessel of the United States, or

"(B) in the case of such fishing gear, to (i) any other vessel, whether such vessel is a vessel of the United States, or (ii) an act of God.

"(c) A vessel owner is not eligible for compensation under this section with respect to fishing vessel or fishing gear damage, loss, or destruction unless such owner—

"(1) makes application to the Secretary for compensation under this section within sixty days after the day on which the dam age, loss, or destruction occurred or was first noticed by the owner;

"(2) pays upon making such application a reasonable administrative fee which the Secretary shall deposit into the fund;

"(3) has, in such form as the Secretary shall prescribe by regulation, a current inventory or other evidence of possession of the fishing vessel or fishing gear concerned;

"(4) has complied with all applicable regulations, if any, relating to the marking of and (if appropriate) the notification of the location of, the fishing gear concerned; and

"(5) is in compliance with such other regulations as may be prescribed by the Secretary to carry out this section. "(d)(1) Application for compensation under this section shall be made in such form and manner, and include such documentation and other evidence relating to the cause and extent of the damage, loss, or destruction claimed, as the Secretary shall prescribe by regulation. The Secretary shall promptly, but not later than sixty days after receipt of an application, consider, and issue an initial determination with respect to, the application.

"(2) The amount of compensation awarded to any vessel owner under this section shall be—

"(A) determined on the basis of the depreciated replacement cost, or the repair cost, whichever cost is less, of the fishing vessel or fishing gear concerned;

"(B) proportionally reduced to the extent that evidence indicates that negligence by the vessel owner contributed to the cause or extent of the damage, loss, or destruction; and

"(C) reduced by the amount of compensation, if any, which the vessel owner has received or will receive with respect to the damage, loss, or destruction through insurance pursuant to any other provision of law, or otherwise.

"(3) The initial determination made by the Secretary under paragraph (1) with respect to any application shall—

"(A) if the application is disapproved, set forth the reasons therefor; or

"(B) if the application is approved, set forth the amount of compensation to which the applicant is entitled and the basis on which such amount was determined.

"(4) Any vessel owner who is aggrieved by any decision of the Secretary contained in the initial determination of the Secretary regarding such owner's application may, within thirty days after the date of issue of the initial determination, petition the Secretary for a review of the decision. If petition for review is not made to the Secretary within such thirty-day period regarding the initial determination, the initial determination shall be deemed to be the final determination on the application. Before undertaking any such review, the Secretary shall provide to the vessel owner opportunity to submit additional written or oral evidence relating to the decision. After review the Secretary shall issue a final determination with respect to the application.

"(5) If compensation is awarded under the final determination on any application, the Secretary shall promptly pay from the fund to such owner the amount of compensation stated in the final determination. Upon the acceptance of such payment by the vessel owner, the United States shall be subrogated to all rights of the vessel owner with respect to which the payment is made.

"(e) In addition to any fee imposed under section 204(b)(10) of the Fishery Conservation and Management Act of 1976 (16 U.S.C. 1824(b)(10)) with respect to any foreign fishing vessel for any year after 1978, the Secretary shall impose a surcharge in an amount not to exceed 20 percent of the amount of the fee imposed under such section for such year. The failure to pay any surcharge imposed under this subsection with respect to any foreign fishing vessel shall be treated by the Secretary as a failure to pay the fee for such vessel under such section 204(b)(10).

"(f)(1) There is established in the Treasury of the United States the Fishing Vessel and Gear Damage Compensation Fund. The fund shall be available without fiscal year limitation as a revolving fund for the purposes of administering, and paying compensation awarded under, this section.

"(2) The fund shall consist of—

"(A) all sums recovered by the United States in the exercise of rights subrogated to it under subsection (d)(5);

"(B) all administrative fees collected under subsection (c)(2);

"(C) all surcharges collected under subsection (e);

"(D) revenues received from deposits or investments made under the last sentence of this paragraph; and

"(E) any revenue acquired through the issuance of obligations under paragraph (3). Sums may be expended from the fund only to such extent and in such amounts as are provided in advance in appropriation Acts. Sums in the funds which are not currently needed for the purpose of paying such awards shall be kept on deposit or invested in obligations of, or guaranteed by, the United States.

"(3) Whenever the amount in the fund is not sufficient to pay compensation under this section, the Secretary may issue, in an amount not to exceed $5,000,000, notes or other obligations to the Secretary of the Treasury, in such forms and denominations, bearing such maturities, and subject to such terms and conditions as the Secretary of the Treasury may prescribe. Such notices or other obligations shall bear interest at a rate to be determined by the Secretary of the Treasury on the basis of the current average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of such notices or other obligations. Moneys obtained by the Secretary under this paragraph shall be deposited in the fund and redemptions of any such notices or other obligations shall be made from the fund. The Secretary of the Treasury shall purchase any such notes or other obligations, and for such purpose he may use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act. The Secretary of the Treasury may sell any such notices or other obligations at such times and prices and upon such terms and conditions as he shall determine. All purchases, redemptions, and sales of such notes or other obligations by the Secretary of the Treasury shall be treated as public debt transactions of the United States. All borrowing authority contained herein shall be effective only to such extent or in such amounts as are provided in advance in appropriation Acts.

"(g) Any person who willfully makes any false or misleading statement or representation for the purpose of obtaining compensation under this section is guilty of a

criminal offense and, upon conviction thereof, shall be punished by a fine of not more than $25,000, or by imprisonment for not more than one year, or both.".

(b) The amendment made by subsection (a) shall take effect January 1, 1979.

(c) Nothing in the amendment made by subsection (a) shall be construed as affecting in any manner or to any extent any loan made under section 10 of the Fishermen's Protective Act of 1967 (as in effect before January 1, 1979), and, for purposes of the consideration by the Secretary of Commerce of any application for a loan under such section which was filed, but not acted on, before January 1, 1979, the amendment made by subsection (a) shall not be deemed to have been enacted.

Mr. MURPHY of New York (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the House amendments to the Senate amendments be dispensed with, and that they be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

Mr. FORSYTHE. Reserving the right to object, Mr. Speaker, I would like to address a question to my colleague from New York. It is my understanding that the only substantive changes made by the Senate to the House-passed bill was with respect to the fishing gear damage compensation fund. Specifically. the Senate version of this legislation would require foreign fishing vessels to totally finance the modified no-fault compensation system rather than the 80–20 sharing in the House bill. Also, the Senate would extend the scope of the compensation system to U.S. fishing vessels damaged or destroyed operating within our 200-mile exclusive fishery zone, as well as to fishing gear. Is my understanding accurate?

Mr. MURPHY of New York. Mr. Speaker, the gentleman is correct in his statement, and the amendments to this bill are germane. They would result in no additional cost to the Federal budget.

Mr. Speaker, H.R. 10878 passed the House on April 10, 1978. As it passed the House, H.R. 10878 would do three things:

First, it would extend section 7 of the Fishermen's Protective Act for an additional 3 years, from October 1, 1978, to October 1, 1981. This is the provision that allows an American fishing vessel owner to voluntarily enter into an agreement with the Secretary of Commerce for the purpose of providing reimbursement for certain losses incurred resulting from an illegal seizure of such vessel by a foreign country, such as those involving damage to, destruction of, or confiscation of the vessel, fishing gear, or other equipment, confiscated or spoiled fish, and 50 percent of loss of fishing time during the detention period.

Second, H.R. 10878 would use—what is known as the Pelly amendment concept—to extend additional protection to endangered and threatened species of wildlife. In accomplishing this purpose, the bill would prohibit imports of any wildlife products from offending nations whenever the Secretary of the Interior or the Secretary of Commerce determines that wildlife products protected under the Convention on International Trade in Endangered Species of Wild Fauna and Flora are being shipped between two nations and that the actions of such nations are diminishing the effectiveness of an international program for endangered or threatened species.

Third, the bill would set up a modified no fault insurance program for reimbursing American fishermen for damage to their fishing gear caused by foreign or domestic vessels. The program would be financed as follows: 80 percent by foreign fishing vessels authorized to fish within our 200-mile fisheries zone; and 20 percent by American fishing vessel owners participating under the program.

Mr. Speaker, the Senate passed H.R. 10878 on May 22, 1978, with amendments, which had the effect of disagreeing with those provisions of the bill having to do with extending additional protection to wildlife and providing for reimbursement to American fishing vessel owners for damage to their fishing gear and agreeing with the provision that would provide reimbursement to American fishing vessel owners for losses incurred when their vessels are illegally seized.

Mr. Speaker, with a view toward avoiding a conference on this bill, the staffs of the House Committee on Merchant Marine and Fisheries and of the Senate Committee on Commerce, Science, and Transportation have worked out compromise language to which both committees agree, and the amendments to the bill which the House is being asked to concur in today incorporate that compromise language. The net effect of these amendments is to retain the language of the House version of the bill which would extend for 3 years the voluntary insurance program provided by section 7 of the Fishermen's Protective Act and which would extend the Pelly amendment concept to provide additional protection to wildlife.

The only provision of the House version of the bill that was rewritten has to do with the modified no fault insurance program. The major changes resulting from the rewrite of this provision would do three things:

First, it would extend the coverage of the program to include damage to the American vessel, as well as damages to the equipment.

Second, it would broaden the coverage of the program to cover damage to such vessels and equipment, occurring beyond the zone as well as within the zone, so long as such vessel is engaged in a fishery subject to the exclusive management authority of the United States, and the equipment is damaged while being used in fishing in such fishery.

Third, it would require foreign fishing vessels authorized to fish within our 200-mile fisheries zone to pay for the entire cost of the program, except for administrative costs, which would be paid for by American fishing vessel owners.

Mr. Speaker, the amendments to the bill are germane and they would not result in any additional costs to the Federal Government.

Mr. FORSYTHE. Mr. Speaker, further reserving the right to object, this is very important legislation, because it does provide protection to our fishermen from loss of fishing gear on their vessels when they are fishing in our extended zone.

Mr. Speaker, I withdraw my reservation of objection.

Mr. YATES. Mr. Speaker, reserving the right to object, is my understanding correct that the amendment provides for recompense to American fishermen fishing within the 200-mile zone by payments made from foreign fishermen?

Mr. MURPHY of New York. Mr. Speaker, if the gentleman will yield, yes; 80 percent of the payments would be from foreigners who would have damaged American vehicles in the House bill, as it originally passed.

Mr. FORSYTHE. Mr. Speaker, will the gentleman yield on that point?

Mr. YATES. I yield to the gentleman from New Jersey.

Mr. FORSYTHE. Mr. Speaker, I think it is 100 percent under the Senate amendment. There will be no recourse to the foreign fishermen by this measure.

Mr. YATES. Mr. Speaker, a further question: Is this true whether or not American fishermen were responsible for the loss of the gear?

Mr. MURPHY of New York. Mr. Speaker, if the gentleman will yield, that is taken into consideration by the board when it makes this determination and it is mitigated.

Furthermore in the compromise language in which the House is asked to agree with today, the foreign fishermen will pay for 100 percent of the cost of the insurance program, except for administrative costs which American fishermen will pay for.

Mr. YATES. Mr. Speaker, I withdraw my reservation of objections.

The SPEAKER. Is there objection to the request of the gentleman from New York (Mr. MURPHY) to dispense with the further reading of the House amendments to to the Senate amendments?

There was no objection.

The SPEAKER. Is there objection to the first request of the gentleman from New York (Mr. MURPHY)?

There was no objection.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 13511, REVENUE ACT OF 1978

Mr. MURPHY of Illinois. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1306 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1306

Resolved, That upon the adoption of this resolution it shall be in order to move that

the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 13511) to amend the Internal Revenue Code of 1954 to reduce income taxes, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be considered as having been read for amendment under the five-minute rule. No amendments to the bill shall be in order except the following amendments, which shall be in order any rule of the House to the contrary notwithstanding, shall not be subject to amendment except amendments recommended by the Committee on Ways and Means but shall be debatable as specified herein, shall not be subject to a demand for a division of the question in the House or in the Committee of the Whole, and shall only be considered in the following order except amendments recommended by the Committee on Ways and Means which shall be in order at any time in the Committee of the Whole: (1) the amendments recommended by the Committee on Ways and Means now printed in the bill (except for section 404); (2) the amendment recommended by the Committee on Ways and Means adding a new section 404, which may be debated not to exceed thirty minutes, equally divided and controlled by Representative Archer of Texas and another Member in opposition thereto to be designated by the chairman of the Committee on Ways and Means; (3) the amendment in the nature of a substitute printed in the Congressional Record of August 8 by, and if offered by, Representative Vanik of Ohio, which may be debated not to exceed thirty minutes equally divided and controlled by Representative Vanik and another Member in opposition thereto designated by the chairman of the Committee on Ways and Means; and (4) an amendment printed in the Congressional Record of August 7 by, and if offered by, Representative Corman of California, which may be debated not to exceed one hour equally divided and controlled by Representative Corman and another Member in opposition thereto designated by the chairman of the Committee on Ways and Means. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions on which the previous question shall be considered as ordered, but prior to the vote on said motion it shall be in order to debate said motion for not to exceed one hour, equally divided and controlled by the proponent of the motion and the chairman of the Committee on Ways and Means.

The SPEAKER. The gentleman from Illinois (Mr. MURPHY) will be recognized for 1 hour.

Mr. GIAIMO. Will the gentleman from Illinois yield?

Mr. MURPHY of Illinois. I yield to the gentleman from Connecticut.

MAKING IN ORDER CONSIDERATION OF HOUSE CONCURRENT RESOLUTION 683, SECOND CONCURRENT RESOLUTION ON THE BUDGET, ON TUESDAY NEXT OR ANY DAY THEREAFTER

Mr. GIAIMO. Mr. Speaker, I ask unanimous consent that it may be in order on Tuesday next or any day thereafter to consider House Concurrent Resolution 683, the second concurrent budget resolution setting aggregates for fiscal year 1979.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

Mr. LATTA. Reserving the right to object, Mr. Speaker, I make this reservation to ask the chairman of the committee whether or not this means we will need to consider his pending request before the Committee on Rules this morning.

Mr. GIAIMO. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I will be happy to yield to the gentleman from Connecticut.

Mr. GIAIMO. It was our intention, as the gentleman knows, to get this unanimous-consent request approved earlier, and a request was made to withhold our request until we had a better idea of what the schedule would be for the remainder of the week. At that point, in order to protect our ability to bring the budget resolution to the floor, we asked the Committee on Rules for a hearing.

At that time we had another matter to bring up before the Committee on Rules which would deal with the matter of setting aggregates and tying aggregate changes into the relative functions where the changes would occur. We think that should be done. We believe that is a rules change that should take place in the budget procedure.

Because of the fact, however, that we have done this with relatively short notice, we want to protect every Member's right to have a chance to study the matter and to comment on it pro or con. We feel we can wait until we can suggest Budget Act changes later this year, looking forward to the next Congress.

So therefore, it would not be our intention to go before the Committee on Rules if we get unanimous consent to bring the budget resolution up next Tuesday or any day thereafter.

Mr. LATTA. And may I ask the gentleman, how about the second provision?

Mr. GIAIMO. I have just said that we would not go before the Committee on Rules.

Mr. LATTA. Mr. Speaker, knowing that the gentleman from Connecticut (Mr. GIAIMO) is a man of his word I withdraw my reservation.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

CALL OF THE HOUSE

Mr. BURKE of Massachusetts. Mr. Speaker, I move a call of the House.

The SPEAKER. Without objection, a call of the House is ordered.

There was no objection.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 677]

Andrews, N.C.	Boggs	Coughlin
Archer	Brodhead	Dellums
Ashley	Cochran	Dent
Beilenson	Conyers	Diggs
Eckhardt	McCormack	Santini
Ertel	McDonald	Satterfield
Flowers	Martin	Scheuer
Fraser	Mathis	Sisk
Frey	Meyner	Stark
Harrington	Milford	Teague
Harsha	Miller, Calif.	Thompson
Heckler	Moorhead, Pa.	Tsongas
Krueger	Neal	Wiggins
LaFalce	Pressler	Young, Alaska
Le Fante	Risenhoover	Young, Tex.
Leggett	Rodino	
Lloyd, Tenn.	Roncalio	

The SPEAKER pro tempore (Mr. CHARLES H. WILSON of California). On this rollcall 383 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

REVENUE ACT OF 1978

The SPEAKER pro tempore. The gentleman from Illinois (Mr. MURPHY) is recognized.

Mr. MURPHY of Illinois. Mr. Speaker, I yield the usual 30 minutes to the distinguished gentleman from Ohio (Mr. LATTA) pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1306 provides for a modified closed rule providing for 2 hours of general debate, to be equally divided and controlled by the chairman and the ranking minority member of the Committee on Ways and Means. The bill shall be considered as having been read for amendment under the 5-minute rule.

The rule provides that no amendment to the bill shall be in order except the amendments specifically mentioned in the rule and these amendments are not subject to amendment except by amendments recommended by the Committee on Ways and Means. The rule also provides for a waiver of all points of order against these amendments. The rule further provides that these amendments are not subject to a demand for a division of the question in the House or in the Committee of the Whole in order that the House may vote on each amendment as a unit. Pro forma amendments are not in order during the amendment stage. Where the Rules Committee chose to expand the debate time, it is specifically noted in the rule. The Rules Committee made four amendments specifically in order to be considered only in the following order except that amendments recommended by the Committee on Ways and Means are in order at any time in the Committee of the Whole.

First. The committee amendments now printed in the bill except for section 404, the Archer indexing amendment. Basically, the committee bill provides for a $16.3 billion tax cut, rate cuts for individuals in certain tax brackets, a 6-percent widening of existing brackets and an increase in the standard deduction as well as an increase in the personal exemption to $1,000. The bill recommended by the committee also makes permanent the earned income credit, provides for a targeted jobs credited and makes permanent the investment tax credit at 10 percent. The committee bill

significantly restructures capital gains taxes and adds several tax reductions to aid small businesses among other provisions.

The second amendment made in order by the Rules Committee is the Archer amendment which is an indexing amendment that permits inflation adjustment to be made on the sale of certain capital assets including stock, real property, and tangible property after 1979. The rule provides for 30 minutes of debate on the amendment, to be equally divided and controlled by Representative Archer of Texas and another Member in opposition to the amendment to be designated by the chairman of the Committee on Ways and Means.

The third amendment made in order by the Rules Committee is an amendment in the nature of a substitute printed in the CONGRESSIONAL RECORD of August 8 by Representative VANIK. The rule provides for 30 minutes of debate on the amendment, to be equally divided and controlled by Representative VANIK and another Member in opposition to the amendment to be designated by the chairman of the Committee on Ways and Means. The Vanik substitute is a simple extension of the tax cuts which are due to expire by the end of 1978. In addition the Vanik substitute includes the earned income credit and the targeted jobs credit which are contained in the bill as reported out of the Committee on Ways and Means.

The fourth amendment that the Committee on Rules made in order is one printed in the CONGRESSIONAL RECORD on August 7 by Representative CORMAN. The Committee on Rules provided that this amendment should be debated for 1 hour with the time to be equally divided and controlled by Representative CORMAN and another Member. In opposition to the amendment designated by the chairman of the Committee on Ways and Means. Basically the amendment would increase the general tax credit from $35 to $100 and provide additional individual rate cuts. The personal exemption would however remain at $750 and tax brackets would remain the same. The Corman amendment would replace the committee's alternate minimum tax on capital gains with a new limitation on the present exclusion for capital gains. The amendment plus other provisions of the bill not affected by it would result in total tax cuts of $18.1 billion in 1979.

The rule further provides for one motion to recommit with or without instructions. I would like to point out to the Members of the House that the rule provides that this motion can be debated for 1 hour with the time equaly divided and controlled by the proponent of the motion and the chairman of the Committee on Ways and Means. Usually the total time allowed for a motion to recommit is 10 minutes. In this case the time was expanded to allow the proponents of Kemp-Roth ample time to discuss their proposal on the floor of the House.

I might also add that the Committee on Rules considered whether or not to allow the Gephardt amendment to be made in order. The Gephardt amendment would provide an income tax credit to both employees and employers equal to 5-percent of their social security payroll tax. The Gephardt amendment was estimated to add about $6 billion to the budget deficit. The Committee on Rules by a vote of 7 to 8 decided not to make this amendment in order. As one who voted not to make it in order, let me say that I feared that its adoption by the House would foreclose the much needed overhaul of the social security system that the chairman of the Ways and Means Committee has promised for the 96th Congress. Moreover, it would serve to further complicate the tax code since you would be collecting tax through the social security system and giving back part of it through another system—the income tax system. I feel that such a major proposal should not be tacked on as an amendment to an income tax bill.

Mr. Speaker, the Committee on Rules held 2 days of hearings on this bill. We heard many hours of testimony. I think that we granted a fair rule on a very complicated tax bill, and I urge the adoption of House Resolution 1306 in order that H.R. 13511 may be considered.

Mr. Speaker, I yield 2 minutes to the gentleman from Missouri (Mr. BOLLING).

Mr. BOLLING. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I am opposed to this rule. I am opposed to it because it does not make in order the Gephardt amendment on social security. I hope the previous question will be voted down. If it is, I will have a substitute which will make it possible for the Members to vote on that very important Gephardt amendment.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, at the outset of my remarks, I would like to commend the chairman of the Committee on Ways and Means and the ranking minority member of the Committee on Ways and Means, the gentleman from New York (Mr. CONABLE), and all members of the Committee on Ways and Means for the many, many hours, many, many days, and many, many weeks which they put in on this piece of legislation. I am particularly pleased that the committee adopted an amendment to increase the $750 per person exemption to $1,000. I have been introducing legislation to increase this exemption to $1,000 for the past several Congresses and I am pleased that the committee has seen fit to include it in the bill before us today.

I was somewhat disappointed, Mr. Speaker, when the request by the chairman of the Committee on Ways and Means to the Committee on Rules was not agreed to. By and large, when a chairman of a committee works out an understanding with the members of his committee and comes before the Committee on Rules and presents that request, the Committee on Rules will grant the rule as requested. Unfortunately, in this instance, a majority of the Committee on Rules decided not to grant the rule agreed upon by the Ways and Means Committee. I think that is probably one of the reasons we are in a state of confusion today.

Let me just briefly read what the chairman of the Committee on Ways and Means requested of the Committee on Rules and as agreed to by the committee itself.

I am authorized and directed by the Committee to request a modified open rule which would provide for:

(1) The following five amendments, which would not be subjected to amendment if printed in the CONGRESSIONAL RECORD and if offered on the floor:

(a) An amendment by Mr. KEMP to the individual tax rate reductions contained in Title I of the bill;

(b) An amendment by Mr. FISHER in the nature of a substitute for the reported bill, if such substitute conforms to the conceptual framework of the substitute offered by Mr. FISHER in the committee.

Today we do not have that proposition before us. We have the Fisher-Corman substitutue as worked out between the House and 1600 Pennsylvania Avenue.

(c) An amendment by Mr. CORMAN in the nature of a substitute for the reported bill, if such substitute conforms to the conceptual framework of the substitute offered by Mr. CORMAN in committee.

As I understand it, we do not have this proposition as requested by the chairman of the Committee on Ways and Means before the Committee on Rules.

(d) An amendment by Mr. VANIK and Mr. PICKLE in the nature of a substitute for the reported bill, if such substitute conforms to the conceptual framework of the substitute offered by Mr. VANIK and Mr. PICKLE in committee; and

(e) An amendment in the nature of a substitute for the reported bill embodying the text of H.R. 12078 which is the Administration's original tax reform and reduction proposal.

Two. Pro forma amendments to said amendments for purposes of debate on said amendments only.

Three. Committee amendments, which would not be subject to amendment.

Four. Four hours of general debate, to be equally divided"—we now have two hours in this rule.

Five. Waiving all necessary points of order; and

Six. One motion to recommit, with or without instructions.

Now let us take a look at what we have before us today. It is a modified closed rule. It prohibits all amendments to the bill with four exceptions in the rule. The amendments made in order will not be subject to further amendment except for the amendments recommended by the Committee on Ways and Means. In order to insure that each separate amendment is considered as a whole, the rule provides that each amendment will not be subject to a demand for division on the question. The rule specifies the order in which the amendments will be offered, except for amendments recommended by the Committee on Ways and Means which may be offered at any point during the amending process.

The first amendments which will be considered under this rule are the Committee on Ways and Means amendments

now printed in the bill, except for the amendment to section 404, which is the Archer amendment. These committee amendments may be debated for a total of 10 minutes each, 5 minutes for the amendment and 5 minutes against the amendment.

The second amendment which may be offered under this rule is the Committee on Ways and Means amendment to section 404. This is the Archer amendment. The Archer amendment indexes the basis of capital assets upward by the rate of inflation effective January 1, 1980.

In my humble judgment, Mr. Speaker, this may be the most important part of this bill because every American suffers from inflation. Under this amendment taxes will be paid only on capital gains after the inflation factor has been taken into account.

Under the current system a large part of capital gains tax is paid on inflation and not on real gain.

The Archer amendment will be debated for 30 minutes; half of the time will be controlled by the gentleman from Texas, Mr. ARCHER, and the other half by a Member in opposition to the amendment to be designated by the Chairman of the Committee on Ways and Means.

Mr. Speaker, the third amendment made in order by this rule is known as the Vanik-Pickle substitute. This amendment would extend through 1980 the temporary tax cuts which would otherwise expire December 31, 1978. This approach gives the taxpayers no break over what they had last year. Under the rule, this amendment would be debated for 30 minutes, with half the time controlled by the gentleman from Ohio (Mr. VANIK) and half the time to be controlled by a Member in opposition to the amendment, to be designated by the chairman of the Committee on Ways and Means.

The fourth amendment made in order by this rule is to be offered by the gentleman from California (Mr. CORMAN). I am informed this represents the latest administration proposal. The amendment would provide for a total tax reduction of $18.1 billion. It would apportion the tax cuts more toward the lower end of the income spectrum than does the committee bill and will again, in my humble judgment, short change the people in the middle-income brackets of the tax laws.

In addition, it provides more stringent capital gains treatment than the committee bill.

Mr. Speaker, under this rule this amendment may be debated for 1 hour; half the time controlled by the gentleman from California (Mr. CORMAN), and the other half will be controlled by a Member opposing the amendment, likewise designated by the chairman of the Committee on Ways and Means.

Mr. Speaker, this rule is noteworthy as much for what it fails to make in order as for what it makes in order. This rule does not specifically make in order the Kemp-Roth Republican tax cut proposal that we have heard so much about lately. Kemp-Roth, of which I am a cosponsor, would cut individual tax rates 10 percent a year for 3 years, for a total cut of 33⅓ percent.

While the rule does not specifically make the Kemp-Roth proposal in order, the rule does provide for a motion to recommit with or without instructions. It is possible to offer the Kemp-Roth proposal as a part of the motion. The rule provides for a total of 1 hour of debate on the motion to recommit. Half that time will be controlled by the proponent of the motion to recommit and the other half will be controlled by the chairman of the Committee on Ways and Means, or his designee.

Mr. KEMP. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I am happy to yield to the gentleman from New York.

Mr. KEMP. Mr. Speaker, I appreciate the gentleman yielding.

I am not happy with the rule to the extent that in the full and open debate in the Committee of the Whole there will not be, as I wanted and was agreed to, a full up-or-down vote on the Kemp-Roth amendment to the personal income tax rate aspect of this bill.

However, will the gentleman assure me that the motion to recommit will be a complete up-or-down vote, so that all the American people will have a clear view as to who is in favor of lowering tax rates and who, by definition, is in favor of raising tax rates by this amendment?

Mr. LATTA. Mr. Speaker, let me first in answer to my friend, the gentleman from New York, say that I will not be controlling the time on the motion to recommit. That will be controlled by the gentleman from New York (Mr. CONABLE).

Second, as the gentleman knows, on a motion to recommit we do not get a straight shot, so to speak, on the proposal. Some Members will be voting against the motion to recommit because they are just against motions to recommit and fearful that their votes may be interpreted on being against the bill. As a consequence, there is a general reluctance on the part of some Members to vote for a motion to recommit.

Mr. KEMP. Mr. Speaker, will the gentleman yield further?

Mr. LATTA. I am happy to yield.

Mr. KEMP. Mr. Speaker, if a motion to recommit is made with the Kemp-Roth amendment, with instructions to the committee to pass the Kemp-Roth 30-percent rate reduction over 3 years, would that not be interpreted as an up-or-down vote insofar as it is possible, given the constraints of this modified rule?

Mr. LATTA. Well, certainly from my interpretation, that would be correct.

As I say, I will have no control over the motion. Control will be in the hands of the gentleman from New York (Mr. CONABLE).

It is my understanding there was an unwritten agreement that the Kemp-Roth proposal would be contained in the motion to recommit.

Mr. KEMP. Mr. Speaker, if the gentleman will yield further, I have discussed this with the ranking minority Member, the gentleman from New York (Mr. CONABLE), and the gentleman has assured me that our motion to recommit will be with instructions to amend section 101 of the bill, that is the personal income tax side of the Ways and Means Committee bill, and add as not a substitute, but an amendment to that section for the Kemp-Roth personal rate reduction.

So I just want to assure everybody in the Chamber here that there will be, insofar as this Member is concerned, a clean, clear, up-or-down vote on where all Members stand as to lowering the rates on the American people or letting them go on up to astronomical proportions in the next 3 to 5 years.

Mr. LATTA. Mr. Speaker, I just want to reemphasize what I stated before. We never really get a perfectly clear shot at anything on a motion to recommit, because of the reluctance of some Members to vote for a motion to recommit. I would have preferred for the Rules Committee to have made Kemp-Roth in order as an amendment as requested by the Ways and Means Committee.

Mr. KEMP. The gentleman agrees, though, does he not, that, with instructions, it is a clear vote before the American people? And is that not what we seek?

Mr. LATTA. I will say that it is clear to me and the best we could get from a parliamentary standpoint. It will be in the motion to recommit, but I would have preferred, as the gentleman from New York would have preferred, making it in order as an amendment as requested.

Mr. DEVINE. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from Ohio.

Mr. DEVINE. Mr. Speaker, I am a little disturbed by what the gentleman said in his remarks about the rule.

Did the gentleman say that the contents of this bill indicate that it is aimed primarily at tax relief for low-income people, and that the middle- and upper-bracket taxpayers are not in fact going to get any relief hereunder?

Mr. LATTA. The gentleman has reference to the Corman-Fisher proposal?

Mr. DEVINE. Yes.

Mr. LATTA. The people in the middle-income bracket get less tax relief than they would under the committee bill, there is no question about that.

As I mentioned in the Committee on Rules, the Tax Foundation points out in its June–July issue that the people in the upper brackets and when they talk about the upper brackets, they are talking about people making $24,971 per annum or more, represent only 10 percent of the people but they are paying 50 percent of the income taxes. It is also interesting to note that 50 percent of our taxpayers earning $9,561 or more in 1976 paid 93.3 percent of all our income taxes. These are the people in need of tax relief.

Mr. DEVINE. Mr. Speaker, I suppose the bottom line of this is that as far as the taxpayers across the Nation are concerned, if this bill is ultimately enacted, they cannot expect a tax cut but in fact their tax next year on this year's income will be higher than it was last year, and that this could properly be described as a reduction in the rate of increase in taxes which has been caused by the increase in social security tax enacted by the majority of this House last year and caused by inflation.

Mr. LATTA. Mr. Speaker, I concur in what the gentleman is saying.

Let me point out that there are several amendments in this bill that will do just that. For example, as I pointed out before the Committee on Rules, there is an amendment in this bill that strikes out the $150 that one can now deduct for premiums paid on health and medical insurance.

The way this bill is written you would have to have 3 percent of your adjusted gross income going for medical bills and insurance for hospitalization before you could deduct anything. So most Americans are going to lose that $150 they can now deduct. If we take a person in the 50-percent income bracket, that means he must pay $75 more in taxes.

Then we also have a provision in here that strikes out the deduction for State and local gasoline taxes used for nonbusiness purposes.

So it is a question of who the individual taxpayer is and what his tax situation is as to how he is going to fare. We have seen a lot of charts, but they just take the average individual into consideration.

Mr. DEVINE. Mr. Speaker, if the gentleman will yield finally keeping in mind the philosophy of some on the idea of redistribution of wealth, would the gentleman say whether in his opinion the middle- and higher-income taxpayers next year will pay less or more than they paid this year?

Mr. LATTA. Well, as I say, it depends upon the individual and his tax bracket.

There are people in certain brackets under particular circumstances who will pay more tax, there is no question about that.

Mr. DEVINE. Mr. Speaker, I think that question should be answered today, and I thank the gentleman for yielding.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I will be happy to yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, to pursue the point that was brought up a moment ago, I wonder if I could ask the chairman of the committee if the minority offers, through the gentleman from New York (Mr. CONABLE) a motion to recommit that includes the concepts of the Kemp-Roth reduction in tax rates on personal income tax, and included the rest of the bill that the committee had worked on, the Kemp-Roth issue would in fact be very much a part and included in the motion to recommit; is that not correct?

Mr. ULLMAN. If the gentleman will yield, whatever recommittal motion the minority offers will involve a procedure that I think all of us are very familiar with, because it has happened many times in the House, where the House votes to recommit the bill back to the committee. That, in effect, is what the motion will be, to recommit the bill, as amended by the recommittal motion, back to the committee, with the instructions to report it forthwith to the House.

Mr. ROUSSELOT. Right.

Mr. ULLMAN. And, of course, then it would be reported forthwith back to the House. That is the standard procedure.

Mr. ROUSSELOT. The effect of that is an up-or-down vote on the inclusion of Kemp-Roth; is that not correct?

Mr. ULLMAN. The amended bill, as amended by the recommittal motion, would go back to the committee and be reported forthwith to the House.

Mr. ROUSSELOT. I thank my chairman for clarifying that issue.

Mr. LATTA. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. ANDERSON).

Mr. ANDERSON of Illinois. Mr. Speaker, I am going to reluctantly support this rule, even though it is not the rule requested by the chairman of the Ways and Means Committee or the ranking minority Member or a committee majority or half the Rules Committee. The fact is, this is not even a House rule. Instead, it can best be described as a "late-bloomin' Blumenthal rule," because the new tax bill it makes in order as an amendment was hatched in the dead of night, at the 13th hour, in some Treasury Department laboratory. The resultant concoction was served up at the Rules Committee yesterday, a day after our hearings had begun. It should have been duly christened as "Blumenthal's test tube boo-boo," because never before have I seen such a mistaken, misshapen, and mishandled proposal laid before this House.

The way in which the administration handled this whole matter is an affront to the integrity of this House and our constitutional processes. There is a proper time and place and way for an administration to submit, defend, and revise its proposals. All those things should be done during the committee hearing and markup stage of the legislative process. But, to stonewall against compromise until after a committee has reported its bill, and then to come forward with an entirely new bill is a direct slap in the face of the committee, of the House leadership, and of every Member of this body. And yet, the Rules Committee has swallowed its pride, not to mention the separation of powers doctrine, and elevated this 13th hour administration compromise to full status as one of the only two noncommittee amendments made in order by this rule. At the same time, the Roth-Kemp individual tax rate reduction amendment, which the Ways and Means Committee had asked to be made in order as an amendment to the bill under the rule, was deleted from the rule by the Rules Committee, with the understanding that it could be offered in the motion to recommit.

Mr. Speaker, I find it a bit curious that those who supported this demotion of Roth-Kemp did so on the grounds that it had not been properly considered and voted on by the Ways and Means Committee. And yet these same Rules Committee Democrats leapt at the chance to elevate the Blumenthal-Corman-Fisher amendment, which they had not even seen and which did not even exist when this bill was being considered by the Ways and Means Committee. If there is any logical consistency to these two actions it escapes me.

Having said all this, though, I repeat that I reluctantly support this rule. In the first place, I do not think it is realistic to expect that we could banish the Blumenthal amendment from this rule; if the majority party wants to indulge in this kind of folly and legislative travesty from their own President, that is their business. The important thing, it seems to me, is that the Ways and Means bill is basically a good bill when it comes to the reduction in the capital gains tax and the important Archer provision which indexes that tax. Moreover, the House will have a clear-cut vote on the Kemp-Roth tax reduction provision, albeit late in the game. We should not lose sight of these two all-important goals in discussing this rule, though there are certainly plenty of side issues and side shows we could become hung up on. The Rules Committee, for instance, turned back requests to make in order a 5-percent tax credit on social security taxes and the solar and insulation tax credits from the energy bill. While I supported the latter attempt in the Rules Committee I do not think either of those issues is central to our consideration of this tax measure and therefore are not important enough to begin unraveling this rule or the bill. Both the energy and social security matters can and should be dealt with in separate legislation. I have no doubt, for instance, that if we do not get the energy tax bill out of conference, the solar and insulation credits could easily be broken off and passed under suspension in the last days of this session.

But today we must confront the central issues of addressing the capital formation crisis as well as the taxpayers' revolt, and the committee bill together with the Kemp amendment made in order by this rule address those central issues. I therefore urge adoption of this rule.

Mr. MURPHY of Illinois. Mr. Speaker, I yield 2 minutes to the gentleman from Connecticut (Mr. DODD).

Mr. DODD. Mr. Speaker, it is with great reluctance that I rise this morning and ask my colleagues to support the gentleman from Missouri (Mr. BOLLING) in defeating the previous question. In the year and a half that I have served on the House Rules Committee, I have

never actively participated in an effort to defeat a rule, and I do so today with some reluctance.

As all of us in this Chamber know, it has been a tradition in the past, when dealing with tax legislation, to propose either a closed rule or a modified closed rule. There has been good reason for that, but along with the tradition that has been included with that concept has been the tradition that when we come out of the Rules Committee, we should fashion a rule that every major proposal has an adequate opportunity to be heard on the floor. This morning, Members are not going to have that opportunity. By the narrowest of margins, yesterday the House Rules Committee defeated an effort to make in order an amendment to be offered by the gentleman from Missouri (Mr. GEPHARDT) which would give us an opportunity to address and place an issue before this House, the issue of whether or not we are going to lighten the burden of the taxpayers in this country with regard to increased social security taxes.

That proposal enjoys a great deal of support in this Chamber, as witnessed by the number of signatures on letters that have called for consideration of that proposal. I will support an amendment to this resolution which will allow for that amendment to be made in order.

I would point out to my colleagues that every other major proposal that has been bandied about in this Chamber over the past several weeks will be raised on the floor, including the Kemp-Roth proposal. I would point out that that proposal did not even have an up or down vote in the Ways and Means Committee. So, I strongly urge that we defeat the previous question so that we will have an opportunity to amend this rule and get about the business of dealing with this important legislation.

Mr. LUKEN. Mr. Speaker, will the gentleman yield?

Mr. DODD. I yield to the gentleman from Ohio.

Mr. LUKEN. Mr. Speaker, I rise in opposition to the rule on H.R. 13511, the Revenue Act of 1978. I would like to associate myself with the remarks of the gentleman from Connecticut (Mr. DODD). The rule is bad because it is incomplete. It does not provide the House with the chance to vote on the Gephardt amendment which provides an income tax credit for social security taxes paid by employers and employees.

In committee, on another bill, the Conable-Griffin amendment that would have rolled back the social security tax increase was defeated by only one vote. That vote and the sentiment heard on the floor today clearly indicates that we must have an opportunity to vote on the Gephardt amendment or we will have let the American taxpayer down badly.

The social security tax increase has placed a severe burden on both employers and taxpayers in the lower and middle income tax brackets. I would note that I have received more pleas for help from employers than individual taxpayers.

It is logical that now, as we consider a bill whose purpose is to cut taxes, that we take this opportunity to reduce the social security tax burden as well. Unless we provide taxpayers with some income tax offset for social security taxes paid most taxpayers will realize a net tax increase, not a decrease, in 1979, under the cuts proposed by the committee.

A cut in social security taxes will help cut inflation. Businesses will not have to increase prices to offset the higher social security taxes. The lower and middle income taxpayers who must spend a far greater portion of their income will therefore directly benefit. Employers who, under the principle called "parity" now embedded in our social security system, are subject to the payroll tax increases as well, have an equal right to relief.

Mr. Speaker, we have today an opportunity to lighten the social security tax burden that we will not have again in this Congress. It is an opportunity that must not be lost. I urge my colleagues to join me in defeating the rule and amending it to provide that the House can vote on this social security tax credit amendment.

Mr. MURPHY of Illinois. Mr. Speaker, I yield 2 minutes to my colleague, the gentleman from Illinois (Mr. MIKVA).

Mr. MIKVA. Mr. Speaker, I would like to echo the remarks of my colleague, the gentleman from Connecticut (Mr. DODD).

I think that proposing to resolve the debate concerning economic policy without having a vote on the social security financing issue is simply a mistake. I do not think it will wash. I think when we try to explain to a lot of people next year why this tax bill, which has been heralded as a cut in their Federal taxes, will result in an increase for many of them in the amount of money that is taken out of their paychecks for taxes, is going to be very difficult. I think if the election were held the first Tuesday after the first paycheck next year, we would have a lot of problems explaining that circumstance.

The issue has been so hotly debated in the Ways and Means Committee and on the floor of the House and in the budget resolution and in the Democratic Caucus, that it is irresponsible to truncate the most important debate we have had on economic policy so far by not even giving it a vote on the floor.

I think it is wrong. I think it demeans the whole basis of a deliberative body and I think it is the best example of what is wrong with closed rules.

Mr. MURPHY of Illinois. Mr. Speaker, I yield 2 minutes to the gentleman from Arkansas (Mr. TUCKER).

Mr. TUCKER. Mr. Speaker, I do not believe I have opposed a rule on any bill that has come up during my brief tenure here in the Congress, and I do so today only with great reluctance, but the question of social security tax increases and how to treat the social security system is heavy on the mind of many in the Congress and heavy on the pocketbooks of millions of workers in our country.

The gentleman from Illinois (Mr. ANDERSON) suggested earlier that the Conable-Gibbons amendment which was offered in the Ways and Means Committee was not going to be offered on the floor. Perhaps it could be offered in the motion to recommit. I voted to support that in the Ways and Means Committee and I might do so again. The gentleman from Missouri (Mr. GEPHARDT) offered his amendment on social security in the Rules Committee and it failed by only one vote. But there are over 100 Members who support it and want the opportunity to debate it. It does no damage to the fiscal integrity of the social security trust fund. It is temporary in nature, so Congress may consider in which direction it wants to go. It may be the Conable-Gibbons in coming years. It is modest in cost. It provides equal treatment for employees and employers. And it almost passed in the Rules Committee.

For that reason I strongly urge my colleagues to vote "no" on the previous question so the Democrats in Congress, and the Republicans in Congress, will at least have the opportunity to vote on payroll tax relief for working people.

The Republicans may do whatever they prefer in the recommital motion because they have no restrictions on that.

Mr. ANDERSON of Illinois. Mr. Speaker, will the gentleman yield?

Mr. TUCKER. I yield to the gentleman from Illinois (Mr. ANDERSON).

Mr. ANDERSON of Illinois. Mr. Speaker, if the gentleman votes for the motion to recommit that will be offered on this side of the aisle, it will take care of his concern over the high social security taxes.

Mr. TUCKER. I urge my colleagues to vote "no" on the previous question so we may consider the social security tax question and so we can have a tax cut for all wage earners in this country.

Mr. MURPHY of Illinois. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. Mr. Speaker, as I mentioned under the 1-minute rule, I think this is a very bad and unfair rule. It is a bad rule because it excludes from consideration a rollback in the social security taxes, which a large majority have already expressed themselves as favoring and which was heard by the Ways and Means Committee, while permitting consideration and providing a special 1 hour time for debating the Kemp-Roth bill which was not heard by the committee and on which the majority has not spoken.

It is a bad rule because it is too restrictive with respect to the time for debate. Only 15 minutes are provided to each side for debate of important amendments like the Vanik-Pickle substitute.

I urge that the previous question be defeated and that the gentleman from Arkansas (Mr. TUCKER) or the gentleman from Missouri (Mr. BOLLING) will be given the opportunity to present a rule which will make the Gephardt social security rollback amendment in order.

Mr. MURPHY of Illinois. Mr. Speaker,

I yield 2 minutes to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. Mr. Speaker, I submit to this House that the best approach we could use today is to pass the measure we call the Vanik-Pickle bill, which simply extends the 1977 tax bill with four extensions for relief under this program.

That is the sensible and logical thing for us to do. I would hope when the time comes and we have the opportunity to simply renew that 1977 tax bill that we do so.

That motion will be made, and it is in order. So, as I say, I think the sensible thing for us to do is to continue the tax bill of 1977 and renew four areas of about $8 billion in costs. That is the responsible thing to do.

Mr. JOHN L. BURTON. Mr. Speaker, will the gentleman yield?

Mr. PICKLE. I yield to the gentle- from California.

Mr. JOHN L. BURTON. Mr. Speaker, I thank the gentleman for yielding. I think the gentleman is right on target. I have had town meetings in my district where the people say, "Forget these foolish tax cuts and do something about reducing the deficit."

I think the approach taken by the gentleman now in the well and the gentleman from Ohio (Mr. VANIK) is a sound one.

Mr. PICKLE. Mr. Speaker, I appreciate the gentleman's comments.

Mr. Speaker, there is only one argument against the measure that the gentleman from Ohio (Mr. VANIK) and I will offer and that is Members will say that it is inflationary. Well, that is a point of discussion. But I simply say to the Members that the best thing for us to do is renew the tax bill of 1977 and not get into this added deficit of another $25 or $30 billion. The thing to do is renew our bill of last year.

You are not going to fight fire with gasoline, and fighting inflation with an inflationary bill does not measure up to commonsense.

So, Mr. Speaker, I would hope that when the gentleman from Ohio (Mr. VANIK) and I offer our amendment that it will be approved by this body.

Mr. MURPHY of Illinois. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts (Mr. BURKE).

Mr. BURKE of Massachusetts. Mr. Speaker, we are hearing a lot of rhetoric today about the problem of increasing social security taxes. There is only one way for this House to go and that is to roll back the payroll tax itself.

We have been hearing about the Gephardt amendment, and I am going to support it, but all the Gephardt amendment does is pick the pockets of the people for 18 months and at the end of that time it gives them a little bit of a rebate. What you have to do is to cut the payroll tax now, forthwith; it should take effect in January 1979. They have prevented us from obtaining a rule for that.

I do not know what the rush on this rule today is all about. The committee voted on it last night and suddenly, this morning, we are confronted with a confused rule. I agree with the gentleman from Ohio (Mr. LATTA) who said we are in a confused state. We are in a confused state. I do not think that many Members fully realize what this rule will do.

They talk about reducing social security taxes by the Gephardt amendment. The Gephardt amendment will ameliorate it, but 10 percent of the people will not get any benefit from it. You have got to go to the source of the payroll itself, that is where the rollback should be.

Failing to do that, I can tell you that many Members will not be back here, on both sides of the aisle, because the American public is going to take it out on them. They are looking at you, and the small business people are looking at you because some 30,000 of them were wiped out last year. There is a proliferation of strikes all over the country. Unemployment is climbing up over 6 percent. The value of the dollar relative to the yen in Japan has further devalued, and it is continuing to lose ground. While the Congress is playing the violin, Rome burns. So, let us do something about the payroll tax itself, and if you do not do that, then you are wasting your time.

Mr. MURPHY of Illinois. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. PIKE).

Mr. PIKE. Mr. Speaker, I thank the gentleman for yielding.

While I did vote against this bill in the committee, I cannot get too emotional about opposing this rule. I think the rule is about as fair as we can get.

Mr. Speaker, I read with great interest the statement put out by 27 Members of the House opposing this rule, and I want to pay tribute to the 4 of them out of the 27 who voted against the social security tax increase when it came up last year.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Speaker, the gentleman from Maryland does not often support closed rules, but I do not think this is a closed rule. It is the most open rule I have seen on a Ways and Means bill in 5 years. In fact, I suspect that the first battle is going to be to some degree on the rule. That is good. You know that procedural questions are hard to sell to the American people. We go back home and talk about them and they do not understand. But they are going to understand this vote, friends. They are going to understand it well.

I compliment you folks on the other side of the aisle on your new-found concern about social security taxes and the heavy burden they impose upon workers and business in America. You passed it, my dear colleagues and you now have a chance to relieve the economic pain you have inflicted by adopting the bill before us. I hope you will vote as your newly discovered sympathy for taxpayers indicates.

Mr. Speaker, violent political revolutions teach hard lessons. They learned those lessons at the Winter Palace; they learned them in even bloodier fashion at Versailles; and they learned well at the Court of George III when we deposed tyranny in America. There is a new and cruel injustice abroad in this great country of ours today. It is the product of the crushing burden of taxation and there is a revolution in the truest sense. You ignore its lessons at your own political peril.

Yes, the times they are a-changing. Your watchwords cannot remain, with all due respect to Harry Hopkins, "Tax, tax, spend, spend, elect, elect." We have to let Harry spin wherever he is today, and ignore his antiquated advice; or else you can forget the "elect" part of his equation.

Now it is cut taxes, it is cut spending; and if election is of concern to anyone in this body, your vote will flow as a natural consequence thereafter.

No, the days of that sort of big government, big spending in America are gone. The reason you are all so uncommonly nervous this morning—is quite apparent; because the Members know that what I say is true. The American people are fed up with what Government and taxes have done to them. The philosophy of the Cormans and the Blumenthals, with all due respect to my colleague from California and the Secretary of the Treasury is passé. Theirs is an idea whose time has passed. Today we look to Kemp and Roth and the Jarvises and the Ganns and California's own proposition 13 as an indicator of the people's wishes.

Mr. Speaker, I say this to the Members: Go back home and talk to the folks during the coming recess. You will find out how you should vote, for the previous question, for the rule, and for the bill.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Speaker, I am going to vote for this rule. It is far more open than most rules we receive here on the floor with Ways and Means Committee bills. I think that the Committee on Rules has been far more generous than they normally are in allowing various kinds of amendments and proposals for amendments to the bill.

Mr. Speaker, I supported H.R. 13511 in the Committee on Ways and Means. It was not all that I had hoped it to be. I would have preferred that, on the personal-income side, it include the Kemp-Roth concept. Many of us would have preferred the total Steiger amendment to roll back the maximum capital gains tax of 25 percent. However, we will have a chance to debate the Kemp-Roth issue when the motion to recommit is offered.

I want to thank the Committee on Rules for giving us one of the more open rules they have given us. Times are changing; and I do agree with my colleague, the gentleman from Maryland (Mr. BAUMAN), that the Members of this Congress are learning that we cannot just tax and tax and spend and spend.

It is beginning to bother to the American people more than a little bit.

Mr. Speaker, I am sorry that my dear colleague, the gentleman from Massachusetts (Mr. BURKE) has forgotten that he pushed hard that wonderful social security tax bill last September, but most of us on this side remember.

Mr. BURKE of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I will in just a minute.

Most of us on this side of the aisle did not vote for that big tax increase. So when anyone points to our side, I remind him that we did not vote for that big tax boost which the gentleman gave us last year.

Mr. BURKE of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Massachusetts.

Mr. BURKE of Massachusetts. Mr. Speaker, the gentleman wanted to direct social security just like a lot of Republican Members have always tried to do.

Mr. JOHN L. BURTON. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from California.

Mr. JOHN L. BURTON. Mr. Speaker, how are the gentleman from California (Mr. ROUSSELOT) and I going to achieve our cherished goal of a balanced budget if Kemp-Roth is adopted? That is my only concern. The gentleman and I have sought the grail for so long.

Mr. ROUSSELOT. Mr. Speaker, I say to the gentleman that he should be here next week during the consideration of the second budget resolution and we will discuss it. We will seek the "balanced budget" grail together.

Mr. JOHN L. BURTON. In other words, I have to wait until then?

Mr. ROUSSELOT. Wait until next week when the next great episode will take place in the quest for the balanced budget.

Mr. MURPHY of Illinois. Mr. Speaker, I yield 2 minutes to the gentleman from Oregon (Mr. ULLMAN).

Mr. ULLMAN. Mr. Speaker, developing this bill has been an onerous and difficult task. There are not very many people who agree with all the provisions in the tax bill, and a number of people feel very strongly against some parts of it. When we launched this effort this last time in the committee, I remarked that we are launching a rather delicate raft into very turbulent waters, a raft which could be upset or shipwrecked at any point. I am rather proud that we have been able to hold together a bill that we can defend, a bill that is designed to meet the problems of America today.

I commend the Committee on Rules for bringing us a rule that I think is fair. I think it gives us the choices that we need to make. The social security matter needs to be considered, but it needs to be considered, as the gentleman from Massachusetts (Mr. BURKE) has so often said, within the jurisdiction of the social security system itself.

We cannot solve the social security problem in an income tax bill. We have got to solve it in a bill dealing with social security itself, and I pledge to the Members that we will do that next year. We will hold extensive hearings. We will give the relief on payroll taxes that we need to give, but we will do it in an orderly manner, looking at all of the possibilities and all of the responsible alternatives. I submit to the Members that is the way to do it. So I urge them to support this rule, not to set out on a path that may prohibit getting any bill at all out of this Congress. Let us not upset this craft. Let us vote for the rule and handle the social security problem responsibly in the next session of Congress.

Mr. LATTA. Mr. Speaker, I yield myself 15 seconds to ask the gentleman from Oregon (Mr. ULLMAN) a question.

The Gephardt amendment, according to information at our desk, would cost $6 billion. Is this an accurate figure?

Mr. ULLMAN. Mr. Speaker, if the gentleman will yield, that is what I understand.

Mr. LATTA. $6 billion.

Mr. Speaker, I yield 1 minute forty-five seconds to the gentleman from Minnesota (Mr. FRENZEL).

Mr FRENZEL. Mr. Speaker, if we defeat the previous question, the only thing we are going to get is the Gephardt amendment, so even those of us who would like energy incentives in this bill have no reason to vote against the previous question.

There is also no reason to favor the Gephardt amendment. It is one way of going at the social security problem—a clumsy way, no better than the Conable amendment, and both of those failed in the Committee on Rules. So, No. 1, it would be unfair to support Gephardt.

No. 2, the Gephardt amendment would upset the balance of the bill. It is clumsy; it is jerryrigged; it is a band-aid; it is a mechanism that really does not apply to social security. It is laid over the general tax bill in a cumbersome manner as the chairman of the committee described. It is more expensive than a simple rollback, and it is about twice as expensive as the Conable alternative.

Next, it will not relieve the Members' political distress. The gentleman from Illinois (Mr. MIKVA) told us that people would be mad in January. They are going to be mad anyway, because the tax credit is not going to help until the end of next year.

Finally, the passage of the Gephardt amendment would relieve the momentum that the chairman of the committee is trying to get for a full overhaul of social security. So if the Members want an overhaul in a decent social security bill, they had better vote for the previous question and for the rule.

Mr. LATTA. Mr. Speaker, I yield the balance of my time to the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Speaker, I rise in support of the previous question and the rule.

I think everyone in this Chamber would have had a somewhat different bill had he had a chance to put it together himself. There has been a great deal of pressure, not only on the Committee on Ways and Means, but on the Committee on Rules and on the leadership of both parties in connection with this dramatic piece of legislation. I say it is dramatic, because I think we all have the sense that we are standing here at an historic moment when we are going to have at least a modest change in direction from the historic pattern of tax reform bills.

Quite frankly, we are responding to the urgings of the American people. The American people are expecting this tax cut. They want it to have the general outlines of the bill that has been put together, in my view. I hope the Members will not mess around with the rule, setting in action a train of events which can lead in any number of directions and bring us distress and grief if we are unable to channel in constructive ways the forces at work and which I have referred to bearing on all those participating.

Mr. Speaker, I think we have the major options open to us, as the Committee on Rules has brought the rule out. We should support this as the best possible compromise at the time. I hope the Members will respond with understanding and enthusiasm.

Mr. MURPHY of Illinois. Mr. Speaker, it has been mentioned that this is a fair rule. The gentleman from Oregon (Mr. ULLMAN), chairman of the Committee on Ways and Means, has promised that next year the gentleman will hold open and detailed hearings, as the gentleman from Massachusetts (Mr. BURKE) has long recommended, on the Social Security bill.

To my colleague, the gentleman from Maryland (Mr. BAUMAN), who asked where Harry Hopkins is, we just received a telegram from Harry urging us to support this rule.

Mr. Speaker, I move the previous question on the resolution.

The SPEAKER. The question is on ordering the previous question.

Mr. BOLLING. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 284, nays 130, answered "present" 1, not voting 17, as follows:

[Roll No. 678]

ANSWERED "PRESENT"—1

Burke, Calif.

NOT VOTING—17

Conyers	Krueger	Sisk
Dellums	Le Fante	Stark
Diggs	Lloyd, Tenn.	Teague
Ertel	McDonald	Tsongas
Flowers	Miller, Calif.	Young, Alaska
Frey	Rodino	

The Clerk announced the following pairs:

On this vote:

Mrs. Lloyd of Tennessee for, with Mr. Rodino against.

Mr. Teague for, with Mr. Stark against.

Mr. McDonald for, with Mr. Conyers against.

Mr. Krueger for, with Mr. Miller of California against.

Mr. Sisk for, with Mr. Dellums against.

Until further notice:

Mr. Flowers with Mr. Frey.

Mr. Ertel with Mr. Diggs.

Mr. Le Fante with Mr. Tsongas.

Messrs. FINDLEY, DORNAN, and AKAKA changed their vote from "nay" to "yea."

Mr. CARNEY and Mr. HOLLENBECK changed their vote from "yea" to "nay."

So the previous question was ordered.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. STUDDS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were refused.

So the resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. ULLMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 13511) to amend the Internal Revenue Code of 1954 to reduce income taxes, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from Oregon (Mr. ULLMAN).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 13511, with Mr. SHARP in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Oregon (Mr. ULLMAN) will be recognized for 1 hour, and the gentleman from New York (Mr. CONABLE) will be recognized for 1 hour.

The Chair recognizes the gentleman from Oregon (Mr. ULLMAN).

Mr. ULLMAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this bill is a strong response to a nation worried about inflation. It is a message to the middle-income families of this Nation that they are not forgotten, that we do understand the impact of inflation and payroll taxes on the people of this Nation. We do understand what inflation does to the cost of housing, to the cost of food and to the cost of everything else that is required for people to live. We do understand, also, that a nation, a growing nation, needs capital, and in this bill we have attempted to do something about it.

The bill protects the wage earners of this country, the homeowners of this country, the investors, the entrepreneurs, the workers and the average American in this Nation.

It does so within a sound discipline and without threatening the overall economy.

Let me quickly run through some of the provisions of the bill.

First the tax reductions.

How big are they and for whom?

The total annual effect is $16.3 billion for the full calendar year. That is broken down $10.4 billion for individuals, $4 billion for business, and $1.9 billion for capital gains.

The revenue effect of the new tax cuts for fiscal year 1979 is $9.4 billion.

The bill also extends most of the temporary reductions that have been in place since 1975. Including the extensions, the revenue effect is $18.3 billion in fiscal year 1979.

The bill does contain a number of significant provisions to reform and simplify the individual income tax code.

Let me then describe the system of tax reductions for individuals.

We have repealed the temporary general tax credit of $35 and the alternative credit of 2 percent of the first $9,000 of income. In lieu of these credits, we have raised the $750 personal exemption to $1,000. This simplifies the computations and also reduces the marriage penalty.

That is something which the people of this country understand. That is something which they have been asking for, and it is something which will give major relief to the taxpayers of this country.

The impact of inflation on income tax burdens has been severe, because people are pushed into higher tax brackets because of inflation. We have widened those tax brackets to give relief. We have widened them all across the board, so that we have taken into account the impact of inflation.

We have also given some rate cuts, particularly for middle-bracket taxpayers. In addition, we have increased the "zero bracket amount." The amount of the increase is from $2,200 to $2,300 for single persons and from $3,200 to $3,400 for married couples. This has the same effect as an increase in the standard de-

duction to these amounts would have had under prior law.

Mr. Chairman, let me briefly refer to tax reform.

Because of the tremendous problem of energy in this Nation, the committee felt that we can no longer justify the gas-tax deduction in the income tax system, and so we repealed that deduction. We simplified the medical expense deduction in a very meaningful way.

As to political contributions, we have had two provisions: either a credit or a deduction. The committee felt that it was wiser to give the credit, but not the deduction. By eliminating the deduction, the computation is simplified. Consequently, we have limited that provision to a simple credit for political contributions.

Unemployment compensation at the present time is exempt from tax; but certain high-bracket people are getting a special advantage, and so we have said for those single people who have income above $20,000, we will phase in a tax on unemployment compensation. For married people the phase-in would be above $25,000 of income.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. ULLMAN) has expired.

Mr. ULLMAN. Mr. Chairman, I yield myself 5 additional minutes.

Mr. Chairman, we have also provided some special rules, by very popular demand, for deferred compensation in the case of: First, State and local plans; second, cafeteria fringe-type benefit plans; and third, cash and deferred profit-sharing plans. We think they meet a very important need and are extremely equitable.

We have tightened up provisions to limit tax shelters. The "at risk" provision is broadened and extended. We have tried to close down on some shelter operations that are going on by giving the Internal Revenue Service better administrative tools.

As to business taxes, the centerpiece, of course, is reducing the 48 percent corporate rate to 46 percent; but we have added a very important provision for the small corporations of the country. The first $100,000 of corporation taxes will be graduated in a way that I think satisfies the requirements of small business, something they have been working for for a long time.

We have four bracket rates of 17 percent, 20 percent, 30 percent, and 40 percent, applying to the first $100,000 of corporate taxable income. We think that this is a very significant development in the interest of small business.

Of the $5 billion rate cut, $1 billion goes to corporations with less than $100,000 of taxable income.

Turning to the investment credit, we have made the 10 percent permanent. This has been a very important tool in capital formation and in keeping this Nation competitive with other countries around the world.

There has been a limit on the credit to $25,000 plus 50 percent of tax in excess of $25,000. We are gradually extending that over 4 years to 90 percent.

We are also making a very significant extension of the investment tax credit to rehabilitation of industrial and commercial structures. That is extremely important for capital formation; and in a way, that keeps us from financing the exodus of plants from city centers and from the North to the South.

We have given full investment credit for pollution-control facilities, something which I think is extremely meritorious.

Turning to jobs credit, we now have an across-the-board jobs credit provision. It has been very helpful in stimulating the economy.

At this time the unemployment rate has declined to the point where I feel there is no longer a need for a general jobs credit. Instead, we have targeted the jobs credit, so that if you hire some seven categories of needy people, emphasizing the city youths and the other pockets of unemployment, the employer will get a very significant credit for hiring those people. It is a $3,000 credit for the first year of employment and $1,000 for the second year. These are very significant from the point of view of stimulating the economy and targeting the emphasis of that stimulus into areas where there is the greatest need.

I have related the principal small business provisions, but we have added some other things for small businesses. We have increased the first year depreciation allowance for small business in a very meaningful way, expanded special tax treatment for losses on venture capital investments, expanded subchapter S, permitting certain small corporations to elect to be taxed as partnerships. Together with the investment credit changes and tax rate cuts, the bill is a major benefit to small business.

Other business incentives and provisions include an expansion from $5 million to $10 million of the small issue industrial development bond exemption. We are extending the 5-year amortization provision on rehabilitation of low-income housing for 3 additional years. As I have indicated, the overall bill's cost is $4 billion for the business tax cuts, and we think that this is the right amount in this size of a tax package.

On capital gains—and this has received a great deal of attention because of the so-called Steiger amendment—there has been tremendous interest across this land toward somehow liberalizing the treatment of capital gains.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ULLMAN. I yield myself 3 additional minutes.

Whereas the Steiger amendment would have reduced the maximum capital gains tax rate to 25 percent, it was my strong feeling and the feeling of the committee that that was too much, that we somehow had to find a compromise. So what we did is develop a compromise that eliminates capital gains from the so-called minimum tax and from the maximum tax, but also eliminates the 25-percent alternative tax. As a result, the basic rule will be that people include half their capital gains in income, which is a substantial simplification and which has, I think, all of the advantages of equity and simplification. This brings the maximum capital gains to 35 percent, in place of 25 percent under the Steiger amendment. It has widespread support throughout the whole private community.

We have also added a provision for the sale of houses, which has met with widespread approval among the homeowners in this country. We have had a roll-over provision in the law which defers the capital gains tax on the sale of a home if someone reinvests the proceeds in a new home. That we continue in the law. But on top of that we say one can get a $100,000 exemption from the sale of a home, but only once in a lifetime. This, I think, gives the kind of relief that American needs.

We have also an alternative minimum tax on capital gains. There has been a great hue and cry about eliminating the minimum tax. Let me say the existing law is not truly a minimum tax; it is an add-on tax. We added on another layer of tax on certain preference type income that has met with wide disapproval throughout the taxpaying community. Here we have added a true minimum tax. If, after including half your capital gain in income, you still come out without any taxes, we will put a 10-percent tax on the excluded half of the capital gain. This is, we think, putting a true minimum tax on, a very simple-to-administer and very understandable one that has wide support in both the business community and the working community of this country.

Let me say we have also added, by committee amendment, a provision that I did not support and do not now support, but it is part of the bill, that provides an inflation adjustment to capital gains. At some time we are going to have to look at this problem. It is my judgment that this is not the time nor the place to put it into effect, so I will support a move to delete this committee amendment.

Mr. PERKINS. Mr. Chairman, will the gentleman yield?

Mr. ULLMAN. I now yield to my colleague, the gentleman from Kentucky (Mr. PERKINS), the chairman of the Committee on Education and Labor.

Mr. PERKINS. Mr. Chairman, let me first compliment the distinguished gentleman from Oregon (Mr. ULLMAN) for bringing this most important piece of legislation to the floor.

I think I understand the modification on the capital gains as applicable to the sale of homes; but I am wondering whether the modifications likewise apply to all capital gains, such as farmland and everything else, the 35 percent.

Mr. ULLMAN. The capital gains provision that I have been relating under the general provisions, where we take capital gains out from under the minimum tax, the maximum tax, and the alternative tax, applies to all kinds of capital gains. We do not change the definition. It is across-the-board.

Mr. PERKINS. Mr. Chairman, I thank the gentleman from Oregon for that clarification.

Mr. ULLMAN. Mr. Chairman, I reserve the balance of my time.

Mr. CONABLE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this tax bill is revolutionary. It is not redistributional. It does not take from one group of people through higher taxes to give to other people in lower taxes. It spreads its relief across various sectors in society in the same proportion which they each bear the tax burden.

Astonishing as it may seem, only 16 percent of those subject to the Federal income tax pay 60 percent of all of the Federal income taxes collected. Fifty percent of those subject to the tax pay only 6 percent of the taxes. Under the bill reported by the Committee on Ways and Means the individual tax reductions roughly correspond to the tax burdens presently borne by our citizens.

The bill proposes a number of commendable changes to reduce individual income taxes.

It would widen individual tax brackets by 6 percent;

Increase the zero bracket amount—which took the place of the standard deduction; and

The present $750 personal exemption would be increased to $1,000 for each taxpayer and dependent.

As far as they go, these are desirable provisions. They do not go far enough however. Even after benefiting from these reductions, most taxpayers will still be paying tax increases—not cuts. I will touch on the individual cuts in greater detail at a latter point.

Among the most significant provisions of this legislation is the Archer amendment and the other capital formation provisions. The bill would delete capital gains from the list of tax preferences which are subject to the individual and corporate minimum tax and which reduce the amount of individuals' personal services income eligible for the 50-percent maximum tax. A new alternative minimum tax on capital gains, which is collectable only to the extent that it exceeds a taxpayer's regular income tax, would replace the existing provisions of the minimum tax as they apply to capital gains. The bill would also repeal the 25 percent alternative tax on the first $50,000 of long-term capital gain.

In a rational and thoughtful way, the bill would exclude artificial gains, attributable purely to inflation, for purposes of computing capital gains tax liability. This would apply with regard to inflation which occurs after 1979 only. The Archer amendment adopted in committee would adjust the basis of stocks, real property, and tangible personal property upward by the rate of inflation. For eligible assets sold after December 31, 1979, the bases adjustment would reflect the rate of inflation indicated by the Consumer Price Index for the holding period of the asset. However, the adjustment would be made only with respect to increases in the Consumer Price Index occurring after December 31, 1979.

A recent working paper published by the National Bureau of Economic Research states:

> The effective tax on real capital gains has been raised substantially by inflation. . . . This not only overstates the value of real capital gains but, by converting real losses to nominal gains, reduces investors' opportunities to offset capital losses against capital gains.

One study dealing with the latest year for which figures are available, 1973, found that after adjusting stock costs and selling prices for inflation, $4.6 billion of nominal gain would actually have been a loss of $1 billion. And remember that $4.6 billion in gains was subject to tax.

Our rate of capital investment is inadequate; that is not simply my judgment, it is a judgment shared by those at the highest levels of the Carter administration. In "The Government's Role in The Capital Formation Process" W. Michael Blumenthal, the Secretary of the Treasury stated:

> It is therefore quite clear that if we are to move toward a full employment economy over the balance of this decade, investment in productive capacity will have to absorb a higher proportion of our national output. We will have to achieve a better balance in distributing the results of economic growth between current consumption and investing for even greater future growth.

The Secretary of the Treasury, only 3 months ago, in Bal Harbour, Fla. stated:

> After-tax rates of return on capital—reflecting the replacement cost of capital—have declined from around 8 percent in the mid-1960's to between 3 and 3½ percent in recent years. That's a very substantial falloff. . . . We are underinvesting because it no longer pays enough to invest enough.
>
> At the same time that real returns have fallen the riskiness of investment has substantially increased.

I said earlier that the individual tax cuts were desirable as far as they go. But taxpayers now face the devastating blow of what may turn out to be another year of double-digit inflation. If their earnings merely keep pace with prices, "taxflation" will push them into higher brackets which take a larger percentage of their less valuable dollars.

In addition, they are about to be hit with yet another increase in social security taxes from both inflation and the ill-advised tax rate and base increases enacted in 1977. The combined effect of this one-two punch will be to increase taxes by approximately $23 billion next year.

All the proposals before the House, save one, fall far short of offsetting these tax increases.

The committee bill reduces revenues by $16.3 billion, leaving a net tax increase in calendar 1979 of almost $7 billion.

The Corman-Fisher plan would mean about a $5 billion tax increase.

The Vanik-Pickle plan would wallop taxpayers with the entire $23 billion burden of additional taxes next year.

The only proposal before us today which would give taxpayers a real tax decrease next year is the Kemp-Roth plan. Substituting the Kemp-Roth 10 percent individual tax cut for the rate and bracket changes in the committee bill would cut calendar 1979 revenues by about $33 billion—enough to give taxpayers a $10 billion tax cut after the effects of inflation and social security are counted.

A tax cut of the Kemp-Roth size will be the first step toward permanently lowering the tax burden to the historic postwar level of about 18.0 percent of GNP. Currently the Federal Government is taking in over 19 percent of GNP. The committee bill would push that figure up to about 19.7 percent. Kemp-Roth will not get us back to the traditional level right away, but it at least reverses the upward course that we are currently following.

There are many lessons in the proposition 13 fever sweeping the Nation. The most important lesson is that folks have had enough high taxes, enough Government spending and enough inflation. Kemp-Roth will scale taxes back down to their traditional levels. This will force the Federal Government to set priorities and limit spending to essentials. That is the way to fight inflation and balance the budget.

So, I urge you to pass the committee bill with the Kemp-Roth amendment.

Mr. ULLMAN. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio (Mr. VANIK), a member of the committee.

Mr. VANIK. Mr. Chairman, I want to take this time to tell the House how the Tax Act was born. As you know, the Ways and Means Committe was deeply divided on the kind of tax cut we could write. The distinguished chairman of the Ways and Means Committee, AL ULLMAN, was determined to work out a tax bill based on the realities of the situation. The President and his advisers were totally naive about the fundamental legislation process and gave Chairman ULLMAN no help. There were tremendous pressures from the minority on tax relief for those who enjoy capital gains—the so-called Steiger amendment.

Capital gains tax relief became the centerpiece of our committee's work. There were several ingenius architects in and out of Government who provided a helping hand. To lure those concerned with small business taxation, additional exemptions and tax steps were added. The personal exemption was increased to $1,000—from $750—but this was pure hoax because the $35 per person general tax credit was eliminated. The general tax credit was equivalent to $250 in dependency exemption. So far as the dependency exemption is concerned—the increased exemption from $750 to $1,000 was equivalent to the tax credit taken away. In some places, this is called a shell game.

The tax bill we consider today is a prefabricated piece of legislation. It borders on legislative cloning. Its supporters agreed in advance on the provisions of the bill and then proceeded to have hearings to validate their prefabricated decisions. This is not unlike other committee work or many public hearings today. It bears a remarkable resemblance to the early American frontier trials where the defendant was given a trial before he was hung. Well, we had our hearing—we pretended to write a bill—but the work was well done before we started.

The final product was approved by 13 Democrats and all 12 Republicans. The other 12 Democrats were left talking to each other.

I would have to admit that there is an arguable case for some relief for those who make capital gains. The issue is—how much relief should be provided today.

Except for owners of private homes, who enjoys capital gains? Of the 85,611,000 taxpayers, of the 220 million people—not more than 387,000 people per year—less that 0.0045 percent of the taxpayers—less than 0.0001759 percent of the population, less than 888 people each year in congressional district.

If you bring capital gains joy to 888 of your constituents each year, what can you say to your 479,112 other constituents who are left out?

You cannot enjoy capital gains unless you have some risk capital to start with. Except for investment in a home or a farm—most people never have enough to make an investment. How long will it take a citizen earning $17,500 per year supporting a wife and two children to save $5,000 or $10,000 for a capital gain investment?

For 95 percent of the taxpayers, the only hope for a capital gain is a lottery ticket. Perhaps we should exempt gambling gains.

The achievement of capital gains takes great skill. A few people—very few—are very good at it. For most people, a capital gains adventure is a disaster. But for those who have learned to win, it is just fun and games. Have you ever walked by a brokerage office and seen the complacent, happy expressions of those who suffer ticker tape fatigue. It is work—but it is not tiring. It is like the pleasant exercise of pulling a slot machine lever—hour after hour. And how much of the win is sheer luck. If care for the unfortunate is a public concern, should not we place a little tax on good luck.

Now I agree that these profits should not be oppressively taxed. If you hook on the brass ring the capital gains carousel, you deserve something for wear and tear of the brass-ring-hooking-finger. You deserve a free ride once in a while for your good luck. But should you be allowed to take home the carousel?

We could have justified some rate relief—but how can we justify almost complete exemption from the bare-bones minimum tax?

When this capital gains law is fully implemented, we will discover that thousands of our fellow citizens will pay practically no tax on huge fortunes. Our hasty actions of today are the seeds of a bitter harvest. Today's taxpayer revolt will look like a balmy breeze compared with the anger that will be generated by the cruel injustice of what we do today.

A case was certainly made for capital gains relief on the sale of a principal residence. The exemption provisions we make for the elderly could have been extended to everybody—and perhaps the exemption could have been moderately expanded. But was it necessary to provide a $100,000 exemption?

Since 69 million people are tenants, would it not have been fair to give everyone a $100,000 capital gains exemption on any investment or gambling gain. And then would not it have been equitable to provide a refundable credit or payment to the unlucky ones who had no capital to invest and made no capital gains.

The extensive capital gains tax cuts are patently discriminating and unfair to 96 percent of the taxpayers, 80 million of the people who are tenants and 99.99 percent of the people who gamble and seldom win.

My idea of a patriotic American is one who does his fair share in supporting his country. I happen to believe that each should pay according to his means. There is no room for freeloaders or easyriders.

We measure the progress of our society not only by its achievements in science and the arts. We also measure the quality of our civilization by the fairness and justice of our tax laws. This bill in its present form is a backward step we will one day come to regret.

My colleague, JAKE PICKLE of Texas, and I offer an alternative to the whole bill. We propose that we continue the tax laws as they are and reduce the cruel tax of added inflation which will result from this bill. Our proposal would reduce the deficit below $29 billion and constitute the one action we can take as a government to fight the inflation tax which should be our first priority. All of the other tax proposals reduce taxes with borrowed money.

The Ways and Means bill will fly out of this House at a cost of about $16 billion to be borrowed and packed onto the deficit.

This bill will fly out of the House as a carrier pigeon. In ther other body it will be transformed into a huge gilded and overloaded condor with something for everybody and $8 to $10 billion more deficit.

You can avoid this risk by adopting the Vanik-Pickle alternative.

Mr. PICKLE. Mr. Chairman, will the gentleman yield?

Mr. VANIK. I yield to my colleague from Texas.

Mr. PICKLE. Mr. Chairman, I want to compliment my colleague for his remarks. The gentleman is right on target, and when the Vanik-Pickle amendment will be offered today, I hope the people realize that this is the most responsible approach we can take. It renews the tax bill of 1977 in four areas. It makes us responsible, and I think the Members will realize that the snake oil medicine that the others are trying to sell is not going to be the proper approach.

Mr. VANIK. I thank my colleague.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield now?

Mr. VANIK. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I just wanted to bring attention to other categories that are troubled about capital gains. A man wrote me the other day saying, "I have been buying for myself and my daughters every year two shares of stock. I know that some of them I should not be holding, but I am afraid to pay the tax."

A taxi driver wrote and said that he had bought a medallion for $5,000, and it is now worth $50,000. Another man bought a business license. It has appreciated so that he hates to let it go, and there are going to be estate taxes on it when his wife gets it when he dies.

There are others also involved in this. It is not just people with a big bank account. It is ordinary little business improvements, in things like business licenses and taxi medallions.

The CHAIRMAN. The time of the gentleman from Ohio has again expired.

Mr. ULLMAN. Mr. Chairman, I yield 1 additional minute to the gentleman from Ohio (Mr. VANIK).

Mr. VANIK. Mr. Chairman, I want to point out to my distinguished colleague that I know that there are people down the line that make capital gains, but by the figures that have been given to us by Treasury, this boils down to 888 people in every congressional district every year, and I just think that everytime we do something for 888 people, we forget the 480,000 other people that are completely left out.

Mrs. FENWICK. But prudently those people are not selling their assets because of the capital gains tax. That man wants to get rid of some of that stock, but he does not do it.

Mr. VANIK. I would be glad to accommodate the cases the gentlewoman talks about, but this bill takes care of the big gamblers first and does very, very little for those down below.

Mr. CONABLE. Mr. Chairman, with some trepidation because of the devastation the gentleman has wrought, I yield 5 minutes to the monster, the gentleman from Wisconsin (Mr. STEIGER).

Mr. STEIGER. Mr. Chairman, I thank my distinguished colleague, the gentleman from New York, for yielding.

I was afraid I was going to become the so-called gentleman from Wisconsin. I do not quite know how we got into that so-called business.

The trouble with the able, articulate, and witty man who preceded me in the well, the gentleman from Ohio (Mr. VANIK), is that he wants to send not a passenger pigeon and not even a sparrow, but he wants to send a dodo over to the other body where in fact I think it will be made into, whether it is Vanik-Pickle or this bill, an eagle, and my hope is we will pass the bill and send it over there.

My friend, the gentleman from Ohio, has used so many interesting phrases and descriptions of the bill and the effect of the capital gains that I am not quite sure where to begin, but I would suggest that all Members look carefully at the Extension of Remarks section in today's RECORD, where I have put in a sample of the thousands of letters that have come to my office that in fact portray some very different cases than the gamblers the gentleman from Ohio talks about, real cases such as those the distinguished gentlewoman from New Jersey has mentioned, and not wealthy people but people of very modest incomes

who have saved and invested and who today are paying disproportionately high rates of taxes as a result of what was done in 1969 and 1976.

As a matter of fact, rather than the 884—wherever that mythical figure came out of the Vanik mind. I am not sure, but we have to remember there are 6 million returns that claimed capital gains in 1976, which is something more than 884 per congressional district.

Mr. VANIK. Mr. Chairman, will the gentleman yield?

Mr. STEIGER. No, not now.

Mr. VANIK. That was a Treasury figure.

Mr. STEIGER. Well, no wonder it is wrong. Why did the gentleman not tell us that to start with?

And in fact some 50 percent of all of the returns on an adjusted gross income basis, claiming capital gains, had income below $15,000, so the kinds of figures the gentleman from Ohio (Mr. VANIK) and the Secretary of Treasury are tossing around this afternoon are not an accurate portrayal of what was happening under the system today.

Mr. Chairman, I rise in support of the Revenue Act of 1978.

In the sixth century, B.C., a Chinese philosopher is reputed to have said: "A journey of a thousand miles must begin with a single step." Today we are on the verge of taking that first step forward. It is a step down the road to sound tax policy.

Four independent economic analyses of proposals to significantly reduce capital gains tax rates have all come to substantially the same conclusion. All of these studies indicate that lower tax rates on capital gains will stimulate investment, create more jobs, broaden the tax base and increase Federal revenues.

Our tax code is biased against capital. Income is taxed only once, when it is earned. Capital is taxed several times. We tax the income which is used to obtain a capital asset. Until now we have taxed the nominal or inflated gain on the asset when it is liquidated, even if the dollars are reinvested—except for certain housing transactions. We tax the income generated by the original capital asset and the reinvested capital asset. Clearly, today's tax system discourages the formation of capital and there's little wonder that our economy is suffering from insufficient investment, inflation, and slow growth.

In 1969, 698 firms with a net worth under $5 million raised $1.4 billion in capital. In 1975, four firms raised $15 million; in 1977, 30 firms raised $118 million. That is millions, not billions. It is plain that something is wrong. High technology industries and venture investors are convinced that the root cause of inadequate capital is the tax system which taxes capital gains too heavily. These tax rates push investors to other avenues. And between 1969 and 1976, investments in tax-free municipal bonds increased by 52 percent. This is not the product of sound tax policy.

In sum, capital gains taxes are more important as a detriment to investment decisions than they are as a revenue raiser. This is fundamentally clear.

The statistics issued last week regarding unemployment are devastating. The minority groups of this Nation—indeed all Americans—should have the opportunity to find productive employment. But unless there is adequate capital to provide the jobs which they seek, they simply will never be able to enter the mainstream of American life. They will never be productive citizens. And that in fact is what the capital gains debate is really all about. Do we want to ration the pie, or do we want to bake a bigger one?

The economic principles have been underscored once again by an article which appeared in the Wall Street Journal earlier this week. Michael Evans of Chase Econometrics wrote that following the Kennedy-Johnson tax cuts of 1964, after 3 years of virtually no growth in income tax revenues attributable to individuals with incomes in excess of $100,000, actual taxes paid rose dramatically. This was so even though tax rates were significantly reduced. For those individuals earnings over $1 million a year or more, taxes collected actually doubled in the 2-year span.

Reduced capital gains tax rates will increase economic activity, investment, jobs creation and Federal revenue.

None other than the Chairman of the Securities and Exchange Commission, Harold M. Williams, said:

> I believe that legislation (reducing capital gains tax rates) would contribute importantly to meeting our growing capital needs, to added confidence in the continued growth of our nation's economy and to the necessary revitalization of our securities markets.
>
> . . . (I)t would provide increased incentive for securities investment and risk-taking. Second, to the extent that what is characterized as gain reflects the impact of inflation rather than real gain, it would reduce the confiscatory aspect of what is in part a tax on principal rather than appreciation. And in my view, these would be important steps toward drawing forth additional necessary investment capital.

What can I add to that? For too long now we have lived with capital gains tax rates and capital gains taxing mechanisms which are far too complicated and far too onerous. They have placed too great an incentive on spending and too little incentive on capital formation and savings. The result is that our physical plants and facilities have fallen further and further behind.

Indeed, even the Secretary of the Treasury has stated:

> The chief drag on investment, however, is low profitability, an inadequate real rate of return on capital. For this problem one of the important remedies has to be tax policy.

I could not agree more. We simply must move in this direction and the committee's bill is an outstanding first step.

We will hear arguments here today about the ability of high income taxpayers to avoid taxes totally under the committee bill. That is simply not the case. A new alternative minimum tax on capital gains designed to insure that none of the big fish slip through the net is included in the package. It will achieve that purpose and it will do so in a fashion which is fairly straight-forward. That is far preferable to any of the last minute chewing gum and bailing wire proposals put forth here today. In fact those proposals are so complicated that even their sponsors do not, with all due respect, fully understand them.

I urge adoption of the Ways and Means bill.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STEIGER. Mr. Chairman, I would inquire of the gentleman from New York (Mr. CONABLE) if he will yield me some additional time.

Mr. CONABLE. I yield 1 additional minute to the gentleman from Wisconsin (Mr. STEIGER).

Mr. STEIGER. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, I wonder if I could ask a question of the distinguished chairman of the Committee on Ways and Means, the gentleman from Oregon (Mr. ULLMAN)?

Mr. ULLMAN. If the gentleman will yield, certainly.

Mr. STEIGER. I refer to section 314 of the bill which would extend the investment tax credit to rehabilitation expenditures. The legislative language and the committee report unfortunately leaves some doubt as to what is meant by "rehabilitation". Assuming, Mr. Chairman, that an expenditure on property to improve a building's usefulness complies with the specific requirements of section 314, namely, that the building has been in use for 5 years or more, no current credit has been taken or allowed within the last 5 years, the property—or the additions or improvements to the property—has a useful life of at least 5 years and the purpose is to upgrade the usefulness, safety, or the economic operation of the building. Would such an expenditure be considered rehabilitation and eligible for the credit?

Let me give you a specific situation. I refer to the facts involved in Revenue ruling 77-362. In this case, the taxpayer purchases and installs a fire protection system in a building that was used in the taxpayer's business. The system is designed to detect fire at any point in the building, report it electronically to a fire panel and, through a computer, initiate safety measures including elevator recall, turning off fans, stairwell door unlocking and fire department notification. In this case, the IRS ruled that this system is a structural component of the building and does not qualify for investment credit purposes. Assume further that the system is installed in a commercial building that has been in use for 5 years, that the useful life of the system is more than 5 years and that no rehabilitation credit has been taken or allowed for 5 years. It is chargeable to capital account. This is the only addition or improvement to the building.

Would this investment be a qualified rehabilitation expenditure and eligible for the investment credit under the bill?

The CHAIRMAN. The time of the gentleman has again expired.

Mr. CONABLE. Mr. Chairman, I yield an additional half minute to the gentleman from Wisconsin.

Mr. ULLMAN. Mr. Chairman, if the gentleman will yield, the answer is yes. We are assuming that the expenditure meets all of the specific criteria required by section 314. The principal question is whether the building has been rehabilitated and whether the expense is incurred in connection with the rehabilitation of the building. The addition of the fire detection system is a modernization and upgrading of the usefulness of an existing structure. The addition of the system is more than a minor improvement, and I would expect that the expenditure for a small facility could amount to $25,000 or more and for a larger building in excess of $100,000. Clearly, the committee intends that this would be a rehabilitation expenditure and eligible for the investment credit.

Mr. STEIGER. Mr. Chairman, I thank the chairman, the gentleman from Oregon (Mr. ULLMAN) and, Mr. Chairman, I thank the gentleman from New York (Mr. CONABLE) for yielding to me.

Mr. ULLMAN. Mr. Chairman, I yield 3 minutes to the gentleman from Virginia (Mr. FISHER).

Mr. FISHER. Mr. Chairman, I simply want to highlight the features of the Corman-Fisher amendment which will be offered to the committee bill at a later time. My colleague, the gentleman from California (Mr. CORMAN) will go into more details on this.

Mr. Chairman, it must be remembered that this is an amendment to the committee bill. Most of the features in the committee bill would be untouched by the Corman-Fisher amendment.

The amendment we are planning to offer does three things, really:

First, it increases the total amount of the tax cut by approximately $2 billion from a little over $16 billion to a little over $18 billion.

Secondly, it would distribute the tax reductions to individuals somewhat differently from the committee bill.

To summarize that, it would offer smaller reducations to the high-income taxpayers of over $50,000 of income a year and offer more of a tax break to the low- and middle-income taxpayers. The benefits would go principally to the lower income taxpayers but would offer larger tax reductions to all taxpayers up to $50,000.

The third thing that our amendment would do would be to alter the way the capital gains tax reduction is done. In overall amount, our amendment would reduce the capital gains tax by around $1.4 billion as compared to a reduction of $1.8 billion or $1.9 billion in the committee bill. The differences, as the Members will see, are not that great; but they are significant.

Again, the essence of our amendment as it relates to the minimum tax on capital gains would be to provide a progressive scale for those who would pay this tax, such that the percentage would go up to 17.5 percent for the really big gainers, compared to 5 percent under the committee bill. The moderate gainers would not be treated significantly differently.

Mr. Chairman, those are the three principal differences that we propose in the committee bill. In one respect, they are not major; in another, they are significant.

The CHAIRMAN. The time of the gentleman from Virginia (Mr. FISHER) has expired.

Mr. ULLMAN. Mr. Chairman, I yield 2 additional minutes to the gentleman from Virginia (Mr. FISHER).

Mr. FISHER. Mr. Chairman, I thank the gentleman.

The significant part is that the advantages of Corman-Fisher would be weighted more heavily to the low- and middle-income taxpayers.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. FISHER. I am glad to yield to the gentleman from New York.

Mr. CONABLE. Mr. Chairman, I thank the gentleman for yielding.

I have reference to the Fisher-Corman amendment, which is allegedly a meld of the two proposals which the gentleman in the well and the distinguished gentleman from California (Mr. CORMAN) offered in the committee.

I am quite uncertain about the full effect of the apportionment-of-deductions provision.

I would like to ask the gentleman if it is not possible in certain situations for this measure to affect a person's mortgage-interest deductions, property-tax deductions, operating losses, casualty losses, and other personal deductions in such a way as to jeopardize the taxpayer's full benefit of the regular 50 percent capital gains deduction. The apportionment-of-deductions provision is an extremely complicated one, and I am not sure that I understand it fully.

Mr. FISHER. It is complicated, as most of the versions of capital gains taxation which we have dealt with are. It is conceivable to me that what the gentleman says could result is a very limited number of cases, but it is not likely. The Corman-Fisher amendment, of course, does not reduce any of a taxpayer's itemized deductions. It merely allows the special capital gains exclusion to apply only to capital gains in excess of itemized deductions.

Mr. CONABLE. I thank the gentleman for his response.

The CHAIRMAN. Does the gentleman from New York (Mr. CONABLE) desire to yield time?

Mr. CONABLE. Mr. Chairman, I yield 5 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Chairman, five times in the past 10 years the Congress has followed the lead of the Ways and Means Committee by passing tax cuts. Each of these cuts has been concentrated in low income groups.

Now for the first time since I have been here, the committee is bringing up a bill that cuts taxes across the board. H.R. 13511, known as the Jones bill, gives proportionate tax cuts to all taxpayers. Those previous tax cuts had the effect of increasing the progressivity of the tax tables and redistributing income. The committee does not ask you to undo those 10 years of income redistribution, but it is asking this year to hold the already progressive rate schedule about as it is.

This bill, in its evenhanded, across-the-board cuts, gives some real relief for middle-income taxpayers for the first time. That is the first major new policy direction.

The second new direction is that this bill offers the first incentives to capital investment since the creation of the investment tax credit 15 years ago.

This bill contains the first half of the well-known Steiger amendment. It reduces the maximum capital gains tax from a confiscatory 49 to 35 percent. It ought to be reduced to 25 percent, but that perhaps must wait for a later day.

The benefits of the reduced capital gains tax are also well known. It will stimulate capital investment, create new jobs, improve productivity, and make us more competitive with our international rivals.

The process which brought this bill to the floor is in some ways more interesting than the provisions of the bill itself. The President's ill-fated tax bill was pulled off the committee's calendar at his own request in mid-April. For 3 months the committee waited patiently and tolerantly for the White House to put its act in order. Apparently it could not.

Even when we began mark up several weeks ago, the administration had no recommendations except its original bill which it had asked us not to consider.

After about 4 months of not having any tax policy, the White House, Treasury, et cetera, was galvanized into action. Two days before this scheduled debate, the mountain labored and brought forth a mouse—the Blumenthal bill, more recently described as the Corman-Fisher substitute. But, not to worry, the Treasury will probably oppose its own alternative when the bill is sent to the Senate

Basically it modifies the committee bill in several ways. It puts a little more money into the individual tax cuts. But if you accept the argument that larger cuts are needed, I would recommend you vote for the Kemp-Roth bill which is considerably larger.

It also puts more tax cuts in the lower brackets reversing the policy agreed to by two-thirds of the Ways and Means Committee. It is another income redistribution plan. As such, it lacks the incentive of the committee bill.

The individual tax cut differences are simple. The committee bill gives a personal exemption of $1,000 per taxpayer or dependent. The Blumenthal bill gives only a tax credit of $100. Our constituents will understand that part.

Finally, and worst of all, it reverses the thrust of the Steiger amendment by providing a larger minimum tax which is almost exclusively a capital gains surtax. The Treasury in trying to penalize shelter deductions has invented a very complicated tax not well understood by anyone.

But it is easy to understand that it also penalizes casualty losses which have nothing to do with matters. It is a sort of shell game which gives you deductions—maybe—sometimes—and will discourage capital investment.

It is especially harsh on farm families who occasionally have large loss years and occasionally have large gains from the sale of inflated property. Farmers will not be the only victims, but they may be the worst victims.

The Blumenthal amendment ought to be rejected. We should preserve and pursue the new tax policy directions presented to us by two-third percent of the Ways and Means Committee. Then we should expand the individual cuts by passing the Kempt amendment. That will be a good day's achievement.

The Senate seems even more committed to provide capital investment incentives than this House is. We have every expectation that the Senate will even improve what is now a fine piece of legislation.

Mr. Chairman, I urge the defeat of the Corman-Fisher-Blumenthal amendment. I urge that the bill be passed and that the Kemp amendment be adopted on the motion to recommit.

Mr. ULLMAN. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from California (Mr. CORMAN).

Mr. CORMAN. Mr. Chairman, as the Members know, there will be in order an amendment to the committee bill offered by the gentleman from Virginia (Mr. FISHER) and myself. It amends the bill in two respects, but in two respects only. We want to make it clear that it touches nothing else in the bill, because there seems to have been some confusion about whether other pieces of the bill would be changed by the Corman-Fisher amendment.

The Corman-Fisher amendment deals with the size and the distribution of the individual tax cuts, and it deals with the minimum tax on capital gains.

Looking first at the size and distribution of the individual cuts, it adds $2 billion to those cuts and increases the total package from $16 bllion to $18 billion. Additionally it redistributes $1 billion of the cuts, taking them from taxpayers who make over $50,000 and distributing them primarily to taxpayers who make less than $15,000.

I know we have had some discussion about how tax cuts have tended to favor people in the lower end of the economic ladder. That in one sense is true if we look at it on a percentage basis, but if we look at it in numbers of dollars in tax relief given, we have always favored people in the upper half of the income brackets. We do now, and we do even under the Corman-Fisher amendment. But we do give a better break to people who make below $15,000. That is the lower half of the people in this Nation who pay income taxes. The median joint return is $15,000. Of course, when we give relief in that area, it involves a rather substantial amount of tax dollars, but let us look at the equity of it.

We talk about who inflation hurts the most. Inflation hurts all of us. I suppose the more money you have, the more you have to spend and the more you will be hit when taxes go up; but people who have no discretionary spending, people who must spend every dime they get to take care of their families, to buy food, clothing and shelter, inflation hurts most of all.

I suggest to you that they need a little bit better break than they are getting under the committee bill. We propose to give them that.

We talked about the maximum tax on capital gains. We agonized over what to do about that for a long, long time. The gentleman from Wisconsin (Mr. STEIGER) had a proposal that in some ways was not really too bad.

The gentleman from Oklahoma (Mr. JONES) made it better. They both dealt with the maximum tax and the minimum tax on capital gains and most people will concede that the maximum tax is presently too high. It is only too high for a handful of people, but it is too high. The bill cuts it back to 35 percent. We do not touch that. We do not touch the rate on capital gains for people who pay ordinary capital gains taxes; but we suggest that when people couple capital gains with sheltering of their taxable income, that there ought to be some point below which they cannot go. The Steiger proposal and the original Jones proposal cut the minimum capital gains tax to zero.

Then, the committee, at the 11th hour, agreed to a 5-percent minimum tax. The fact of the matter is that there is in place now a minimum tax of 7½ percent on capital gains. It never can fall below that. The committee came up with a slightly different version in which it says you cannot fall below 5 percent. When you look at people with incomes of half a million or a million dollars, not in gross wealth, but in sheltered annual income, what is fair to ask them to pay when you are asking people with $15,000 a year to pay $400 or $500 or $600 of it in taxes?

I suggest it is a better approach to have a variable minimum rate, as well as a variable maximum rate.

Now, the variable maximum rate is from 7 percent to 35 percent. It graduates from $20,000 to $400,000. You get to $400,000 before you get to the 35 percent rate. The minimum tax we suggest is 3½ percent at $10,000, going up progressively to 17½ percent at $800,000. Now, anybody who has a capital gain of $800,000 ought to pay 17½ percent of that in income taxes. That is the total income tax they pay. They have sheltered whatever else they have, but it just is not fair to expect people in the middle-income brackets to pay a true tax of 20 or 25 percent, without asking people with millions in tax sheltered capital gains to pay more than 5 percent.

The CHAIRMAN. The time of the gentleman from California (Mr. CORMAN) has expired.

Mr. ULLMAN. Mr. Chairman, I yield 3 additional minutes to the gentleman from California (Mr. CORMAN).

Mr. CORMAN. Mr. Chairman, it is not fair to say to the average professional man or laborer, "You are going to make from $15,000 to $50,000 and you are going to have to pay 20 to 30 percent of that in taxes," but say, "If you get up into the $1 million or $2 million bracket and if you manage your affairs so that you can artificially shelter your income, we will only charge you a 5-percent rate."

Seventeen percent is fair for this amount of income.

It is said that this gets very complex. When you get into sheltered income, it is complex; but this amendment does not add any complexity to it. You have already read in the complexity by sheltering your income, because all we say is that if you are going to shelter your income you cannot take credit for that piece of it when you cut your capital gain in half.

So what we are really saying is that on a capital gain your tax will never be more than your ordinary rate on half of it and it will never be less than your ordinary rate on a fourth of it. It is not complicated at all. It will make it possible for a few people who have very large incomes to make a little more contribution toward the cost of Government.

Mr. Chairman, I urge support for the amendment when it is offered.

Mr. GRADISON. Mr. Chairman, will the gentleman yield for a question?

Mr. CORMAN. I yield to the gentleman from Ohio.

Mr. GRADISON. Mr. Chairman, it is my understanding the amendment which the gentleman in the well and the gentleman from Virginia (Mr. FISHER) are presenting represents the current recommendation of the Secretary of the Treasury; is that correct?

Mr. CORMAN. That is correct.

Mr. GRADISON. Mr. Chairman, can the gentleman give us any information as to whether, in the event this body were to adopt this amendment, that would continue to be presented as the recommendation of the administration when this bill reaches the other body?

Mr. CORMAN. Mr. Chairman, the administration offered a tax reform proposal which it still supports. It is very different from the committee bill even as amended by the Corman-Fisher amendment.

The Corman-Fisher amendment is merely an amendment to the omnibus committee bill. The committee bill covers a lot of things. Some of the things in there the administration supports, and some it opposes.

I assume the position of the administration would be the same on the Senate side. If the Senate passes something comparable to the committee bill and this issue is presented, that would definitely be the position of the administration. If the Senate adopts the original Carter proposal, obviously that would be its recommendation over what the House would do. That would be my guess.

I have not conferred with the Secretary on this, but I do believe the President still advocates all the reforms in the original proposal of the administration.

Mr. GRADISON. Mr. Chairman, if the gentleman will yield further, I can only conclude from the gentleman's com-

ments that we are really not sure whether the proposal he has made bears the stamp of approval of the administration or not. I really cannot read the gentleman on this, and I do not hear him loud and clear. Does it or does it not?

Mr. CORMAN. Let me suggest this to the gentleman: If we could have gotten it in order and proposed the President's original tax reform proposal, that would have been his first choice. There are limited options at the moment.

The CHAIRMAN. The time of the gentleman from California (Mr. CORMAN) has expired.

Mr. FISHER. Mr. Chairman, I yield 1 additional minute to the gentleman from California (Mr. CORMAN).

Mr. CORMAN. Mr. Chairman, if I may continue, the present options, as I understand it, are Vanik-Pickle, the committee bill, the committee bill as amended by Corman-Fisher, or the Republican motion to recommit. There is no question that the administration, among those options, strongly supports the committee bill with the Corman-Fisher amendment.

Mr. GRADISON. Mr. Chairman, I thank the gentleman.

Mr. STEIGER. Mr. Chairman, I yield 10 minutes to the gentleman from Texas (Mr. ARCHER), a distinguished member of the Committee on Ways and Means.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. ARCHER. I am happy to yield to the gentleman from Illinois.

Mr. HYDE. Mr. Chairman, I am particularly concerned about the repeal of the deduction for State and local gasoline taxes, penalizing those commuters who must use an automobile for their employment.

The administration has argued that repeal of the deduction will foster national energy objectives, but in reality, it amounts to an increase in the price of gasoline.

Repeal of this deduction will have a particularly devasting impact on the residents of the six-county area in Illinois who were hit late last year by the imposition of an additional 5-percent regional transit authority gasoline tax. The residents of the six-county area—Cook, Lake, Kane, DuPage, Will, and McHenry—now pay the highest motor fuel taxes in the United States. Cook County residents, for example, now pay as high as 20 cents tax for each gallon of gasoline they purchase. Their only meager consolation was knowing they would have the option of deducting State and local gasoline taxes. Of course, even this was no help to those who do not itemize their deductions. The administration and this Congress will take this option away from those who itemize.

I disagree with argument that repeal of the deduction will have a significant energy savings impact. A recent survey was taken by the Midwest Petroleum Marketers Association and the Illinois Petroleum Council of 813 service stations in the six-county area, or approximately 12 percent of the total, covering retail gas station outlets only. The survey shows that the RTA tax has generated a reduction in revenue, but not a reduction in usage.

With the price of a gallon of gasoline in the Chicago area hovering around 80 cents, consumers are simply purchasing their gas outside the six-county area. The survey shows that sales in the Chicago area dropped by 13.5 million gallons in a 4-month period after imposition of the RTA 5-percent tax. The drop in sales shows a corresponding drop in revenues to the State of Illinois and municipalities in the six-county area because part of the gasoline taxes includes a 1-cent Cook County tax, 1-cent home rule municipality tax, and a 5-percent State and local sales tax. Obviously, when gasoline purchases drop because of high taxes, revenues to the State and municipalities also drop. Motor fuel taxes normally paid to the State of Illinois via fuel purchases are now going to other States.

My constituents, and over half the population of Illinois, are now paying the highest motor fuel taxes in the United States. For those residents of the RTA area who are not able to use mass transit systems, it means they must pay for the RTA with nothing in return except a higher price for each gallon of gasoline.

Illinois residents and others throughout the country who itemize their income tax deductions are about to have their taxes raised by an estimated $1.15 billion next year, because of the mistaken notions that repeal will foster national energy objectives and help achieve tax simplification for itemizers. It is an unfair penalty to attach to those who must use their automobile for getting to work, and coupled with the repeal of other deductions, places more taxpayers in higher brackets.

This unwise trend in the continuing erosion of deductions places people in higher tax brackets, and, insofar as the removal of the deduction for health insurance premiums is concerned, seems to be at odds with a stated major concern of this administration. We are daily bombarded with descriptions of the need for comprehensive national health insurance, and yet, by removing the tax deductions for health insurance premiums we make it harder for people to maintain this coverage.

In other words, where we do not have a problem, let's create one.

As we withdraw the gun of tax reform from its holster, we shoot ourselves in the foot.

Mr. ARCHER. Mr. Chairman, at the outset I would like to personally compliment the chairman of our committee, the gentleman from Oregon (Mr. ULLMAN). This has not been an easy bill to craft, and the gentleman has been eminently fair to all members of the committee of all persuasions.

It is my belief that whereas it is not a perfect bill—and the gentleman from Illinois (Mr. HYDE) just pointed out what in my opinion is one of its defects—it is as a package a new plan for this country that will be highly beneficial to the people in the years ahead. The committee amendments that were adpoted by a bipartisan vote, and they have done nothing but add to the value of this legislation.

There is another defect in this bill which does not in my opinion outweigh its good but which I think should be brought to the attention of the committee, and that is the elimination of the deductibility of State taxes on gasoline, which impacts unfairly across this country and particularly on the individual who has to drive long distances to work and has no access to mass transit. From here on forward, if this legislation passes, he will be denied the opportunity to especially itemize that as a tax deduction.

One of the major issues in this bill before us relates, however, to an amendment which I offered in committee. It was adopted—and I stress this fact—by a strong bipartisan vote, by a majority from both sides of the aisle—13 Democrats and 8 Republicans. Even more importantly, the arguments raised against the issue then and now are not substantive arguments about the merits of the proposal. The reliance on emotion alone by its detractors gives me concern that the amendment is misunderstood by my colleagues who oppose it.

In simple language, all my amendment does is to halt the taxation on inflation as capital gains are concerned, and it is prospectvie only, beginning in 1980.

The Federal Government would be limited to taxing only that part of a gain that represents a real increase in value—not the increase that results from inflation without an increase in purchasing power.

The method used to eliminate that taxation on inflation is an adjustment of the basis of certain capital assets for the rate of inflation established by the Consumer Price Index. It applies to real estate, such as a taxpayer's home, to corporate stock, and to tangible personal property as already defined in the code. The basis adjustment would reflect the rate of inflation beginning only after December 31, 1979.

Mr. Chairman, it is a fair and equitable proposal, in my opinion, the element of the bill that has the greatest value, in equity and fairness—and one which represents a greater step forward in bringing greater integrity into the tax code. It is the only way to bring equity to those purchasers of property who hold that property for differing periods of years. An individual who buys an asset for $1,000 and holds it for 10 years, at an annual inflation rate of 7 percent, would realize 100 percent compounded inflation over that 10 years; and if he sold it for $2,000 he would have no real increase in his purchasing power, yet he would be taxed on $1,000 of capital gains. Another individual who bought a piece of property for $1,000 and held it for 1 year and 1 day and sold it for $2,000 would be taxed again on $1,000. With inflation of 7 percent, his real income would be 93 percent, yet he would be taxed the same as the purchaser who had no real income. The only way to treat individual

purchasers at different periods of time equitably is to index the cost basis.

Now, you can argue all you want to about what the rate of tax ought to be on capital gains—and there are different opinions among the Members of the House—but most certainly the tax should be only on real gain. An argument against the amendment is, "Well, we ought to study it." We have studied this principle for years in the Committee on Ways and Means. We have heard testimony from numerous witnesses. The time has come to act.

Another argument might be, "Well, we cannot do it for capital gains if we do not do it for everything." Well, capital items held for a long period of time are clearly distinguishable from other types of income. I would also say that if we took this position year after year, we would never amend the code because the argument would be that, although this amendment is attractive, we are not doing something else that needs correction in the code, and we would take no action at any time. I say it is better to light one candle than to curse the darkness.

Revenue impact might be an argument against it. The Treasury has reached out into the air and has drawn a figure that it will cost $3 billion in revenue. But they say that cost will only occur in the year 2000. They make no allowance whatsoever for increased economic activity. Under any projection there will be no revenue loss in 1979. There will be virtually no revenue impact in 1980, under the worst projections. If there is no inflation in the years ahead, there will be absolutely zero revenue impact. If there is greater inflation, there is a greater need for this amendment. How does it impact on various income brackets. It impacts more heavily to benefit those people under $100,000 of annual income than it does over $100,000. This is borne out by an article by Marty Feldstein in the Wall Street Journal, where he clearly portrays this. And he also states that in the past decade effective tax rates have increased so dramatically that investors in stocks and bonds now pay tax rates of nearly 100 percent and sometimes over 100 percent on their real gains. This is not equitable.

Opposition to this amendment is not a voice of the majority of the people of this country, as was evidenced by many recent polls run nationally by the National Polling Institute. It is, rather, a concept which has received broad-based bipartisan support both in Government and private sectors alike.

In 1976, the American Bar Association recommended the tax code be amended to step up the basis of certain noninventory property for purposes of measuring gain on the disposition. My amendment to the bill implements that concept. It is a concept which has earned support from across the wide spectrum of political philosophies represented in this Chamber because it makes sense, because it is fair, and because it is needed.

In the fall, 1977, edition of Tax Lawyer, leading authorities on this subject wrote:

> The failure to index adversely affects rates of return on ivestment, and thus the rate at which people set aside a part of their incomes to be invested as capital. It does so in essentially two ways: The first has nothing to do with taxes . . . The second is a tax consequence and flows from the fact that inflation causes the real tax rates to increase in a concealed fashion, thus lowering returns and making investment less attractive.

A key figure in this administration has commented on the issue. When he appeared before a Senate Finance Subcommittee last June, the chairman of the Securities and Exchange Commission, Harold Williams, testified in support of lowering capital gains taxes. In part, he said:

> At present, an investor who has held securities for a significant period of years may well find that, upon sale, he is subject to a substantial capital gains tax despite the fact that his so-called "gain" may actually represent an erosion in capital measured in constant dollars. Realistically, capital gains taxes on nominal gains during a period of inflation are a confiscatory tax on capital, not a tax on profit.

If we are to provide investment incentives then we simply must not permit ourselves to continue to perpetuate a confiscatory tax on invested savings. That is what the amendment seeks to undo.

The basic issue is whether we should actually tax inflation. If that is what you want to do, you can clearly express that intention by voting against my amendment. But if you feel as I do that there is simply no way one can justify that kind of tax to the American public, you must vote to keep my amendment in the bill.

If this Chamber can bring itself to tax inflation, perhaps it is only a matter of time before we are debating a tax on the air people breathe. Maybe that's all that will be left when we have managed to tax so many other things that we literally run out of items to tax. There is something radically wrong when Government profiteers from high inflation while individual Americans suffer.

It is bad enough that taxation eats away unmercifully at the dollars our citizens earn. We cannot justify that. But to go the next step and tax false increases in the value of those earnings brought about by inflation is unthinkable.

Our economy can no longer tolerate this outmoded and inefficient system of taxation.

Perhaps Henry Sweeney put it most succinctly when he said:

> The truthfulness of accounting depends largely on the truthfulness of the dollar—and the dollar is a liar.

It is my considered judgment that there is enough integrity, compassion and courage in this Chamber to stand up for what is fair and equitable. I submit that it is time we stopped robbing the people twice through the insidious hidden tax of inflation and the tax on inflation.

Those who agree with me will support this amendment.

Computer model studies show that if this amendment is adopted, it will have a dramatically beneficial effect on the economy of this country, greatly increasing employment, greatly increasing revenues into the Federal Treasury, greatly increasing real spendable wages. That is what we should seek in the United States of America. We should not tax inflation, and a vote for the amendment says for once and for all that there will be equity in the country, that the Federal Government will not be the only profiteer in on rising inflation.

Mr. Chairman, I certainly urge its adoption.

Mr. FISHER. Mr. Chairman, I yield such time as he may consume to the gentleman from Connecticut (Mr. COTTER).

Mr. COTTER. Mr. Chairman, within the tax bill H.R. 13551 there is a provision that I offered in the Ways and Means Committee. This amendment extends the investment tax credit to the rehabilitation of existing business structures. This proposal is a novel effort to assist our economically depressed towns and cities.

The extension of the investment tax credit to existing business structures is the first time that this credit has been used for anything besides machinery. It is another attempt to use the Internal Revenue Code to meet socially desirable goals.

I must point out immediately that this proposal has no "triggering mechanism," and therefore has no regional bias. Existing buildings or structures, including retail stores and warehouses, are eligible wherever they are located if they meet the criteria in the amendment.

There is no provision, however, for residential buildings. The purpose of my amendment, as I mentioned, is to encourage businesses to continue within our older cities and towns. By focusing this credit on rehabilitation I have avoided providing incentive to move from our older population centers. If businesses take advantage of this credit, it should increase the economic vitality of our inner cities. Let me briefly explain my amendment.

Expenditures made July 26, 1978 or after would be eligible for the investment credit.

Also, 75 percent of the existing walls must be retained in place during the rehabilitation process. This is to prevent new construction under guise of rehabilitation.

The building must be in service 5 years from new construction or prior rehabilitation. However, my amendment does provide for piecemeal rehabilitation wherein owners can do walls one year and floors the next.

The installation of rehabilitation parts and equipment must have a useful life of 5 years or more. This, too, is designed to prevent abuse.

In addition, there is a limitation requiring the taxpayer who claims the tax credit to actually use the building after the rehabilitation is completed.

Finally, my proposal treats all rehabilitation components as new property and therefore there is no limitation on the amount that can be claimed as long as all of the conditions are met.

For the benefit of the Members I am including a copy of the language in

the bill and the committee report outlining this provision in greater detail.

Mr. FISHER. Mr. Chairman, I yield 5 minutes to the gentleman from Arkansas (Mr. TUCKER).

Mr. TUCKER. Mr. Chairman, I rise in support of the committee bill, as I hope it will be amended by the Corman-Fisher amendment. The committee bill, if amended by Corman-Fisher, will provide more relief for middle-income taxpayers than the committee bill, and matches very favorably even the Kemp-Roth proposals that I have seen.

For example, the $20,000, $25,000, and $30,000 bracket ranges of taxpayers, under either the committee bill or Corman-Fisher amendment, will get a tax increase next year when we consider both income tax and social security tax. But, the Corman-Fisher amendment provides less of a tax increase for those in the $20,000, $25,000, and $30,000, range, and provides more of a tax cut for individuals of $40,000 and $50,000 income as well as for those under $20,000.

It is only after taxable income passes the $50,000 income level that the committee bill provides more relief than the Corman-Fisher amendment.

I have heard a lot of talk this morning to the effect that the committee bill provides relief for middle-income taxpayers. I am curious how my colleagues who suggest that define a middle-income taxpayer. If one's definition of a middle-income taxpayer is an individual who is earning over $50,000 per year, then by all means I have to agree that the committee bill provides more relief. But, it is a fact that if we are interested in providing tax relief for someone with $50,000, $40,000, $30,000, $20,000, $15,000, or $10,000, income Corman-Fisher is the vote that provides relief. I think that is the kind of vote that my colleagues would like to cast.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. TUCKER. I yield to the gentleman from New York.

Mr. CONABLE. Is it not true that the Corman-Fisher amendment was designed after the committee had disgorged its proposal, specifically for the purpose of defeating the committee bill? The relationship of the two bills would be quite different if the committee bill had included an additional $2 billion of individual tax cuts, as the Secretary of the Treasury decreed for the Corman-Fisher version. I do not by that statement mean to imply that that is the only issue in the Fisher-Corman measure.

Mr. TUCKER. I understand. It seems to me, it is neither here nor there whether it was developed in that manner. The fact of the matter is if we want to provide relief for what I consider middle-income taxpayers, and that is $50,000 down, we ought to vote for the Corman-Fisher. On tax rates—and it cannot be disputed and I am sure my friend, the gentleman from New York, will not dispute it—for the $50,000 and $40,000 and $30,000 and $25,000 levels, the Corman-Fisher provides a better break than the committee bill.

Mr. CONABLE. But were the Kemp-Roth amendment to be adopted, it would be better.

Mr. TUCKER. But my friend is arguing for the committee bill.

Mr. CONABLE. All I am saying about the committee bill and Corman-Fisher, is if the committee bill had involved a much larger tax cut, of course we would have more relief for the people in the areas the gentleman is talking about.

Mr. HOLLAND. Mr. Chairman, will the gentleman yield?

Mr. TUCKER. I yield to the gentleman from South Carolina.

Mr. HOLLAND. I have some concern. I heard the gentleman from California (Mr. CORMAN) say this may concern the taxpayer who had no discretionary income, and now the gentleman from Arkansas is telling us this is for people between $20,000 and $50,000.

Mr. TUCKER. No, quite the contrary. For $50,000 and down, everyone $50,000 down gets a better break under Corman-Fisher than the committee bill and a much better break if they are under $15,000.

Mr. HOLLAND. As the gentleman was going down, I wanted to ask how many taxpayers are there who have no discretionary income and how much of a break will they get if that is the reason for passing this additional $2 billion?

Mr. TUCKER. All I would say to the gentleman is 90 percent of the taxpayers in my district file income tax returns reporting taxable income of $25,000 or less.

Mr. HOLLAND. You are certainly better off than the people in the district of the gentleman from Ohio (Mr. VANIK). He only has 880 people who are doing well.

Mr. CORMAN. Mr. Chairman, will the gentleman yield?

Mr. TUCKER. I yield to the gentleman from California.

Mr. CORMAN. Mr. Chairman, I thank the gentleman for yielding.

My point was that between $15,000 and $50,000, the Corman-Fisher is about the same as the committee bill. We are substantially different at the figure from $15,000 down. We do shift $1 billion in reductions from those over $50,000. But the place we make a substantial percentage change is in incomes below $15,000, and generally I consider those people to have minimum discretionary incomes.

Mr. TUCKER. Mr. Chairman, I reclaim my time.

At any rate lower tax relief for those individuals with incomes under $50,000 is one problem I see with the committee bill.

The second problem is its treatment of capital gains. The current tax on capital gains is too high. That is why I voted in the committee repeatedly for lower tax relief on capital gains, but I believe in capitalism for everybody and not just capitalism for those in the 70-percent income bracket and up.

I regret to say that neither Corman-Fisher nor the committee bill really offers any significant incentive for capital gains for individuals who are not in the 70-percent tax bracket. I would like to see a capital gains incentive that does something for the fellow who makes $12,000 or $15,000 a year or the man who has a shop with $35,000 or $40,000 a year and who would like to get a break on his investment in the stock market or a new plant or research and development or industry. The committee bill does not provide for that. That is regrettable in my judgment and I would hope we consider capital gains relief, such as I offered in the committee to tax only 30 or 40 percent instead of 50 percent of a gain.

Mr. GEPHARDT. Mr. Chairman, will the gentleman yield?

Mr. TUCKER. I yield to the gentleman from Missouri.

Mr. GEPHARDT. Mr. Chairman, I thank the gentleman for yielding and I commend him for his statement. I would like to underline the remarks he made about the size of this tax cut and to whom it goes. I would like to emphasize the importance of the Corman-Fisher amendment and point out that it intensifies the amount of money that is going to people who make $50,000 or less. When we are taking into account the social security tax increases, it is very easy to see the Corman-Fisher approach leaves those taxpayers much better off than does the committee bill.

I commend the gentleman for his statement.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. TUCKER. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, I would like to ask the gentleman if he has taken into account a phenonmenon that occurred in 1963, 1964, and 1965?

At that time the top income tax rate I think in 1963 was 91 percent.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ULLMAN. Mr. Chairman, I yield 1 additional minute to the gentleman from Arkansas, Mr. TUCKER.

Mr. BROWN of Ohio. If the gentleman will yield still further, the top tax rate was 91 percent in 1963, then it dropped to 77 percent in 1964, and finally to 70 percent as the top rate in 1963. As a result, people with high incomes were able to come out of their tax shelters in massive numbers, and with massive amounts of dollars, and the actual taxes paid in subsequent years by people in higher income tax levels was higher in terms of total dollars, and the percentages of taxes paid by those people was also higher.

I have this difficulty in connection with the Corman-Fisher (nee Blumenthal) tax proposal: it would seem to me that there is a loss to the Federal coffers if you do not cut the tax rate at the higher income levels. The people who have the discretionary money and would otherwise keep much of it in tax shelters, would not come out of such shelters. Isn't that correct?

Mr. TUCKER. Corman-Fisher cuts rates at all levels.

Mr. BROWN of Ohio. The evidence is historical, I would suggest.

Mr. TUCKER. The following table demonstrates the results of the committee bill as compared with the Corman-Fisher amendment.

NET CHANGE IN 1979 TAXES OVER 1977 TAXES (INCOME AND SOCIAL SECURITY TAXES COMBINED) FOR A FAMILY OF 4

	Wage and salary income								
	$5,000	$10,000	$15,000	$20,000	$25,000	$30,000	$40,000	$50,000	$100,000
Committee bill ($16,300,000,000)	+24	−34	−35	−115	+207	+135	−47	−215	−485
Corman-Fisher ($18,100,000,000)	+14	−232	−187	+33	+131	+16	−215	−261	−261

The Revenue Act of 1978 includes many good and structurally sound provisions, however, there are three major flaws inherent in H.R. 13511 as reported by the committee.

The first is in the tax table adjustments. A major purpose of this tax legislation was to help offset the effect of inflation which continually pushes taxpayers into higher brackets of taxation and taxes more real spendable income and that is one reason I have joined my colleague from Ohio, Mr. GRADISON, in a proposal to neutralize automatically this inflation burden. H.R. 13511, by concentrating its relief in the highest tax brackets, ignores the fact that inflation hits hardest at those with annual incomes of $20,000 or less. H.R. 13511 further aggravates this problem by repealing the $35 credit and by enlarging the $750 deduction to $1,000. That change is regressive and unfair. Why, for example, should one taxpayer receive a benefit of $500 for each child, while another taxpayer receives a benefit of only $200?

I have long argued that no taxpayer should have the Federal Government take more than 50 percent of his income in taxes. Making the Federal Government more than a one-half partner is, in my judgment, confiscatory and counterproductive, as well. Rates of 50 percent encourage—even require—vast expenditures motivated solely by our tax structure. I do not believe a policy of "soaking the rich" is a good or a fair tax policy. But it seems incredible to me that the House of Representatives, the people's House, would make changes in rates and deductions that virtually ignore 95 percent of the taxpayers in Arkansas and 90 percent of the taxpayers in the country. They are "the people" and they deserve better treatment.

The second error in H.R. 13511 is its treatment of capital gains. The current tax on capital gains is too high. The tax rate on capital gains proposed by the bill is also too high—and the committee bill also proposes a very unfortunate change in the minimum tax. The U.S. economy is capitalistic. I believe in that economy and its potential for keeping our Nation strong and free and providing the best financial circumstances for the largest number of citizens. But, I also believe that capitalism should be for everybody. If that belief were more widely shared, the committee would have chosen a different course on the tax treatment of capital gains. Neither the "Jones compromise" nor the "Steiger bill" reflected any apparent concern for the involvement of the vast majority of our citizens in capitalism. Neither approach was really directed at the tax rate on capital gains. Those efforts were virtually solely directed at the repeal of the minimum tax. I offered in committee an amendment to reduce the maximum regular rate on capital gains to 25 percent but to leave the minimum tax in place. This would have allowed a maximum effective tax rate on capital gains fully 5 percent lower than the rate provided in the committee bill. The debate on my amendment—and its subsequent defeat—clearly reflected the fact that the entire capital gains debate has in reality been an effort to repeal the minimum tax. That is almost all that H.R. 13511 does. I am glad that we were able to amend the bill to provide relief for homeowners. But, why do we not help make capital investment more attractive for everyone? Why did we increase the attractiveness of capital investment only for 340,000 taxpayers? For example, I offered an amendment to exempt 60 percent of capital gains from taxation rather than the current 50 percent exemption and to reduce the maximum rate of tax from 70 to 65 percent and to remove the tax poison which reduces the amount of earned income subject to the maximum rate. An approach of this type would assure that every American could have a stake in capital investment. Every one can play—the $15,000 per year family—the $30,000 per year family—the $50,000 per year family—as well as those with truly enormous incomes. H.R. 13511 offers almost nothing—no real incentive for capital investment for those with incomes under $100,000 per year.

The Fisher amendment, offered in committee and supported by a majority of the Democrats, contained similar approaches. It encouraged capital investment for all Americans. It provided a 10-percent reduction for anybody willing to invest in new issues of equity. The man with the lunch bucket could put his paycheck to work with that. H.R. 13511 provides no such opportunity. The Fisher amendment lowered to 25 percent the maximum rate of tax on the sale of a family business or farm, thus recognizing the need for fairer treatment of the sale of such assets. H.R. 13511 provides no such relief. While I hesitate to see Government attempt to focus spending through tax policy, the Fisher amendment aimed its incentives in that area of capital investment most needed for the growth and strength and future of America—factories, plants, research and development. H.R. 13511 squandered its relief in a manner that will equally encourage investment in stamp collections, coin collections, and antiques, and the entire 75 percent of capital gains that lies totally outside those areas most in need of capital investment.

The Federal income tax system in the United States is somewhat unique in its operation. Unlike citizens of most other countries, people in the United States voluntarily file an annual accounting of their earnings and pay taxes on those earnings. This "self-assessment system" is probably the finest revenue system in the world. Americans will continue to support this system only if they trust it and know it to be fair.

For nearly 10 years, the minimum tax on tax preferences has been the key element that attempted to insure equity in the treatment of all taxpayers whether rich or poor. The minimum tax was placed on the books so that all taxpayers would be required to participate in our system of raising revenues. The minimum tax as we know it today is far from an ideal way of reaching tax equity, but instead of eliminating it, Congress should improve it.

In my view, attempts in the Tax Reform Act of 1976 to strengthen the minimum tax had a harsh and deleterious effect on capital gains and capital formation. A good minimum tax is not a surtax or add-on tax. Rather, it should be an alternative that requires a taxpayer, no matter how wealthy he or she may be, to pay a fair share of income tax.

Surely it is appropriate that those who have benefited from our form of economic system pay at least a modest amount of tax. H.R. 13511 almost completely abandoned this concept and does not, even with the committee amendments, adequately address the problem.

The third major flaw in H.R. 13511 is its failure to address the burden of social security taxes. Congressman GEPHARDT offered in committee an amendment which is reasonable, affordable and provides immediately the relief so solely needed for taxpayers, both employees and employers, subject to social security taxes. This approach, which I have argued for since last year when it was obvious that the social security trust fund required immediate new revenues, leaves the trust funds inviolate, reduces the most pernicious impact of social security taxes on employees and employers and is temporary in its application in the event a future Congress can discover means of either cutting social security taxes or reducing costs of the social security system. This is precisely in keeping with the objectives so strongly supported just last year by the administration.

The amendment provides for a refundable tax credit. This means that if a taxpayer owes no income taxes, he or she will still receive the credit in the form of a refund. The credit also would be available and refundable for employers who, under the principle called parity now imbedded in our social security system, are subject to the payroll tax increases as well and have an equal right to relief. However, because employers already receive an income tax deduction for payroll taxes paid, my amendment would require that their deduction be reduced by the amount of the credit taken so that, in essence, a double deduction would not

result. Only Federal, State, and local employees, or those employees of not-for-profit organizations not participating in the social security system, would be denied this credit and that seems only fair.

It is estimated by the Joint Committee on Taxation that a 5-percent social security income tax credit would decrease Federal revenues by $5.6 billion in 1979. This figure, if added to the tax cuts proposed in H.R. 13511 or the Fisher substitute, is within the target figures of Congress' first budget resolution. Given the tax cuts and increases proposed in H.R. 13511, a 5-percent social security credit may be the only tax cut wage earners below $20,000 will receive. All eligible taxpayers, however, would receive the credit and a typical one and two wage earner family would have their income taxes reduced in the following amounts:

Federal individual income tax reduction from a 5-percent refundable credit of social security taxes paid for one and two wage-earner families in 1979 and 1980

1979	One	Two
Wage income:		
$3,000	$9	$9
$5,000	15	15
$6,000	18	18
$8,000	25	25
$10,000	31	31

This may not be the best means to rework the way we finance the social security system. Thus, the credit would only be available for the 2-year period in which my colleagues and I on the Social Security Subcommittee have promised to do just that. Between now and then, however, the 5 percent social security income tax credit will provide small, but needed relief to our taxpayers and our economy.

Mr. HARRINGTON. Mr. Chairman, will the gentleman yield?

Mr. TUCKER. I yield to the gentleman from Massachusetts.

Mr. HARRINGTON. Mr. Chairman, I appear before you neither as an economist nor as an expert in tax policy. I do come here today, however, in a spirit of frustration and disappointment. The bill I am here to discuss provides perhaps the best example in the 95th Congress of how the legislative process has failed the American people and why the public, in turn, remains alienated from—indeed has lost all confidence in—the political process.

For many years, we have heard cries for tax reform from across this country. Taxpayers in nearly every economic bracket have denounced a code which has become little more than a collection of deductions, exemptions, shelters, and loopholes. Many of these special provisions have evolved for legitimate purposes, but, taken as a whole, the tax code is not only too complex and confusing but fundamentally inequitable.

Recently, the calls for tax reform have mingled with growing complaints about the impact of inflation. Men and women have looked on in frustration as their earnings have been eaten away by rising prices and boosted artificially into higher tax brackets. They have clamored both for immediate compensation and for a program to curb inflation.

Against this backdrop of public concerns, congressional performance has been dismal. Our only contribution to the economy in this Congress has been the enactment of a social security bill which not only increased a regressive rather than a progressive tax, but was itself seriously inflationary. Now, at the 11th hour, we find ourselves finally presented with a tax package which purports to address the trinity of economic goals: Tax reform, economic stabilization, and tax relief. As might be expected in an election year, and following committee work that was characterized chiefly by avoidance and retreat, the Revenue Act before us contains some tax reduction and offers almost nothing in the crucial realms of reform or stabilization.

I do not always heed the political assessments of the New York Times editorial pages. The Times' recent evaluation of the tax bill, however, was sadly on target:

It is symptomatic of a national confusion of purpose that Congress has decided to focus the debate over national tax policy on the capital gains tax.

Professor Lekachman's companion piece on the Op-Ed page was less charitable. Mr. Lekachman observed:

If the political actors were of more heroic scale, and their defects were more noble than simple cowardice I'd be inclined to say that we are in the middle of a prologue to a totally unnecessary and entirely unavoidable tragedy—recession in 1979.

Many economists are coming to share this gloomy forecast, citing inflation as the likely prime cause. I recognize that several of the current anti-inflation proposals are not directly germane to the pending revenue bill. Nevertheless, many are germane. Moreover, no current issue—least of all tax policy—can be considered in isolation from the question of inflation. Surely the relationship of tax controls or tax cuts to inflation is as crucial as the relationship of capital gains to inflation, on which the Ways and Means Committee has lavished so much attention.

This month's headlines proclaim Government estimates of an 11-percent rate of inflation. An independent study released just last week suggests the situation is, in reality, far worse. Price increases in the principal areas of food, energy, housing, and health reached 15 percent in the second quarter of this year. At the same time, hourly wages rose at less than 8 percent and real wages actually declined by 3 percent.

These are striking figures. Unfortunately, those who expected commensurately dramatic action from the Ways and Means Committee bill are destined to be disappointed.

For example, Ways and Means might well have turned to a tax-based incomes policy, known now in Washington as TIP. On the whole, TIP is the most promising new proposal to combat inflation. The imposition of tax penalties and tax incentives on industries who fail or succeed in holding down prices and wages might well be integrated as the centerpiece of a new tax program. No consideration of the TIP concept, however, occurred in committee.

Alternatively, one might hope for a major strengthening of investment tax credits which would spur capital improvements so essential to increased productivity. Productivity lags, according to many economists, substantially contribute to continuing inflation. Thus, President Carter's proposal to increase the credit to 15 percent to encourage capital improvements in distressed areas, where productivity has generally declined most, held real potential for spurring development and indirectly trimming inflation. Although the Ways and Means Committee did make the 10-percent credit permanent, it declined to extend this policy further.

Further proposals such as providing tax rebates against next year's returns—thereby giving relief while curbing inflationary consumption—again might have been taken up by the committee. Whatever shortcomings have been manifested in the conduct of the committee's debate, however, I think the most serious demonstration of legislative inadequacy lies in our collective failure to devise a coherent strategy against inflation. At this juncture, I would exempt neither ourselves nor the Executive from the charge of having dotted the "i's" and crossed the "t's" on the tax code while eschewing the tough decisions which must eventually be made to revive our economy.

Personally, I find myself increasingly drawn into the lonely and politically unpopular camp of supporters for targeted wage and price controls. I believe—and I think statistical evidence will confirm—that moral exhortations and traditional

fiscal and monetary policies have been ineffective in stabilizing prices. As the Washington-based Center for Economic Alternatives has suggested in several studies, these remedies lack relevance to the inflation of such necessity items as food, housing, energy, and health which make up 70 percent of the consumption expenditure for most Americans. Prices in these sectors are dictated in large part by unique circumstances—such as oligopoly and climate—that fall outside the textbook realm of monetary, fiscal and demand mechanisms.

Tax cuts will not solve the problem of necessities. Even tax-based incomes policy schemes, though promising in labor-management situations, will be, I suspect, of limited value. If we are being honest and slice through all the demagoguery and disavowals the only effective recourse is to devise a long-term strategy for effective public control over prices in these stubborn sectors.

Accepting for the moment, then, the absence of any anti-inflation component in the current tax bill, one is prompted to reflect on what 7 months' activity has brought us in those areas which were presented to the committee.

In January of this year, President Carter submitted his tax package to Congress. Although some of its specific proposals were controversial, the program clearly addressed the pressing needs for tax reduction, tax reform, and capital investment.

Included was a 2 percent across-the-board reduction in personal income tax rates, an increase in the general tax credit from $35 per exemption to $240, more equitable treatment of capital gains, the tightening of business-related entertainment deductions, the repeal of the DISC tax shelter, extension of the investment tax credit, facilitation of State and local government credit through the taxable bond option and an increase in "small issue" industrial bond exemptions.

Unfortunately, although Ways and Means scheduled 6 full weeks of markup for the administration package, after only 3 short days of markup in April the focus shifted radically from the discussion of an overall plan for code revision to the one-dimensional issue of capital gains. In retrospect, this proved to be the critical turning point. By adopting this limited focus on the Steiger amendment, the committee essentially ended consideration of the larger issues. Hopes for innovation or a restructuring of the tax code were abruptly extinguished.

Another 3 months of behind-the-scenes negotiations elapsed before the committee resumed in late July—again for only 3 days. Now the range of debate was successfully restricted to another narrow proposal: the Jones substitute, a compromise primarily on the issue of capital gains. What can be said of this final compromise?

First, the present Revenue Act is not a tax cut. The Joint Committee on Taxation has calculated that, due to inflation and higher social security taxes, citizens will actually pay more income and payroll taxes combined than ever before. Had the committee been concerned with providing tax relief to the majority of Americans, it would have increased the tax credit which is more effective than an increase in the personal exemption. Had the committee wanted to provide real tax relief, it would have included in its bill a provision to fund social security out of general revenues. Had the committee wanted to provide real relief to counter inflation, it would have indexed personal income taxes. Certainly these options were presented; unfortunately, they were dismissed. We are told that the bill offers a viable response to inflation. Quite frankly, the available evidence indicates that this is not true.

Second, the bill does not confront the need for tax reform. In fact it makes our tax system more regressive by easing the taxation of already favored capital gains. Through the lowering of the maximum possible tax rate on capital gains, elimination of the minimum tax, the creation of alternative minimum tax and the decision to index only capital gains, the economic elite of America receive unwarranted benefits. I believe that the committee should have sought to simplify our complex tax code by ending the numerous special deductions which cloud our system with unnecessary confusion. The committee should have followed the President's lead in working to curtail tax shelters, strengthen the minimum tax, and correct the universally acknowledged abuses of the tax deductions available for business entertainment and travel expenses.

Finally, I believe that the bill before us fails to offer a creative and lasting response to the problem of capital formation. Had the committee wished to offer us a real opportunity to stimulate investment it would have looked beyond the smaller issue of capital gains; it would have investigated the possibility of integrating corporate and individual income taxes or partial integration by curbing the double taxation of dividends; it might have increased and targeted investment tax credits, depreciation deductions and industrial development bonds. The special problems of raising risk and venture capital for newly forming businesses might be better solved by the creation of a development bank.

Certainly, capital gain tax reductions are not the most direct way to stimulate needed capital investment in industrial sectors or regions. Secretary Blumethal's evidence that less than 30 percent of the capital gains taken each year are on corporate stocks documents the inefficient economic stimulation of a capital gains tax cut. Capital needs can be more appropriately satisfied with other methods.

What all this adds up to is that we have spent another year holding the line—postponing inevitable decisions and risking further economic dislocation in the process. If this situation were unique, I could perhaps stand by in mute discouragement. Unfortunately, the saga of the 1978 tax bill conforms to a depressing and increasingly familiar congressional pattern.

Our record at putting fingers in the dikes is prodigious; our inclination to reverse the tides is weak. To date, this House has failed to report an energy bill, balked at welfare reform, gutted hospital cost containment, refused to enact consumer protection or public election financing legislation and now is shelving tax reform. At times, I feel certain that the spirit of President Truman must be lurking in the corridors, shaking his head in bemusement at "that do-nothing 95th Congress."

Even on those issues where we have managed to take action, we rarely show urgency on the important issues and we are often inconsistent. Here is a Congress that overwhelmingly insists on spending $2 billion for a nuclear aircraft carrier that even the Navy warns may be a white elephant. Yet, it is this same Congress that has voted across-the-board cuts in major social services and cannot even find $1 billion for supplemental assistance to America's distressed cities. We will talk until all hours of the night on restricting free agricultural handbooks and pay toilets in the Capitol, we will indulge in colloquy on the Washington Bullets and National Family Day and we will ferret out every indirect form of Federal support for abortion, yet we cannot allow a rule that would permit a broad and thoughtful consideration of alternative tax policies.

We wonder nervously why so many Americans are persuaded by the dangerously simplistic proposition of a 30-percent tax cut. I think the answer is clear enough. We have failed to exert leadership, to come up with the more difficult but more realistic solutions to those widespread concerns. Our inability or resistance only fuels voters' belief in our insulation and their own disenfranchisement. In the meantime, whether it be Jarvis-Gann in California or Kemp-Roth on the national level, the public seizes upon easy remedies which promise at least to bring immediate change.

That is why we find ourselves here this morning, confronting another reelection year tax package and with our backs to the wall on Kemp-Roth.

Given these unappealing alternatives, I strongly urge my colleagues to take the only opportunity left to us to salvage the situation. With time running out, I ask you to support the amendment offered by my colleagues Mr. CORMAN and Mr. FISHER. By providing slightly larger tax cuts for middle- and lower-wage earners, by restoring the general tax credit and by curbing the cut in capital gains tax, the amendment would at least mitigate the embarassing effects of the bill before us.

I also ask your support for my colleague Mr. ROSTENKOWSKI's amendment, striking the provision of the bill which indexes capital assets to the rate of inflation. This brand of tax-indexing only augments the favored status of capital gains tax and certainly ought not to be considered without simultaneous discussion of indexing the personal income of wage earners whose own economic futures are being undermined by rampant inflation.

Mr. CONABLE. Mr. Chairman, I yield

1 minute to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Chairman, I rise in support of H.R. 13511; and I urge its passage. I would like to congratulate the Committee on Ways and Means for its hard work and the result of that work.

While the bill before us does not give everyone everything they want, I think, looking at it in its entirety, that it is a good package and one we can all support with pride.

As the ranking minority member of the Small Business Committee, I am especially pleased with the bill's provisions which afford meaningful relief for our small business community.

It seems as though I have been supporting and cosponsoring small business tax relief bills ever since I came to Congress 20 years ago. For years we pushed for the so-called Bible-Evins bills; but in Congress after Congress it died in committee.

During the last Congress, we had the Evins-Conte bill, which had the support of the entire Small Business Committee and the small business community; but most of that bill, including the graduated corporate income tax, died in committee.

This year, our committee and the small business community directed our efforts toward the Smith-Conte bill to graduate the corporate income tax. Thankfully, that bill did not die in committee. It is included, in a slightly modified form, in section 301 of the bill before us.

The bill also includes other small business relief provisions. It simplifies and reforms the subchapter S rules. It makes permanent the 10 percent investment tax credit and extends it to rehabilitation of industrial and commercial buildings and to pollution control facilities amortized over 5 years. It makes permanent and reforms the jobs tax credit, which is important to our labor intensive small businesses.

It cuts capital gains taxes to encourage capital investment; and you do not have to be a wizard in economic analysis to realize that our small businessmen and women are starved for capital.

The bill includes the so-called Archer amendment to provide an inflation adjustment for capital assets. I hope these provisions will be retained. The Archer amendment, if retained, should encourage people to hold investments for a longer period of time. Over the years, representatives of the small business community have told us, time and again, that incentives for long-term investments encourage investments in smaller firms.

In short, Mr. Chairman, this is a good bill. I know that the small business community supports it—and they have been waiting for a long time for this type of relief. For these reasons, I hope the bill will be passed; and I want to thank the members of the Ways and Means Committee once again for their responsiveness to the needs of small business.

Mr. CONABLE. Mr. Chairman, I yield 1 minute to the gentleman from California (Mr. LAGOMARSINO).

Mr. LAGOMARSINO. Mr. Chairman, I thank the gentleman for yielding and I rise in support of this legislation. I think it is a better piece of legislation than many of us thought would arrive on the floor. I do think some improvements could be made to it.

I will be supporting the Kemp-Roth provision later.

I am disturbed by the fact that the legislation does remove the tax deductions for gasoline taxes and I am also concerned about the treatment of medical insurance premium deductions.

Mr. Chairman, there is no subject dearer to a politician's heart than cutting taxes—especially in an election year. So it should come as no surprise that after 1½ years of virtually ignoring the subject, this Congress is now falling all over itself in an effort to hand back some of the money we so recently extracted from the hardpressed taxpayers of the Nation.

But before we all begin to congratulate ourselves, and the voters, it would be well to set the record straight on a few items. First of all, this money we are giving back was never ours in the first place; it was collected from the working people of the Nation, much of it through the instrument of inflation.

In fact, if you look at the amount of taxes we are returning, and look at the loss of buying power experienced by wage earners over the last 2 years, you see that most people will be lucky just to break even. In effect, it was the reckless spending policies of the Federal Government which provided the extra cash to the Treasury that we are now so magnanimously agreeing to give back. Inflation, the hidden tax, robs taxpayers at both ends, by shrinking the purchasing power of their dollars while pushing them into higher tax brackets. So all we are really doing today, is belatedly returning something which was not ours to begin with.

What is more, when you add into the tax equation the increases in social security payroll taxes which this body enacted into law just 8 months ago—against my vote—you see that the individual taxpayer, for the most part, still comes out behind in this bill.

So I hope when we return to our districts and start talking about how we cut taxes, we will be honest with the voters on this score.

The second thing I would like to point out, Mr. Chairman, is that this House did not voluntarily come to this point on its own. It was forced here by the voters, and particularly the voters of California through the passage of proposition 13. Until last June, the prospects for any meaningful kind of tax cut that would benefit middle-income taxpayers getting out of the Ways and Means Committee were as dim as some of the "experts" who issued dire warnings of catastrophe to California voters right up until June 6. Subsequent events having proved the voters right, we should be congratulating them rather than ourselves for forcing a bill out of committee.

Finally, I would like to point out that the bill presently before us, while a step in the right direction, is far from perfect. I do oppose the provision removing the tax deductions for gasoline taxes—very unfair to my commuting constituents—and I am also concerned about the treatment of medical insurance premium deductions. From the standpoint of improving the economy, creating fairness in the taxation of capital gains, giving business a much needed injection of capital. and indirectly improving productivity and alleviating unemployment, the bill is clearly a plus. What it lacks, is enough consideration for the individual taxpayer, the wage earner. The Kemp-Roth bill, which will be offered as an alternative tax cut later today in the form of a motion to recommit, is clearly superior in this respect. And I say that not just as a long-standing cosponsor of Kemp-Roth. Economists who have studied the measure, the historians who remember the Kennedy tax cuts of 1963, believe that by cutting individual tax rates across the board by 10 percent a year for 3 years, which is what Kemp-Roth does, we will provide sufficient stimulus to the economy, put enough money back into people's pockets, and create enough new capital, to lift the economy from its present bedridden state. History bears this out. In fact the 1963 cuts, drafted by the same people who drafted Kemp-Roth, led to 8 years of prosperity and paid for themselves in the form of increased Government revenues. Their only defect, and Kemp-Roth's, is that they did not index the tax rates against the future effects of inflation. But since it is clear that this House would never pass such a provision, Kemp-Roth is clearly the best alternative we will have a chance to vote on this year.

In conclusion, Mr. Chairman, I commend the Ways and Means Commttee for having the wisdom to respond to the clear public mandate of proposition 13, at least to the extent of sending a tax cut bill to the floor. But I would urge my colleagues to go a step further and be honest enough to give individual wage earners the same consideration as business and investors. They can do that by voting for the Kemp-Roth bill, and keeping the pact with the voters who have been footing the bill all along.

Mr. CONABLE. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. DON H. CLAUSEN).

Mr. DON H. CLAUSEN. Mr. Chairman, I rise in support of this tax cut proposal and intend to support a number of the amendments that are up for consideration.

The American taxpayer is demanding a meaningful cut in taxes—and rightfully so. I intend to support the tax bill as it provides a significant measure of tax relief, but I shall also be supporting amendments directed at expanding the tax cut to further ease the burden being borne by working men and women and perfecting amendments which will modify our tax laws to correct a number of problems which exist.

I would like to commend my colleagues on the House Ways and Means Committee for their perseverance in completing action on this bill and bringing it to the House floor. It contains a number of very significant provisions.

The bill will allow employees and independent contractors performing services for a State or local government to defer annually an amount equal to the lesser of $7,500 or 33⅓ percent of their currently includible compensation. This provision is necessary to prevent implementation of regulations being proposed by the Internal Revenue Service which would preclude participation in deferred income programs by public employees.

Small cities and towns have a more difficult time recruiting top management and supervisory personnel as they are unable to compete in salary and benefits with larger urban centers and private corporations. One of the benefits a small city can offer is a deferred compensation program. This is an attractive incentive to an experienced planner, engineer, police or fire chief who is looking for the atmosphere of a rural area such as exists in my congressional district. Therefore, a great many public employees in my congressional district are enrolled in this type of program and are realizing benefits from it.

As a cosponsor of separate legislation to reverse the proposed IRS action, I am pleased that the committee has chosen to include our proposal in the general tax bill.

I also support the capital gains provisions in the committee bill. As a cosponsor of the legislation introduced by my colleague from Wisconsin (Mr. STEIGER) I believe that a reduction in taxes on capital gains will provide an incentive for the American private sector to inject additional capital into productivity improvements, making us more competitive with foreign producers, creating new jobs, and saving a great many existing jobs that, in the absence of assistance of this type would disappear.

Specifically, the bill reduces the maximum tax rate on capital gains from 49 to 35 percent by repealing the 25-percent alternative tax and removing capital gains from minimum tax on tax preferences. In addition, the bill provides for an alternative minimum tax on capital gains, an inflation adjustment for capital assets, and permits an individual to exclude from gross income $100,000 of any gain realized on the sale or exchange of his or her principal residence. This last provision applies to persons of any age but is likely to be used more often by older homeowners who wish to retire. They will be able to sell their homes and avoid paying a large portion of the gain in taxes. It is my understanding that this provision, if enacted, will apply to sales or exchanges after July 26, 1978, or possibly on the day of enactment.

During consideration of the bill, a motion to recommit will be offered by my colleague from New York (Mr. KEMP) with instructions to reduce individual income tax rates by an average of 33 percent over the next 3 years beginning in January 1979.

As a cosponsor of this tax cut bill, which is the essence of the motion to recommit, I strongly support this effort, and will be voting for it. Inflation has pushed taxes higher, social security taxes have risen, and the pending energy taxes will push the total tax burden even higher. It is estimated that the tax burden will increase by $26 billion in fiscal 1979, $47 billion in fiscal year 1980, $72 billion in 1981, and $85 billion in 1982. We need to cut this tax rate trend significantly and revise the social security finance structure, and reduce that rate structure before the new rates go into effect.

Overall economic growth in terms of real growth has substantially declined. Taking as an example the 1960's and early 1970's when there was a real growth rate of about 4 percent after inflation and comparing that to the period from 1973 to 1979 when the rate fell to between 2 and 2.5 percent we can see that there has actually been about a 40-percent decline in real growth. The result has been a loss of confidence, a loss in production, and a loss in incentive.

For society as a whole, this decline in real growth means we are not keeping pace with the demands of our expanding work force. This is particularly significant to women who are entering the work force as full-time employees at a much more rapid rate than in the 1960's. If we are going to provide the necessary jobs we must reverse this decline and move in the direction of meaningful economic growth.

Our motion to recommit simply returns the windfall tax dollars which the Federal Government has been collecting as a result of inflation and puts them back in the hands of the private sector to be used in expanding production and creating new jobs. The Federal Government and the Treasury should not benefit from the inflation which Government itself is creating by continuing to deficit spend.

California has led the Nation in voicing its demand for lower taxes and less spending. Proposition 13 clearly demonstrates the dissatisfaction and frustration which exists over current tax levels and Government policies. The mood of the country requires that we take steps at the Federal level to return to the people what has been taken from them by inflation.

While the bill as reported cuts taxes it does not completely offset the increases in taxes which have occurred in recent years and does not sufficiently lessen the increased burden borne by working men and women.

Our proposal is essential if we are to avoid recession and inflation. It is aimed at more savings and incentive, more jobs, and more production—all of which are the fundamentals of a healthy, free economy. By lowering the marginal tax rates, the ones which govern the real value of added wages, interest and income, we will produce a surge in production and economic growth that will reduce unemployment by creating more jobs in the private sector, will increase the supply of goods and services, and will lower consumer prices.

Our proposal according to a Library of Congress study will accomplish the following objectives:

First. It will increase real GNP by a range of 1.2 to 2.9 percent in 1979 and 2.4 to 4.9 percent in 1980. These are increases above inflationary increases.

Second. Real disposable income of the American workers will go up from by a range of 2.7 to 5.1 percent in 1979 and 4.6 to 8.3 percent in 1980, according to that study.

Third. Unemployment would drop from a range of 0.6 to 1.1 percent in 1979, 0.3 to 2.1 percent in 1980, and 0.7 to 3.3 percent in 1982, according to that study. That means a jobs creation of 700,000 to 1,100,000 in 1979; 1.4 to 2.0 million in 1980. This in turn reduces social welfare spending payments and adds to the tax base.

Fourth. It will provide 65 percent of the reduction to lower and middle-income families so that all Americans can enjoy more real disposable income.

Fifth. It will cause a change in Federal income tax liability in such a way that $100,000 and over families will pay a greater share than today, by drawing them out of tax shelters into taxable economic activity, thereby lowering the tax liabilty percentages on every income class under $100,000.

Sixth. It will be self-financing because increased personal savings and increased retained earnings will be sufficient to cover all additional borrowing needs of Treasury, meaning the Federal Reserve will not have to increase the money supply to cover a portion of that borrowing, and will provide additional investment capital for the private sector's borrowing needs. According to calculations, it will result in crowding in, not crowding out.

Critics of major tax cuts claim that they will cause greater deficits but history has not supported their arguments. Tax reductions in the past have not resulted in the revenue losses predicted. Our proposal will cause substantial inflows to the treasury making the cost of our bill very small.

Our proposal will cause added savings to flow into both Federal and corporate bonds, reducing interest rates and making it unnecessary for the Federal Reserv to step in to create new money. These savings will generate sufficient growth in the economy to offset revenue losses by creating new jobs and more production.

I believe our larger tax reduction accurately reflects the mood of the public in support of genuine tax relief. They are not going to be fooled by a tax bill which will still result in higher tax bills next year for working Americans. It also puts the Federal Government on notice that taxpayers will no longer tolerate the Government's taking of more and more of their incomes for programs they see as wasteful and duplicative.

If enacted, our proposal will get this country moving again. These are the very words used by President Kennedy in the early 1960's when he proposed a bold tax reduction plan slashing individual and corporate tax rates.

It will release pools of energy and individual initiative that have been the foundation of our success as a Nation and will raise the national standard of living for which this country is famous.

Lastly, I intend to support the indexing amendment being offered by my colleague from Texas (Mr. ARCHER). The amendment would allow taxpayers to adjust the basis of certain capital assets upward by the rate of inflation. Assets eligible for the indexing would be corporate stock, real estate, including a personal residence, and tangible personal property. For assets sold after December 31, 1979, the basis of the asset would be adjusted to reflect the rate of inflation for years after 1980. Current law clearly overstates the value of real capital gains. This amendment addresses this problem and will increase investment opportunities substantially.

The effect of this legislation will be to move us in the direction of fiscal restraint and a balanced budget by giving us the incentive to bring inflation under control and reduce wasteful Government spending. When this occurs we can anticipate a surge in production which will create many new jobs and improve our standard of living for our low- and middle-income individuals and families, for homeowners, small businesses and the long-awaited reduction in capital gains.

Whatever the outcome, this is a good day for the overburdened taxpayer—particularly Mr. and Mrs. Middle America. I hope this is the beginning of more tax cuts and set the stage for Federal spending cuts and convey to the taxpayers who are in revolt throughout America that the Congress is finally getting the message.

Mr. CONABLE. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio (Mr. GRADISON).

Mr. GRADISON. Mr. Chairman, the tax laws that we have on the books are premised upon having stable prices, which we have not had for a long time and which, unfortunately, we are unlikely to have in the foreseeable future.

As a result, we have built into our tax structure a very unusual tax, an inflation tax, one which is unlegislated, unvoted, and not signed by the President.

When some of us in years past were talking about this, and referring to the problem, we talked about the need to index the tax structure and it was clear that many people in the general population really did not understand what we were talking about. But now I think that has changed and has changed very quickly and has changed very dramatically as people understand, from their own experience, the way in which they are being pushed into higher tax brackets, not because of increased real wages but because of inflation. As a result of this phenomenon the only gainer is the Treasury which receives an inflation bonus paid for out of the pockets of the taxpayers.

The bill before us, unlike most tax bills that we have had in the past, does recognize inflation and does, in at least two instances, do something about it.

First, there is the Archer proposal which recognizes that much that we tax today as capital gains is not a true gain but is the result of inflation.

Second, we have the widening of the brackets by 6 percent, which represents an appropriate degree of indexing for a 6-percent rate of inflation. That, indeed, is what indexing of the tax rates is all about and how it would work under most of the bills which have been introduced in either body now or in years past.

To my knowledge, this bracket widening which has been recommended to us is being suggested for the first time; and I think it is very desirable. However, my main regret is that it is not made permanent and lasting.

There is a bill which has been introduced and I think is going to be heard from more in the future, which would put this on a permanent basis. It has over 100 cosponsors in this body at this time.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. GRADISON. I yield to the gentleman from Georgia, of course.

Mr. LEVITAS. Mr. Chairman, I thank the gentleman for yielding to me, and I would like to commend the gentleman for his remarks and also for his leadership on the issue of indexing of income tax rates.

I am proud to be a cosponsor of his legislation, and I think the gentleman puts his finger right on the point. It is not fair for the Treasury to benefit from inflation which raises tax revenues when Government policy is partly responsible for creating inflation, to begin with.

People in all walks of life—low income, middle income, fixed income—all suffer from inflation. To add greater injury the tax law takes even a greater part of a person's real income because of inflation. The Government taxes inflation. Indexing the tax rates to offset inflation is only fair. It provides needed tax relief as well.

Mr. Chairman, the partial step in indexing which has been taken in this legislation is an important step forward. I am glad to see this first step and to be a part of it. We still have more to do but this is a start.

Again, Mr. Chairman, I would like to commend the gentleman from Ohio (Mr. GRADISON) and associate myself with his remarks.

Mr. GRADISON. Mr. Chairman, I thank the gentleman from Georgia (Mr. LEVITAS) not only for his comments, but for his leadership on this important issue.

Certainly it is possible, by annual legislation, to deal with this problem; but frankly, we have not done it, and there is not much to encourage anybody to think that we are going to do it in the future.

During the 10 years ending in 1975, all of the so-called tax reductions that took place during the decade left the average taxpayer worse off than if we had indexed beginning in 1965. Indeed, the only income category which benefited from all of those changes, on balance was those earning less than $10,000 in 1975 dollars.

It is no wonder that the middle-income taxpayers are outraged by what has been going on and are looking for real tax relief. This bill, I conclude, is a step in the right direction. Those who have labored so hard to bring it to us deserve a great deal of credit. In particular, I would single out our chairman, the gentleman from Oregon (Mr. ULLMAN), the ranking member, the gentleman from New York (Mr. CONABLE), and the gentleman from Oklahoma (Mr. JONES), who have done a great job in bringing to us a measure which deserves the support of the House.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. GRADISON. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, I appreciate the gentleman yielding and I want to join with the gentleman from Georgia (Mr. LEVITAS) in complimenting him on the leadership he has provided in the Committee on Ways and Means in trying to interest that committee in the idea of indexing.

As my colleagues may know, we have recommended tax indexing of individual income taxes in recent reports prepared by the Joint Economic Committee on which I have been serving as the ranking House Republican for the last two Congresses and we were joined last year by the majority on that committee in expressing enthusiasm for indexing.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. GRADISON) has expired.

Mr. CONABLE. Mr. Chairman, I yield 1 additional minute to the gentleman from Ohio (Mr. GRADISON).

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield further?

Mr. GRADISON. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, the gentleman from Ohio (Mr. GRADISON) the gentleman from New York (Mr. CONABLE) and I, had the opportunity to study this issue in Canada where tax indexing has been tried. It is extremely popular with the taxpayers. It is somewhat less popular with the politicians because they do not get the opportunity to exercise the apparent magnanimity of reducing taxes by legislation every few years—which, of course, is what we do in the U.S. Congress. However, we never quite cut taxes often enough or deep enough to actually offset the increases in tax impact caused by inflation.

Indexing of individual income taxes is very unpopular with the budget planners, however, because they have to figure out ways to cut Federal expenditures; and that is exactly what the American people are looking for now—

an automatic method to hold Government expenditures down.

Mr. Chairman, I hope the gentleman from Ohio (Mr. GRADISON) will be successful one of these days in getting the Ways and Means Committee to give us the opportunity to vote on tax indexing when we have a tax bill before the Congress.

Mr. GRADISON. Mr. Chairman, I thank the gentleman from Ohio (Mr. BROWN) for his comments.

I would conclude by saying that I really do not believe that the old rules will work and that we are going to get credit as being generous when all we do is to give money back to people, money which should have stayed in their pockets in the first place.

Mr. CONABLE. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan (Mr. STOCKMAN).

Mr. STOCKMAN. Mr. Chairman, I rise on behalf of the Kemp-Roth amendment and the capital gains provisions of the committee bill. I do so because I am concerned that this whole debate has gotten off the beaten track, and that we have degenerated into a case of a microscopic examination of the twigs of the trees, and have really lost sight of the forest that we are attempting to deal with here.

Of course, in the last few weeks the critics have had a field day nitpicking at these two proposals. In the arguments that have been made they have taken pains to differentiate between the economic conditions of today and those of the midsixties, the last time a rate cut was tried. They have argued about the supply elasticities for savings and labor that we might get from a rate cut. They have argued about the level of feedback on revenues and on the deficit; and, of course, we have had great arguments about the distributional aspect of capital gains reduction. If the Members are looking for an excuse to vote against either one of these proposals, there are plenty of them around they can hang their hats on. I would not deny that or doubt that for a moment. But if you are concerned about the overall dismal economic performance that we have had in this country since 1973, and if you are concerned about the real strategic issues in this tax policy debate this year, then I think you ought to give Kemp-Roth and the capital gains reduction another look. Because the single most important fact that we confront today in this tax debate is the startling and radical reduction in the real rate of economic growth that we have had in this country since 1973. We need to know why, and we need to know what we can do effectively about it.

I am sure every Member of this body recognizes that between 1960 and 1973 we had a real economic growth rate of about 4 percent a year, and that meant that we could accommodate the increase in the labor force, and we could have some substantial real per capita gains in income and in the standard of living as well. But I would suggest to this body that on the basis of the prospects for 1978, and of the forecasts for 1979, you are going to find that for the period 1973 to 1979 our real economic growth rate in this country has been reduced to 2.5 percent, by 40 percent from the trend rate of the previous decade. We cannot attribute that to recession any longer. This business cycle is now mature. We have gone through the whole phase, and it is leveling off.

What this 40-percent reduction in trend rate of economic growth means, very simply, is that the economy is barely growing rapidly enough now to keep up with the expansion of the labor force. We are getting almost no gains in real per capita income.

During the 1960's real per capita income increased by 34 percent. That meant that the average family experienced a one-third increase in their standard of living over the decade. Today we will be lucky to get a 10-percent increase in real per capita income between 1973 and 1983. That means that the standard of living for the average family in this country today is only rising at one-third of its accustomed rate.

The reason for that is very simple. Productivity in this country has stopped growing. In the last year there have been negligible gains in productivity—almost zero. Over the period 1973 to 1978 productivity has averaged 1 percent compared to the 3-percent trend that we have been used to in the past.

So the question really before us today is, What do we attribute this fundamental, this startling, radical decline in our rate of real economic growth to? Is it due to problems on the demand side of the economy or on the supply side of the economy? I would suggest to my colleagues that after 5 years of frenetic demand management and stimulation, I hope that some of us would begin to question the efficacy of the great Keynesian god of demand stimulus, because the fact is it clearly has not worked. If we finance stimulus expenditure increases by taxes, the only thing we do is shift demand from taxpayers to income-transfer recipients. We do not increase the amount of demand in the economy. If we finance stimulus expenditures with debt, the only thing we do is reallocate demand from the credit markets where it might be used to finance housing and capital goods to spending on consumer goods by income-transfer recipients. If we finance demand stimulus spending with money supply increases, the only thing we are doing is creating more funny money, not more real demand, and the world market and the domestic market understands it very quickly. They discount it, and that is why inflation is up at home and the dollar is down abroad.

The fact is, we have had no demand deficiency since 1973 when this radical decline in the economic growth rate began. The money supply has been growing twice as fast as the sustainable growth. The problem is not on the demand side. If we look at the supply side of the economy, we have a different picture. That is where the problem is, and that is the problem we must address this year.

If we look at the supply side of the economy and we remember what the gentleman from Wisconsin has pointed out about the supply of risk capital, which has almost entirely dried up, and if we look at the devastating impact we have had in the equity market, and realize that means that capital is flowing to the low-growth industries rather than the high-productivity, high-growth new industries in this country; if we realize the impact the quadrupling of the cost of energy has had in reducing the output of the economy.

If we look at the waning of the entrepreneurship in this country, because of the very high tax rates today on high incomes. Today, if you put all those things together you can see why the economy has been growing at such an anemic rate and why our rate of growth has been reduced.

The point is, Kemp-Roth and the capital gains changes are oriented toward increasing and stimulating the supply of those critical ingredients of economic growth in the economy, of savings and of risk capital, of entrepreneurship and of our productivity rate.

I would suggest we are not going to solve our problems until we look to those issues.

Mr. CONABLE. Mr. Chairman, I yield 1 minute to the gentleman from Tennessee (Mr. DUNCAN), a valued member of the committee.

Mr. DUNCAN of Tennessee. Mr. Chairman, I rise in support of H.R. 13511, the Revenue Act of 1978. H.R. 13511 represents a positive congressional initiative to reduce taxes on the working person and to foster a healthy economy. The bill is a balanced package which provides relief to all major segments of our society. It helps the individual taxpayer by widening tax brackets and increasing the personal exemption to $1,000. It helps the business community by lowering the top corporate tax rate to 46 percent and permitting an investment tax credit for rehabilitating buildings. It helps the economy by encouraging investment through a lower capital gains tax. This is a good bill which has something for everyone.

I am pleased that besides addressing complicated topics such as investment credits and the indexing of capital assets, that it also addresses the kind of "bread and butter" topics which all taxpayers can appreciate. In particular, I am referring to the provision excluding from taxation the profit on the sale of a personal residence, up to $100,000. Most persons buy a home because they need a place to live and not as an investment. Consequently, it is a harsh result when these persons must pay a large capital gains tax when they sell their home after the children are grown and they wish to move to a smaller home. The committee's bill will correct this injustice.

Mr. Chairman, I associate myself with the remarks of the ranking minority member, Mr. CONABLE, regarding his ex-

planation of the details of the bill. While it is not perfect, it is a bill we can all be proud of and should all support.

Mr. CONABLE. Mr. Chairman, I yield 6 minutes to another valued member of the committee, the gentleman from North Carolina (Mr. MARTIN).

Mr. MARTIN. Mr. Chairman, let us look at the basic problem of inflation. Every survey of public moods finds that the No. 1 concern of American citizens by far is inflation. For 5 years it has been foremost in the minds of our people.

They see it as a hidden tax on their income. It directly inflates interest rates on borrowed money. That extra interest is in effect a hidden tax on borrowed money, payable every year, every month that you meet a payment, and it is not fair.

Inflation is a spiraling addition to the cost of goods and services. Thus it is an add-on tax, a hidden tax on the retail cost of goods and services. And it is not fair.

The people know that inflation hurts those who are on fixed incomes and grievously hurts the economy and causes dislocations that result in more unemployment. Thus it is a hidden tax on retirement and a hidden tax on jobs, taking the form of subtracting from the job pool.

Inflation is just another broad hidden tax on the price of goods and services, a hidden tax on jobs and retirement and a hidden tax on borrowed money. And it is not fair. Only the inflated Government benefits from it.

Not only do the people have to pay their taxes: their income taxes, their capital gains taxes, their excise taxes, their gasoline taxes, their estate taxes, their State and local property taxes, and their sales taxes. Then they pay the hidden tax of the price increases reflecting the taxes directly paid by businesses. Then on top of that they pay a hidden tax in the form of inflation, the rising cost of living.

Now they see that their Government taxes them in new ways to be sure that no one escapes this tax in the form of inflation. That is right. Anyone who is so fortunate as to neutralize inflation by receiving a cost-of-living increase in wages, finds that they end up in a higher income tax bracket. That means that they pay even a higher proportion of their income in taxes. Instead of staying even with inflation; they have to pay in effect an add-on tax on the inflation, and they end up falling behind with lower and lower buying power in their take-home pay.

Thus since inflation itself is a hidden tax, this elevation in the tax brackets ends up being a tax on a tax.

The same effect applies to capital gains taxes. If someone bought a house and lot 30 years ago for $15,000 and now upon or near retirement sells that same house for $80,000, the current selling price will not represent any more real buying power than the $15,000 paid for it in 1948. In fact it would be slightly less in constant dollars. The entire taxable gain in current dollars is due entirely to the devaluation of the U.S. dollars. It takes 65,000 more of them to add up to the same value in the same home.

Yet, does the Government excuse this individual because their value has slightly decreased. No, the tax code strictly and rigidly and inescapably levies a tax of $10,000 to $15,000 on this transaction, and it is nothing more than a tax levied on inflation.

That is why the amendment in the bill known as the Archer amendment should be retained in this bill, because in fairness, it eliminates the tax on the hidden tax on inflation. Anyone who votes to strike the Archer amendment is voting to restore this vindictive tax on inflation. After all the rhetoric about jobs, soaking the rich, and so forth, have reverberated their last echo, all they are voting to do is to do one thing, to continue this tax on inflation. Nothing more.

That is why the essence of the Archer amendment is so important and should be adopted as a part of this overdue legislation.

The same principle applies to the Kemp amendment. It is not, strictly, speaking an indexing mechanism, such as advocated by our colleague from Ohio (Mr. GRADISON), but it comes out the same. In its effect, the beauty of the Kemp one-third cut in the tax rates across the board, and essentially what it does over 3 years, is to index the tax code and the tax burden back to where it was in 1968. What that Republican tax cut does is relieve the swelling tax burden that has been added on entirely and surely by inflation alone over the last 10 years. These are the two major issues in this day's work.

There will be some partisans who will resist the Kemp amendment because it is the only amendment to the committee bill offered on the floor by a Republican. There will be some who will hide behind the fact that the Kemp amendment will be offered under the device of the traditionally reserved minority motion to recommit with instructions.

That, of course, will cost a few partisan votes. But I say that anyone who votes against a needed tax cut because it is offered by a Republican in a motion to recommit will deserve what they stir up. Their constituents will not care about partisanship or recommittal procedures. They will understand that on an amendment to cut taxes you voted no. There will be no excuse. There will be no valid explanation.

Mr. Chairman, anyone who thinks the American people don't need or deserve a tax break has not been listening to taxpayers. They've been listening to tax eaters.

Anyone who thinks that a tax cut would not stimulate a somewhat stagnant economy does not understand the incentives or the psychology of the American system of private enterprise.

Anyone who thinks that a tax break will not benefit the unemployed does not know that investment produces more jobs than any other mechanism ever devised.

Anyone who thinks that a lower tax rate will not stimulate or generate more tax revenues necessarily must believe that the way to get more revenues to fuel this gigantic growing Government is to raise the tax rate. Well, they will have a chance today. If they vote for the Vanik-Pickle substitute they will be voting for an increase in taxes on all Americans. If they vote to strike the Archer amendment they will be voting to restore a tax on inflation; or more correctly, a tax on people to pay for inflation—the very inflation caused by excessive Government spending. If they vote against the Kemp amendment under the motion to recommit, once again they will be voting for a tax increase on many taxpayers and for continuing the sneaky way that inflation snares people into higher and higher tax brackets.

Mr. ULLMAN. Mr. Chairman, I yield 5 minutes to the gentleman from Washington (Mr. MCCORMACK).

Mr. MCCORMACK. Mr. Chairman, I rise in support of H.R. 13511. I commend the chairman of the committee, the gentleman from Oregon (Mr. ULLMAN), and the ranking minority member of the committee, the gentleman from New York (Mr. CONABLE), as well as all the members of the committee, who have worked so hard on this bill.

I think what the committee has proposed is a commonsense compromise among a number of proposals that may by themselves have some merit, but which would, as amendments to the committee bill, be unacceptable. I think that we would all do well to support the committee bill.

However, I rise today on a subject related to taxation which has not, unfortunately, been included in this bill.

In the spring of 1977 I submitted H.R. 5500, which would have provided a tax credit of 25 percent up to $10,000, that is, 25 percent of $10,000 or $2,500, for each of the following four categories of activities involving energy conservation by individual U.S. homeowners:

First, insulation of homes and other residences; second, installation of residential solar heating and hot water systems; third, installation of residential heat pumps; fourth, the purchase of electric automobiles.

Mr. Chairman, I have 78 cosponsors for this legislation H.R. 5500, and identical bills. These cosponsors call attention, I believe, to the fact that Members of Congress are deeply concerned about providing adequate tax incentives for these energy conservation measures.

Three of these four provisions, excepting only credit for heat pumps, were included in title II of H.R. 8444, which was the House version of the President's national energy plan, with certain modifications as to the amount of credit. They were also included in the fifth bill of the NEP which is in conference be-

tween the House and the Senate, along with other energy tax provisions.

However, it is my understanding that this fifth bill is dead in the conference committee. and that no action can be expected on it this year.

However, I believe that these tax credits for energy conservation are important now. Great damage has already been done to the solar energy industry in this country because buyers are not buying solar energy systems, and this is because they are waiting for us to institute the tax incentives.

I would like to request of the chairman of the Committee on Ways and Means, the gentleman from Oregon (Mr. ULLMAN), if he would comment on this matter for me, in view of the importance and urgency of this matter, and of the fact that this section of the national energy policy appears to be dead in the conference committee.

Mr. ULLMAN. If the gentleman will yield, as the gentleman knows, these were included, in a large part, in the energy bill that we passed, now in conference. As the gentleman knows, there are some very difficult problems in the conference, particularly dealing with the crude oil tax and some other alternative on domestic pricing. We are still working on that issue. It is the hope of the chairman of the Committee on Ways and Means that we can get a conference report passed in this session of Congress dealing with the whole matter. The chairman of the Committee on Ways and Means also recognizes, however, that these matters are of individual urgency and that somehow, even if the whole conference could not be adopted, it is the hope of the chairman of the Committee on Ways and Means that we could get those particular issues addressed before the end of this Congress.

Mr. McCORMACK. May I say that I stand ready to appear before the Committee on Ways and Means with updated information on this subject, especially with respect to the solar energy industry, and I would be glad to provide the chairman with any assistance he needs if he cares to consider H.R. 5500 now for enactment by itself, yet this year. I am not asking the gentleman to commit himself at this time, but I only comment that I am available to try to help give further impetus in moving forward with H.R. 5500, so that we can have it on the books before the end of this year.

Mr. ULLMAN. Mr. Chairman, let me say that we appreciate the gentleman's leadership on this matter.

Mr. McCORMACK. I thank the gentleman.

Mr. CONABLE. Mr. Chairman, I yield 2 minutes to the gentlewoman from Maryland (Mrs. HOLT).

Mrs. HOLT. Mr. Chairman, I support the Kemp-Roth and the Steiger tax reduction proposals.

I want to disagree with those who have argued this afternoon that a substantial tax cut will create a huge inflationary deficit. They are assuming that Federal spending will continue to grow at a rate of 10 to 11 percent a year.

I would remind them that most of the members committed to tax reductions are also committed to significant reduction in the growth rate of Federal spending.

Next week I will offer a substitute budget resolution which will give us the opportunity to reform ourselves on the spending side of the fiscal equation. To deal with the spend part of the tax and tax and spend to spend syndrome.

When the second concurrent budget resolution comes before the House, I will offer a substitute which will restrain the growth rate of Government spending. The substitute will cut the deficit and reduce the tax burden of business and middle-income taxpayers.

We can adopt this kind of restraint and continue that restraint for 3 or 4 years with tax reductions, and we will have a growing economy, a strong dollar, and a surplus of revenue.

The 7.4-percent growth rate I envision would enable us to continue providing the people with all essential services, at current levels but they would be relieved of high inflation and excessive taxation.

I propose that we discipline ourselves on spending, not unrealistically but responsibly.

Mr. BAUMAN. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I will be happy to yield to my colleague from Maryland.

Mr. BAUMAN. Mr. Chairman, while many people have spoken during the general debate on this bill I think the gentlewoman has made one of the most important points for those of us who consider ourselves to be conservative both in spending and in tax policy. That is, that her amendment to be offered next week to the second budget resolution will offer a chance for those of us who support Kemp-Roth to both reduce taxes by 30 percent over 3 years, and during the same 3 years the Holt amendment will require a reduction in the growth of Federal spending and balance the budget while taking into account the Kemp-Roth tax reduction.

I think that really is a responsible approach. I commend my colleague and I am pleased to be cosponsor of her legislation.

Mrs. HOLT. I thank my colleague.

Mr. CONABLE. Mr. Chairman, I yield such time as he may consume to the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. Mr. Chairman, I thank the gentleman for yielding to me.

Mr. Chairman, I commend the distinguished chairman of the Ways and Means Committee, the gentleman from Oregon (Mr. ULLMAN), and the distinguished ranking minority member, the gentleman from New York (Mr. CONABLE) and their Committee on Ways and Means for their diligent efforts in bringing this measure, H.R. 13511, the Revenue Act of 1978, before the House at a time when an uncertain economy demands that our tax system be more responsive to the critical needs of our Nation's citizens and business.

While I would have preferred that this legislation go further in providing much needed relief in areas, such as social security taxation and broader across-the-board tax cuts in the range of 33 percent, as suggested in legislation introduced by my distinguished colleague from New York (Mr. KEMP), the bill does include several key features that I am confident will help to reduce an otherwise considerable tax burden which when coupled with increasing inflation faces the majority of our Nation's taxpayers with an inequitable and inordinate fiscal hardship.

However, I urge my colleagues to support modification of the bill as reported by the Ways and Means Committee in the manner recommended by the Fisher-Corman amendment.

That amendment would provide a greater overall tax reduction—$18.1 billion as opposed to $16.3 billion contained in the committee bill. Moreover, in cutting individual income taxes by $12.4 billion, the Fisher-Corman amendment focuses tax relief more equitably on incomes below $50,000. It does so by increasing general tax credits from the current $35 to $100.

Thus, the effect of this mechanism is felt evenly throughout all tax brackets, and does not as the committee formula does in widening the tax brackets, provide a percentage cut, the benefits of which accrue more advantageously to higher incomes.

While the Fisher-Corman amendment retains the beneficial language of the committee bill, reducing the maximum capital gains rate to 35 percent, it would place a new and fairer "alternative" minimum tax on capital gains. Long arguing that increased capital formation, business investment, and increased productivity are contingent upon a capital gains cut, I believe however that the Fisher-Corman measure more adequately, than does the committee bill, addresses the need to remove from exclusion those capital gains that are unnecessarily sheltered.

Estimates indicate that the Fisher-Corman amendment would raise $466 million in revenues as opposed to $148 million gained by adopting the committee formula—a savings to the Treasury and to our taxpayers of over $300 million.

The Fisher-Corman amendment leaves intact, however, the committee bill provisions that taxpayers be permitted a one-time exclusion of up to $100,000 of the gain on the sale of any home used as a principal residence for 2 years.

This much-needed measures provides the homeowner, in a time of escalating housing costs, the opportunity to maximize the gain realized on the sale of a personal residence.

Thus, while I am generally supportive of the intent of the committee bill, I urge my colleagues to support the more

equitable tax cut provisions contained in the Fisher-Corman amendment to H.R. 13511.

Mr. CONABLE. Mr. Chairman, I yield 3 minutes to the gentleman from Indiana (Mr. HILLIS).

Mr. HILLIS. Mr. Chairman, the common plea we have all heard from constituents calls for relief from the tremendous tax burden they are expected to bear. Most of us have seen the illustration indicating that the average worker now spends almost 3 hours of every working day in support of this tax burden. A burden which by itself is hard enough to manage, but when coupled with the tremendous increase in inflation of the last 10 years has led to the result of dampened incentive, a stagnant economy and limited investment. Our taxes have become suffocating. Yet, in spite of the need for relief—almost every American taxpayer faces a still higher total Federal tax next year—even if the $16 billion tax cut in H.R. 13511 is enacted. Tables compiled from data of the Joint Committee on Taxation show that this tax reduction would not offset the impact of inflation and higher social security taxes for most taxpayers. After these two factors are taken into account, the tax burden for middle-income taxpayers would rise between $84 and $261 a year; and for those earning $10,000 a year and less, the rise would be between $29 and $40. A $16 billion tax reduction is simply not enough to provide relief.

We must loosen the constraints which the present Federal tax system imposes on our free enterprise system. I support the philosophy reflected in economist Laffer's curve which indicates that the bigger the tax bite, the less incentive there is for working, saving and investing. The result is slower growth, higher unemployment and lower revenue.

If this tax bite is reduced, the incentive to work, save and invest is increased resulting in higher economic growth, more jobs and higher tax revenues. It only makes sense that increasing the after tax or take home pay of individuals will lead to added work effort, savings and investment. Lower tax rates will not only provide added incentives, but to the extent that these tax reductions reduce the cost of labor to employers, they will encourage additional job creation and employment opportunities.

For these reasons, I am strongly in favor of the individual income tax reductions offered in the Roth-Kemp bill. As you are aware, this bill would reduce all individual income tax rates by an average of 30 percent across the board. Reducing the highest marginal rate from 70 to 50 percent and the lowest tax rate from 14 to 8 percent over 3 years. When fully effective this means a family of four earning $8,000 would have a reduced tax burden of 90 percent, the same family earning $15,000 would have its burden reduced by 39 percent, and families earning more than $20,000 would have their tax bills reduced by approximately 33 percent.

These are not irresponsible tax reductions. Critics who argue that such reductions will increase our national debt should be reminded that historically, the exact opposite has proven to be true. In 1963, despite criticisms it would increase our national debt, President Kennedy implemented a similar program of tax reductions and rather than creating a deficit the Treasury actually gained $54 billion in revenue.

Healthy economic growth stimulated by tax cuts was responsible and such an approach can work again. There is nothing mysterious about this process. Tax reductions stimulate the economy. In turn, the rejuvenated economy pours additional tax revenues into the Government. As my esteemed colleague (Mr. KEMP) has pointed out, to finance itself without producing inflation, a tax cut increases the gross national product, causes existing savings and investment funds to change out of tax shelters and nontaxable uses into taxable uses, makes savings more rewarding after taxes, and increases more output.

In other words, tax reductions are not inflationary, they are self-financing and can help to provide the kind of long-term economic growth needed to relieve the average taxpayer without adding to inflation.

Between the tax increases and the effects of inflation, real income for most Americans has been stagnant for nearly a decade. More than 200 years after the Boston Tea Party a second rebellion is beginning to show in the consent of the governed to continue to allow themselves to be taxed at ever-increasing rates as proposition 13 in California indicates.

How long can we ignore the symptoms of our ailing economy and the please of our constituents? We must take positive steps now. I, therefore, urge my fellow colleagues to join with me in supporting the needed individual tax reductions offered in the Tax Reduction Act which Mr. ROTH and Mr. KEMP have worked so long and hard to bring before this House. The American people are waiting.

Mr. CONABLE. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. GOLDWATER).

Mr. GOLDWATER. Mr. Chairman, I rise in support of the committee bill although I feel we could use a greater tax cut than provided in this legislation.

At a recent 4th of July picnic in Thousand Oaks, a constituent and his wife really layed into me: "Why isn't inflation being stopped?" "Why don't you people do something to provide more jobs?" "Taxes keep going up." "We can't make ends meet!" To say the least they were mad as hell and seem to reflect the concern of most Americans.

I have studied the economic dilemma we face as a Nation and concluded: That a new formula for prosperity is simply a "tax cut"—across-the-board reduction in the tax rates and capital gains tax for all Americans.

Sure we have got to do a better job of managing the Federal budget and we should try hard to balance that budget and keep spending in check. But we have always been a generous people. We have become expert in unloading the wagon to help those in need. And we should not have to stop this unloading because there are a lot of folks that need our help. What we must do is to become better at loading the wagon. And this can only happen if Americans have the incentive to work hard, produce, save and invest. In other words we can pay for the costs of government plus keep more for ourselves if there exists a stable, prosperous economy.

We must concentrate our intellectual resources and political skills on the problem of economic growth. We are the most free, most educated, creative, talented, energetic, healthy people on Earth—operating at less than half our potential.

The reason there is stagnation and no bounce in our economy is because inflation and taxation are destroying the will and desire to work.

What is needed is a revival of the American dream. An idea of America as a land of opportunity—where you can grow and climb to the limits of your ability and desires.

Government at one time was supposed to create a climate of freedom and opportunity and be an impartial referee. Today government is the competition—it is the other team and it is winning.

Taxes go up faster than cost of living.

A recent report from the Congressional Joint Tax Committee showed that a 10-percent annual rate of inflation increases taxes by 15 percent. For example, between 1965 and 1977 wages and personal income went up 100 percent but taxes went up 150 percent.

Californians are not dumb—they well realize that the harder they work the more taxes they pay. They get their cost-of-living increase—yes—but they wind up with less money due to being pushed into higher tax brackets.

The American dream has been crushed under a staggering burden of inflation and taxes.

Taxpayers spend more money for taxes than anything else. A family of four will pay 35 percent of its income for taxes, but 19 percent on housing, 14 percent on transportation, 8 percent for medical care, 5 percent on recreation, and so on.

Most Americans desire a better life and are willing to work hard for it. What poisons that ambition—that dream—is when the system stands in your way.

Today we have a system that penalizes or taxes work, employment, production, savings and investment—while subsidizing nonwork, leisure, consumption, welfare and debt. No wonder we have less economic growth, high unemployment and double-digit inflation.

The real problem with our American economy is that incentive is being taxed away. Taxes at all levels now take more than 44 percent of our income. Along

with steeply graduated tax rate, our private enterprise economy's ability to create jobs and generate higher real income is being strangled.

Why work harder, why be smarter, why produce more, when Government will simply take whatever monetary gains might be made?

A NEW STRATEGY

The time has come—long overdue—to produce a new strategy for prosperity and economic growth. One that will restore the reward for working, saving, and producing and investing. In that regard I support the Ways and Means Committee bill. It would do more for economic growth. However by adding the provision of the Tax Reduction Act of 1977 also known as the Kemp-Roth bill. This would:

First, reduce all individual income tax rates by an average of 33 percent;

Second, reduce the corporate tax rate by 3 percentage points from 48 to 45 percent over 3 years, and third, increase the present corporate surtax exemption from $50,000 to $100,000 to help small business and those men and women who see more capital for expansion and job creating enterprise.

The main relief in tax-rate reductions would go to middle- and low-income taxpayers. For instance, a family of four with an income of $12,500 would receive a 41-percent reduction in the amount of their Federal tax liability. A family of four earning $15,000 would receive a 39-percent reduction. A family earning $20,000 would benefit by a 30-percent reduction.

In addition to the Tax Reduction Act, I favor a reduction in the capital gains tax now at 49 percent. By taxing the profits from invested capital at a lower rate; that is, 25 or 30 percent, we will once again see savings and investments flow toward smaller, riskier business ventures. We need to remind ourselves many of our giant corporations were once small and if it had not been for risk or venture capital they would not have gotten off the ground. If we're to stimulate economic growth plus employment opportunities we must create economic incentives to attract capital to small business, new ideas, and new inventions. Thus, a reduction from 49 to 25 percent in the capital gains tax is called for now.

I also strongly support the Archer indexing amendment which would allow taxpayers to adjust the basis of certain capital gains upward by the rate of inflation for the holding period of the asset. I think this type of provision is long overdue, and I believe the indexing concept should be extended to cover the rest of the tax code. It is only fair that we do something about the double whammy of inflation and the imposition of a tax on that inflation.

These tax reduction proposals if enacted this year will create an immediate growth of economic output, employment, and investment. It will expand the Nation's tax base: everyone will be paying less but there will be more employed people paying, thereby increasing tax revenues for all levels of government. It will reduce the pressure for more welfare and unemployment compensation.

It is a free enterprise alternative to more Government make-work projects and the Humphrey-Hawkins bill.

The Federal tax equation is simple: There is a tax collection side and tax spending side; that is, loading and unloading the Federal wagon.

In theory, collecting and spending should be equal, but they are not. More is spent than is taken in, and inflation results. We have become expert at spending—unloading the wagon. It is time to concentrate our efforts on economic growth and prosperity; that is, loading the wagon.

Reducing the income tax rates for every American across the board would increase the reward for work, productivity, and investment; thereby stimulating economic expansion and millions of new job opportunities without inflation.

By removing the barriers between effort and reward, we will once again restore incentive and put the American dream within reach of all our people.

Mr. CONABLE. Mr. Chairman, I yield such time as he may consume to the gentleman from Florida (Mr. YOUNG).

Mr. YOUNG of Florida. Mr. Chairman, I rise in support of this long overdue tax reduction legislation.

Mr. Chairman, the House has an outstanding opportunity today to show the American people that it is serious about helping beleaguered taxpayers by cutting the tax rates through action on the Revenue Act of 1978. H.R. 13511 is the result of months of work by the members and staff of the House Ways and Means Committee and overall it is about the best bill that could be reported from the committee to deal with the complex subject of reducing taxes for the millions of individuals, corporations and businesses who provide the money the Congress uses to appropriate the funds needed to finance Federal programs and projects.

Tax reduction is long overdue. Over the years, with Government getting bigger and bigger, and therefore costing more and more, taxes have risen to help pay for the increased spending voted by previous Congresses. By supporting this bill, each Member will show that he believes that Government has become too big and the best way to cut back on its ever-increasing size and power is to limit the resources that allows the Government to sustain its gigantic proportions.

Basically, this legislation is a good compromise bill that could use some improvement and there are several amendments being offered to do this. I support and applaud the measure for the needed tax reductions it provides to both individual and corporate taxpayers while taking into consideration the basic fiscal realities facing a deficit budget and inflationary pressures. This bill is not a panacea for all that ails the taxpayer who is facing an annual increase in the taxes that he pays. Even if the bill in the committee's reform becomes law, most taxpayers will be paying a higher percentage of their income in Federal taxes in 1979 than in 1977. Inflation and higher social security taxes have helped to erase the tax savings that the bill provides. However, if no action were taken, the taxes paid under the present law would be dramatically higher than they will be with this bill. The inflation adjustment provision in the committee's bill represents a major breakthrough in efforts to prevent the taxpayer from being adjusted upward into higher brackets because of artificial income raises brought about by inflation factors. Up to now the Government has profited by having some taxpayers pushed into higher tax brackets while their disposable income was actually decreasing.

I oppose the repeal of the deductions for State and local gasoline taxes for nonbusiness purposes and the deductions for medical insurance premiums as these repeals continue the trend of reducing deductions which in turn will place some taxpayers into higher brackets. Despite these and some other negative provisions in the bill, with positive aspects such as the tax rate cuts, increases in the personal exemption to $1,000 and increases in the standard deductions, the good points of this legislation far outweigh the bad.

Mr. Chairman, for the past few years, the Federal Government has been caught in an unending spiral that it helped to create and maintain. Inflation caused by deficit spending has caused the cost of Government goods and services to increase so it therefore costs the Government more each year to maintain the previous levels of service. While the Government has been able to print more money and increase the national debt to have the resources to pay the bills, the American taxpayer and consumer have not had this "luxury" and the ravages of inflation are felt with every increasing expense and the shrinking of the buying power of every dollar of income.

In the midst of the euphoria that Congress will surely feel by passing a massive tax reduction bill in an election year, I believe that my colleagues must be constantly aware of the responsibility that goes hand-in-hand with the "privilege" of allowing the taxpayer to pay a little less next year than he would have under the present law. The responsibility that must be accepted and lived with is the need to also reduce Federal spending. The good that we do today will be wiped out in the future if the Congress continues to create programs that can only be supported by deficit spending.

Just as the tax cut is overdue, so is the need to cut expenditures. The majority of the House and Senate have too long spent more than is taken in. Now that we are cutting the "income" to the Government, we must keep in mind that the "outgo" must also be cut. This tax cut bill offers an excellent opportunity to take a close look at the wasteful Government programs—we realize that there

are many. Starting today, I urge my colleagues who support this tax reduction bill to continue their desire to help the taxpayer by cutting their desire to spend, spend, spend.

We will have less coming in next year so there must be less going out. It is a complex situation but the math is as simple as that. Every American living on a budget realizes this and it is time for the U.S. Congress to do so also.

Mr. ULLMAN. Mr. Chairman, I yield 3 minutes to the gentlewoman from Kansas (Ms. KEYS).

Ms. KEYS. Mr. Chairman, I strongly support several provisions of the legislation that has been reported by the Ways and Means Committee. However I intend to vote for the Corman-Fisher amendment because I think it is necessary in order to make this tax bill fair to the middle-income taxpayer. I do support wholeheartedly the homeowner tax relief provision, the graduated corporate tax provision, and a simplified medical deduction which brings simplicity to the whole area of medical deductions and much greater recognition of the outstanding expense incurred for medicine and drugs and unusual medical expenses.

For the vast majority of taxpayers, the sale of their home is the only capital gain transaction they will ever have. Clearly, the primary purpose of owning a home is to shelter one's family not to shelter one's income. With the rapid inflation in real property which has occurred in recent years, ordinary taxpayers find themselves faced with large capital gains from the sale of their homes. This provision would protect individuals, primarily those over 50, from unexpectedly high taxes on a purely inflationary gain.

Another portion of the bill which I strongly supported and worked hard for in committee was the graduated corporate income tax. Members of my northeast Kansas advisory board have emphasized that the need for corporate tax relief is greatest in the small business sector among those businesses which are the backbone of the economy in Kansas and across the country. Research done by the National Federation of Independent Business points out that smaller businesses offer more jobs per dollar of income than do large businesses. I believe the new graduated corporate income tax will do a good job of reaching those businesses who need it most.

I am sorry that this bill does not include several provisions which were offered in committee and which I believe the majority of Americans support. Indexing of tax rates for individuals was defeated. A tax credit for social security taxes was defeated. Amendments that would have eliminated some of the most expensive and abused business entertainment deductions such as those for club dues, yachts, lodges and first-class airfare, were defeated. An amendment to prohibit business entertainment deductions for entertaining Members of Congress and Government officials was defeated.

Without the passage of the Corman-Fisher, the very people this tax bill was designed to relieve, the people in the middle-income brackets who will have the greatly increased social security taxes of 1979 due to the increase in the wage base, will not be given the relief they deserve. The Corman-Fisher amendment will bring a great deal of difference into the distribution of this income tax.

The typical family of four at the $20,000 income level will have a tax cut of $228 under Corman-Fisher as opposed to $146 under the committee bill. That is a significant difference. A typical family of four at the $30,000 income level will have a savings of their taxes of $423 as opposed to $304 under the committee bill.

I believe it is absolutely necessary that we pass the Corman-Fisher amendment to make this bill meet the goals for which it was designed and to bring some equity to those middle-income taxpayers.

The committee bill also would significantly weaken the concept of the minimum tax, that concept that everyone should pay some portion of the costs of Government.

I support the changes in the capital gains provision and believe that the maximum rate of 35 percent on capital gains, which is achieved in the Corman-Fisher amendment as well as the committee bill, is a proper one. However the way it is achieved is most important. The Corman-Fisher amendment does preserve the idea that some tax should be paid. For the taxpayer who pays a normal income tax and has a capital gain, there will be significant cuts in the capital gains rate over present law.

But for the taxpayers, who shelter and avoid all regular income tax, the Corman-Fisher amendment will preserve some reasonable, modest payment of the taxes on that capital gain although much less than present law.

I hope my colleagues will support the Corman-Fisher amendment and improve the committee bill so as to make it meet some of the goals for which it was designed.

The CHAIRMAN. The Chair will advise that each side has 4 minutes remaining.

Mr. CONABLE. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois (Mr. CRANE).

Mr. CRANE. Mr. Chairman, I thank my distinguished colleague, the ranking minority member, the gentleman from New York (Mr. CONABLE) for yielding.

I would first like to make the comment that the proposal of our distinguished colleague, the gentleman from Texas (Mr. ARCHER), I think, is designed to provide a long overdue remedy and that the people who oppose indexing are in favor of increased taxes.

Mr. Chairman, no one rejoiced more than I when the Ways and Means Committee finally agreed to index the capital gains tax. In 1974, I introduced the first House bill to annually index our tax code. As inflation has grown, support for this indexation concept has grown as well. The amendment attached by my colleague from Texas (Congressman ARCHER) to index capital gains taxation is the greatest victory to date for indexing.

Congressman ARCHER's language provides that the base value of an asset subject to capital gains taxes will be increased each year by the same percentage as the rise in the consumer price index. This effectively eliminates inflation from the taxable appreciation of a capital asset.

Under our law, actual increases in value of property are subject to taxation. Inflation distorts this basic rule. The number of dollars required to purchase property may increase to keep pace with inflation, while the real value of the property may increase, decrease or remain constant. Thus, a person buying a home for $30,000 in 1975 and selling it for $50,000 in 1978 is taxed on a capital gain of $20,000. But a significant portion of that increase in price must be attributed to inflation. Only the nominal, or paper, value of the home increased by $20,000. The real gain was only $14,000. Inflation had caused the other $6,000 of dollar increase. When indexing is fully effective under the Archer amendment in 1980, this homeowner will only be taxed on the real increase in value, $14,000, not on the whole nominal inflation-caused gain of $20,000.

Inflation is not ordinarily considered to be a tax. And yet that is what it is. It increases our taxes by altering the nominal or apparent value of our property. Assuming that inflation could be kept to a rate of 6 percent for future years, a family which bought a home in 1977 for $40,000 and kept it for 20 years would have to receive $130,000 upon its sale in 1997 just to recover their initial investment and avoid a capital loss. But under our present tax code, this would be considered a $90,000 capital gain, even though the real value of their property had not risen in the slightest. Because homeowners hold their property for long periods of time, it is clear that they stand to benefit most from indexing capital gains.

Despite the claims of opponents that periodic tax cuts by Congress help ease the burden of inflation-caused increases, this has not been the case. Congress provides occasional tax adjustments, not real tax cuts. These adjustments have not provided relief at the rate of inflation. The taxpayer is still losing; the tax collecting government is still winning.

We need to recognize the political problem of tax indexing. If the "bonus" for the Federal Government resulting from inflation is eliminated, Members of Congress are going to be faced with the choice of reducing expenditures or increasing explicit taxes or borrowing additional funds from the public at the interest rate of the market at the time. None of these choices is an attractive one for the politican. The politician prefers to take credit for a periodic (though not

real) tax cut rather than the one-time credit for indexing the tax rates to shield the public from inflation's penalty. It is time that we consider what is most beneficial to the public rather than a safe political course.

Despite many years of talk and discussion by politicians, we still have a serious problem with inflation. This problem is with us and may be even more serious in future years. But the tax effects of inflation are becoming painfully clear to the taxpayer. The taxpayer, though gaining a wage increase in nominal dollars to keep pace with inflation, has learned that he has gained nothing. He is only pushed into a higher tax bracket and pays more of his income in taxes. Inflation is reducing his real income and standard of living because of the higher level of taxation. This is correctly labeled a "hidden tax increase."

This tax increase has not been legislated by Congress. This tax increase is caused by the Government's activity in promoting and encouraging inflation by excessive spending. Thus, the reckless spending of Government rewards the spenders with more of the taxpayer's money to spend. Inflation is rewarding those who cause it. No wonder it is so hard to control.

I only regret that Congress is not considering the complete tax indexing proposal I made in 1974. That proposal would not limit indexation to capital gains, but extend it to personal income taxes as well. Canada has had complete tax indexing for nearly 4 years. The Canadian system has insulated Canadian taxpayers from automatic inflation tax increases and has helped limit increases in Government spending.

Indexing is not inflationary, but merely helps the taxpayer cope with inflation. In fact it can be counterinflationary by putting pressure on Congress to reduce spending. Without hidden tax revenues from inflation, Congress may look again at its spending policies,

It is my firm opinion that complete tax indexing is inevitable. It is inevitable for two very fundamental reasons, one economic and the other political. The economic reason is that, unfortunately, inflation will tend to be around for a long time and that means that the idea of leaving the tax brackets expressed in simple dollar amounts will soon become not just unfair, but absurd. We should recall that when the present tax brackets were set in 1964, the inflation rate was 1 percent. Economists did not even think to adjust the brackets for inflation—it just was not a problem. Since then, of course, prices have almost doubled. And if inflation continues to average 7 percent a year, prices will keep on doubling every 10 years from here on in.

That means that a 25-year-old worker who takes a job at $15,000 a year in 1980 will have to be up to $30,000 in 1990, $60,000 in the year 2000, and $240,000 a year by the time he reaches retirement age in 2020—just to stay even. Obviously, something has to give, and if not inflation, it will have to be the brackets.

The political imperative is equally powerful, if not quite as mindboggling. As political scientist Everett Ladd points out, taxflation has helped to place more and more of the tax burden on the middle class. He writes:

> Those earning four times the national median income in 1953—about $20,000—paid 20.2 percent of their income in taxes, while those at the median paid 11.8 percent. Twenty-two years later, median income families were taxed 22.7 percent of their income, while the rate of those earning four times as much had climbed more slowly to 29.5 percent . . .

If Congress does not index the income tax soon, it will be running a very severe risk of inviting a full scale middle-class revolt. Witness proposition 13.

No other proposal holds as much promise of both reducing the harm done by inflation and facilitating the ending of inflation itself. I respectfully urge Congress to approve the indexing concept.

Mr. CONABLE. Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. COUGHLIN).

Mr. COUGHLIN. Mr. Chairman, I rise in support of the committee bill.

Mr. Chairman, today the House has the opportunity to provide a modicum of relief to the Nation's long-suffering taxpayers who are caught in a vicious inflation-taxation vise.

Before we fall all over ourselves with self-congratulations for cutting taxes in an election year, I think we had better face up to the facts: the simmering resentment of millions whose real purchasing power has fallen below their income increases and inflated tax bills is responsible for the collective Congress urge to be a friend of the common man.

All of us are aware that the Joint Committee on Taxation has cautioned that even with a $16 billion tax cut, there will still be even higher Federal taxes next year for almost every American taxpayer. The onerous hikes in social security taxes and heightened inflation are the causes.

As a sponsor in 1977 of the Kemp/Roth bill, I believe that this year the need for effective tax reduction, not just income redistribution, is even more evident.

My advocacy of significant tax cuts is based on two facts: the abject failure of Federal pump-priming schemes to spur the economy and the success of tax reduction programs in the past.

Government efforts, through assorted programs and tinkering, have failed miserably and I challenge my colleagues to prove otherwise. The quick-fix economic stimulus legislation of 1977 was a big, expensive bomb. Attempts to reduce unemployment by creating Federal public service jobs also have failed. Traditional methods employed by the Federal Government to increase productivity are not working.

I believe that the times and the people demand innovative tax policies that cut us loose from the policies and programs that have been reworked, refinanced, and rewrought with no success.

We need policies and programs that will alleviate the twin burdens of inflation and unemployment.

Through a major tax cut, we can create more new jobs and improve the overall health of our economy. This is not a radical idea. When it was tried in the Kennedy administration, it succeeded and did so without fueling inflation. While some may argue that times are different now, I believe that there are more similarities than differences. We need the reductions and we need substantial ones.

One buck in the hands of a workingman and in the hands of investors goes far, far further than one buck paid into the Federal Treasury and funneled out through the bureaucratic maze.

Under our present inhibiting tax system, initiative is penalized instead of being rewarded. As it stands now, people from all walks of life, as well as the business community, are becoming discouraged.

Let us give our money a chance to work for the people and the country instead of making the people and the country work for the Federal Treasury.

We can do no worse than we are now. The evidence and commonsense, in fact, tells us that we will do much better.

Mr. CONABLE. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio (Mr. REGULA).

Mr. REGULA. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I would like to speak to my colleagues on the other side of the aisle, and hope they will support us in this effort to bring tax relief to the American public.

Mr. Chairman, in a recent edition of Forbes magazine, the editor quoted Franklin D. Roosevelt. We have heard him quoted many times on this floor in support of programs and so I would like to share this quote from Franklin D. Roosevelt, a great leader of the Democratic Party when as a candidate for President in 1932 he said:

> I shall use this position (as President) of high responsibility to discuss up and down the country, in all seasons, at all times, the duty of reducing taxes, of increasing the efficiency of government, of cutting out the underbrush around our governmental structure, of getting the most public service for every dollar paid by taxation. This I pledge you, and nothing I have said in the campaign transcends in importance this covenant with the taxpayers of this country.

He concludes with these words:

> Taxes are paid in the sweat of every man who labors, because they are a burden on production and can be paid only by production. If excessive, they are reflected in idle factories, tax-sold farms, and hence in hordes of the hungry tramping the streets and seeking jobs in vain.

I hope our friends will follow the advice of one of their great leaders, Franklin D. Roosevelt, and vote for tax relief for the American public and avoid the pitfalls he outlined in his remarks.

Mr. ULLMAN. Mr. Chairman, I yield 1 minute to the gentleman from Pennsylvania (Mr. KOSTMAYER).

Mr. KOSTMAYER. Mr. Chairman, I rise to comment on the Revenue Act of 1978 (H.R. 13511) which the House has under consideration today.

First, Mr. Chairman, I must express my great disappointment with the leadership and the Rules Committee in asking the House to approve a rule limiting debate on the several key amendments which the rule allows, and even more so, in denying the House an opportunity to vote on an amendment to offset the increase in social security taxes which are due to go into effect January 1979.

My colleague, Mr. GEPHARDT of Missouri, sought a rule which would allow him to offer an amendment which, while not a true rollback of the payroll tax, would have softened the impact of the social security tax increases by providing for a refundable tax credit of 5 percent for payroll taxes paid by employees, self-employed persons, and employers for years beginning in 1979 and 1980. While this amendment would not change the way we finance the social security system—and I favor changes which would allow for the use of general tax revenues to pay at least part of the cost of social security—it would have reduced the impact of the payroll tax increases to take effect in January, and permitted the next Congress to take up a comprehensive social security reform measure.

Turning to the Ways and Means Committee bill itself, it provides for a $16.3 billion tax cut for 1979—$12.8 billion for individuals and $3.5 billion for corporations. This tax cut is not large enough, I believe, especially in view of the pending increases in social security payroll taxes—and is not spread equitably among taxpayers.

There is much in the bill which I do support. For example, the present 10-percent investment credit which is due to expire at the end of 1980 is made permanent, and, more importantly, is expanded to include rehabilitation expenses for industrial and commercial buildings—including retail structures and warehouses. The cities in the Northeast and Midwest will benefit a great deal from this change.

Contributions, especially small businesses, will receive important tax relief. The maximum corporate rate is lowered from 48 to 46 percent, and the first $100,000 of taxable income is taxed more gradually at lower rates. The bill includes a permanent job tax credit to encourage private business to employ welfare and food stamp recipients, as well as the handicapped and Vietnam veterans.

The bill also includes a provision to enhance the ability of business to purchase and install pollution-control equipment. Under current law, if a business has elected the 5-year amortization for pollution-control facilities, the investment credit is allowed for only one-half of the investment. The bill allows use of the full investment credit on pollution-control facilities which are amortized over 5 years and which have actual useful lives of at least 5 years. I frankly favor even greater incentives for installation of pollution equipment, but am pleased that the committee took some action to ease the financial burden to industry in this area.

In spite of my support of these provisions, I plan to support the Corman/Fisher amendment to the bill. Corman/Fisher spreads more equitably the individual tax cuts—particularly for middle-class taxpayers. Taxpayers in all income brackets through $50,000 would receive greater tax relief under Corman/Fisher. For example, a typical family of four with income of $20,000 would save $228 under the amendment as compared to $146 under the committee bill. A family at the $30,000 income level would save $423 under the amendment as compared to $304 under the committee bill. For a family making $50,000, the amendment would increase the tax relief in the committee bill from $654 to $700.

Looking at the advantages of Corman/Fisher in another way, I note that 87 percent of the total individual relief under the Corman/Fisher proposal would go to persons with less than $50,000 of income, while under the committee bill almost one-fourth of the relief goes to taxpayers with incomes over $50,000.

Both Corman/Fisher and the committee bill slash capital gains taxes—and I support such cuts as an inducement for private investment. I favor the approach of Fisher/Corman, because the committee bill repeals the minimum tax which now sometimes applies to the untaxed half of capital gains. This is not right, and not in the interest of equitable treatment for persons with earned income who have no means to "shelter" their income from taxes. The tax on capital gains can be lowered to increase incentive to invest without allowing the very wealthy to avoid paying any Federal income tax at all.

The Corman/Fisher proposal would cut taxes by $18.1 billion a year instead of the $16.3 billion in the committee bill. I think this $18 billion cut is justified, and does not pose the inflationary dangers which more substantial cuts do. At the same time we pass tax cuts, I caution my colleagues that we need to buckle down and cut spending so that we can progress toward a balanced budget.

Mr. ULLMAN. Mr. Chairman, I yield such time as he may consume to the gentleman from Georgia (Mr. LEVITAS).

Mr. LEVITAS. Mr. Chairman, I thank the gentleman for yielding, and I rise in support of the tax reduction targeted to the middle income taxpayers.

Mr. Chairman, I rise in support of a tax cut which is targeted to benefit the middle-income taxpayer. It is this group of productive citizens who largely bear the burden of financing government at all levels, yet it is the group that is usually overlooked when it comes to providing some tax relief and tax equity.

Everyone should pay his fair share of the cost of government, but it is not right for some people to escape paying any significant tax while others pay more than their fair share. For that reason I favor the concept of a minimum tax formula which assures that each person pays something to support the government regardless of deductions, writeoffs, allowances, and shelters. This is only fair to those hard-working wage earners who pay the maximum of tax for their bracket but cannot avail themselves of special tax shelters to avoid paying taxes. A minimum tax assures equity and that everybody pays a share of the cost of government.

We also need a tax structure which encourages the formation of capital for investment in the private sector of the American economy. It is this vibrant, productive private sector that provides the jobs, the material wealth, and the standard of living for all of us. It also provides the tax base that supports all the government. We must provide incentives—not disincentives—for people to save and to invest. In the long run that is where the real hope of our economy lies.

In all of this it is the middle-income earner who produces, earns, saves, consumes, and invests. For these reasons, my decisions in supporting or opposing the amendments to the tax bill will be based on how the middle-income taxpayer will fare.

It is also interesting to note who Americans believe the middle-income taxpayer really is and how he fares today. A national opinion survey conducted this year by the Roper organization makes some interesting findings on these questions, which I submit for my colleagues' consideration as follows:

WHICH GROUPS PAY TOO MUCH OR TOO LITTLE IN INCOME TAXES

When asked whether certain groups pay too much in income taxes, too little or about the right amount, the public once again demonstrates what it means when it characterizes the tax system as "unfair." As last year, few people think any groups are taxed fairly. The group most seen as overtaxed is middle class families, and more so than a year ago. 74% now say they pay too much in taxes, versus 69% in 1977. The other group seen as overtaxed by a larger majority than a year ago are people whose income comes all from salaries or wages—63% now, 59% last year. Also seen as overtaxed, but somewhat less than a year ago are people who own their homes and low income families. Still overwhelmingly seen as undertaxed are high income families and large business corporations, each seen as paying too little by about three-quarters of the public.

Q9. Here is a list of some different types of people or groups. (Card shown respondent) Would you go down that list, and for each one tell me whether you think they have to pay too much in income taxes, or too little in income taxes or about the right amount? First, low income families.

	1978—Pay in taxes				1977—Pay	
	Too much (percent)	Too little	About right	Don't know	Too much (percent)	Too little
Answers of total public (2,007 respondents):						
(b) Middle income families	74	2	20	4	69	2
(d) People whose income all comes from salary or wages	63	2	24	12	59	3
(f) People who own their homes	50	2	33	15	53	3
(a) Low-income families	47	4	37	13	53	5
(i) Small business companies	38	12	30	20	42	10
(g) People who live in rented homes or apartments	37	11	31	21	38	11
(e) Self-employed people	29	15	28	28	30	17
(c) High-income families	7	76	9	7	8	75
(h) Large business corporations	5	72	10	13	6	72

Note: Letters next to listed groups indicate the order in which they were asked about.

As noted in the last study, while there are some few variations in results by the various subgroups, for the most part there is consistent feeling as to which groups are overtaxed and undertaxed. Generally speaking, those who fit into a group tend more to think that group is overtaxed, but these differences are mainly one of degree rather than a reversal of results. For example, some illustrations of the feeling that "I am overtaxed" are that the self-employed are higher (53%) than the general public (29%) on feeling self-employed people are overtaxed. Homeowners are more likely (53%) than the general public (50%) to say homeowners pay too much. Home renters are more likely (50%) than the general public (37%) to say people who live in rented homes or apartments pay too much. As noted in last year's report, it seems that everyone feels that he pays too much in taxes.

However, looking at opinion on taxes paid by low, middle and high income groups according to income of respondents reveals some interesting and seemingly inconsistent results. While it is true that more people at the lower end of the income spectrum feel lower income families are overtaxed, a majority in all income categories feel middle income families pay too much and high income families pay too little. This is true even among people in the $25,000 and over group.

[In percent]

WHO ARE THE "MIDDLE INCOME"?

This same pattern of opinion on the overtaxed and undertaxed income groups was observed last year, and the opinion of the $25,000 and over group that middle income families were overtaxed and high income families were undertaxed led us to speculate that "perhaps in this instance 'high income families' mean those with more income than they have." This year we decided to explore what people mean when they talk about "middle income" and "high income" families. Therefore, we asked people how high an income a family of four would have to have before they would describe them as a middle income family rather than a low income family, and then how high an income they would have to have before they would describe them as a high income rather than a middle income family. (The questions were reversed for half the sample.) Results were startling in light of the fact that the median income in the country today is $15,000, and "middle income" might be expected to center around that figure. Not in the eyes of the public. They say to be in middle income group annual income has to be between $20,000 and $40,000. This makes opinion as to who is overtaxed and undertaxed in our society much more understandable.

There is some variation in answers by people in different income groups, but all groups places the middle income group higher than we would have expected. Those in the lowest income group describe middle income people as those with incomes between $17,000 and $35,000. Those in the $25,000 and over group put middle income people between $23,000 and $51,000! Thus, when they say high income families pay too little in taxes they don't mean people in the $25,000–$35,000 bracket are undertaxed, they mean people earning somewhere in excess of $51,000 are undertaxed. Most of those in the $25,000 and over group think of themselves as *middle* income—the group they feel is not overtaxed.

Q50X,51Y. Thinking of a family of four, that is, a couple with two children, how high would their annual income have to be before you would describe them as a middle income family rather than a low income family?

Q51X,50Y. And again, thinking of a family of four, how high would their annual income have to be before you would describe them as a high income family rather than a middle income family?

	Total public	Income groups			
		Under $7,000	$7,000 to under $15,000	$15,000 to under $25,000	$25,000 and over
Number of respondents	2,007	375	648	606	358
MEDIANS					
Divides middle income from lower income	$19,702	$17,372	$18,836	$19,844	$22,907
Divides upper income from middle income	39,719	34,789	34,888	39,818	51,056

Mr. CONABLE. Mr. Chairman, I yield the remainder of my time to the well-known progressive from Ohio (Mr. BROWN).

Mr. BROWN of Ohio. Mr. Chairman, if we had a law requiring truth in taxes, we would have to tell the American people, our source of Federal revenue, that the Federal Government has the best of all worlds. Government profits from inflation and taxpayers suffer from it.

Back in the not-so-good-old-days of the 1930's, average income in the United States was about $1,600 per family and those average Americans paid no Federal income taxes to Uncle Sam. In those days, taxes were paid by the rich indeed.

But now the average taxpayer pays Federal taxes on almost $17,000 of family income per year. And he pays big Federal taxes—over 25 percent of his marginal income—not counting State and local income, property and sales taxes.

If Congress had really cut taxes regularly as inflation increased since then, the average U.S. taxpayer would not be paying anything today. Instead, he now sees his tax bill increase at the rate of 1.5 to 1.7 percent for every 1 percent increase in the cost of living.

But Mr. Average Taxpayer has been paying more and more each year during the past 40 years of Democratic congressional stewardship of our tax code.

Even with this proposed Ways and Means Committee tax cut, the average U.S. taxpayer will pay a predictably higher rate of his income next year and the next and the next, ad infinitum.

That is why Roth-Kemp is a needed addition to this Ways and Means bill.

Of all the tax proposals before us, only one can actually be called a tax cut: the Kemp-Roth proposal. The reason is that the inflationary tax increases I have mentioned and the social security tax increases voted by the Congress last December combine to add $332 billion to the tax bill Americans will pay between now and 1983. The Ways and Means Committee tax bill will reduce this figure slightly, to $262.5 billion, but that is still a massive increase in tax obligation. Even Roth-Kemp would

mean a slight increase in taxes in 1979, but the impact in later years would produce an actual tax cut of about $60 billion through 1983. That is a modest $12 billion per year on average. It is not enough to get the average family back to its nontaxpaying status, but it is at least a positive step toward the relief Americans are demanding.

We also need the Archer amendment indexing capital gains taxes so the average homeowner can be relieved of the burden of paying tax on inflation values.

And that is why I regret so much that the indexing of personal income taxes is not a part of this bill. The Roth-Kemp motion to recommit will help for the immediate future, but it is the old-fashioned way of cutting taxes——occasionally, to make up for past inflation. We need an automatic method of cutting taxes as inflation creeps up—certainly when it is "creeping" at double-digit rates, as it is now. Such an automatic indexing as I introduced in the last Congress, and cosponsored this year with Mr. GRADISON, Mr. TUCKER, Mr. LEVITAS and others, is vitally needed so that we can prevent this erosion of real income which results from inflation-induced tax increases. We would also find that income tax indexing would restrain the unwarranted growth of Federal spending. This past January, Mr. GRADISON and I discussed the Canadian indexing experience with officials in Ottawa. We found that their indexing played a major role in reducing the rate of growth of Government spending from 15.9 percent in 1974 to 2.7 percent in 1976.

I trust the future will see greater consideration for indexing personal income taxes. The Joint Economic Committee minority has recommended indexing for several years and last year's annual report saw the majority support us in our view.

Finally, if we had been successful in getting the Rules Committee to make in order a vote on the home insulation tax credit and the solar tax credit which are parts of the President's energy tax program, we could have honorably acquitted the promise made to the U.S. taxpayers in their 1977 tax returns. But I must say to the chairman of the Ways and Means Committee I have little confidence that we will get an energy tax bill this year.

The administration seems committed to a policy of holding hostage the insulation and solar credit until this body approves an increased tax on oil and gasoline—and that is not going to happen.

It is sad that the administration and my Democratic colleagues here talk of tax expenditures as if the earnings of each individual American belong to the State—the Federal Government—rather than to the individual.

Mr. ULLMAN. Mr. Chairman, before I yield the balance of my time to the gentleman from Oklahoma (Mr. JONES), let me commend the members of the committee for a fine debate. Let me also commend the Members on our side of the aisle, including the gentleman from Oklahoma (Mr. JONES), for all of the hard work that went into this effort.

Mr. Chairman, let me also commend the minority, the gentleman from New York (Mr. CONABLE), and all of the people on his side who joined in putting this package together.

Mr. CONABLE. If the gentleman will yield, Mr. Chairman, let me thank the gentleman publicly for his patience and his fairness.

Mr. ULLMAN. I thank the gentleman.

Mr. Chairman, this has been a team effort. It is a bill I think we can all be proud of.

Mr. Chairman, I yield the balance of my time to the gentleman from Oklahoma (Mr. JONES).

The CHAIRMAN. The gentleman from Oklahoma (Mr. JONES) is recognized for 3 minutes.

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. JONES of Oklahoma. I yield to the gentleman from New Jersey.

Mr. HUGHES. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the Corman-Fisher amendment to the Revenue Act of 1978.

Each time a tax bill is brought before Congress, countless Americans hold their breath and wait for the relief that is too ofen promised but not so often delivered. This year, we have a chance to really do something positive for the majority of American taxpayers—those who have annual incomes up to $50,000. Not only would this amendment provide larger individual tax cuts and more equitable distribution of the cuts, it also takes into account the legitimate need to lower the tax rate on capital gains.

We all talk a great deal about how the middle-class American taxpayer is suffering from the collective burden of Federal, State, and local taxes. Now we have the opportunity to provide real tax relief to the average working man and woman. I am talking about people who earn less than $15,000 a year and have families. These beleaguered taxpayers pay proportionately more of their income in taxes than most other income groups yet they receive blessed little relief. The Corman-Fisher formula would change that somewhat. For 24 percent of the tax cuts would be directed to those earning less than $15,000 and 38 percent would be directed to those earning less than $20,000. This is in sharp contrast to the committee's plan which would give just 13 percent of the tax cuts to those earning less than $15,000 but 24 percent to those with $50,000 plus in income.

We have heard a lot about the necessity of changing our capital gains tax formula and I agree with those who say that this aspect of tax law needs serious revision. Once again, I must agree that the Corman-Fisher approach makes the most sense in this area, too. The committee's version of capital gains reform in manna from heaven for the very wealthy. It seems quite logical to me to have graduated rate of tax liability on capital gains with the highest rate of capital gains with the highest rate of taxation reserved for those gains of substantial proportion. The encouragement to invest capital can be given without permitting the ultrawealthy to duck their fair share of the tax burden.

I urge my colleagues to look at the whole picture and cast their votes tonight for real tax reform by supporting the Corman-Fisher amendment to the Revenue Act of 1978.

Mr. JONES of Oklahoma. Mr. Chairman, the bill that the Committee on Ways and Means has before us today is one which commanded bipartisan support in the committee and one which should command bipartisan support in the House.

The reason is very simple. The four major goals which the American taxpayers demand are met in this compromise legislation. American taxpayers talk about tax relief, and they are saying, "Give us some tax simplification. Give us a tax form that we can understand, which cuts down the lines, cuts down the additions, and the subtractions."

Mr. Chairman, the bill before us today does that. In every instance when there was a case of simplification versus more complexity, the committee opted for simplification.

We dropped the 2-percent general credit. We changed the minimum tax procedures on capital gains. The goal of simplification was reached.

Another goal which is coming through to the Congress from the American taxpayer is to give relief to the middle-income taxpayer. This is the group of individuals now in the $15,000 to $50,000 income category, who have borne the brunt of Government costs over the past decade.

In this particular bill there is no attempt to add to the progressivity of the present tax code. Instead, we tried to make cuts roughly in proportion to what taxpayers are paying into the Treasury today.

Mr. Chairman, the middle-income taxpayers today pay 58 percent of the taxes. This tax bill distribution gives them 64 percent of the tax relief. The lower income taxpayer pays 13 percent of the taxes. They get 14 percent of the tax relief. The higher income taxpayers pay 28 percent of the taxes. They get 22 percent of the relief.

We feel that this is fair and meets what the American people are asking for.

The third major goal we have in this bill is to maintain consumer spending at its present high level but reduce inflationary pressure by reducing the size of the Federal deficit. The net $16.3 billion tax cut in the committee bill fully accomplishes this goal. The tax cut, averaging 6 percent for all Americans, offsets one year's worth of inflation. At the same time it will reduce the deficit by $9 billion.

Our fourth goal, Mr. Chairman, is to provide increased incentives for capital formation by both business and individuals. Numerous parts of this bill are focused on this goal. We have cut corporate income taxes and increased the surtax exemptions to spur investment by small businesses. We have liberalized depreciation rules. And we have significantly reduced capital gains taxes. No less than four highly respected economic

studies have analyzed this bill and concluded it will greatly expand investments, production, and employment.

Like any compromise, no one is totally satisfied with this bill. But it is a responsible bipartisan compromise designed to meet the economic problems of our country. It is supported by a majority of both parties in the Ways and Means Committee and I urge your support today.

● Mr. COTTER. Mr. Chairman, I rise in support of H.R. 13511, the 1978 Tax Revenue Act.

I know there are differences among my colleagues over this legislation, but on balance I believe the Ways and Means Committee has drafted a reasonable and beneficial bill.

The Tax Revenue Act provides over $10.5 billion in individual tax relief which, to my mind, is properly focused on middle-income Americans. This is accomplished through widening the tax brackets by 6 percent, reducing individual rates, increasing the standard deduction to $1,000 and repealing the general tax credit.

There has been extensive comment about who should, and who will, benefit under this bill. And I maintain that the figures on tax liability persuasively demonstrate that under this new bill our tax program continues to be progressive.

Let me give some examples with figures based on the traditional family of four:

Adjusted gross income (per year)	Federal tax liability under 1978 Revenue Act	Reduction in liability
$8,000	$84	$36
$10,000	384	62
$15,000	1,253	105
$20,000	2,034	115
$25,000	2,918	232
$30,000	3,929	304

What can be concluded from these figures is that the proposed reductions favor the middle class, and if one looks at the actual tax liability, it is obvious this relief is more than justified.

Indeed, if our Federal budget situation were different, I would favor more extensive cuts up and down the income scale. But the central fact of life is that inflation is our No. 1 economic problem and a tax cut much beyond $16 billion would seriously, if not dangerously, increase the Federal deficit.

Under the new bill, progressive tax rates will continue. A family making $8,000 will pay only $84 and a family making $10,000, only $384. Conversely, a family with twice the income, that is $20,000, will pay nearly six times as much, or $2,034 in Federal taxes.

You can see the ability to pay was carefully figured into the new tax bill, although the actual dollar amount of tax reduction is proportionately higher for those with higher income. I repeat, this reduction is justified because these people already bear the bulk of our national tax burden.

One more set of statistics is proof of my position. The Tax Foundation recently made a study on how many were paying how much, based on 1976 data. The study shows that people earning above $10,000 payed 93 percent of all taxes. Those with incomes above $17,000 payed 72 percent of all taxes and made up 25 percent of the population.

I hasten to add this study is based on data that is 2 years old and considering our rapidly escalating inflation rate, I am sure the burden on middle-income taxpayers is even greater than stated above. It is common knowledge that a progressive tax rate structure combined with inflation has pushed many people into higher tax brackets while eroding their purchasing power.

The bill before us represents a prudent step to offset the impact of spiraling inflation and increased social security taxes which Congress legislated last December. It does not do the whole job, but as I pointed out earlier, our Federal deficit dictates the limits of tax relief for 1979. We will do more in the future.

On the business side, tax relief will amount to about $5.5 billion. The cuts were designed to encourage expansion and investment. Changes in investment tax credits are geared at increasing productive capacity, and that means new jobs.

In particular, the bill makes the current investment tax credit on new equipment permanent at 10 percent up to a $25,000 credit. Expenditures above that amount will be credited at a 90 percent rate.

I introduced an amendment which I expect will significantly change growth and investment patterns in this nation by encouraging businesses to rebuild in the city using existing structures, rather than build new.

My proposal will extend the investment tax credit to the rehabilitation of business structures—commercial offices, industrial plants, retail stores and wholesale facilities. Lessors also would be eligible.

Companies could begin utilizing the credit for expenditures made from July 26, 1978 onward. There would be no dollar limit on the amount of the credit. However, it would be computed over time according to the same basis as now exists for credits on equipment purchases, with the stipulation that the rehabilitated structures have a useful life of at least 5 years.

To guard against abuses and discourage real estate speculation, there are restrictions within the amendment. For example, owners who take advantage of the credit cannot immediately resell the structure without losing these tax benefits. Also, new structures must be in service 5 years before work on them qualifies for the credit. In addition, the credit cannot be applied towards residential housing.

Everyone is aware that the central debate over the 1978 Revenue Act is the treatment of capital gains. You all know that one-half of a qualified capital gain is excluded from regular income taxes. But under the existing law, this seemingly untaxed portion is subject to consideration as a preference item and may be taxed as such up to 50 percent.

The bill we are debating repeals the minimum tax on capital gains and substitutes a new alternative tax with a maximum rate of 35 percent. I believe this is a wise and judicious formula which will encourage investment at many income levels, but will also prevent the very rich from escaping their fair share of tax liability.

Opponents of this legislation argue that the plan focuses on tax relief for the wealthy. It is true that the immediate benefits will go to the most active investors who are usually well-to-do. But in the long run, I am convinced the capital gains compromise will stimulate economic growth, create more jobs, and ultimately raise tax revenues by encouraging the middle income American to invest.

Small businesses especially, which by their very nature are more speculative than the big blue chip companies, have had trouble selling their stock because investors lack an incentive to take a risk when the hoped for profits are reduced by a stiff capital gains tax. This legislation should be a boon to them, and in turn to our economy.

Another significant aspect of the capital gains compromise is the novel provision for once-in-a-lifetime, tax-free sale of a home up to a $100,000 gain. I strongly support this innovative proposal because so many homeowners, particularly those in their later years whose children have moved away, find themselves burdened with significant Federal taxes when they sell the family house before the age of 65.

After spending half a lifetime or more meeting mortgage payments and annual property taxes, it seems only fair for a homeowner to finally reap the benefits of this sale undiluted by further taxes. The effective date of this provision is July 26, 1978.

Other business incentives within the bill include changes in the employment tax credit and increases in the limitations on industrial development bonds.

The bill, like any compromise, is not without its flaws. I refer in particular to the repeal of deductions for State and local gasoline taxes on itemized tax returns. I oppose this change because there are few alternatives to the automobile for transportation in Connecticut. And many taxpayers have used this deduction in the past to offset escalating fuel costs for a car which is a necessity to them and not a luxury.

I must also state my opposition to the Archer amendment which is included in the capital gains portion of the tax bill. This well-intentioned amendment would adjust the basis of any capital gain to compensate for inflation.

However, the major impetus for restructuring the capital gains tax rate was to compensate for the effects of inflation. To pile an inflation adjustment on top of a rate reduction would tip the scales too far and itself be inflationary.

The other changes proposed in this bill—to modify the at-risk rule and the partnership rule—have been explained most adequately by the Chair.

In conclusion Mr. Chairman, I want to urge my colleagues to support the committee version of this legislation which I believe steers a responsible course toward a healthy economy.●

● Mr. JEFFORDS. Mr. Chairman, I would like to explain to some of the Members what has happened in regard to the effort of the solar coalition to extricate the solar and conservation tax credits from the stalemated tax provisions of the National Energy Act. Well over 100 Members joined me, Congressmen MINETA, OTTINGER, and KREBS in urging Chairman ULLMAN to do something to save these long-awaited and noncontroversial credits from extinction-by-association with the crude oil equalization tax (COET). The immediate target of interest was, of course, the bill presently being debated, the Tax Revenue Act of 1978, which I support.

In order for the House to have an opportunity to pass these credits, the solar coalition drew up a measure which we felt accurately portrayed the agreements which had been reached in the Energy Tax Conference, and made some reasoned compromises as between the House and Senate versions of these credits in the few cases where agreements had not yet been reached. Our intent was to ask the Rules Committee to make the measure in order as an amendment to the Tax Revenue Act of 1978. In a close vote, 8 to 7, yesterday the Rules Committee rejected this attempt, which was offered by my colleague from Mississippi (Mr. LOTT). The vote was only close, of course, because of a great deal of pressure by the majority leadership on the members of that committee not to support the amendment.

Broadly speaking, I think there are several critical reasons for the House to move on these credits expeditiously.

First, the confidence of our constituents in our ability to deliver these credits has eroded to such an extent that it may well have measurable effects in November. I do not know how I can go back to Vermont and explain why we did not pass these credits, which already have in substance been passed by the House and agreed to in substance by the conference. I am not confident that agreement will be reached on the other sections of the tax provisions of the National Energy Act.

Second, regarding COET, or the crude oil equalization tax, I originally voted for it and support the administration's concept but I think it has been generally assumed to be dead. Secretary Schlesinger went on record at a New England Congressional Caucus meeting on the Senate side 2 weeks ago and I quote "COET is dead." So the theory that we must hold these credits back in order to sweeten the COET package, which if I thought could be revived I would support, is simply a bad theory. I recognize that the White House position is to plug along for COET, but I note that: First, the tax conferees are not only not meeting, but cannot even schedule a future meeting, and second, the COET we might get out of Senator LONG might be so onerous, particularly if it is agreed to under the gun, "so to speak," at the end of the session, that we will be forced not only to vote against it, but lose the tax credits as well."

Third, I would like to quote from a letter I received from Secretary Schlesinger on June 30 of this year in regard to the solar and conservation credits, and submit the letter for the committee's hearing record, I quote the salient paragraph:

> We are eager to meet our short-term solar energy objectives, by enactment of the solar tax incentive and related provisions of the National Energy Act. Toward that end, we stand ready at any time to work with you on achieving the solar goals of the NEA.

Fourth, the industry has been badly hurt by this very long delay. Many small manufacturers have gone out of business because consumers have held off buying systems until the tax situation is clarified. Thus the market share of major solar business—with annual sales of more than $1 million—has increased from 30 to 45 percent. We have been inundated with letters from the remaining businesses in this industry, from the industry association, and from franchised dealers in our constituencies to do something before solar system development is further retarded.

In contrast, the solar market is booming in California, because there is a good State tax credit—that alone seems proof to me that the Federal credit will be of significance in developing this industry and moving to a more oil-free economy. A survey for the DOE done this month by a New York firm shows the number of manufacturers or importers of solar collectors has declined from 186 to 162, a 13 percent decline—in 1 year. Mr. Chairman, we are going backward. The same survey report concludes that, and I quote:

> Inaction on Federal Solar Tax Credits is the prime cause for the lack luster growth of the industry. Consumers, both corporate and individual are delaying purchase decisions until Congress and the Administration act on the credits.

Last, Mr. Chairman, I think the urgency of this situation is highlighted by the fact that all 50 of the States energy office directors have sent a telegram on August 2 to the Speaker, and I quote:

> To strongly urge the U.S. Congress to pass during this session refundable federal residential tax credits . . . The delay in passing these credits has eroded the market for solar and conservation equipment and strained the patience of homeowners across the country committed to installing energy saving systems.

Mr. Chairman, I think it critically important that these credits be voted on by the full House as soon as possible. Certainly we know that the Senate is filibuster-prone at the end of sessions and that the further toward that end we get the more danger any important measure faces because of the nature of that Chamber. All good House intentions of moving these credits at the last minute may easily be foiled due to the eccentricities of the Senate and I am not willing to rely on that body in this regard. I think we should act now.●

● Mr. MCKINNEY. Mr. Chairman, it does not take a crystal ball or extraordinary insight to see that our economy is, at best, in a state of confusion, and that the taxpayers we represent are going to reach the boiling point if we continue to ask them to pay more for less. Higher taxes and inflation on all levels have followed an upward trend which must be reversed if we hope to prevent what now seems inevitable: another recession. We must take every available step to stimulate this confused economy, and reduce the underlying rate of inflation which is a predominant factor in the public's perception of their actual economic status. We must return to our citizens some confidence in the system, and get things moving in a positive direction both at home and abroad.

There can be no more positive route toward a badly needed shot in the arm than one which involves a substantial overall reduction in taxes. An economic authority of no less a reputation than Milton Freedman states:

> We are not getting our money's worth from the fraction of our income being spent for us by the government, that the maintainence of both prosperity and freedom demand a reduction in the total tax burden. Moreover I am persuaded by the experience of the past few decades that government will spend whatever the tax system will raise—plus a good deal more. The tolerable deficit has, unfortunately, been rising but is still not unlimited and does tend to inhibit spending. Hence I have concluded that the only effective way to restrain government spending is to limit government's explicit tax revenue—just as a limited income is the only effective restraint on any individual's or family's spending.

I agree.

The boldest, most positive step toward turning the tide of inflation and taxation would surely be consideration of the Kemp-Roth proposal. While a $16 billion tax cut under the Revenue Act is in keeping with a moderate program of tax reduction, there are better games in town of which Kemp-Roth is the best. We need a forceful step toward breaking out of the economic limbo in which we are caught, and a sizable cut such as Kemp-Roth is the one to consider.

The next most logical step toward a swift economic recovery would be adoption of the capital gains reduction included in the Revenue Act, and supported by my colleague Representative WILLAIM STEIGER, the architect of one of the most popular capital gains proposals in Congress. As the President himself stated:

> Increased capital formation, which provides new and more productive facilities, can help accelerate the growth of labor productivity, off-setting inflationary pressures and improving U.S. competitiveness in world markets.

While admitting that we are suffering from a serious lack of investment capital, the President's proposals, which include some reductions and investment credits, are not sufficient to produce the level of economic growth he advocates.

We need to boost the economy with the kind of investment capital that is presently lacking. This absence of capital has created serious problems with regard to future employment, Federal revenues, economic vitality, and our ability to compete with foreign firms in certain important areas. The high rate of technical growth that has been a trademark of this economy in the past has fallen off drastically. In 1968 there were 300 or more high technology companies founded, while in 1976 there were none. This cannot continue, and the reduction in capital gains tax would be a step in assuring that it would not.

At the very least, we must provide taxpayers with reductions which will improve their individual situations wherever possible. I have to take personal satisfaction in the fact that one of this bill's most important provisions is essentially the same as a bill I introduced. This provision of the Revenue Act provides homeowners with an opportunity to exclude from gross income up to $100,000 in gain from the sale or exchange of his or her principal residence. This exemption is a valuable asset to homeowners, many of whom will find need to claim this exemption long before they reach the presently required age limit of 65. The profit realized from this exemption may be used for whatever purpose the seller sees fit.

This is a badly needed piece of legislation, because even if capital gain on investment is subject to taxation, it is not appropriate to subject gains on the sales of personal consumption items such as one's personal residence, since the purchase of a home is not nearly as profit motivated as are other types of investment. This is something that I have been pushing since 1975, and I think it is about time that it became law.

I see many other provisions of the Revenue Act as being vital in reestablishing in the minds of individuals a positive perception of their economic status. One of these provisions is the Archer proposal to eliminate inflation as a factor in figuring taxes on the sale of assets such as stocks, bonds, or personal residence after January 1, 1980. This represents a major change in Federal tax policy, since it is the first time a part of the Federal Tax Code will be indexed to account for the effects of inflation—the "hidden tax." I see it as a definite step in the right direction.

Finally, I see the expansion of the graduated corporate income tax structure, with a reduction in all general rates as well as an increase in the surtax exemption, as a valuable legislative innovation. This will increase the amount of after-tax dollars in the hands of businessmen, particularly small businessmen where so much of the economic growth occurs in our country. This will prove to be an invaluable companion measure to personal rate reductions so that personal buying power can be matched with new productive capacity. This bill must be categorized as the first step of many we must take toward economic stability. I urge its adoption.●

● Mr. DRINAN. Mr. Chairman, I rise in support of the Corman-Fisher amendment, and in concerted opposition to the Revenue Act of 1978 as reported by the Committee on Ways and Means.

I believe that Americans are entitled to a major tax cut this year—particularly families in lower- and middle-income brackets—and further, that the public is entitled to an honest and open accounting of the effects of inflation on their Federal taxes. The committee bill fails miserably in addressing both of these legitimate interests. Fully 75 percent of the tax reductions contained in H.R. 13511 will be enjoyed by the richest 23 percent of the taxpayers, according to the Joint Committee on Taxation, and this windfall for the rich will increase substantially as inflation and social security take a larger and larger bite from the pockets of American families.

Three or four years from now, Mr. Chairman, the vast majority of American taxpayers will realize—as my colleague from Ohio (Mr. VANIK) has expressed so clearly—that they have fallen victim to "a sham tax cut." In fact, once the effect of next year's tax reductions has been tempered by higher payroll taxes and increases in the cost of living, most Americans will be paying higher taxes in real terms merely to support the permanent loopholes which we are enacting today for America's special few.

The Ways and Means Committee has failed to provide any detailed projections of the distributional effects of H.R. 13511 beyond 1979, and, in fact, this information is not available to Members as we vote on the bill this afternoon. It it were, it would show that the legislation will ultimately impose upon America's middle class the burden of paying for more than $4 or $5 billion in new tax loopholes for those earning in excess of $50,000, and of financing a similar multibillion dollar panopoly of tax breaks for the Nation's largest and most profitable corporations. This burden on the Nation's working families will not be a new or unfamiliar one, but merely compounds the rising cost of social security and of financing the $125 billion in tax loopholes already embodied in Federal law.

With respect to next year's social security tax increases, the Ways and Means Committee has not only ignored economic commonsense, but has thwarted the will of the House Democratic Caucus as well. The Congressional Budget Office estimates that the payroll tax increase next January will not only significantly increase inflation, but will simultaneously discourage employers from creating new, entry-level jobs. At the same time, the increase threatens to remove any semblence of progressiveness from Federal tax laws, since half of America's taxpayers already pay more in Social Security taxes than they do in personal income taxes.

The logical solution to this problem is to fund one-third of the Social Security program from general tax revenues, which would enable a reduction of next year's payroll tax rate from 6.1 to 3.9 percent. This approach was overwhelmingly endorsed by a 3-to-1 vote of the Democratic Caucus last April. Despite this clear mandate, the Ways and Means Committee voted on May 17 to oppose such legislation, and voted during markup of H.R. 13511 to oppose an even more modest interim approach by the gentleman from Missouri (Mr. GEPHARDT), which would grant taxpayers a tax credit equal to 5 percent of their contributions to social security.

As a longtime cosponsor of general revenue financing legislation, I joined 105 of my colleagues this week in petitioning the Rules Committee to permit a direct vote on the Gephardt amendment on the House floor. Unfortunately, the committee expressed disregard for the will of the Democratic majority, and reported a rule which made social security amendments out of order during floor consideration of the Revenue Act of 1978. In contrast, the Rules Committee permitted consideration of the Republican Kemp-Roth bill which had never been formally considered by the Ways and Means Committee, and which even Business Week and the U.S. Chamber of Commerce regard as fiscally irresponsible.

By significantly reducing taxes on capital gains for the Nation's most affluent investors, the Ways and Means Committee has similarly departed from economic commonsense. Arguing that under current law capital gains largely reflect only the effects of inflation on investments, the proponents of the Steiger and Jones amendments have given themselves carte blanche to grant back-door subsidies to the richest 2 percent of the taxpayers. In doing so, they have perpetuated the myth that an investment by an individual in the highest income brackets is somehow more economically productive than an identical investment made by an individual of modest means.

One solution to the problem would be to index capital gains for inflation, and then to tax the remaining real gain as ordinary income. This approach would end the current discrimination against small, long-term investments—such as the sale of a family home or small portfolio of stock—while eliminating one of the largest and most egregious loopholes in Federal tax law. Instead, the Ways and Means Committee approved a rollback in maximum capital gains tax rates affecting only a minority of investors, a one-time tax exemption for profits on the sale of a home, and an indexing provision which—in context—can only be described as overkill.

In doing so, the committee has done nothing to make home ownership more affordable, or to encourage investment by anyone except a small number of taxpayers. I suspect that they have succeeded only in squandering billions of dollars in revenue which will have to be made up by higher taxes on a majority of the Nation's taxpayers.

I cannot honestly believe that the Ways and Means Committee was at a loss to find tax loopholes worthy of reform in a tax code which the President of the United States has described as "a disgrace to the human race." The committee chose to blindly ignore the fact that the effective tax rate paid by the Nation's few hundred largest corporations dropped from 27 to 13 percent of income between 1969 and 1976, and that deductible business meals currently cost the taxpayers $1.2 billion each year. They chose to ignore the accelerated depreciation schedules, depletion allowances, export subsidies, and foreign tax credits which reap corporations billions of dollars in excess profits each year at the expense of the general public, and the fact that 23 percent of the benefits of our existing tax expenditures are enjoyed by the richest 1.2 percent of the population.

The Revenue Act of 1978 is not legislation worthy of a Democratic Congress or of individuals who profess to represent the public interest.●

● Mr. HANLEY. Mr. Chairman, I rise in support of the adoption of the Revenue Act of 1978. There can be no doubt

that the taxpayers of this Nation are in desperate need of tax reduction in the coming year. In addition, there can also be no doubt that this Nation is in desperate need of increased capital formation to sustain our continuing economic recovery. The bill before us represents an immediate and balanced approach to those problems, while also enacting into law much needed and substantial tax reductions for the small business community which I supported for many years.

The bill which we are about to vote on will provide three essential and balanced tax reform and reduction ingredients. First, we will be attempting to provide the citizens of this Nation with meaningful and effective tax reduction. This will be accomplished by significant tax reductions for all individuals and businesses. Tax brackets are widened, and rates within many of those brackets are reduced. The general tax credit is repealed and the personal exemption is increased from $750 to $1,000. In addition, taxpayers who sell their homes will be given a one-time opportunity to exclude up to $100,000 in gains from capital gains taxation.

For the business community, we repeal the current corporate normal tax and surtax rates and replace them with a five-step rate structure based on corporate taxable income. This provision will have a tremendous beneficial impact on the small business community. In addition, the 10-percent investment tax credit will be made permanent.

Finally, the bill addresses the desperate need for additional capital formation by reducing the maximum rate on capital gains taxation from 49.1 to 35 percent. As a cosponsor of the original proposal to reduce the maximum rate to 25 percent, I am delighted with this compromise, and I am confident that it will release necessary investment funds so essential to sustained growth and reduced unemployment.

As a whole, the legislation will reduce taxes by approximately $16 billion, well within the limits of the carefully devised congressional budget resolution.

In closing, Mr. Chairman, no discussion of tax reduction legislation in the current session would be complete without some comments on the Kemp-Roth tax proposal. Given the widespread appeal the proposal has generated over the past few months, it is a source of great amazement to me that the distinguished members on the Ways and Means Committee representing the Republican Party have never offered the proposal for full consideration as an alternative tax reduction proposal. I can only conclude that they have accepted the sound judgment of numerous economists and national leaders of every political persuasion who have concluded that such a massive reduction in taxes, without a plausible program of Federal expenditure reductions, would spur excessive inflation with the potential for destroying our entire economic system.

The House of Representatives, with my support, is making every effort to respond to the legitimate concerns of the citizens of this country in reducing Federal spending and providing appropriate and balanced tax relief. In recent years we have seen how rapidly economic conditions can change, and fortunately the Congress has had the flexibility to respond to those conditions. We are currently in the third year of sustained economic recovery, and the action we are about to take will continue that recovery and provide tax relief in a manner that will least affect our inflationary problems. The Kemp-Roth proposal, on the other hand, would negate this necessary flexibility and result in intolerable inflation. Any gains in tax relief the bill would provide would be more than wiped out by the inflation it would generate. To quote from a recent editorial which appeared in Business Week:

> Kemp-Roth would add $100 billion to the deficit that is already dangerously swollen. It would touch off an inflationary explosion that would wreck the country and impoverish everyone on fixed income. If taxpayers want to revolt and cut taxes, they must force sizable cuts in spending first.

As I have previously stated, the Congress is making every effort to cut spending in a logical and responsible manner. We must always remember, however, that meat ax approaches to reductions in Federal spending are not less irresponsible than meat ax tax reductions.●

● Mr. GORE. Mr. Chairman, I would like to clarify my opposition to the committee amendments to H.R. 13511, the Revenue Act of 1978. Although I was the sole registered voice of opposition to the committee amendments—409–1—I do not oppose all 10 provisions of this amendment. My vote primarily reflects my opposition to the committee's alternative minimum tax provision. This "micromini" tax violates the principle of progressive taxation and the duty of our legislative body.

This new version of the minimum tax is a charade which will serve only to dilute the outrage that all Americans who are interested in fairness should feel about a tax system that allows so many of those who can most afford to pay to escape taxation altogether.

Congress has resounded with cries for tax reductions and reform over the past several months. The American people have been promised equitable tax relief and reform. But we have reneged upon this promise. Instead this body chose to dole out a regressive tax bracket-widening scheme and a diluted alternative minimum tax. I could not support this new minimum tax because it is a false and token gesture that will ultimately allow an affluent group of taxpayers to shelter most or all of their income while the average taxpayer suffers a net tax hike when the payroll tax increases are also considered.

The recent Roper poll results illustrate that more Americans are concerned about tax equity than any other tax issue; 67 percent of those polled replied that the present tax system is unfair. Those people polled ranked tax reform third, behind controlling inflation and combating crime, on a list of objectives which need to be reached in our country. The Roper organization highlighted their conclusions with the statement that "in view of the American public, the major problem with the Federal income tax system in this country is its unfairness." The Congress' endorsement of a token minimum tax and its rejection of a progressive tax reduction plan illuminates our indifference to the concerns of the people.

I disagree that there is "no constituency for tax reform." What is lacking is leadership. The results of the Roper poll demonstrate the people's dissatisfaction with our unjust tax system. Sadly, the Tax Revenue Act of 1978 dismally fails to promote progressivity or equity. I can only look to the future and hope that we reverse some of the mistakes of the 1978 tax bill.●

● Mr. WEISS. Mr. Chairman, a recent nationwide opinion poll found that only 29 percent of the American people believe that our Federal income tax system is fair. Only the curbing of inflation and crime, according to the poll, rank higher on the public's list of priorities than tax reform. Despite this mandate, the Revenue Act of 1978 (H.R. 13511) makes no major reforms in our income tax system. If this bill is indicative of Congress commitment to correcting tax inequities, unfulfilled promises of tax reform may soon be as inevitable as taxes themselves.

For the first time in history, I believe we have an income tax bill that is not progressive. Almost one-quarter of the cut goes to those with incomes exceeding $50,000. Even the tax beleaguered middle-class, supposedly the prime beneficiary of this legislation, do not receive substantial tax relief, especially when this bill is compared to the amendment, which I support, offered by the gentlemen from California (Mr. CORMAN) and Virginia (Mr. FISHER).

The Corman-Fisher proposal, for example, would give a family of four earning $25,000 a $308 tax cut, while this bill offers only a $232 cut. At the $20,000-level, Corman-Fisher provides $228 in tax relief, $82 more in savings than the bill before us.

But it is the capital gains provisions in this bill that I find most disturbing. Except for the provision designed to help homeowners by allowing them to exclude up to $100,000 realized in the sale of their principal residence, more than 75 percent of the capital gains tax reductions go to those with incomes over $100,000. The capital gains provisions also allow too many capital gains, many at the multimillion-dollar level, to go untaxed because of tax shields.

Once again, the Corman-Fisher amendment is preferable. It limits the amount of capital gains eligible for tax shields, and establishes a minimum tax rate from 5 to 17.5 percent, depending on the amount of the capital gain. The Revenue Act of 1978, on the other hand, makes the effective minimum rate a mere 5 percent, regardless of the size of the gain.

The bill's tendency to benefit the wealthy at the expense of the middle- and low-income earner is even more pronounced in the amendment offered by the gentleman from Texas (Mr. ARCHER) and the gentleman from New York's (Mr. KEMP) motion to recommit.

The Archer amendment would index capital gains to protect them from inflation. On the surface, the argument that capital gains attributable to inflation do not deserve to be taxed seems appealing.

Upon closer examination, however, serious flaws emerge.

First, the indexing provision is inequitable, benefiting only those taxpayers who have capital gains. It is estimated that 50 percent of the Archer amendment's benefits would go to those in the $100,000-plus income class, while just 6 percent would benefit those who earn less than $20,000. Second, indexing capital gains would result in substantial revenue losses. Finally, the current law excluding one-half of capital gains from taxation offers adequate compensation for inflation. Indexing provides unnecessary double protection, especially when we remember that most taxpayers are not offered any kind of protection from inflation.

Mr. KEMP's motion to recommit, actually a vote on the Kemp-Roth amendment, has even more surface appeal than Mr. ARCHER's amendment. It is difficult to oppose a 30-percent tax cut spread over 3 years, especially at a time when there is a growing demand for tax relief. Despite this, the Kemp-Roth proposal is as dangerous to the economy as it is beguiling to the taxpayer.

A tax cut of this magnitude would stimulate consumer spending by 20 percent to a point where demand would devour supply, pushing inflation irrevocably out of control. Fueling this inflation would be a $75 billion to $130 billion Federal deficit caused by reduced revenues. Only a recession or prolonged slow growth in the economy could compensate for these ruinously inflationary tendencies.

The Kemp-Roth approach is also regressive and inequitable. Those making more than $50,000, for example, represent only 3 percent of all taxpayers, but they would receive 23 percent of the Kemp-Roth cuts.

Perhaps most damaging of all, Kemp-Roth perpetrates a hoax on the American taxpayer. Not only would much of their proposed tax cut be lost to inflation, but other taxes would have to be levied to compensate for the loss of income tax revenue. These taxes might prove more burdensome than the income tax, as the residents of California recently made clear in their proposition 13 vote.

The specter of inflation, which ultimately most hurts those who can afford it least, leads me to vote in favor of the substitute offered by the gentlemen from Ohio (Mr. VANIK) and Texas (Mr. PICKLE). While I prefer the Corman-Fisher amendment for the reasons given earlier, if it should not pass, there is a need for the Vanik-Pickle proposal. By extending four tax provisions—the general tax credit, the jobs tax credit, the earned income credit, and certain aspects of the corporate tax rate—scheduled to expire at the end of this year, this measure will reduce the Federal deficit and curb inflation. Although not a tax cut per se, the substitute will save taxpayers much of the money that would otherwise be lost to inflation.

Without the addition of the Corman-Fisher amendment, I must oppose the Revenue Act of 1978. Its priorities are misplaced. Too much attention is devoted to capital gains modifications at the expense of reforms in the individual tax structure. As a result we have a bill full of anomalies: a tax increase for 900,000 taxpayers, including single people and married couples without dependents, two groups which our tax system discriminates against unfairly; a tax increase for a family of four making only $5,000; no relief from social security taxes either in the form of more general revenue financing or a tax credit.

We ask a great deal of our taxpayers every year. We owe them something in return. Regrettably, however, this bill increases our debt to them rather than paying it off. ●

The CHAIRMAN. All time has expired for general debate.

Pursuant to the rule the bill is considered as having been read for amendment. No amendments shall be in order except the following amendments which shall not be subject to amendment except amendments recommended by the Committee on Ways and Means, and which shall be considered in the following order:

First. The committee amendments printed in the bill (except for section 404);

Second. The committee amendment adding a new section 404;

Third. The amendment in the nature of a substitute printed in the CONGRESSIONAL RECORD of August 8 by, if offered by, the gentleman from Ohio (Mr. VANIK); and

Fourth. An amendment printed in the CONGRESSIONAL RECORD of August 7 by, if offered by, the gentleman from California (Mr. CORMAN).

The bill is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Revenue Act of 1978".

(b) TABLE OF CONTENTS.—

Sec. 1. Short title; table of contents.
Sec. 2. Amendment of 1954 Code.
TITLE I—PROVISIONS PRIMARILY AFFECTING INDIVIDUAL INCOME TAX
Subtitle A—Tax Reductions and Extensions
Sec. 101. Widening of brackets; rate cuts in zero bracket amounts.
Sec. 102. Personal exemptions increased to $1,000.
Subtitle B—Itemized Deductions
Sec. 111. Repeal of deductions for State and local taxes on gasoline and other motor fuels.
Sec. 112. Revision of deduction for medical, dental, etc., expenses.
Sec. 113. Repeal of deduction for political contributions.
Sec. 114. Taxation of unemployment compensation benefits at certain income levels.
Sec. 115. Effective date.
Subtitle C—Deferred Compensation
Sec. 121. Deferred compensation plans with respect to service for State and local governments.
Sec. 122. Certain private deferred compensation plans.
Sec. 123. Clarification of deductibility of payments of deferred compensation, etc., to independent contractors.
TITLE II—TAX SHELTER PROVISIONS
Subtitle A—Provisions Related to at Risk Rules
Sec. 201. Extension of section 465 at risk rules to all activities other than real estate.
Sec. 202. Extension of at risk provisions to closely held corporations.
Sec. 203. Recapture of losses where amount at risk is less than zero.
Sec. 204. Effective dates.
Subtitle B—Partnership Provisions
Sec. 211. Penalty for failure to file partnership return.
Sec. 212. Extension of state of limitations in the case of partnership items.
TITLE III—PROVISIONS PRIMARILY AFFECTING BUSINESS INCOME TAX
Subtitle A—Corporate Rate Reductions
Sec. 301. Corporate rate reductions.
Subtitle B—Credits
Sec. 311. 10-percent investment tax credit and $100,000 limitation on used property made permanent.
Sec. 312. Increase in limitation on investment credit to 90 percent of tax liability.
Sec. 313. Investment credit for pollution control facilities.
Sec. 314. Targeted jobs credit.
Subtitle C—Increase in Limit on Small Issues of IDB's
Sec. 321. Increase to $10,000,000.
Subtitle D—Small Business Provisions
PART I—PROVISIONS RELATING TO SUBCHAPTER S
Sec. 331. Subchapter S corporations allowed 15 shareholders.
Sec. 332. Permitted shareholders of subchapter S corporations.
Sec. 333. Extension of period for making subchapter S elections.
Sec. 334. Effective date.
PART II—OTHER PROVISIONS
Sec. 335. Small business corporation stock.
Sec. 336. Special depreciation rules for small business.
Subtitle E—Accounting Provisions
Sec. 341. Treatment of certain closely held farm corporations for purposes of rule requiring accrual accounting.
Sec. 342. Accounting for growing crops.
TITLE IV—CAPITAL GAINS
Sec. 401. Repeal of alternative tax on capital gains of individuals.
Sec. 402. Removal of capital gains from items of tax preference for purposes of minimum and maximum tax.

SEC. 2. AMENDMENT OF 1954 CODE.

Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

TITLE I—PROVISIONS PRIMARILY AFFECTING INDIVIDUAL INCOME TAX

Subtitle A—Tax Reductions and Extensions

SEC. 101. WIDENING OF BRACKETS; RATE CUTS IN CERTAIN BRACKETS; INCREASE IN ZERO BRACKET AMOUNTS.

(a) RATE REDUCTION.—Section 1 (relating to tax imposed) is amended to read as follows:

"SECTION 1. TAX IMPOSED.

"(a) MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES.—There is hereby imposed on the taxable income of—

"(1) every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and

"(2) every surviving spouse (as defined in section 2(a)),

a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $3,400	No tax.
Over $3,400 but not over $4,460	14% of the excess over $3,400.
Over $4,460 but not over $5,520	$148.40, plus 15% of excess over $4,460.
Over $5,520 but not over $6,580	$307.40, plus 16% of excess over $5,520.
Over $6,580 but not over $7,640	$477, plus 17% of excess over $6,580.
Over $7,640 but not over $11,880	$657.20, plus 18% of excess over $7,640.
Over $11,880 but not over $16,120	$1,420.40, plus 21% of excess over $11,880.
Over $16,120 but not over $20,360	$2,310.80, plus 24% of excess over $16,120.
Over $20,360 but not over $24,600	$3,328.40, plus 28% of excess over $20,360.
Over $24,600 but not over $28,840	$4,515.60, plus 32% of excess over $24,600.
Over $28,840 but not over $33,080	$5,872.40, plus 36% of excess over $28,840.
Over $33,080 but not over $41,560	$7,398.80, plus 39% of excess over $33,080.
Over $37,320 but not over $41,560	$9,052.40, plus 42% of excess over $37,320.
Over $41,560 but not over $45,800	$10,833.20, plus 45% of excess over $41,560.
Over $45,800 but not over $50,040	$12,741.20, plus 48% of excess over $45,800.
Over $50,040 but not over $58,520	$14,776.40, plus 50% of excess over $50,040.
Over $58,520 but not over $71,240	$19,016.40, plus 53% of excess over $58,520.
Over $71,240 but not over $83,960	$25,758, plus 55% of excess over $71,240.
Over $83,960 but not over $96,680	$32,754, plus 58% of excess over $83,960.
Over $96,680 but not over $109,400	$40,131.60, plus 60% of excess over $96,680.
Over $109,400 but not over $130,600	$47,763.60, plus 62% of excess over $109,400.
Over $130,600 but not over $151,800	$60,907.60, plus 64% of excess over $130,600.
Over $151,800 but not over $173,000	$74,475.60, plus 66% of excess over $151,800.
Over $173,000 but not over $194,200	$88,467.60, plus 68% of excess over $173, 000.
Over $194,200 but not over $215,400	$102,883.60, plus 69% of excess over $194,200.
Over $215,400	$117,511.60, plus 70% of excess over $215,400.

"(b) HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every individual who is the head of a household (as defined in section 2(b)) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $3,360	14 percent of the excess over $2,300.
Over $3,360 but not over $4,420	$148.40, plus 16 percent of excess over $3,360.
Over $4,420 but not over $6,540	$318, plus 17 percent of excess over $4,420.
Over $6,540 but not over $8,660	$678.40, plus 18 percent of excess over $6,540.
Over $8,660 but not over $10,780	$1,060, plus 20 percent of excess over $8,660.
Over $10,780 but not over $12,900	$1,484, plus 22 percent of excess over $10,780.
Over $12,900 but not over $15,020	$1,950.40, plus 25 percent of excess over $12,900.
Over $15,020 but not over $17,140	$2,480.40, plus 27 percent of excess over $15,020.
Over $17,140 but not over $19,260	$3,052.80, plus 28 percent of excess over 17,140.
Over $19,260 but not over $21,380	$3,646.40, plus 31 percent of excess over $19,260.
Over $21,380 but not over $23,500	$4,303.60, plus 32 percent of excess over $21,380.
Over $23,500 but not over $25,620	$4,982, plus 35 percent of excess over $23,500.
Over $25,620 but not over $27,740	$5,724, plus 36 percent of excess over $25,620.
Over $27,740 but not over $29,860	$6,487.20, plus 38 percent of excess over $27,740.
Over $29,860 but not over $31,980	$7,292.80, plus 41 percent of excess over $29,860.
Over $31,980 but not over $36,220	$8,162, plus 42 percent of excess over $31,980.
Over $36,220 but not over $40,460	$9,942.80, plus 45 percent of excess over $36,220.
Over $40,460 but not over $42,580	$11,850.80, plus 48 percent of excess over $40,460.
Over $42,580 but not over $44,700	$12,868.40, plus 51 percent of excess over $42,580.
Over $44,700 but not over $48,940	$13,949.60, plus 52 percent of excess over $44,700.
Over $48,940 but not over $55,300	$16,154.40, plus 55 percent of excess over $48,940.
Over $55,300 but not over $57,420	$19,652.40, plus 56% of excess over $55,300.
Over $57,420 but not over $70,140	$20,839.60, plus 58% of excess over $57,420.
Over $70,140 but not over $76,500	$28,217.20, plus 59% of excess over $70,140.
Over $76,500 but not over $82,860	$31,969.60, plus 61% of excess over $76,500.
Over $82,860 but not over $87,100	$35,849.20, plus 62% of excess over $82,860.
Over $87,100 but not over $95,580	$38,478, plus 63% of excess over $87,100.
Over $95,580 but not over $108,300	$43,820.40, plus 64% of excess over $95,580.
Over $108,300 but not over $129,500	$51,961.20, plus 66% of excess over $108,300.
Over $129,500 but not over $150,700	$65,953.20, plus 67% of excess over $129,500.
Over $150,700 but not over $171,900	$80,157.20, plus 68% of excess over $150,700.
Over $171,900 but not over $193,100	$94,573.20, plus 69% of excess over $171,900.
Over $193,100	$109,201.20, plus 70% of excess over $193,100.

"(c) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS).—There is hereby imposed on the taxable income of every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b)) who is not a married individual (as defined in section 143) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $2,830	14 percent of the excess over $2,300.
Over $2,830 but not over $3.360	$74.20, plus 15 percent of excess over $2,830.
Over $3,360 but not over $3,890	$153.70, plus 16 percent of excess over $3,360.
Over $3,890 but not over $4,420	$238.50, plus 17 percent of excess over $3,890.
Over $4,420 but not over $6,540	$328.60, plus 18 percent of excess over $4,420.
Over $6,540 but not over $8,660	$710.20, plus 19 percent of excess over $6,540.
Over $8,660 but not over $10,780	$1,113, plus 21 percent of excess over $8,660.
Over $10,780 but not over $12,900	$1,558.20, plus 24 percent of excess over $10,780.
Over $12,900 but not over $15,020	$2.067, plus 27 percent of excess over $12,900.
Over $15,020 but not over $17,140	$2,639.40, plus 29 percent of excess over $15,020.
Over $17,140 but not over $19,260	$3,254.20, plus 31 percent of excess over $17,140.
Over $19,260 but not over $21,380	$3,911.40, plus 34 percent of excess over $19,260.

Over $21,380 but not over $23,500	$4,632.20, plus 36 percent of excess over $21,380.
Over $23,500 but not over $25,620	$5,395.40, plus 38 percent of excess over $23,500.
Over $25,620 but not over $29,860	$6,201, plus 40 percent of excess over $25,620.
Over $29,860 but not over $36,220	$7,897, plus 45 percent of excess over $29,860.
Over $36,220 but not over $42,580	$10,759, plus 50 percent of excess over $36,220.
Over $42,580 but not over $48,940	$13,939, plus 55 percent of excess over $42,580.
Over $48,940 but not over $55,300	$17,437, plus 60 percent of excess over $48,940.
Over $55,300 but not over $65,900	$21,253, plus 62 percent of excess over $55,300.
Over $65,900 but not over $76,500	$27,825, plus 64 percent of excess over $65,900.
Over $76,500 but not over $87,100	$34,609, plus 66 percent of excess over $76,500.
Over $87,100 but not over $97,700	$41,605, plus 68 percent of excess over $87,100.
Over $97,700 but not over $108,300	$48,813, plus 69 percent of excess over $97,700.
Over $108,300	$56,127, plus 70 percent of excess over $108,300.

"(d) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who does not make a single return jointly with his spouse under section 6013 a tax determined in accordance with the following table:

"If the taxable income is:	The Tax is:
Not over $1,700	No tax.
Over $1,700 but not over $2,230	14% of the excess over $1,700.
Over $2,230 but not over $2,760	$74.20, plus 15% of excess over $2,230.
Over $2,760 but not over $3,290	$153.70, plus 16% of excess over $2,760.
Over $3,290 but not over $3,820	$238.50, plus 17% of excess over $3,290.
Over $3,820 but not over $5,940	$328.60, plus 18% of excess over $3,820.
Over $5,940 but not over $8,060	$710.20, plus 21% of excess over $5,940.
Over $8,060 but not over $10,180	$1,155.40, plus 24% of excess over $8,060.
Over $10,180 but not over $12,300	$1,664.20, plus 28% of excess over $10,180.
Over $12,300 but not over $14,420	$2,257.80, plus 32% of excess over $12,300.
Over $14,420 but not over $16,540	$2,936.20, plus 36% of excess over $14,420.
Over $16,540 but not over $18,660	$3,699.40, plus 39% of excess over $16,540.
Over $18,660 but not over $20,780	$4,526.20, plus 42% of excess over $18,660.
Over $20,780 but not over $22,900	$5,416.60, plus 45% of excess over $20,780.
Over $22,900 but not over $25,020	$6,370.60, plus 48% of excess over $22,900.
Over $25,020 but not over $29,260	$7,388.20, plus 50% of excess over $25,020.
Over $29,260 but not over $35,620	$9,508.20, plus 53% of excess over $29,260.
Over $35,620 but not over $41,980	$12,879, plus 55% of excess over $35,620.
Over $41,980 but not over $48,340	$16,377, plus 58% of excess over $41,980.
Over $48,340 but not over $54,700	$20,065, plus 60% of excess over $48,340.
Over $54,700 but not over $65,300	$23,881.80, plus 62% of excess over $54,700.
Over $65,300 but not over $75,900	$30,453.80, plus 64% of excess over $65,300.
Over $75,900 but not over $86,500	$37,237.80, plus 66% of excess over $75,900.
Over $86,500 but not over $97,100	$44,233.80, plus 68% of excess over $86,500.
Over $97,100 but not over $107,700	$51,441.80, plus 69% of excess over $97,100.
Over $107,700	$58,755.80, plus 70% of excess over $107,700.

"(e) ESTATES AND TRUSTS.—There is hereby imposed on the taxable income of every estate and trust taxable under this subsection a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $530	14% of the taxable income.
Over $530 but not over $1,060	$74.20, plus 15% of excess over $530.
Over $1,060 but not over $1,590	$153.70, plus 16% of excess over $1,060.
Over $1,590 but not over $2,120	$238.50, plus 17% of excess over $1,590.
Over $2,120 but not over $4,240	$328.60, plus 18% of excess over $2,120.
Over $4,240 but not over $6,360	$710.20, plus 21% of excess over $4,240.
Over $6,360 but not over $8,480	$1,155.40, plus 24% of excess over $6,360.
Over $8,480 but not over $10,600	$1,664.20, plus 28% of excess over $8,480.
Over $10,600 but not over $12,720	$2,257.80, plus 32% of excess over $10,600.
Over $12,720 but not over $14,840	$2,936.20, plus 36% of excess over $12,720.
Over $14,840 but not over $16,960	$3,699.40, plus 39% of excess over $14,840.
Over $16,960 but not over $19,080	$4,526.20, plus 42% of excess over $16,960.
Over $19,080 but not over $21,200	$5,416.60, plus 45% of excess over $19,080.
Over $21,200 but not over $23,320	$6,370.60, plus 48% of excess over $21,200.
Over $23,320 but not over $27,560	$7,388.20, plus 50% of excess over $23,320.
Over $27,560 but not over $33,920	$9,508.20, plus 53% of excess over $27,560.
Over $33,920 but not over $40,280	$12,879, plus 55% of excess over $33,920.
Over $40,280 but not over $46,640	$16,377, plus 58% of excess over $40,280.
Over $46,640 but not over $53,000	$20,065.80, plus 60% of excess over $46,640.
Over $53,000 but not over $63,600	$23,881.80, plus 62% of excess over $53,000.
Over $63,600 but not over $74,200	$30,453.80, plus 64% of excess over $63,600.
Over $74,200 but not over $84,800	$37,237.80, plus 66% of excess over $74,200.
Over $84,800 but not over $95,400	$44,233.80, plus 68% of excess over $84,800.
Over $95,400 but not over $106,000	$51,441.80, plus 69% of excess over $95,400.
Over $106,000	$58,755.80, plus 70% of excess over $106,000."

(b) INCREASE IN ZERO BRACKET AMOUNT.—Subsection (d) of section 63 (defining zero bracket amount) is amended—

(1) by striking out "$3,200" and inserting in lieu thereof "$3,400",

(2) by striking out "$2,200" and inserting in lieu thereof "$2,300", and

(3) by striking out "$1,600" and inserting in lieu thereof "$1,700".

(c) FILING REQUIREMENTS.—Paragraph (1) of section 6012(a) (relating to persons required to make returns of income) is amended—

(1) by striking out "$2,950" and inserting in lieu thereof "$3,050",

(2) by striking out "$3,950" and inserting in lieu thereof "$4,150", and

(3) by striking out "$4,700" and inserting in lieu thereof "$4,900".

(d) TECHNICAL AMENDMENT.—Subparagraph (C) of section 402(c)(1) (relating to tax on lump sum distributions) is amended by striking out "$2,200" and inserting in lieu thereof "$2,300".

(e) WITHHOLDING AMENDMENTS.—

(1) WITHHOLDING TABLES.—Subsection (a)

of section 3402 (relating to requirement of withholding) is amended by striking out the second and third sentences and inserting in lieu thereof the following new sentence: "With respect to wages paid after December 31, 1978, the tables so prescribed shall be the same as the tables prescribed under this subsection which were in effect on January 1, 1975, except that such tables shall be modified to the extent necessary to reflect the amendments made by sections 101 and 102 of the Tax Reduction and Simplification Act of 1977 and the amendments made by section 101 of the Revenue Act of 1978."

(2) WITHHOLDING ALLOWANCES BASED ON ITEMIZED DEDUCTIONS.—Subparagraph (B) of section 3402(m)(1) (relating to withholding allowances based on itemized deductions) is amended—

(A) by striking out "$3,200" and inserting in lieu thereof "$3,400", and

(B) by striking out "$2,200" and inserting in lieu thereof "$2,300".

(f) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by subsections (a), (b), (c), and (d) shall apply to taxable years beginning after December 31, 1978.

(2) WITHHOLDING AMENDMENTS.—The amendments made by subsection (e) shall apply to remuneration paid after December 31, 1978.

SEC. 102. PERSONAL EXEMPTIONS INCREASED TO $1,000.

(a) GENERAL RULE.—Section 151 (relating to allowance of deductions for personal exemptions) is amended by striking out $750" each place it appears and inserting in lieu thereof $1,000".

(b) FILING REQUIREMENTS.—

(1) Paragraph (1) of section 6012(a) (relating to persons required to make returns of income), as amended by section 101(c of this Act, is amended by striking out "$750", "$3,050", "$4,150", and "$4,900" each place they appear and inserting in lieu thereof "$1,000", "$3,300", "$4,400", and "$5,400", respectively.

(2) Subparagraph (A) of section 6013(b)(3) (relating to assessment and collection in the case of certain returns of husband and wife) is amended by striking out "$750" and "$1,500" each place they appear and inserting in lieu thereof "$1,000" and "$2,000", respectively.

(c) WITHHOLDING REQUIREMENTS.—

(1) Paragraph (1) of section 3402(b) (relating to percentage method of withholding income tax at source) is amended by striking out the table and inserting in lieu thereof the following:

"PERCENTAGE METHOD WITHHOLDING TABLE

"Payroll period	Amount of one withholding exemption
Weekly	$19.23
Biweekly	38.46
Semimonthly	41.66
Monthly	83.33
Quarterly	250.00
Semiannual	500.00
Annual	1,000.00
Daily or miscellaneous (per day of such period)	2.74".

(2) Paragraph (1) of section 3402(m) (relating to withholding allowances based on itemized deductions) is amended by striking out "$750" and inserting in lieu thereof "$1,000".

(d) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by subsections (a) and (b) shall apply to taxable years beginning after December 31, 1978.

(2) WITHHOLDING AMENDMENTS.—The amendments made by subsection (c) shall apply with respect to remuneration paid after December 31, 1978.

SEC. 103. EARNED INCOME CREDIT MADE PERMANENT.

(a) GENERAL RULE.—Subsection (b) of section 209 of the Tax Reduction Act of 1975 is amended by striking out ", and before January 1, 1979".

(b) TECHNICAL AMENDMENT.—The second sentence of section 401(e) of the Tax Reform Act of 1976 (as added by section 103 of the Tax Reduction and Simplification Act of 1977) is amended by striking out ", and shall crease to apply to taxable years beginning after December 31, 1978".

Subtitle B—Itemized Deductions

SEC. 111. REPEAL OF DEDUCTION FOR STATE AND LOCAL TAXES ON GASOLINE AND OTHER MOTOR FUELS.

(a) REPEAL.—Paragraph (5) of section 164(a) (relating to deduction for taxes) is hereby repealed.

(b) CONFORMING AMENDMENTS.—

(1) The heading of paragraph (5) of section 164(b) is amended by striking out "AND GASOLINE TAXES".

(2) The text of such paragraph (5) is amended by striking out "or of any tax on the sale of gasoline, diesel fuel, or other motor fuel".

SEC. 112. REVISION OF DEDUCTION FOR MEDICAL, DENTAL, ETC., EXPENSES.

(a) IN GENERAL.—Subsections (a) and (b) of section 213 (relating to medical, dental, etc., expenses) are amended to read as follows:

"(a) ALLOWANCE OF DEDUCTION.—There shall be allowed as a deduction the expenses paid during the taxable year, not compensated for by insurance or otherwise, for medical care of the taxpayer, his spouse, or a dependent (as defined in section 152), to the extent that such expenses exceed 3 percent of adjusted gross income.

"(b) LIMITATION WITH RESPECT TO MEDICINE AND DRUGS.—An amount paid during the taxable year for medicine or a drug shall be taken into account under subsection (a) only if such medicine or drug is a prescribed drug or is insulin."

(b) DEFINITION OF PRESCRIBED DRUG.—Subsection (e) of section 213 is amended by redesignating paragraphs (2), (3), and (4) as paragraphs (4), (5), and (6), respectively, and by inserting after paragraph (1) the following new paragraphs:

"(2) PRESCRIBED DRUG.—The term 'prescribed drug' means a drug or biological which requires a prescription of a physician for its use by an individual.

"(3) PHYSICIAN.—The term 'physician' has the meaning given to such term by section 1861(r) of the Social Security Act (42 U.S.C. 1395x(r)); except that, in the case of a doctor of dentistry or of dental or oral surgery, section 1861(r)(2) shall be applied without the limitations contained in clauses (A), (B), and (C) thereof."

(c) CONFORMING AMENDMENTS.—

(1) Paragraph (5) of section 213(e) (as redesignated by subsection (b)) is amended by striking out "paragraph (2)" and inserting in lieu thereof "paragraph (4)".

(2) Subsections (d), (e), and (f) of section 213 are redesignated as subsections (c), (d), and (e), respectively.

(3) Subsection (b) of section 105 is amended by striking out "section 213(e)" and inserting in lieu thereof "section 213(d)".

SEC. 113. REPEAL OF DEDUCTION FOR POLITICAL CONTRIBUTIONS.

(a) REPEAL.—Section 218 (relating to deduction for contributions to candidates for public office and newsletter funds) is hereby repealed.

(b) CONFORMING AMENDMENTS.—

(1) The table of sections for part VII of subchapter B of chapter 1 (relating to additional itemized deductions for individuals) is amended by striking out the item relating to section 218.

(2) Section 642 (relating to special rules for credits and deductions of estates and trusts) is amended by striking out subsection (i) and by redesignating subsections (j) and (k) as subsections (i) and (j), respectively.

SEC. 114. TAXATION OF UNEMPLOYMENT COMPENSATION BENEFITS AT CERTAIN INCOME LEVELS.

(a) INCLUSION IN GROSS INCOME.—Part II of subchapter B of chapter 1 (relating to amounts specifically included in gross income) is amended by adding at the end thereof the following new section:

"SEC. 85. UNEMPLOYMENT COMPENSATION.

"(a) IN GENERAL.—If the sum for the taxable year of the adjusted gross income of the taxpayer (determined without regard to this section and without regard to section 105(d)) and the unemployment compensation exceeds the base amount, gross income for the taxable year includes unemployment compensation in an amount equal to the lesser of—

"(1) one-half of the amount of the excess of such sum over the base amount, or

"(2) the amount of the unemployment compensation.

"(b) BASE AMOUNT DEFINED.—For purposes of this section, the term 'base amount' means—

"(1) except as provided in paragraphs (2) and (3), $20,000,

"(2) $25,000, in the case of a joint return under section 6013, or

"(3) zero, in the case of a taxpayer who—

"(A) is married at the close of the taxable year (within the meaning of section 143) but does not file a joint return for such year, and

"(B) does not live apart from his spouse at all times during the taxable year.

"(c) UNEMPLOYMENT COMPENSATION DEFINED.—For purposes of this section, the term 'unemployment compensation' means any amount received under a law of the United States or of a State which is in the nature of unemployment compensation."

(b) CLERICAL AMENDMENT.—The table of sections for part II of subchapter B of chapter 1 is amended by adding at the end thereof the following new item:

"Sec. 85. Unemployment compensaion."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to payments of unemployment compensation made after December 31, 1978, in taxable years ending after such date.

SEC. 115. EFFECTIVE DATE.

Except as otherwise provided, the amendments made by this subtitle shall apply to taxable years beginning after December 31, 1978.

Subtitle C—Deferred Compensation

SEC. 121. DEFERRED COMPENSATION PLANS WITH RESPECT TO SERVICE FOR STATE AND LOCAL GOVERNMENTS.

(a) IN GENERAL.—Subpart B of part II of subchapter E of chapter 1 (relating to tax-

able years for which gross income included) is amended by adding at the end thereof the following new section:

"SEC. 457. DEFERRED COMPENSATION PLANS WITH RESPECT TO SERVICE FOR STATE AND LOCAL GOVERNMENTS.

"(a) YEAR OF INCLUSION IN GROSS INCOME.—In the case of a participant in an eligible State deferred compensation plan, any amount of compensation deferred under the plan, and any income attributable to the amounts so deferred, shall be includible in gross income only for the taxable year in which such compensation or other income is paid or otherwise made available to the participant or other beneficiary. The preceding sentence shall not apply to amounts determined (under regulations prescribed by the Secretary) to have been applied to purchase life insurance protection.

"(b) ELIGIBLE STATE DEFERRED COMPENSATION PLAN DEFINED.—For purposes of this section, the term 'eligible State deferred compensation plan' means a plan established and maintained by a State—

"(1) in which only individuals who perform service for the State may be participants,

"(2) which provides that (except as provided in paragraph (3)) not to exceed the lesser of—

"(A) $7,500, or

"(B) 33⅓ percent of the participant's includible compensation,

may be deferred under the plan for any taxable year,

"(3) which may provide that, for 1 or more of the participant's last 3 taxable years ending before he attains normal retirement age under the plan, the ceiling set forth in paragraph (2) shall not be less than the lesser of

"(A) $15,000, or

"(B) so much of the plan ceiling established for purposes of paragraph (2) for taxable years before such last 3 taxable years as has not theretofore been used under paragraph (2) or this paragraph.

"(4) which provides that, except in the case of individuals first performing service for the State, compensation will be deferred for any taxable year only if an agreement providing for such deferral has been entered into before the beginning of such year,

"(5) which provides that amounts held by the plan will be made available to participants or other beneficiaries not earlier than when the participant is separated from service with the State, retires in accordance with a retirement plan of the State, does, or is faced by an unforeseeable emergency (determined in the manner prescribed by the Secretary by regulations), and

(6) which provides that—

"(A) all amounts of compensation deferred under the plan,

"(B) all property purchased with such amounts, and

"(C) all income attributable to such amounts or property,

shall remain (until made available to the participant or other beneficiary) solely the property of the State, available for the State's use for whatever purposes it desires, but subject to the claims of the State's general creditors.

A plan which is administered in a manner which is inconsistent with the requirements of any of the preceding paragraphs shall be treated as not meeting the requirements of such paragraph effective with respect to the first calendar year beginning more than 180 days after the date of notification by the Secretary of the inconsistency and failure by the State (before the first day of such calendar year) to remove the inconsistency.

"(c) INDIVIDUALS WHO ARE PARTICIPANTS IN MORE THAN ONE PLAN.—

"(1) IN GENERAL.—The maximum amount of the compensation of any one individual which may be deferred under subsection (a) for any taxable year shall not exceed $7,500 (as modified by any adjustment provided under subsection (b)(3)).

"(2) COORDINATION WITH SECTION 403(b).—In applying paragraph (1) of this subsection and paragraphs (2) and (3) of subsection (b), an amount excluded for any taxable year under section 403(b) shall be treated as an amount deferred under subsection (a). In applying clause (ii) of section 403(b)(2)(A), any amount deferred under subsection (a) for any year of service shall be taken into account as if described in such clause.

"(d) OTHER DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) STATE.—The term 'State' means a State, a political subdivision of a State, and an agency or instrumentality of a State or political subdivision of a State.

"(2) PERFORMANCE OF SERVICE.—The performance of service includes performance of service as an independent contractor.

"(3) PARTICIPANT.—The term 'participant' means an individual who is eligible to defer compensation under the plan.

"(4) BENEFICIARY.—The term 'beneficiary' means a beneficiary of the participant, his estate, or any other person whose interest in the plan is derived from the participant.

"(5) INCLUDIBLE COMPENSATION.—The term 'includible compensation' means compensation for service performed for the State which (taking into account the provisions of this section but not taking into account section 403(b)) is currently includible in gross income.

"(6) COMPENSATION TAKEN INTO ACCOUNT AT PRESENT VALUE.—Compensation shall be taken into account at its present value.

"(7) COMMUNITY PROPERTY LAWS.—The amount of includible compensation shall be determined without regard to any community property laws.

"(8) INCOME ATTRIBUTABLE.—Gains from the disposition of property shall be treated as income attributable to such property.

"(e) TAX TREATMENT OF PARTICIPANTS WHERE PLAN OR ARRANGEMENT OF STATE IS NOT ELIGIBLE.—

"(1) IN GENERAL.—In the case of a plan of a State providing for a deferral of compensation, if such plan is not an eligible State deferred compensation plan, then—

"(A) the compensation shall be included in the gross income of the participant or beneficiary for the first taxable year in which there is no substantial risk of forfeiture of the rights to such compensation, and

"(B) the tax treatment of any amount made available under the plan to a participant or beneficiary shall be determined under section 72 (relating to annuities, etc.).

"(2) EXCEPTIONS.—Paragraph (1) shall not apply to—

"(A) a plan described in section 401(a) which includes a trust exempt from tax under section 501(a),

"(B) an annuity plan or contract described in section 403,

"(C) a qualified bond purchase plan described in section 405(a),

"(D) that portion of any plan which consists of a transfer of property described in section 83 (determined without regard to subsection (e) thereof), and

"(E) that portion of any plan which consists of a trust to which section 402(b) applies.

"(3) DEFINITIONS.— For purposes of paragraph (1)—

"(A) PLAN INCLUDES ARRANGEMENTS, ETC.— The term 'plan' includes any agreement or arrangement.

"(B) SUBSTANTIAL RISK OF FOREFEITURE.— The rights of a person to compensation are subject to a substantial risk of forfeiture if such person's rights to such compensation are conditioned upon the future performance of substantial services by any individual."

(b) CLERICAL AMENDMENT.—The table of sections for such subpart B is amended by adding at the end thereof the following:

"Sec. 457. Deferred compensation plans with respect to service for State and local governments."

(c) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by this section shall apply to taxable years beginning after December 31, 1978.

(2) TRANSITIONAL RULE.—In the case of any plan of a State (within the meaning of paragraph (1) of section 457(d) of the Internal Revenue Code of 1954) for deferring the compensation of individuals performing service for it, if (on the date of the enactment of this Act) there is in effect a ruling from the Internal Revenue Service permitting deferral of compensation under such plan, then nothing in the amendments made by this section shall be treated as requiring any change in such plan for any period before January 1, 1980.

SEC. 122. CERTAIN PRIVATE DEFERRED COMPENSATION PLANS.

(a) GENERAL RULE.—The taxable year of inclusion in gross income of any amount covered by a private deferred compensation plan shall be determined in accordance with the principles set forth in regulations, rulings, and judicial decisions relating to deferred compensation which were in effect on February 1, 1978.

(b) PRIVATE DEFERRED COMPENSATION PLAN DEFINED.—

(1) IN GENERAL.—For purposes of this section, the term "private deferred compensation plan" means a plan, agreement, or arrangement—

(A) where the person for whom the service is performed is not a State (within the meaning of paragraph (1) of section 457(d) of the Internal Revenue Code of 1954) and not an organization which is exempt from tax under section 501 of such Code, and

(B) under which the payment or otherwise making available of compensation is deferred.

(2) CERTAIN PLANS EXCLUDED.—Paragraph (1) shall not apply to—

(A) a plan described in section 401(a) of the Internal Revenue Code of 1954 which includes a trust exempt from tax under section 501(a) of such Code,

(B) an annuity plan or contract described in section 403 of such Code,

(C) a qualified bond purchase plan described in section 405(a) of such Code,

(D) that portion of any plan which consists of a transfer of property described in section 83 (determined without regard to subsection (e) thereof) of such Code, and

(E) that portion of any plan which consists of a trust to which section 402(b) of such Code applies.

(c) EFFECTIVE DATE.—This section shall apply to taxable years ending on or after February 1, 1978.

SEC. 123. CLARIFICATION OF DEDUCTIBILITY OF PAYMENTS OF DEFERRED COMPENSATION, ETC., TO INDEPENDENT CONTRACTORS.

(a) IN GENERAL.—Section 404 (relating to deduction for contributions of an employer to an employees' trust or annuity plan and compensation under a deferred-payment plan) is amended by inserting after subsection (c) the following new subsection:

"(d) DEDUCTIBILITY OF PAYMENTS OF DEFERRED COMPENSATION, ETC., TO INDEPENDENT CONTRACTORS.—If a plan would be described in so much of subsection (a) as precedes paragraph (1) thereof (as modified by subsection (b)) but for the fact that there is no employer-employee relationship, the contributions or compensation—

"(1) shall not be deductible by the payor thereof under section 162, or 212, but

"(2) shall (if they would be deductible under section 162 or 212 but for paragraph (1)) be deductible under this subsection for the taxable year in which an amount attributable to the contribution or compensation is includible in the gross income of the participants in the plan, but, in the case of a plan in which more than 1 individual participates, only if separate accounts are maintained for each participant."

(b) CLARIFICATION OF SECTION 404(b).—Subsection (b) of section 404 (relating to method of contributions, etc., having the effect of a plan) is amended by striking out "similar plan" and inserting in lieu thereof "other plan".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to deductions for taxable years beginning after, December 31, 1978.

TITLE II—TAX SHELTER PROVISIONS

Subtitle A—Provisions Related To At Risk Rules

SEC. 201. EXTENSION OF SECTION 465 AT RISK RULES TO ALL ACTIVITIES OTHER THAN REAL ESTATE.

(a) EXTENSION.—Subsection (c) of section 465 (relating to activities to which section applies) is amended by adding at the end thereof the following new paragraph:

"(3) EXTENSION TO OTHER ACTIVITIES.—

"(A) IN GENERAL.—In the case of taxable years beginning after December 31, 1978, this section also applies to each activity—

"(i) engaged in by the taxpayer in carrying on a trade or business or for the production of income, and

"(ii) which is not described in paragraph (1).

"(B) AGGREGATION OF ACTIVITIES WHERE TAXPAYER ACTIVELY PARTICIPATES IN MANAGEMENT OF TRADE OT BUSINESS.—Except as provided in subparagraph (C), for purposes of this section, activities described in subparagraph (A) which constitute a trade or business shall be treated as 1 activity if—

"(i) the taxpayer actively participates in the management of such trade or business, or

"(ii) such trade or business is carried on by a partnership or electing small business corporation (as defined in section 1371(b)) and 65 percent or more of the losses for the taxable year is allocable to persons who actively participate in the management of the trade or business.

"(C) AGGREGATION OR SEPARATION OF ACTIVITIES UNDER REGULATIONS.—The Secretary shall prescribe regulations under which activities described in subparagraph (A) shall be aggregated or treated as separate activities.

"(D) EXCLUSION FOR REAL PROPERTY.—In the case of activities described in subparagraph (A), the holding of real property (other than mineral property) shall be treated as a separate activity, and subsection (a) shall not apply to losses from such activity. For purposes of the preceding sentence, personal property and services which are incidental to making real property available as living accommodations shall be treated as part of the activity of holding such real property.

"(E) APPLICATION OF SUBSECTION (b)(3).—In the case of an activity described in subparagraph (A), subsection (b)(3) shall apply only to the extent provided in regulations prescribed by the Secretary."

(b) REPEAL OF SECTION 704(d) AT RISK RULES.—

(1) IN GENERAL.—Subsection (d) of section 704 is amended by striking out the last 2 sentences.

(2) TRANSITIONAL RULE.—In the case of a loss which was not allowed for any taxable year by reason of the last two sentences of section 704(d) of the Internal Revenue Code of 1954 (as in effect before the date of the enactment of this Act), such loss shall be treated as a deduction (subject to section 465(a) of such Code) for the first taxable year beginning after December 31, 1978.

(c) CLERICAL AMENDMENTS.—

(1) The heading of section 465 is amended to read as follows:

"SEC. 465. DEDUCTIONS LIMITED TO AMOUNT AT RISK."

(2) The table of sections for subpart C of part II of subchapter E of chapter 1, is amended by strikinng out "in case of certain activities" in the item relating to section 465.

SEC. 202. EXTENSION OF AT RISK PROVISION TO CLOSELY HELD CORPORATIONS

Subsection (a) of section 465 (relating to deductions limited to amount at risk in case of certain activities) is amended to read as follows:

"(a) LIMITATION TO AMOUNT AT RISK.—

"(1) IN GENERAL.—In the case of—

"(A) an individual,

"(B) an electing small business corporation (as defined in section 1371(b)), and

"(C) a corporation with respect to which the stock ownership requirement of paragraph (2) of section 542(a) is met, engaged in an activity to which this section applies, any loss from such activity for the taxable year shall be allowed only to the extent of the aggregate amount with respect to which the taxpayer is at risk (within the meaning of subsection (b)) for such activity at the close of the taxable year.

"(2) DEDUCTION IN SUCCEEDING YEAR.—Any loss from an activity to which this section applies not allowed under this section for the taxable year shall be treated as a deduction allocable to such actitvity in the first succeeding taxable year."

SEC. 203. RECAPTURE OF LOSSES WHERE AMOUNT AT RISK IS LESS THAN ZERO.

Section 465 (relating to deductions limited to amount at risk in case of certain activities) is amended by adding at the end thereof the following new subsection:

"(e) RECAPTURE OF LOSSES WHERE AMOUNT AT RISK IS LESS THAN ZERO.—

"(1) IN GENERAL.—If zero exceeds the amount which the taxpayer is at risk in any activity at the close of any taxable year—

"(A) the taxpayer shall include in his gross income for such taxable year (as income from such activity) an amount equal to such excess, and

"(B) an amount equal to the amount so included in gross income shall be treated as a deduction allocable to such activity for the first succeeding taxable year.

"(2) LIMITATION.—The excess referred to in paragraph (1) shall not exceed—

"(A) the aggregate amount of the reductions required by subsection (b)(5) with respect to the activity for all prior taxable years, reduced by

"(B) the amounts previously included in gross income with respect to such activity under this subsection."

SEC. 204. EFFECTIVE DATES.

(a) IN GENERAL.—The amendments made by this subtitle shall apply to taxable years beginning after December 31, 1978.

(b) TRANSITIONAL RULE FOR RECAPTURE PROVISIONS.—If the amount which the taxpayer is at risk in any activity as of the close of the taxpayer's last taxable year beginning before January 1, 1979, is less than zero, section 465(e)(1) of the Internal Revenue Code of 1954 (as added by section 203 of this Act) shall be applied with respect to such activity of the taxpayer by substituting such negative amount for zero.

Subtitle B—Partnership Provisions

SEC. 211. PENALTY FOR FAILURE TO FILE PARTNERSHIP RETURN.

(a) GENERAL RULE.—Subchapter B of chapter 68 (relating to assessable penalties) is amended by adding at the end thereof the following new section:

"SEC. 6698. FAILURE TO FILE PARTNERSHIP RETURN.

"(a) GENERAL RULE.—In addition to the penalty imposed by section 7203 (relating to willful failure to file return, supply information, or pay tax), if any partnership required to file a return under section 6031 for any taxable year—

"(1) fails to file such return at the time prescribed therefor (determined with regard to any extension of time for filing), or

"(2) files a return which fails to show the information required under section 6031,

such partnership shall be liable for a penalty determined under subsection (b) for each month (or fraction thereof) during which such failure continues (but not to exceed 5 months), unless it is shown that such failure is due to reasonable cause.

"(b) AMOUNT PER MONTH.—For purposes of subsection (a), the amount determined under this subsection for any month is the product of—

"(1) $50, multiplied by

"(2) the number of persons who were partners in the partnership during any part of the taxable year.

"(c) ASSESSMENT OF PENALTY.—The penalty imposed by subsection (a) shall be assessed against the partnership.

"(d) DEFICIENCY PROCEDURES NOT TO APPLY.—Subchapter B of chapter 63 (relating to deficiency procedures for income, estate, gift, and certain excise taxes) shall not apply in respect of the assessment or collection of any penalty imposed by subsection (a)."

(b) CLERICAL AMENDMENT.—The table of sections for subchapter B of chapter 68 is amended by adding at the end thereof the following new item:

"Sec. 6698. Failure to file partnership return."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to returns for taxable years beginning after December 31, 1978.

SEC. 212. EXTENSION OF STATUTE OF LIMITATIONS IN THE CASE OF PARTNERSHIP ITEMS

(a) ASSESSMENT OF DEFICIENCIES.—Section 6501 (relating to limitations on assessment and collection) is amended by adding at the end thereof the following new subsection:

"(q) SPECIAL RULES FOR PARTNERSHIP ITEMS OF FEDERALLY REGISTERED PARTNERSHIPS.—

"(1) IN GENERAL.—In the case of any tax

imposed by subtitle A with respect to any person, the period for assessing a deficiency attributable to any partnership item of a federally registered partnership shall not expire before the later of—

"(A) the date which is 4 years after the date on which the partnership return for the partnership taxable year in which the item arose was filed (or, if later, the date prescribed for filing the return), or

"(B) if the name or address of such person does not appear on the partnership return, the date which is 1 year after the date on which such information is furnished to the Secretary in such manner and at such place as he may prescribe by regulations.

"(2) PARTNERSHIP ITEM DEFINED.—For purposes of this subsection, the term 'partnership item' means—

"(A) any item required to be taken into account for the partnership taxable year under any provision of subchapter K of chapter 1 to the extent that regulations prescribed by the Secretary provide that for purposes of this subtitle such item is more appropriately determined at the partnership level than at the partner level, and

"(B) any other item to the extent affected by an item described in subparagraph (A).

"(3) EXTENSION BY AGREEMENT.—The extensions referred to in subsection (c)(4), insofar as they relate to partnership items, may, with respect to any person, be consented to—

"(A) except to the extent the Secretary is otherwise notified by the partnership, by a general partner of the partnership, or

"(B) by any person authorized to do so by the partnership in writing.

"(4) FEDERALLY REGISTERED PARTNERSHIP.—For purposes of this subsection, the term 'federally registered partnership' means, with respect to any partnership taxable year, any partnership—

"(A) interests in which have been offered for sale at any time during such taxable year or a prior taxable year in any offering required to be registered with the Securities and Exchange Commission, or

"(B) which, at any time during such taxable year or a prior taxable year, was subject to the annual reporting requirements of the Securities and Exchange Commission."

(b) CREDITS AND REFUNDS.—

(1) IN GENERAL.—Section 6511 (relating to limitations on credit or refund) is amended by redesignating subsection (g) as subsection (h) and by inserting after subsection (f) the following new subsection:

"(g) SPECIAL RULE FOR PARTNERSHIP ITEMS OF FEDERALLY REGISTERED PARTNERSHIPS.—

"(1) IN GENERAL.—In the case of any tax imposed by subtitle A with respect to any person, the period for filing a claim for credit or refund of any overpayment attributable to any partnership item of a federally registered partnership shall not expire before the later of—

"(A) the date which is 4 years after the date prescribed by law (including extensions thereof) for filing the partnership return for the partnership taxable year in which the item arose, or

"(B) if an agreement under the provisions of section 6501(c)(4) extending the period for the assessment of any deficiency attributable to such partnership item is made before the date specified in subparagraph (A), the date 6 months after the expiration of such extension.

In any case to which the preceding sentence applies, the amount of the credit or refund may exceed the portion of the tax paid within the period provided in subsection (b)(2) or (c), whichever is applicable.

"(2) DEFINITIONS.—For purposes of this subsection, the terms 'partnership item' and 'federally registered partnership' have the same meanings as such terms have when used in section 6501(q)."

(2) TECHNICAL AMENDMENT.—Paragraph (2) of section 6512(b) (relating to overpayment determined by Tax Court) is amended by striking out "(c), or (d)" each place it appears and inserting in lieu thereof "(c), (d), or (g)".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to partnership items arising in partnership taxable years beginning after December 31, 1978.

TITLE III—PROVISIONS PRIMARILY AFFECTING BUSINESS INCOME TAX

Subtitle A—Corporate Rate Reductions

SEC. 301. CORPORATE RATE REDUCTIONS.

(a) IN GENERAL.—Section 11 (relating to the tax imposed on corporations) is amended to read as follows:

"SEC. 11. TAX IMPOSED.

"(a) CORPORATIONS IN GENERAL.—A tax is hereby imposed for each taxable year on the taxable income of every corporation.

"(b) AMOUNT OF TAX.—The amount of the tax imposed by subsection (a) shall be the sum of—

"(1) 17 percent of so much of the taxable income as does not exceed $25,000;

"(2) 20 percent of so much of the taxable income as exceeds $25,000 but does not exceed $50,000;

"(3) 30 percent of so much of the taxable income as exceeds $50,000 but does not exceed $75,000;

"(4) 40 percent of so much of the taxable income as exceeds $75,000 but does not exceed $100,000; plus

"(5) 46 percent of so much of the taxable income as exceeds $100,000.

"(c) EXCEPTIONS.—Subsection (a) shall not apply to a corporation subject to a tax imposed by—

"(1) section 594 (relating to mutual savings banks conducting life insurance business),

"(2) subchapter L (sec. 801 and following, relating to insurance companies), or

"(3) subchapter M (sec. 851 and following, relating to regulated investment companies and real estate investment trusts).

"(d) FOREIGN CORPORATIONS.—In the case of a foreign corporation, the tax imposed by subsection (a) shall apply only as provided by section 882."

(b) CONFORMING AMENDMENTS.—

(1) CROSS REFERENCES RELATING TO CORPORATIONS.—Paragraph (7) of section 12 (relating to cross references relating to tax on corporations) is amended to read as follows:

"(7) For limitation on benefits of graduated rate schedule provided in section 11(b), see section 1551."

(2) DIVIDENDS RECEIVED ON CERTAIN PREFERRED STOCK.—Subparagraph (B) of section 244(a)(2) (relating to dividends received on certain preferred stock) is amended by striking out "the sum of the normal tax rate and the surtax rate for the taxable year prescribed by section 11" and inserting in lieu thereof "the highest rate of tax applicable under section 11(b)".

(3) DIVIDENDS PAID ON CERTAIN PREFERRED STOCK OF PUBLIC UTILITIES.—Subparagraph (B) of section 247(a)(2) (relating to dividends paid on certain preferred stock of public utilities) is amended by striking out "the sum of the normal tax rate and the surtax rate for the taxable year specified in section 11" and inserting in lieu thereof "the highest rate of tax applicable under section 11(b)".

(4) TAX ON UNRELATED BUSINESS INCOME OF CHARITABLE, ETC., ORGANIZATIONS.—

(A) IMPOSITION OF TAX.—Paragraph (1) of section 511(a) (relating to charitable, etc., organizations taxable at corporation rates) is amended by striking out "a normal tax and a surtax" and inserting in lieu thereof "a tax".

(B) ORGANIZATIONS SUBJECT TO TAX.—Paragraph (2) of section 511(a) is amended by striking out "taxes" each place it appears and inserting in lieu thereof "tax".

(5) POLITICAL ORGANIZATIONS.—Paragraph (1) of section 527(b) (relating to tax imposed) is amended to read as follows:

"(1) IN GENERAL.—A tax is hereby imposed for each taxable year on the political organization taxable income of every political organization. Such tax shall be computed by multiplying the political organization taxable income by the highest rate of tax applicable under section 11(b)."

(6) HOMEOWNERS ASSOCIATIONS.—Paragraph (1) of section 528(b) (relating to tax imposed) is amended to read as follows:

"(1) IN GENERAL.—A tax is hereby imposed for each taxable year on the homeowners association taxable income of every homeowners association. Such tax shall be computed by multiplying the homeowners association taxable income by the highest rate of tax applicable under section 11(b)."

(7) LIFE INSURANCE COMPANIES.—Paragraph (1) of section 802(a) (relating to tax imposed) is amended by striking out "a normal tax and surtax" and inserting in lieu thereof "a tax".

(8) MUTUAL INSURANCE COMPANIES.—

(A) IN GENERAL.—Subsection (a) of section 821 (relating to tax on mutual insurance companies to which part II applies) is amended to read as follows:

"(a) IMPOSITION OF TAX.—

"(1) IN GENERAL.—A tax is hereby imposed for each taxable year on the mutual insurance company taxable income of every mutual insurance company (other than a life insurance company and other than a fire, flood, or marine insurance company subject to the tax imposed by section 831). Such tax shall be computed by multiplying the mutual insurance company taxable income by the rates provided in section 11(b).

"(2) CAP ON TAX WHERE INCOME IS LESS THAN $12,000.—The tax imposed by paragraph (1) shall not exceed 34 percent of the amount by which the mutual insurance company taxable income exceeds $6,000."

(B) SMALL COMPANIES.—Paragraph (1) of section 821(c) (relating to alternative tax for certain small companies) is amended to read as follows:

"(1) IMPOSITION OF TAX.—

"(A) IN GENERAL.—There is hereby imposed for each taxable year on the income of every mutual insurance company to which this subsection applies a tax (which shall be in lieu of the tax imposed by subsection (a)). Such tax shall be computed by multiplying the taxable investment income by the rates provided in section 11(b).

"(B) CAP WHERE INCOME IS LESS THAN $6,000.—The tax imposed by subparagraph (A) shall not exceed 34 percent of the amount by which the taxable investment income exceeds $3,000."

(9) ELECTION BY MUTUAL INSURANCE COMPANY WHICH IS A RECIPROCAL.—Paragraph (1) of section 826(c) (relating to exception) is amended to read as follows:

"(1) is subject to the tax imposed by section 11;".

(10) REGULATED INVESTMENT COMPANIES.—Paragraph (1) of section 852(b) (relating to method of taxation of companies and shareholders) is amended to read as follows:

"(1) IMPOSITION OF TAX ON REGULATED INVESTMENT COMPANIES.—There is hereby imposed for each taxable year upon the investment company taxable income of every regulated investment company a tax computed as provided in section 11, as though the in-

vestment company taxable income were the taxable income referred to in section 11."

(11) REAL ESTATE INVESTMENT TRUSTS.—Paragraph (1) of section 857(b) (relating to imposition of normal tax and surtax on real estate investment trusts) is amended to read as follows:

"(1) IMPOSITION OF TAX ON REAL ESTATE INVESTMENT TRUSTS.—There is hereby imposed for each taxable year on the real estate investment trust taxable income of every real estate investment trust a tax computed as provided in section 11, as thought the real estate invetsment trust taxable income were the taxable income referred to in section 11."

(12) TAX ON INCOME OF FOREIGN CORPORATION CONNECTED WITH UNITED STATES BUSINESS.—The heading of subsection (a) of section 882 (relating to tax on income of foreign corporations connected with United States business) and the heading of paragraph (1) of such subsection are amended to read as follows:

"(a) IMPOSITION OF TAX.—

"(1) IN GENERAL.—".

(13) FOREIGN TAX CREDIT.—Paragraph (2) of section 907(a) (relating to reduction in amount allowed as foreign tax under section 901) is amended to read as follows:

"(2) the percentage which is equal to the highest rate of tax applicable under section 11(b)."

(14) SPECIAL DEDUCTION FOR WESTERN HEMISPHERE TRADE CORPORATION.—Subparagraph (B) of section 922(a)(2) (relating to general rule) is amended by striking out "the sum of the normal tax rate and the surtax rate for the taxable year prescribed by section 11" and inserting in lieu thereof "the highest rate of tax applicable under section 11(b)."

(15) ELECTION BY INDIVIDUALS TO BE SUBJECT TO TAX AT CORPORATE RATES.—Subsection (c) of section 962 (relating to surtax exemption with respect to individuals subject to tax at corporate rates) is amended to read as follows:

"(c) PRO RATION OF EACH SECTION 11 BRACKET AMOUNT.—For purposes of applying subsection (a)(1), the amount in each taxable income bracket in the tax table in section 11(b) shall not exceed an amount which bears the same ratio to such bracket amount as the amount included in the gross income of the United States shareholder under section 951(a) for the taxable year bears to such shareholder's pro rata share of the earnings and profits for the taxable year of all controlled foreign corporations with respect to which such shareholder includes any amount in gross income under section 951(a)."

(16) TREATMENT OF RECOVERIES OF FOREIGN EXPROPRIATION LOSSES.—Paragraph (4) of section 1351(d) (relating to adjustment for prior tax benefits) is amended to read as follows:

"(4) SUBSTITUTION OF CURRENT TAX RATE.—For purposes of this subsection, the rates of tax applicable under section 11(b) for the taxable year of the recovery shall be treated as having been in effect for all prior taxable years."

(17) AMENDMENTS OF SECTION 1551.—

(A) Subsection (a) of section 1551 (relating to disallowance of surtax exemption and accumulated earnings credit) is amended—

(i) by striking out "disallow the surtax exemption (as defined in section 11(d))" and inserting in lieu thereof "disallow the benefits of the rates contained in section 11 (b) which are lower than the highest rate contained in such section", and

(ii) by striking out "such exemption or" and inserting in lieu thereof "such benefits or".

(B) The section heading of section 1551 is amended to read as follows:

"SEC. 1551. DISALLOWANCE OF THE BENEFITS OF THE GRADUATED CORPORATE RATES AND ACCUMULATED EARNINGS CREDIT."

(C) The table of sections for part I of subchapter B of chapter 6 is amended by striking out the item relating to section 1551 and inserting in lieu thereof the following new item:

"Sec. 151. Disallowance of the benefits of the graduated corporate rates and accumulated earnings credit."

(18) LIMITATIONS ON CERTAIN MULTIPLE TAX BENEFITS IN THE CASE OF CERTAIN CONTROLLED CORPORATIONS.—

(A) IN GENERAL.—Subsection (a) of section 1561 (relating to limitations on certain multiple tax benefits in the case of certain controlled corporations) is amended—

(i) by striking out paragraph (1) and inserting in lieu thereof the following:

"(1) amounts in each taxable income bracket in the tax table in section 11(b) which do not aggregate more than the maximum amount in such bracket to which a corporation which is not a component member of a controlled group is entitled,",

(ii) by striking out "amount" each place it appears in the second sentence and inserting in lieu thereof "amounts", and

(iii) by striking out the last sentence.

(B) CERTAIN SHORT TAXABLE YEARS.—Paragraph (1) of section 1561(b) (relating to certain short taxable years) is amended to read as follows:

"(1) the amount in each taxable income bracket in the tax table in section 11(b),".

(19) REPEAL OF CERTAIN OBSOLETE PROVISIONS.—

(A) Subsection (c) of section 6154 (defining estimated tax) is amended to read as follows:

"(c) ESTIMATED TAX DEFINED.—For purposes of this title, in the case of a corporation the term 'estimated tax' means the excess of—

"(1) the amount which the corporation estimates as the amount of the income tax imposed by section 11 or 1201(a), or subchapter L of chapter 1, whichever is applicable, over

"(2) the amount which the corporation estimates as the sum of the credits against tax provided by part IV of subchapter A of chapter 1."

(B) Subsection (e) of section 6655 (defining tax) is amended to read as follows:

"(e) DEFINITION OF TAX.—For purposes of subsections (b) and (d), the term 'tax' means the excess of—

"(1) the tax imposed by section 11 or 1201 (a), or subchapter L of chapter 1, whichever is applicable, over

"(2) the credits against tax provided by part IV of subchapter A of chapter 1."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1978.

Subtitle B—Credits

SEC. 311. 10-PERCENT INVESTMENT TAX CREDIT AND $100,000 LIMITATION ON USED PROPERTY MADE PERMANENT.

(a) 10-PERCENT INVESTMENT TAX CREDIT.—Paragraph (2) of section 46(a) (relating to amount of credit for current taxable year) is amended—

(1) by striking out ", and before January 1, 1981" in clauses (i) and (iii) of subparagraph (D),

(2) by striking out ", and before January 1, 1981, and placed in service by the taxpayer before January 1, 1981" in clause (ii) of subparagraph (D), and

(3) by adding at the end thereof the following new subparagraph:

"(E) SPECIAL RULE FOR SUBPARAGRAPH (B).—For purposes of applying subparagraph (B), subparagraph (D) shall be applied—

"(i) by inserting 'and before January 1, 1981,' after '1975,' the second place it appears in clause (i) and where it appears in clause (iii), and

"(ii) by inserting 'and before January 1, 1981, and placed in service by the taxpayer before January 1, 1981,' after '1975,' in clause (ii)."

(b) $100,000 LIMITATION ON USED PROPERTY.—Paragraph (2) of section 301(c) of the Tax Reduction Act of 1975 (relating to effective date for increase of dollar limitation on used property) is amended by striking out ", and before January 1, 1981".

SEC. 312. INCREASE IN LIMITATION ON INVESTMENT CREDIT TO 90 PERCENT OF TAX LIABILITY.

(a) INCREASE IN GENERAL LIMITATION.—Paragraph (3) of section 46(a) (relating to amount of credit) is amended to read as follows:

"(3) LIMITATION BASED ON AMOUNT OF TAX.—Notwithstanding paragraph (1), the credit allowed by section 38 for the taxable year shall not exceed—

"(A) so much of the liability for tax for the taxable year as does not exceed $25,000, plus

"(B) the following percentage of so much of the liability for tax for the taxable year as exceeds $25,000:

"If the taxable year ends in:	The percentage is:
1979	60
1980	70
1981	80
1982 or thereafter	90."

(b) SPECIAL RULES FOR CERTAIN UTILITIES, RAILROADS, AND AIRLINES.—

(1) UTILITIES.—Paragraph (7) of section 46(a) (relating to alternative limitation in the case of certain utilities) is amended to read as follows:

"(7) ALTERNATIVE LIMITATION IN THE CASE OF CERTAIN UTILITIES.—

"(A) IN GENERAL.—If, for the taxable year ending in 1979—

"(i) the amount of the qualified investment of the taxpayer which is attributable to public utility property is 25 percent or more of his aggregate qualified investment, and

"(ii) the application of this paragraph results in a percentage higher than 60 percent, then subparagraph (B) of paragraph (3) of this subsection shall be applied by substituting for '60 percent' the taxpayer's applicable percentage for such year.

"(B) APPLICABLE PERCENTAGE.—The applicable percentage for any taxpayer for any taxable year ending in 1979 is—

"(i) 50 percent, plus

"(ii) that portion of 20 percent which the taxpayer's amount of qualified investment which is public utility property bears to his aggregate qualified investment.

If the proportion referred to in clause (ii) is 75 percent or more, the applicable percentage of the taxpayer for the year shall be 70 percent.

"(C) PUBLIC UTILITY PROPERTY DEFINED.—For purposes of this paragraph, the term 'public utility property' has the meaning given to such term by the first sentence of subsection (c)(3)(B)."

(2) ALTERNATIVE LIMITATION IN THE CASE OF CERTAIN RAILROADS AND AIRLINES.—Subsection (a) of section 46 is amended by striking out paragraphs (8) and (9) and by inserting in lieu thereof the following new paragraph:

(8) ALTERNATIVE LIMITATION IN THE CASE OF CERTAIN RAILROADS AND AIRLINES.—

"(A) IN GENERAL.—If, for a taxable year ending in 1979 or 1980—

"(i) the amount of the qualified investment of the taxpayer which is attributable to railroad property or to airline property, as the case may be, is 25 percent or more of his aggregate qualified investment, and

"(ii) the application of this paragraph results in a percentage higher than 60 percent (70 percent in the case of a taxable year ending in 1980),

then subparagraph (B) of paragraph (3) of this subsection shall be applied by substituting for '60 percent' ('70 percent' in the case of a taxable year ending in 1980) the taxpayer's applicable percentage for such year.

"(B) APPLICABLE PERCENTAGE.—The applicable percentage of any taxpayer for any taxable year under this paragraph is—

"(i) 50 percent, plus

"(ii) that portion of the tentative percentage for the taxable year which the taxpayer's amount of qualified investment which is railroad property or airline property (as the case may be) bears to his aggregate qualified investment.

If the proportion referred to in clause (ii) is 75 percent or more, the applicable perentage of the taxpayer for the taxable year shall be 90 percent (80 percent in the case of a taxable year ending in 1980).

"(C) TENTATIVE PERCENTAGE.—For purposes of subparagraph (B), the tentative percentage shall be determined under the following table:

"If the taxable year ends in:	The tentative percentage is:
1979	40
1980	30

"(D) RAILROAD PROPERTY DEFINED.—For purposes of this paragraph, the term 'railroad property' means section 38 property used by the taxpayer directly in connection with the trade or business carried on by the taxpayer of operating a railroad (including a railroad switching or terminal company).

"(E) AIRLINE PROPERTY DEFINED.—For purposes of this paragraph, the term 'airline property' means section 38 property used by the taxpayer directly in connection with the trade or business carried on by the taxpayer of the furnishing or sale of transportation as a common carrier by air subject to the jurisdiction of the Civil Aeronautics Board or the Federal Aviation Administration."

(c) REPEAL OF CERTAIN OBSOLETE PROVISIONS.—

(1) Subsections (h), (i), and (j) of section 48 and sections 49 and 50 are hereby repealed.

(2) Paragraphs (1) and (2) of section 46 (f) and subparagraph (B) of section 48(a) (7) are each amended by striking out "described in section 50".

(3) Subparagraph (A) of section 48(a)(7) is amended by striking out "(other than pretermination property)".

(4) Subsection (i) of section 167 is hereby repealed.

(5) The table of sections for subpart B of part IV of subchapter A of chapter 1 is amended by striking out the items relating to sections 49 and 50.

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after December 31, 1978.

SEC. 313. INVESTMENT CREDIT FOR POLLUTION CONTROL FACILITIES.

(a) IN GENERAL.—Paragraph (5) of section 46(c) (relating to applicable percentage in the case of certain pollution control facilities) is amended to read as follows:

"(5) APPLICABLE PERCENTAGE IN THE CASE OF CERTAIN POLLUTION CONTROL FACILITIES.—

"(A) IN GENERAL.—Notwithstanding paragraph (2), in the case of property—

"(i) with respect to which an election under section 169 applies, and

"(ii) the useful life of which (determined without regard to section 169) is not less than 5 years,

100 percent shall be the applicable percentage for purposes of applying paragraph (1) with respect to so much of the adjusted basis of the property as (after the application of section 169(f)) constitutes the amortizable basis for purposes of section 169.

"(B) SPECIAL RULE WHERE PROPERTY IS FINANCED BY INDUSTRIAL DEVELOPMENT BONDS.—To the extent that any property is financed by the proceeds of an industrial development bond (within the meaning of section 103(b)(2)) the interest on which is exempt from tax under section 103, subparagraph (A) shall be applied by substituting '50 percent' for '100 percent'."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to—

(1) property acquired by the taxpayer after December 31, 1978, and

(2) property the construction, reconstruction, or erection of which was completed by the taxpayer after December 31, 1978 (but only to the extent of the basis thereof attributable to construction, reconstruction, or erection after such date).

SEC. 314. TARGETED JOBS CREDIT.

(a) IN GENERAL.—Section 51 (relating to amount of credit) is amended to read as follows:

"SEC. 51. AMOUNT OF CREDIT.

"(a) DETERMINATION OF AMOUNT.—The amount of the credit allowable by section 44B for the taxable year shall be 50 percent of the qualified wages for such year.

"(b) WAGES CANNOT EXCEED 20 PERCENT OF FUTA WAGES FOR ALL EMPLOYEES.—The amount of the qualified wages taken into account under this section for any calendar year shall not exceed 20 percent of the aggregate unemployment insurance wages paid by the employer during such calendar year.

"(c) QUALIFIED WAGES DEFINED.—

"(1) IN GENERAL.—For purposes of this subpart, the term 'qualified wages' means the unemployment insurance wages paid by the employer during the calendar year in which the taxable year begins to individuals who are—

"(A) WIN registrants,

"(B) vocational rehabilitation referrals, or

"(C) food stamp youths.

"(2) ONLY FIRST YEAR TAKES INTO ACCOUNT.—For purposes of this subpart, unemployment insurance wages may be taken into account with respect to any individual only to the extent attributable to service rendered during the 1-year period beginning with his first payment of wages by the employer (or in the case of a vocational rehabilitation referral, the first payment of wages by the employer after the beginning of such individual's rehabilitation plan).

"(3) ONLY FIRST $6,000 OF WAGES TAKEN INTO ACCOUNT FOR ANY INDIVIDUAL.—For purposes of this subpart, the unemployment insurance wages paid during any calendar year which are taken into account with respect to any individual shall not exceed $6,000 reduced by the amount of unemployment insurance wages paid by the employer to such individual during the preceding calendar year.

"(d) OTHER DEFINITIONS.—For purposes of this subpart—

"(1) UNEMPLOYMENT INSURANCE WAGES.—Except as otherwise provided in this subpart, the term 'unemployment insurance wages' has the meaning given to the term 'wages' by section 3306(b).

"(2) AGRICULTURE LABOR.—If the services performed by any employee for an employer during more than one-half of any pay period (within the meaning of section 3306(d)) taken into account with respect to any calendar year constitute agricultural labor (within the meaning of section 3306(k)), the term 'unemployment insurance wages' means, with respect to the remuneration paid by the employer to such employee for such year, an amount equal to so much of such remuneration as constitutes 'wages' within the meaning of section 3121(a), except that the contribution and benefit base for each calendar year shall be deemed to be $6,000.

"(3) RAILWAY LABOR.—If more than one-half of remuneration paid by an employer to an employee during the calendar year is remuneration for service described in section 3306(c)(9), the term 'unemployment insurance wages' means, with respect to such employee for such year, an amount equal to so much of the remuneration paid to such employee during such year which would be subject to contributions under section 8(a) of the Railroad Unemployment Insurance Act (45 U.S.C. 358(a)) if the maximum amount subject to such contributions were $500 per month. The term 'vocational rehabilitation referral' means any individual who—

"(A) has a physical or mental disability which, for such individual, constitutes or results in a substantial handicap to employment, and

"(B) has been referred to the employer upon completion of (or while receiving) rehabilitative services pursuant to—

"(i) an individualized written rehabilitation plan under a State plan for vocational rehabilitation services approved under the Rehabilitation Act of 1973, or

"(ii) a program of vocational rehabilitation carried out under chapter 31 of title 38, United States Code.

"(5) WIN REGISTRANT.—The term 'WIN registrant' means any individual who is certified by the Secretary of Labor as having been placed in employment under a work incentive program established under section 432(b)(1) of the Social Security Act.

"(6) FOOD STAMP YOUTH.—

"(A) IN GENERAL.—The term 'food stamp youth' means any individual who is certified by the Secretary of Labor as meeting—

"(i) the age requirements of subparagraph (B), and

"(ii) the food stamp eligibility requirements of subparagraph (C).

"(B) AGE REQUIREMENTS.—An individual meets the age requirements of this subparagraph if such individual has attained age 18 but not age 25 on the date such individual is hired by the employer.

"(C) FOOD STAMP ELIGIBILITY REQUIREMENTS.—An individual meets the food stamp eligibility requirements of this subparagraph if the appropriate food stamp agency determines that, during the 60-day period ending on the date such individual is hired by the employer, such individual was a member of a household which, at any time during such 60-day period, was receiving, or was eligible to receive, food stamps under the Food Stamp Act of 1977.

"(e) RULES FOR APPLICATION OF SECTION.—For purposes of this subpart—

"(1) REMUNERATION MUST BE FOR TRADE OR BUSINESS EMPLOYMENT.—Remuneration paid by an employer to an employee during any calendar year shall be taken into account only if more than one-half of the remunera-

tion so paid is for services performed in a trade or business of the employer.

"(2) SPECIAL RULE FOR CERTAIN DETERMINATION.—Any determination as to whether paragraph (1) of this subsection, or paragraph (2) or (3) of subsection (d), applies with respect to any employee for any calendar year shall be made without regard to subsections (a) and (b) of section 52.

"(f) TERMINATION.—This section shall apply only to taxable years beginning in 1979 or 1980."

(b) TERMINATION OF WIN CREDIT.—Subsection (a) of section 50B (relating to definitions; special rules for WIN credit) is amended by adding at the end thereof the following new paragraph:

"(4) TERMINATION.—For purposes of this subpart, the term 'work incentive program expenses' shall not include any amount paid or incurred by the taxpayer in a taxable year beginning after December 31, 1978."

(c) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) AMENDMENTS OF SECTION 52.—

(A) Section 52 (relating to special rules for computing credit for employment of certain new employees) is amended—

(i) by striking out subsections (c), (e), and (i), and

(ii) by redesigning subsections (d), (f), (g), (h), and (j), as subsections (c), (d), (e), (f), and (g), respectively.

(B) Subsections (a) and (b) of section 52 are each amended by striking out "proportionate contribution to the increase in" and inserting in lieu thereof "proportionate share of the".

(C) Subsection (e) of section 52 (as redesignated by subparagraph (A)) is amended—

(i) by adding "and" at the end of paragraph (1);

(ii) by striking out ", and" at the end of paragraph (2) and inserting a period; and

(iii) by striking out paragraph (3).

(D) Subsection (g) of section 52 (as redesignated by subparagraph (A)) is amended to read as follows:

"(g) CERTAIN TAXABLE YEARS.—If the employer has more than 1 taxable year beginning in any calendar year, the credit under this subpart shall be determined for the employer's last taxable year beginning in such calendar year."

(2) AMENDMENT OF SECTION 53.—Section 53 (relating to limitation based on amount of tax) is amended by striking out subsection (b) and by redesignating subsection (c) as subsection (b).

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1978.

Subtitle C—Increase in Limit on Small Issues of IDB's

SEC. 321. INCREASE TO $10,000,000.

(a) GENERAL RULE.—Subparagraph (D) of section 103(b)(6) (relating to $5,000,000 limit in certain cases) is amended by striking out "$5,000,000" in the heading and in the text and inserting in lieu thereof "$10,000,000".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to obligations issued after December 31, 1978, in taxable years ending after such date.

Subtitle D—Small Business Provisions

PART I—PROVISIONS RELATING TO SUBCHAPTER S

SEC. 331. SUBCHAPTER S. CORPORATIONS ALLOWED 15 SHAREHOLDERS.

(a) GENERAL RULE.—Paragraph (1) of section 1371(a) (defining small business corporation) is amended to read as follows:

"(1) have more than 15 shareholders:".

(b) TECHNICAL AMENDMENTS.—

(1) Section 1371 is amended by striking out subsection (e) and by redesignating subsection (f) as subsection (e).

(2) Paragraph (2) of section 1371(a) is amended by striking out "subsection (f)" and inserting in lieu thereof "subsection (e)".

SEC. 332. PERMITTED SHAREHOLDERS OF SUBCHAPTER S CORPORATIONS.

(a) HUSBAND AND WIFE TREATED AS ONE INDIVIDUAL.—Subsection (c) of section 1371 (relating to stock owned by husband and wife) is amended to read as follows:

"(c) STOCK OWNED BY HUSBAND AND WIFE.—For purposes of subsection (a)(1), a husband and wife (and their estates) shall be treated as one shareholder."

(b) GRANTOR OF GRANTOR TRUST TREATED AS THE SHAREHOLDER.—Subsection (e) of section 1371 (as redesignated by section 331(b)(1) of this Act) is amended by inserting after the first sentence the following new sentence: "In the case of a trust described in paragraph (1), the grantor shall be treated as the shareholder."

SEC. 333. EXTENSION OF PERIOD FOR MAKING SUBCHAPTER S ELECTIONS.

(a) GENERAL RULE.—Subsection (c) of section 1372 (relating to when and how subchapter S election may be made) is amended to read as follows:

"(c) WHEN AND HOW MADE.—

"(1) IN GENERAL.—An election under subsection (a) may be made by a small business corporation for any taxable year—

"(A) at any time during the preceding taxable year, or

"(B) at any time during the first 75 days of the taxable year.

"(2) TREATMENT OF CERTAIN LATE ELECTIONS.—If—

"(A) a small business corporation makes an election under subsection (a) for any taxable year, and

"(B) such election is made after the first 75 days of the taxable year and on or before the last day of such taxable year,

then such election shall be treated as made for the following taxable year.

"(3) MANNER OF MAKING ELECTION.—An election under subsection (a) shall be made in such manner as the Secretary shall prescribe by regulations."

(b) TECHNICAL AMENDMENTS.—

(1) The second sentence of section 1372(a) is amended to read as follows: "Such election shall be valid only if all persons who are shareholders in such corporation on the day on which such election is made consent to such election."

(2) Subparagraph (A) of section 1372(e)(1) is amended to read as follows:

"(A) An election under subsection (a) made by a small business corporation shall terminate if any person who was not a shareholder if such corporation on the day on which the election is made becomes a shareholder in such corporation and affirmatively refuses (in such manner as the Secretary may by regulations prescribe) to consent to such election on or before the 60th day after the day on which he acquires the stock."

(3) Subparagraph (C) of section 1372(e)(1) is amended by inserting "(or, if later, the first taxable year for which such election would otherwise have been effective)" after "in the corporation".

SEC. 334. EFFECTIVE DATE.

The amendments made by this part shall apply to taxable years beginning after December 31, 1978.

PART II—OTHER PROVISIONS

SEC. 335. SMALL BUSINESS CORPORATION STOCK.

(a) INCREASE TO $1,000,000 AMOUNT OF STOCK POTENTIALLY SUBJECT TO ORDINARY LOSS TREATMENT; REMOVAL OF EQUITY CAPITAL TEST.—Subsection (c) of section 1244 (relating to losses on small business stock) is amended by striking out paragraph (2) and inserting in lieu thereof the following:

"(3) SMALL BUSINESS CORPORATION DEFINED.—

"(A) IN GENERAL.—For purposes of this section, a corporation shall be treated as a small business corporation if the aggregate amount of money and other property received by the corporation for stock, as a contribution to capital, and as paid-in surplus, does not exceed $1,000,000. The determination under the preceding sentence shall be made as of the time of the issuance of the stock in question but shall include amounts received for such stock and for all stock theretofore issued.

"(B) AMOUNT TAKEN INTO ACCOUNT WITH RESPECT TO PROPERTY.—For purposes of subparagraph (A), the amount taken into account with respect to any property other than money shall be the amount equal to the adjusted basis to the corporation of such property for determining gain, reduced by any liability to which the property was subject or which was assumed by the corporation. The determination under the preceding sentence shall be made as of the time the property was received by the corporation."

(b) INCREASE IN MAXIMUM AMOUNT TREATED AS ORDINARY LOSS FOR ANY TAXABLE YEAR.—Subsection (b) of section 1244 is amended—

(1) by striking out "$25,000" in paragraph (1) and inserting in lieu thereof "$50,000", and

(2) by striking out "$50,000" in paragraph (2) and inserting in lieu thereof "$100,000".

(c) REMOVAL OF REQUIREMENT THAT STOCK ISSUANCE BE PURSURANT TO PLAN.—Subsection (c) of section 1244 (defining section 1244 stock) is amended by striking out paragraph (1) and inserting in lieu thereof the following new paragraphs:

"(1) IN GENERAL.—For purposes of this section, the term 'section 1244 stock' means common stock in a domestic corporation if—

"(A) at the time such stock is issued, such corporation was a small business corporation,

"(B) such stock was issued by such corporation for money or other property (other than stock and securities), and

"(C) such corporation during the period of its 5 most recent taxable years ending before the date the loss on such stock was sustained, derived more than 50 percent of its aggregate gross receipts from sources other than royalties, rents, dividends, interests, annuities, and sales or exchanges of stocks or securities.

"(2) RULES FOR APPLICATION OF PARAGRAPH (1)(C).—

"(A) PERIOD TAKEN INTO ACCOUNT WITH RESPECT TO NEW CORPORATIONS.—For purposes of paragraph (1)(C), if the corporation has not been in existence for 5 taxable years ending before the date the loss on the stock was sustained, there shall be substituted for such 5-year period—

"(i) the period of the corporation's taxable years ending before such date, or

"(ii) if the corporation has not been in existence for 1 taxable year ending before such date, the period such corporation has been in existence before such date.

"(B) GROSS RECEIPTS FROM SALES OF SECURITIES.—For purposes of paragraph (1)(C),

gross receipts from the sales or exchanges of stock or securities shall be taken into account only to the extent of gains therefrom.

"(C) NONAPPLICATION WHERE DEDUCTIONS EXCEED GROSS INCOME.—Paragraph (1)(C) shall not apply with respect to any corporation if, for the period taken into account for purposes of paragraph (1)(C), the amount of the deductions allowed by this chapter (other than by sections 172, 243, 244, and 245) exceeds the amount of gross income."

(d) TECHNICAL AMENDMENTS.—Paragraph (2) of section 1244(d) (relating to special rules) is amended—

(1) by striking out "subparagraph (E)" and inserting in lieu thereof "subparagraph (C)", and

(2) by striking out "paragraphs (1)(E) and (2)(A)" and inserting in lieu thereof "paragraphs (1)(C) and (3)(A)".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to stock issued after the date of the enactment of this Act.

SEC. 336. SPECIAL DEPRECIATION RULES FOR SMALL BUSINESS.

(a) SECTION 179 PERCENTAGE INCREASED TO 25 PERCENT.—Subsection (a) of section 179 (relating to additional first-year depreciation allowance for small business) is amended by striking out "20 percent" and inserting in lieu thereof "25 percent".

(b) INCREASE IN DOLLAR LIMITATION.—

(1) The first sentence of section 179(b) is amended by striking out "$10,000" each place it appears and inserting in lieu thereof "$20,000".

(2) The second sentence of section 179(b) is amended by striking out "$20,000 in lieu of $10,000" and inserting in lieu thereof "$40,000 in lieu of $20,000".

(c) BENEFITS LIMITED TO SMALL BUSINESS.—

(1) IN GENERAL.—Section 179 is amended by redesignating subsections (c), (d), and (e) as subsections (d), (e), and (f), respectively, and by inserting after subsection (b) the following new subsection:

"(c) BENEFITS LIMITED TO SMALL BUSINESS.—

"(1) IN GENERAL.—This section shall not apply for the taxable year if (as of the first day of such year) the aggregate adjusted basis of the depreciable property of the taxpayer is $1,000,000,000 or more.

"(2) DEPRECIABLE PROPERTY DEFINED.—For purposes of this subsection, the term 'depreciable property' means property which is of a character subject to the allowance for depreciation provided by section 167."

(2) CONTROLLED GROUPS.—Paragraph (6) of subsection (e) (as redesignated by paragraph (1) of this subsection) of section 179 is amended—

(A) by striking out the heading and inserting in lieu thereof "(6) APPLICATION OF SUBSECTIONS (b) AND (c) IN THE CASE OF CONTROLLED GROUP.—"; and

(B) by striking out "For purposes of subsection (b)" and inserting in lieu thereof "For purposes of subsections (b) and (c)".

(3) CONFORMING AMENDMENT.—Subparagraph (A) of section 48(c)(3) is amended by striking out "section 179(d)(2)" and inserting in lieu tehreof "section 179(e)(2)".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1978.

Subtitle E—Accounting Provisions

SEC. 341. TREATMENT OF CERTAIN CLOSELY HELD FARM CORPORATIONS FOR PURPOSES OF RULE REQUIRING ACCRUAL ACCOUNTING.

(a) GENERAL RULE.—Section 447 (relating to method of accounting for corporations engaged in farming) is amended by adding at the end thereof the following new subsection:

"(h) EXCEPTION FOR CERTAIN CLOSELY HELD CORPORATIONS.—

"(1) IN GENERAL.—This section shall not apply to any corporation if, on October 4, 1976, and at all times thereafter—

"(A) members of 2 families (within the meaning of subsection (d)(1)) have owned (directly or through the application of subsection (d)) at least 65 percent of the total combined voting power of all classes of stock of such corporation entitled to vote, and at least 65 percent of the total number of shares of all other classes of stock of such corporation; or

"(B)(i) members of 3 families (within the meaning of subsection (d)(1)) have owned (directly or through the application of subsection (d)) at least 50 percent of the total combined voting power of all classes of stock of such corporation entitled to vote, and at least 50 percent of the total number of shares of all other classes of stock of such corporation; and

"(ii) substantially all of the stock of such corporation which is not so owned (directly or through the application of subsection (d)) by members of such 3 families is owned directly—

"(I) by employees of the corporation or members of their families (within the meaning of section 267(c)(4)), or

"(II) by a trust for the benefit of the employees of such corporation which is described in section 401(a) and which is exempt from taxation under section 501(a).

"(2) STOCK HELD BY EMPLOYEES, ETC.—For purposes of this subsection, stock which—

"(A) is owned directly by employees of the corporation or members of their families (within the meaning of section 267(c)(4)) or by a trust described in paragraph (1)(B)(ii)(II), and

"(B) was acquired on or after October 4, 1976, from the corporation or from a member of a family which, on October 4, 1976, was described in subparagraph (A) or (B)(i) of paragraph (1), shall be treated as owned by a member of a family which, on October 4, 1976, was described in subparagraph (A) or (B)(i) of paragraph (1).

"(3) CORPORATION MUST BE ENGAGED IN FARMING.—This subsection shall apply only in the case of a corporation which was, on October 4, 1976, and at all times thereafter, engaged in the trade or business of farming."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1977.

SEC. 342. ACCOUNTING FOR GROWING CROPS.

(a) APPLICATION OF SECTION.—This section shall apply to a taxpayer who—

(1) is a farmer, nurseryman, or florist,

(2) is on an accrual method of accounting, and

(3) is not required by section 447 of the Internal Revenue Code of 1954 to capitalize preproductive period expenses.

(b) TAXPAYER MAY NOT BE REQUIRED TO INVENTORY GROWING CROPS.—A taxpayer to whom this section applies may not be required to inventory growing crops.

(c) TAXPAYER MAY ELECT TO CHANGE TO CASH METHOD.—A taxpayer to whom this section applies may, for any taxable year beginning after December 31, 1977, and before January 1, 1981, change to the cash receipts and disbursements method of accounting with respect to any trade or business in which the principal activity is growing crops.

(d) SECTION 481 OF CODE TO APPLY.—Any change in the way in which a taxpayer accounts for the costs of growing crops resulting from the application of subsection (b) or (c)—

(1) shall not require the consent of the Secretary of the Treasury or his delegate, and

(2) shall be treated, for purposes of section 481 of the Internal Revenue Code of 1954, as a change in the method of accounting initiated by the taxpayer.

(e) GROWING CROPS.—For purposes of this section, the term "growing crops" does not include trees grown for lumber, pulp, or other nonlife purposes.

TITLE IV—CAPITAL GAINS

SEC. 401. REPEAL OF ALTERNATIVE TAX ON CAPITAL GAINS OF INDIVIDUALS.

(a) GENERAL RULE.—Section 1201 (relating to alternative tax) is amended—

(1) by striking out subsections (b) and (c),

(2) by redesignating subsection (d) as subsection (b), and

(3) by amending the section heading to read as follows:

"SEC. 1201. ALTERNATIVE TAX FOR CORPORATIONS."

(b) CONFORMING AMENDMENTS.—

(1) Paragraph (1) of section 3(b) is amended by striking out subparagraph (B) and by redesignating subparagraphs (C) and (D) as subparagraphs (B) and (C), respectively.

(2) Subsection (a) of section 5 is amended by striking out paragraph (3) and by redesignating paragraphs (4) and (5) as paragraphs (3) and (4), respectively.

(3) Paragraph (1) of section 871(b) is amended by striking out "section 1, 402(e)(1), or 1201(b)" and inserting in lieu thereof "section 1 or 402(e)(1)".

(4) Subsection (b) of section 877 is amended by striking out "section 1, 402(e)(1), or 1201(b)" and inserting in lieu thereof "section 1 or 402(e)(1)".

(5) Paragraph (1) of section 911(d) is amended—

(A) by striking out "section 1 or section 1201" each place it appears and inserting in lieu thereof "section 1", and

(B) by striking out "(whichever is applicable)" each place it appears.

(6) Subsection (b) of section 1304 is amended—

(A) by adding "and" at the end of paragraph (2),

(B) by striking out paragraph (3), and

(C) by redesignating paragraph (4) as paragraph (3).

(7) The table of sections for part I of subchapter P of chapter 1 is amended by striking out the item relating to section 1201 and inserting in lieu thereof the following:

"Sec. 1201. Alternative tax for corporations."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1978.

SEC. 402. REMOVAL OF CAPITAL GAINS FROM ITEMS OF TAX PREFERENCE FOR PURPOSES OF MINIMUM AND MAXIMUM TAX.

(a) GENERAL RULE.—Subsection (a) of section 57 (defining items of preference) is amended by striking out paragraph (9).

(b) CONFORMING AMENDMENTS.—

(1) Section 56 (relating to imposition of minimum tax) is amended by striking out subsections (d) and (e).

(2) Section 57 (defining items of tax preference) is amended by striking out subsection (e).

(3) Subsection (d) of section 58 (relating to electing small business corporations and their shareholders) is amended to read as follows:

"(d) ELECTING SMALL BUSINESS CORPORATIONS AND THEIR SHAREHOLDERS.—The items of tax preference of an electing small busi-

ness corporation (as defined in section 1371 (b)) for each taxable year of the corporation shall be treated as items of tax preference of the shareholders of such corporation, and shall not be treated as items of tax preference of such corporation. The sum of the items so treated shall be apportioned pro rata among such shareholders in a manner consistent with section 1374(c)(1). For purposes of this subsection, this part shall be treated as applying to such corporation."

(4) Subsection (f) of section 58 (relating to regulated investment companies, etc.) is amended to read as follows:

"(f) REGULATED INVESTMENT COMPANIES, ETC.—In the case of a regulated investment company to which part I of subchapter M applies or a real estate investment trust to which part II of subchapter M applies, the items of tax preference of such company or such trust for each taxable year (other than, in the case of a real estate investment trust, the item of tax preference set forth in section 57(a)(2)) shall be treated as items of tax preference of the shareholders of such company, or the shareholders or holders of beneficial interests of such trust (and not as items of tax preference of such company or such trust), in the same proportion that the dividends (other than capital gains dividends) paid to each such shareholder, or holder of beneficial interest, bears to the taxable income of such company or such trust determined without regard to the deduction for dividends paid."

(5) Subsection (g) of section 58 (relating to tax preferences attributable to foreign sources) is amended—

(A) by striking out "paragraphs (6) and (9)" in paragraph (1) and inserting in lieu thereof "paragraph (6)",

(B) by amending the first sentence of paragraph (2) to read as follows: "For purposes of section 56, any item of tax preference set forth in paragraph (6) of section 57(a) which is attributable to sources within any foreign country or possession of the United States shall not be taken into account if, under the tax laws of such country or possession, preferential treatment is not accorded transfers of shares of stock pursuant to stock options described in such paragraph (6).", and

(C) by amending the heading of paragraph (2) to read as follows:

"(2) STOCK OPTIONS.—".

(6) Subsection (i) of section 58 (defining corporation) is amended by striking out "Except as provided in subsection (d)(2), for" and inserting in lieu thereof "For".

(7) Paragraph (1) of section 1372(b) (relating to the effect of election by small business corporation) is amended by striking out "by section 58(d)(2) and".

(8) Sections 1373(c) and 1375(a)(3) are each amended by striking out "taxes imposed by sections 56 and 1378(a)" and inserting in lieu thereof "tax imposed by section 1378(a)".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1978.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the first committee amendment.

Mr. ULLMAN. Mr. Chairman, I ask unanimous consent, in the interest of saving time, that the committee amendments as printed in the bill, except for section 404, be considered en bloc, considered as read, and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The committee amendments are as follows:

Committee Amendments: The amendments (stated in terms of page and line numbers of the introduced bill) are as follows:

Page 2, after the item relating to section 103 insert the following:

Sec. 104. Simplification of the earned income tax credit.
Sec. 105. Application of certain changes in the case of fiscal year taxpayers.

Page 2, after the item relating to section 123 insert the following:

Sec. 124. Tax treatment of cafeteria plans.
Sec. 125. Administration of 1954 Code in the case of certain cash or deferred arrangements.

Page 3, after the item relating to section 313 insert the following:

Sec. 314. Investment credit allowed for certain rehabilitated buildings.

Page 3, strike out "314" and insert in lieu thereof "315".

Page 3, strike out the items relating to subtitle C and to section 321 and insert in lieu thereof the following:

Subtitle C—Miscellaneous Provisions

Sec. 321. Increase in limit on small issues of IDB's to $10,000,000.
Sec. 322. Three-year extension of provision for 60-month depreciation of expenditures to rehabilitate low-income rental housing.

Page 3, after the item relating to section 402 insert the following:

Sec. 403. Separate minimum tax on capital gains.
Sec. 404. Indexing of certain assets for purposes of determining gain or loss.
Sec. 405. One-time exclusion of gain from sale of principal residence.
Sec. 406. Waiver of certain 18-month rules of section 1034 when sale of residence is connected with commencing work at new place.
Sec. 407. Study of effects of changes in the tax treatment of capital gains on stimulating investment and economic growth.

Page 11, strike out line 19 and all that follows through line 3 on page 12 and insert in lieu thereof the following:

(d) TECHNICAL AMENDMENTS.—

(1) Subparagraph (C) of section 402(e)(1) (relating to tax on lump sum distributions) is amended by striking out "$2,200" and inserting in lieu thereof "$2,300".

(2) Paragraph (3) of section 1302(b) (relating to transitional rule for determining base period income) is amended to read as follows:

"(3) TRANSITIONAL RULE FOR DETERMINING BASE PERIOD INCOME.—The base period income (determined under paragraph (2)) for any taxable year beginning before January 1, 1977, shall be increased by—

"(A) $3,200 in the case of a joint return or a surviving spouse (as defined in section 2(a)),

"(B) $2,200 in the case of an individual who is not married (within the meaning of section 143) and is not a surviving spouse (as so defined), or

"(C) $1,600 in the case of a married individual (within the meaning of section 143) filing a separate return.

For the purposes of this paragraph, filing status shall be determined as of the computation year."

Page 15, after line 10, insert the following:

SEC. 104. SIMPLIFICATION OF THE EARNED INCOME TAX CREDIT

(a) REVISION OF THE LIMITATION.—Subsection (b) of section 43 (relating to earned income credit) is amended to read as follows:

"(b LIMITATION.—The amount of the credit allowable to a taxpayer under subsection (a) for any taxable year shall not exceed the excess (if any) of—

"(1) $400, over

"(2) 10 percent of so much of the adjusted gross income (or, if greater, the earned income) of the taxpayer for the taxable year as exceeds $4,000."

(b) AMOUNT OF CREDIT TO BE DETERMINED UNDER TABLES.—Section 43 is amended by adding at the end thereof the following new subsection:

"(f) AMOUNT OF CREDIT TO BE DETERMINDED UNDER TABLES.—

"(1) IN GENERAL.—The amount of the credit allowed by this section shall be determined under tables prescribed by the Secretary.

"(2) REQUIREMENTS FOR TABLES.—The tables prescribed under paragraph (1) shall reflect the provisions of subsections (a) and (b) and shall have income brackets of not greater than $50 each—

"(A) for earned income between 0 and $8,000, and

"(B) for adjusted gross income between $4,000 and $8,000."

(c) EXCLUDABLE EARNED INCOME TAKEN INTO ACCOUNT.—Subparagraph (B) of section 43(c)(2) (defining earned income) is amended by striking out clause (i) and by redesignating clauses (ii), (iii), and (iv) as clauses (i), (ii), and (iii), respectively.

(d) DEFINITION OF ELIGIBLE INDIVIDUAL.—Paragraph (1) of section 43(c) (defining eligible individual) is amended to read as follows:

"(1) ELIGIBLE INDIVIDUAL.—

"(A) IN GENERAL.—The term 'eligible individual' means an individual who, for the taxable year—

"(i) is married (within the meaning of section 143) and is entitled to a deduction under section 151 for a child (within the meaning of section 151(e)(3)),

"(ii) is a surviving spouse (as determined under section 2(a)), or

"(iii) is a head of a household (as determined under subsection (b) of section 2 without regard to subparagraphs (A)(ii) and (B) of paragraph (1) of such subsection).

"(B) CHILD MUST RESIDE WITH TAXPAYER IN THE UNITED STATES.—An individual shall be treated as satisfying clause (i) of subparagraph (A) only if the child has the same principal place of abode as the individual and such abode is in the United States. An individual shall be treated as satisfying clause (ii) or (iii) of subparagraph (A) only if the household in question is in the United States.

"(C) INDIVIDUAL ENTITLED TO EXCLUDE INCOME UNDER SECTION 911 NOT ELIGIBLE INDIVIDUAL.—The term 'eligible individual' does not include an individual who, for the taxable year, is entitled to exclude any amount from gross income under section 911 (relating to earned income from sources without the United States) or section 931 (relating to income from sources within the possessions of the United States)."

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1978.

Page 15, after line 10, insert the following:

SEC. 105. APPLICATION OF CERTAIN CHANGES IN THE CASE OF FISCAL YEAR TAXPAYERS.

Section 21 (relating to effects of changes in

rate of tax is amended by adding at the end thereof the following new subsection:

"(f) CHANGES MADE BY REVENUE ACT OF 1978.—In applying subsection (a) to a taxable year which is not a calendar year—

"(1) the amendments made by sections 101, 102, and 301 of the Revenue Act of 1978 (and no other amendments made by such Act), and

"(2) the expiration of section 42 (relating to general tax credit),

shall be treated as a change in a rate of tax."

Page 20, strike out lines 23 through 25.

Page 21, strike out lines 16 through 23, and insert in lieu thereof the following:

forth in paragraph (2) shall be the lesser of—

"(A) $15,000, or

"(B) the sum of—

"(i) the plan ceiling established for purposes of paragraph (2) for the taxable year, (determined without regard to this paragraph), plus

"(ii) so much of the plan ceiling established for purposes of paragraph (2) for taxable years before the taxable year as has not theretofore been used under paragraph (2) or this paragraph,

Page 21, line 25, after "State" insert "and in the case of new plans".

Page 22, line 1, strike out "taxable" and insert in lieu thereof "plan".

Page 22, line 4, strike out "held by" and insert in lieu thereof "payable under".

Page 22, line 14, after "property" insert "and rights".

Page 22, beginning on line 16, strike out "amounts or property," and insert in lieu thereof "amounts, property, or rights,".

Page 22, line 19, after "property" insert "and rights".

Page 23, line 1, strike out "calendar" and insert in lieu thereof "plan".

Page 23, line 4, strike out "calendar" and insert in lieu thereof "plan".

Page 25, after line 2, insert the following:

"(9) SECTION TO APPLY TO RURAL ELECTRIC COOPERATIVES.—

"(A) IN GENERAL.—This section shall apply with respect to any participant in a plan of a rural electric cooperative in the same manner and to the same extent as if such plan were a plan of a State.

"(B) RURAL ELECTRIC COOPERATIVE DEFINED.—For purposes of subparagraph (A), the term 'rural electric cooperative' means—

"(i) any organization described in section 501(c)(12) which is exempt from tax under section 501(a) and which is engaged primarily in providing electric service, and

"(ii) any organization described in section 501(c)(6) which is exempt from tax under section 501(a) and all the members of which are organizations described in clause (i).

Page 27, strike out lines 5 through 15, and insert in lieu thereof the following:

(2) TRANSITIONAL RULES.—

(A) IN GENERAL.—In the case of any taxable year beginning after December 31, 1978, and before January 1, 1982——

(i) any amount of compensation deferred under a plan of a State providing for a deferral of compensation (other than a plan described in section 457(e)(2) of the Internal Revenue Code of 1954), and any income attributable to the amounts so deferred, shall be includible in gross income only for the taxable year in which such compensation or other income is paid or otherwise made available to the participant or other beneficiary, but

(ii) the maximum amount of the compensation of any one individual which may be excluded from gross income by reason of clause (i) and by reason of section 457(a) of such Code for any such taxable year shall not exceed the lesser of—

(I) $7,500, or

(II) 33⅓ percent of the participant's includible compensation.

(B) APPLICATION OF CATCH-UP PROVISIONS IN CERTAIN CASES.—If, in the case of any participant for any taxable year, all of the plans are eligible State deferred compensation plans, then clause (ii) of subparagraph (A) of this paragraph shall be applied with the modification provided by paragraph (3) of section 457(b) of such Code.

(C) APPLICATION OF CERTAIN COORDINATION PROVISIONS.—In applying clause (ii) of subparagraph (A) of this paragraph and section 403(b)(2)(A)(ii) of such Code, rules similar to the rules of section 457(c)(2) of such Code shall apply.

(D) MEANING OF TERMS.—Except as otherwise provided in this paragraph, terms used in this paragraph shall have the same meaning as when used in section 457 of such Code.

Page 30, line 3, strike out "participants" and insert in lieu thereof "persons participating".

Page 30, line 5, strike out "individual" and insert in lieu thereof "person".

Page 30, line 6, strike out "participant" and insert in lieu thereof "such person".

Page 30, after line 13, insert the following:

SEC. 124. TAX TREATMENT OF CAFETERIA PLANS.

(a) IN GENERAL.—Part III of subchapter B of chapter 1 (relating to items specifically excluded from gross income) is amended by redesignating section 124 as section 125 and by inserting after section 123 the following new section:

"SEC. 124. CAFETERIA PLANS.

"(a) IN GENERAL.—Except as provided in subsection (b), no amount shall be included in the gross income of a participant in a cafeteria plan solely by reason of the fact that, under the plan, the participant may choose among the benefits of the plan.

"(b) EXCEPTION FOR HIGHLY COMPENSATED PARTICIPANTS WHERE PLAN IS DISCRIMINATORY.—

"(1) IN GENERAL.—In the case of a highly compensated participant, subsection (a) shall not apply to any benefit attributable to a plan year for which the plan discriminates in favor of—

"(A) highly compensated individuals as to eligibility to participate, or

"(B) highly compensated participants as to contributions or benefits.

"(2) YEAR OF INCLUSION.—For purposes of determining the taxable year of inclusion, any benefit described in paragraph (1) shall be treated as received or accrued in the participant's taxable year in which the plan year ends.

"(c) DISCRIMINATION AS TO BENEFITS OR CONTRIBUTIONS.—For purposes of subparagraph (B) of subsection (b)(1), a cafeteria plan does not discriminate where nontaxable benefits and total benefits (or employer contributions allocable to nontaxable benefits and employer contribution for total benefits do not discriminate in favor of highly compensated participants.

"(d) CAFETERIA PLAN DEFINED.—For purposes of this section—

"(1) IN GENERAL.—The term 'cafeteria plan' means a plan under which—

"(A) all participants are employees, and

"(B) the participants may choose among two or more benefits.

The benefits which may be chosen may be nontaxable benefits or cash, property, or other taxable benefits.

"(2) DEFERRED COMPENSATION PLANS EXCLUDED.—The term 'cafeteria plan' does not include any plan which provides for deferred compensation.

"(e) HIGHLY COMPENSATED PARTICIPANT AND INDIVIDUAL DEFINED.—For purposes of this section—

"(1) HIGHLY COMPENSATED PARTICIPANT.—The term 'highly compensated participant' means a participant who is—

"(A) an officer,

"(B) a shareholder,

"(C) highly compensated, or

"(D) a spouse or dependent (within the meaning of section 152) of an individual described in subparagraph (A), (B), or (C).

"(2) HIGHLY COMPENSATED INDIVIDUAL.—The term 'highly compensated individual' means an individual who is described in subparagraph (A), (B), (C), or (D) of paragraph (1).

"(f) NONTAXABLE BENEFIT DEFINED.—For purposes of this section, the term 'nontaxable benefit' means any benefit which, with the application of subsection (a), is not includible in the gross income of the employee.

"(g) SPECIAL RULES.—

"(1) COLLECTIVELY BARGAINED PLAN NOT CONSIDERED DISCRIMINATORY.—For purposes of this section, a plan shall not be treated as discriminatory if the plan is maintained under an agreement which the Secretary finds to be a collective bargaining agreement between employee representatives and one or more employers.

"(2) HEALTH BENEFITS.—For purposes of subparagraph (B) of subsection (b)(1), a cafeteria plan which provides health benefits shall not be treated as discriminatory if—

"(A) contributions on behalf of each participant include an amount which—

"(i) equals 100 percent of the cost of the health benefit coverage under the plan of the majority of the highly compensated participants similarly situated, or

"(ii) equals or exceeds 75 percent of the cost of the health benefit coverage of the participant (similarly situated) having the highest health benefit coverage under the plan, and

"(B) contributions or benefits in excess of those described in subparagraph (A) bear a uniform relationship to compensation.

"(3) CERTAIN PARTICIPATION ELIGIBILITY RULES NOT TREATED AS DISCRIMINATORY.—For purposes of subparagraph (A) of subsection (b)(1), a classification shall not be treated as discriminatory if the plan—

"(A) benefits a group of employees described in subparagraph (B) of section 410(b)(1), and

"(B) meets the requirements of clauses (i) and (ii):

"(i) No employee is required to complete more than 3 years of employment with the employer or employers maintaining the plan as a condition of participation in the plan, and the service requirement for each employee is the same.

"(ii) Any employee who has satisfied the employment requirement of clause (i) and who is otherwise entitled to participate in the plan commences participation no later than the first day of the first plan year beginning after the date the service requirement was satisfied unless the employee was separated from service before the first day of that plan year.

"(4) CERTAIN CONTROLLED GROUPS.—All employees who are treated as employed by a single employer under subsection (b) or (c) of section 414 shall be treated as employed by a single employer for purposes of this section.

"(h) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary to carry out the provisions of this section."

(b) CLERICAL AMENDMENT.—The table of sections for part III of subchapter B of chapter 1 is amended by striking out the item relating to section 124 and inserting in lieu thereof the following:

"Sec. 124. Cafeteria plans.

"Sec. 125 Cross references to other Acts."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1978.

Page 30, after line 13, insert the following:

SEC. 125. ADMINISTRATION OF 1954 CODE IN THE CASE OF CERTAIN CASH OR DEFERRED ARRANGEMENTS.

(a) GENERAL RULE.—In the case of any qualified cash or deferred arrangement under a profit-sharing plan, the Internal Revenue Code of 1954 shall be administered in a manner consistent with—

(1) Revenue Ruling 56-497 (1956-2 C.B. 284),

(2) Revenue Ruling 63-180 (1963-2 C.B. 189), and

(3) Revenue Ruling 68-89 (1968-1 C.B. 402).

(b) QUALIFIED CASH OR DEFERRED ARRANGEMENT DEFINED.—For purposes of this section.—

(1) IN GENERAL.—The term 'qualified cash or deferred arrangement' means any arrangement under which a contribution is made by an employer to a trust on behalf of an employee only if the employee elects not to receive such contribution from the employer in cash.

(2) EXCEPTION.—The term 'qualified cash or deferred arrangement' does not include an arrangement under which the contribution by the employer to the trust is made in return for a reduction in the basic or regular compensation of the employee or in lieu of an increase in such compensation.

(c) PROFIT-SHARING PLAN DEFINED.—For purposes of this section, the term 'profit-sharing plan' includes a stock bonus plan.

(d) EFFECTIVE DATE.—This section shall apply to taxable years beginning after December 31, 1977.

Page 60, after line 5, insert the following:

SEC. 314. INVESTMENT CREDIT ALLOWED FOR CERTAIN REHABILITATED BUILDINGS

(a) IN GENERAL.—Paragraph (1) of section 48(a) (defining section 38 property) is amended by striking out the period at the end of subparagraph (C) and by inserting in lieu thereof "; or" and the following new subparagraph:

"(D) in the case of a qualified rehabilitated building, that portion of the basis which is attributable to qualified rehabilitation expenditures (within the meaning of subsection (g))."

(b) QUALIFIED REHABILITATED BUILDINGS DEFINED.—Section 48 is amended by inserting after subsection (f) the following new subsection:

"(g) SPECIAL RULES FOR QUALIFIED REHABILITATED BUILDINGS.—For purposes of this subpart—

"(1) QUALIFIED REHABILITATED BUILDING DEFINED.—

"(A) IN GENERAL.—The term 'qualified rehabilitated building' means any building (and its structural components)—

"(i) which has been rehabilitated,

"(ii) which was placed in service before the beginning of the rehabilitation, and

"(iii) 75 percent or more of the existing external walls of which are retained in place as external walls in the rehabilitation process.

"(B) 5 YEARS MUST HAVE ELAPSED SINCE CONSTRUCTION OR PRIOR REHABILITATION.—A building shall not be a qualified rehabilitated building unless there is a period of at least 5 years between—

"(i) the date the physical work on this rehabilitation of the building began, and

"(ii) the later of—

"(I) the date such building was first placed in service, or

"(II) the date such building was placed in service in connection with a prior rehabilitation with respect to which a credit was allowed by reason of subsection (a)(1)(D).

"(C) MAJOR PORTION TREATED AS SEPARATE BUILDING IN CERTAIN CASES.—Where there is a separate rehabilitation of a major portion of a building, such major portion shall be treated as a separate building.

"(D) REHABILITATION INCLUDES RECONstruction.

"(2) QUALIFIED REHABILITATION EXPENDITURE DEFINED.—

"(A) IN GENERAL.—The term 'qualified rehabilitation expenditure' means any amount properly chargeable to capital account which is incurred after July 26, 1978—

"(i) for property (or additions or improvements to property) with a useful life of 5 years or more, and

"(ii) in connection with the rehabilitation of a qualified rehabilitated building.

"(B) CERTAIN EXPENDITURES NOT INCLUDED.—The term 'qualified rehabilitation expenditure' does not include—

"(i) PROPERTY OTHERWISE SECTION 38 PROPERTY.—Any expenditure for property which constitutes section 38 property (determined without regard to subsection (a)(1)(D)).

"(ii) COST OF ACQUISITION.—The cost of acquiring any building or any interest therein.

"(iii) ENLARGEMENTS.—Any expenditure attributable to the enlargement of the existing building.

"(3) PROPERTY TREATED AS NEW SECTION 38 PROPERTY.—Property which is treated as section 38 property by reason of subsection (a)(1)(D) shall be treated as new section 38 property."

(c) TECHNICAL AMENDMENT.—Paragraph (8) of section 48(a) (relating to amortized property) is amended by striking out "or 188" and inserting in lieu thereof "188, or 191".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after July 26, 1978; except that the amendment made by section (c) shall only apply with respect to property placed in service after such date.

Page 60, line 6, strike out "314" and insert in lieu thereof "315".

Page 60, strike out line 9 and all that follows down through line 8 on page 65 and insert in lieu thereof the following:

"SEC. 51. AMOUNT OF CREDIT.

"(a) DETERMINATION OF AMOUNT.—The amount of the credit allowable by section 44B for the taxable year shall be the sum of—

"(1) 50 percent of the qualified first-year wages for such year, and

"(2) 16⅔ percent of the qualified second-year wages for such year.

"(b) QUALIFIED WAGES DEFINED.—For purposes of this subpart—

"(1) IN GENERAL.—The term 'qualified wages' means the wages paid or incurred by the employer during the taxable year to individuals who are members of a targeted group.

"(2) QUALIFIED FIRST-YEAR WAGES.—The term 'qualified first-year wages' means, with respect to any individual, qualified wages attributable to service rendered during the 1-year period beginning with the day the individual begins work for the employer (or, in the case of a vocational rehabilitation referral, the day the individual begins work for the employer on or after the beginning of such individual's rehabilitation plan).

"(3) QUALIFIED SECOND-YEAR WAGES.—The term 'qualified second-year wages' means, with respect to any individual, the qualified wages attributable to service rendered during the 1-year period beginning on the day after the last day of the 1-year period with respect to such individual determined under paragraph (2).

"(4) ONLY FIRST $6,000 OF WAGES PER YEAR TAKEN INTO ACCOUNT.—The amount of the qualified first-year wages, and the amount of the qualified second-year wages, which may be taken into account with respect to any individual shall not exceed $6,000 per year.

"(5) WAGES DEFINED.—Except as provided in subsection (g)(2), the term 'wages' has the meaning given to such term by subsection (b) of section 3306 (determined without regard to any dollar limitation contained in such section).

"(c) MEMBERS OF TARGETED GROUPS.—For purposes of this subpart—

"(1) IN GENERAL.—An individual is a member of a targeted group if such individual is—

"(A) a WIN registrant,

"(B) a vocational rehabilitation referral,

"(C) a food stamp youth,

"(D) a Vietnam veteran who is a member of a household receiving food stamps,

"(E) an SSI recipient,

"(F) a general assistance recipient, or

"(G) a youth participating in a qualified cooperative education program.

"(2) WIN REGISTRANT.—The term 'WIN registrant' means any individual who is certified by the Secretary of Labor as having been placed in employment under a work incentive program established under section 432(b)(1) of the Social Security Act.

"(3) VOCATIONAL REHABILITATION REFERRAL.—The term 'vocational rehabilitation referral' means any individual who is certified by the Secretary of Labor or by the appropriate vocational rehabilitation agency as—

"(A) having a physical or mental disability which, for such individual, constitutes or results in a substantial handicap to employment, and

"(B) having been referred to the employer upon completion of (or while receiving) rehabilitative services pursuant to—

"(i) an individualized written rehabilitation plan under a State plan for vocational rehabilitation services approved under the Rehabilitation Act of 1973, or

"(ii) a program of vocational rehabilitation carried out under chapter 31 of title 38, United States Code.

"(4) FOOD STAMP YOUTH.—

"(A) IN GENERAL —The term 'food stamp youth' means any individual who is certified by the Secretary of Labor as meeting—

"(i) the age requirements of subparagraph (B), and

"(ii) the food stamp requirements of paragraph (9).

"(B) AGE REQUIREMENTS.—An individual meets the age requirements of this subpara-

graph if such individual has attained age 18 but not age 25 on the hiring date. For purposes of the preceding sentence, an individual who, on the hiring date, has attained age 16 and has graduated from high school or a vocational school shall be treated as having attained age 18.

"(5) VIETNAM VETERAN WHO IS A MEMBER OF HOUSEHOLD RECEIVING FOOD STAMPS.—The term 'Vietnam veteran who is a member of a household receiving food stamps' means any individual who is certified by the Secretary of Labor as—

"(A)(i) having served on active duty (other than active duty for training) in the Armed Forces of the United States for a period of more than 180 days, any part of which occurred after August 4, 1964, and before May 8, 1975, or

"(ii) having been discharged or released from active duty in the Armed Forces of the United States for a service-connected disability if any part of such active duty was performed after August 4, 1964, and before May 8, 1975,

"(B) not having any day during the pre-employment period which was a day of extended active duty in the Armed Forces of the United States, and

"(C) meeting the food stamp requirements of paragraph (9).

For purposes of subparagraph (B), the term 'extended active duty' means a period of more than 90 days during which the individual was on active duty (other than active duty for training).

"(6) SSI RECIPIENTS.—The term 'SSI recipient' means any individual who is certified by the Secretary of Labor as receiving supplemental security income benefits under title XVI of the Social Security Act (including supplemental security income benefits of the type described in section 1616 of such Act or section 212 of Public Law 93-66) for any month ending in the pre-employment period.

"(7) GENERAL ASSISTANCE RECIPIENTS.—

"(A) IN GENERAL.—The term 'general assistance means any individual who is certified by the Secretary of Labor as receiving assistance under a qualified general assistance program for any period of not less than 30 days ending within the pre-employment period.

"(B) QUALIFIED GENERAL ASSISTANCE PROGRAM.—The term 'qualified general assistance program' means any program of a State or a political subdivision of a State—

"(i) which provides general assistance or similar assistance which—

"(I) is based on need, and

"(II) consists of money payments, and

"(ii) which is designated by the Secretary (after consultation with the Secretary of Health, Education, and Welfare) as meeting the requirements of clause (i).

"(8) YOUTH PARTICIPATING IN A QUALIFIED COOPERATIVE EDUCATION PROGRAM.—

"(A) IN GENERAL.—The term 'youth participating in a qualified cooperative education program' means any individual who is certified by the school participating in the program as—

"(i) having attained age 16 and not having attained age 19,

"(ii) not having graduated from a high school or vocational school, and

"(iii) being enrolled in and actively pursuing a qualified cooperative education program.

"(B) QUALIFIED COOPERATIVE EDUCATION PROGRAM DEFINED.—The term 'qualified cooperative education program' means a program of vocational education for individuals who (through written cooperative arrangements between a qualified school and 1 or more employers) receive instruction (including required academic instruction) by alteration of study and school with a job in any occupational field (but if these 2 experiences are planned by the school and employer so that each contributes to the student's education and employability).

"(C) QUALIFIED SCHOOL DEFINED.—The term 'qualified school' means—

"(i) a specialized high school used exclusively or principally for the provision of vocational education to individuals who are available for study in preparation for entering the labor market,

"(ii) the department of a high school exclusively or principally used for providing vocational education to persons who are available for study in preparation for entering the labor market, or

"(iii) a technical or vocational school used exclusively or principally for the provision of vocational education to persons who have completed or left high school and who are available for study in preparation for entering the labor market,

A school which is not a public school shall be treated as a qualified school only if it is exempt from tax under section 501(a).

"(D) INDIVIDUAL MUST BE CURRENTLY PURSUING PROGRAM.—Wages shall be taken into account with respect to a qualified cooperative education program only if the wages are attributable to services performed while the individual meets the requirements of subparagraph (A).

"(9) FOOD STAMP REQUIREMENTS.—An individual meets the food stamp requirements of this paragraph if the appropriate food stamp agency determines that, during the pre-employment period, such individual was a member of a household which, at any time during such period, was receiving food stamps under the Food Stamp Act of 1977.

"(10) PRE-EMPLOYMENT PERIOD.—The term 'pre-employment period' means the 60-day period ending on the hiring date.

"(11) HIRING DATE.—The term 'hiring date' means the day the individual is hired by the employer.

"(d) QUALIFIED FIRST-YEAR WAGES CANNOT EXCEED 30 PERCENT OF FUTA WAGES FOR ALL EMPLOYEES.—The amount of the qualified first-year wages which may be taken into account under subsection (a)(1) for any taxable year shall not exceed 30 percent of the aggregate unemployment insurance wages paid by the employer during the calendar year ending in such taxable year. For purposes of the preceding sentence, the term 'unemployment insurance wages' has the meaning given to the term 'wages' by section 3306(b).

"(e) REMUNERATION MUST BE FOR TRADE OR BUSINESS EMPLOYMENT.—

"(1) IN GENERAL.—For purposes of this subpart, remuneration paid by an employer to an employee during any year shall be taken into account only if more than one-half of the remuneration so paid is for services performed in a trade or business of the employer.

"(2) SPECIAL RULE FOR CERTAIN DETERMINATION.—Any determination as to whether paragraph (1), or subparagraph (A) or (B) of subsection (g)(1), applies with respect to any employee for any year shall be made without regard to subsections (a) and (b) of section 52.

"(3) YEAR DEFINED.—For purposes of this subsection and subsection (g), the terms 'year' means the taxable year; except that, for purposes of applying so much of such subsections as relates to subsection (d), such term means the calendar year.

"(f) SECRETARY OF LABOR TO NOTIFY EMPLOYERS OF AVAILABILITY OF CREDIT.—The Secretary of Labor, in consultation with the Internal Revenue Service, shall take such steps as may be necessary or appropriate to keep employers apprised of the availability of the credit provided by section 44B.

"(g) SPECIAL RULES FOR AGRICULTURAL LABOR AND RAILWAY LABOR.—For purposes of this subpart—

"(1) UNEMPLOYMENT INSURANCE WAGES.—

"(A) AGRICULTURAL LABOR.—If the services performed by any employee for an employer during more than one-half of any pay period (within the meaning of section 3306(d)) taken into account with respect to any year constitute agricultural labor (within the meaning of section 3306(k)), the term 'unemployment insurance wages' means, with respect to the remuneration paid by the employer to such employee for such year, an amount equal to so much of such remuneration as constitutes 'wages' within the meaning of section 3121(a), except that the contribution and benefit base for each calendar year shall be deemed to be $6,000.

"(B) RAILWAY LABOR.—If more than one-half of remuneration paid by an employer to an employee during any year is remuneration for service described in section 3306(c)(9), the term 'unemployment insurance wages' means, with respect to such employee for such year, an amount equal to so much of the remuneration paid to such employee during such year which would be subject to contributions under section 8(a) of the Railroad Unemployment Insurance Act (45 U.S.C. 358(a)) if the maximum amount subject to such contributions were $500 per month.

"(2) WAGES.—In any case to which subparagraph (A) or (B) of paragraph (1) applies, the term 'wages' means unemployment insurance wages (determined without regard to any dollar limitation)."

Page 65, strike out lines 22 through 26, and insert in lieu thereof the following:

(i) by striking out subsections (c), (e), (i) and (j), and

(ii) by redesignating subsections (d), (f), (g), and (h) as subsections (c), (d), (e), and (f), respectively.

Page 66, strike out lines 3 and 4, and insert in lieu thereof the following:

tribution to the increase in unemployment insurance wages" and inserting in lieu thereof "proportionate share of the wages".

Page 66, strike out lines 12 through 19.

Page 66, strike out line 24 and all that follows through line 2 on page 67, and insert in lieu thereof the following:

(d) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as otherwise provided in this subsection, the amendments made by this section shall apply to amounts paid or incurred after December 31, 1978, in taxable years ending after such date.

(2) SPECIAL RULES FOR NEWLY TARGETED GROUPS.—

(A) INDIVIDUAL MUST BE HIRED AFTER JULY 26, 1978.—In the case of a member of a newly targeted group—

(i) such individual shall be taken into account for purposes of the credit allowable by section 44B of the Internal Revenue Code of 1954 only if such individual is first hired by the employer after July 26, 1978, and

(ii) such individual shall be treated for purposes of such credit as having first begun work for the employer not earlier than January 1, 1979.

(B) MEMBER OF NEWLY TARGETED GROUP DEFINED.—For purposes of subparagraph (A), an individual is a member of a newly targeted group if—

(i) such individual meets the requirements of subparagraph (C), (D), (E), (F), or (G) of section 51(c)(1) of such Code, and

(ii) such individual does not meet the requirements of subparagraph (A) or (B) of such section 51(c)(1).

(3) TRANSITIONAL RULE.—In the case of a taxable year which begins in 1978 and ends after December 31, 1978, the amount of the credit allowable by section 44B of the Internal Revenue Code of 1954 (determined without regard to section 53 of such Code) shall be the sum of—

(A) the amount of the credit which would

be so allowable without regard to the amendments made by this section, plus

(B) the amount which would be so allowable by reason of the amendments made by this section.

(4) SUBSECTION (c)(2). The amendments made by subsection (c)(2) shall apply to taxable years beginning after December 31, 1978.

Page 67, insert after line 2 the following:

(e) REPORT ON EFFECTIVENESS OF JOBS CREDIT.—

(1) REPORT ON TARGETED JOBS CREDIT.—Not later than June 30, 1981, the Secretary of the Treasury and the Secretary of Labor shall jointly submit to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate a report on—

(A) the effectiveness of the targeted jobs credit provided by the amendments made by this section in improving the employment situation of the targeted groups, and

(B) the types of employers claiming such credit.

(2) GENERAL JOBS CREDIT.—The report required under paragraph (1) shall also include an evaluation of—

(A) the effectiveness of the general jobs credit provided by section 44B of the Internal Revenue Code of 1954 for 1977 and 1978 in stimulating employment and enhancing economic growth, and

(B) the types of employers claiming such credit.

Page 67, strike out lines 3 through 5, and insert in lieu thereof the following:

Subtitle C—Miscellaneous Provisions

SEC. 321. INCREASE IN LIMIT ON SMALL ISSUES OF IDB'S TO $10,000,000.

Page 67, after line 12 insert the following:

SEC. 322. THREE-YEAR EXTENSION OF PROVISION FOR 60-MONTH DEPRECIATION OF EXPENDITURES TO REHABILITATE LOW-INCOME RENTAL HOUSING.

Subsection (k) of section 167 (relating to depreciation of expenditures to rehabilitate low-income rental housing) is amended by striking out "January 1, 1979" each place it appears and inserting in lieu thereof "January 1, 1982".

Page 79, line 8, after "crops" insert "for any taxable year beginning after December 31, 1977".

Page 85, after line 5, insert the following:

SEC. 403. SEPARATE MINIMUM TAX ON CAPITAL GAINS.

(a) IN GENERAL.—Subchapter A of chapter 1 (relating to determination of tax liability) is amended by adding at the end thereof the following new part:

"PART VII—SEPARATE MINIMUM TAX ON CAPITAL GAINS

"SEC. 59. IMPOSITION OF TAX.

"(a) GENERAL RULE.—In the case of a taxpayer other than a corporation, if—

"(1) 10 percent of an amount equal to (A) ½ of the net capital gain for the taxable year, reduced by (B) $10,000, exceeds

"(2) the regular tax for the taxable year,

then there is hereby imposed (in addition to all other taxes imposed by this title) a tax equal to the amount of such excess.

"(b) MARRIED INDIVIDUAL FILING SEPARATE RETURNS.—In the case of a married individual who files a separate return for the taxable year, paragraph (1)(B) of subsection (a) shall be applied by substituting '$5,000' for '$10,000'.

"(c) GAIN FROM SALE OF PRINCIPAL RESIDENCE NOT TAKEN INTO ACCOUNT.—In determining net capital gain for purposes of subsection (a)(1)(A), there shall not be taken into account gain on the sale or exchange of any principal residence which satisfies the holding and use requirements of section 121(a) (relating to one-time exclusion of gain from sale of principal residence).

"(d) REGULAR TAX DEFINED.—For purposes of this section, the term 'regular tax' means the taxes imposed by this chapter for the taxable year (computed without regard to this part and part VI and without regard to the taxes imposed by sections 72(m)(5)(B), 402(e), and 408(f)) reduced by the sum of the credits allowable under subpart A of part IV of this subchapter (other than under sections 31, 39, and 43).

"(e) CREDITS NOT ALLOWABLE.—For purposes of determining the amount of any credit allowable under subpart A of part IV of this subchapter, the tax imposed by this section shall not be treated as a tax imposed by this chapter."

(b) TECHNICAL AMENDMENTS.—

(1) Subsection (a) of section 5 (relating to cross references relating to tax on individuals) is amended by adding at the end thereof the following new paragraph:

"(6) For separate minimum tax on capital gains, see section 59."

(2) Subsection (c) of section 56 (defining regular tax deduction) is amended by striking out "without regard to this part" and inserting in lieu thereof "without regard to this part and part VII".

(3) Subsection (d) of section 443 (relating to adjustment in exclusion for computing minimum tax for tax preferences) is amended to read as follows:

"(d) ADJUSTMENT IN EXCLUSION FOR COMPUTING MINIMUM TAXES.—If a return is made for a short period by reason of subsection (a), then—

"(1) the $10,000 amount specified in section 56, modified as provided by section 58, and

"(2) the $10,000 amount specified in section 59(a), modified as provided by section 59(b),

shall be reduced to the amount which bears the same ratio to such specified amount as the number of days in the short period bears to 365."

(4) Subsection (d) of section 511 (relating to tax preferences) is amended by adding at the end thereof the following new sentence: "The tax imposed by section 59 shall apply to an organization subject to tax under subsection (b) with respect to items which enter into the computation of unrelated business taxable income."

(5) Subsection (a) of section 901 (relating to allowance of foreign tax credit) is amended by inserting "or by section 59 (relating to separate minimum tax on capital gains)" after "for tax preferences)".

(6) Paragraph (1) of section 6014(c) (defining estimated tax) is amended by striking out "section 56" and inserting in lieu thereof "section 56 or 59".

(7) Subparagraph (A) of section 6362(b)(2) (relating to permitted adjustments) is amended by inserting "or a tax on the amount taxed under section 59 (relating to separate minimum tax on capital gains)" after "tax preferences)".

(8) Paragraph (1) of section 6654(f) (relating to tax computed after applications of credit against tax) is amended by striking out "section 56" and inserting in lieu thereof "section 56 or 59".

(c) CLERICAL AMENDMENT.—The table of parts for subchapter A of chapter 1 is amended by adding at the end thereof the following new item:

"Part VII. Separate minimum tax on capital gains."

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1978.

Page 85, after line 5, insert the following:

SEC. 405. ONE-TIME EXCLUSION OF GAIN FROM SALE OF PRINCIPAL RESIDENCE.

(a) GENERAL RULE.—The section heading and subsections (a) and (b) of section 121 (relating to gain from sale or exchange of residence of individual who has attained age 65) are amended to read as follows:

"SEC. 121. ONE-TIME EXCLUSION OF GAIN FROM SALE OF PRINCIPAL RESIDENCE.

"(a) GENERAL RULE.—At the election of the taxpayer, gross income does not include gain from the sale or exchange of property if, during the 3-year period ending on the date of such sale or exchange, such property has been owned and used by the taxpayer as his principal residence for periods aggregating 2 years or more.

"(b) LIMITATIONS.—

"(1) DOLLAR LIMITATION.—The amount of the gain excluded from gross income under subsection (a) shall not exceed $100,000 ($50,000 in the case of a separate return by a married individual).

"(2) APPLICATION TO ONLY 1 SALE OR EXCHANGE.—Subsection (a) shall not apply to any sale or exchange by the taxpayer if an election by the taxpayer or his spouse under subsection (a) with respect to any other sale or exchange is in effect.

"(3) ADDITIONAL ELECTION IF PRIOR SALE WAS MADE ON OR BEFORE JULY 26, 1978.—In the case of any sale or exchange after July 26, 1978, this section shall be applied by not taking into account any election made with respect to a sale or exchange on or before such date."

(b) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) Paragraph (1) of section 121(d) is amended by striking out "age, holding, and use" each place it appears and inserting in lieu thereof "holding and use".

(2) Paragraph (2) of section 121(d) is amended—

(A) by striking out "8-year period" and inserting in lieu thereof "3-year period", and

(B) by striking out "subsection (a)(2)" each place it appears and inserting in lieu thereof "subsection (a)".

(3) Paragraph (3) of section 121(d) is amended by striking out "subsection (a)(2)" each place it appears and inserting in lieu thereof "subsection (a)".

(4) Paragraph (5) of section 121(d) is amended—

(A) by striking out "8-year period" and inserting in lieu thereof "3-year period", and

(B) by striking out "5 years" and inserting in lieu thereof "2 years".

(5) Paragraph (7) of section 121(d) is amended to read as follows:

"(7) SECTIONS 1033 AND 1034 NOT TO APPLY TO SALES TO WHICH THIS SECTION APPLIES.—Sections 1033 (relating to involuntary conversions) and 1034 (relating to rollover of gain on sale of principal residence) shall not apply to any sale or exchange of a residence with respect to which an election under this section applies."

(6) The table of sections for part III of subchapter B of chapter 1 is amended by striking out the item relating to section 121 and inserting in lieu thereof the following:

"SEC. 121. ONE-TIME EXCLUSION OF GAIN FROM SALE OF PRINCIPAL RESIDENCE.

(7) Paragraph (3) of section 1033(g) (relating to cross references) is amended to read as follows:

"(3) For one-time exclusion from gross income of gain from involuntary conversion of principal residence, see section 121."

(8) Subsection (k) of section 1034 (relating to cross references) is amended to read as follows:

"(k) CROSS REFERENCE.—

"For one-time exclusion from gross income of gain from sale of principal residence, see section 121."

(9) Section 1038(e)(1)(A) is amended by striking out "relating to gain from sale or exchange of residence of an individual who has attained age 65" and inserting in lieu thereof "relating to one-time exclusion of gain from sale of principal residence".

(10) Section 1250(d)(7)(B) is amended by striking out "relating to gains from sale or exchange of residence of individual who has attained the age of 65" and inserting in lieu thereof "relating to one-time exclusion of gain from sale of principal residence".

(11) Section 6012(c) is amended by striking out "relating to sale of residence by individual who has attained age 65" and inserting in lieu thereof "relating to one-time exclusion of gain from sale of principal residence".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to sales or exchanges after July 26, 1978, in taxable years ending after such date.

Page 85, after line 5, insert the following:

SEC. 406. WAIVER OF CERTAIN 18-MONTH RULES OF SECTION 1034 WHEN SALE OF RESIDENCE IS CONNECTED WITH COMMENCING WORK AT NEW PLACE.

(a) IN GENERAL.—Subsection (d) of section 1034 (relating to sale or exchange of residence) is amendable to read as follows:

"(d) LIMITATION.—

"(1) IN GENERAL.—Subsection (a) shall not apply with respect to the sale of the taxpayer's residence if within 18 months before the date of such sale the taxpayer sold at a gain other property used by him as his principal residence, and any part of such gain was not recognized by reason of subsection (a).

"(2) SUBSEQUENT SALE CONNECTED WITH COMMENCING WORK AT NEW PLACE.—Paragraph (1) shall not apply with respect to the sale of the taxpayer's residence if—

"(A) such sale was in connection with the commencement of work by the taxpayer as an employee or as a self-employed individual at a new principal place of work, and

"(B) if the residence so sold is treated as the former residence for purposes of section 217 (relating to moving expenses), the taxpayer would satisfy the conditions of subsection (c) of section 217 (as modified by the other subsections of such section)."

(b) RELATED TECHNICAL AMENDMENT.—Paragraph (4) of section 1034(c) is amended by adding at the end thereof the following new sentence: "If a principal residence is sold in a sale to which subsection (d)(2) applies within 18 months after the sale of the old residence, for purposes of applying the preceding sentence with respect to the old residence, the principal residence so sold shall be treated as the last residence used during such 18-month period."

(c) CLERICAL AMENDMENTS.—

(1) The section heading of section 1034 is amended to read as follows:

"SEC. 1034. ROLLOVER OF GAIN ON SALE OF PRINCIPLE RESIDENCE."

(2) The table of sections for part III of subchapter O of chapter 1 is amended by striking out the item relating to section 1034 and inserting in lieu thereof the following new item:

"Sec. 1034. Rollover of gain on sale of principal residence."

(3) Subparagraph (B) of section 1038(e)(1) (relating to certain acquisitions of real property) is amended by striking out "(relating to sale or exchange of residence)" and inserting in lieu thereof "(relating to rollover of gain on sale of principal residence)".

(4) Subparagraph (A) of section 1250(d)(7) (relating to gain from disposition of certain depreciable realty) is amended by striking out "relating to sale or exchange of residence" and inserting in lieu thereof "relating to rollover of gain on sale of principal residence".

(5) Subparagraph (C) of section 6212(c)(2) (relating to cross references) is amended by striking out "personal residence" and inserting in lieu thereof "principal residence".

(6) Paragraph (4) of section 6504 (relating to cross reference) is amended by striking out "residence" and inserting in lieu thereof "principal residence".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to sales and exchanges of residences after July 26, 1978, in taxable years ending after such date.

Page 85, after line 5, insert the following:

SEC. 407. STUDY OF EFFECTS OF CHANGES IN THE TAX TREATMENT OF CAPITAL GAINS ON STIMULATING INVESTMENT AND ECONOMIC GROWTH.

Not later than September 30, 1981, the Secretary of the Treasury shall submit to the Committee on Ways and Means of the House of Representatives and to the Committee on Finance of the Senate a report on the effectiveness of the changes made by this title in the tax treatment of capital gains of individuals and corporations in stimulating investment and increasing the rate of economic growth. The report shall also include an analysis of the effects these changes had on employment growth and on income tax revenues.

Mr. ULLMAN. Mr. Chairman, let me just quickly run through by title these different amendments so that the Members will know what we are dealing with. First, these amendments are noncontroversial. They are amendments that have widespread support and, therefore, I think this procedure is perfectly proper.

The first amendment deals with some modification of the earned income credit, which is an improvement.

The second has to do with deferred compensation.

The third are strictly technical amendments.

The fourth is the investors' tax credit for rehabilitation expenses, which is widely supported.

The fifth has to do with the targeted jobs credit, which makes some modification in the proposal.

The sixth is a 5-year amortization for low-income housing.

The seventh is the alternative minimum tax on capital gains.

The eighth is the extension of exemption from personal tax for personal residences, that has wide support.

The ninth has to do with rollovers on the sale of a residence.

The 10th includes a couple of studies in the tax area.

The CHAIRMAN. The question is on the committee amendments.

The question was taken and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. STEIGER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 409, noes 1, answered "present" 1, not voting 21 as follows:

Le Fante	Rodino	Wilson, C. H.

Mr. HARKIN changed his vote from "no" to "aye."

So the committee amendments were agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. The Clerk will report the committee amendment adding a new section 404.

The Clerk read as follows:

Committe amendment: On page 85, after line 5, insert the following:

SEC. 404. INDEXING OF CERTAIN ASSETS FOR PURPOSES OF DETERMINING GAIN OR LOSS.

(a) IN GENERAL.—Part II of subchapter O of chapter 1 (relating to basis rules of general application) is amended by redesignating section 1024 as section 1025 and by inserting after section 1023 the following new section:

"SEC. 1024. INDEXING OF CERTAIN ASSETS FOR PURPOSES OF DETERMINING GAIN OR LOSS.

"(a) GENERAL RULE.—If an indexed asset is sold or exchanged in a taxable transaction, for purposes of determining gain or loss on the transaction (but for no other purpose) the indexed basis of the asset shall be substituted for its adjusted basis.

"(b) INDEXED ASSET.—

"(1) IN GENERAL.—For purposes of this section, the term 'indexed asset' means—

"(A) stock which is common stock or possesses most of the attributes of common stock,

"(B) tangible personal property, and

"(C) real property,

which has been held for more than 1 year and which is a capital asset or property used in the trade or business (as defined in section 1231(b)).

"(2) CERTAIN PROPERTY EXCLUDED.—

"(A) IN GENERAL.—The term 'indexed asset' does not include stock in—

"(i) an electing small business corporation (within the meaning of section 1371(b)),

"(ii) a regulated investment company (within the meaning of section 851(a)),

"(iii) a real estate investment trust (within the meaning of section 856(a)),

"(iv) a foreign corporation, and

"(v) a personal holding company (as defined in section 542).

"(B) COLLAPSIBLE CORPORATION.—In the case of a sale, exchange, or distribution to which section 341(a) (relating to collapsible corporations) applies such transaction shall not be treated as a sale or exchange of an indexed asset to which subsection (a) applies.

"(c) INDEXED BASIS.—For purposes of this section—

"(1) INDEXED BASIS.—The indexed basis for any asset is—

"(A) the adjusted basis of the asset, multiplied by

"(B) the applicable inflation ratio.

"(2) APPLICABLE INFLATION RATIO.—The applicable inflation ratio for any asset is the percentage arrived at by dividing—

"(A) the CPI for the calendar month in which the sale or exchange takes place, by

"(B) the CPI for the calendar month in which the holding period of the asset began (or, if later, December 1979).

The applicable inflation ratio shall not be taken into account unless it is greater than 1. The applicable inflation ratio for any asset shall be rounded to the nearest 1/10 of 1 percent.

"(3) CPI FOR CALENDAR MONTH.—The CPI for any calendar month is the Consumer Price Index for All Urban Consumers for such month.

"(d) TAXABLE TRANSACTION.—For purposes of this section the term 'taxable transaction' means a sale or exchange in which gain or loss is recognized in whole or in part to the person disposing of the asset.

"(e) SPECIAL RULES.—For purposes of this section—

"(1) TREATMENT AS SEPARATE ASSET.—In the case of any asset, the following shall be treated as a separate asset:

"(A) a substantial improvement to property,

"(B) in the case of a corporation, a substantial contribution to capital or a substantial reduction in capital,

"(C) in the case of a transaction in which gain or loss is recognized only in part, that portion of the asset to which the recognized gain or loss is properly attributable, and

"(D) any other portion of an asset to the extent that separate treatment of such portion is appropriate to carry out the purposes of this section.

"(2) ASSETS WHICH ARE NOT INDEXED ASSETS THROUGHOUT HOLDING PERIOD.—

"(A) IN GENERAL.—The applicable inflation ratio shall be appropriately reduced for calendar months at any time during which the asset (or the predecessor asset) was not an indexed asset.

"(B) CERTAIN SHORT SALES.—For purposes of applying subparagraph (A), an asset shall be treated as not an indexed asset for any short sale period during which the taxpayer or the taxpayer's spouse sells short property substantially identical to the asset. For purposes of the preceding sentence, the short sale period begins on the day after the substantially identical property is sold and ends on the closing date for the sale.

"(3) SECTION CANNOT INCREASE ORDINARY LOSS UNDER SECTION 1231.—To the extent that (but for this paragraph) this section would create or increase the net ordinary loss to which the second sentence of section 1231(a) applies, such second sentence shall not apply. The taxpayer shall be treated as having a long-term capital loss in an amount equal to the amount of the net ordinary loss to which the preceding sentence applies.

"(f) SALES BETWEEN RELATED PERSONS.—

"(1) IN GENERAL.—This section shall not apply to any sale or exchange between related persons.

"(2) RELATED PERSONS DEFINED.—For purposes of this section, the term 'related persons' means—

"(A) persons bearing a relationship set forth in section 267(b), and

"(B) persons treated as single employer under subsection (b) or (c) of section 414.

"(g) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary or appropriate to carry out the purposes of this section."

(b) CLERICAL AMENDMENT.—The table of sections for part II of subchapter O of chapter 1 is amended by striking out the item relating to section 1024 and inserting in lieu thereof the following:

"Sec. 1024. Indexing of certain assets for poses of determining gain or loss.

"Sec. 1025. Cross references."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to dispositions after December 31, 1979, in taxable years ending after such date.

Mr. ARCHER (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The Chair would inquire of the gentleman from Oregon whom he designates to speak in opposition.

Mr. ULLMAN. Mr. Chairman, I designate the gentleman from Illinois (Mr. ROSTENKOWSKI) to control the time in opposition to this amendment.

The CHAIRMAN. Pursuant to the rule, the gentleman from Texas (Mr. ARCHER) will be recognized for 15 minutes, and the gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 15 minutes.

The Chair recognizes the gentleman from Texas (Mr. ARCHER).

Mr. ARCHER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman and members of the committee, the amendment which I have offered and which was adopted in committee by a 21-to-16 vote—a bipartisan vote with a majority of both Democrats and Republicans voting for it—is one that, in my opinion, has the greatest value from the standpoint of equity and fairness of any provision adopted by the committee in this bill. It would simply index the cost basis of real estate, including homes, stocks, and tangible personal property, for inflation so that the Federal Government does not continue to tax inflation. It would thereby treat individual purchasers equitably and fairly, irrespective of how long they had held property.

Today under the code, if an individual buys property and holds it for 10 years, paying intially $1,000 for that prop-

erty, and inflation is 7 percent per year compounded to 100 percent over the 10 years, and that individual sells the property for $2,000, he would pay a capital gains tax on $1,000 in spite of the fact that his real purchasing power was not increased. His $2,000 is worth no more than $1,000 10 years earlier.

Another individual buying property for $1,000 and holding it for 1 year, with a 7-percent inflation, would be taxed identically the same, in spite of the fact that his real income was 93 percent as compared to a zero real income of the original purchaser who held the property for 10 years. Obviously indexing is the only way to treat equitably these two purchasers.

We can differ on the tax rate on capital gains, but it should be only on real income. My amendment does not take effect until 1980. Thus, prospectively it will not reduce revenue in 1979. In fact, computer runouts show that it will generate an additional $10 billion of revenues for the Treasury in 1979 even before it takes effect, because of the certainty it would create in the marketplace for the future and the increased economic activity.

It is, Mr. Chairman, an amendment whose time has come. It will impact primarily to benefit individuals with incomes under $100,000 a year rather than those with incomes of over $100,000 per year. I would like to point out to the committee, Mr. Chairman, that subsequent to the date that this amendment passed the committee, the stock market has gone steadily up.

The Dow Jones average has increased over 60 points since that day. In the last 17 days the average volume on the New York Stock Exchange on a daily basis has increased 10 million shares over what the average daily volume was in the first 7 months of this year.

Mr. Chairman, recent polls on the opinion of the American people show that almost two-thirds of them support this type of amendment. They want to know that if they buy property in the years ahead that they will not pay a tax on inflation, and that is the bottom line.

A vote for my amendment is a vote against taxing inflation. A vote against it is a vote for taxing the people of this country on inflation.

Mr. ROSTENKOWSKI. Mr. Chairman, I rise in opposition to the amendment.

Mr. REUSS. Mr. Chairman, will the gentleman yield?

Mr. ROSTENKOWSKI. I yield to the gentleman from Wisconsin (Mr. REUSS).

PERSONAL EXPLANATION

Mr. REUSS. Mr. Chairman, on the vote taken a few minutes ago on the committee amendment, I was detained on official business and did not vote. Had I been here I would have voted "aye."

I would like to have the RECORD show that.

I thank the gentleman for yielding.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in opposition to this particular committee amendment which would index capital gains for inflation. It is a controversial provision with tremendous revenue consequences, and was adopted in committee only by a very close vote.

In fact, I am quite confident that now that the full revenue implications of this indexing provision are known, many of its supporters in committee will oppose its inclusion in the final product of our work.

My principle objections to this amendment were outlined in some detail in separate views contained in the committee report * * * and restated in a letter that my chairman, the gentleman from Oregon, and I sent to all Members earlier this week.

Some might say indexing anything to protect it from inflation makes sense. In the abstract that theory might be true, but in the context of the tax code and this particular bill—I do not believe so.

It has been said that unless we adopt this indexing amendment we will simply be taxing inflationary gains. But before we get caught in that rhetoric—let us look at what this amendment really does.

It applies only to capital gains—not wages, not salaries, not pensions, not savings or any other type of income earned by the average American. It is inconceivable that we can choose to totally insulate from inflation the one type of income in this country which is already cushioned from inflation—capital gains—while at the same time ignore the eroding effect of inflation on savings, wages, and salaries.

This narrowly targeted indexing provision does nothing for the average working family whose earnings on their savings do not even keep it growing at a pace equal to inflation. We would still tax all that interest as though it were a real economic gain.

In recent years, we have had the so-called double dippers in the military and in social security. This amendment would make those fortunate to have large incomes from stock and other capital assets double dippers as well.

Why?

Well, it must be remembered that under both current law and the committee bill, one-half of each capital gain is already excluded from the calculation of the regular income tax. This long-standing preferential treatment of capital gains recognizes that long-term investment gains are in part not real economic gain but the result of inflation. But, if a decision to index capital gains for inflation is to be logical and fair, this 50-percent exclusion from regular taxes should, at the same time, be reduced. To retain both the full 50-percent exclusion, and the indexing, has the effect of doubly compensating gains on capital assets for the effects of inflation.

On another point, we hear in defense of this indexing amendment about the tremendous inflationary appreciation of capital assets, and the impact of capital gains tax on that appreciation. Most Americans are familiar with rising property values. Most Americans are aware of the capital gains tax. That is because most Americans own a home—but usually, it is their only major capital asset. The committee bill already addresses inflation's impact on the sale of a house—far more directly, far more effectively, than does this complex indexing provision. The committee bill exempts most capital gains on the sale of a home from Federal tax. Although such relief is only available on a one-time basis, and is limited to $100,000, it solves all the capital gains problems for almost every American homeowner that I know.

Finally, Mr. Chairman, since this is the Revenue Act of 1978, let us talk about the revenue impact of this provision.

It should be made clear that, in the long run, the "indexing of capital gains" is by far the most expensive approach to take. The specific revenue loss attributable to the amendment is equally disturbing. Eventually, it will eliminate about one-half of all Federal income tax revenue from capital gains, a revenue loss of $4 billion a year by 1983 and increasing amounts every year thereafter—far more than the cost of other new capital investment stimulants seriously being debated in the Congress.

It must be remembered that this revenue loss is in addition to those losses anticipated under the committee bill which derive from taking virtually all capital gains out from under the scope of any minimum tax.

This amendment might well have been a "sleeper," but when fully operational, its impact on Federal revenues will be dramatic and impossible to ignore.

So, Mr. Chairman, in the interest of equity, fair tax policy and fiscal responsibility, I urge my colleagues to vote down this particular committee amendment.

Mr. ARCHER. Mr. Chairman, will the gentleman yield?

Mr. ROSTENKOWSKI. I yield to the gentleman from Texas.

Mr. ARCHER. Mr. Chairman, the gentleman from Illinois (Mr. ROSTENKOWSKI) commented about revenue losses. Those figures do not match the revenue figures that are shown in the committee report as prepared by the joint committee staff. I am wondering where the gentleman received the figures?

Mr. ROSTENKOWSKI. I received the figures from the joint committee staff and the Treasury Department.

Mr. ARCHER. How much did the gentleman say would be lost between now and 1983?

Mr. ROSTENKOWSKI. Its full impact would be $4 billion in 1983.

Mr. ARCHER. On page 21 of the committee report, to which I would refer the gentleman, in 1983 the maximum loss from corporate taxes is $977 million.

Mr. ROSTENKOWSKI. According to the figures that I have received from the Treasury Department, in 1980 we will lose $538 million, in 1981, $822 million, and its full effect in 1983 would be $4,030,000,000.

Mr. ARCHER. But those are Treasury Department figures. Are they figures from the joint committee?

Mr. ROSTENKOWSKI. I understand they are those of both the joint committee staff and the Treasury Department.

Mr. ARCHER. If the gentleman will look at the committee report, the joint committee staff figures seem to be totally at odds with those. I do not know where the gentleman's figures came from.

Mr. Chairman, if the gentleman will yield further, the gentleman says our existing tax rate on capital gains insulates the purchaser from inflation.

Does the gentleman realize that for the purchasers of stocks and bonds in the last decade, the real tax on real income has been 100 percent or more?

Mr. ROSTENKOWSKI. But the gentleman must realize that the provision that was enacted in the 1940's giving the 50-percent exemption in capital gains has been perpetuated in the law principally as an offset against inflation.

Mr. ARCHER. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. PIKE).

Mr. PIKE. Mr. Chairman, I said earlier that I voted against this bill in the committee, and I intend to do so again today.

My reasons are a little different from those of some of those who voted against it. I happen to think that our deficit is too large. I am in favor of reducing that deficit. I am not in favor of major tax cuts, but I am in favor of indexing capital gains.

Mr. Chairman, when we pass something by 21 to 16 in the Committee on Ways and Means, that is not a close vote. That is a vertiable landslide in the Committee on Ways and Means; and when we have a bipartisan vote in support of it, it is telling us something.

Very frankly, if anybody had told me that the gentleman from Texas (Mr. ARCHER) could have come up with a proposal as moderate and as reasonable as this proposal is, I would not have believed it because it does not have any retroactive effect. It does not do anything for one if he sells his house this year. It does not do anything for you really if you sell anything next year. All it does is that it says, "We are going to start the process of ending the taxation of inflation."

When we have two people who sell capital assets, and one of them has a real profit and one of them has a real loss and both of them pay a tax, that is the most unfair provision which I think we have in our tax code. Yet, that is exactly what we do today.

If someone held an asset for 20 years and inflation has caused it to increase, he is paying a tax on inflation, although he may have a real loss.

Mr. Chairman, this does not lose one dime in revenue. It will generate revenue. It will get people out of investments which they are currently locked into because they cannot afford to sell them because of the capital gains tax. It will stimulate investment. It will stimulate the economy.

In the final analysis, Mr. Chairman, we do index wages. We index wages every time we raise the minimum wage. We index pensions every time they are attached to the Consumer Price Index, and most of them are. We index everything as far as workingmen are concerned, but we do not index capital gains, and this is where the unfairness is.

Mr. Chairman, that is why I support the amendment and ask the Members to support the Archer amendment.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 3 minutes to the gentleman from Oklahoma (Mr. JONES).

Mr. JONES of Oklahoma. Mr. Chairman, I opposed the Archer amendment brought up in the Committee on Ways and Means, and I urge my colleagues to vote against it here today. Basically it is because I oppose indexing as a matter of national policy, whether we are talking about indexing taxes or whether we are talking about indexing expenditures, because in almost every country where indexing has any track record at all, they have lost discipline to fight inflation. Once you index, there is no discipline left as a matter of national policy, so I would hope that this amendment would be defeated. Instead we should be working toward a policy against indexing. Our national policy should be to fight inflation across the board, not to give in and just accommodate inflation.

It also is unfair. It would be unfair to index capital gains taxation without indexing savings accounts and interest payments as well. Investments in savings accounts are subject to the same ravages from inflation as investments in stocks and other capital assets. Indeed, with existing interest ceilings, this type of investment is more subject to the inflation of tax than capital assets, which at least have a chance of increasing in value.

In addition, the savings investor gets taxed every year on his interest, whereas the tax on capital gains is deferred until realization. So in order to be fair, if you are going to index the gain in capital gains, you ought to also index the debt that finances capital gains, and once you get into that, you get into more complexities complicating the tax code. It is not a good policy to start. It is not a good policy to follow. I hope the Archer amendment will be defeated.

Mr. ARCHER. Mr. Chairman, I yield 3 minutes to the gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Mr. Chairman, we hear a lot about how many dollars we are going to lose by this. I would say if we will just pay some attention to sense, we are not going to lose any dollars. That is a pun, but I want the Members to think about that.

The Archer amendment makes good sense. Let us look at where we are today. If we take the 20 industrialized democracies of the world and compare them to the United States, we will find that nobody taxes capital as at high a rate as we do. Nobody comes anywhere near our record of taxing capital, with the possible exception of the people in Great Britain. They come almost as high as we do.

Then if we will look at those 20 industrialized democracies and say, Who is doing the best in the world today, anybody in this room can answer it. It is Germany and Japan. And they do not tax capital gains one iota.

When I turned on my television set this morning, the dollar had dropped again; the price of gold had shot up; and people were screaming the blues about the American economy. And there is good reason to. We are following old rhetoric, and today inflation has changed all those laws.

All that the Archer amendment tries to do is to say, for your seed corn, if you are a farmer, or for your young calves, if you are a cattleman, you are not going to eat the seed corn and slaughter the calves; you are going to raise them.

The gentleman from Oklahoma (Mr. JONES) compares this with money you put in the bank. The money you put in the bank is guaranteed and insured by the Federal Government. Nobody has lost a nickel in a savings account since about 1935. But this is risk money capital we are talking about, and you are not guaranteed you are going to win.

All that you do under Archer is index your bases. You do not eat your seed corn; you do not kill your young cows. And if we know where we are going in this society to provide new venture capital for new jobs, then we have got to make it so that there is not an incentive to put your money in municipal bonds or to put it in a savings account or to just go out and spend it. We should create an incentive to save and to put your savings into new venture, risk, capital. Frankly, most people who have invested their money in the last 10 years would have been better if they had just gone out and spent it all, because investments, by and large, have not increased in real value but only in the illusion of inflation. Yes, you get more dollars but they are worth less, then you pay a capital gains tax on that, and you pay a minimum tax and when you get through you have less real purchasing power. If we are going to preserve America and make its economy strong, then we have got to preserve its capital, and we cannot tax it away by counting inflation as a gain.

Vote for the Archer amendment. It makes good sense.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 1 minute to the gentleman from Oregon (Mr. ULLMAN).

Mr. ULLMAN. Mr. Chairman, I want to say that this is not the time or the place to provide indexing on capital gains. There are real problems in indexing in any circumstances. I think we have already carried it too far in our tax law. The committee is going to look at capital formation. It may be that we will provide indexing in some form, but we ought to do it in relation to some other moves that ought to be made at the same time; so I strongly urge a no vote on this committee amendment.

Mr. ARCHER. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Chairman, I am absolutely astounded by those who say they can find justification in the Government pursuing policies which cause inflation, cause the value of property to go

up in nominal dollars of reduced value where there is no real purchasing power increase and then find that income has come in as a result thereof to justify the imposition of a tax.

Mr. Chairman, there are true capital gains. We have long since decided they should be taxed in some manner, but we have not decided in the past that we should tax inflation or that we should make a capital levy against property. When we do that, we are completely outside the American tax tradition.

Mr. Chairman, I am also astounded by those who say because we have not indexed other things as well, we will, therefore, be unfair when we index capital gains. I am one of those who would like to see indexing spread across the board to protect the purchasing power of the people; but I must say that I do not think that because a large step is indicated, a small step is a bad idea.

I trust that following on the heels of the enactment of the Archer amendment we will find a renewed interest in general indexing of the tax thresholds, so that we will not have to depend upon the political act of Congress to perform the rough indexing we have been doing for years on the income tax generally.

It seems to me, Mr. Chairman, that simple justice requires that we stop levying against the property of the people by creating inflation and then taxing the nominal dollar increase that results when misfortune or any other reason requires the sale of that property.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 2 minutes to the gentleman from Connecticut (Mr. GIAIMO).

Mr. GIAIMO. Mr. Chairman, I rise in opposition to the Archer amendment, which provides an automatic cost-of-living adjustment for certain capital assets. It is a mistake to enact this first start in a campaign to achieve complete, automatic indexing of the tax system, as well as the entire economy.

The shortcomings of the Archer amendment have been spelled out by the members of the Ways and Means Committee. My concern is with the implication that complete, automatic indexing has for the fight against inflation.

Proponents of complete, automatic indexing attribute virtues to what they are doing; the greatest of the virtues is that everybody will be able to keep up with inflation so that nobody loses because of it.

The first of these two attributes is the most deceptive of all. If there is a 6-percent rate of inflation, the prices of all goods and services will be increased by that percentage. As a result, all prices will remain in the same relative position with respect to each other and nobody will be any better or worse off than anyone else.

If all tax rates and Government spending also are indexed at the same rate, everybody is left with the same real purchasing power after taxes. Government spending continues at the same real level, and no new programs can start without a change in taxes or the completion of an existing project. Of course, the money supply will be indexed by the same percentage.

Since everybody and every institution is protected in this indexing process, there is no incentive to resist inflation. There will be no political threat to incumbents from angry voters or opportunistic office seekers, because everybody will continue living as well as before prices rose. So, the inflation will be renewed continuously, and automatically, never encountering resistance, thanks to the index machine.

The entire scheme sounds to me like the dream of a perpetual motion machine. The only thing wrong with those machines was that they never could overcome friction, however imperceptible it would be, which always slowed the machine until it eventually stopped.

Many reasons exist to oppose this amendment. The one reason which is most persuasive to me is that the amendment is deceptive, and we should not contribute to that deception of our constituents. Indexing is not designed to control inflation. It is designed to accept inflation, to give assurances that nobody will lose because of inflation and to make inflation economically painless.

There is no easy or automatic way to control inflation. It permeates the world economy, and the causes originate and are sustained throughout the world. Against such a complex of causes, Congress has no choice other than to adjust Federal fiscal and monetary policies every year to ease the most painful impacts in one area and to cause some friction in other places. That is the most courageous and intelligent way to fight inflation.

I oppose any automatic indexing scheme to adjust to inflation. It is a policy of—if inflation is inevitable, relax and enjoy it. I urge my colleagues to vote down the Archer amendment.

Mr. ARCHER. Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. COUGHLIN).

Mr. COUGHLIN. Mr. Chairman, I rise in strong support of the Archer amendment.

Mr. Chairman, as a principal House sponsor in this and the past two Congresses of tax-indexing legislation to correct the inflation penalty in our tax code, I rise in strong support of the Archer amendment.

This amendment would eliminate purely inflationary increases for the purposes of taxing capital gains. Under present law, when a taxpayer sells a house the entire difference between the original purchase price and the sale price is used to determine the increase in value for tax purposes. This is a patently unfair practice and one which forces many individuals living on fixed incomes to retain the property merely because of their inability to pay the excessive capital gains tax. Mr. ARCHER's proposal seeks to remedy this situation by allowing taxpayers to adjust the basis of certain capital assets upward by the rate of inflation. Consequently, the amendment would eliminate the taxes on the part of the gain that has merely been achieved because of inflation.

I view this amendment as a modest first step in the process of implementing indexing and feel that it should provide the basic framework for extending indexing to individual income tax rates and brackets.

As my colleagues know, tax indexing has received broad bipartisan support not only in Congress but from such national figures as Leonard Woodcock, former president of the United Automobile Workers, and Walter Wriston, president of the First National City Bank. Furthermore, a study prepared last year by the Joint Economic Committee concluded that present tax schedules aggravated the 1974–75 economic downturn and that indexing the tax rates to offset the impact of inflation would contribute to economic stability.

A recent Roper poll reported its findings which show that 60 percent of all taxpayers want some form of inflation adjustment in their taxes.

Surely, the Archer amendment provides this kind of adjustment on a limited scale and urge my fellow colleagues to vote in favor of its adoption.

The CHAIRMAN. Does the gentleman from Texas (Mr. ARCHER) wish to close debate on his amendment?

Mr. ARCHER. I wish to close debate on my amendment, Mr. Chairman.

The CHAIRMAN. Perhaps the gentleman from Illinois (Mr. ROSTENKOWSKI) should first be recognized for his 1 remaining minute.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield myself the balance of my time.

Mr. Chairman, it has been pointed out by the gentleman from Texas (Mr. ARCHER) that the figures I referred to, the $4,030 million, the cost of this indexing provision in 1983, were in error, and I would like to point out to the gentleman that if he goes to page 19 of the report and adds together the corporate and the individual figures, he will find that the figures concur both with the Treasury Department and with the Joint Committee, as to the figure of $4,030 million.

In closing, I would truly like to point out that what we are trying to do in this amendment is to provide that people who do not earn salaries or who do not have to work at day-to-day jobs like most Americans, people who are sitting back and investing in stock are the only ones being benefited by this, being protected against inflation, and I just think that is unfair.

Maybe at some time in the future, as the committee chairman has pointed out, we can work toward the possibility of indexing all types of income, but the fact of the matter remains that to index only this type of income is unconscionable.

Mr. Chairman, for 4 days earlier this week, we sat here and argued about the nuclear aircraft carrier costing $2.3 billion. The revenue lost in this amendment would allow us to build such an aircraft

carrier and all the planes that go with it every single year.

Mr. ARCHER. Mr. Chairman, I yield such time as he may consume to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Chairman, I support the Archer amendment. It will add an element of fairness now missing in the tax code, and it will be a massive, powerful stimulus to capital investment.

There simply is no way to justify taxing inflation, but under the current law that is exactly what happens. In a recent tax year, the total capital gain declared on all tax reports, when adjusted for inflation turned out to be a $1 billion loss.

Although homes are given a special treatment, homes represent the best example of inflated value. In my district, it not unusual to see homes with a cost basis of $10–$20,000 sell for from $50 to $100,000. The homes have the same economic value when they were bought originally at a low price as when they are sold recently at a high price. The gain is almost pure inflation.

But other assets are exactly like homes. Many have risen in value due solely, or mainly, to inflation. They ought to be protected against a tax on inflation just as homes should be protected.

Unfortunately, I was obliged to vote against the Archer amendment in the committee because of a commitment to the Jones bill as introduced. I am looking forward to voting for it today. It is a matter both of equity and of economic good sense and stimulus.

Mr. Chairman, I yield such time as he may consume to the gentleman from Ohio (Mr. ASHBROOK).

Mr. ASHBROOK. Mr. Chairman, I rise in strong support of the Archer amendment. This amendment, which indexes the basis on capital gains, would eliminate taxation of illusory gains resulting from inflation.

Our tax system should be taxing real income. That is not now happening, however. What we are seeing is taxation of paper increases as inflation pushes up prices.

Homeowners are special victims of this problem. A home purchased in 1969, for example, could in most cases be sold at a much higher price today. The higher price, however, is largely due to inflation.

In fact, since 1969 the cumulative rate of inflation is 76 percent. Consequently a family selling its house today for 76 percent more than they paid for it in 1969 would find they are paying a capital gains tax on phantom gains.

The Archer amendment would correct this problem. It would prevent taxation of capital gains profit that is merely the result of inflation. The taxpayer would be permitted to adjust the basis upward so as to keep pace with inflation.

Specifically, eligible assets sold anytime after 1979 could use a basis reflecting the rate of inflation for years after 1980. Assets which could be treated this way include corporate stocks, tangible personal property, and real estate such as a personal residence.

It is time to call a halt to the taxation of paper gains. We should tax real income, not illusory gains resulting from inflation.

Mr. ARCHER. Mr. Chairman, the respected gentleman from Connecticut (Mr. GIAIMO), who is chairman of the Committee on the Budget, I think, has got his comments topsy-turvy. What we have done in this country is to index everything but the tax code, to insulate everyone but the taxpayer from inflation.

In this amendment we have not guaranteed the purchasers of property any protection against loss from inflation. We merely assure them in the years ahead that we will not tax that inflation. Without this amendment the Federal Government, which is the major cause of inflation, will continue to insidiously rob the people of this country of their savings by taxing inflation instead of real gain. That is what this issue is about.

As to the revenue figure the gentleman from Illinois (Mr. ROSTENKOWSKI) mentioned, it has been drawn out of a hat. I talked with the joint committee staff, and they do not know for sure what the revenue figures are going to be. As they state in the committee report, their figures have not taken into account any increased economic activity. Computer runouts that I have seen, as I mentioned earlier today, show that even prior to the enactment of the amendment there will be a $10 billion increase in tax revenues that will come in 1979 if the amendment is enacted.

We are not talking about the loss of revenue; we are talking about more jobs, and more revenue for the Treasury of this country.

I also say to those who complain that we should index other types of income and not just capital gains that they had their opportunity in the committee but the majority voted against extending indexing to the individual tax rates when they voted against the Gradison amendment. A majority did vote for the Archer amendment by a vote of 21 to 16—including a majority of both Democrats and Republicans on the committee.

Mr. Chairman, that demonstrated a true bipartisan support for this type of amendment, and the consensus in this country is that we need this type of amendment. I urge its adoption.

The CHAIRMAN. The question is on the committee amendment.

(The question was taken; and the Chairman announced that the noes appeared to have it.)

RECORDED VOTE

Mr. ARCHER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 249, noes 167, not voting 16, as follows:

[Roll No. 680]

NOT VOTING—16

Ashley	McDonald	Sisk
Diggs	Mathis	Staggers
Hansen	Miller, Calif.	Stark
Le Fante	Rodino	Teague
Leggett	Sawyer	
Lloyd, Tenn.	Schulze	

The Clerk announced the following pairs:

On this vote:

Mrs. Lloyd of Tennessee for, with Mr. Rodino against.

Mr. Teague for, with Mr. Stark against.

Mr. McDonald for, with Mr. Miller of California against.

Mr. Sawyer for, with Mr. Staggers against.

Mr. Schulze for, with Mr. Ashley against.

Mr. Hansen for, with Mr. Diggs against.

Messrs. WOLFF, STRATTON, ZEFERETTI, WATKINS, and HANLEY changed their vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. VANIK

Mr. VANIK. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. VANIK: Strike out all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE, ETC.

(a) SHORT TITLE.—This Act may be cited as the "Tax Cut Extension Act of 1978".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment is expressed in terms of an amendment to a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. EXTENSION OF CERTAIN INDIVIDUAL INCOME TAX REDUCTIONS.

(a) GENERAL TAX CREDIT.—Section 42 (relating to general tax credit) is amended by adding at the end thereof the following new subsection:

"(f) TERMINATION.—This section shall not apply to any taxable year ending after December 31, 1980."

SEC. 3. EXTENSION AND SIMPLIFICATION OF EARNED INCOME CREDIT.

(a) Section 43 (relating to the earned income credit) is amended to read as follows:

SEC. 43. EARNED INCOME.

(a) ALLOWANCE OF CREDIT.—In the case of an eligible individual, there is allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to 10 percent of so much of the earned income for the taxable year as does not exceed $4,000.

(b) LIMITATION.—The amount of the credit allowable to a taxpayer under subsection (a) for any taxable year shall not exceed the excess (if any) of—

(1) $400, over

(2) 10 percent of so much of the adjusted gross income (or, if greater, the earned income) of the taxpayer for the taxable year as exceeds $4,000."

(c) DEFINITIONS.—For purposes of this section—

(1) ELIGIBLE INDIVIDUAL.—

(A) IN GENERAL.—The term "eligible individual" means an individual who, for the taxable year—

(i) is married (within the meaning of section 143) and is entitled to a deduction under section 151 for a child (within the meaning of section 151(e)(3)).

(ii) is a surviving spouse (as determined under section 2(a)), or

(iii) is a head of a household (as determined under subsection (b) of section 2 without regard to subparagraphs (A)(ii) and (B) of paragraph (1) of such subsection).

(B) CHILD MUST RESIDE WITH TAXPAYER IN THE UNITED STATES.—An individual shall be treated as satisfying clause (i) of subparagraph (A) only if the child has the same principal place of abode as the individual and such abode is in the United States. An individual shall be treated as satisfying clause (ii) or (iii) of subparagraph (A) only if the household in question is in the United States.

(C) INDIVIDUAL ENTITLED TO EXCLUDE INCOME UNDER SECTION 911 NOT ELIGIBLE INDIVIDUAL.—The term "eligible individual" does not include an individual who, for the taxable year, is entitled to exclude any amount from gross income under section 911 (relating to earned income from sources without the United States) or section 931 (relating to income from sources within the possessions of the United States).

(2) EARNED INCOME.—

(A) The term "earned income" means—

(i) wages, salaries, tips and other employee compensation, plus

(ii) the amount of the taxpayer's net earnings from self-employment for the taxable year (within the meaning of section 1402(a)).

(d) MARRIED INDIVIDUALS.—In the case of an individual who is married (within the meaning of section 143), this section shall apply only if a joint return is filed for the taxable year under section 6013.

(e) TAXABLE YEAR MUST BE FULL TAXABLE YEAR.—Except in the case of a taxable year closed by reason of the death of the taxpayer, no credit shall be allowed under this section in the case of a taxable year covering a period of less than 12 months.

(f) AMOUNT OF CREDIT TO BE DETERMINED UNDER TABLES.—

(1) IN GENERAL.—The amount of the credit allowed by this section shall be determined under tables prescribed by the Secretary.

(2) REQUIREMENTS FOR TABLES.—The tables prescribed under paragraph (1) shall reflect the provisions of subsections (a) and (b) and shall have income brackets of not greater than $50 each—

(A) for earned income between $0 and $8,000, and

(B) for adjusted gross income between $4,000 and $8,000.

SEC. 4. EXTENSION OF CERTAIN CORPORATE INCOME TAX REDUCTIONS.

The following provisions are each amended by striking out "December 31, 1978" and inserting in lieu thereof "December 31, 1980" and by striking out "January 1, 1979" and inserting in lieu thereof "January 1, 1981":

(1) section 11(b) (relating to normal tax);

(2) section 11(d) (relating to surtax exemption);

(3) section 821(a)(1) (relating to mutual insurance companies); and

(4) section 821(c)(1)(A) (relating to alternative tax for certain small companies).

SEC. 5. NEW TARGETED JOBS TAX CREDIT.

Section 51 (relating to amount of credit) is amended to read as follows:

SEC. 51. AMOUNT OF CREDIT.

(a) DETERMINATION OF AMOUNT.—The amount of the credit allowable by section 44B for the taxable year shall be the sum of—

(1) 50 percent of the qualified first-year wages for such year, and

(2) 16⅔ percent of the qualified second-year wages for such year.

(b) QUALIFIED WAGES DEFINED.—For purposes of this subpart—

(1) IN GENERAL.—The term "qualified wages" means the wages paid or incurred by the employer during the taxable year to individuals who are members of a targeted group.

(2) QUALIFIED FIRST-YEAR WAGES.—The term "qualified first-year wages" means, with respect to any individual, qualified wages attributable to service rendered during the 1-year period beginning with the day the individual begins work for the employer (or, in the case of a vocational rehabilitation referral, the day the individual begins work for the employer on or after the beginning of such individual's rehabilitation plan).

(3) QUALIFIED SECOND-YEAR WAGES.—The term "qualified second-year wages" means, with respect to any individual, the qualified wages attributable to service rendered during the 1-year period beginning on the day after the last day of the 1-year period with respect to such individual determined under paragraph (2).

(4) ONLY FIRST $6,000 OF WAGES PER YEAR TAKEN INTO ACCOUNT.—The amount of the qualified first-year wages, and the amount of the qualified second-year wages, which may be taken into account with respect to any individual shall not exceed $6,000 per year.

(5) WAGES DEFINED.—Except as provided in subsection (g)(2), the term "wages" has the meaning given to such term by subsection (b) of section 3306 (determined without regard to any dollar limitation contained in such section).

(c) MEMBERS OF TARGETED GROUPS.—For purposes of this subpart—

(1) IN GENERAL.—An individual is a member of a targeted group if such individual is—

(A) a WIN registrant,

(B) a vocational rehabilitation referral,

(C) a food stamp youth,

(D) a Vietnam veteran who is a member of a household receiving food stamps,

(E) an SSI recipient,

(F) a general assistance recipient, or

(G) a youth participating in a qualified cooperative education program.

(2) WIN REGISTRANT.—The term "WIN registrant" means any individual who is certified by the Secretary of Labor as having been placed in employment under a work incentive program established under section 432(b)(1) of the Social Security Act.

(3) VOCATIONAL REHABILITATION REFERRAL.—The term "vocational rehabilitation referral" means any individual who is certified by the Secretary of Labor or by the appropriate vocational rehabilitation agency as—

(A) having a physical or mental disability which, for such individual, constitutes or results in a substantial handicap to employment, and

(B) having been referred to the employer upon completion of (or while receiving) rehabilitative services pursuant to—

(i) an individualized written rehabilitation plan under a State plan for vocational rehabilitation services approved under the Rehabilitation Act of 1973, or

(ii) a program of vocational rehabilitation carried out under chapter 31 of title 38, United States Code.

(4) FOOD STAMP YOUTH.—

(A) IN GENERAL.—The term "food stamp youth" means any individual who is certified by the Secretary of Labor as meeting—

(i) the age requirements of subparagraph (B), and

(ii) the food stamp requirements of paragraph (9).

(B) AGE REQUIREMENTS.—An individual meets the age requirements of this subparagraph if such individual has attained age 18 but not age 25 on the hiring date. For purposes of the preceding sentence, an individual who, on the hiring date, has attained age 16 and has graduated from high school or a vocational school shall be treated as having attained age 18.

(5) VIETNAM VETERAN WHO IS MEMBER OF HOUSEHOLD RECEIVING FOOD STAMPS.—The term "Vietnam veteran who is member of a household receiving food stamps" means any individual who is certified by the Secretary of Labor as—

(A) (i) having served on active duty (other than active duty for training) in the Armed Forces of the United States for a period of more than 180 days, any part of which occurred after August 4, 1964, and before May 8, 1975, or

(ii) having been discharged or released from active duty in the Armed Forces of the United States for a service-connected disability if any part of such active duty was performed after August 4, 1964, and before May 8, 1975,

(B) not having any day during the preemployment period which was a day of extended active duty in the Armed Forces of the United States, and

(C) meeting the food stamp requirements of paragraph (9).

For purposes of subparagraph (B), the term "extended active duty" means a period of more than 90 days during which the individual was on active duty (other than active duty for training).

(6) SSI RECIPIENTS.—The term "SSI recipient" means any individual who is certified by the Secretary of Labor as receiving supplemental security income benefits under title XVI of the Social Security Act (including supplemental security income benefits of the type described in section 1616 of such Act or section 212 of Public Law 93-66) for any month ending in the pre-employment period.

(7) GENERAL ASSISTANCE RECIPIENTS.—

(A) IN GENERAL.—The term "general assistance recipient" means any individual who is certified by the Secretary of Labor as receiving assistance under a qualified general assistance program for any period of not less than 30 days ending within the pre-employment period.

(B) QUALIFIED GENERAL ASSISTANCE PROGRAM.—The term "qualified general assistance program" means any program of a State or a political subdivision of a State—

(i) which provides general assistance or similar assistance which—

(I) is based on used, and

(II) consists of money payments, and

(ii) which is designated by the Secretary (after consultation with the Secretary of Health, Education, and Welfare), as meeting the requirements of clause (i).

(8) YOUTH PARTICIPATING IN A QUALIFIED COOPERATIVE EDUCATION PROGRAM.—

(A) IN GENERAL.—The term "youth participating in a qualified cooperative education program" means any individual who is certified by the school participating in the program as—

(i) having attained age 16 and not having attained age 19,

(ii) not having graduated from a high school or vocational school, and

(iii) being enrolled in and actively pursuing a qualified cooperative education program.

(B) QUALIFIED COOPERATIVE EDUCATION PROGRAM DEFINED.—The term "qualified cooperative education program" means a program of vocational education for individuals who (through written cooperative arrangements between a qualified school and 1 or more employers) receive instruction (including required academic instruction) by alternation of study and school with a job in any occupational field (but only if these 2 experiences are planned by the school and employer so that each contributes to the student's education and employability).

(C) QUALIFIED SCHOOL DEFINED.—The term "qualified school" means—

(i) a specialized high school used exclusively or principally for the provision of vocational education to individuals who are available for study in preparation for entering the labor market.

(ii) the department of a high school exclusively or principally used for providing vocational education to persons who are available for study in preparation for entering the labor market, or

(iii) a technical or vocational school used exclusively or principally for the provision of vocational education to persons who have completed or left high school and who are available for study in preparation for entering the labor market.

A school which is not a public school shall be treated as a qualified school only if it is exempt from tax under section 501(a).

(D) INDIVIDUAL MUST BE CURRENTLY PURSUING PROGRAM.—Wages shall be taken into account with respect to a qualified cooperative education program only if the wages are attributable to services performed while the individual meets the requirements of subparagraph (A).

(9) FOOD STAMP REQUIREMENTS.—An individual meets the food stamp requirements of this paragraph if the appropriate food stamp agency determines that, during the pre-employment period, such individual was a member of a household which, at any time during such period, was receiving food stamps under the Food Stamp Act of 1977.

(10) PRE-EMPLOYMENT PERIOD.—The term "pre-employment period" means the 60-day period ending on the hiring date.

(11) HIRING DATE.—The term "hiring date" means the day the individual is hired by the employer.

(d) QUALIFIED FIRST-YEAR WAGES CANNOT EXCEED 30 PERCENT OF FUTA WAGES FOR ALL EMPLOYEES.—The amount of the qualified first-year wages which may be taken into account under subsection (a)(1) for any taxable year shall not exceed 30 percent of the aggregate unemployment insurance wages paid by the employer during the calendar year ending in such taxable year. For purposes of the preceding sentence, the term "unemployment insurance wages" has the meaning given to the term "wages" by section 3306(b).

(e) REMUNERATION MUST BE FOR TRADE OR BUSINESS EMPLOYMENT.—

(1) IN GENERAL.—For purposes of this subpart, remuneration paid by an employer to an employee during any year shall be taken into account only if more than one-half of the remuneration so paid is for services performed in a trade or business of the employer.

(2) SPECIAL RULE FOR CERTAIN DETERMINATION.—Any determination as to whether paragraph (1), or subparagraph (A) or (B) of subsection (g)(1), applies with respect to any employee for any year shall be made without regard to subsections (a) and (b) of section 52.

(3) YEAR DEFINED.—For purposes of this subsection and subsection (g), the term "year" means the taxable year; except that, for purposes of applying so much of such subsections as relates to subsection (d), such term means the calendar year.

(f) SECRETARY OF LABOR TO NOTIFY EMPLOYERS OF AVAILABILITY OF CREDIT.—The Secretary of Labor, in consultation with the Internal Revenue Service, shall take such steps as may be necessary or appropriate to keep employers apprised of availability of the credit provided by section 44B.

(g) SPECIAL RULES FOR AGRICULTURAL LABOR AND RAILWAY LABOR.—For purposes of this subpart—

(1) UNEMPLOYMENT INSURANCE WAGES.—

(A) AGRICULTURAL LABOR.—If the services performed by any employee for an employer during more than one-half of any pay period (within the meaning of section 3306(d)) taken into account with respect to any year constitute agricultural labor (within the meaning of section 8306(k)), the term "unemployment insurance wages" means, with respect to the remuneration paid by the employer to such employee for such year, an amount equal to so much of such remuneration as constitutes "wages" within the meaning of section 3121(a), except that the contribution and benefit base for each calendar year shall be deemed to be $6,000.

(B) RAILWAY LABOR.—If more than one-half of remuneration paid by an employer to an employee during any year is remuneration for service described in section 3306(c)(9), the term "unemployment insurance wages" means, with respect to such employee for such year, an amount equal to so much of the remuneration paid to such employee during such year which would be subject to contributions uder section 8(a) of the Railroad Unemployment Insurance Act (45 U.S.C. 358(a)) if the maximum amount subject to such contributions were $500 per month.

(2) WAGES.—In any case to which subparagraph (A) or (B) of paragraph (1) applies, the term "wages" means unemployment insurance wages (determined without regard to any dollar limitation).

Mr. VANIK (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

Mr. ROUSSELOT. Mr. Chairman, reserving the right to object, I only do so to make sure I understand what our colleague, the gentleman from Ohio (Mr. VANIK) is attempting to do.

I would ask the gentleman: At this point, what is it you are doing?

Mr. VANIK. Mr. Chairman, if the gentleman will yield, I have asked unanimous consent that the amendment that I have offered be considered as read and printed in the RECORD at this point. If that is approved by the House, then I will advise the House as to the language of my amendment.

Mr. ROUSSELOT. Mr. Chairman, further reserving the right to object, is this Vanik-Pickle amendment exactly the same as the one the gentleman offered in the Committee on Ways and Means?

Mr. VANIK. The amendment is as it was printed in the CONGRESSIONAL RECORD several days ago and corrected by the Committee on Rules. It is exactly the amendment that I offered in the Committee on Ways and Means with two changes.

Mr. ROUSSELOT. Would the gentleman tell us what those two changes are?

Mr. VANIK. Mr. Chairman, I would add that this amendment is cosponsored by my colleague, the gentleman from Texas (Mr. PICKLE), and the changes we have incorporated are identical, the two changes we have made, and the first change conforms the earned income credit language to the change in the earned income credit which was added by the Committee on Ways and Means and is in the committee bill at the present time.

The other change was a modification of the jobs credit program to provide the change that was incorporated by the Committee on Ways and Means in the bill that is before the House at this time.

Those two changes were made in existing programs and we simply changed our amendment to conform to the actions of the Committee on Ways and Means on these two items.

Mr. ROUSSELOT. Further reserving the right to object, I thank the gentleman for explaining the differences. Mr. Chairman, the only reason I ask this question is because I wanted to be sure that not only I, but other Members of the House, understood the differences between the amendments offered, the one you offered in the committee and the one now to come before us. I think there was a difference when it went through the Committee on Rules. We have had so many changes, as the gentleman understands, and so many different things have occurred since we voted on your amendment in committee.

Does Mr. Blumenthal support this amendment?

Mr. VANIK. No; I cannot say that.

Perhaps the chairman of the committee may be willing to explain the question of conformity.

Mr. ROUSSELOT. Mr. Chairman, I withdraw my reservation of objection, and I thank the gentleman.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The CHAIRMAN. The Chair would ask the gentleman from Oregon (Mr. ULLMAN) to designate the Member who will control the time for those in opposition to the amendment.

Mr. ULLMAN. Mr. Chairman, I designate the gentleman from South Carolina (Mr. HOLLAND) to control the time in opposition.

The CHAIRMAN. Pursuant to the rule, the gentleman from Ohio (Mr. VANIK) will be recognized for 15 minutes, and the gentleman from South Carolina (Mr. HOLLAND) will be recognized for 15 minutes.

The Chair recognizes the gentleman from Ohio (Mr. VANIK).

Mr. VANIK. Mr. Chairman, I believe the Members of the House are fully aware of what this amendment does. It simply extends those tax cuts which expire this year.

The proposal simply extends the general tax cut of $35 per person; the earned income credit, as modified by the Committee on Ways and Means; the jobs credit, as modified by the Committee on Ways and Means; and it provides for an extension of the small business surtax exemption.

Mr. Chairman, the Treasury impact of the bill is $9 billion; and if we did not take this action, there would be a tax increase of 7 percent across the board.

Our proposal would involve a Treasury cost of $9 billion. The committee bill involves a Treasury cost of $16 billion, on top of that. The Corman proposal calls for a $18 billion Treasury cost on top of this figure. Of course, the Roth-Kemp proposal would cost $28 billion more than the proposal offered by the gentleman from Texas (Mr. PICKLE) and me. If our proposal is adopted, it will constitute the one single thing which our Government has done this year to combat inflation. It would reduce this country's deficit to less than $29 billion.

Mr. Chairman, I think it would be a signal to the world that America is doing something about inflation. It will leave tremendous amounts of money in the money markets so that the private sector can borrow it. It will reduce the pressure on interest rates. It will reduce the pressure on inflation, and for 80 percent of the American taxpayers this bill will provide more relief than will be provided by the committee's tax cut bill.

All of the tax cut proposals before the Congress today are going to be brought about by using borrowed money. Every dollar of every single tax cut today is going to be borrowed and then given away. I do not think the American people want that to happen. They want tax cuts to come out of a Government which is going to spend less or through tax reform. None of the proposals before the committee offer that alternative.

Mr. Chairman, through our proposal, we offer an opportunity to fight the inflation which is overwhelming this country.

I want to say this, that today 23 percent of the income tax revenues of this country are spent to pay interest on what we have already borrowed. We are very close to the danger point. The collapsing dollar signals the credibility of our currency.

Mr. Chairman, I think it is regrettable that we have to be acting on a tax reduction bill this close to an election. When we organize the new Congress for those who are here, I hope that a rule will be adopted to provide that no tax cut bill can be considered by the Congress within 6 months of an election. I want tax laws written by prudent people.

Next year we are going to have to deal with the social security problem in a responsible way.

If you waste away all of this country's credit on these bills that are before us this year, you are not going to have the resources or the credit to face up to the realities of tomorrow.

Mr. Chairman, it is our solemn duty as legislators to be wise and to be provident. As the gentleman from Texas (Mr. WRIGHT) said a few days ago at a Committee on Ways and Means meeting, "as Members of this Congress we must protect our colleagues from their folly, as we must protect our constituents from their fantasies."

Mr. Chairman, I urge that the Members of this House look at the credibility of this country that will be restored by the adoption of our proposal. We can reverse the tide of inflation. I hope you will join in this effort by adopting the proposal that my colleague, the gentleman from Texas (Mr. PICKLE) and I offer to the Members of this House as an alternative to the other proposals that are before us.

Mr. Chairman, I yield such time as he may consume to my distinguished colleague, the gentleman from Texas (Mr. PICKLE). I want to point out to my colleagues that we come from different parts of America, from different political philosophies, but we have come to a conconclusion, a joint conclusion, on this very, very important and critical matter before the Congress.

I yield to my colleague, the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. I thank my colleague, the gentleman from Ohio, for yielding.

Mr. Chairman, I think it is significant to realize that whenever a Vanik and a Pickle can get together, there is plenty of room for everybody in the House to join us. We think we have an amendment of substance that deserves serious consideration. If we pass the Vanik-Pickle amendment, we can reduce the deficit by $10 to $15 billion, and we could have a surplus or a balanced budget by 1981. Can you imagine that? I think that is worth working for.

I am mindful that there is urging for the approach that the Kemp-Roth bill has recommended, but I do not think there is any great ground swell in support of this Kemp-Roth medicine show. The people understand that that old snake oil is not going to cure us. It may look good; it may smell good in an odorless sort of way; but it is just going to give us the trots; it will not cure us. We have got to keep that in mind.

I do not think there is any good in having a tax cut unless it is going to really help fight inflation. Let me give the Members these figures. To my colleagues who say that we must pass a tax cut in order to allow the taxpayers to keep up with inflation, I say that you cannot ever hope to put out a fire by throwing more gasoline no it. A tax cut would merely put money in one pocket while higher inflation takes it out of the other. We cannot continue to play those kinds of games with the American people.

Look at what we have offered here. In 1975 Congress passed a $22 billion tax cut, and we had a deficit of $43.9 billion.

In 1976 we had a tax cut of $24 billion and a deficit of $78 billion. In 1977 we had a tax cut of $34 billion and then a deficit of $45 billion. This year it is estimated at best there will be a $43 billion deficit. That means in 4 years we have had to absorb a deficit of $210 billion. It seems to me it is time for us to close ranks and not continue this same tax cut and high deficit. If we can reduce our deficit at least $10 to $15 billion, which the Vanik-Pickle amendment will do, then I think the American people will say that we have done a good thing.

Mr. VANIK. Mr. Chairman, I would like to reserve the remainder of our time.

The CHAIRMAN. The Chair recognizes the gentleman from South Carolina (Mr. HOLLAND).

Mr. HOLLAND. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am reluctant to oppose my beloved subcommittee chairman, the gentleman from Ohio (Mr. VANIK) in most anything the gentleman wants to do. I am quite disappointed that the gentleman did not use the same argument here during debate on the amendments that the gentleman used this morning in general debate, because I have been laboring under the impression since the Vanik-Pickle motion came before the Committee on Ways and Means that my distinguished friend from Ohio (Mr. VANIK) really wanted to balance the budget. That made me feel a little bit better about things, because it is something that was sort of a new idealogy.

This morning, though, the only thing the gentleman could express was discontent with the capital gains features of this entire Ways and Means package. I suspect that out of that discontent rises the Vanik-Pickle resolution, which I call the do-nothing amendment. Sometimes there is a great amount of benefit in doing nothing; but I think the key is given to us by the two authors of this amendment on page 277 of the committee report wherein it is stated:

> Almost 80 percent of the taxpayers of America will lose more in inflation than they gain in the tax cuts which present a political illusion of benefit.

Mr. Chairman, that statement is half true. The taxpayers of this country will lose by reason of inflation, but the loss will be double if we do not enact the Ways and Means Committee bill, because we will be giving no tax cut under the Vanik-Pickle resolution to make up for that inflation and they are exactly right that 80 percent of the taxpayers of this country will be losing a double portion if we fail to act on what is in my judgment a sensible, rational approach.

If there is anything I have seen in this debate that is worse than Kemp-Roth, it is this particular amendment. They say it is going to save money. In 1979 it will cost $1.9 billion to the taxpayers of this country, because it replaces the general jobs credit with a targeted jobs credit.

In addition to that, we are told time and again that every 1 percent of this Nation's unemployment costs us $19 billion.

This particular study by Data Resources, Inc., states that it would generate by 1980 an additional 300,000 jobless individuals in America—a 0.3-percent rise unemployment rate. Three-tenths of 1 percent of $19 billion, as I calculate, comes to $5.7 billion; so we add that onto it.

In addition to that, we will reduce the gross national product by 1 percent in 1980 by doing nothing. That projects an additional $23 billion loss under this provision.

In addition to that, the projected tax increase by reason of doing nothing is roughly $10 billion in 1980.

So add all that up and by the Vanik-Pickle balanced budget, do-nothing resolution, you have a loss to this Nation of $40.6 billion. I think that is a serious matter for this committee to consider. It means increased unemployment, increased inflation, lost jobs, replacing of jobs credit that is already working with one that is allegedly going to be targeted.

In addition to that, you will raise taxes for Americans by reason of inflation.

I respectfully suggest to this committee that we vote this down, that we continue with the committee version.

Mr. JOHN L. BURTON. Mr. Chairman, will the gentleman yield?

Mr. HOLLAND. I yield to the gentleman from California.

Mr. JOHN L. BURTON. Mr. Chairman, I would be happy to know how reducing the deficit to $29 billion from some $40 billion is going to fuel inflation?

If the gentleman will yield for another 30 seconds, I was out in my district 2 weeks ago. I had five town meetings and everyone said, "Forget about those phony tax cuts. You always pass them anyway. They don't help. Do something about inflation by reducing the deficit."

I just wonder how by reducing the deficit to $29 billion we will raise inflation.

Mr. HOLLAND. I believe I just categorized it as $40 billion.

Mr. JOHN L. BURTON. No; the gentleman just said as a fact it would fuel inflation. I want to find out how the gentleman arrives at that conclusion.

Mr. HOLLAND. By failure of the tax increase, you continue inflation. I did not say fuel. I said continue the inflation at the present rates; by not giving the taxpayers of this country this relief, you will cost them $10 billion out of their pockets.

Mr. JOHN L. BURTON. Mr. Chairman, may I ask, would the reduced deficit not somehow reduce or slow inflation? Somebody keeps telling me that.

Mr. HOLLAND. Perhaps they tell the gentleman that in California, I do not know. They do not tell me that in South Carolina anymore.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. HOLLAND. I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, may I respectfully say to the gentleman that I cannot understand his reasoning. I think the gentleman was here and voted for this tax cut we instituted 2 years ago, was he not?

Mr. HOLLAND. The gentleman is correct.

Mr. DE LA GARZA. That may have been an incentive, along with other things, that contributed to bring unemployment down.

Mr. HOLLAND. Among other things, among many other significant things. It was not that measure alone that brought unemployment down.

Mr. DE LA GARZA. Mr. Chairman, I cannot accept the fact that this does nothing. The gentleman says this does nothing, and yet it continues a tax cut that the gentleman supported. That helped, among other things, to bring unemployment down. It continued to help, and it can reduce the balance of unemployment substantially. Ostensibly, it would continue to reduce unemployment.

The gentleman's statement that it does nothing strikes me as perhaps being redundant. How can the gentleman say it does nothing when all the indices show that it reduced unemployment?

With the gentleman's support, we tried to reduce unemployment, and many of us have agreed to continue to work toward that end and to balance the budget.

So can the gentleman explain his statement to me?

Mr. HOLLAND. Mr. Chairman, as a member of the Committee on Ways and Means, I would like to proclaim to the Members that we can take full credit for the improvement in our Nation's economy and the reduction of employment, but there are a lot of factors involved.

Mr. ULLMAN. Mr. Chairman, will the gentleman yield?

Mr. HOLLAND. I yield to the chairman of the committee.

Mr. ULLMAN. Mr. Chairman, I thank the gentleman for yielding, and I commend him on his presentation.

But is this not the situation: If we vote for Vanik-Pickle, we are voting to junk this bill we have developed, this bill which contains so much in tax relief for the average middle-income American?

That is what we are talking about. This bill gives relief where it needs to be given now in this economy.

In addition, the fact of the matter is that even if we vote for Vanik, that would then have to go to conference, and we would have to meet with the other body and write a bill in conference. That is not the way to legislate. We ought to write our bill here and then go to conference and iron out our differences. We should not let them write the bill for us over in conference.

Mr. HOLLAND. Mr. Chairman, I agree with the committee chairman, and I say again that in my judgment this "panic" vehicle we have is the result of discontent by some of the Members with some portions of this entire package. I must tell this body that I voted against

some amendments I would have like to have voted for in the committee, and I did that in the interest of achieving a compromise. There were also some amendments I wanted to offer but did not for that purpose.

Mr. Chairman, I urge the rejection of this amendment.

Mr. DUNCAN of Oregon. Mr. Chairman, will the gentleman yield?

Mr. HOLLAND. I yield to the gentleman from Oregon.

Mr. DUNCAN of Oregon. Mr. Chairman, I would just like to state that I disagree with my colleague, the gentleman from Oregon (Mr. ULLMAN) who, I think, along with his committee, deserves a great deal of credit for the product he has brought to us.

But I would like to suggest that the difference between his position and that of the gentleman in the well and the position of the gentleman from Ohio (Mr. VANIK), the gentleman from Texas (Mr. PICKLE), and the distinguished gentleman from California (Mr. JOHN L. BURTON) is a difference in the basic assumptions on which they are operating.

I think the gentleman in the well is operating on the basis of the inevitability of a continued rise in inflation, and I think he is probably correct. If we continue with this policy of increasing the spending and decreasing the taxes, he is probably correct.

I think the assumptions behind the Vanik amendment and the statements that the gentleman from California (Mr. JOHN L. BURTON) is hearing in California are that if we can somehow or other reduce this deficit, we will be able to get a handle on inflation. Inflation is the cruelest tax of all, and I think that is the difference between the two arguments.

I think my friends, the gentleman from Ohio (Mr. VANIK) and the gentleman from Texas (Mr. PICKLE), have the better of the argument, Mr. Chairman, and I hope the committee supports the Vanik amendment.

Mr. HOLLAND. Mr. Chairman, I think the gentleman is laboring under an illusion on the subject of this amendment. It is like a fish laying out there in the moonlight. I think if the gentleman gives some time to this, if he takes a little time to study the issue, he will appreciate its true aroma.

Mr. VANIK. Mr. Chairman, I yield 3 minutes to the gentleman from Missouri (Mr. ICHORD).

Mr. ICHORD. Mr. Chairman, I have been around this body long enough that I can count votes, but I am constrained to rise in behalf of the Pickle-Vanik substitute. The gentleman from California and the gentleman from Oregon hit the nail on the head. I rise in support of the Pickle-Vanik substitute because it will result in a smaller deficit. It will result in less inflation and less unemployment.

Mr. Chairman, in the last session of Congress I conducted hearings for the Democratic research organization on the subject of Federal deficits, and we heard from all of the important people in the country dealing with money. We heard from Arthur Burns, from James Dusenberry, chairman of the department of economics at Harvard University, both liberal and conservative economists, from James Needham, the president of the New York Stock Exchange, from our colleague, the gentleman from Wisconsin (Mr. REUSS) chairman of the Committee on Banking, Finance and Urban Affairs, Henry Wallich of the Board of Governors of the Federal Reserve System; William Simon, Secretary of the Treasury; Carla Hills, Secretary of HUD; from former Congressman Brock Adams, the Small Business Administrator and many others. They disagreed on various issues. But from all of them there was a remarkable consensus of agreement that if this country continues its deficit spending, it is headed for catastrophe. The evidence and the testimony was beyond doubt, I submit, Mr. Chairman, that deficits do cause inflation. The severity of inflation varies directly with the degree to which the debt is monetized. The evidence gathered also repudiate the often "received doctrine" that there is a trade-off between inflation and unemployment.

There is no trade-off, Mr. Chairman, either in the short run or in the long run, between inflation and unemployment. In point of fact, inflation causes unemployment. Inflation causes unemployment because it erodes real profits, and by increasing unrealizable inventory profits, you increase tax liability. Profits are eroded because as real income decreases, product demand decreases. This occurs at the same time that the cost or production increases. There are many other adverse impacts on the economy which I do not have time to detail but, in summary, deficits cause inflation. Inflation causes unemployment, therefore deficits cause unemployment.

I think the gentleman from Texas and the gentleman from Ohio are exactly correct: There is an old saying in my section of the country which originated in the pioneer days which goes, "if you're going to dance you have to pay the 'fiddler'." For the last two decades the Federal Government has been dancing without paying the fiddler. Deficits of $50 billion, $60 billion, $70 billion, to the point where we now owe a national debt of approximately $812 billion dollars and are having to pay interest to serve the debt of $45 billion dollars annually, we spend the money without collecting the taxes. Now we have a new brilliant idea "cut the taxes but don't cut the spending." You can't do either one without experiencing devastating inflation. If we really want to solve the problems of inflation and unemployment, let us start paying the fiddler if we continue to do the spending dance.

Mr. HOLLAND. Mr. Chairman, I yield 1 minute to the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Chairman, I stand here in the House of Representatives to say that if the Members vote for Vanik-Pickle, they are voting to move the legislation of this tax bill over to the Senate. If they vote for Fisher-Corman, they are voting to move the deliberations of this body down to the Treasury Department.

Let me tell the Members that there is a practical reason for voting against Vanik-Pickle.

The social security tax is going up tremendously January 1, 1979. We need an offset to that if the American people are not to have a substantial increase in their withholding at that time. And one offset we need is a reduction in withholding tax rates as a result of an income tax cut at this time.

Mr. Chairman, I must say I am somewhat amused by the latter-day fiscal conservatives who come in here and say that fiscal policy is entirely a matter to be loaded on the shoulders of the American taxpayer. There are two sides to that coin. We can balance the budget at a high tax level if we want, but I do not think that is what the American people want. I hope we will consider their wishes as we struggle for a better fiscal policy.

Mr. VANIK. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Chairman, there are four fundamental reasons why we should support the Vanik-Pickle proposal. One is that it is anti-inflationary. This is the only vote we will cast this afternoon that is deflationary.

I called one of the officers of the Federal Reserve Board, and I said, "What would happen if we passed Vanik-Pickle"? He said, "The high probability is that we would have a reduction in interest rates."

In addition, we do not have excessive government intrusion in the private money market. If Members are really sincere about fighting inflation, here is their chance, not just to talk about it, but to vote.

No. 2, capital formation. We talk about the need for capital formation. If we are interested in capital formation, as the interest rates go down, that stock market is going to take off. The stock market becomes a viable possibility for capital formation.

No. 3, we want a tax system that has justice. The lower your income, the higher the percentage of your income you spend on interest, the more likely you are going to have a tough time to buy a house where high interest rates exclude you, and the more likely inflation is going to impinge on you.

Finally, we are looking for one other thing, and let us be frank. We are looking for political acceptability. I know it is great to go to our home areas and get up at that rally and say, "I voted to cut taxes," but let me tell the Members, I think there is a lot more political mileage in going back home and saying, "I voted to cut inflation."

That is precisely what Members would be doing with this vote. I urge my colleagues to do the tough thing, the responsible thing, and vote for this amendment.

Mr. HOLLAND. Mr. Chairman, I yield 1 minute to the gentleman from Wisconsin (Mr. STEIGER).

Mr. STEIGER. Mr. Chairman, the

gentleman from Illinois (Mr. SIMON) stood in the well and said that he would much rather go home and talk about how he cut inflation. I must say that somewhat amused me, because that would not be his speech. He would have to say, "I did not cut your taxes; I raised them."

The effect of the "Fickle-panic—Vani-Pickle" motion—the Bobbsey Twins—the show in the well and one of the best I have seen orchestrated in a long time—is a tax increase on the American people. It ought to be rejected, and I hope that it is rejected overwhelmingly.

Mr. HOLLAND. Mr. Chairman, I yield 1 minute to the gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Mr. Chairman, of course what the gentleman from Wisconsin (Mr. STEIGER) says is right and obvious, that from the very beginning the Vanik-Pickle proposal puts all the burden of inflation upon the taxpayer of America by refusing to not cut expenditures. What the Congress must do, if we really want to defeat inflation, is not to say, "We will not cut your taxes. We are going to make you suffer 100 percent because of inflation." That is ridiculous.

We ought to be here reducing those expenditures that we do not need, and there are some. I think all of us in Government admit that. Those ought to be reduced, but we ought to take the inflation out of the tax system. That is what we are doing with the committee bill.

So, I would urge the Members to vote for the committee and against Mr. PICKLE and Mr. VANIK, those two fine, distinguished gentlemen.

Mr. VANIK. Mr. Chairman, I yield 1 minute to the gentleman from California (Mr. JOHN L. BURTON).

Mr. JOHN L. BURTON. Mr. Chairman, if you think VANIK and PICKLE is strange, how about ICHORD and BURTON?

I would just say this: I do not see how anyone can say we are reducing the deficit because $29 billion is going to be inflationary. This cut will take inflation out of the tax code and leave it in the grocery stores where the people buy their food. There is no way in the world anybody can defend increasing the deficit and increasing inflation.

We ask, what is bothering those people? There is the loss of purchasing power, and they are losing more in purchasing power from the hidden tax of inflation than from the IRS. I think this is a sound approach.

One final thing: The Vanik amendment is exactly the same as the committee bill as it applies to the——

Mr. HOLLAND. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. The gentleman has more time than I have.

Mr. HOLLAND. I yielded to the gentleman.

Mr. JOHN L. BURTON. The gentleman had 2 minutes, and I have 2 seconds. I will yield to the gentleman.

Mr. DE LA GARZA. Mr. Chairman, I commend the gentleman in supporting this.

Mr. DE LA GARZA. Mr. Chairman, I support this amendment. Those of us devoted to balance the budget should support this amendment. If you look at all the proposals, this comes the closest to doing what all of us have tried to do. Reduce taxes. This continues the present cut and reduce the deficit. We know that this by itself will not do it, but it will help. We still must proportionately reduce expenditures, and we are working on that. I have just introduced a bill that will save $25,088 per year. It seems so small, but its all the small cuts that will continue the march toward the ultimate end of a balanced budget.

Mr. JOHN L. BURTON. I am one who has consistently voted for a balanced budget, which is more than the rest of you people supporting the committee bill can say.

Mr. HOLLAND. Mr. Chairman, I yield 1 minute to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Chairman, the Vanik-Pickle amendment should be defeated. The tax cut is needed and urgent. The reasons for the tax cut are many. For openers, taxpayers are forced into higher and higher brackets by inflation each year.

Regular salary increases often bring no increase in real wages, but they do put taxpayers into higher tax brackets. These extra inflation taxes not only lower the taxpayer's standard of living, but also force him/her to pay an increasingly higher proportion of income to the Government.

Small wonder that taxpayers are in revolt. The Congress, by not indexing tax brackets, against inflation or by not making anti-inflationary tax cuts every year, is actually increasing taxes without a vote and without a law. Estimates on this extra inflation tax run to over $10 billion a year.

For years, and especially at a low inflation rate, this congressional skullduggery went undetected. Congress has had a great incentive to allow inflation to flourish and thereby allow tax receipts to rise automatically. Revenues for its insatiable spending appetite were automatically increased each year and yet no Member of Congress voted for tax increases. But now the game is over. Taxpayers are rightfully demanding protection against inflation taxes of all times.

Another good reason for the tax cut is the huge increase in social security which was unwisely voted by Congress last December. That tax must be reduced and the social security tax system overhauled, but until that happy day, we have to take the unreasonable increases to be effective January 1, 1979, into account when we cut income taxes.

Another purpose of the tax cut is to stimulate economic activity. We are trying to encourage more investment to create new and better jobs and more productivity to become more competitive internationally.

This is the message our distinguished colleague from New York, (Mr. KEMP) has delivered so effectively over the past year. Producers and consumers in an economy need incentives, and they need certainty. This bill gives some beginning incentives, which ought to be increased, but it does not do much to add certainty. Indexation, as suggested by the gentleman from Ohio (Mr. GRADISON) is an urgent need to give real certainty. So is the excellent amendment of the gentleman from Texas (Mr. ARCHER) which is intended to protect property owners from capital gain taxes on inflation.

An additional reason to cut taxes is that it tends to hold down Congress spending. We are talking about taxes today, but the real culprit is spending. We can control taxes by controlling spending, but since we have been unable to control spending, we have to try to make less money available to the spenders.

To do otherwise, to fail to cut taxes, that is, is to place the entire burden of inflation on the taxpayer. Some of that burden ought to be on Government, on us. We ought to make some sacrifices instead of taxpayers. We can force a little sacrifice on ourselves by denying ourselves income to spend.

These are the principal reasons then for this bill: First, to mitigate the unjust and unreasonable tax increases caused by inflation and social security taxes; Second, to stimulate economic activity, create jobs, increase incentives and productivity.

Should this House, for instance, make the mistake of voting for the Vanik-Pickle amendment. we would be allowing a tax increase of about $10–13 billion for inflation and about $10 billion for social security, or a total tax increase of from $20–25 billion.

I doubt if any Member of this House wants to vote for a $20 billion tax increase.

For these single reasons, it is obvious that the committee bill, H.R. 13511, the Jones bill, is the very least we can pass. We ought to do better. We should pass Kemp-Roth, the full Steiger bill, and the Gradison amendment. But we surely cannot do less.

Mr. VANIK. Mr. Chairman, I yield the balance of my time to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. Mr. Chairman. the No. 1 fear in America today is the fear of inflation. The American people are scared to death of inflation. I think the proposal before us now is the only way today to vote to lower inflation and address a positive response to the fear of inflation.

In closing, Mr. Chairman, I think the American people will rise up and call us blessed if we pass this amendment and thus reduce the Federal deficit and reduce inflation and march forward towards a balanced budget.

We have the opportunity to write a new chapter in our fight against inflation, and it will come to the American people like a breath of fresh air in the middle of a feed lot.

Mr. Chairman, I would ask that, of the two amendments pending, the Members vote for this one. We will still have a vote for those other amendments, but this is our best opportunity to cut away at inflation.

I ask for an "aye" vote on this amendment.

Mr. HOLLAND. Mr. Chairman, I yield myself the last minute.

Mr. Chairman, I have found this debate very stimulating. We have found some new budget balances in this House. We have quoted a Treasury official, who perhaps should be brought down and made known to us by name and title, because he is telling us if we pass this amendment the interest rates will go down. That is not what was told this Member by the Treasury Department. I trust the call was made during regular hours and the person reached was not the janitor down there.

Finally, the gentleman from Texas (Mr. PICKLE) says the people will call us blessed. The gentleman from California (Mr. BURTON) should know by now that the social security taxes are going up, and if we do not give the people of this country some relief on taxes by way of this measure before us now, then those people will call us something beginning with a "B", but it will not be "blessed."

I strongly encourage the House to reject this amendment.

Mr. DUNCAN of Oregon. Mr. Chairman, though I do not expect this amendment to be accepted, the gentleman from Ohio (Mr. VANIK) and the gentleman from Texas (Mr. PICKLE) deserve our thanks for offering us what I believe to be a real opportunity to fight inflation rather than accept its inevitability.

I know the pressures for a tax cut are almost overwhelming this election year. I would doubt that Lou Harris or Gallup could turn up more than a handful of citizens who would oppose such. Indeed, all of the other amendments offered to this bill will increase the committee's tax cut. Only this amendment holds the line.

And I think that is important. I see this amendment as the only chance to reduce the budget deficit by a significant amount—it won't be done by cutting spending in spite of some rather heroic efforts and an occasional dramatic result. This amendment will cut the deficit to $28 or $29 billion—still an outrageously high figure that should induce no complacency, but substantially less appalling than if this amendment is not adopted.

And, Mr. Chairman, I can think of nothing we could do that would do more to instill confidence in the business community, and, indeed, in the international banking community, that this Government is serious about getting a handle on our fiscal policies than to adopt this amendment and reduce that deficit. I believe it would go a long ways toward halting the slide of the dollar on the international exchanges and to halting and turning back the inflation that has been increasing again these last few months.

We know inflation is the cruelest tax of all. We know that inflation is the cause of most of our troubles—with cities, schools, farmers, small businessmen, our own families, and those of our constituents. If we can reverse inflation we will have done more to help our country than a tax cut—which I think will tend to have the opposite affect.

I know that conditions are not identical, but I believe that the Kennedy tax cut in the early 1960's—in the face of indications that the Eisenhower recession was over—started us on the inflationary cycle, aggravated then by the Johnson theory that we could have both guns and butter. I believe that it is time we discipline ourselves as we have failed to do in the recent past. We do not need to stimulate an inflationary economy; we need to restrain it. I hope the Vanik-Pickle amendment is adopted.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Ohio (Mr. VANIK).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. VANIK. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 57, noes 356, not voting 19, as follows:

[Roll No. 681]

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. CORMAN

Mr. CORMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CORMAN: Section 101 of the bill (relating to widening of

brackets; rate cuts in certain brackets; increase in zero bracket amounts) is deleted and a new section 101 is inserted in lieu thereof to read as follows:

SEC. 101. RATE CUTS IN CERTAIN BRACKETS.

(a) GENERAL RULE.—Section 1 (relating to tax imposed) is amended to read as follows:

"SECTION 1. TAX IMPOSED.

"(a) Married Individuals Filing Joint Returns and Surviving Spouses.—There is hereby imposed on the taxable income of—

"(1) every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and

"(2) every surviving spouse (as defined in section 2(a)),

a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $3,200	No tax.
Over $3,200 but not over $4,200	14% of the excess over $3,200.
Over $4,200 but not over $5,200	$140, plus 15% of excess over $4,200.
Over $5,200 but not over $6,200	$290, plus 16% of excess over $5,200.
Over $6,200 but not over $7,200	$450, plus 17% of excess over $6,200.
Over $7,200 but not over $11,200	$620, plus 19% of excess over $7,200.
Over $11,200 but not over $15,200	$1,380, plus 22% of excess over $11,200.
Over $15,200 but not over $19,200	$2,260, plus 23% of excess over $15,200.
Over $19,200 but not over $23,200	$3,180, plus 25% of excess over $19,200.
Over $23,200 but not over $27,200	$4,180, plus 29% of excess over $23,200.
Over $27,200 but not over $31,200	$5,340, plus 33% of excess over $27,200.
Over $31,200 but not over $35,200	$6,660, plus 38% of excess over $31,200.
Over $35,200 but not over $39,200	$8,180, plus 42% of excess over $35,200.
Over $39,200 but not over $43,200	$9,860, plus 45% of excess over $39,200.
Over $43,200 but not over $47,200	$11,660, plus 48% of excess over $43,200.
Over $47,200 but not over $55,200	$13,580, plus 50% of excess over $47,200.
Over $55,200 but not over $67,200	$17,580, plus 53% of excess over $55,200.
Over $67,200 but not over $79,200	$23,940, plus 55% of excess over $67,200.
Over $79,200 but not over $91,200	$30,540, plus 58% of excess over $79,200.
Over $91,200 but not over $103,200	$37,500, plus 60% of excess over $91,200.
Over $103,200 but not over $123,200	$44,700, plus 62% of excess over $103,200.
Over $123,200 but not over $143,200	$57,100, plus 64% of excess over $123,200.
Over $143,200 but not over $163,200	$69,900, plus 66% of excess over $143,200.
Over $163,200 but not over $183,200	$83,100, plus 68% of excess over $163,200.
Over $183,200 but not over $203,200	$96,700, plus 69% of excess over $183,200.
Over $203,200	$110,500, plus 70% of excess over $203,200.

"(b) HEADS OF HOUSEHOLD.—There is hereby imposed on the taxable income of every individual who is the head of a household (as defined in section 2(b)) a tax determined in accordance with the following table:

"If the taxable income is:	The tax is:
Not over $2,200	No tax.
Over $2,200 but not over $3,200	14 percent of the excess over $2,200.
Over $3,200 but not over $4,200	$140, plus 16 percent of excess over $3,200.
Over $4,200 but not over $6,200	$300, plus 18 percent of excess over $4,200.
Over $6,200 but not over $8,200	$660, plus 19 percent of excess over $6,200.
Over $8,200 but not over $10,200	$1,040, plus 22 percent of excess over $8,200.
Over $10,200 but not over $12,200	$1,480, plus 23 percent of excess over $10,200.
Over $12,200 but not over $14,200	$1,940, plus 24 percent of excess over $12,200.
Over $14,200 but not over $16,200	$2,420, plus 25 percent of excess over $14,200.
Over $16,200 but not over $18,200	$2,920, plus 26 percent of excess over $16,200.
Over $18,200 but not over $20,200	$3,440, plus 30 percent of excess over $18,200.
Over $20,200 but not over $22,200	$4,040, plus 31 percent of excess over $20,200.
Over $22,200 but not over $24,200	$4,660, plus 33 percent of excess over $22,200.
Over $24,200 but not over $26,200	$5,320, plus 35 percent of excess over $24,200.
Over $26,200 but not over $28,200	$6,020, plus 36 percent of excess over $26,200.
Over $28,200 but not over $30,200	$6,740, plus 39 percent of excess over $28,200.
Over $30,200 but not over $34,200	$7,520, plus 42 percent of excess over $30,200.
Over $34,200 but not over $38,200	$9,200, plus 45 percent of excess over $34,200.
Over $38,200 but not over $40,200	$11,000, plus 48 percent of excess over $38,200.
Over $40,200 but not over $42,200	$11,960, plus 51 percent of excess over $40,200.
Over $42,200 but not over $46,200	$12,980, plus 52 percent of excess over $42,200.
Over $46,200 but not over $52,200	$15,060, plus 55% of excess over $46,200.
Over $52,200 but not over $54,200	$18,360, plus 56% of excess over $52,200.
Over $54,200 but not over $66,200	$19,480, plus 58% of excess over $54,200.
Over $66,200 but not over $72,200	$26,440, plus 59% of excess over $66,200.
Over $72,200 but not over $78,200	$29,980, plus 61% of excess over $72,200.
Over $78,200 but not over $82,200	$33,640, plus 62% of excess over $78,200.
Over $82,200 but not over $90,200	$36,120, plus 63% of excess over $82,200.
